Following are the leading ideas in Moses Hess's work: (1) The Jews will always remain strangers among the European peoples, who may emancipate them for reasons of humanity and justice, but will never respect them so long as the Jews place their own great national memories in the background and hold to the principle, "Ubi bene, ibi patria." (2) The Jewish type is indestructible, and Jewish national feeling can not be uprooted, although the German Jews, for the sake of a wider and more general emancipation, persuade themselves and others to the contrary. (3) If the emancipation of the Jews is irreconcilable with Jewish nationality, the Jews must sacrifice emancipation to nationality. Hess considers that the only solution of the Jewish question lies in the colonization of Palestine. He confidently hopes that France will aid the Jews in founding colonies extending from Suez to Jerusalem, and from the banks of the Jordan to the coast of the Mediterranean. He draws attention to the fact that such a proposition had already been made to the French government by Ernest Laharanne in "The New Oriental Question," which he cites. "Rom und Jerusalem," however, met with a cold reception (comp. "Ben Chananja," 1862; "Zion," 1897, No. 3; "Jüdischer Volkskalender," 1902; "Monatsschrift," xi. 317 *et seq.*, 354 *et seq.*). Nevertheless, it became one of the basic works of Zionism.

Hess was one of the most zealous and gifted opponents of the Reform movement. While he himself regarded religious evolution as necessary, he held that it must come by the power of the living idea of Jewish nationality and its historical cult. Hess also contributed many articles to Jewish periodicals.

HESSBERG, ALBERT: American lawyer; born at Albany, N. Y., Dec. 13, 1856. He commenced the study of law there in the office of Rufus W. Peckham, associate justice of the United States Supreme Court, and ultimately became a partner, the firm consisting of Peckham, Rosendale, and Hessberg. Upon Peckham's appointment to the bench Hessberg continued in partnership with Rosendale, and since that time the firm name has been Rosendale & Hessberg.

From 1883 to 1886 Hessberg served as assistant corporation counsel, and in 1887 was engaged as commissioner to revise the laws and ordinances of his native city. In 1888 he was elected recorder of Albany, was reelected in 1892, and served till 1896.

He has held many important positions, among others those of president of the Albany Jewish Home, governor of Albany Hospital, director of the City Safe Deposit and Storage Company, president of the Capital Railway, and treasurer of the New York State Bar Association, the last of which he has held for ten years.

A. G. H. C.

HESSE: Former landgraviate of the German-Roman empire. The only Jews mentioned in documents relating to its early history are those of some parts of Thuringia. After the organization of the county of Hesse, with the capital Hesse-Cassel (1247), and its elevation into an independent principality (1292), individual Jewish families were to be found in many localities. They were "Kammerknechte" of the empire, subject to numerous disabilities, taxed, and persecuted, as, for example, toward the end of the thirteenth century at Frankenberg and Geismar, and at the time of the Black Death in many places. Prince Philip the Magnanimous (1509-67) devoted much attention to the Jews in his dominions. In 1524 he proposed to expel them; but in 1532 he again took them under his protection; and in 1538 he praised them for many acts of kindness which they had shown to his non-Jewish subjects in money-lending transactions. In 1539, however, he promulgated a decree to the effect that the Jews should not resist efforts made to convert them; they were forbidden to build new synagogues; and their commerce was restricted. This decree was amplified in 1543 and 1554; and the Jews were forced to listen to Christian sermons.

Philip divided his territory among his sons. The divisions that chiefly concern Jews are Hesse-Cassel, Hesse-Darmstadt, and Hesse-Homburg.

Toleration.

Hesse-Cassel: Sovereign German electorate down to 1866; now incorporated with the Prussian province of Hesse-Nassau. The first regent, Wilhelm IV., the Wise (1567-92), protected the Jews: he annulled the oppressive decrees concerning them, and established the principle of general toleration. His son and successor, Moritz I. (1592-1627), was also tolerant. he protected the Jews in their trade and commerce, and permitted them to engage a district rabbi (1616). During his reign the first "Juden-Landtag" was held. During the regency of Landgravine Amalie Elizabeth severe edicts against the Jews were issued (1646); conversionist sermons were introduced by the state; and a special catechism for Jews was printed (1655). Yet in 1655 the petitions of the cities that desired to expel the Jews were rejected. Landgrave William VI. (1650-63) granted the Jews special concessions, which were renewed by succeeding rulers. From time to time oppressive decrees were issued, relating to the admission of Jews, rights of habitation, acquisition of real estate, commerce, worship, etc. From the seventeenth century the relations of the Jews to the government and their individual and communal life were regulated at diets called by the ruler, which assemblies all Jewish subjects were compelled to attend.

A better day dawned with the accession of the German emperor Joseph II. His toleration edict of May 13, 1781, was accepted in Hesse-Cassel and went into force there on Oct. 11 of the same year. The Jews were now permitted to attend public schools and the universities, and to have full rights of settlement and trade. The few remaining restrictions were removed when the electorate became a part of the new kingdom of Westphalia, after the peace of Tilsit in 1807. By a decree of King Jerome Bonaparte (Jan. 24, 1808) the Jews were entirely emancipated: they received a consistorial constitution, and Israel Jacobson was made the first president of their new organization. When the electorate of Hesse was again incorporated with Germany the Jews were once more reduced to the position of protected subjects and were required to pay protection-money. But after the liberal law of Oct. 29, 1833, all Jewish subjects, with the exception of pedlers and petty traders, were fully emancipated. Their favorable religious organization was not altered when Prussian rule began.

The following district rabbis ("Landrabbiner") deserve mention: Wolf Traube (before 1690); Veit Singer (down to 1734); Hirsch Kirchhain (d. 1779); Joseph Hess (*c.* 1780); Joseph Michael Kugelmann (*c.* 1790); Löb Maier Berlin (*c.* 1800); Ph. Romann (1836-42); L. Adler (1852-83); and the present incumbent, Dr. I. Prager (1903).

The entire district of Cassel, which in 1903 possessed 17,841 Jews in a total population of 890,069, is divided into the four district rabbinates of **Cassel** (rabbi, Dr. I. Prager), **Fulda** (rabbi, Dr. M. Cahn), **Hanau** (rabbi, Dr. S. Bamberger), and **Marburg** (rabbi, Dr. L. Munk). Each district is administered by a board of directors consisting of the royal commissioner, the provincial rabbi, and lay delegates; and each circuit has in addition a director. Jewish teachers are represented in the teachers' conferences of Hesse, founded in 1868; there is also a conference of Jewish teachers, founded in 1897. Most of the communities have ḥebra ḳaddishas and the other usual philanthropic societies.

Renewed Restrictions.

Hesse (called also **Hesse-Darmstadt** after its capital): Grand duchy; state of the German federation. The early history of its Jews corresponds on the whole with that of the German Jews in general. The ancestor of the house of Hesse-Darmstadt, Landgrave George I., the Pious (1567-96), was no friend to the Jews. He increased the amount of protection-money which they were required to pay, and issued (Jan. 1, 1585) an oppressive decree, similar in many points to that issued by Philip the Magnanimous. His successor, Ludwig V., the Faithful (1596-1626), intended to expel the Jews from Giessen and Marburg; George II., the Scholar (1626-61), followed his father's example, and threatened the Jews of Darmstadt and other places, but at their earnest request he recalled his order of expulsion. On Feb. 20, 1629, he issued a decree adding new restrictions, such as the more rigid enforcement of the oath "More Judaico." Down to about 1778 this decree was renewed from time to time, with added restrictions; for instance, Ernst Ludwig in 1692 and 1732 restricted Jewish worship, enforced the collection of the body-tax and protection-money, considerably increased the tax for admission, and imposed in the form of surplice-fees a tax to be paid to the evangelical clergy ("jura stolæ"). The social condition of the Jews was hardly changed under Ludwig VIII. (1739-68) and Ludwig IX. (1768-90). Besides paying the regular taxes, like the Christians, they were required to pay special taxes, such as protection-money; a tax for admission; the horse, fair, silver, wax, and quill taxes ("Kleppergeld"); and the "dons gratuits," which had to be paid on every change of government.

At the request of the Jews a decree relating to dress, taken from the statutes of the electorate of Mayence, was promulgated in 1773, with a view to restraining luxury. In 1783 Jews' diets are mentioned; and in 1785 Jews were ordered to use the German language in bookkeeping and commercial correspondence. With the period of enlightenment a more

Constitution of 1820.

generous spirit swept over Hesse. Under Ludwig X. (landgrave 1790–1806; grand-duke from 1806 to 1830) the "Leibzoll" was abolished, the Jews were permitted to acquire real estate, and the way was paved for emancipation. When Hesse was elevated to a grand duchy after the wars of liberation, the constitution of Dec. 17, 1820, which placed all the divisions of Hesse on an equal basis, granted to the Jews civic liberty. A special edict of July 17, 1823, regulated Jewish education, and another edict of Nov. 19, 1830, organized the congregations. A more favorable edict was substituted Nov. 2, 1841, which in turn is to be replaced by a more timely edict submitted in 1903 by the government to the Diet. In 1847 the disgraceful "moral patent," dating from the time of Napoleon and intended for Rhein-Hessen, was repealed; and after this last restriction had been removed the law promulgated on Aug. 2, 1848, decreed that "a difference in religion entails no difference in political or civic rights." The friendliness which the Hessian grand dukes displayed toward the Jews deserves special mention. As Ludwig I. energetically checked the excesses at the time of the "Hep! Hep! storm" in 1819, so Ludwig IV. and Ernst Ludwig (1903), both in speeches and by special decrees, strongly condemned anti-Semitism.

The rabbinate of Darmstadt includes a Reform congregation (rabbi, Dr. D. Selver) and an Orthodox one (rabbi, Dr. L. Marx), while Offenbach with its branch congregations is under Dr. Goldschmidt. The district of Darmstadt is divided into three district rabbinates, or provinces, Starkenburg, Ober-Hessen, and Rhein-Hessen.

The following, in alphabetical order, are the more important of the 112 congregations in the province of **Starkenburg:**

Communities.

Alsbach-Bickenbach (central cemetery for 18 congregations); Babenhausen (first mention 1318; persecution 1349); Bensheim (persecution 1349); Biblis; Darmstadt (never had many Jews; in 1903 there were about 1,400, of whom 400 form the Orthodox congregation; many philanthropic institutions, a B'nai B'rith lodge, two synagogues, and religious schools; at the beginning of the nineteenth century the rabbinate was in charge of Alexander Wolff (died Oct. 25, 1843), father of Chief Rabbi Wolff of Copenhagen; then followed B. H. Auerbach, 1835–57; Julius Landsberger, 1859–89; Dr. David Selver, 1889–); Dieburg (persecution 1349); Griesheim; Gross Gerau (new synagogue, central cemetery); Gross Steinheim (persecution 1349); Gross Zimmern; Heppenheim (persecution 1349); Höchst-im-Odenwald; Lampertheim; Lorsch; Michelstadt (down to the end of the nineteenth century seat of the rabbinate; last rabbi Sekl Löb Wormser, a famous cabalist and "ba'al shem," died Sept. 13, 1847); Offenbach (1,212 Jews; a Hebrew printing-office here formerly; Jacob FRANK, head of the Frankists, died here in 1791); Pfungstadt; Reichelsheim; Seligenstadt (persecution 1349); Wimpfen (first mention in the 13th cent.; persecution in 1349).

Following are the more important of the congregations in the province of **Ober-Hessen,** which belong to the rabbinate of Giessen (rabbis, Dr. Sander and Dr. Hirschfeld): Alsfeld; Angerod; Assenheim (first mention 1277; persecution 1349); Bad-Nauheim (first mention 1464); Nidda (first mention 1277); Büdingen (persecutions 1337, 1349); Crainfeld; Friedberg (450 Jews; many philanthropic institutions and foundations; Jews were found here at a very early date, as appears from responsa and other documents; the earliest imperial privilege is dated Dec. 11, 1275, granting exemption from taxes to the Jews who had to pay a tax to the burgrave and his retinue; later emperors confirmed and enlarged this privilege down to 1716; Friedberg suffered greatly during the persecutions of 1337 and 1349 and otherwise; prominent rabbis officiated here, the last of them being Feibisch Frankfurter from Frankfort-on-the-Oder, died Sept. 2, 1841; there is a famous women's bath here, built in 1260, and a new synagogue in the Gothic style, built in 1845); Gedern; Giessen (old Jewish community; persecutions 1349; 875 Jews, 190 of whom belong to an Orthodox congregation; many societies and foundations); Grebenau; Gross Karben; Heldenbergen; Londorf; Müngenberg (in 1188 sheltered the refugees from Mayence; birthplace of the liturgical poet David b. Kalonymus; mentioned in documents of 1277; persecution 1349); Schotten (native place of some rabbis); Wenings.

The province of **Rhein-Hessen** includes the following rabbinates: ALZEY (rabbi, Dr. J. Levi; 15 congregations); BINGEN (rabbi, Dr. R. Grünfeld; 17 congregations, among which may be mentioned Ober- and Nieder-Ingelheim; I. Klingenstein, founder of the "Achawa," taught at the former place; in the latter there is in the ruins of the palace of Charlemagne a Jewish cemetery several centuries old); MAINZ (rabbi, Dr. Salfeld; 21 congregations, including the ancient Jewish community of Oppenheim; existing since the middle of the 13th century, it suffered during the persecutions, especially in 1349; 180 Jews; new synagogue); WORMS (rabbi, Dr. A. Stein; 18 congregations).

In 1903, in a total population of 1,039,020 in the three provinces of Starkenburg, Ober-Hessen, and Rhein-Hessen, and some enclaves, there were 24,618 Jews.

D. S. Sa.

Hesse-Homburg: The first document relating to the Jews of Homburg is dated 1339, when the German emperor Ludwig the Bavarian conferred upon Gottfried V. of Homburg, Lord of Eppenstein and governor of Wetterau, the right to receive ten Jews in each of his possessions. In 1622 there were twenty Jews in the district of Homburg: in 1671, three families; in 1790, seventy-five families; in 1903 the entire population was 9,274, including 425 Jews. The condition of the Jews of Homburg was, on the whole, a favorable one; but they were heavily taxed, every Jew paying ten gulden protection-money a year, and one gulden on New-Year, in addition to such special taxes as twenty-four thalers a year to the Lutheran congregation. The first Jews' decree was issued in 1639 by Landgrave

Georg; the second in 1710 by Landgrave Ernst Ludwig; and the third in 1737 by Landgrave Friedrich Jacob.

Zacharias Seligmann.

The Jews had no organization so long as they were few in number. They did not even possess the right of prayer in common, which was first granted them in 1684 by Landgrave Friedrich, who appointed the court Jew and factor Zacharias Seligmann supervisor and representative of the Jews, as they had been accused of committing excesses during their ceremonies. He was empowered to impose fines for the transgression of the Jewish law, the money to be turned over to the landgrave; to report any wrong-doing on the part of the Jews; and, finally, to take note of everything happening among them. In return for these duties, and in virtue of his office of court factor, he was exempted from all taxes payable to the landgrave, and had various other privileges. His successor as supervisor was Itzig Bauer, who, however, was not court factor; he also was appointed by the landgrave. As the community had considerably increased in the meantime, the landgrave gave him three assistants as treasurers, who were to be elected by the community. They might make no payments without the consent of the director; they were to take note of all that happened among the Jews; determine punishments in cases of misdemeanor, and report the same to the officials of the landgrave; appoint an efficient precentor; make out and distribute the tickets for the poor; prevent cheating; keep order in the Jewish school; prevent any infraction of the Jewish ceremonies; and they were empowered to punish offenders by fines, in money or in work, and even by excommunication. The treasurers were elected every year, and might be reelected. The first election took place in 1713. In 1737 the number of candidates was increased to six, from whom the landgrave chose three.

In 1760 some changes were made in the composition of the board of managers of the community. The landgrave appointed two directors instead of one, and a "heḳdesh gabbai" (director of the shelter for travelers) was elected in place of the treasurers.

Charitable Institutions.

The Jews at first lived in whatever part of the city they chose, but when Landgrave Friedrich enlarged the city by laying out the Neustadt in 1703, he assigned a certain street to them, which was closed by gates. Although he accorded them various privileges in building up their quarter, the Jews were slow to settle there. In 1816 the ordinance compelling them to live in the Jews' street was repealed. The philanthropic institutions were mainly the same as those in other communities. In early times there was a shelter for the foreign poor, to which any one might be admitted. The expenses for board and lodging were defrayed by individual members of the community, who received tickets stating that on specified days they were each to care for one poor person in their homes or to provide money for his support. The directors had to care for the local poor, and were compelled by the government to do so in case of neglect on their part.

The Jews of Hesse-Homburg were very poor, as most of the trades were closed to them. They could work only as butchers, soap-makers, cabinetmakers, tailors, and pedlers, this last occupation affording a meager subsistence to the majority. Commerce in groceries was entirely forbidden to them. There was much call for philanthropy, therefore, and the community had a curious organization of ten philanthropic institutions, which still exist. Jews were also occasionally employed as printers. There was no exclusively Hebrew printing establishment at Homburg, but in 1737 Landgrave Friedrich Jacob established in the government printing-office a department for Hebrew books. Tefillot and maḥzorim principally were printed, and some Jewish scientific works.

The Jews of Homburg were fully emancipated in 1848, when Landgrave Gustav promulgated the following decree: "In local and state affairs no difference shall henceforth be made between our Christian and our Jewish subjects." This decree was issued in consequence of a petition by the people. In 1853 radical changes were made in the board of directors. Landgrave Ferdinand decreed that the board should consist of the rabbi as president, a director appointed by the landgrave, and three other directors nominated by the two former and confirmed by the landgrave. The rabbi alone should decide religious questions. The whole board was to determine the budget and the taxes to be levied; appoint and supervise the officials; take charge of the synagogue, religious school, women's bath, and cemetery; and provide for the elevation and education of the community. Final changes in the board were made by the government in 1876, when it was decreed that it should consist of five members chosen by the community for a period of six years, and of one deputy for each of the members, the board retaining the same functions as formerly.

The Cemeteries.

It can not be determined now when the first cemetery was laid out. In 1684 the Jews were permitted to enclose their burial-place and to erect tombstones. The burial-tax payable to the landgrave amounted to two florins for a Jew of Homburg, and four florins for a Jew of Ober-Ursel, that locality having the right to bury its dead in Homburg. The second cemetery was about two miles distant from the city. There the communities of Seulberg, Köppern, Rodheim-vor-der-Höhe, and Holzhausen buried their dead. Permission for the establishment of this cemetery was given in 1703. It is now closed. The present cemetery has been in use since 1865.

In 1684 the Jews were permitted to rent a suitable apartment, not fronting on the street, for a common chapel. The first synagogue was built in 1731, the site being presented to the community. Services were held in this synagogue until 1867, when the present synagogue was erected at a cost of 69,906 gulden. Communal houses were built in 1764 and 1877, both of them being largely used for educational purposes.

The first public school was organized in 1829 as an elementary and religious school, the teacher being under the direction of the landgrave. When a general public school for all denominations was subsequently opened at Homburg, the community was made responsible for the religious instruction of the Jewish pupils, the teacher being a regular member of the teaching staff.

Rabbis.

In 1737 the community, with the consent of the landgrave, united itself to the rabbinate of Friedberg, whose chief rabbi took charge of all rabbinical functions in both places. In 1825 the landgrave appointed Joseph Wormser as assistant rabbi, who, however, performed only the marriages. The succeeding assistant rabbis, among whom the later chief rabbi of Hamburg, Stern, may be noted, acted also as teachers in the religious schools. In 1852 the landgrave appointed the teacher and assistant rabbi Fromm as first rabbi of Hesse-Homburg, subsequently endowing the rabbinate with a state subsidy of 200 gulden, which sum is still paid by the Prussian government; this is the only instance in which a rabbi receives a subsidy from that government. Rabbi Fromm, who subsequently became chaplain to Baron Wilhelm von Rothschild, was succeeded by Dr. Auerbach, later rabbi of Nordhausen. He was followed by Dr. Appel, subsequently rabbi at Carlsruhe. The present (1903) incumbent, Dr. H. Kottek, was appointed in 1887. The officials of the community include a precentor, slaughterer, and communal servant. Its expenses were at first covered principally by taxes levied upon new arrivals and collected at marriages and deaths. The sale of honorary rights, gifts on the call to the Torah, and fees for entering the names of the dead in the memorial book also constituted a source of income. Subsequently the method of direct taxation was employed, the board apportioning the amount according to the circumstances of the individual; this arrangement still obtains.

Jahrhunderts, mit Besonderer Beziehung auf Nassau*, in *Annalen des Vereins für Nassauische Alterthumskunde*, viii. 119, Wiesbaden, 1866; Frank, *Chronologische Notizen über die Israelitische Gemeinde zu Homburg-vor-der-Höhe*, in *Der Israelit*, 1864, No. 34; *Ueber die Juden in Homburg*, in *Israelitische Wochenschrift*, Magdeburg, 1881, No. 10.

D. H. K.

HESSE-NASSAU. See NASSAU.

ḤET (ח): Eighth letter of the Hebrew alphabet. The name, perhaps, means "hedge," "fence"; on the form, which is Aramaic, see ALPHABET. "Ḥet" is a guttural, commonly pronounced nearly as the German "ch" before "a" or "o." Originally—as may be inferred from the Assyrian, in which it sometimes sinks into the spiritus lenis, and from the Arabic and Ethiopic, in which it is represented by two letters, the harsh "kha" and the softer "ḥa"—it had a double pronunciation; the softer form seems to have disappeared early. It interchanges occasionally with א, ה, and ע, rarely with palatals. It is sometimes prefixed to triliteral roots to form quadriliterals. Its numerical value is 8.

T. I. BR.

HET NEDERLANDSCHE ISRAELIET. See PERIODICALS.

HETH (חת): Second son of Canaan (Gen. x. 15; I Chron. i. 13) and, apparently, the progenitor of the Hittites. Heth's descendants are called "children of Heth" ("bene Ḥet"), and, in Abraham's time, are said to have lived at Hebron. From them Abraham purchased the cave of Machpelah (Gen. xxiii. 3, *passim*). In Gen. xxvii. 46 their women are called "daughters of Heth"; in Gen. xxviii. 6, 8, "daughters of Canaan." See HITTITES.

E. G. H. M. SEL.

HETHLON (חתלן): Place referred to in Ezekiel (xlvii. 15, xlviii. 1); situated on the northern boundary of Israel as ideally projected by that prophet, who stated the place to be in the neighborhood of Hamath and Zedad. Furrer (in "Z. D. P. V." viii. 27) identifies Hethlon with the modern Ḥaitalah, northeast of Tripoli; and Von Kastern, followed by Bertholet and Buhl, identifies it with 'Adlun, north of the mouth of the Ḳasimiyyah (Hastings, "Dict. Bible"; Buhl, "Geographie des Alten Palästina," p. 67).

E. G. H. M. SEL.

HEVESI, JOSEPH: Hungarian author and journalist; born March 15, 1857; studied at the high school in Kecskemét, and graduated from the University of Budapest. Hevesi is one of Hungary's most noted novelists. Among his works are the following: "Ibolyák," Budapest, 1879; "A Malom Alatt," 1879; "Névjegyek Janka Asztalára," 1880; "Vig Elbeszélések," 1883; "A Feltámadt Halott," 1886; "Hamis Gyémántok," 1886 (translated into German by Adolf Kohut under the title "Falsche Diamanten," Zurich, 1890); "Apró Történetek," 1887; "Nászuton," 1892; "Az ár Ellen," 1892; "A Gordiusi Csomó," 1895. Besides numerous novelettes in magazines, he has written for almost every number of the following periodicals edited by himself: "Vasárnapi Lapok," 1880–81; "Ellenör," 1883; "Magyar Szalon," 1884–91; "Szépirodalmi Könyvtár," 1890–93 (12 vols.).

Since 1892 Hevesi has been editor also of the weekly "Magyar Geniusz," and since 1894 also of the monthly review "Otthon."

S. L. V.

HEVESI, LUDWIG: Hungarian journalist and author; born Dec. 20, 1843, in Heves, Hungary. He began to study medicine and classical philology in Budapest and Vienna, but soon turned to writing, and since 1865 has been an active journalist and author. In 1866 he became engaged as collaborator on the "Pester Lloyd," and later on the "Breslauer Zeitung," for which publications he writes humorous feuilletons. In 1875 Hevesi settled in Vienna and became associate editor of the art department of the "Wiener Fremdenblatt." He also wrote the dramatic criticisms on the performances in the Hofburgtheater. During 1871–74 he edited "Kleine Leute," a journal for the young, the first seven volumes originating exclusively from his pen. In conjunction with a few friends he founded the Hungarian humoristic publication "Borsszem Jankó," which soon became a popular journal.

Hevesi's writings include: "Sie Sollen Ihn Nicht Haben: Heiteres aus Ernster Zeit," Leipsic, 1871; "Budapest," Budapest, 1873; "Des Schneidergesellen Andreas Jelky Abenteuer in Vier Welttheilen," *ib.* 1873–79, a humoristic work that has been translated into Hungarian and Finnish and enjoys great popularity, especially in Finland; "Auf der Schneide," Stuttgart, 1884; "Neues Geschichtenbuch," *ib.* 1885; "Auf der Sonnenseite," *ib.* 1886; "Almanaccando: Bilder aus Italien," *ib.* 1885; "Buch der Laune: Neue Geschichten," *ib.* 1889; "Ein Englischer September: Heitere Fahrten Jenseits des Canals," *ib.* 1891; "Regenbogen," *ib.* 1892, seven humorous tales; "Von Kalau bis Säckingen: ein Gemüthliches Kreuz und Quer," *ib.* 1893; "Glückliche Reisen," *ib.* 1895; "Zerline Gabillon, ein Künstlerleben," *ib.* 1893; "Blaue Fernen," *ib.* 1897; "Das Bunte Buch," *ib.* 1898; "Wiener Totentanz," *ib.* 1899; and in Hungarian, "Karczképek," Budapest, 1876, sketches from life in the Hungarian capital. Hevesi is regarded as one of the most original and versatile of humorists, writing German and Hungarian with equal ease and perfection. He also occupies a prominent place as an art critic, and his numerous articles on art, published in "Ver Sacrum," "Zeitschrift für Bildende Kunst," etc., have been a powerful factor in shaping public opinion with regard to current art-tendencies.

HEWERS OF WOOD (חטבי עצים): Menial servants. The Gibeonites who attempted to deceive Joshua were condemned by the princes of Israel to be hewers of wood and drawers of water to the congregation (Josh. ix. 21, 23). In Deut. xxix. 11 the hewers of wood are mentioned among the strangers as servants. The same expression is also found in Jer. xlvi. 22, where it is said that the Babylonians will come against Egypt with axes, as hewers of wood, and in II Chron. ii. 10, where Solomon asks Hiram, King of Tyre, to send him hewers (חטבים) of wood.

HEXAPLA. See ORIGEN.

HEXATEUCH: The first six books of the Bible; the Pentateuch taken together with the Book of Joshua as one originally connected work. Two reasons are given for this connection. On the assumption that it was the intention of the historian to show how the promise of YHWH concerning the possession of the Holy Land was fulfilled, the argument is advanced that he can not have broken off at the death of Moses, but must have carried his narrative down through the conquest of Canaan, recounted in Joshua. The second reason is that the sources for the Pentateuch appear to have been the sources for the Book of Joshua. But even if there were no objections to either of these contentions, they would not be sufficient to undermine the independence and completeness of the Pentateuch, evident throughout its entire composition, and verified by an uncontradicted tradition which goes back to Biblical times. The Torah has never been connected with the Book of Joshua, and has always constituted the first part of the Bible, in contradistinction to the two other parts. See JOSHUA, BOOK OF; PENTATEUCH.

E. G. H. B. J.

HEYDEMANN, HEINRICH: German archeologist; born at Greifswald Aug. 28, 1842; died at Halle Oct. 10, 1889; studied classical philology and archeology at the universities of Tübingen, Bonn, Greifswald, and Berlin, graduating from the last-named in 1865. After having published (1866), under the title "Iliupersis," an essay on Greek vase-paintings, he took a voyage to Italy and Greece, where he devoted himself principally to the study of antique vases, a study which remained the chief object of his later years. In 1869 he became docent in archeology at the University of Berlin, and in 1874 received a call as professor to Halle. Besides numerous essays in the "Annali dell' Istituto," the "Archäologische Zeitung," and the "Zeitschrift für Bildende Kunst," Heydemann published the following works: "Griechische Vasenbilder," Berlin, 1870; "Die Vasensammlungen des Museo Nazionale zu Neapel," *ib.* 1872; "Terrakotten aus dem Museo Nazionale zu Neapel," *ib.* 1882; "Dionysos' Geburt und Kindheit," Halle, 1885.

S.

HEYDENFELDT, SOLOMON: American jurist; born in Charleston, S. C., 1816; died at San Francisco Sept. 15, 1890. When twenty-one years old he left South Carolina for Alabama, where he was admitted to the bar and practised law for a number of years in Tallapoosa county. He was judge of the county court and an unsuccessful candidate for judge of Mobile. Holding views on slavery that were at variance with public opinion, he found himself obliged to leave Alabama for California, and in 1850 he settled in San Francisco. From 1852 to 1857 he was associate judge of the Supreme Court of California, and he was acknowledged to be one of the ablest justices on the bench. He was elected by direct vote of the people, being the first Jew to be thus honored.

Heydenfeldt was a Democratic politician of Southern proclivities, and supported Breckinridge in his campaign against Lincoln. Early in life he was an unsuccessful candidate for the office of United States senator before the California legislature, and he was a member of several conventions.

His practise brought him a case wherein he vindicated the right of the Jews to labor on Sunday ("People *vs.* Newman," 9 Cal. 502). Finally, when a test oath was required from lawyers, he refused to take it and retired from public practise.

A. A. M. F.

HEYMAN, ELIAS: Swedish physician; born at Göteborg in 1829; died in 1889. He studied medicine at Lund and at the Karolinska Institut, Stockholm. Heyman practised medicine at Göteborg from 1862 to 1878. He was one of the originators of the "Gothenburg System" (see "Cyclopedia of Temperance and Prohibition," *s.v.* "Sweden"), and founder of many hygienic institutions. In 1878 he was appointed professor of hygiene at the Karolinska Institut. In Stockholm he edited the medical journal "Hygeia," and was elected secretary of the Hygienic Society and director of the Hygienic Museum. In the interest of science he undertook several journeys, going in turn to England, Germany, and Holland, and visiting Montpellier and Vienna.

Heyman succeeded in organizing instruction in hygiene in Sweden, and had hardly completed this work when he died suddenly while delivering an address on that subject. Heyman wrote voluminously on scientific and practical hygiene, his works treating of vital statistics (1877), sanitation (1877), ventilation (1880), working men's dwellings, temperance, school hygiene, etc.

HEYMANN, ISAAC H.: Dutch cantor and composer; born about 1834; son of Phinehas Heymann. After having made several tours through Hungary, Heymann was cantor successively at Filehne, Graudenz, and Gnesen. In 1856 he went to Amsterdam as chief cantor, which position he still (1903) occupies. Heymann is generally called the "Gnesener ḥazzan."

Of his many compositions he has published (1898) "Shire Todah la-El," a collection which he dedicated to Queen Wilhelmina on the day of her coronation. Most of the melodies now sung by the congregation and by the synagogal choruses which he has organized have been composed by him.

Heymann has a son, Karl Heymann, a pianist and composer; and three daughters, **Louise, Sophia,** and **Johanne,** of whom the first two are singers and the last is a pianist.

HEYMANN, KARL: German pianist; born at Filehne, Posen, Oct. 6, 1853; son of Isaac H. Heymann. He received his early musical education at the Cologne Conservatorium, where he was a pupil of Hiller, Gernsheim, and Breuning, and later studied at Berlin under Friedrich Kiel (in thorough-bass and composition). He had become famous as a pianist when ill health compelled him to retire from the concert stage. In 1872, however, he accompanied Wilhelmj on a tour, and then became musical director at Prague, where he preferred to reside. He later received an appointment as court pianist to the Landgrave of Hesse, and from 1877 to 1880 he was instructor of pianoforte at Dr. Hoch's Conservatorium in Frankfort-on-the-Main. His principal compositions are a pianoforte concerto; "Elfenspiel"; "Mummenschanz"; and "Phantasiestücke."

s. J. So.

HEYMANN, PAUL: German laryngoscopist; born at Pankow, near Berlin, 1849; studied medicine at Berlin and Heidelberg (M.D., Berlin, 1874). After taking a postgraduate course at Heidelberg, Vienna, Prague, and Tübingen, he in 1878 established himself in Berlin, where in 1894 he became privat-docent and in 1899 assistant professor.

Heymann has written many essays in the medical journals, mainly on laryngoscopy, tuberculosis, and diseases of the nose and throat. He is also the editor of "Handbuch der Laryngologie und Rhinologie," Berlin, 1896-1900.

HEZEKIAH (Hebr. חזקיה, חזקיהו, יחזקיהו = "my strength is Jah"; Assyrian, "Ḥazakiau"): **1.** King of Judah (726-697 b.c.).—**Biblical Data**: Son of Ahaz and Abi or Abijah; ascended the throne at the age of twenty-five and reigned twenty-nine years (II Kings xviii. 1-2; II Chron. xxix. 1). Hezekiah was the opposite of his father, Ahaz; and no king of Judah, among either his predecessors or his successors, could, it is said, be compared to him (II Kings xviii. 5). His first act was to repair the Temple, which had been closed during the reign of Ahaz. To this end he reorganized the services of the priests and Levites, purged the Temple and its vessels, and opened it with imposing sacrifices (II Chron. xxix. 3-36). From the high places he removed the fanes which had been tolerated even by the pious kings among his predecessors, and he made the Temple the sole place for the cult of Yhwh. A still more conspicuous act was his demolition of the brazen serpent which Moses had made in the wilderness and which had hitherto been worshiped (II Kings xviii. 4). He also sent messengers to Ephraim and Manasseh inviting them to Jerusalem for the celebration of the Passover. The messengers, however, were not only not listened to, but were even laughed at; only a few men of Asher, Manasseh, and Zebulun came to Jerusalem. Nevertheless the Passover was celebrated with great solemnity and such rejoicing as had not been in Jerusalem since the days of Solomon (II Chron. xxx.). The feast took place in the second month instead of the first, in accordance with the permission contained in Num. ix. 10, 11.

Hezekiah was successful in his wars against the Philistines, driving them back in a series of victorious battles as far as Gaza (II Kings xviii. 8). He thus not only retook all the cities that his father had lost (II Chron. xxviii. 18), but even conquered others belonging to the Philistines. Josephus records ("Ant." ix. 13, § 3) that Hezekiah captured all their cities from Gaza to Gath. Hezekiah was seconded in his endeavors by the prophet Isaiah, on whose prophecies he relied, venturing even to revolt against the King of Assyria by refusing to pay the usual tribute (II Kings xviii. 7). Still, Hezekiah came entirely under Isaiah's influence only after a hard struggle with certain of his ministers, who advised him to enter into an alliance with Egypt. This proposal did not please Isaiah, who saw in it a defection of the Jews from God; and it was at his instigation that Shebna, the minister of Hezekiah's palace and probably his counselor, working for the alliance with Egypt, was deposed from office (Isa. xxii. 15-19).

Under the Influence of Isaiah.

As appears from II Kings xviii. 7-13, Hezekiah revolted against the King of Assyria almost immediately after ascending the throne. Shalmaneser invaded Samaria in the fourth year of Hezekiah's reign, and conquered it in the sixth, while Sennacherib invaded Judah in the fourteenth. The last-mentioned fact is also recorded in Isa. xxxvi. 1; but it would seem strange if the King of Assyria, who had conquered the whole kingdom of Israel, did not push farther on to Judah, and if the latter remained unmolested during ten years. In II Chron. xxxii. 1 the year in which Sennacherib invaded Judah is not given, nor is there any mention of Hezekiah's previous revolt.

Invasion of Sennacherib.

There is, besides, an essential difference between II Kings, on the one hand, and Isaiah and II Chron., on the other, as to the invasion of Sennacherib. According to the former, Sennacherib first invaded Judah in the fourteenth year of Hezekiah, and took all the fortified cities (the annals of Sennacherib report forty-six cities and 200,000 prisoners). Hezekiah acknowledged his fault and parleyed with Sennacherib about a treaty. Sennacherib imposed upon Hezekiah a tribute of three hundred talents of silver and thirty talents of gold; and in order to pay it Hezekiah was obliged to take all the silver in the Temple and in his own treasuries, and even to "cut off the gold from the doors of the Temple" (II Kings xviii. 13–16). Sennacherib, however, acted treacherously. After receiving the gold and the silver he sent a large army under three of his officers to besiege Jerusalem, while he himself with the remainder of his troops remained at Lachish (*ib.* xviii. 17). The contrary is related in II Chronicles. After Sennacherib had invaded Judah and marched toward Jerusalem, Hezekiah decided to defend his capital. He accordingly stopped up the wells; diverted the watercourse of Gihon, conducting it to the city by a subterranean canal (II Chron. xxxii. 30; Ecclus. [Sirach] xlviii. 17); strengthened the walls; and employed all possible means to make the city impregnable (II Chron. xxxii. 1–8). Still the people of Jerusalem were terror-stricken, and many of Hezekiah's ministers looked toward Egypt for help. Isaiah violently denounced the proceedings of the people, and derided their activity in fortifying the city (Isa. xxii. 1–14).

The account from the arrival of Sennacherib's army before Jerusalem under Rabshakeh till its destruction is identical in II Kings, Isaiah, and II Chronicles. Rabshakeh summoned Hezekiah to surrender, derided his hope of help from Egypt, and endeavored to inspire the people with distrust of Hezekiah's reliance on providential aid. But Sennacherib, having heard that Tirhakah, King of Ethiopia, had marched against him, withdrew his army from Jerusalem. He sent messages to Hezekiah informing him that his departure was only temporary and that he was sure of ultimately conquering Jerusalem. Hezekiah spread open the letters before God and prayed for the delivery of Jerusalem. Isaiah prophesied that Sennacherib would not again attack Jerusalem; and it came to pass that the whole army of the Assyrians was destroyed in one night by "the angel of the Lord" (II Kings xviii. 17–xix.; Isa. xxxvi.–xxxvii.; II Chron. xxxii. 9–22).

Hezekiah was exalted in the sight of the surrounding nations, and many brought him presents (II Chron. xxxii. 23). During the siege of Jerusalem Hezekiah had fallen dangerously ill, and had been told by Isaiah that he would die. Hezekiah, whose kingdom was in danger, because he had no heir (Manasseh was not born till three years later) and his death would therefore end his dynasty, prayed to God and wept bitterly. Isaiah was ordered by God to inform Hezekiah that He had heard his prayer and that fifteen years should be added to his life. His disease was to be cured by a poultice of figs; and the divine promise was ratified by the retrogression of the shadow on the sun-dial of Ahaz (II Kings xx. 1–11; Isa. xxxviii. 1–8; II Chron. xxxii. 24). After Hezekiah's recovery Merodach-baladan, King of Babylon, sent ambassadors with presents ostensibly to congratulate Hezekiah on his recovery and to inquire into the miracle (II Kings xx. 12; II Chron. xxxii. 31). His real intention may have been, however, to see how far an alliance with Hezekiah would be advantageous to the King of Babylon. Hezekiah received the ambassadors gladly, and displayed before them all his treasures, showing them that an ally of so great importance was not to be despised. But he received a terrible rebuke from Isaiah, who considered the act as indicating distrust in the divine power; whereupon Hezekiah expressed his repentance (II Chron. xx. 12–19, xxxii. 25–26; Isa. xxxix).

Hezekiah's death occurred, as stated above, after he had reigned twenty-nine years. He was buried with great honor amid universal mourning in the chief sepulcher of the sons of David (II Chron. xxxii. 33). He is represented as possessing great treasures and much cattle (*ib.* xxxii. 27–29). He is the only king after David noted for his organization of the musical service in the Temple (*ib.* xxix. 25–28). There is another similarity between him and David, namely, his poetical talent; this is attested not only by the psalm which he composed when he had recovered from his sickness (Isa. xxxviii. 10–20), but also by his message to Isaiah and his prayer (*ib.* xxxvii. 3, 4, 16–20). He is said to have compiled the ancient Hebrew writings; and he ordered the scholars of his time to copy for him the Proverbs of Solomon (Prov. xxv. 1).

E. G. H. M. Sel.

——**In Rabbinical Literature:** Hezekiah is considered as the model of those who put their trust in the Lord. Only during his sickness did he waver in his hitherto unshaken trust and require a sign, for which he was blamed by Isaiah (Lam. R. i.). The Hebrew name "Ḥizḳiyyah" is considered by the Talmudists to be a surname, meaning either "strengthened by Yhwh" or "he who made a firm alliance between the Israelites and Yhwh"; his eight other names are enumerated in Isa. ix. 5 (Sanh. 94a). He is called the restorer of the study of the Law in the schools, and is said to have planted a sword at the door of the bet ha-midrash, declaring that he who would not study the Law should be struck with the weapon (*ib.* 94b).

Hezekiah's piety, which, according to the Talmudists, alone occasioned the destruction of the Assyrian army and the signal deliverance of the Israelites when Jerusalem was attacked by Sennacherib, caused him to be considered by some as the Messiah (*ib.* 99a). According to Bar Ḳappara, Hezekiah was destined to be the Messiah, but the attribute of justice (“middat ha-din”) protested against this, saying that as David, who sang so much the glory of God, had not been made the Messiah, still less should Hezekiah, for whom so many miracles had been performed, yet who did not sing the praise of God (*ib.* 94a).

Hezekiah and Isaiah.

Hezekiah's dangerous illness was caused by the discord between him and Isaiah, each of whom desired that the other should pay him the first visit. In order to reconcile them God struck Hezekiah with a malady and ordered Isaiah to visit the sick king. Isaiah told the latter that he would die, and that his soul also would perish because he had not married and had thus neglected the commandment to perpetuate the human species. Hezekiah did not despair, however, holding to the principle that one must always have recourse to prayer. He finally married Isaiah's daughter, who bore him Manasseh (Ber. 10a). However, in Gen. R. lxv. 4, as quoted in Yalḳ., II Kings, 243, it is said that Hezekiah prayed for illness and for recovery in order that he might be warned and be able to repent of his sins. He was thus the first who recovered from illness. But in his prayer he was rather arrogant, praising himself; and this resulted in the banishment of his descendants (Sanh. 104a). R. Levi said that Hezekiah's words, “and I have done what is good in thy eyes” (II Kings xx. 3), refer to his concealing a book of healing. According to the Talmudists, Hezekiah did six things, of which three agreed with the dicta of the Rabbis and three disagreed therewith (Pes. iv., end). The first three were these: (1) he concealed the book of healing because people, instead of praying to God, relied on medical prescriptions; (2) he broke in pieces the brazen serpent (see Biblical Data, above); and (3) he dragged his father's remains on a pallet, instead of giving them kingly burial. The second three were: (1) stopping the water of Gihon; (2) cutting the gold from the doors of the Temple; and (3) celebrating the Passover in the second month (Ber. 10b; comp. Ab. R. N. ii., ed. Schechter, p. 11).

The question that puzzled Ewald (“Gesch. des Volkes Israel,” iii. 669, note 5) and others, “Where was the brazen serpent till the time of Hezekiah?” occupied the Talmudists also. They answered it in a very simple way: Asa and Joshaphat, when clearing away the idols, purposely left the brazen serpent behind, in order that Hezekiah might also be able to do a praiseworthy deed in breaking it (Ḥul. 6b).

The Midrash reconciles the two different narratives (II Kings xviii. 13-16 and II Chron. xxxii. 1-8) of Hezekiah's conduct at the time of Sennacherib's invasion (see Biblical Data, above). It says that Hezekiah prepared three means of defense: prayer, presents, and war (Eccl. R. ix. 27), so that the two Biblical statements complement each other. The reason why Hezekiah's display of his treasures to the Babylonian ambassadors aroused the anger of God (II Chron. xxxii. 25) was that Hezekiah opened before them the Ark, showing them the tablets of the covenant, and saying, “It is with this that we are victorious” (Yalḳ., *l.c.* 245).

Notwithstanding Hezekiah's immense riches, his meal consisted only of a pound of vegetables (Sanh. 94b). The honor accorded to him after death consisted, according to R. Judah, in his bier being preceded by 36,000 men whose shoulders were bare in sign of mourning. According to R. Nehemiah, a scroll of the Law was placed on Hezekiah's bier. Another statement is that a yeshibah was established on his grave—for three days, according to some; for seven, according to others; or for thirty, according to a third authority (Yalḳ., II Chron. 1085). The Talmudists attribute to Hezekiah the redaction of the books of Isaiah, Proverbs, Song of Solomon, and Ecclesiastes (B. B. 15a).

E. C. M. Sel.

Chronological Difficulties.

——**Critical View:**- The chronology of Hezekiah's time presents some difficulties. The years of his reign have been variously given as 727–696 B.C., 724–696 (Köhler), 728–697 (Duncker, “Gesch. des Altertums”), while the modern critics (Wellhausen, Kamphausen, Meyer, Stade) have 714–689. The Biblical data are conflicting. II Kings xviii. 10 assigns the fall of Samaria to the sixth year of Hezekiah. This would make 728 the year of his accession. But verse 13 of the same chapter states that Sennacherib invaded Judah in the fourteenth year of Hezekiah. The cuneiform inscriptions leave no doubt that this invasion took place in 701, which would fix 715 as Hezekiah's initial year. The account of his illness (II Kings xix.) seems to confirm this latter date. He reigned twenty-nine years (II Kings xviii. 2). His illness was contemporaneous with the events enumerated in II Kings xviii. (see *ib.* xix. 1-6). The Lord promised that his life should be prolonged fifteen years (29—15=14). His fourteenth year being 701, the first must have been 715. This will necessitate the assumption that the statement in II Kings xviii. 9-10, that Samaria was captured in the sixth year of Hezekiah, is incorrect. The other alternative is to look upon the date in verse 13 of the same chapter as a later assumption replacing an original “in his days.” Again, the number fifteen (*ib.* xix. 6) may have replaced, owing to xviii. 13, an original “ten” (comp. the “ten degrees” which the shadow on the dial receded; *ib.* xx. 10).

Another calculation renders it probable that Hezekiah did not ascend the throne before 722. Jehu's initial year is 842; and between it and Samaria's destruction the numbers in the books of Kings give for Israel 143$\frac{7}{12}$ years, for Judah 165. This discrepancy, amounting in the case of Judah to 45 years (165-120), has been accounted for in various ways; but every theory invoked to harmonize the data must concede that Hezekiah's first six years as well as Ahaz's last two were posterior to 722. Nor is it definitely known how old Hezekiah was when called to the throne. II Kings xviii. 2 makes him twenty-five years of age. It is most probable that “twenty-five” is an error for “fifteen.” His father (II Kings xvi. 2) died at the age of thirty-six, or of forty, according to Kamphausen (in Stade's “Zeitschrift,” iii. 200, and “Chronologie der Königsbücher,” p. 20). It is not likely that Ahaz at the age of eleven, or even of fifteen, should have had a son. Hezekiah's own son Manasseh ascended the throne twenty-nine years later, when he was twelve years old. This places his birth in the seventeenth year of his father's reign, or gives his father's age as forty-two, if he was twenty-five at his accession. It is more probable that Ahaz was twenty-one or twenty-five when Hezekiah was born, and that the latter was thirty-two at the birth of his son and successor, Manasseh.

Policy of Hezekiah.

To understand the motives of Hezekiah's policy, the situation in the Assyro-Babylonian empire must be kept in mind. Sargon was assassinated in 705 B.C. His successor, Sennacherib, was at once confronted by a renewed attempt of Merodach-baladan to secure Babylon's independence. This gave the signal to the smaller western tributary nations to attempt to regain their freedom from Assyrian suzerainty. The account of Merodach-baladan's embassy in II Kings xx. 12-13 fits into this period, the Babylonian leader doubtless intending to incite Judah to rise against Assyria. The motive adduced in the text, that the object of the embassy was to felicitate Hezekiah upon his recovery, would be an afterthought of a later historiographer. The censure of Hezekiah on this occasion by Isaiah could not have happened literally as reported in this chapter. Hezekiah could not have had great wealth in his possession after paying the tribute levied by the Assyrians (*ib.* xviii. 14-16). Moreover, the prophecy of Isaiah should have predicted the deportation of all these treasures to Nineveh and not to Babylon.

Underlying this incident, however, is the historical fact that Isaiah did not view this movement to rebellion with any too great favor; and he must have warned the king that if Babylon should succeed, the policy of the victor in its relations to Judah would not differ from that of Assyria. If anything, Babylon would show itself still more rapacious. Isaiah's condemnation of the proposed new course in opposition to Sennacherib is apparent from Isa. xiv. 29-32, xxix., xxx.-xxxii. Hezekiah, at first in doubt, was finally moved through the influence of the court to disregard Isaiah's warning. He joined the anti-Assyrian league, which included the Tyrian and Palestinian states, Ammon, Moab, and Edom, the Bedouin on the east and south, and the Egyptians. So prominent was his position in this confederacy that Padi, King of Ekron, who upon his refusal to join it had been deposed, was delivered over to Hezekiah for safe-keeping.

The Assyrian Accounts.

The Biblical accounts of the events subsequent to the formation of this anti-Assyrian alliance must be compared with the statements contained in Sennacherib's prism-inscription. It appears that the Assyrian king, as soon as he had subdued the Babylonian uprising in 701, set out to reestablish his authority over the western vassal states. Isaiah's fears proved only too well founded. Egypt, upon which Hezekiah had relied most to extricate him from the difficulties of the situation, proved, as usual, unreliable. Perhaps in this instance H. Winckler's theory that not the Egyptians, but the Musri and the Miluḥḥa, little kingdoms in northwestern Arabia, were the treacherous allies, must be regarded as at least plausible. For Isa. xxx. 6 pictures the difficulties besetting the embassy sent to ask for aid; and as the road to Egypt was open and much used it is not likely that a royal envoy to Egypt would encounter trouble in reaching his destination.

The consequence for Hezekiah was that he had to resume the payment of heavy tribute; but Jerusalem was not taken by Sennacherib's army. As to the details, the data in II Kings xviii. 13-xix. 37 and Isa. xxxvi.-xxxvii. are somewhat confusing. II Kings xviii. 13 declares that Sennacherib first captured all the fortified cities with the exception of the capital. But this is supplemented by the brief statement—probably drawn from another source in which the shorter form of the name חזקיה is consistently employed—that Hezekiah sent a petition for mercy to Sennacherib, then at Lachish, and paid him an exorbitant tribute in consideration for the pardon. Sennacherib nevertheless demanded the surrender of the capital; but, encouraged by Isaiah's assurance that Jerusalem could and would not be taken, Hezekiah refused, and then the death of 185,000 of the hostile army at the hands of the angel of Yhwh compelled Sennacherib at once to retreat.

Defeat of Sennacherib's Army.

The story of Sennacherib's demand and defeat is told in II Kings xviii. 17-xix. 37 (whence it passed over into Isaiah, and not vice versa), which is not by one hand. Stade and Meinhold claim this account to be composed of two parallel narratives of one event, and, as does also Duhm, declare them both to be embellishing fiction. Winckler's contention ("Gesch. Babyloniens und Assyriens," 1892, pp. 255-258, and "Alttestamentliche Untersuchungen," 1892, pp. 26 *et seq*) that two distinct expeditions by the Assyrian king are here treated as though there had been but one solves the difficulties (see also Winckler in Schrader, "K. A. T." 3d. ed., pp. 83, 273).

According to Biblical data, Sennacherib was assassinated soon after his return. But if 701 was the year of his (only) expedition, twenty years elapsed before the assassination (II Kings xix. 35 *et seq.*). Again, Tirhakah is mentioned as marching against the Assyrian king; and Tirhakah did not become Pharaoh before 691. On the first expedition against Palestine (701, his third campaign; see Schrader, "K. B." ii. 91 *et seq.*) Sennacherib, while with his main army in Philistia, sent a corps to devastate Judea and blockade Jerusalem. This prompted Hezekiah to send tribute to Lachish and to deliver his prisoner Padi, after the battle of Elteke (Altaku), where the Egyptian army, with its Ethiopic and perhaps Arabian contingents, was defeated. On the other hand, after Ekron had fallen into Assyrian hands, Sennacherib sent the Rabshakeh to force the surrender of Jerusalem. Baffled in this, the king had to return to Nineveh in consequence of the outbreak of new disturbances caused by the Babylonians (II Kings xviii. 16).

Busied with home troubles till the destruction of Babylon (700-689 B.C.), Sennacherib lost sight of the West. This interval Hezekiah utilized to regain control over the cities taken from him and divided among the faithful vassals of the Assyrian rulers. This is the historical basis for the victory ascribed to him over the Philistines (II Kings xviii. 8). The interests of Sennacherib and those of Tirhakah soon clashed (II Kings xix. 9; Herodotus, ii. 141) in their desire to get control over the commerce of western Arabia (see Isa. xx. 3 *et seq.*, xxx. 1–5, xxxi. 1–3). This was for Hezekiah the opportunity to cease paying tribute. Sennacherib's army marching against Jerusalem to punish him spread terror and caused the king again to fear the worst; but Isaiah's confidence remained unshaken (II Kings xix. 33). Indeed, in the meantime a great disaster had befallen Sennacherib's army (see Herodotus, ii. 141). Memories of this catastrophe, intermingled with those of the blockade under the Tartan (701 B.C.), are at the basis of the Biblical account of the miraculous destruction of Sennacherib before the walls of Jerusalem. The "plague" may have been the main factor in thwarting the Assyrian monarch's designs. His undoing then undoubtedly led to his assassination. Nevertheless it seems that Hezekiah found it wise to resume tributary relations with Assyria. Hence the report (in the Sennacherib inscription) of the paying of tribute and the sending of an ambassador to Nineveh.

Hezekiah as a Reformer.

There is no possible doubt that the credit given to Hezekiah for religious reforms in the Biblical reports is based on facts. Yet, as the idolatrous practises were revived most vigorously after his death, it is most probable that his reforms were not quite as extensive or intensive as a later historiography would have it appear. Certainly the fate of Samaria must have been all the more instructive as Jerusalem, by what in Isaiah's construction was the intervention of YHWH, had been spared. To make the capital, thus marked as YHWH's holy, untakable city, the exclusive sanctuary was a near thought. The "brazen serpent," probably an old totem-fetish, could not well be tolerated. Around Jerusalem the "high places" were also inhibited. But it must not be overlooked that Hezekiah's authority (or kingdom) did not extend over much territory beyond the city proper (see, however, in opposition to the views that would limit Hezekiah's influence as a religious reformer, Steuernagel, "Die Entstehung des Deuteronomischen Gesetzes," pp. 100 *et seq.*; Kittel, "Gesch. der Hebräer," ii. 302 *et seq.*).

The Psalm ("Miktab") of Hezekiah (Isa. xxxviii. 9 *et seq.*) is certainly not by that king. Neither is the superscription to Prov. xxv. based on historical facts. It is more likely that the Siloam inscription speaks of the building of the aqueduct in Hezekiah's days, though from the character of the letters a much more recent date (about 20 B.C.) has been argued for it ("Proc. Soc. Bibl. Arch." 1897, pp. 165–185).

E. G. H.

2. (חזקיה: A. V. "Hizkiah"): Ancestor of the prophet Zephaniah (Zeph. i. 1); identified by Ibn Ezra and some modern scholars with the King of Judah; Abravanel, however, rejected this identification.

3. Son of Neariah, a descendant of the royal family of Judah (I Chron. iii. 23).

4. There is a Hezekiah mentioned in connection with Ater (Ezra ii. 16; Neh. vii. 21, x. 18 [R. V. 17]; in the last two passages חזקיה). The relationship between them is not clearly indicated; in the first two passages the reading is "Ater of Hezekiah"; the Vulgate takes "Hezekiah" in the first passage as the name of a place, in the second as the father of Ater. In the third passage, "Hezekiah" comes after "Ater" without any connecting preposition.

J. M. SEL.

HEZEKIAH (Gaon): Principal of the academy at Pumbedita (1038–40). A member of an exilarchal family, he was elected to the office of principal after the murder of Hai Gaon, but was denounced to the fanatical government, imprisoned, and tortured to death. With him ended his family, with the exception of two sons who escaped to Spain, where they found a home with Joseph b. Samuel ha-Nagid. The death of Hezekiah also ended the line of the Geonim, which began four centuries before (see HANAN OF ISKIYA), and with it the Academy of Pumbedita.

S. S. M.

HEZEKIAH (the Zealot): A martyr whom some scholars identify with Hezekiah ben Garon of the Talmud (Shab. 12a, 13b, 98b, 99a). He fought for Jewish freedom and the supremacy of the Jewish law at the time when Herod was governor of Galilee (47 B.C.). When King Aristobulus, taken prisoner by the Romans, had been poisoned by the followers of Pompey, Hezekiah ("Ezekias" in Josephus, "Ant." xiv. 9, §§ 2 *et seq*) gathered together the remnants of that king's army in the mountains of Galilee and carried on a successful guerrilla war against the Romans and Syrians, while awaiting the opportunity for a general uprising against Rome. The pious men of the country looked upon him as the avenger of their honor and liberty. Antipater, the governor of the country, and his sons, however, who were Rome's agents in Palestine, viewed this patriotic band differently. In order to curry favor with the Romans, Herod, unauthorized by the king Hyrcanus, advanced against Hezekiah, took him prisoner, and beheaded him, without the formality of a trial; and he also slew many of his followers. This deed excited the indignation of all the patriots. Hezekiah and his band were enrolled among the martyrs of the nation.

E. C. J. TA.

HEZEKIAH BEN JACOB: German rabbi and tosafist; martyred at Bacharach in 1283. He was an uncle and teacher of Meïr of Rothenburg and a pupil of Abraham Hladik, the Bohemian Talmudist. He succeeded his father in the rabbinate of Magdeburg; but, as a part of the community objected to his nomination, the intervention of Moses Taku (= Tachau) was necessary to remove the difficulties. He corresponded with Isaac Or Zarua', who called him "Baḥur" (young man), but spoke of him very highly ("Or Zarua'," i., No. 114) to Abigdor ha-Kohen (Mordecai to Giṭ. No. 380) and to R. Jehiel of Paris ("Teshubot MaHRaM," No. 590). He is quoted also by many authors of responsa, by Israel Isserlin ("Terumat ha-Deshen," No. 233), by Israel of Kremsier in his "Haggahot ha-Asheri" (Mordecai to Ket. No. 291), and especially by Mordecai b. Hillel. Hezekiah wrote a commentary on the Talmud (Mordecai to Ḳid. No. 510; *idem* to B. Ḳ. No. 174), besides tosafot ("Haggahot Mordekai," Shab. No. 282) and responsa (Solomon b. Adret, Responsa, ii., No. 28).

K. M. Sel.

HEZEKIAH BEN MANOAH: French exegete of the thirteenth century. In memory of his father, who lost his right hand through his steadfastness in the faith, Hezekiah wrote (about 1240) a cabalistic commentary on the Pentateuch, under the title "Ḥazzeḳuni." It was printed at Venice in 1524. Other editions appeared at Cremona (1559), at Amsterdam (1724, in the Rabbinical Bible of M. Frankfurter), at Lemberg (1859), etc. It is based principally upon Rashi, but it uses also about twenty other commentaries, though the author quotes as his sources only Rashi, Dunash ben Labraṭ, the "Yosippon," and a "Physica" which is mentioned in the Tosafot (to Lev. xii. 2). He is generally cited by the title of his commentary.

HEZEKIAH BEN PARNAK: Palestinian amora; lived at the end of the third century. The only mention of him is in Berakot 63a, in connection with the transmission of Johanan bar Nappaḥa's exegetical explanation of the fact that the section concerning the faithless wife (Num. v. 11-31) follows the section on the refusal of the priestly tithe (*ib.* v. 5-11).

S. M. Sc.

HEZEKIAH ROMAN BEN ISAAC IBN PAḲUDA or **BAḲUDA:** Turkish scholar; flourished at Constantinople in 1600. He was the author of "Zikron ha-Sefarim," a catalogue of all the grammatical works written from the time of Judah Ḥayyuj to the time of the author, reproduced by Wolf in Hebrew and Latin in his "Bibliotheca Hebræa." The name "Hezekiah Roman" occurs in the approbation of the "Hod Malkut" of Abraham ha-Yakini (Constantinople, 1655).

Bibliography: Steinschneider, *Cat. Bodl.* col. 1844; *idem*, in *Jewish Literature*, p. 320; *Orient, Lit.* viii. 403; Wolf. *Bibl. Hebr.* i. 341.

G. I. Br.

HEZEKIAH SEFARDI. See Poland.

HEZIR (חזיר): **1.** A priest, chief of the seventeenth monthly course in the service; appointed by David (I Chron. xxiv. 15). **2.** A layman, one of the heads of the people, who signed the covenant with Nehemiah (Neh. x. 20).

E. G. H. M. Sel.

HEZRO (חצרו): A native of Carmel, one of David's heroes (II Sam. xxiii. 35, R. V.; I Chron. xi. 37). The "ḳeri," however, in the former place is "Hezrai" (חצרי), which, according to Kennicott ("Dissertation," pp. 207-208), is the original form of the name.

E. G. H. M. Sel.

HEZRON (חצרון): **1.** Son of Reuben and founder of the family of the Hezronites (Gen. xlvi. 9; Ex. vi. 14; Num. xxvi. 6). **2.** Son of Pharez and grandson of Judah, who was the direct ancestor of David (Gen. xlvi. 12; Ruth iv. 18). He had by his first marriage three sons: Jerahmeel; Ram, from whom David descended; and Caleb. Afterward he married the daughter of Machir, who bore him Segub, the father of Jair; and after his death his wife Abijah bore Ashur (I Chron. ii. 9, 21, 24). **3.** A place marking the southern limit of the territory assigned to Judah, between Kadesh-barnea and Adar (Josh. xv. 3). In the parallel list of Num. xxxiv. 4, Hezron and Addar seem to be described as one place, "Hazar-addar."

E. G. H. M. Sel.

HIBAT ALLAH ABU AL-BARAKAT B. 'ALI B. MALKA (MALKAN) AL-BALADI (*i.e.*, of Balad): Arabian physician of the twelfth century; born in Bassora. He went to Bagdad in order to study medicine under the physician Sa'id b. Hibat Allah; and as the latter did not admit Jews or Christians to his lectures, Abu al-Barakat bribed the doorkeeper and secured a room from which for about a year he heard Sa'id lecture. Later on he found an opportunity to show his medical knowledge before his teacher, and afterward became one of Sa'id's most distinguished disciples.

Abu al-Barakat served in the army, was consulted by the sultan of the Seljuks, and became physician in ordinary to the calif Al-Mustanjid (1160-70) in Bagdad. He became both blind and deaf, and died a Moslem when about eighty years old. His conversion, which took place when he was a man of mature age, was due to the insults to which he had been subjected as a Jew. Abu al-Barakat himself, however, after his conversion insulted his former coreligionists.

Among Abu al-Barakat's philosophical and medical writings are: "Al-Mu'tabir," on logic, physics, and metaphysics (Catalogue of Arabic MSS. in the Khedival Library, Cairo, vi. 41), which work he desired to be mentioned in his epitaph; "Ikhtiṣar al-Tashriḥ," a compendium of anatomy, extracted from Galen. He wrote also a translation of and commentary on Ecclesiastes, composed in 1143 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 131), and containing a eulogy of Abu al-Barakat, composed by Abraham, the son of Ibn Ezra, who was likewise a convert to Islam; and a grammar of the Hebrew language.

ḤIBBUṬ HA-ḲEBER (lit. "the beating of the grave"; called also **"Din ha-Ḳeber,"** "the judgment of [man in] the grave"): One of the seven modes of judgment or of punishment man undergoes after death, as described in the treatise "Ḥibbuṭ ha-Ḳeber," also known as "Midrash R. Yiẓḥaḳ b. Parnak." According to a description given by R. Eliezer (1st cent.) to his disciples, the Angel of Death places himself upon the grave of a person after burial and strikes him upon the hand, asking him his name; if he can not tell his name the angel brings back the soul to the body, to be submitted to judgment. For three successive days the Angel of Death, with a chain made half of iron and half of fire, smites off all the members of the body, while his host of messengers replace them in order that the dead may receive more strokes. All parts of the body, especially the eyes, ears, lips, and tongue, receive thus their punishment for the sins they have committed. Greater even than the punishment in hell, says R. Meïr, in the name of R. Eliezer, is the punishment of the grave, and neither age nor piety saves man from it; only the doing of benevolent works, the showing of hospitality, the recital of prayer in true devotion, and the acceptance of rebuke in modesty and good-will are a safeguard against it. Various prayers and Biblical verses, beginning and ending with the initial of the name of the person for whom they were intended, were indicated by the cabalists to be recited as talismans against the suffering of Ḥibbuṭ ha-Ḳeber.

HIDDEKEL. See Tigris.

ḤIDDUSHIM (or **NOVELLÆ**): Technical name of a certain class of commentaries, consisting of a number of single, "new" remarks, additions, and explanations in connection with a text and its earlier commentaries. The ḥiddushim commentaries differ from the others ("perushim," "bi'urim") in that they do not form a continuous production, as do the latter, but contribute only "new" remarks upon difficult parts of the text or its commentaries. But this original difference has not always been preserved, and the word "ḥiddushim" has been used as a general designation for commentaries, without regard to their specific character. The ḥiddushim may be divided into the following classes: (1) Ḥiddushim on Biblical books. (2) Ḥiddushim on the Talmud: (*a*) on its haggadic parts, (*b*) on its halakic parts. (3) Ḥiddushim on codices. (4) Ḥiddushim on certain rabbinical treatises.

Naḥmanides on Pentateuch.

1. The number of ḥiddushim on Biblical books is exceedingly small. Naḥmanides (d. about 1270) was the first to write them on the Pentateuch, his work being entitled "Ḥiddushim bi-Ferushe ha-Torah," or "Ḥiddushe Torah" (before 1480; 2d ed., 1489); he was plainly conscious of the difference between his work and earlier Pentateuch commentaries. In fact, his commentary differs from preceding ones in that with him it is a question of explaining not single words or grammatical constructions, but the connection between single passages and the whole book; for this reason he places a short, comprehensive table of contents at the beginning of each separate book (see Grätz, "Gesch." 3d ed., vii. 129).

Among the Biblical ḥiddushim writers of the seventeenth century may be mentioned: Elḥanan Hachndel ("Ḥiddushe Elḥanan," Offenbach, 1722 and 1731), on the Pentateuch and the Earlier Prophets; Gershon Ashkenazi (d. 1694; "Ḥiddushe ha-Gershuni," Frankfort-on-the-Main, 1710), on the Pentateuch (compare Jew. Encyc. iii. 172, *s.v.* Bible Exegesis).

2. Neither are the ḥiddushim commentaries on the haggadic parts of the Talmud numerous. The first of this kind, "Ḥiddushe Haggadot," on various treatises, was composed by Solomon ibn Adret. Fragments of this have been preserved in Jacob ibn Ḥabib's "'En Ya'aḳob." Solomon wrote this commentary with the purpose of interpreting several objectionable haggadahs and of giving them reasonable meanings (Grätz, "Gesch." 3d ed., vii. 145; Perles, "Salomo ben Adereth," pp. 55, 82, Breslau, 1863).

As examples of haggadic commentaries of. the seventeenth century may be mentioned those of Moses Dessau, or Moses ben Michael Meseritz, on Berakot, Shabbat, Ḳiddushin (1724), and of Moses ben Isaac Bonem. The latter also contains ḥiddushim on the halakic portions of the Talmud; it was printed together with the "Ḥiddushe Haggadot" (on five Talmudic treatises) of his son-in-law, Samuel Edels (Lublin, 1627).

Halakic Ḥiddushim.

The ḥiddushim commentaries on the halakic portions of the Talmud are very numerous, and, like those already mentioned, made their first appearance in Spain. They correspond to the Tosafot, which originated about the same time in the Franco-German school. As a rule they do not confine themselves to interpretations of single words and to detached notes, but reproduce the essence of the Talmudic discussion ("sugya"), interposing now and then illustrative and explanatory matter. In this the commentary of Hananeel undoubtedly served them as a model; Hananeel sometimes reproduced whole sections of the Talmud, but limited himself in the discussion to emphasizing the most important points (see Weiss, "Dor," iv. 290).

The first ḥiddushim commentaries on the halakah of the Talmud were written by Joseph ibn Migas (d. 1141). The accompanying table gives the older printed literature of this kind down to the sixteenth century, and is arranged chronologically, with mention of the date and place of the first publication. Many ḥiddushim still exist in manuscript, unpublished, but they are too numerous to be mentioned.

1. Joseph ibn Migas (d. 1141): Baba Batra, Amsterdam, 1702; Shebu'ot, Salonica, 1759.
2. Zeraḥiah ha-Levi (d. 1186): Ḳinyan, Constantinople, 1751.
3. Abraham ben David (d. 1198): Ḳinyan, Constantinople, 1751.
4. Meïr ben Todros ha-Levi Abulafia (d. 1244): Baba Batra, Salonica, 1790; Sanhedrin, Salonica, 1798.
5. Jonah Gerondi (d. 1263): Sanhedrin, Leghorn, 1801.
6. Moses ben Naḥman (d. *c.* 1270): Yebamot, Homburg, 1740; Ketubot, Metz, 1765; Ḳiddushin, Salonica, 1759; Giṭṭin, Sulzbach, 1762; Baba Batra, Venice, 1523; 'Abodah Zarah, Leghorn,

1790; Shebu'ot, Salonica, 1791; Makkot, Leghorn, 1745; Niddah, Sulzbach, 1762.

7. Isaiah di Trani ben Mali (d. about 1270): Ta'anit, Leghorn, 1742.

8. Aaron ha-Levi (d. 1300): Ketubot, Prague, 1822.

9. Solomon ibn Adret (d. 1310): Berakot, Venice, 1523; Shabbat, Constantinople, 1720; Beẓah, Lemberg, 1847; Rosh ha-Shanah, Constantinople, 1720; Megillah, Constantinople, 1720; Yebamot, Constantinople, 1720; Ḳiddushin, Constantinople, 1717; Giṭṭin, Venice, 1723; Nedarim, Constantinople, 1720; Baba Ḳamma, Constantinople, 1720; Shebu'ot, Salonica, 1729; Menaḥot, Warsaw, 1861; Ḥullin, Venice, 1723; Niddah, Altona, 1727.

10. A pupil of Solomon ibn Adret: Ḳiddushin, Venice, 1843.

11. Menahem Meïri of Perpignan (d. 1320); Beẓah, Berlin, 1859; Megillah, Amsterdam, 1769; Nedarim, Leghorn, 1795; Nazir, Leghorn, 1795; Soṭah, Leghorn, 1795.

12. Asher ben Jehiel (d. 1327): Ḳinyan, Constantinople, 1751.

13. Yom-Ṭob ben Abraham Isbili (d. 1350): Shabbat, Salonica, 1806; 'Erubin, Amsterdam, 1729; Mo'ed Ḳaṭan, Amsterdam, 1729; Yoma, Constantinople, 1754; Sukkah, Constantinople, 1720; Ta'anit, Amsterdam, 1729; Megillah, Leghorn, 1772; Yebamot, Leghorn, 1787; Ketubot, Amsterdam, 1729; Ḳiddushin, Berlin, 1715; Giṭṭin, Salonica, 1758; Nedarim, Leghorn, 1795; Baba Meẓi'a, Venice, 1608; Shebu'ot, Leghorn, 1790; Makkot, Sulzbach, 1762; Ḥullin, Prague, 1735; Niddah, Vienna, 1866.

14. Nissim Gerondi (d. *c.* 1374): Shabbat, Warsaw, 1762; Giṭṭin, Constantinople, 1711; Sanhedrin, Sulzbach, 1762; Shebu'ot, Venice, 1608; Ḥullin, Sulzbach, 1762; Niddah, Venice, 1741; 'Abodah Zarah, Jerusalem, 1903.

15. Josef Ḥabiba (d. 1400): Shebu'ot, Leghorn, 1795.

16. Simon ben Ẓemaḥ Duran (d. 1444): Rosh ha-Shanah, Leghorn, 1745; Ketubot, Leghorn, 1779; Giṭṭin, Fürth, 1779.

17. Isaac Aboab (d. 1492): Beẓah, 1608.

18. David ben Abi Zimra (d. 1573): Sanhedrin, Prague, 1725.

19. "Ḥiddushe Geonim" (anonymously): Baba Ḳamma, Salonica, 1725; Baba Meẓi'a, Salonica, 1725; Sanhedrin, Salonica, 1725.

20. "Ḥiddushim" (anonymously): Ḳiddushin, Constantinople, 1751.

21. "Ha-Ḥiddushim beli Pisḳe Dinim" (anonymously): Ta'anit, Prague, 1810.

The Later Ḥiddushim.

Toward the end of the fifteenth, and especially after the sixteenth, century, when the Talmud had already been investigated, commentated, and revised in every conceivable way, there arose, particularly in the Polish Talmudic schools, and even among the less capable teachers, the desire to say something "new," to raise questions and answer them, to point out apparent contradictions and harmonize them by pilpul. The introduction of hair-splitting distinctions into the treatment of halakic-Talmudic themes probably originated with Jacob Pollak (see Brüll, "Jahrb." vii. 35). The demand for "novellæ," which every rabbi met from his disciples, produced a large class of such ḥiddushim, too numerous to be mentioned here. Some of the ḥiddushim-writers—*e.g.*, Samuel Edels ("McHaRSHA"; d. 1631), author of "Ḥiddushim" (Basel, sixteenth century), "Ḥiddushe Niddah" (Prague, 1602), "Ḥiddushe Halakot" (Lublin, 1611, 1621), etc.; Meïr Lublin ("MaHaRaM"; d. 1616), author of "Ḥiddushe Maharam Lublin" (Sulzbach, 1686); Meïr Schiff ("MaHaRaM Schiff"; d. 1641), author of "Ḥiddushe Halakot" (Homburg, 1737); and Solomon Luria ("MaHaRSHaL"; d. 1573), author of "Ḥiddushe Maharshal" (Cracow, 1581), forming mostly a sort of supercommentary to the ḥiddushim of the older generation—are conspicuous for their common sense and critical spirit. Solomon Luria was even distinguished for a certain independence of spirit with which he attacked some of the old authorities, beating out new paths for himself (see Solomon Luria).

3. Ḥiddushim commentaries on the codices, finally, were written by: Jonah Gerondi (d. 1263; on Isaac Alfasi's "Halakot to Berakot"), 1509; Nissim Gerondi (d. *c.* 1374; on several treatises of the same work), 1509; Nathan Spira (d. 1633; on the same), 1720; Elijah Mizraḥi (d. 1526); on Moses Coucy's "Sefer ha-Miẓwot"), 1547; Gershon Ashkenazi (d. 1694; on Jacob ben Asher's "Ṭurim," ii.–iv.), Frankfort-on-the-Main, 1710; Samuel Modigliano (17th cent.; on Maimonides' "Mishneh Torah"), 1826; Jonathan Eybeschütz (d. 1764; on the same), Berlin, 1799.

4. The following authors of ḥiddushim on other rabbinical writings may be mentioned: Judah Löb ben Elijah (on the Pesaḥ Haggadah), 1722; Ẓebi H. Katzenellenbogen (on the thirty-two "middot" of Eliezer ben Jose ha-Gelili), 1822.

"Ḥiddushim" means, literally, "news," and is frequently used in this sense; *e.g.*, in the title of a little-known work by Meïr Schmelkes ben Pereẓ: "Ḥiddushim Nifla'im vom Türkischen Rumor um Belägerung die Stadt Wien A. 1683" (Prague, 1684).

ḤIDḲA: Tanna of the middle of the second century. He is quoted only in the Baraita, and is best known for the halakah (Shab. 117b) fixing the number of meals on the Sabbath as four. There is also an interesting haggadic saying by him. The question was asked, "Who testifies against the selfishness of man on the day of judgment?" Among the answers given was that of Ḥidḳa: "Man's soul testifies against him; for it is written (Micah vii. 5), 'Keep the doors of thy mouth from her who lieth in thy bosom'" (Ta'an. 11a).

HIEL (חִיאֵל): A Bethelite who rebuilt Jericho in the reign of Ahab (I Kings xvi. 34). The curse pronounced by Joshua (vi. 26) was fulfilled in Hiel, namely: "He laid the foundation thereof in Abiram his first-born, and set up the gates thereof in his youngest son Segub" (I Kings, *l.c.*). An attempt has been made to identify Hiel with Jehu (see Cheyne and Black, "Encyc. Bibl." *s.v.*; also Jew. Encyc. iv. 275, *s.v.* Corner-Stone).

HIERAPOLIS (now called **Pambuk Kalessi**): City in Phrygia, Asia Minor; mentioned in Col. iv. 13 together with the neighboring Laodicea. It was a prosperous city during the Roman period, largely on account of its medicinal springs. A community of Jews lived there during the second and third centuries, three or four of whose grave-inscriptions have been found. In one (found 1853 by Wagener) Publius Ælius Glycon consecrates a family sepulcher and bequeaths "to the honored directors of [the gild of] purple-dyers" 200 denarii, that his grave may be decorated "on the Feast of Unleavened Bread": to "the gild of carpet-weavers" 150 denarii, to be used for a similar purpose on the

Feast of Pentecost. Aurelia Glyconida, daughter of Ammianus, consecrates a sepulcher for herself, while her husband Marcus Aurelius Theophilus, called "Asaph" (?), "of the people of the Jews," forbids, under a fine of 100 denarii against the Jewish community, the burying of strangers there.

The inscription on the tomb of one Aurelia Augusta of the Soteikos also provides for a fine against the Jewish community if any one besides herself, her husband Glyconianus Apros, and her children be buried there. An inscription (Ramsay, No. 412) found on a tomb outside the city gate and on the road to Tripolis, set by a certain Marcus Aurelius Diodorus Koriaskos, called "Asbolos," also attaches a fine to the interment there of strangers, against the "sacred management" and the "revered gerusia." A certain sum is left, also, to the "council of the purple-dyers" for some religious act on the anniversary of the birthday of the deceased. It is possible that the "gild of the purple-dyers" was a Jewish body. The decorating of the graves on Jewish holy days shows how far the Jews of Phrygia had departed from Talmudic usage.

HIEREI: Term used to denote the priests (כהנים) in the constitution of the Jewish community in Rome. Even so late as the fourth century of the common era they had a distinct position in the religious life of the community, and ranked higher than the archisynagogi, as may be seen from one of the novels of Justinian ("Codex Theodosianus," xvi. 8).

HIERONYMUS. See Jerome.

HIGH PLACE (Hebrew, "bamah"; plural, "bamot"): A raised space primitively on a natural, later also on an artificial, elevation devoted to and equipped for the sacrificial cult of a deity. The term occurs also in the Assyrian ("bamati"; see Friedrich Delitzsch, "Assyrisches Handwörterb." p. 177); and in the Mesha inscription it is found (line 3) as במת, which leaves the grammatical number doubtful. Etymologically the long ā (ָ) indicates derivation from a non-extant root, בום. The meaning is assured. The only point in doubt is whether the bamah originally received its name from the circumstance that it was located on a towering elevation or from the possible fact that, independently of its location, it was itself a raised construction. The latter view seems the more reasonable.

Etymology of "Bamah."

The use in Assyrian of "bamati" in the sense of "mountains" or "hill country," as opposed to the plains, as well as similar implications in Hebrew (II Sam. i. 19, "high places" parallel to the "mountains" in II Sam. i. 21; comp. Micah iii. 12; Josh. xxvi. 18; Ezek. xxxvi. 2; Num. xxi. 28), is secondary. Because the bamah was often located on a hilltop, it gave its name to the mountain. The reverse is difficult to assume in view of the fact that the bamah is often differentiated from the supporting elevation (Ezek. vi. 3; I Kings xi. 7, xiv. 23), and that bamot were found in valleys (Jer. vii. 31, xix. 5, xxxii. 35; Ezek. *l.c.*) and in cities (I Kings xiii. 32; II Kings xvii. 9, xxiii. 5) at their gates (II Kings xxiii. 8).

Though in many passages the term may rightly be taken to connote any shrine or sanctuary without reference to elevation or particular construction (see Amos vii. 9, where "high places" = "sanctuaries"), yet there must have been peculiarities in the bamah not necessarily found in any ordinary shrine. At all events, altar and bamot are distinct in II Kings xxiii. 13; Isa. xxxvi. 7; II Chron. xiv. 3. The distinguishing characteristic of the bamah must have been that it was a raised platform, as verbs expressing ascent (I Kings ix. 3, 19; Isa. xv. 2) and descent (I Kings x. 5) are used in connection therewith. It was, perhaps, a series of ascending terraces like the Assyro-Babylonian "zigurat" (the "tower" of Babel; Jacob's "ladder"), and this feature was probably not absent even when the high place was situated on a mountain peak. The law concerning the building of the Altar (Ex. xx. 24) indicates that the base was of earth—a mound upon which the altar rested—primitively a huge rough, unhewn stone or dolmen, though Ewald's theory ("Gesch." iii. 390), that the understructure at times consisted of stones piled up so as to form a cone, is not without likelihood. These high places were generally near a city (comp. I Sam. ix. 25, x. 5). Near the bamah were often placed "mazzebot" and the Asherah (see also Groves). The image of the god was to be seen at some of the high places (II Kings xvii. 29). Ephod and Teraphim were also among their appointments (Judges xvii. 5; I Sam. xxi. 9; comp. Hosea iii. 4). Buildings are mentioned, the so-called "houses of high places" (I Sam. ix. 22 *et seq.*; I Kings xii. 31, xiii. 32); and Ezek. xvi. 16 suggests the probability that temporary tents made of "garments" were to be found there.

Formation and Location.

Further proof that the bamah was not the hill or mountain elevation, but a peculiar structure placed on the peak or erected elsewhere, is furnished by the verbs employed in connection with the destruction of the bamot: אבד (Ezek. vi. 3; II Kings xxxi. 3), השמיד (Lev. xxvi. 30), נתץ (II Kings xxiii. 8, 15; II Chron. xxxi. 1), and שרף (II Kings xxiii. 15). If "ramah" (Ezek. xvi. 24, 31) is an equivalent for "bamah," as it seems to be, the verbs denoting its erection (עשה and בנה) offer additional evidence. Moreover, the figurative value of the term in the idioms "tread upon high places" (*e.g.*, in Deut. xxxiii. 29), "ride on high places" (*e.g.*, Deut. xxxii. 13), where "fortress" is held to be its meaning, supports the foregoing view. The conquest of any city, the defeat of any tribe, included in ancient days the discomfiture of the deities, and hence the destruction or the disuse of their sanctuaries. Even in Ps. xviii. 34 (Hebr.) the word has this implication. "To place one on one's bamot" signifies to give one success (comp. Hab. iii. 19; Amos iv. 13; Micah i. 3; Job ix. 8; Isa. xiv. 14, lviii. 14), or to recognize or assert one's superiority. Attached to these high places were priests ("kohanim": I Kings xii. 32; xiii. 2, 23; II Kings xvii. 32, xxiii. 20; called also "kemarim"; II Kings xxiii. 5), as well as "ḳedeshot" and "ḳedeshim" = "diviners" (Hosea iv. 13, xi.) and "prophets" (I Sam. x. 5, 10; xi. 22). There is strong probability that the term "Levite" originally denoted a person "attached" in one capacity or another to these high places (לוי from לוה in nif'al, "to join oneself to"). At these bamot joyous festivals were celebrated (Hosea ii. 13 [A. V. 15], 15 [17]; ix. 4) with libations and sacrifices (*ib.* ii. 5 [7], iii. 1); tithes were brought to them (Gen. xxviii. 20-22; Amos iv. 4); and clan, family, or individual sacrifices were offered at them (I Sam. ix. 11; Deut. xii. 5-8, 11; the prohibition proving the prevalence of the practise). It was there that solemn covenants were ratified (Ex. xxi. 6, xxii. 8 [7]) and councils held (I Sam. xxii. 6, LXX.).

Origin of the Bamah.

That the high places were primitively sepulchral sanctuaries and thus connected with ancestral worship—this connection accounting for their peculiar form and their favorite location on mountains, where the dead were by preference put away (*e.g.*, Aaron's grave on Hor, Num. xx. 20; Miriam's in Kadesh-barnea, Num. xx. 1; Joseph's in Shechem, Josh. xxiv. 32; Moses' on Nebo, Deut. xxxiv.)—has been advanced as one theory (see Nowack, "Hebräische Archäologie," ii. 14 *et seq.*; Benzinger, "Arch." Index, *s.v.* "Bamah"). In greater favor is another theory ascribing the origin of the bamot to the prevalent notion that the gods have their abodes "on the heights" (see Baudissin, "Studien zur Semitischen Religionsgesch." ii. 232 *et seq.*).

Home of the Gods.

The Old Testament documents abound in evidence that this notion was held by the Canaanites and was prevalent among the Hebrews (Deut. xii. 2; Num. xxxiii. 52). The Moabites worshiped Peor (Baal-peor) on the mountain of that name (Num. xxiii. 28; xxv. 3, 5, 18; xxxi. 16; Deut. iii. 29 ["Beth-peor"], iv. 3; Hosea ix. 10; Ps. cvi. 28), and had bamot (Isa. xv. 2, xvi. 12; Jer. xlviii. 35; comp. "Bamoth-baal," Josh. xiii. 17). "Baal-hermon" (I Chron. v. 23) points in the same direction. Carmel was certainly regarded as the dwelling-place of Baal (or Yhwh; I Kings xviii.). The Arameans are reported to have believed the God of Israel to be a mountain god (I Kings xx. 23, 28). The Assyrian deities held assemblies on the mountains of the north (Isa. xiv. 13). Non-Hebrew sources complete and confirm the Biblical data on this point (see Baudissin, *l.c.* p. 239). Patriarchal biography (the mention of Moriah in Gen. xxii. 2; of Gilead ["the mount"] in Gen. xxxi. 54 [comp. Judges xi. 29]; of Ramath-mizpeh in Josh. xiii. 26; of Ramath-gilead in I Kings iv. 13), the story of Moses (see Sinai, "the mount of God," in Ex. iii. 1. iv. 27, xxiv. 13; I Kings xix. 8; the hill in connection with the victory over Amalek in Ex. xvii. 9; Mount Hor in Num. xx. 25; Mount Ebal in Deut. xxvii.; Josh. viii. 30), and the accounts of the Earlier Prophets (see Carmel in I Kings xviii.; Micah vii. 14; Tabor in Judges iv. 6, xii. 14; Hosea v. 1; Mount Olive in II Sam. xv. 32; I Kings xi. 7) illustrate most amply the currency of the same conception among the Hebrews, who must have believed that mountain peaks were especially suitable places for sacrifices and ceremonies, or—what amounts to the same thing (Schwally, "Semitische Kriegsaltertümer," i., Leipsic, 1901)—for the gathering of the armed hosts. This conception, therefore, is at the bottom of both the plan of construction—in the shape of a sloping, terraced elevation—and the selection of natural heights for the locating of the bamot. W. R. Smith ("Rel. of Sem." Index), however, contends that the selection of a hill near the city was due to practical considerations, and came into vogue at the time when the burning of the sacrifice and the smoke had become the essential features of the cult. Even so, the fact that a hill above all other places was chosen points back to an anterior idea that elevations are nearer the seat of the deity.

How far the connotation of "holiness" as "unapproachableness," "aloofness" influenced the plan and location of the bamah can not be determined, though the presumption is strong that this was the factor which determined the location of graves and sanctuaries on high peaks and the erection of shrines in imitation of such towering slopes.

Of bamot the following are especially mentioned:

The bamah of Gibeon (I Kings iii. 4; I Chron. xvi. 39, xxi. 29; II Chron. i. 3, 13); the bamah at Ramah, where Saul and Samuel met (I Sam. ix. 12, 13, 14, 19, 25); that at Gibeah, where Saul fell in with the howling dervishes or prophets (I Sam. x. 5, 13); that founded by Jeroboam at Beth-el (II Kings xxiii. 15); that built by Solomon in honor of Chemosh (I Kings xi. 7); one at a place not named (Ezek. xx. 29; comp. Jer. xlviii. 35; Isa. xvi. 12). The following places must have been bamot, though not always explicitly so denominated in the text: Bochim (Judges ii. 5); Ophrah (*ib.* vi. 24, viii. 27); Zorah (*ib.* xiii. 16-19); Shiloh (*ib.* xviii. 31); Dan (*ib.* xviii. 30); Beth-el (see above and Judges xx. 18 [R. V.], 23, 26 [R. V.], xxi. 2, 4); Mizpah (*ib.* xx. 1; I Sam. vii. 9); Ramah (see above and I Sam. vii. 17, ix. 12); Gibeah (see above and I Sam. xiv. 35); Gilgal (*ib.* x. 8, xi. 15, xiii. 9, xv. 21); Beth-lehem (*ib.* xvi. 2; xx. 6, 29); Nob (*ib.* xxi. 2); Hebron (II Sam. xv. 7); Giloh (*ib.* xv. 12); the thrashing-floor of Araunah (*ib.* xxiv. 25).

Originally Legitimate.

Some of these were of ancient origin, being associated with events in patriarchal days (*e.g.*, Hebron [Shechem and Beer-sheba] and Beth-el, Gen. xii. 8, xiii. 4, xxviii. 22). This list, which might easily be enlarged, shows that the theory which regards the introduction of the high places as due to the pernicious example of the Canaanites and which would regard all bamot as originally illegitimate in the cult of Yhwh is inadmissible. Yhwh had His legitimate bamot as the "Chemosh" and "ba'alim" had theirs. Only in the latter days of the Judean kingdom, and then in consequence of the prophetic preachment, were the high places put under the ban. The redactor of the books of Kings even concedes the legitimacy of the high places before the building of the Solomonic Temple (I Kings iii. 2), and the books of Samuel make no effort to conceal the fact that Samuel offered sacrifices (I Sam. vii. 9) at places that the later Deuteronomic theory would not countenance. That the kings, both the good and the evil ones (Solomon, I Kings iii. 3, 4; Rehoboam, *ib.* xiv. 23; Jeroboam, *ib.* xii. 31, xiii.; Asa, *ib.* xv. 14; Jehoshaphat, *ib.* xxii. 43; Jehoash, II Kings xii. 3; Amaziah, *ib.* xiv. 4; Azariah, *ib.* xv. 4; Jotham, *ib.* xv. 25; Ahaz, *ib.* xvi. 4), tolerated and patronized high places is admitted. Elijah is represented as bitterly deploring the destruction of these local shrines of YHWH (I Kings xix. 10, 14), though Manasseh (II Kings xxi. 3) and even good kings are censured for having patronized them; and the catastrophe of the Northern Kingdom is attributed, in part at least, to the existence of these sanctuaries (*ib.*).

The cause for this change of attitude toward the bamot, of which the Deuteronomic and Levitical law was, according to the critics, the result, not the reason, was the corruption that grew out of the coexistence of Canaanitish and of YHWH's high places, the former contaminating the latter. The foreign wives of the kings certainly had a share in augmenting both the number and the priesthood of these shrines to non-Hebrew deities. The lascivious and immoral practises connected with the Phenician cults —the worship of the baalim and their consorts, of Molech, and of similar deities—must have reacted on the forms and atmosphere of the YHWH high places. An idea of the horrors in vogue at these shrines may be formed from the denunciations of the Earlier Prophets (*e.g.*, AMOS and HOSEA) as well as from Ezekiel (xvi. 24, xxv. 31). To destroy these plague-spots had thus become the ambition of the Prophets, not because the primitive worship of YHWH had been hostile to local sanctuaries where YHWH could be worshiped, but because while nominally devoted to YHWH, these high places had introduced rites repugnant to the holiness of Israel's God. This may have been more especially the case in the Northern Kingdom, where there were bamot at Dan and Beth-el—with probably a bull or a phallic idol for YHWH (I Kings xiv. 9; II Kings xvii. 16) and with bamot priests (I Kings xii. 32; xiii. 2, 33; Hosea x. 5; see also Amos iii. 14; Micah i. 5, 13)—and in all cities, hamlets, and even the least populous villages (II Kings xvii. 9 *et seq.*). Some of these bamot continued to exist after the destruction of Samaria (*ib.* xvii. 29).

Josiah is credited with demolishing all the bamot-houses in Samaria (*ib.* xxiii. 19), killing the priests, and burning their bones on the altar (comp. *ib.* xxiii. 15), thus fulfilling the prediction put into the mouth of the Judean prophet under Jeroboam (I Kings xiii. 32) and of Amos (vii. 5).

Destruction of the High Places.

In Judea the high places flourished under Rehoboam (I Kings xiv. 23). His grandson Asa, though abolishing the foreign cults (*ib.* xv. 12; II Chron. xv. 8), did not totally exterminate the high places (I Kings xv. 14; II Chron. xv. 17); for his successor, Jehoshaphat, still found many of them (II Chron. xvii. 6; I Kings xxii. 47; see also I Kings xxii. 44; II Chron. xx. 33). Under Ahaz non-Hebrew bamot again increased (II Chron. xxviii. 24; comp. Tophet in Jer. vii. 31, xix. 5). Jerusalem especially abounded in them (Micah i. 5) Hezekiah is credited with having taken the first step toward remedying the evil (see HEZEKIAH, CRITICAL VIEW). Still under his successors, Manasseh and Amon, these high places were again in active operation. Josiah made an effort to put an end to the evil, but not with complete success (II Kings xxii. 3; II Chron. xxxiv. 3). There was opposition to his undertaking (see Jer. xi.), and after his death the Prophets had again to contend with the popularity of those old sanctuaries. Even after the Exile traces are found of a revival of their cult (Isa. lvii. 3, lxv. 1–7, lxvi. 17). After Josiah their priests, not all of whom were killed or transported to Jerusalem (II Kings xxiii. 5, 8), probably contrived to keep up these old local rites even at a late day, a supposition by no means irrational in view of the attachment manifested by Mohammedans to just such "maḳam" (= "meḳomot," Deut. xii. 2; Clermont-Ganneau, "The Survey of Western Palestine," p. 325, London, 1881; Conder, "Tent Work in Palestine," 1880, pp. 304–310).

The critical analysis of the Law gives the same result as the foregoing historical survey. The Book of the Covenant (Ex. xx. 34) legitimates local altars; Deuteronomy (xii. 2, 3, 12; comp. xiv. 23–25; xv. 20; xvi. 2, 6, 15, 16; xvii. 8; xviii. 6) orders their destruction and the centralization of the cult at Jerusalem. In the Priestly Code (P) the centralization is tacitly assumed.

Rabbinic Attitude.

The later rabbis recognize the discrepancies between the Deuteronomic law and the actions reported of such saintly men as Samuel and Elijah, as well as of the Patriarchs. They solve the difficulties by assuming that up to the erection of the Tabernacle bamot were legitimate, and were forbidden only after its construction. But at Gilgal they were again permitted; at Shiloh, again prohibited. At Nob and Gibeon they were once more allowed; but after the opening of the Temple at Jerusalem they were forbidden forever (Zeb. xiv. 4 *et seq.*). The rabbinical explanations have been collected by Ugolino in his "Thesaurus" (x. 559 *et seq.*). A distinction is made between a great ("gedolah") bamah for public use and a small one for private sacrifices (Meg. i. 10; comp. Zeb. xiv. 6). The bamah was called "menuḥah" (= "temporary residence of the Shekinah"); the Temple at Jerusalem, "naḥalah" (= "permanent heritage") (Meg. 10a). A description of a small bamah is found in Tosef., Zeb., at end.

E. G. H.

HIGH PRIEST (Hebrew: "kohen ha-gadol," II Kings xii. 11; Lev. xxi. 10; "kohen ha-mashiaḥ" = "the anointed priest," Lev. iv. 3; "kohen ha-rosh," II Chron. xix. 11; once, simply "ha rosh." II Chron. xxiv. 6; Aramaic: "kahana rabba" [the *ἀναραβάχης* of Josephus, "Ant." iii. 7, § 1; see Wellhausen, "Gesch. Israels," p. 161]: LXX.: *ἱερεὺς μέγας* = "the chief of the priests" [except Lev. iv. 3. where *ἀρχιερεὺς*, as in the N. T.]).—**Biblical Data:** Aaron, though he is but rarely called "the great priest," being generally simply designated "as ha-kohen" (the priest), was the first incumbent of the office, to which he was appointed by God (Ex. xxviii. 1, 2; xxix. 4, 5). The succession was to be through one of his sons, and was to remain in his own family (Lev. vi. 15; comp. Josephus, "Ant." xx. 10, § 1). Failing a son, the office devolved upon the brother next of age: such appears to have been the practise in the Maccabean period. In the time of ELI, however (I Sam. ii. 23), the office passed to the collateral branch of Ithamar (see ELEAZAR). But Solomon is reported to have deposed Abiathar, and to have appointed Zadok, a descendant of Eleazar, in his stead (I Kings ii. 35; I Chron. xxiv. 2, 3). After the Exile, the succession seems to have been, at first, in a direct line from father to son; but later the civil authorities arrogated to themselves the right of appointment. Antiochus IV., Epiphanes, for instance, deposed Onias III. in favor of Jason, who was followed by Menelaus (Josephus, "Ant." xii. 5, § 1; II Macc. iii. 4, iv. 23).

Herod nominated no less than six high priests; Archelaus, two. The Roman legate Quirinius and his successors exercised the right of appointment, as did Agrippa I., Herod of Chalcis, and Agrippa II. Even the people occasionally elected candidates to the office. The high priests before the Exile were, it seems, appointed for life (comp. Num. xxxv. 25, 28); in fact, from Aaron to the Captivity the number of the high priests was not greater than during the sixty years preceding the fall of the Second Temple.

Age and Qualifications.

The age of eligibility for the office is not fixed in the Law; but according to rabbinical tradition it was twenty (II Chron. xxxi. 17; Maimonides, "Yad," Kele ha-Miḳdash, v. 15; Ḥul. 24b; 'Ar. 13b). Aristobulus, however, was only seventeen when appointed by Herod ("Ant." xv. 3, § 3); but the son of Onias III. was too young (*νήπιος*) to succeed his father (*ib.* xii. 5, § 1). Legitimacy of birth was essential; hence the care in the keeping of the genealogical records (Josephus, "Contra Ap." i., § 7) and the distrust of one whose mother had been captured in war ("Ant." xiii. 10, § 5; Jellinek, "B. H." i. 133-137; Ḳid. 66a; see John Hyrcanus). The high priest might marry only an Israelitish maiden (Lev. xxi. 13-14). In Ezek. xliv. 22 this restriction is extended to all priests, an exception being made in favor of the widow of a priest. He was not permitted to come in contact with the bodies of the dead, even of his parents; and he was not permitted, as a sign of mourning, to leave his hair disheveled, to expose it, or to rend his garments (Lev. xxi. 10 *et seq.*). According to Josephus ("Ant." xv. 3, § 1), birth on foreign soil was not a disqualification; but the disqualifications of Lev. xxi. 17 *et seq.* applied to the high priest as well as to other priests.

His Costume.

The ceremonial of consecration, extending through an entire week (Ex. xxviii.; Lev. viii.), included certain rites which all priests were required to undergo: purification; the sacrifices; the "filling" of the hands; the smearing with blood. But Aaron the high priest was anointed with sacred oil, hence the title of the "anointed priest"; other passages have it that all priests were anointed (Ex. xxviii. 41, xxx. 30; Lev. vii. 36, x. 7; Num. iii. 3). The high priest's vestments of office, which he wore, during his ministrations, above those prescribed for the common priests, were: the "me'il," a sleeveless, purple robe, the lower hem of which was fringed with small golden bells alternating with pomegranate tassels in violet, red, purple, and scarlet; the Ephod, with two onyx-stones on the shoulder-piece, on which were engraved the names of the tribes of Israel; the breastplate ("ḥoshen"), with twelve gems, each engraved with the name of one of the tribes; a pouch in which he probably carried the Urim and Thummim. His Head-Dress was the "miẓnefet," a tiara, or, perhaps, a peculiarly wound turban, with a peak, the front of which bore a gold plate with the inscription "Holy unto Yhwh." His girdle seems to have been of more precious material than that of the common priests.

The first consecration was performed by Moses; the Bible does not state who consecrated subsequent high priests. Lev. xxi. 10 states emphatically that every new high priest shall be anointed; and Ex. xxix. 29 *et seq.* commands that the official garments worn by his predecessor shall be worn by the new incumbent while he is anointed and during the seven days of his consecration (comp. Num. xx. 28; Ps. cxxxiii. 2).

Sanctity and Functions.

The distinguished rank of the high priest is apparent from the fact that his sins are regarded as belonging also to the people (Lev. iv. 3, 22). He was entrusted with the stewardship of the Urim and Thummim (Num. xxvii. 20 *et seq.*). On the Day of Atonement he alone entered the Holy of Holies, to make atonement for his house and for the people (Lev. xvi.); on that occasion he wore white linen garments instead of his ordinary and more costly vestments. He alone could offer the sacrifices for the sins of the priests, or of the people, or of himself (Lev. iv.); and only he could officiate at the sacrifices following his own or another priest's consecration (Lev. ix.). He also offered a meal-offering every morning and evening for himself and the whole body of the priesthood (Lev. vi. 14-15, though the wording of the law is not altogether definite). Other information concerning his functions is not given. He was privileged, probably, to take part at his own pleasure in any of the priestly rites. Josephus ("B. J." v. 5, § 7) contends that the high priest almost invariably participated in the ceremonies on the Sabbath, the New Moon, and the festivals. This may also be inferred from the glowing description given in Ecclus. (Sirach) i. of the high priest's appearance at the altar.

——**In Rabbinical Literature:** The high priest is the chief of all the priests; he should be anointed and invested with the pontifical garments; but if the sacred oil is not obtainable (see Hor. 13a; "Semag," 173, end), investiture with the additional garments (see Biblical Data) is regarded as sufficient (Maimonides, "Yad," Kele ha-Miḳdash, iv. 12). A high priest so invested is known as "merubbeh begadim." This investiture consists of arraying him in the eight pieces of dress and in removing them again on eight successive days, though (the anointing and) the investiture on the first day suffices to qualify him for the functions of the office (*ib.* iv. 13). The only distinction between the "anointed" and the "invested" high priest is that the former offers the bull for an unintentional transgression (Hor. 11b).

The Great Sanhedrin alone had the right to appoint, or confirm the appointment of, the high priest. His consecration might take place only in the daytime. Two high priests must not be appointed together. Every high priest had a "mishneh" (a second) called the Segan, or "memunneh," to stand at his right; another assistant was the "catholicos"

His Powers.

("Yad," *l.c.* 16–17). The right of succession was in the direct, or, the direct failing, the collateral, line, provided the conditions concerning physical fitness were fulfilled (*ib.* 20; Ket. 103b; Sifra, Ḳedoshim). For offenses which entailed flagellation the high priest could be sentenced by a court of three; after submitting to the penalty he could resume his office ("Yad," *l.c.* 22). The high priest was expected to be superior to all other priests in physique, in wisdom, in dignity, and in material wealth; if he was poor his brother priests contributed to make him rich (Yoma 18a; "Yad," *l.c.* v. 1); but none of these conditions was indispensable. The high priest was required to be mindful of his honor. He might not mingle with the common people, nor permit himself to be seen disrobed, or in a public bath, etc.; but he might invite others to bathe with him (Tosef., Sanh. iv.; "Yad," *l.c.* v. 3). He might not participate in a public banquet, but he might pay a visit of consolation to mourners, though even then his dignity was guarded by prescribed etiquette (Sanh. 18–19; "Yad," *l.c.* v. 4).

Restrictions.

The high priest might not follow the bier of one in his own family who had died, nor leave the Temple or his house during the time of mourning. The people visited him to offer consolation; in receiving them, the Segan was at his right, the next in rank and the people at his left. The people said: "We are thy atonement." He answered: "Be ye blessed from heaven" ("Yad," *l.c.* v. 5; and Mishneh Kesef, *ad loc.*). During the offering of consolation he sat on a stool, the people on the floor; he rent his garments, not from above, but from below, near the feet, the penalty for rending them from above being flagellation (Semag, Lawin, 61–62). He could not permit his hair to be disheveled, nor could he cut it ("Yad," *l.c.* v. 6). He had one house attached to the Temple (Mid. 71b), and another in the city of Jerusalem. His honor required that he should spend most of his time in the Sanctuary ("Yad," *l.c.* v. 7). The high priest was subject to the jurisdiction of the courts, but if accused of a crime entailing capital punishment he was tried by the Great Sanhedrin; he could, however, refuse to give testimony (Sanh. 18).

The high priest must be married; to guard against contingencies it was proposed to hold a second wife in readiness immediately before the Day of Atonement (Yoma i. 1); but polygamy on his part was not encouraged (ביתו = "one wife"; Yoma 13a; "Yad," *l.c.* v. 10). He could give the "ḥaliẓah," and it could be given to his widow, as she also was subject to the LEVIRATE; his divorced wife could marry again (*l.c.*; Sanh. 18). When entering the Temple ("Hekal") he was supported to the curtain by three men (Tamid 67a; this may perhaps have reference to his entering the Holy of Holies; but see "Yad," *l.c.* v. 11, and the Mishneh Kesef *ad loc.*). He could take part in the service whenever he desired ("Yad," *l.c.* v. 12; Yoma i. 2; Tamid 67b; see Rashi *ad loc.*). On the Day of Atonement he wore white garments only, while on other occasions he wore his golden vestments (Yoma 60a; comp. 68b, בגדי בוץ). The seven days preceding the Day of Atonement were devoted to preparing for his high function, precautions being taken to prevent any accident that might render him Levitically impure (Yoma i. 1 *et seq.*). The ceremonial for that day is described in detail in Mishnah Yoma (see also Haneberg, "Die Religiösen Alterthümer der Bibel," pp. 659–671, Munich, 1869). For other regulations concerning the high priest see "Yad," Biat ha-Miḳdash, ii. 1, 8; for details in regard to the vestments see "Yad," Kele ha-Miḳdash, viii. 2–4, 5 (in reference to soiled vestments: the white could be worn only once); *l.c.* vii. 1 ("ẓiẓ"), vii. 3 ("me'il"), vii. 6 ("ḥoshen"), vii. 9 (ephod), ix. 1 (order of investiture).

LIST OF HIGH PRIESTS.

1. Aaron
2. Eleazar
3. Phinehas
4. Abishua
5. Bukki
6. Uzzi (I Chron. vi. 3–5)

With Eli the high-priesthood passes from the line of Eleazar to that of Ithamar:

Old Testament.	*Josephus.*
7. Eli	Eli
8. Ahitub (I Chron. ix. 11)	Ahitub
9. Ahiah (I Sam. xiv. 3)	Ahiah
10. Ahimelech (I Sam. xxi. 1)	Ahimelech
11. Abiathar (I Sam. xxxiii. 6)	Abiathar ("Ant." v. 11, § 5)

FROM SOLOMON TO THE CAPTIVITY.

(With Zadok the line of Eleazar reappears.)

Old Testament.	*Josephus.*	*Seder 'Olam Zuṭa.*
12. Zadok (I Kings ii. 35)	Zadok	Zadok
13. Ahimaaz (II Sam. xv. 36)	Ahimaaz	Ahimaaz
14. Azariah (I Kings iv. 2)	Azariah	Azariah
15.	Joran	Joash
16. Jehoiarib (I Chron. ix. 10)	Jesus	Joarib
17.	Axiomar	Jehoshaphat
18. Jehoiada (II Kings xi. 4)	....	Joiada
19.	Phideas	Pedaiah
20.	Sudeas	Zedekiah
21. Azariah II. (II Chron. xxvi. 17)	Joel	Joel
22.	Jotham	Jotham
23. Urijah (II Kings xvi. 10)	Uriah	Uriah
24. Azariah III. (II Chron. xxxi. 10)	Neriah	Neriah
25.	Odeas	Hoshaiah
26. Shallum (I Chron. vi. 12)	Shallum	Shallum
27. Hilkiah (II Kings xxii. 4)	Hilkiah	Hilkiah
28. Azariah IV. (I Chron. vi. 13)	"	Azariah
29. Seraiah (II Kings xxv. 18)	Sareas	Zeraiah
30. Jehozadak (I Chron. vi. 14)	Josedek	Jehozadak

FROM THE CAPTIVITY TO HEROD.

Old Testament.	*Josephus.*
31. Jeshua (Hag. i. 1)	Jesus ("Ant." xi. 3, § 10)
32. Joiakim (Neh. xii. 10)	Joiakim ("B. J." xi. 5, § 1)
33. Eliashib (Neh. iii. 1)	Eliashib ("B. J." xi. 5, § 5)
34. Joiada (Neh. xii. 10, 22)	Judas ("Ant." xi. 7, § 1)
35. Johanan (Neh. xii. 22)	Joannes ("Ant." xi. 7, § 1)
36. Jaddua (Neh. xii. 22)	Jaddus ("Ant." xi. 7, § 2)
37.	Onias I. ("Ant." xii. 2, § 5)
Apocrypha.	*Josephus* ("Antiquities").
38. Simon I. (Ecclus. [Sirach] 4, 1)	Simon the Just (xii. 2, § 5)
39.	Eleazar (xii. 2, § 5)
40.	Manasseh (xii. 4, § 1)
41.	Onias II. (xii. 4, § 1)
42.	Simon II. (xii. 4, § 10)
43. Onias (I Macc. xii. 7)	Onias III. (xii. 4, § 10)
44. Jason (II Macc. iv. 7)	Jesus (xii. 5, § 1)
45. Menelaus (II Macc. iv. 27)	Onias, called Menelaus (xii. 5, § 1)
46. Alcimus (I Macc. vii. 5)	Alcimus (xii. 9, § 7)
47. Jonathan (I Macc. ix. 28)	Jonathan (xiii. 2, § 2;
48. Simon (the Prince) (I Macc. xiv. 46)	Simon (xiii. 6, § 7)
49. John (I Macc. xvi. 23)	John Hyrcanus (xiii. 8, § 1)
50.	Aristobulus I. (xiii. 9, § 1)
51.	Alexander Jannæus (xiii. 12, § 1)
52.	Hyrcanus II. (xiii. 16, § 2)
53.	Aristobulus II. (xv. 1, § 2)
54.	Hyrcanus II. (restored) (xiv. 4, § 4)
55.	Antigone (xiv. 14, § 3)
56.	Hananeel (xv. 2, § 4)

FROM HEROD TO THE DESTRUCTION OF THE TEMPLE.

Josephus ("Antiquities").

(Under Herod.)

56. Hananeel
57. Aristobulus III. (xv. 3, §§ 1, 3)
 (Hananeel reappointed; xv. 3, § 3)
58. Jesus, son of Phabet (xv. 9, § 3)
59. Simon, son of Bœthus (perhaps Bœthus himself; xv. 9, § 3: xvii. 4, § 2)
60. Mattathias, son of Theophilus (xvii. 6, § 4)
 Joseph, son of Ellem (one day; xvii. 6, § 4; see Grätz in "Monatsschrift," 1881, pp. 51 *et seq.*)
61. Joazar, son of Bœthus (xvii. 6, § 4)

(Under Archelaus.)

62. Eleazar, son of Bœthus (xvii. 13, § 1)
63. Jesus, son of Sie (Σιέ; xvii. 13, § 1)
 (Joazar reappointed; xviii. 1, § 1; 2, § 1)

(Under Quirinius.)

64. Ananus, son of Seth (xviii. 2, § 2; Luke iii. 2)

(Under Valorius Gratus.)

65. Ismael, son of Phabi (xviii. 2, § 2)
66. Eleazar, son of Ananus (xviii. 2, § 2)
67. Simon, son of Camithus (xviii. 2, § 2)
68. Joseph (called "Caiaphas" (xviii. 2, § 2; 4, § 3; Matt. xxvi. 3, 57)

(Under Vitellius.)

69. Jonathan, son of Ananus (xviii. 4, § 3; "B. J." ii. 12, §§ 5-6; 13, § 3)
70. Theophilus, son of Ananus (xviii. 5, § 3)

(Under Agrippa.)

71. Simon, or Cantheras, son of Bœthus (xix. 6, § 2; see Grätz, "Gesch." 4th ed., iii. 739-746)
72. Mattathias, son of Ananus (xix. 6, § 4)
73. Elioneus, son of Cantheras (xix. 8, § 1; Parah iii. 5)

(Under Herod of Chalcis.)

74. Joseph, son of Cainus (xx. 1, § 3)
 [Perhaps Ishmael (iii. 15, § 13) should be placed here.]
75. Ananias, son of Nebedeus (xx. 5, § 2; Derenbourg. "Hist." p. 233)
 (Jonathan restored; xx. 8, § 5)

(Under Agrippa II.)

76. Ishmael, son of Fabi (xx. 8, §§ 8, 11; Parah iii. 5; Soṭah ix. 5; Derenbourg, "Hist." pp. 232-235)
77. Joseph Cabi, son of Simon (xx. 8, § 11)
78. Ananus, son of Ananus (xx. 9, § 1)
79. Jesus, son of Damneus (xx. 9, § 1; "B. J." vi. 2, § 2)
80. Jesus, son of Gamaliel (xx. 9, §§ 4, 7; Yeb. vi. 4; an instance in which a priest betrothed to a widow before his elevation was permitted to marry her afterward; Derenbourg, "Hist." p. 248)
81. Mattathias, son of Theophilus (xx. 9, § 7; "B. J." vi. 2, § 2; Grätz, in "Monatsschrift," 1881, pp. 62-64; *idem*, "Gesch." 4th ed., iii. 750 *et seq.*)
82. Phinehas, son of Samuel, appointed by the people during the war (xx. 10, § 1; "B. J." iv. 3, § 8; see Derenbourg, "Hist." p. 269)
 [A man altogether unworthy.]

Josephus enumerates only fifty-two pontificates under the Second Temple, omitting the second appointments of Hyrcanus II., Hananeel, and Joazar.

——**Critical View:** The foregoing regulations concerning the office, title, and prerogatives of the high priest are given in P (Priestly Code) and the "Holiness Code" combined with it; the other Pentateuchal sources do not mention a dignitary of this order. The only seeming exception is the reference to Eleazar as the successor of Aaron "the priest" (Josh. xxiv. 33; comp. Deut. x. 6). Deuteronomy (xvii. 8 *et seq.*) speaks of "the" priest (הכהן) as entrusted with judgment, and as possessing a rank equal to that of the judge. This has been taken to indicate that the office was known to exist and was sanctioned in the days of the composition of Deuteronomy (but see Steuernagel *ad loc.*). Yet this very juxtaposition of judge and priest suggests quite a different conception of the office than that prevailing in P and detailed above. Furthermore, in Ezekiel's ideal reconstitution (Ezek. xl.-xlviii.), though much attention is given to the status of the priests, the high priest is consistently ignored. Perhaps הכהן ("the" priest), referring to the person entrusted with the purification of the Sanctuary on the two days annually set apart for this purpose (Ezek. xlv. 19 *et seq.*), designates the high priest; but it is significant that the special title is omitted and that no further particulars are given.

Only Known to Priestly Code.

The historical and prophetical books lend probability to the theory, based on the facts above, that in pre-exilic days the office had not the prominence P ascribed to it. Jehoiada (II Kings xi. 10), Urijah (*ib.* xvi. 10), and Hilkiah (*ib.* xxii. 14) are each referred to by "ha-kohen," though "ha-kohen ha-gadol" is also used, while "kohen ha-rosh" occurs in connection with Seraiah. Many have contended that this enlarged title is to be considered a later amplification of the simple הכהן, a view largely resting on II Sam. xv. 27 ("Ẓadoḳ ha-kohen"). The title כהן משנה ("the second priest"; Jer. lii. 24; II Kings xxv. 18), however, proves the recognition of a chief priest. Yet this chief priest in pre-exilic times must have been regarded in quite a different light from that presupposed in P. Under David and Solomon there were two priests, Abiathar and Zadok, who simultaneously bore the title "ha-kohen" (II Sam. viii. 17, xix. 12; I Kings i. 7, iv. 4). Zadok is represented as officiating both at Gibeon (I Chron. xvi. 39) and at Jerusalem (II Sam. xv. 24 *et seq.*). The fact that Solomon deposed Abiathar and put Zadok in his place has been invoked to remove these difficulties; but the fact that a king could control the office is proof that it was of a character other than that assumed in P. If the conclusion is warranted that every shrine had its own chief priest (Eli at Shiloh; Ahimelech in Nob) before the complete centralization of the cult at Jerusalem, the restriction of the number of high priests to one is out of the question (see HIGH PLACE).

Post-Exilic Conditions.

After the Exile, Joshua appears vested with such prominence as P ascribes to the high priest (Zech. iii.; Hag. vi. 13). In Ezra and Nehemiah, again, but little consideration is shown for the high priest. The post-exilic high priests traced their pedigree back to Zadok, appointed as chief priest at Jerusalem by Solomon (I Kings ii. 35), and Zadok was held to be a descendant of Eleazar, the son of Aaron (II Chron. v. 34). Immediately after the return from the Captivity, as is clearly to be inferred from Zechariah and Haggai, political authority was not vested in the high priest. Political (Messianic) sovereignty was represented by, or attributed to, a member of the royal house, while religious affairs were reserved to the high-priesthood, represented in the Book of Zechariah by Joshua. But in the course of time, as the Messianic hope, or even the hope of autonomy under foreign (Persian, Greek, Egyptian, or Syrian) suzerainty, became weaker, the high priest grew to be more and more also the political chief of the congregation, as much, perhaps, through the consideration shown him by the suzerain powers and their viceroys as through the effect of the increasingly thorough acceptance of the Levitical code by pious Judeans. In this connection the report (I Macc. vii. 14) that the rigorists received Alcimus, the high priest, with confidence because he was "a priest of the seed of Aaron" is significant. The author of the Book of Daniel regards the period from 536 to 171 B.C. (Joshua to Jason) as inaugurated by the first, and closed by the last, "anointed"; that is, Jason, deposed in 171, was for the writer in Daniel the last of the line of legitimate high priests.

Political Aspects.

Ecclus. (Sirach) l. is another evidence of the great reverence in which the high priest was held. The assumption of the princely authority by the Maccabean high priests (the HASMONEANS) was merely the final link in this development, which, beginning with the death of Zerubbabel, was to combine the two ideals, the politico-Messianic and the religio-Levitical, in one office. But after the brief heyday of national independence had come to an inglorious close, the high-priesthood changed again in character, in so far as it ceased to be a hereditary and a life office. High priests were appointed and removed with great frequency (see above). This may account for the otherwise strange use of the title in the plural (ἀρχιερεῖς) in the New Testament and in Josephus ("Vita," § 38; "B. J." ii. 12, § 6; iv. 3, §§ 7, 9; iv. 4, § 3). The deposed high priests seem to have retained the title, and to have continued to exercise certain functions; the ministration on the Day of Atonement, however, may have been reserved for the actual incumbent. This, however, is not clear; Hor. iii. 1-4 mentions as distinctive the exclusive sacrifice of a bull by the high priest on the Day of Atonement and the tenth of the ephah (that is, the twelve "ḥallot"; comp. Meg. i. 9; Macc. ii. 6). But even in the latest periods the office was restricted to a few families of great distinction (probably the bene kohanim gedolim; Ket. xiii. 1-2; Oh. xvii. 5; comp. Josephus, "B. J." vi. 2, § 2; see Schürer, "Gesch." 3d ed., ii. 222).

Connection with Sanhedrin.

The high priest was the presiding officer of the SANHEDRIN. This view conflicts with the later Jewish tradition according to which the Pharisaic tannaim (the ZUGGIM) at the head of the academies presided over the great Sanhedrin also (Ḥag. ii. 2). However, a careful reading of the sources ("Ant." xx. 10; "Contra Ap." ii., § 23; comp. "Ant." iv. 8, § 14; xiv. 9, §§ 3-5 [Hyrcanus II. as president]; xx. 9, § 1 [Ananus]), as well as the fact that in the post-Maccabean period the high priest was looked upon as exercising in all things, political, legal, and sacerdotal, the supreme authority, shows it to be almost certain that the presidency of the Sanhedrin was vested in the high priest (see Isidore Loeb in "R. E. J." 1889, xix. 188-201; Jelski, "Die Innere Einrichtung des Grossen Synhedrions," pp. 22-28, according to whom the "nasi" was the high priest, while the "ab bet din" was a Pharisaic tanna).

E. G. H.

HILARY, THE BISHOP. See ARLES.

HILBERG, ISIDOR: Austrian philologist; born May 28, 1852, at Byelaya Tzerkov, Ukraine, Russia. In 1856 he went with his parents to Vienna, where he received his early education. Subsequently he studied classical philology at the University of Vienna under Vahlen, Gomperz, Hoffmann, and Hartel (Ph.D. 1874). In 1875 he studied for half a year in Italy, and became privat-docent in classical philology at the University of Vienna in 1877. In 1879 he was appointed assistant professor at Prague University, and in 1882 professor at the University of Czernowitz, of which he was "Rector Magnificus" in 1898.

Hilberg has published the following works: "Eusthatii Macrembolitæ Protonobilissimi de Hysmines et Hysminiæ Amoribus Libri xi." Vienna, 1876; "Epistula Critica ad Joannem Vahlenum de Nonnullis Scriptorum Græcorum et Romanorum Locis Emendandis Explicandisve," *ib.* 1877; "Das Gesetz der Trochäischen Wortformen im Dactylischen Hexameter und Pentameter der Griechen vom 7. Jahrh. v. Chr. bis zum Untergang der Griechischen Poesie," *ib.* 1878; "Das Princip der Silbenwägung und die Daraus Entspringenden Gesetze der Endsilben in der Griechischen Poesie," *ib.* 1879; "Die Gesetze der Wortstellung im Pentameter des Ovid," Leipsic, 1894; "Philologie und Naturwissenschaft" (his discourse when appointed rector, Czernowitz, 1898).

S. S. FRA.

HILDESHEIM: Town in the Prussian province of Hanover. At what time Jews were first admitted to this old episcopal city is uncertain. In a document of Jan. 7, 1347, mention is made of the taxes to be paid by the Jews. The bishops of Hildesheim exercised the right to receive Jews under their protection ("jus recipiendi Judæos"), while the town council also claimed this privilege, and exercised it for many centuries. Memor-books mention Hildesheim among the martyr cities at the time of the Black Death (1349); but Jews again settled in the town as soon as 1351. On Jan. 6 of that year Bishop Henry III. granted them a burial-ground; and by a grant of Bishop John III. (Nov. 30, 1405) this plot was enlarged. In the "Judenstrasse" (which is first mentioned in official documents in 1381) the Jews were in 1385 permitted to have a synagogue ("Jodenschole"); this was built on property belonging to the town, for which they had to pay an annual rent of 4 marks. The Jews and Jewesses paid to the town council a total annual rent of 5½ marks for their dwellings (one ferding each; the Jew Keneka, however, had to pay 2 ferdings).

On July 27, 1428, Bishop Magnus pledged the Jews in the town and bishopric of Hildesheim to the council as security for a loan of 600 Rhenish gulden: and the same prelate granted them on Aug. 26, 1439, a privilege of protection, which in 1441 received the sanction of the council. The council also signed an agreement with the Jews regarding their admission,

Pledged by Bishop to the Town Council.

government, and right to leave the town, whereby the original number of families was put at 12, exclusive of the "Sangmeister" (ḥazzan) and "Schulklopfer" (sexton); the Jews paid a yearly tax of 60 Rhenish gulden to the town, apart from the rent for synagogue and dwellings. Their internal affairs were administered by four sworn councilors. After the council had admitted (Aug. 9, 1450) some Jewish families into the town for six years, all Jews were, in 1457, exiled from the diocese. Some of them found an asylum in Brunswick. The administrator of the bishopric, Bernhard, bound himself, according to a document dated March 29, 1457, not to tolerate in the future any Jews in the see of Hildesheim. The synagogue was torn down; the emperor confiscated the valuables belonging to it; and the territory of the cemetery, where also Jews of other places had buried their dead, was assigned, with its tombstones, to the provost of the cathedral, Ekkehard von Hahnensee, as a site for St. Ann's Church and the hospital of the same name in the "Neustadt" of Hildesheim.

It was more than sixty years later when, at the time of the chapter feud in 1520 under Bishop John IV., a Jew called "der grosse Michel" was admitted to the city on account of his skill as a warrior. He was soon joined by other Jews, as, for instance, one Leifmann, who instructed the clergy in the Hebrew language. Leifmann was even allowed to remain when, in 1542, the other Jews were exiled once again. Elector Ernst II. of Cologne, Bishop of Hildesheim, who had his Jewish physician, Medicus Herz (of Hamm), admitted into the city, promised (Nov. 29, 1585) protection to the Jews; and the council also afforded them protection (1587). Only a decade later, however (1595), they were again driven out of the city, owing to Nathan Schay and Marcus having, after the death of their wives, married the latters' sisters, which example was followed by a Christian physician, whereupon the head pastor ("Hauptpastor"), Hesshusius, declared the marriages incestuous.

Appeal to Imperial Council.

The exiled Jews instituted proceedings against the council before the supreme court of the empire as well as before the imperial court in Prague. A decision was rendered in their favor; and the council, through the intervention of the electoral government, on March 4, 1601, came to an agreement with the Jews whereby the latter were permitted to return to the city on the following day.

Eight years later, when they were accused of being the cause of the plague, they were again forced to leave the city; they were, however, soon readmitted. Previous to this (1607) the council had given three houses to Nathan Schay and his family in recognition of his valuable financial services to the city. In a building in the rear of this property a synagogue was established, the continuance of which was permitted by the council in 1615 in consideration of a large money payment. A new cemetery also was allowed the Jews by the provost, in the neighborhood of their former burial-ground. In 1650 this was replaced by another cemetery, which was enlarged in 1741.

During the Thirty Years' war the Jews of Hildesheim were heavily taxed. Thus in 1621 they were required to pay to the lords 150 gulden, and in 1622 as much as 250 to 400 gulden, a month; and they were threatened with expulsion if they refused. On account of these large payments the few Jews—10 in the city, and 4 in the neighboring village of Moritzberg—were so impoverished that their combined belongings in 1634 did not amount to 2,000 thalers.

New Statutes.

In 1660 protection was withdrawn from the Jews (with the exception of the heirs of Nathan Schay and Herz Israel), and it was not again granted to them until they had bound themselves to pay 500 thalers. On Aug. 9 of the same year the council issued a "Juden-Geleits-Brief," to which on Oct. 24, 1662, was added a letter of protection from the bishop, Elector Maximilian Henry of Bavaria. In the same year, 1662, a new constitution was adopted, which remained in force for more than 150 years thereafter. Six years later (19 Elul, 5428 = 1668) pious men joined in the establishment of a benevolent society ("ḥebra ḳaddisha shel gemilut ḥasadim") in Hildesheim, which society is still in existence.

In the eighteenth century from 40 to 60 families were offered protection in the city. During the Seven Years' war the Jews of Hildesheim were not freed from the burden of heavy contributions and numerous taxations. In 1758 they had to pay a per capita tax and to supply beds, sheets, etc. After the cessation of the prince-bishop's secular power the Jews of the diocese of Hildesheim were for four years (1802-06) subject to Prussian rule; but under Westphalian government (1806-15) they enjoyed full liberty and equality with the other inhabitants. In the canton of Hildesheim there were, in 1812, seventy-seven Jewish families, all of whom lived in the city. At that time a Jewish elementary public school was founded with the cooperation of the consistory in Cassel; it still exists.

Emancipation.

After Hildesheim had become incorporated with the kingdom of Hanover the Jews were again obliged to pay for protection, until at last an end was put to this system by the law of Sept. 30, 1842. On Nov. 8, 1849, the consecration of a new synagogue took place. At present 600 Jews live in Hildesheim (which since 1866 has belonged to the kingdom of Prussia). The community has a large number of benevolent societies and institutions, among which are several founded by the banker August M. Dux (d. Dec. 20, 1902), for many years one of the honorary officers of the community.

Of the rabbis (district rabbis) who officiated in Hildesheim may be mentioned:

Simon Günzburg.
Samuel Hameln (d. 1687).
Mordecai b. Mattithiah ha-Kohen (d. 1684).
Eliakim Götz (author of the responsa "Eben ha-Shoham" and "Sefer Rappeduni be-Tappuḥim").
Ḥayyim b. Ozer (editor of "Ẓon Ḳodashim": d. in Mannheim 1729).
Ẓebi Hirsch b. Isaac Oppenheimer (d. 1758).
Ẓebi Hirsch b. Abigdor (d. 1766).
Abraham b. Moses Chelma ha-Levi (d. 1785).
Ẓebi Hirsch b. Solomon Zalman (Neufeld).

Menahem Mendel Steinhart (afterward member of the consistory; d. in Paderborn; author of the responsa "Dibre Menahem" and of "Dibre Iggeret").
Möschel Elkan (d. 1822).
Aaron Wolfssohn (d. 1830).
L. Bodenheimer, chief rabbi of Krefeld (d. 1867).
M. Landsberg (d. May 20, 1870).
J. Guttmann (since 1892 rabbi of the community in Breslau).
Since Nov. 4, 1892, Dr. A. Lewinsky has been the district rabbi of Hildesheim.

Of well-known men who were born in Hildesheim may be mentioned: Ludwig Schulmann, editor and author (deceased); Moritz Güdemann (chief rabbi in Vienna); Dr. Wolfssohn (formerly rabbi in Stargard, Pomerania; now living in Berlin as rabbi emeritus); Max Landsberg, rabbi in Rochester, N. Y.; and Professor Landsberg, of the Polytechnicum in Darmstadt.

D. A. Lew.

HILDESHEIMER, ISRAEL (AZRIEL):

German rabbi, and leader of Orthodox Judaism; born at Halberstadt May 20, 1820; died at Berlin July 12, 1899; son of R. Löb Glee Hildesheimer. He attended the "Hasharat-Ẓewi" school in Halberstadt, and, after reaching the age of seventeen, the Talmudic school of Rabbi Ettlinger in Altona. The ḥakam Isaac Bernays was one of his teachers and his model as a preacher. While studying rabbinics Hildesheimer was also devoting much attention to classical languages. In 1840 he returned to Halberstadt, took his diploma at the Dom gymnasium, and entered the University of Berlin. There he studied Oriental languages and mathematics, continued his Talmudic studies, and became a disciple of the dominant Hegelian school. In 1842 he went to Halle and continued his studies under Gesenius and Roediger (Ph.D. 1844, his dissertation being "Ueber die Rechte Art der Bibelinterpretation"). Hildesheimer then returned to Halberstadt, and married Henrietta Hirsch, sister of Joseph Hirsch, head of the firm of Aron Hirsch & Sohn of Halberstadt.

Rabbi in Eisenstadt.

In 1851 he was called to the rabbinate of Eisenstadt (=Kis-Marton), Hungary. His first notable act there was to found a parochial school, in which correct German was used, and in which German principles of pedagogy were adopted, in teaching Jewish as well as secular subjects. Hildesheimer next established a rabbinical school, which within a few years attracted a large number of pupils. The introduction into the school of German methods of instruction and of secular branches of learning was resented by the Orthodox party in Eisenstadt, a resentment which Hildesheimer's liberal tendencies and sympathy with modern culture soon changed to positive antipathy. This feeling became so strong that the rabbinical school was denounced before the representatives of the government at Oedenburg, the result being that the government ordered the school closed within twenty-four hours and the pupils removed from the city. Soon afterward, however (1858), Hildesheimer succeeded in obtaining state recognition for his rabbinical school.

Israel Hildesheimer.

In addition to the philanthropic activities connected with his own congregation, Hildesheimer took special interest in the welfare of the Jews of Palestine. In 1860, when the missionary society of Palestine provided seventy free dwellings for homeless Jews, Hildesheimer himself built houses in Jerusalem for the free use of pilgrims and of the poor. These houses are still in the possession of the Hildesheimer family. About this time, Akiba Joseph, the leader of the Ḥasidim, placed him under a ban as not truly a sincere Jew ("emessdiger Jüd"). Hildesheimer, however, seems to have cared little for the ban. At the Hungarian Jewish Congress of Dec. 14, 1868, he at first endeavored to associate himself with the old Orthodox party; but the impossibility of such a union soon becoming evident, he formed his followers, thirty-five in number, into a separate group, which may be called the "Cultured Orthodox" group. In the Hungarian Jewish Congress held at Budapest in 1869 he defined this party as representing a "faithful adherence to traditional teachings combined with an effective effort to keep in touch with the spirit of progress" ("Ha-Maggid," 1869, xiii., No. 26).

In Berlin at that time the Orthodox minority, constituting about 200 families, dissatisfied with the appointment of Abraham Geiger, were in search of a rabbi of standing who would more nearly represent them. Their choice fell upon Hildesheimer, who went to Berlin in 1869 as rabbi and director of the bet ha-midrash. There also he soon estab-

Call to Berlin.

lished a religious school and a rabbinical seminary for Orthodox Judaism, which thirty former pupils of his at once entered. Thus he became the real intellectual founder and leader of the community 'Adat Yisrael. Hildesheimer, aided by Mayer Lehmann, the editor of "Israelit," in Mayence, exerted his whole energy in the fight against Reform. As early as 1847 he had energetically opposed, as the representative of the communities in the Magdeburg district, the Reform attempts of Ludwig Philippson; in 1861 he took his stand against Abraham Geiger by criticizing the latter's pamphlet, "Notwendigkeit und Mass einer Reform des Jüdischen Gottesdienstes" (Mayence, 1861). In an address delivered at his rabbinical seminary and defining his own position he said: "Unconditional agreement with the culture of the present day; harmony between Judaism and science; but also unconditional steadfastness in the faith and traditions of Judaism: these constitute the program of the New Community, the standard round which gather the Israelites of Berlin who are faithful to the Law."

This firm conviction that traditional Judaism need have no fear of the light of European culture determined his attitude and his activity in Hungary and Germany from the start, and gave him the strength of a man with a definite aim. It is evident, however, that Hildesheimer, who would listen to no compromise, was destined only to widen the gap between the Reform and the Orthodox Jews of Germany.

In 1876 Hildesheimer celebrated the twenty-fifth anniversary of his ministry; on the celebration of his seventieth birthday, in 1890, his friends and pupils published a literary "Jubelschrift" (Berlin, 1890). Among his writings are the following: "Materialien zur Beurtheilung der Septuaginta," in "Orient, Lit." 1848, Nos. 30 *et seq.*; "Die Epitaphien der Grabsteine auf dem Hiesigen [of Halberstadt] Jüdischen Friedhofe," 1846; "Verwaltung der Jüdischen Gemeinde Halberstadt," 1849; "Offener Brief an den Redakteur des Ben Chananja," Vienna, 1858; "Minḥah Ṭehorah," Presburg, 1860; "Halakhot Gedoloth nach der Handschrift der Vaticana," Berlin, 1888. He also contributed articles to the "Jüdische Presse," to "Ha-Lebanon" (ii. 12, 28 *et seq.*), to "He-Ḥaluẓ" (xiii. 108), to "Archives Israélites" (li. 206), etc.

Hildesheimer was simple in his habits and fearless; he had an unusual capacity for work; and his great Talmudic learning was joined to practical administrative ability. Financially independent, he never accepted remuneration for his rabbinical activity. In the service of the poor and needy in Germany, Austria, Russia, and even in Abyssinia and Persia, no labor was too great and no journey too long for him, so that he came to be known as the "international schnorrer."

His son, **Hirsch Hildesheimer,** professor at the rabbinical seminary and editor of the "Jüdische Presse," is the author of "Beiträge zur Geographie Palästinas" (1886).

S. M. Sc.

HILDESHEIMER, SAMUEL BEN JOSEPH: Rabbi at Frankfort-on-the-Main (1618–22). He reorganized the Jewish congregation, whose administration, in consequence of the Fettmilch agitation, was disrupted. Upon his proposition seven representatives, chosen from among the new members, and known as the "Aussengemeinde," were added to the old board of ten; four of these seven were to act, during two months of each year, as collectors and as presidents of the synagogue. Hildesheimer also regulated the functions of the dayyanim.

ḤILFA. See Ḥalafta.

HILKIAH (חלקיה, חלקיהו = "my portion is Yhwh"): **1.** High priest in the reign of Josiah (II Kings xxii. 4 *et seq.*). It is probable that he was the Hilkiah ben Shallum who figures in the genealogy of high priests in I Chron. v. 39 (A. V. vi. 13), and that he was, consequently, father of Azariah and great-grandfather of Ezra the Scribe (*ib.*; Ezra vii. 1). Ḳimḥi and Abravanel (to Jer. i. 1), however, give his father's name as "Shaphan."

Josiah commissioned Hilkiah to superintend the repairs of the Temple; and it was when the latter took the silver from the Temple treasury that he found the scroll of the Law (II Kings xxii. 4–8; II Chron. xxxiv. 9–14). Hilkiah gave the scroll to Shaphan the Scribe; the latter read it before the king, who, terrified by the divine warnings, sent Hilkiah with four other high officials to consult the prophetess Huldah (II Chron. xxxiv. 20 *et seq.*). The finding of the scroll was the cause of the great reformation effected by King Josiah.

The question as to the nature of the scroll and the cause of the impression it made on Josiah, which has evoked so much higher criticism, is answered in a very simple manner by the Jewish commentators Rashi, Ḳimḥi, and many others. They say that when Ahaz burned the scrolls of the Law the priests of Yhwh hid one copy in the Temple, and that Hilkiah found it while searching for the silver. The scroll happened to be open at the passage Deut. xxviii. 36; and it was this that terrified Josiah. Kennicott ("Heb. Text," ii. 299) tries to infer from II Chron. xxxiv. 14 that Hilkiah found the original autograph copy of Moses. As to other opinions see Josiah.

2. Father of Eliakim; the controller of Hezekiah's palace, who served as ambassador from Hezekiah to Rab-shakeh (II Kings xviii. 18; Isa. xxii. 20).

3. Father of Jeremiah (Jer. i. 1). According to Ḳimḥi and Abravanel (see above), he was the same as No. 1.

4, 5. Two Merarite Levites (I Chron. vi. 30 [A. V. 45], xxvi. 11).

6. Father of Gemariah; one of the ambassadors that Zedekiah sent to Nebuchadnezzar (Jer. xxix. 3).

7. A priest that returned from captivity with Zerubbabel (Neh. xii. 6 [A. V. 7]).

8. A priest who stood at the right hand of Ezra when the latter read the Law before the people (*ib.* viii. 4).

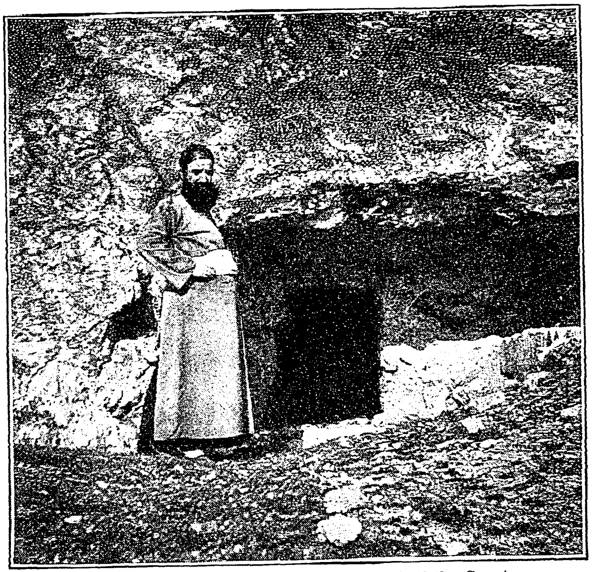
HILLAH. See Meïr.

HILLEL: Doctor of the Law at Jerusalem in the time of King Herod; founder of the school called after him, and ancestor of the patriarchs who stood at the head of Palestinian Judaism till about the fifth century of the common era. Hillel was a Babylonian by birth and, according to a later tradition, belonged to the family of David (Lévi, in "R. E. J." xxxi. 202-211, xxxiii. 143). Nothing definite, however, is known concerning his origin, nor is he anywhere called by his father's name, which may perhaps have been Gamaliel. When Josephus ("Vita," § 38) speaks of Hillel's great-grandson, Simeon ben Gamaliel I., as belonging to a very celebrated family (γένους δὲ σφόδρα λαμπροῦ), he probably refers to the glory which the family owed to the activity of Hillel and Gamaliel I. Only Hillel's brother Shebna (Soṭah 21a) is mentioned; he was a merchant, whereas Hillel devoted himself to study. In Sifre, Deut. 357 the periods of Hillel's life are made parallel to those in the life of Moses. Both were 120 years old; at the age of forty Hillel went to Palestine; forty years he spent in study; and the last third of his life he passed as the spiritual head of Israel. Of this artificially constructed biographical sketch this much may be true, that Hillel went to Jerusalem in the prime of his manhood and attained a great age. His activity of forty years is perhaps historical; and since it began, according to a trustworthy tradition (Shab. 15a), one hundred years before the destruction of Jerusalem, it must have covered the period 30 B.C.-10 C.E.



Entrance to the Traditional Tomb of Hillel the Great.
(From a photograph by Dr. W. Popper.)

His Position.

According to an old tannaitic tradition founded upon Hillel's own words, Hillel went to Jerusalem with the intention of perfecting himself in the science of Biblical exposition and of tradition (Yer. Pes. 33c; Tosef., Neg. i.; Sifra, Tazria', ix.). Shemaiah and Abṭalion, the "great Scripture expositors" ("darshanim"; Pes. 70b), became his teachers. The difficulties which Hillel had to overcome in order to be admitted to their school, and the hardships he suffered while pursuing his aim, are told in a touching passage (Yoma 35b), the ultimate purpose of which is to show that poverty can not be considered as an obstacle to the study of the Law. Some time after the death of Shemaiah and Abṭalion, Hillel succeeded in settling a question concerning the sacrificial ritual in a manner which showed at once his superiority over the Bene Bathyra, who were at that time the heads of the college. On that occasion, it is narrated, they voluntarily resigned their position in favor of Hillel (Tosef., Pes. iv.; Pes. 66a; Yer. Pes. 33a). According to tradition, Hillel thereupon became head of the Sanhedrin with the title of "Nasi" (prince); but this is hardly historical. All that can be said is that after the resignation of the Bene Bathyra Hillel was recognized as the highest authority among the Pharisees and the scribes of Jerusalem. He was the head of the great school, at first associated with Menahem, a scholar mentioned in no other connection, afterward with Shammai, Hillel's peer in the study of the Law (Ḥag. ii. 2; Gem. 16b; Yer. Ḥag. 77d). Hillel's only title was "Ha-Zaḳen" (the elder), a title given not to distinguish him from another of the same name, as some have held, but either to express his position among the leading scribes or to indicate his membership in the Sanhedrin.

Whatever Hillel's position, his authority was sufficient to introduce those decrees which were handed down in his name. The most famous of his enactments was the Prosbul (προσβολή), an institution which, in spite of the law concerning the year of jubilee (Deut. xv. 1 *et seq.*), insured the repayment of loans (Sheb. x. 3). The motive for this institution was the "amelioration of the world" ("tiḳḳun ha-'olam"), *i.e.*, of the social order (Giṭ. iv. 3), because it protected both the creditor against the loss of his property, and the needy against being refused the loan of money for fear of loss. A like tendency is found in another of Hillel's institutions, having reference to the sale of houses (Lev. xxv. 30, 'Ar. ix.). These two are the only institutions handed down in Hillel's name, although the words which introduce the prosbul (Sheb. *ib.*) show that there were others. Hillel's judicial activity may be inferred from the decision by which he confirmed the legitimacy of some Alexandrians whose origin was disputed, by interpreting the marriage document ("ketubbah") of their mother in her favor (Tosef., Ket. iv 9; B. M. 104a). Of other official acts no mention is found in the sources.

In the memory of posterity Hillel lived, on the one hand, as the scholar who made the whole con-

Hillel and Shammai.

tents of the traditional law his own (Soferim xvi. 9), who, in opposition to his colleague, Shammai, generally advocated milder interpretations of the Halakah, and whose disciples as a "house," that is, as "Hillel's school," stood in like opposition to Shammai's disciples. On the other hand, he was known as the saint and the sage who in his private life and in his dealings with men practised the high virtues of morality and resignation, just as he taught them in his maxims with unexcelled brevity and earnestness. The traditions concerning Hillel's life harmonize completely with the sayings which are handed down in his name, and bear in themselves the proof of their genuineness. No wonder that the Babylonian Talmud is richer in traditions concerning Hillel than the Palestinian, since the Babylonians were especially careful to preserve the recollection of their great countryman; and in the Babylonian schools of the third century was proudly quoted the saying of the Palestinian Simeon ben Laḳish—on the whole no friend of the Babylonians—in which he placed the activity of Hillel on a level with that of Ezra, who also went up from Babylon to Jerusalem. Hillel's sayings are preserved partly in Hebrew, the language of the school, partly in Aramaic, the language of the people, or, as it is said in Ab. R. N. xii., in the language of Hillel's home ("the Babylonian language").

The Golden Rule.

The saying of Hillel which introduces the collection of his maxims in the Mishnaic treatise Abot mentions Aaron as the great model to be imitated in his love of peace, in his love of man, and in his leading mankind to a knowledge of the Law (Ab. i. 12). In mentioning these characteristics, which the Haggadah then already ascribed to Moses' brother, Hillel mentions his own most prominent virtues. Love of man was considered by Hillel as the kernel of the entire Jewish teaching. When a heathen who wished to become a Jew asked him for a summary of the Jewish religion in the most concise terms, Hillel said: "What is hateful to thee, do not unto thy fellow man: this is the whole Law; the rest is mere commentary" (Shab. 31a). With these words Hillel recognized as the fundamental principle of the Jewish moral law the Biblical precept of brotherly love (Lev. xix. 18). Almost the same thing was taught by Paul, a pupil of Gamaliel, the grandson of Hillel (Gal. v. 14; comp. Rom. xiii. 8); and more broadly by Jesus when he declared the love of one's neighbor to be the second great commandment beside the love of God, the first (Matt. xxii. 39; Mark xii. 31; Luke x. 27). It may be assumed without argument that Hillel's answer to the proselyte, which is extant in a narrative in the Babylonian Talmud (comp. also Ab. R. N., recension B., cxxvi. [ed. Schechter, p. 53]), was generally known in Palestine, and that it was not without its effect on the founder of Christianity.

It has been remarked that Hillel did not, like Jesus, state the love of God to be the principal commandment of the Jewish teaching (see Delitzsch, "Jesus und Hillel," p. 17); but it must not be forgotten that Jesus gave his answer to a scribe, whereas Hillel answered the question of a prospective proselyte, to whom it was necessary first of all to show how the teachings of Judaism are to be practised by him who wishes to accept them. That the love of God had also a central position in Hillel's conception of religion needs not to be proved; this position had long been assigned to it in Judaism—since the Scripture passage in which this precept is joined immediately to the confession of the unity of God (Deut. vi. 4 *et seq.*) had been made the principal portion of the daily prayer. Moreover, the Pharisaic scribes who approved of Jesus' answer evidently belonged to Hillel's school. Hillel seems to have connected the precept of brotherly love with the Biblical teaching of man's likeness to God, on which account he calls the love of man "love of creatures" ("oheb et ha-beriyyot"); and it is worthy of note that the term "creatures" for men was then already the common property of the language.

From the doctrine of man's likeness to God Hillel ingeniously deduced man's duty to care for his own body. In a conversation with his disciples (Lev. R. xxxiv.) he said: "As in a theater and circus the statues of the king must be kept clean by him to whom they have been entrusted, so the bathing of the body is a duty of man, who was created in the image of the almighty King of the world." In another conversation Hillel calls his soul a guest upon earth, toward which he must fulfil the duties of charity (*ib.*). Man's duty toward himself Hillel emphasized also in the first sentence of his saying (Ab. i. 14): "If I am not for myself, who is for me? and if I am only for myself, what am I? and if not now, when?" The second part of this sentence expresses the same idea as another of Hillel's teachings (Ab. ii. 4): "Separate not thyself from the congregation." The third part contains the admonition to postpone no duty—the same admonition which he gave with reference to study (Ab. ii. 4): "Say not, 'When I have time I shall study'; for you may perhaps never have any leisure."

The precept that one should not separate oneself from the community, Hillel paraphrases, with reference to Eccl. iii. 4, in the following saying (Tosef., Ber. ii., toward the end): "Appear neither naked nor clothed, neither sitting nor standing, neither laughing nor weeping." Man should not appear different from others in his outward deportment; he should always regard himself as a part of the whole, thereby showing that love of man which Hillel taught. The feeling of love for one's neighbor shows itself also in his exhortation (Ab. ii. 4): "Judge not thy neighbor till thou art in his place" (comp. Matt. vii. 1). In the following maxim is expressed also his consciousness of his own insufficiency: "Trust not thyself till the day of thy death." How far his love of man went may be seen from an example which shows that benevolence must act with regard to the needs of him who is to be helped. Thus a man of good family who had become poor Hillel provided with a riding horse, in order that he might not be deprived of his customary physical exercise, and with a slave, in order that he might be served (Tosef., Peah, iv. 10; Ket. 67b).

That the same spirit of kindness prevailed in Hillel's house is shown by a beautiful story (Derek Ereẓ v.). Hillel's wife one day gave the whole of a meal, prepared in honor of a guest, to a poor man, and at once prepared another. When she excused herself for the delay and explained its cause, Hillel praised her for her action. How firmly Hillel was persuaded that peace was ruling in his house, the following tradition teaches (Ber. 60a; Yer. Ber. 14b): When one day he came near his house and heard a noise, he expressed, in the words of Ps. cxii. 7 ("He shall not be afraid of evil tidings"), his confidence that the noise could not be in his house. His trust in God was such that whereas Shammai provided for the Sabbath already on the first day of the week, Hillel referred to Ps. lxviii. 19: "Blessed be the Lord who daily loadeth us with benefits" (Beẓah 16a).

Love of Peace.

The exhortation to love peace emanated from Hillel's most characteristic traits—from that meekness and mildness which had become proverbial, as is seen from the saying: "Let a man be always humble and patient like Hillel, and not passionate like Shammai" (Shab. 31a; Ab. R. N. xv.). Hillel's gentleness and patience are beautifully illustrated in an anecdote which relates how two men made a wager on the question whether Hillel could be made angry. Though they questioned him and made insulting allusions to his Babylonian origin, they were unsuccessful in their attempt (*ib.*). In the anecdotes about proselytes in which Hillel and Shammai are opposed to each other, Hillel's mildness and meekness appear in a most favorable light. In a paradoxical manner Hillel praised humility in the following words (Lev. R. i. 1): "My humility is my exaltation; my exaltation is my humility" (with reference to Ps. cxiii. 5).

The many anecdotes, resting doubtless on good tradition, according to which Hillel made proselytes, correspond to the third part of his maxim: "Bring men to the Law." A later source (Ab. R. N., recension B., xxvi., toward the end) gives the following explanation of the sentence: Hillel stood in the gate of Jerusalem one day and saw the people on their way to work. "How much," he asked, "will you earn to-day?" One said: "A denarius"; the second: "Two denarii." "What will you do with the money?" he inquired. "We will provide for the necessities of life." Then said he to them: "Would you not rather come and make the Torah your possession, that you may possess both this and the future world?" This narrative has the same points as the epigrammatic group of Hillel's sayings (Ab. ii. 7) commencing: "The more flesh, the more worms," and closing with the words: "Whoever has acquired the words of the Law has acquired the life of the world to come."

The Study of the Law.

In an Aramaic saying Hillel sounds a warning against neglect of study or its abuse for selfish purposes: "Whoever would make a name [glory] loses the name; he who increases not [his knowledge] decreases; whoever learns not [in Ab. R. N. xii.: "who does not serve the wise and learn"] is worthy of death; whoever makes use of the crown perishes" (Ab. i. 13). Another group reads (Ab. ii. 5): "The uneducated has no aversion to sin; the ignorant is not pious; the timid can not learn, nor the passionate teach; he who is busied with trade can not become wise. In a place where there are no men, study to show thyself a man" (*ib.*). In this last sentence Hillel may have recalled how he, overcoming his modesty, manfully came forward in Jerusalem after the death of Shemaiah and Abṭalion and gave a new impulse to learning, then threatened with decay. To his own activity no doubt refers the saying preserved in Aramaic (Yer. Ber. 143) and Hebrew (Tosef., Ber. vii.; Ber. 63a): "Where some gather, scatter; where they scatter, gather!" that is, "Learn where there are teachers, teach where there are learners" (another form is given in Sifre Zuṭa on Num. xxvii. 1; Yalḳ., Num. 773).

Mystical Utterances.

The epigrammatic and antithetic form of Hillel's sayings, as well as the almost mystic depth of his consciousness of God, may be seen from the words spoken by him at the festival of water-drawing, when, filled with a feeling of God's presence, he said: "If I am here—so says God—every one is here; if I am not here, nobody is here" (Suk. 53a; Ab. R. N. xii., without stating the occasion of the utterance). In like manner, with reference to Ex. xx. 24, and applying a proverb, Hillel makes God speak to Israel: "To the place in which I delight my feet bring me. If thou comest to mine house, I come to thine; if thou comest not to mine, I come not to thine" (Suk. *l.c.*; Tosef., Suk. iv. 3).

In an epigrammatic form Hillel expresses the moral order of the world, according to which every sin is punished (Ab. ii. 6). Seeing a skull floating on the water, he said (in Aramaic): "Because thou didst drown, thou art drowned; and in the end they that have drowned, shall be drowned." Hillel was perhaps thinking here of the misdeeds of Herod and of the retribution which he could not escape.

No indications exist of Hillel's relation to the rulers of his time; but his love of peace and his devotion to study as the most important part of his life, no doubt showed the way which his disciple Johanan ben Zakkai, under the yoke of the Romans and amidst the strife of parties which brought about the catastrophe of Jerusalem, pursued for the salvation of Judaism. A panegyric tradition concerning Hillel's pupils (Suk. 28a; B. B. 134a), which glorifies the master in the disciples, recounts that of the eighty disciples whom Hillel had (probably during the last period of his activity), thirty were worthy that the glory of God (the spirit of prophecy) should rest upon them as upon Moses; thirty, that for their sake the sun should stand still as for Joshua. It is possible that this figure, which may have had a historical basis, was a reference to the fact that among Hillel's disciples were those who, like Joshua, were ready to fight against Israel's enemy and were worthy of victory; perhaps, also, that to them belonged those distinguished and beloved teachers whom Josephus mentions ("Ant." xvii. 6, § 2), Judah ben Sarifai and Mattithiah ben Margalot, who shortly before Herod's death led a revolt directed against fixing the Roman eagle on the Temple gate. This tradition concerning Hillel's disciples mentions, moreover, two by name: JONATHAN BEN UZZIEL and JOHANAN BEN ZAKKAI (comp. also Yer. Ned. v., toward the end).

His Influence.

In the history of tradition Hillel's disciples are generally called "the house of Hillel" (see BET HILLEL), in opposition to Shammai's disciples, "the house of Shammai." Their controversies, which no doubt included also those of their masters, concern all branches of tradition—Midrash, Halakah, and Haggadah. Only a few decisions, belonging to these three branches, have been handed down under Hillel's name; but there can be no doubt that much of the oldest anonymous traditional literature was due directly to him or to the teachings of his masters. The fixation of the norms of the Midrash and of halakic Scripture exposition was first made by Hillel, in the "seven rules of Hillel," which, as is told in one source, he applied on the day on which he overcame the Bene Bathyra (Tosef., Sanh. vii., toward the end; Sifra, Introduction, end; Ab. R. N. xxxvii.). On these seven rules rest the thirteen of R. Ishmael; they were epoch-making for the systematic development of the ancient Scripture exposition.

Hillel's importance as the embodiment of the religious and moral teachings of Judaism and as the restorer of Jewish Scripture exegesis is expressed in a most significant manner in the words of lamentation uttered at his death: "Wo for the meek one! Wo for the pious! Wo for the disciple of Ezra!" (Tosef., Soṭah, xiii. 3; Soṭah 48b; Yer. Soṭah, toward the end). One day while he and the sages were assembled at Jericho, a heavenly voice is said to have exclaimed: "Among those here present is one man upon whom the Holy Spirit would rest, if his time were worthy of it." All eyes were thereupon fixed on Hillel. No miracles are connected with Hillel's memory. He lived, without the glory of legend, in the memory of posterity as the great teacher who taught and practised the virtues of philanthropy, fear of God, and humility.

S. S. W. B.

HILLEL II.: Patriarch (330-365); son and successor of Judah III. Only in two instances is his name quoted in connection with halakot: in one, Jose b. Abin expounds to him a law; in the other, Hillel cites a mishnah to establish a law (Yer. Ber. ii. 5a; Yer. Ter. i. 41a). Tradition ascribes to him an enactment which proved of incalculable benefit to his coreligionists of his own and of subsequent generations. To equalize the lunar with the solar year, and thereby render possible the universal celebration of the festivals on the days designated in the Bible, occasional intercalations of a day in a month and of a month in a year were required (see CALENDAR). These intercalations were determined at meetings of a special commission of the Sanhedrin. But Constantius, following the tyrannous precedents of Hadrian, prohibited the holding of such meetings as well as the vending of articles for distinctively Jewish purposes. How difficult the fixing of the annual calendar consequently became may be judged from an enigmatic letter addressed to Raba, the principal of the academy at Maḥuza, and preserved in the Talmud. It was evidently written by a friend in Palestine who wished to acquaint the Babylonian religious authorities with the condition of Judaism in its mother country, and with the resolutions of a meeting held for the purpose indicated above. It reads thus:

> "A pair [of disciples], coming from Raḳḳat [Tiberias; see Meg. 6a], were apprehended by the Eagle [Romans], because in their possession they had fabrics from Luz [blue or purple yarn for fringes, the ẓiẓit]. By the grace of the All-merciful and through their own merits they escaped. Also, the burden-bearers of Nahshon [the diviner: the commission appointed by the patriarch] desired to establish a guard [an intercalary month], but the Arameans [Romans] would not permit them. However, the commanders of the gathering [leaders of the council] convened [another time] and established a guard in the month in which Aaron the priest died" (the month of Ab; Sanh. 12a).

Almost the whole Diaspora depended for the legal observance of the feasts and fasts upon the calendar sanctioned by the Judean Sanhedrin; yet danger threatened the participants in that sanction and the messengers who communicated their decisions to distant congregations. Temporarily to relieve the foreign congregations, Huna b. Abin (doubtless with the approval, or by the order, of Hillel) once advised Raba not to wait for the official intercalation: "When thou art convinced that the winter quarter will extend beyond the sixteenth day of Nisan declare the year a leap-year, and do not hesitate" (R. H. 21a). But as the religious persecutions continued, Hillel determined to provide an authorized calendar for all time to come, though by so doing he severed the ties which united the Jews of the Diaspora to their mother country and to the patriarchate.

The emperor Julian showed himself particularly gracious to Hillel, whom he honored on many occasions. In an autograph letter to him, Julian assured him of his friendship and promised to ameliorate further the condition of the Jews. Before setting out for the war with Persia, Julian addressed to the Jewish congregations a circular letter in which he informed them that he had "committed the Jewish tax-rolls to the flames," and that, "desiring to show them still greater favors, he has advised his brother, the venerable patriarch Julos, to abolish what was called the 'send-tax.'"

S. S. M.

HILLEL B. BERECHIAH (JEBERECHIAH): Palestinian haggadist. He is cited only once under this name, and then as author of an interpretation which elsewhere is attributed to another (Lam. R. i. 5; comp. Sanh. 104b). He is identical with **Alai** or **Ilaa b. Berechiah**, "Hillel" being a variant of this name (comp. ELA). Under this name he appears several times (see Ta'an. 10a; Sanh. 94b; comp. Rabbinovicz, "Diḳduḳe Soferim," *ad loc.*). Among several of his homiletic interpretations, grouped together for students, there is one which declares that when two students travel together and do not discuss the Law they deserve to be consumed by fire. He deduces this from II Kings ii. 11: had Elijah and Elisha not talked of the things of the Law the fiery chariot and horses would have consumed and not merely have parted them (Soṭah 49a).

HILLEL BEN ELIAKIM: Greek Talmudist of the eleventh and twelfth centuries. He was a pupil of Rashi, and is mentioned by Mordecai b. Hillel (Haggahot on Giṭ. No. 466). Hillel wrote a commentary to Sifra in which he often quotes Rashi and Isaac b. Melchizedek; he also wrote a commentary to Sifre. Both works were known to the tosafists; the former is mentioned in the "Sefer Yiḥuse ha-Tanna'im weha-Amora'im," the latter in the Tosefta (Soṭah 15a, 38a) and in the Mordekai (Giṭ. No. 376). The former is also quoted by Elijah Mizraḥi in his commentary on Rashi, by Aaron b. Ḥayyim in his "Ḳorban Aharon," and by Menahem Azariah Fano in his Responsa (No. 11).

S. M. SEL.

HILLEL OF ERFURT: Talmudic authority; lived at Erfurt in the fourteenth and fifteenth centuries; a contemporary of Shalom of Neustadt, and a pupil of Meïr ben Baruch Faleri. According to A. Brüll, Hillel is identical with one "Hiller" who figures in a document of 1416 as having been nominated chief rabbi of Thuringia by Margrave Wilhelm (Ludewig, "Reliquiæ Manuscriptæ," x. 254). Hillel is said to have once left Erfurt for Palestine to fulfil a vow he had made to spend the remainder of his life in the Holy Land. On reaching Vienna he was seized with a longing to return, because he considered that the Talmudical school of Erfurt would suffer by his absence. He thereupon addressed himself to the rabbis, who canceled his vow (Moses Minz, Responsa, No. 97). Judah Minz says that he saw bills of divorce issued by the rabbinical college of Hillel which might serve as models for the spelling of proper names (Responsa, Nos. 54, 105).

S. S. I. BR.

HILLEL BEN GAMALIEL III.: Scholar of the second amoraic generation (3d cent.), son of Gamaliel III., brother of Judah II., and probably a pupil of his grandfather Judah I. (see B. B. 83b). Of his early history nothing is known. As illustrating his modesty the following incidents may be quoted: He and his brother were once at Biri, where people remonstrated against their walking on the Sabbath in shoes with golden buckles, which was not customary at that place: they resignedly removed their shoes and handed them over to their accompanying slaves. On another occasion at Kabul they were about to bathe together when the people informed them that they did not consider it moral for brothers to bathe together: Hillel and his brother thereupon desisted. In either case they could have shown the people that their acts were perfectly legal, but they preferred to comply with the local customs (Tosef., M. Ḳ. ii. 15, 16; Pes. 51a). While Hillel is not often quoted in connection with halakot, he was an able interpreter of Scripture; this accounts for Origen seeking his society and consulting him frequently on difficult Biblical passages. It was probably this Hillel that declared, "The Jews have no Messiah to expect, for they have already consumed him in the days of Hezekiah" (Sanh. 99a). He may have been prompted to this declaration by Origen's professed discovery in the Old Testament of Messianic passages referring to the founder of Christianity. Some credit Hillel, and not his better-known namesake, with the authorship of the following maxims: "Separate not thyself from the community"; "Be not confident in thyself until the day of thy death"; "Condemn not thy neighbor until thou hast been placed in his condition"; "Use no unintelligible expressions assuming that ultimately they will be understood"; "Say not 'When I have leisure I shall study': thou mayest never be at leisure" (Ab. ii. 4; see Tosef., Yom-Ṭob, *ad loc.*).

S. S. M.

HILLEL BEN NAPHTALI HERZ: Lithuanian rabbi; born at Brest-Litovsk in 1615; died at Zolkiev Jan. 3, 1690. After he had studied under Hirsh Darshan, Hillel went to Wilna, where from 1650 to 1651 he was a member of the rabbinical college. He stayed at Wilna until 1666, then became rabbi in Kaidani and several other Lithuanian towns, was called in 1670 as rabbi to Altona and Hamburg, and in 1680 to Zolkiev. He was also a delegate to the Council of the Four Lands at the fair of Yaroslav.

Hillel was the author of an important work entitled "Bet Hillel," a commentary and novellæ on the four parts of the Shulḥan 'Aruk, of which his son, Moses ben Hillel, published only the portions on Yoreh De'ah and Eben ha-'Ezer, with the text (Dyhernfurth, 1691). He also wrote under the same title a homiletic and cabalistic commentary on the Pentateuch, which has not been published.

D. M. SEL.

HILLEL BEN SAMUEL: Italian physician, philosopher, and Talmudist; born about 1220; died about 1295. He was the grandson of the Talmudic scholar Eleazar ben Samuel of Verona. He spent his youth at Barcelona, where he studied the Talmud and natural sciences, his teacher in the study of the former being Jonah Gerondi, distinguished for his piety and rabbinical scholarship. Hillel, witnessing Gerondi's sincere repentance for his behavior in the Maimonides controversy at Montpellier, himself began to study Maimonides' religio-philosophical works, of which he became one of the most enthusiastic admirers. He studied medicine at Montpellier, and practised successively at Rome, where he formed a friendship with the papal physician in ordinary, Maestro Isaac Gajo; at Capua (1260-71), where, having attained fame as physician and philosopher, he lectured on philosophy, among his hearers being Abraham Abulafia; and at Ferrara, where he had relatives.

In his old age he retired to Forli, where he lived in straitened circumstances. Hearing there of Solomon Petit's appearance in Italy with anti-Maimonidean designs, he immediately addressed a letter to Maestro Isaac Gajo, vividly describing the disastrous consequences of the first condemnation of Maimonides' works at Montpellier, and imploring him not to join the movement against Maimonides. In order to convince his friend more fully of the absolute groundlessness of the attacks upon the master, Hillel volunteered, with a somewhat exuberant self-complacency, to explain satisfactorily those passages of the "Moreh" which gave offense. And in order to quiet once and forever the constantly recurring dissensions, Hillel formulated a somewhat fantastic plan, which reveals at the same time his love of justice and his sincere regret that the sorrows of his people were increased by these discords. The plan was as follows: A council, composed of the most eminent rabbis of the East, should convene at Alexandria, and, after listening to the opponents of Maimonides and examining their objections, should give a decision to be accepted by the entire Jewry. It should furthermore depend upon this decision whether Maimonides' works should be burned or should be preserved for further study. Hillel was firmly convinced that the verdict could not be other than favorable to Maimonides.

Hillel, in spite of his wide philosophical knowledge, remained faithful to the teachings of Judaism in their most orthodox interpretation. He even pledged himself to implicit belief in the miraculous stories of the Bible and the Talmud, incurring thereby the censure of the more logical thinker Seraiah ben Isaac ("Oẓar Neḥmad," ii. 124 *et seq.*). In his chief work, "Tagmule ha-Nefesh" (Lyck, 1874), which reviews the philosophical literature, then in vogue, of the Greeks and Arabs, Jews and Christians, Hillel makes constant reference to the Bible and to Talmudic works, advancing his own opinion only when these latter are silent on the subject under consideration.

Hillel's works, in addition to the "Tagmule ha-Nefesh," include: a commentary to Maimonides' 25 Propositions ("Haḳdamot"), printed together with the "Tagmule ha-Nefesh"; a revision of the "Liber de Causis," short extracts of which are given in Halberstam's edition of "Tagmule ha-Nefesh"; "Sefer ha-Darbon," on the Haggadah; a philosophical explanation of Canticles, quoted in "Tagmule ha-Nefesh"; "Chirurgia Burni ex Latina in Hebræam Translata (De Rossi MS. No. 1281); two letters to Maestro Gajo, printed in "Ḥemdah Genuzah" (1856), pp. 17–22, and in "Ṭa'am Zeḳenim," p. 70.

S. S. A. Pe.

HILLEL B. SAMUEL B. NAḤMAN: Palestinian haggadist of the fourth century. It may be assumed that his father was his teacher; but he had other instructors also, among them being Levi b. Ḥama (Ber. 28b). According to Hillel, the merits of the teacher are, in the sight of heaven, five times as great as those of the pupil; for the Bible says, "Thou, O Solomon, must have a thousand, and those that keep the fruit thereof two hundred" (Cant. viii. 12; Cant. R. *ad loc.*). Elsewhere he adduces Neh. viii. 17 to prove that contemporary authorities must be accorded the same respect as was shown to the ancients in their days (Eccl. R. i. 4; comp. Yer. Ḳid. i. 61c).

J. S. M.

HILLEL B. ẒEBI HIRSCH MILEIKOVSKY (HILLEL SALAUTER): Russian rabbi; born in Zareche, a suburb of Wilna, 1819; died in Mstislavl, government of Moghilef, June 1, 1899. At the age of twenty-five he became rabbi of Kreve, government of Wilna, and was afterward successively rabbi of Salaty, Ponyevyezh, Shklov, Khaslavich, and, finally, of Mstislavl. He was considered one of Russia's foremost rabbis, and in 1894 was chosen as a member of the rabbinical commission, the sittings of which he attended in St. Petersburg. He left a manuscript work which his grandson, Moses Mendel of Wilna, undertook to prepare for publication. Several of his responsa are published in R. Simon Zarḥi's "Naḥalat Shim'on."

HILLER, EDUARD: German philologist; nephew of Ferdinand Hiller; born at Frankfort-on-the-Main April 14, 1844; died at Halle March 7, 1891. Educated at the universities of Bonn and Göttingen (Ph.D. 1865), he became a teacher at the Kortegarn institute at Bonn, which position he occupied until 1868. In 1869 he became privat-docent at Bonn; in 1874, professor of classic philology at Greifswald; two years later he removed to Halle. His most important works are: "Quæstiones Herodianæ," Bonn, 1866; "Eratosthenis Carminum Reliquiæ," Leipsic, 1872; "Theonis Smyrnæi Expositio Rerum Mathematicarum ad Legendum Platonem Utilium," *ib.* 1878; "Albii Tibulli Elegiæ," *ib.* 1885; "Beiträge zur Textgesch. der Griechischen Bukoliker," *ib.* 1888. He also edited Fritzsche's "Theocritus" (3d ed.), Bergk's "Poetæ Lyrici Græci," vols. ii. and iii. (4th ed.), and the "Anthologia Lyrica" (4th ed.) of the latter author.

HILLER, FERDINAND: German composer and musical writer; born at Frankfort-on-the-Main Oct. 24, 1811; died at Cologne May 10, 1885. He studied with Hofmann (violin), Aloys Schmitt (pianoforte), and Vollweiler (harmony and counterpoint). At the age of ten he played a Mozart concerto in public, and he began to compose at twelve. After a supplementary course of two years under Hummel at Weimar, he accompanied him on a professional tour to Vienna. The following is one of several short verses which were written on his departure by Goethe:

> "Ein Talent das Jedem frommt,
> Hast du in Besitz genommen;
> Wer mit holden Tönen kommt,
> Ueberall ist der willkommen."

An interesting account of this journey is given by Hiller in the sketch entitled "Aus den Letzten Tagen Ludwig van Beethoven's," contained in his "Aus dem Tonleben Unserer Zeit" (Leipsic, 1871). From Vienna, where he saw Beethoven upon his death-bed, he returned to Frankfort. In 1828 he went to Paris. He lived there for seven years, and taught at Choron's Institution de la Musique.

Shortly after the death of his father, Hiller's mother, a highly gifted woman, joined her son in Paris. His house then became the rendezvous for many celebrities of the day—Cherubini, Rossini, Chopin, Liszt, Berlioz, Nourrit, Heine, and Börne being among the brilliant coterie assembling there. Hiller also gave a number of concerts in Paris (generally in association with Fétis and Baillot), and it was he who first introduced Beethoven's Concerto in E flat to the Parisian public. In 1836-37 he conducted at Frankfort the concerts of the Cäcilien-Verein. In 1838 Hiller went to Italy; his opera "Romilda" was produced at La Scala, Milan, in 1839. The failure of this work was balanced by the extraordinary success of his oratorio "Die Zerstörung Jerusalems," the production of which at Leipsic, during the winter of 1839-40, the composer, at the solicitation of Mendelssohn, personally superintended.

Returning to Germany in 1842 from a second short stay in Italy, Hiller went to Leipsic, where, during the absence of Felix Mendelssohn, he conducted the Gewandhaus concerts for the season of 1843-44. To this period belong his two operas "Traum der Christnacht" and "Conradin." In 1847 he became municipal "Kapellmeister" at Düsseldorf, and in 1850 accepted a similar position at Cologne. During the season of 1852 he was conductor of the opera at the Théâtre Italien in Paris.

In 1849 he was elected a member of the Academy of Fine Arts, Berlin, and in 1868 he received the honorary degree of "doctor" from the University of Bonn. He retired Oct. 1, 1884. Hiller embraced the Christian faith.

Among Hiller's principal literary productions may be mentioned: "Die Musik und das Publikum" (1864); "Ludwig van Beethoven" (1871); "Aus dem Tonleben Unserer Zeit" (2 vols., 1868; new series, 1871); "Felix Mendelssohn-Bartholdy, Briefe und Erinnerungen" (1874; 2d ed., 1878); "Musikalisches und Persönliches" (1876); "Goethe's Musikalisches Leben" (1883); "Uebungen zum Studium der Harmonie und des Kontrapunktes" (14th ed., 1891).

HILLQUIT, MORRIS: American lawyer and socialist; born at Riga, Russia, Aug. 1, 1870; educated at the gymnasium of that town. He emigrated to the United States in 1887, studied law, and was admitted to the New York bar in 1893. In 1888 Hillquit became a member of the Socialist Labor party, and has been active in the Socialist movement in various ways. He was a delegate to the Rochester convention in 1899-1900, and assisted in the framing of the platform and resolutions adopted there. Together with Job Harriman and Max Hayes he served as a representative of the Rochester wing of the Socialist Labor party at the Unity convention held at Indianapolis in 1900, and was prominent in the fusion of his party with the Social Democratic party founded by Eugene V. Debs. In the Socialist party he is now (1903) the national committeeman from the state of New York. Hillquit has served as counsel for a number of trade-unions during labor disputes. In addition to numerous articles contributed to the Socialist press of America, he has written "The History of Socialism in the United States," New York, 1903.

HIPPOCRATES: Greek physician; born in Cos 460 B.C.; died at Larissa in Thessaly about 360 B.C. He studied medicine under Herodicus of Selymbria and under his father, Heraclides, and philosophy under Gorgias of Leontini and Democritus of Abdera. He undertook many travels, and lived for a long time in the island of Thasos and in Thessaly.

Hippocrates' influence and reputation in the Middle Ages among the learned Moslems and Jews increased as his works became better known by translation. He is the only Greek author that has received in Hebrew sources the honorific epithet "the Pious" (החסיד). Maimonides ("Shemonah Peraḳim," i., beginning) calls him "head of the physicians" (ראש הרופאים). The Arabs gave to his name the forms "Abuḳrat" and "Buḳrat." Jewish authors rendering his works from Arabic translations, quote his name in these forms; when rendering from Latin translations they use the forms "Ippoḳrat" and "Ippoḳras."

The influence of Hippocrates' medical principles upon the treatment of diseases among the Jews must have been very deep, as may be learned from their profound study of his works.

Of his writings the "Aphorisms" (*'Αφορισμοί*) were most studied by the Jews. They transcribed the Arabic translation of Ḥunain b. Isḥaḳ ("Kitab al-Fuṣul") in Hebrew characters (Vatican MS. No. 426), and also paraphrased and translated the work into Hebrew under the title "Peraḳim" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2245). The Latin translation of Constantinus Africanus was likewise rendered into Hebrew by Hillel ben Samuel (thirteenth century) in Italy (Vat. MS. No. 368, 50; Paris MS. No. 1111); and this Hebrew translation, again, was commented on by Moses de Rieti (born in 1388; Steinschneider, "Cat. Berlin," Nos. 62, 68; Parma, De Rossi, MS. No. 1185; Amsterdam MS. No. 4052). Judah ben Samuel Shalom composed in Hebrew (about 1450) a commentary on the "Aphorisms" for his pupil Raphael b. David ha-Kohen of Lunel (Florence MS. No. 88; Paris MS. No. 1113; Vienna MS. No. 133).

Hippocrates' "Prognostics" (*Προγνωστικόν*) were likewise translated from the Arabic into Hebrew with the title "Haḳdamat ha-Yedi'ah" (Leyden MS. No. 2, 3; Paris MS. No. 1106, 12; Parma, De Rossi, MS. No. 565), and paraphrased in Hebrew under the title "Ḥidot we-Hashgaḥot" (1197–99), of which work many manuscripts are in existence.

Moreover, his "On Regimen in Acute Diseases" (*Περὶ Διαίτης 'Οξέων*) was translated into Hebrew (probably from the Arabic) by Nathan ha-Meati (finished in Rome, 1282) under the title "Hanhagat ha-Ḥolayim ha-Ḥaddiyim" (Leyden MS. No. 2, 18).

The same Nathan ha-Meati translated Hippocrates' "On Airs, Waters, and Places" (*Περὶ 'Αέρων, 'Υδάτων, καὶ Τόπων*) into Hebrew with the title "Sefer ba-Awwerim uba-Zemannim weha-Memot weha-Araẓot," probably from the Arabic too (Leyden MS. No. 2, 10; Paris MS. No. 1106, 3).

J. M. Sc.

HIPPOLYTUS: Christian theologian of the second and third centuries; schismatic Bishop of Rome in opposition to Calixtus I. (217); deported in 235 to Sardinia, where he died. Hippolytus was one of the most prolific writers among the Church Fathers, the first real exegete of the Christian Church, and, because of his intimate acquaintance with philosophical and gnostic systems, one of the most prominent among the early defenders of Catholic doctrine. His works have come down in a fragmentary state and in various translations, Latin, Syriac, Arabic, Ethiopic, Armenian, and Georgian. In 1551 a statue of Hippolytus, made in the third century, was unearthed in the Via Tiburtina in Rome, on the pedestal of which was engraved a list of his many works, a list which is found with variations both in Eusebius and in Jerome. Hippolytus is of interest in several ways to the Jewish student. As a defender of his church it was natural that he should attack the Jews. His *'Αποδεικτικὴ πρὸς 'Ιουδαίους* (on the statue simply *Πρὸς τοὺς 'Ιουδαίους*) was written to show that the Jews were themselves responsible for their misfortune and their wretched condition, because of their wicked behavior toward the Messiah (Caspari, "Quellen," p. 395). This treatise was much used by later anti-Jewish writers, and has probably not survived in its original form (Bonwetsch, "Studien," pp. 13, 19). In another work, the "Treatise on Faith," found by N. J. Marr in a Grusian manuscript in Tiflis, there is a further polemic against the Jews (*idem*, "Hippolyt's Kommentar zum Hohen Liede," p. 11, Leipsic, 1902).

Anti-Jewish Writings.

But his criticism, however sharp, has no touch of bitterness or of hatred. In the fragments of a short work on thirty-two heresies, found by Lipsius, he describes at length the four pre-Christian heretical sects: Dositheans, Pharisees, Sadducees (whom he derives from the Dositheans), and Herodians. It seems generally accepted now that he was also the author of the work on the refutation of heresies entitled *Κατὰ Πασῶν Αἱρέσεων 'Ελεγχος*, the first part of which, under the title *Φιλοσοφούμενα*, was until 1842 ascribed to Origen. In book ix., ch. 13 he gives a detailed explanation of the tenets of the Pharisees, the Sadducees, and the Essenes (see ESSENES); and he then explains the subject-matter of the Jewish religion as being of a fourfold character—theological, natural, moral, and ceremonial. In ch. 25 he has the following to say about the Jews:

> "They earnestly aim at serious habits and a temperate life, as one may ascertain from their laws. . . . The reader will find himself astonished at their temperance and the amount of diligence lavished on customs legally enacted in reference to man. . . . The superiority of their ritual it is easy for those who wish it to ascertain, provided they read that which furnishes information on these points."

His Exegesis.

The same generous spirit is seen in the following chapter, where he speaks of the Jewish doctrine of the Messiah, which he gives clearly and succinctly, though naturally opposing it. In book x. he treats also of the Ebionites (ch. 18), and of Jewish chronology (ch. 26) as proving the antiquity of Christian truth. In various manuscripts containing an Arabic catena of the Pentateuch (ed. Lagarde, "Materialen zur Kritik des Pentateuchs," ii., Leipsic, 1867) there are extracts from "Hippolytus, the commentator of the Targum" or "of the Syriac," which are undoubtedly by this author. Jean Gagnier had already seen parallels in these extracts to such works as the Pirḳe Rabbi Eliezer and the targums of Onḳelos and Jonathan. What the word "targum" means in this connection is quite uncertain; and additions have undoubtedly been made in the course of time. As Lagarde had seen, the work is very much in the nature of a Jewish midrash, indicating the source from which many of the ideas have been borrowed (see Achelis, "Hippolitstudien," Leipsic, 1897). As an exegete, Hippolytus uses the allegory and the type, but in a moderate degree. He finds references in the Book of Daniel to Antiochus and the Maccabees. He admits also that the historical character of the story of Susanna is questioned by the Jews.

The fragments of Hippolytus' writings were first collected by Lagarde (Leipsic, 1858), and are now (1903) in course of publication by Bonwetsch and Achelis for the Royal Prussian Academy edition of the Church Fathers (vol. i., Leipsic, 1897).

G.

HIPPOS ('Ιππος): One of the cities of the DECAPOLIS in Palestine, the site of which is uncertain. For the identifications of the ancient geographers see Pliny ("Hist. Naturalis," v. 14, xv. 18), Josephus ("Vita," § 65), and Eusebius ("Onomasticon," *s.v.* "Apheca"). In the Talmud Hippos occurs under the name "Susita" (סוסיתא), the Hebrew equivalent, and it is frequently mentioned with Tiberias. These two cities, facing each other (Gen. R. xxxii.), were situated on opposite shores of the lake; and merchants went to and fro between them (Yer. Sheb. viii. 3). Susita was for a time opposed to Tiberias (Lam. R. i. 18); and it is spoken of as inhabited by Gentiles (Yer. R. H. ii. 1). It is mentioned with Ashkelon as an example of a heathen town in the midst of the land of Israel (Tosef., Oh. xviii. 4). R. Joshua b. Levi identified the land of Tob (Judges xi. 3) with Susita (Yer. Sheb. vi. 2). It is very likely that the primitive name was "Susita" and that "Hippos" was the Greek translation of this, for by the Arabian geographers it is called "Susiyyah."

Hippos seems to have been an important city, as the whole district was called, after it, "Hippene" (Josephus, "B. J." iii. 3, § 1). It was conquered by Alexander Jannæus and afterward freed by Pompey (*idem*, "Ant." xiv. 4, § 4; *idem*, "B. J." i. 7, § 7), thus becoming one of the independent towns of the Decapolis. Later, Augustus presented it to Herod ("Ant." xv. 7, § 3; "B. J." i. 20, § 3), after whose death it was again wrested from the Jewish dominions ("Ant." xvii. 11, § 1; "B. J." ii. 6, § 3). From that time on Hippos was designated as a Greek city (*ib.*); and probably the Talmudic passage Yer. R. H. ii. 1 refers to that epoch. At the outbreak of the Roman war the Jews, led by Justus of Tiberias, devastated Hippos; but the inhabitants avenged themselves by massacring the Jews ("B. J." ii. 18, §§ 1, 5).

In the Christian period Hippos became an episcopal see (Epiphanius, "Hæres." lxxiii. 26). A coin has been discovered bearing the name "Hippos" (Muret, "Revue Numismatique," 1883, i. 67). It is of the time of Nero, having on the obverse side Nero's head and on the reverse a horse with the inscription Ιππηνων.

HIRAH (חירה): An Adullamite, the friend of Judah, at whose house the latter stopped after the sale of Joseph (Gen. xxxviii. 1). Hirah accompanied Judah when he went to Timnah to superintend the shearing of his sheep (*ib.* verse 12). He was also the messenger that carried the kid from Judah to Tamar (*ib.* verse 20).

E. G. H. M. Sel.

HIRAM, HURAM (חירם, חורם): 1.—Biblical Data: King of Tyre in the time of David and Solomon. After David had conquered Jerusalem, Hiram sent him cedar-wood and carpenters and masons so that he might build a house (II Sam. v. 11; I Chron. xiv. 1). Hiram was a friend of David throughout the latter's life (I Kings v. 15); and after David's death he continued on terms of friendship with Solomon (*ib.* v. 21 *et seq.*). Hiram supplied Solomon with cedar-trees, fir-trees, and Tyrian constructors for the building of the Temple; and Solomon repaid him with wheat and olive-oil (*ib.* v. 24, 25, 32; II Chron. ii. 14, 15). Twenty years later Hiram sent to Solomon gold and another large supply of cedar- and fir-trees; and Solomon gave him in return a present of twenty towns in Galilee (I Kings ix. 10, 11). Although Hiram was dissatisfied with the present, his friendship for Solomon did not diminish; and he sent Solomon a hundred and twenty talents of gold (*ib.* verses 12-14). Hiram permitted Solomon's ships to sail with his own to Ophir; and the Jewish sailors were guided by the Tyrians, who were the better mariners (*ib.* ix. 27, 28; x. 22).

——**In Rabbinical Literature:** Hiram, Solomon's friend, is identified by some with Judah's friend Hirah (Gen. xxxviii. 1); and even those who regard Hirah and Hiram as two personages, admit Hiram's great age, as he was still living at the time of the prophet Ezekiel, whose prophecy concerning the King of Tyre is directed against Hiram (Ezek. xxviii. 2 *et seq.*; Gen. R. lxxxiv. 8; Jerome in his commentary on Ezek. xxviii. 11 calls the identification a "fabula Hebræorum"; comp. Aphraates, "Homilies," v., ed. Wright, pp. 84, 85). In Ḥul. 89a a tanna of the middle of the second century speaks of "Hiram, the Prince of Tyre" (comp. Mek., Beshallaḥ, Shirah, ix.). Hiram's friendly correspondence with Solomon, which is mentioned in Scripture, was for centuries after preserved in the archives of Tyre (Josephus, "Ant." viii. 2, §§ 6-8; *idem*, "Contra Ap." i. 18-19; Eupolemus, in Eusebius, "Præparatio Evangelica," ix. 33, 34, calls King Hiram "Suron"). Their intercourse was not confined to the exchange of gold, silver, and cedar- and fir-wood for grain, oil, and wine; for they also exchanged questions and answers. On one occasion Solomon sent Hiram riddles, asking for some in return; and he proposed that the one who could not solve them should pay a forfeit in money. Hiram accepted this proposition, and subsequently had to pay many sums, since he was unable to solve Solomon's riddles. Later, however, a Tyrian, Abdamon by name, came to Hiram's aid and propounded riddles to Solomon: and as the latter could not solve them, he was obliged to pay large sums to Hiram (Josephus, "Ant." viii. 5, § 3).

Hiram, instead of being grateful to God for allowing him to attain to a good old age, began to imagine that he himself was a god, and endeavored to make people believe in him by means of seven heavens that he had artificially constructed. He had four iron pillars fastened to the bottom of the sea, and on these he erected seven heavens, the first being of glass, the second of iron, the third of lead, the fourth of molten metal (brass), the fifth of copper, the sixth of silver, and the seventh of gold. These heavens were separated from each other by channels of water, ranging in size from 500 to 3,500 square ells, so that each heaven was 500 square ells larger than the one below it. Furthermore, Hiram collected huge boulders in the second heaven, the rolling of which resembled thunder; and flashes of lightning were produced by great precious stones. While Hiram was floating on high the prophet Ezekiel was brought to him through the air, to reprove him for his arrogance. But the Prince of Tyre replied haughtily that he, like God, was sitting on the sea and in seven heavens, and had already survived David, Solomon, twenty-one kings of Israel, twenty kings of Judah, ten prophets, and ten high priests. Thereupon God said: "What! a mortal dares to deem himself a god because he has furnished cedars for the building of My Temple? Well, then, I will destroy My house in order that meet punishment may come upon him." And this was brought about; for, after the destruction of the Temple, Nebuchadnezzar dethroned his stepfather Hiram (read "ba'al immo," following Lev. R. xviii. 2); and every day a piece was cut from his body, which he had to eat until he died a miserable death. The wonderful palace sank into the earth, where it is preserved for the pious "in the future world" (Yalḳ., Ezek. 367; variants to this text in Jellinek, "B. H." v. 111–112; H. M. Horowitz, "Bet 'Eḳed ha-Aggadot," iii. 28–31). According to one haggadah Hiram entered paradise alive, and in order to reconcile this statement with the story as given above, it is said in the Second Alphabet of Ben Sira (ed. Venice, 29a): "God brought Hiram, the King of Tyre, alive into paradise because he built the Temple; at first he was God-fearing and lived in paradise a thousand years; but then he became haughty and claimed to be a god, whereupon he was driven out of paradise into hell." It is highly probable, however, that this haggadah was originally referred to Hiram, the builder of the Temple (I Kings vii. 13; comp. Hiram [2], below).

The self-deification of Hiram is also mentioned several times in the Midrash: an old midrash (Gen. R. ix. 5; comp. B. B. 75a, foot) says that the only reason why God pronounced death on Adam and on the human race was because he foresaw that Nebuchadnezzar and Hiram would pretend to be gods. The identification of the anonymous Prince of Tyre in Ezek. xxviii. with Hiram was probably due in part to the fact that the Biblical Hiram was confounded with Hiram, a contemporary of Nebuchadnezzar, of whom Josephus speaks ("Contra Ap." i. 21).

——**In Non-Jewish Sources:** According to Dius the Phenician and Menander the Ephesian (see Josephus, "Contra Ap." i., §§ 17, 18), Hiram, the son of Abiba'al, reigned thirty-four years, and died at the age of fifty-three. Solomon built the Temple in the twelfth year of Hiram's reign, which, according to this statement, must have lasted from 969 to 936 b.c. This does not agree with the Biblical data; for if Hiram sent materials to David after his conquest of Jerusalem and was still alive twenty years after the construction of Solomon's Temple, his reign must have lasted about sixty years. It is likely, however, that the Hiram of David's time was the father of the Hiram of Solomon's; and this supposition is confirmed by II Chron. ii. 12. Josephus, relying on the two above-named historians, relates further (*l.c.*) that Hiram built first the temple of Hercules, and then the temple of Astarte when he made his expedition against the Tityans. According to other Phenician historians (quoted by Tatian, "Contra Græcos," § 37), Hiram gave his daughter in marriage to Solomon.

e. g. h. M. Sel.

2. Artificer sent by Hiram, King of Tyre, to Solomon. He was apparently of a mixed race; his father being a Tyrian, and his mother of the tribe of Naphtali (I Kings vii. 13, 14) or of the tribe of Dan (II Chron. ii. 12 [A. V. 14]). The words "ḥuram abi," which terminate II Chron. ii. 11 (A. V. 13), generally translated "Huram my father's" (see No. 1), are taken by some to be the name of the artificer; with this name compare "Hammurabi," of which "Hiram Abi" may be a local variant or misreading. The name is curiously used in Freemasonry. There is an essential difference, as regards the nature of Hiram's technical specialty, between I Kings and II Chronicles. According to the former, Hiram was an artificer only in brass; and the pieces which he executed for the Temple were the two pillars Jachin and Boaz, the molten sea with its twelve oxen, the ten lavers with their bases, the shovels, and basins, all of brass (I Kings vii. 14-45). But in II Chron. ii. 13 [14] it is said that Hiram was "skilful to work in gold, and in silver, in brass, in iron, in stone, and in timber, in purple, in blue, and in fine linen, and in crimson; also to grave any manner of graving." Thus he seems to have superintended all the work of the Temple. Josephus says ("Ant." viii. 3, § 4) that Hiram's father was Ur of the stock of the Israelites, that he was skilful in all sorts of work, but that his chief skill lay in working in gold, silver, and brass. Josephus apparently interprets the words "ish ẓori" to mean a man who lived in Tyre, and the name of "Ur" probably originated in the confusion between "Hiram" and "Bezaleel." In I Kings vii. 40 (A. V. margin) the form "Hirom" (חירום) occurs.

e. g. h. M. Sel.

HIRED MEN or **HIRELINGS.** See Hiring and Letting; Master and Servant.

HIRING AND LETTING (Hebr. "sekirut"): Hiring is a transaction by which parties, for a compensation, contract for a definite period for (*a*) the use of property or (*b*) personal service.

I. The Mishnah (B. M. 93a) distinguishes four kinds of bailees: (1) the gratuitous bailee or depositary; (2) the borrower; (3) the paid bailee; and (4) the hirer (see Bailments). The hirer has the same responsibility as the paid bailee; that is, he must make restitution for the object entrusted to him in case it is lost or stolen, or if it is injured through his negligence. He is free from responsibility if it is impossible to prevent the loss; for instance, if an animal in his care dies or receives an injury accidentally or is violently abducted by robbers. In all other respects hiring is subject to the same laws as selling (*ib.* 56b), both as regards the manner of acquiring possession of the object (see Alienation and Acquisition) and as regards deceit or overcharge (*ib.* 99a; Maimonides, "Yad," Sekirut, ii. 8; *ib.* Mekirah, xiii. 17; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 307, 2; 227, 35).

Movable Property.

The hirer may use the object only for the purpose for which it was hired; and if he employs it in any other way, he becomes responsible for all accidents. The Rabbis, however, distinguish between accidents that are due directly to this change from the original purpose and those that can be ascribed to other reasons. If one who hires an animal for the purpose of taking it up a hill leads it down into a valley, thereby allowing the animal to slip and become injured, the hirer is free; for this might have happened on the hill as well. But if it becomes overheated for want of pure air, the hirer has to make restitution; for this could not have occurred if he had taken the animal on the hill (B. M. 78a; "Yad," Sekirut, iv.). If it is stipulated that the animal is to be laden with a burden of a certain weight, or if there is an established custom as to the weight of a burden to be put upon an animal, and the hirer adds one-thirtieth or more thereto, he becomes responsible for all accidents. The hirer may not change from the original terms either in the weight or as regards the kind of burden put upon the animal (B. M. 80a; "Yad," *ib.*; Ḥoshen Mishpaṭ, 308, 5, 6; 311, 1). Whether the owner has to substitute another object for the use of the hirer in case an accident happens to the one originally hired, depends greatly on the conditions made in the contract ("Yad," *l.c.* v. 1-3). One who hires an object may not sublet it; for it is presumed that no one desires his property to be in hands other than those to whom he entrusts it (B. M. 29b). But if the hirer does let it to another, he assumes all responsibility; while all the profits derived from the transaction go to the owner of the object ("Yad," *l.c.* i. 4).

Houses.

The landlord who lets a house for a definite period, may not retract from his contract, even when he himself has no place of abode. During the period of the lease he may not evict his tenant, nor may he compel the latter to leave the house, even for a short period, in order to make necessary repairs. If the lease is indefinite, containing no provision as to time, the tenant may be ejected after thirty days' notice. In the winter, however, the tenant may not be ejected. The lessee is permitted to let the house to another tenant as long as the number of the members of the two families is the same ("Yad," *l.c.* v. 5). If the lease specifies a certain house, and this is destroyed, the landlord is not compelled to rebuild the house for the use of the tenant; but he must return to him whatever rent has been paid in advance for the unfulfilled portion of the contract. When, however, the lease specifies no particular house, and the landlord provides the lessee with a house which is later destroyed, the lessee may demand that the landlord provide him with another dwelling (B. M. 103a; "Yad," *l.c.* vi. 7; Ḥoshen Mishpaṭ, 312, 17). If the landlord sells the house during the occupancy of the tenant, the buyer becomes obligated by the terms of the lease; and all the laws that applied to the first owner apply with equal force to the second. See Ejectment.

In some places there was a fixed time when all tenants changed their leases or moved from place to place. If, in such a place, the tenant continued to live in the house for a short period thereafter he might be compelled to pay the year's rental even if he removed before the expiration of the year (Ḥoshen Mishpaṭ, *l.c.* 14). The landlord was compelled to make all necessary repairs. The tenant had to bear all expenses incidental to the carrying out of a religious command, as the placing of the mezuzah on the door-post or the railing around the roof (Deut. xxii. 8), or to the securing of greater convenience. In all these matters, however, the custom of the land helped to decide the matter (B. M. 101b; "Yad," *l.c.* vi. 3; Ḥoshen Mishpaṭ, 314).

In Fields and Gardens.

With regard to the manner of paying the rental, the Rabbis recognize three kinds of hirers of fields or gardens: (1) one who hires a field at an annual rental payable in money; (2) one who stipulates to pay the rental in grains or fruit, the produce of the land ("ḥoker"); and (3) one who stipulates to pay as his rent a certain percentage of the produce ("meḳabbel"). The first two are subject to the same laws. They have to pay the stipulated sum, in money or in crops, whether the harvest is successful or not. The landlord, however, may not demand the full amount when the failure of the crops is general in the locality (B. M. 105b; "Yad," *l.c.* viii. 5; Ḥoshen Mishpaṭ, 321, 322). But he whose rental is a certain percentage of the produce has to pay such percentage even when the calamity is universal. He may not cease from labor as long as the land produces two measures ("se'ah") more than the expense of cultivation; and if he leaves it fallow, the court estimates how much the land would have produced by careful management and collects that sum from the hirer (B. M. 104a; "Yad," *l.c.* 13; Ḥoshen Mishpaṭ, 328). While all authorities agree that the landlord must provide all the necessary implements for tilling and harvesting in the case when the rental is a share of the produce, there is a difference of opinion when it is a fixed amount payable in money or crops; some hold that in these cases the tenant has no such claim upon the landlord after he obtains the land (B. M. 103b; "Yad," *l.c.* 2; Ḥoshen Mishpaṭ, 320, 3; comp. Isserles' gloss). Local custom was of importance also in regulating the kind of seed to be sown, and the manner of sowing and harvesting, as also the mode of payment when this was not specified.

II. The Bible makes no provision in regard to the regulation of labor, except by commanding that the wages of the day-laborer be paid promptly (Deut. xxiv. 14, 15; see Wages). In the Talmud, however, there are extended discussions concerning the rights both of the laborer and of the master. Two kinds of laborers are recognized by the Rabbis: (1) the day-laborer (פועל), and (2) the piece-worker (קבלן).

The Day-Laborer.

1. The day-laborer may cease from his work in the middle of the day (B. Ḳ. 116; B. M. 10a, 77a). This law is based upon the principle that the working man is to be considered with great favor and leniency by the law. If the laborer's hire is a fixed sum per day, and he ceases from work in the middle of the day, he receives half the sum for his half-day's work, even though the master may have to pay more to another man to complete the work. If the master obtains a laborer for the rest of the day for less than half the sum, the original laborer is entitled to the difference. The Rabbis base this liberal principle upon the Scriptural passage (Lev. xxv. 55), "For unto me, the children of Israel are servants"—but they are not servants of servants (B. Ḳ. 116a). In accordance with this principle, it is provided that no Israelite shall hire himself out for a period longer than three years, even in the capacity of a teacher or a scribe (Ḥoshen Mishpaṭ, 333, 3, Isserles' gloss; comp. Deut. xv. 18; Isa. xvi. 14).

Overtime.

When, however, the work, if not finished betimes, would be spoiled (דבר האבוד), the laborer may not cease work, except when he is prevented by some accident from continuing. If he does cease, the master may hire other workmen to finish the work and charge all the expense to the original laborer (B. M. 77a; "Yad," *l.c.* ix., x.; Ḥoshen Mishpaṭ, 333). The hours of the day-laborer, as well as the amount of food to be given to him during work, depend on local custom. The master may not compel the workman to work overtime if the custom is to cease labor at a certain hour, even though he be willing to pay for the extra time. If he specifies in his contract that he hires the laborer according to the laws of the Torah, the laborer must work from sunrise to sunset, except on Friday, when he is permitted to go home earlier in order to prepare himself for the Sabbath (B. M. 83a; Ḥoshen Mishpaṭ, 331, Isserles' gloss). If the laborer finishes the work given to him in less than a day, the master may give him some other occupation equally difficult with, but not more difficult than, the first to engage him for the rest of the day. In case the master has no other occupation for him, the laborer is entitled only to the payment of a laborer who is not at work, that is to say, the minimum amount which is paid for labor. If the laborer is hired for the purpose of fetching a certain object and he does not find it, he may claim the full amount of his wages (B. M. 77a; "Yad," *l.c.* ix. 7, 8; Ḥoshen Mishpaṭ, 335). If the laborer is hired for a number of days in succession, he is not permitted to work at night; for by so doing he might become less fit for the next day's labor. In general, the laborer is warned to perform his work faithfully, and not to waste the time that belongs to his master. Then he will be blessed, even as Jacob was blessed with great wealth because he worked faithfully for Laban (Gen. xxx. 43; Tosef., B. M. viii. 2; "Yad," *l.c.* xiii. 6, 7; Ḥoshen Mishpaṭ, 337, 19, 20).

The Piece-Worker.

2. The piece-worker is not as much favored by the Law as the day-laborer, and if he retracts from his contract he has to suffer the loss. If he undertakes to finish a piece of work for a certain sum, and after he has completed one-half of it he retracts, he is not entitled to half that sum, the value of the work done, but the court estimates how much it will cost to finish the work, and this amount is subtracted from the original sum, and the remainder is given to him. In case the work is spoiled through not being finished the same day, the piece-worker is subjected to the same laws as the day-laborer (B. M. 76b; "Yad," *l.c.* ix. 4; Ḥoshen Mishpaṭ, 333, 4, 5).

The merchant workman (אומן) who undertakes to do the work at his own home is in some respects regarded as a bailee and in others as a seller. If the material is given to him, and he has merely to prepare it or to put it into a certain shape, most authorities agree that he is to be regarded as the paid bailee (see Bailments). If he finishes the work and the master is notified to come and claim it, from that time he is regarded as a gratuitous bailee, and is not responsible for any accident that may happen to the object, except when caused by wilful neglect. If he has to provide the material also, he is in all respects regarded as a seller; and the master assumes no responsibility for the object until it is delivered to him. If the material is supplied by the master, but the workman adds something to it, the latter is regarded as a paid bailee for the material given to him, but not for the addition made by him (B. Ḳ. 99a; B. M. 80b; "Yad," *l.c.* 3, 4; Ḥoshen Mishpaṭ, 306).

For further particulars regarding the relations of master and laborer see Fee; Master and Servant; Wages.

S. S. J. H. G.

HIRSCH, ALBERT: Austrian playwright; born in Vienna June 29, 1841. He was first a public-school-teacher; then went on the stage, playing, among other places, in the variety theater in the Josefstadt; but he soon left the company and devoted himself to folk-songs and plays, in which field he has become very prominent. He has written more than 200 popular plays, mostly of Jewish life, and has had them performed at home and abroad with much success by a company organized by himself. Hirsch has also composed the music for his works, founding his compositions for the most part on Jewish melodies.

S. E. J.

HIRSCH, ALPHONSE: French painter; born in Paris 1843; died there July 15, 1884. He was a pupil of Meissonier and Bonnat, and began by sketching and etching. Of the latter art he has left many fine examples; but his chief merit is as a colorist. Hirsch exhibited at the annual salons. Among his best works are: "La Corde au Cou"; "Le Premier-Né"; "Un Dernier Regard"; "Le Modèle"; "La Convalescente"; "En Visite"; "Premier Trouble." Among his portraits are those of Isidor, chief rabbi of France, 1877; Octave Feuillet, 1878: Alfred Naquet, 1880; Ernest Daudet, 1881; Eugène Manuel, 1884.

S. V. E.

HIRSCH, AUGUST: German physician and medico-historical writer; born at Danzig Oct. 4, 1817; died at Berlin Jan. 28, 1894. After having followed commerce for a few years, he began the study of medicine at the University of Leipsic in 1839, and completed his course of study at Berlin in 1843, when he received the degree of doctor of medicine. The following year he established himself as a physician in Elbing, West Prussia. Two years later he removed to Danzig. As it was his intention to enter the Anglo-Indian service as a surgeon, he gave special attention to geographic-pathological studies. The results of his researches were published in the "Hamburger Medizinische Zeitschrift" in 1848, under the title "Ueber die Geographische Verbreitung von Malariafieber und Lungenschwindsucht und den Räumlichen Antagonismus dieser Krankheiten." These investigations led him to historical pathology; his "Handbuch der Historisch-Geographischen Pathologie" (2 vols., Erlangen, 1859-64; 2d ed., 3 vols., 1881-86; translated into English by the New Sydenham Society, 1883) has become indispensable to military surgeons and practitioners in the tropics.

In 1863 he was called to the University of Berlin to fill the chair of medical history, which position he held until his death. In 1865 he was sent by the government to the Vistula districts in West Prussia to report on the epidemic there of cerebrospinal meningitis. His report was published under the title "Die Meningitis Cerebro-Spinalis Epidemica" (Berlin, 1866). During the Franco-Prussian war (1870-71) he was in charge of a sanitary train. The following year he joined with others in founding the "Deutsche Gesellschaft für Oeffentliche Gesundheitspflege," of which he was president until 1885. In deference to his and Pettenkofer's representations, the government appointed an imperial commission on cholera. As a member of this body Hirsch was sent again to the Vistula. His official report, "Das Auftreten und der Verlauf der Cholera in den Preussischen Provinzen Posen und Preussen (Mai-September, 1873)," was reprinted separately (1874; 2d ed., Berlin, 1876). In 1878 he was the German representative at the international cholera congress in Vienna. In 1879 he was sent by the government with Sommerbrodt and Küssner to Russia to report on the prevalence of cholera in the government of Astrakhan. "Mittheilungen über die Pest-Epidemie im Winter 1878-79 im Russischen Gouvernement Astrachan" (Berlin, 1880) is their conjoint report.

From 1866 Hirsch acted with Virchow as editor of "Jahresbericht über die Fortschritte und Leistungen in der Medizin." From 1884 to 1888 he was one of the editors of the "Biographisches Lexikon der Hervorragenden Aerzte Aller Zeiten und Völker" (Vienna). He also contributed many medical biographies to the "Allgemeine Deutsche Biographie."

Hirsch was a prolific writer. Besides the foregoing works, he wrote: "Ueber die Anatomie der Alten Griechischen Aerzte" (Berlin, 1864); "J. F. C. Hecker: Die Grossen Volkskrankheiten des Mittelalters: Historisch-Pathologische Untersuchungen" (*ib.* 1865-66); "Ueber Verhütung und Bekämpfung der Volkskrankheiten" (*ib.* 1875); "Geschichte der Augenheilkunde" (Leipsic, 1877); "Geschichte der Medizinischen Wissenschaft in Deutschland" (Munich and Leipsic, 1894).

S. F. T. H.

HIRSCH, CLARA DE (Baroness de Hirsch-Gereuth): Wife of Baron Maurice de Hirsch; born at Antwerp June 13, 1833; died in Paris April 1, 1899. Her mother was a sister of Solomon H. Goldschmidt, who for many years acted in the capacity of president of the Alliance Israélite Universelle. The baroness, then Clara Bischoffsheim, received a liberal education; she was an accomplished linguist, able to speak and write fluently in French, German, English, and Italian. After leaving the schoolroom she acted as her father's secretary, and thus became conversant not only with his business affairs, but also with his work as legislator and philanthropist. This proved to be a valuable experience even during her husband's lifetime, and particularly so after his death, when she was left sole administrator of his large estate. She was a ready writer, and was her husband's only assistant while he was abroad; and at home, when his secretaries were overtaxed, she often relieved them of long and arduous duties.

Clara de Hirsch.

She was married to Baron de Hirsch in 1855 and lived first in Munich, then in Brussels, and finally in Paris.

Death of Her Son.

Two children were born to them, a girl and a boy. The daughter died in infancy, and Lucien in 1887, at the age of thirty-one. From this blow the baroness never recovered, nor did she thereafter lay aside her apparel of mourning. Shortly after his son's death the baron went to Constantinople. The baroness accompanied him; while there she spent most of her time in the poor districts of the city, and, after careful investigation, distributed more than $125,000 among needy families, without distinction of creed. Uninfluenced, Baron de Hirsch, cosmopolitan as he was, might have devoted his fortune to totally different purposes; but in philanthropic matters he yielded to his wife's judgment. It was she that gently guided his interests toward philanthropy. She would not permit money, of which the poor, persecuted, and oppressed Jews stood in so much need, to be deflected into alien channels. She determined that her husband should turn his restless energies to relieving the distress of his coreligionists.

Charities.

In the work of founding colonies in Argentina and Canada, as an outlet for the persecuted Jews in Russia and the Orient, she was her husband's associate and inspiration. She was thoroughly conversant with all his schemes, so that at his death she was able to continue, develop, and complete, as well as add to, the undertakings begun by him. The strongest evidence of his complete confidence in her is in the fact that he left her sole administrator and residuary legatee of his vast fortune. After his death in 1896 she continued the administrative office in her house in the Champs Elysées, where she devoted herself to her work from early morning until late at night, surrounded by her secretaries. A year after the baron's death the baroness sent a million dollars to America to help in relieving the congestion in the New York ghetto. Her plan was to encourage the immigrants to move away from the city into the rural districts, by offering more comfortable dwellings at very low rates. She also sent $150,000 to erect a building for the Baron de Hirsch Trade-School in New York city, thereby enabling that institution to extend its curriculum. She gave $200,000 to build the Clara de Hirsch Home for Working Girls, which she endowed with $600,000 for carrying on its work of providing temporary shelter for homeless working girls, as well as a domestic training-school for immigrants. She created a pension fund of $700,000 for the officials of the Oriental railways built by her husband, and a similar pension fund for the instructors of the Baron de Hirsch schools in Galicia. She established benevolent bureaus in Vienna and Budapest, and gave half a million dollars each to the Pasteur Institute of Paris and to the Philanthropic Society of Paris. The entire amount devoted by her to benevolent purposes during her widowhood exceeded $15,000,000, and she further endowed her various foundations by leaving them $10,000,000 in her will. It was her intention to give away her entire fortune, with the exception of an income sufficient for her own personal wants and of suitable provision for her two adopted sons, Arnold and Raymond de Forest; but she died before she had an opportunity of completing her plan.

Among the chief bequests in her will were the following:

Oeuvre de Nourriture (for providing food and clothing for poor children attending Alliance Israélite schools), $600,000.

Baron de Hirsch Fund, New York city, $1,200,000.

Jewish Board of Guardians, London (as a loan fund), $600,000.

Ecole Normale Orientale de l'Alliance Israélite in Paris, $800,000.

Pension Fund for Teachers, Their Orphans and Widows, $600,000.

Baron de Hirsch Institute, Montreal, $1,200,000.

Baron de Hirsch Foundation for Providing Schools in Galicia, $2,200,000.

Baroness Clara de Hirsch's Emperor Francis Joseph's Jubilee Foundation (for support of children in Austria), $400,000.

Clara de Hirsch Home for Working Girls, New York city, $600,000.

Philanthropic Society of Paris, $200,000.

Committee of Jewish Charities, Paris, $100,000.

Minor bequests to individuals and societies, $800,000.

s. S. St.

HIRSCH, DAVID: German instructor of deaf-mutes; born at Müntz, Rhenish Prussia, May 23, 1813; died at Rotterdam Feb. 2, 1895. He studied at the Heinicke institute for deaf-mutes at Crefeld, and afterward at a similar institute in Cologne, with the intention of becoming an instructor. At the age of twenty-five he received an appointment as director of a deaf-mute school at Aix-la-Chapelle. In 1847 he was called to Rotterdam as private tutor to two children; and, having other mute children placed under his care, he established May 23, 1853, what was in Holland the pioneer school of oral instruction for deaf-mutes, an institution which he conducted until 1887, when ill health compelled him to withdraw from its active management. From this school he sent forth a number of teachers, who introduced his oral system into several European countries. In recognition of his services the Dutch government conferred upon him the Order of the Netherlands Lion, and France made him an Officier de l'Académie.

HIRSCH, EMIL GUSTAV: American rabbi; professor of rabbinical literature and philosophy in the University of Chicago; born in the grand duchy of Luxemburg May 22, 1852; educated in the public schools of the duchy and in the University of Pennsylvania. When his father, Samuel Hirsch, was called (1866) to the ministry of the Reform Congregation Keneseth Israel, in Philadelphia, Pa., Emil accompanied him to the United States, continued his education at the Episcopal Academy in Philadelphia, and graduated from the University of Pennsylvania in 1872. In that year he went to Germany and studied at the universities of Berlin (1872–1876) and Leipsic (philosophy and theology; Ph.D. 1876); he also attended the Hochschule für die Wissenschaft des Judenthums. On his return to America he was elected rabbi of the Har Sinai congregation at Baltimore, Md., in 1877. A year later he accepted the rabbinate of the Adas Israel congregation of Louisville, Ky., where he remained two years. In August, 1880, Hirsch went to Chicago, and was installed there as rabbi of the Sinai congregation, an office he still holds (1903). During his ministration a larger house of worship was erected on Indiana avenue (1892).

From 1880 to 1883 Hirsch edited with I. S. Moses the "Zeitgeist," published at Milwaukee, Wis.; in 1886 he became coeditor of "The Reformer," issued in New York; and in 1892 he connected himself with "The Reform Advocate," published in Chicago. In 1888 Hirsch was appointed member, and, later, president, of the board of the Chicago Public Library, remaining in office until 1897; it was during his term that the new library building was erected. Since 1892 he has occupied the chair of rabbinical literature and philosophy in the University of Chicago. In 1896 he was presidential elector at large for Illinois. In 1902 he was Percy Turnbull lecturer at Johns Hopkins University, Baltimore, his subject being "Jewish Poetry."

Hirsch is an eloquent public speaker and a prolific contributor to Jewish journals. As editor of "The Reform Advocate" he is an acknowledged exponent of advanced thought in Jewish circles and a warm advocate of the observance of Sunday as the Jewish Sabbath, though, recognizing the difficulties in the way of that change, he preaches on Saturday before the Temple Israel congregation of Chicago.

Hirsch has published various monographs on Biblical, theological, and sociological subjects. He took a prominent part in the founding of the Jewish Manual Training-School at Chicago, as well as in the organizing of the Associated Jewish Charities, the Civic Federation, and other public movements. For a time he was chaplain of the Illinois Naval Militia and a member of the state board of charities. He has also acted as president of the board of examiners of the Civil Service Commission at Chicago.

A. F. H. V.

HIRSCH, FISCHL: Hebrew bookseller; died at Berlin June 5, 1899. About 1860 he settled at Halberstadt, and founded a Jewish printing and publishing business. He soon abandoned this to devote himself entirely to the sale of Hebrew books and manuscripts. He rapidly acquired a wide knowledge of the literature with which he was commercially concerned, and, though near-sighted almost to blindness, traveled extensively, collecting valuable old prints and manuscripts which he afterward sold to the principal Hebrew libraries in Europe. When the collection of Hebrew books now in the British Museum was being formed, J. Zedner resorted to Hirsch and acquired from him most of the incunabula as well as the more precious of the books of later date. The Bodleian Library and the Rosenthal Library at Amsterdam owe their most valuable acquisitions to his unerring intelligence. About 1885 Hirsch removed to Frankfort-on-the-Main, whence, about 1891, he went to Berlin. In 1897 he paid his last visit to the British Museum.

Bibliography: *Catalogue of Books for Sale by Fischl Hirsch*, with an introduction by S. van Straalen, 1900.

S. S. v. St.

HIRSCH, FRANZ ARNOLD: Austrian dramatist and miscellaneous writer; born in Horitz, Bohemia, June 15, 1815; died in Vienna Nov. 24, 1896. After leaving the gymnasium Arnold studied medicine at the University of Vienna (1838–41). He practised very successfully in Vienna as a homeopathist until 1852, when he definitively abandoned medicine for literature. After marrying Sophie Wehle he traveled several years, and lived by turns in Dresden, Florence, Rome, Paris, and London. In 1861 he settled in Paris.

Hirsch wrote, often under the pseudonym of "Eginhard Quelle," numerous papers on political economy and medicine, literary essays, short stories, and novels, mostly in "Das Familienbuch des Oesterreichischen Lloyd" in Triest, and feuilletons for Vienna periodicals. Among his plays were: "Der Familien-Diplomat" (1859), comedy in three acts, produced at the Hofburgtheater in Vienna, the famous comedian Beckmann making a great hit in it; "Sand in die Augen" (1861); "Eine Tour aus dem Contre-Tanz, oder So Passt's" (1862; after the French of Fournier and Meyer), "Zu Jung und Zu Alt" (1866), one-act pieces; "Blanca von Bourbon," tragedy in five acts, produced at the Dresden Theater Royal in 1860 (this play won for its author from the Grand Duke of Weimar, before whom he read it, the scholar's gold medal); "Die Fremde," "Dora," "Freund Fritz," "Postscriptum," etc., adapted from the French. Hirsch translated into German Napoleon III.'s "Idées Napoléoniennes."

S. N. D.

HIRSCH FUND, BARON DE: A fund of $2,400,000 for ameliorating the condition of certain Jewish immigrants to the United States. This fund was incorporated under the laws of the state of New York, Feb. 12, 1891, the trustees being M. S. Isaacs, president; Jacob H. Schiff, vice-president; Jesse Seligman, treasurer; Dr. Julius Goldman, honorary secretary; Henry Rice, James H. Hoffman, and Oscar S. Straus, of New York; and Mayer Sulzberger and W. B. Hackenburg, of Philadelphia. The large immigration to the United States in 1890–1891, caused by the enforcement in Russia of the May Laws of 1881, induced Baron Maurice de Hirsch, who had learned of the conditions in New York from Oscar S. Straus, to establish this foundation. The deed of trust directed that the funds be used to afford relief to the Jewish immigrants from Russia and Rumania and to educate them, and to furnish transportation to immigrants—selected, after their arrival in America, on account of fitness in regard to age, character, and capacity—to places in which the condition of the labor market gives promise of their becoming self-supporting; to provide free transportation to others to places where relatives or friends reside who will take care of the immigrants until they can care for themselves; to teach immigrants trades and to contribute to their support, if necessary, while learning; to furnish the tools or implements needed for carrying on such trades after the course of instruction has been completed; to afford to immigrants instruction in agricultural work; and, finally, to provide adequate instruction in the English language.

First Attempts at Relief.

The trustees of the Baron de Hirsch Fund at first used the amount at their disposal in relieving the immediate material necessities of the refugees; and, in order to make the immigrants self-supporting, numbers were given instruction in the manufacture of clothing, white goods, etc. The United Hebrew Charities of New York was made the agent through which the material necessities were relieved, and a monthly sum is still given to that institution to be used exclusively for the relief of needy Russian and Rumanian Jews who have been less than two years in the United States.

When the great pressure due to the rapid immigration of indigent refugees had been somewhat relaxed, the trustees carefully matured their plans for the amelioration of the condition of these people, the aim of all their activities being the permanent elevation of the standard of life of the Russian and the Rumanian Jew in America and the bringing about of a feeling of loyalty to their adopted country.

The main channels whereby these ends were to be reached were education and colonization. In order to teach children and adults the English language, day classes for the former and evening classes for the latter were established on the lower East Side of New York. In these classes the children of Jewish immigrants are prepared to enter the public schools, special attention being given to the rapid acquisition of English. In 1900 these classes, which met in the building of the Educational Alliance at East Broadway and Jefferson street, were turned over to that institution together with an annual appropriation from the Baron de Hirsch Fund sufficient to carry on the work. There are now from 500 to 600 children under instruction by a principal and eight teachers.

The evening school in English for adult foreigners was also consigned to the Educational Alliance at the same time and under similar conditions.

Trade-School.

The Baron de Hirsch Trade-School was established for the purpose of providing free instruction in the mechanical trades to immigrants from Russia and Rumania. For a time the school was conducted in a leased building; but later a new school building was erected on East Sixty-fourth street, between Second and Third avenues, at a cost of $150,000, which sum was given by the Baroness de Hirsch for the purpose in the summer of 1897.

With the exception of a short time during which wood-carving was taught, the same trades as those taught at the present time, namely, carpentry, house- and sign-painting, plumbing, and the machinist's and electrician's trades, have been the subjects of instruction. The Baron de Hirsch Trade-School does not attempt to turn out skilled mechanics, for pupils receive instruction during five and one-half months only. The aim is, by a good elementary training to make them intelligent apprentices or helpers, and to afford them the opportunity to enter profitable trades under the most favorable conditions.

For a time the trustees maintained a public bathhouse; but in view of the fact that public baths were being provided by the municipality, it was discontinued.

Colonization.

The chief enterprise attempted along the lines of colonization was the founding of the town of Woodbine, New Jersey. After investigating sites in various parts of the country, the choice of the trustees fell upon a tract of land in the northern part of Cape May county, New Jersey, on which an agricultural colony for the Jewish refugees from Russia was established. Selected families, chosen because of their apparent fitness as pioneers, were sent to the colony (see JEW. ENCYC. i. 262, *s.v.* AGRICULTURAL COLONIES IN THE UNITED STATES).

Agricultural School.

To the southwest of the town proper lies the Woodbine Agricultural School, started in a small way in 1893 by the trustees, and gradually enlarged from year to year to meet the demands of Jewish youths for instruction in agriculture. At the present time (1903) the buildings consist of a schoolhouse of brick (completed in 1900) capable of accommodating 250 pupils, a cottage for the staff of teachers, a dormitory for 100 pupils, and the necessary outhouses and paraphernalia of a farming school.

In 1893, lessons in English, arithmetic, etc., were given to the boys; and for them as well as their parents illustrated lectures on practical agriculture were delivered once a week during the winter months. The result was so encouraging that a preliminary course was given from March to Oct., 1894, when 42 pupils received practical training in planting, grafting, and the care of fruit-trees, and in the growing of truck and field crops. In Oct., 1894, the first regular class, consisting of 15 boys, was organized. Since that time the school has gradually grown; there are enrolled at present (1903) 100 resident pupils, the full capacity of the dormitory, besides a number of day pupils, the children of residents of Woodbine and of the surrounding farmers.

The school is entirely free. Since 1900 the course of study and work extends over a period of four years. The graduates have become farmers, florists, machinists, etc., for the most part, but pupils of exceptional ability have obtained positions under the government and in educational institutions. The object of the school is "to raise intelligent, practical farmers." A competent faculty of experts in particular lines of work and study is in charge of the pupils under the direction of the superintendent, Prof. H. L. Sabsovich. The conditions of admission are good moral character, good health, and an elementary education; and the minimum age of entry is fourteen years. The pupils work from six to eight hours in summer, and from four to five hours in winter, and study from two to five hours daily

The Baron de Hirsch Fund gives a portion of its yearly income to the Jewish Agricultural and Industrial Aid Society, which has its offices in New York. Among the objects of this association is the encouragement of agriculture among Jews by lending money on mortgage for the purchase of farms It also, through a system of agents, organized as the Industrial Removal Office, secures work in cities and towns throughout the United States for newly arrived Jewish immigrants and for dwellers in the overcrowded part of New York, furnishing them with free transportation to such places. A regular annual subvention is also granted to this society by the Jewish Colonization Association.

The Baron de Hirsch Fund also grants yearly sums to be used in Americanizing newly arrived Jewish immigrants by means of education, etc., in Philadelphia, Baltimore, St. Louis, Brooklyn, and Boston.

A. M. RE.

HIRSCH, GASTON: French dramatic author; born at Metz 1830. His chief plays are: "Le Préjugé"; "Un Malheureux Caractère"; "La Marquise des Rues" (music by Hervé), 1879; "L'Affaire de Viroflay," 1883; "Fanfreluche," 1883; "Une Actrice en Voyage," 1884; "En Grève," 1885; "Fla-Fla," 1886; "Benvenuto" (music by Diaz), 1890; "Au-Delà du Rêve" (music by Massenet), 1903. Hirsch is also the author of the following works: "Les Lagunes et le Tibre," 1862; "Téhéran," 1862; "Le Roman de Deux Femmes," 1887; and "Quelqu'un," 1889.

BIBLIOGRAPHY: *Nouveau Larousse Illustré.*

HIRSCH, JACOB VON: German banker; grandfather of Maurice de Hirsch; born in 1764 at Königshofen, near Würzburg; died March 23, 1841, at Munich. Although in his youth he had received an exclusively Talmudic education, he later in life achieved the position of "Hofbankier" (court-banker) at Munich. He was the first Jew in Bavaria permitted to engage in agricultural enterprises. Hirsch took an active interest in Jewish matters, and contributed large sums toward the founding of many charitable and religious institutions. During the German War of Liberation (1813–1815) he organized, equipped, and supported a regiment of soldiers at his own expense.

S. I. G. D.

HIRSCH JANOW: Polish rabbi; born about 1750; died at Fürth, Bavaria, Nov. 13, 1785. On account of his great keenness in Talmudical discussions he was commonly called "Hirsch Ḥarif" (the acute). When in 1776 his father-in-law, Raphael Kohn, was elected rabbi of the three congregations Hamburg, Altona, and Wandsbeck, he succeeded him as rabbi of Posen. In the following year he was called to the rabbinate of Fürth. In 1779 he interdicted Moses Mendelssohn's German translation of the Pentateuch. Salomon Maimon, in his "Lebensgeschichte" (pp 280 *et seq.*), highly praises Hirsch Janow for his benevolence.

BIBLIOGRAPHY: Grätz, *Gesch.* xi. 44, 586-587.

S. S. MAN.

HIRSCH, JENNY: German authoress and advocate of women's rights; born Nov. 25, 1829, at Zerbst, Anhalt; died March 9, 1902, at Berlin. After the death of her parents she lectured in her native town at the ducal high school for girls, and was empowered by the authorities to open a private school. In 1860 she was called to Berlin to assist in editing "Der Bazar," a journal for women. She retained this position until 1864, after which she devoted herself exclusively to an independent literary career.

Jenny Hirsch's work naturally led her to take an active interest in all movements for the advancement of her sex. She attended the first women's congress ("Frauentag") in Leipsic, from which sprang the Allgemeine Deutsche Frauenverein; and she was among the first to join the Lette-Verein, a society founded to assist women in supporting themselves, and whose history she published in 1891 under the title "Geschichte der 25 Jährigen Wirksamkeit des Lette-Vereins." For seventeen years she devoted her literary activity to the interests of the society, and was its secretary until 1883. Thenceforward she lived quietly in Berlin.

Of the works which Jenny Hirsch published some appeared under her own name, and some under pseudonyms. Her writings include: "Die Hörigkeit der Frau" (2d ed., Berlin, 1892), a translation of John Stuart Mill's "Subjection of Women"; "Fürstin Frau Mutter: Historische Erzählung," Dresden, 1881; (under the pseudonym "L. Arenfeldt") "Befreit," Berlin, 1882; "Der Väter Schuld," 1882; "Schwere Ketten," 3d ed., 1884; "Die Erben," 1889; "Schlangenlist," 1891. From 1870 to 1881 she edited the "Frauenanwalt," the organ of the Frauenbildungsverein, and from 1887 to 1892 was one of the editors of the "Deutsche Hausfrauen-Zeitung."

HIRSCH, JOSEPH VON: German banker; father of Maurice de Hirsch; born July 2, 1805, at Würzburg; died Dec. 9, 1885, at Munich. After completing his studies he entered his father's banking establishment, and in 1841, on the latter's death, succeeded to the management of the firm. Hirsch was the chief constructor of the Bavarian Ostbahn, was a member of the central committee for the promotion of forest-culture, and was connected with many other agricultural and industrial enterprises. He was an administrator of a number of charitable institutions, and during the cholera epidemic of 1854 he helped greatly to relieve the sufferings of its victims by establishing hospitals and supplying the funds necessary for their maintenance.

S. I. G. D.

HIRSCH, LEVIN JOSEPH: German physician; born at Schottland, near Danzig, 1758; died at Königsberg May 29, 1823. Destined by his parents for a commercial career, he worked for three years as a clerk in a small business house, but studied privately during that time, though under great difficulties. In 1785 he entered the University of Königsberg, where he studied medicine (M.D. 1791, his dissertation being "De Necrosi Ossium"). In 1793 he became prosector in the anatomical section; in 1795, docent; in 1805, director of the Entbindungs- und Hebammen-Lehr-Institut at the Königsberg University. When, as a result of the French invasion, the funds of the institute had been confiscated, and its existence as an institution imperiled, Hirsch provided the means necessary for its continuance. Hirsch rendered great services during the war, and was rewarded by the King of Prussia with the title (1808) of "Medicinalrath" and the gift of a diamond ring.

S.

HIRSCH, MARKUS: Chief rabbi of Hamburg; born at Tisza-Beö, Hungary, Feb. 17, 1833. In 1853 he went to Prague, where he became the pupil of I. L. Rapoport, attending at the same time lectures at the university. In 1856 he became rabbi at Karczag, whence he was called to Beö as district rabbi; and in 1861 he became rabbi of Alt-Ofen, where he was also appointed director of a great Talmudical school. At that time Hungarian Judaism was in a state of unrest, and Hirsch was urged by the government to make peace between the conflicting parties. His "Dibre Shalom we-Emet" was written to that end. In the congress of Hungarian Jews (1869–1870) Hirsch was the leader of the Status Quo party. He was a member of the committee entrusted with the elaboration of the statutes for the Budapest Rabbinical Seminary. In 1880, after refusing calls to Raab and Papa, Hirsch went to Prague as chief rabbi in succession to his former teacher Rapoport. Being too conservative, and being unable to realize his ideals there, he accepted in 1889 the chief rabbinate of the Orthodox community of Hamburg, where he is still (1903) active. He founded the Jüdische Höhere Tochterschule, and has done much for the Talmud Torah school, whose spiritual head he is.

HIRSCH, BARON MAURICE DE (MORITZ HIRSCH, FREIHERR AUF GEREUTH): German philanthropist; born at Munich Dec. 9, 1831; died near Ersek-Ujvar, Hungary, April 21, 1896; eldest son of Baron Joseph von Hirsch, and grandson of Baron Jacob von Hirsch, by whom the family fortune was founded. Maurice de Hirsch received a good, plain education at Munich and Brussels. His mother, née Caroline Wertheimer of Frankfort, took care that he should have the best instruction in Hebrew and religion. His mind was very alert and quick of comprehension; but he did not possess the disposition of the student. While yet in his teens he took part in several business ventures. In 1855 Hirsch married Clara, eldest daughter of Senator Raphael Bischoffsheim of the firm of Bischoffsheim & Goldschmidt at Brussels, which had branches in London and Paris. Though only a clerk he soon became the master mind of this great international banking-house. Still, although he was the son-in-law of the senior member of the house, he never became a partner, for he was regarded as too enterprising and aggressive in his plans to suit the conservative ideas of the heads of the firm. Having inherited from his father and grandfather a considerable fortune, which was largely augmented by his wife's dowry, he embarked in railway enterprises on his own account in Austria, in the Balkans, and in Russia. A Brussels banking-firm which had secured from the Turkish government concessions for building a railway through the Balkans to Constantinople, was unable to carry the project through. Hirsch obtained control of these concessions, went to Constantinople, and, after tireless effort, succeeded in having them amended and renewed. This done, he formed a construction company and perfected arrangements for the building of this important railway, which was to connect Europe and the near East. The project was not looked upon with favor, but Baron Hirsch clearly saw its commercial value and advantages, won over sufficient cooperation, and personally superintended the enterprise, after having summoned the most skilful railway engineers of Europe to his assistance.

Foundation of His Fortune.

Baron Maurice de Hirsch.

Until he had finished the railway, which, unlike previous Turkish enterprises, proved to be a great financial success, Hirsch was regarded as rather visionary and reckless. The substantial success which he achieved contrary to the predictions of conservative bankers, gained for him the reputation of being one of the leading captains of industry and financiers of Europe. He had a large view of affairs and was clear and quick of judgment.

In the course of his strenuous business preoccupation in connection with his railway-building, he became acquainted with the deplorable condition of the Jews in the Orient, which condition was due chiefly to a lack of practical education and of opportunities to earn a livelihood. He secured the services of Emanuel Veneziani, who made investigations for him and became an almoner of his munificence. Hirsch was impressed with the excellent educational work and benevolent services rendered by the Alliance Israélite Universelle, and placed large sums at its disposal to enable it to extend its work in European Turkey. In 1873 he gave the Alliance 1,000,000 francs for the creation of schools, and from 1880 till his death he undertook to make up the annual deficit of the Alliance, which amounted each year to several hundred thousand francs. At the same time he encouraged the Alliance to establish trade-schools, the entire expense of which from 1878 until his death he paid. In 1889 he consolidated his annual donations in a foundation which yielded an annual income of 400,000 francs. In 1878, during the Russo-Turkish war, he established and maintained hospitals for both armies, and sent the Empress of Russia £40,000 for charitable purposes.

Connection with the Alliance Israélite.

Deplorable as was the status of the Jews in Galicia, Turkey, and the Balkans, their condition was not to be compared with that of their coreligionists in Russia, who suffered untold hardships under prescriptions calculated to deprive them of every possible means of earning a respectable livelihood. In 1885 Hirsch, with the assistance of a commission, drew up a scheme for improving the condition of the

Russian Jews. It was his idea at this period that that object might be best attained by measures applied in Russia itself, without resorting to emigration. For the preliminary endowment of this scheme he offered the Russian government 50,000,000 francs to be used for purposes of education. This offer the government declined to accept unless the fund be entrusted to it for exclusive control and distribution.

Jewish Colonization Association.

Hirsch finally but reluctantly came to the conclusion that, in view of this disposition on the part of the Russian government, the only hopeful plan of relief for the Russian Jew lay in emigration. He therefore directed all his energies to investigating and studying the best plans of colonization, which resulted in the formation of an international association, incorporated under English laws and known as the Jewish Colonization Association. The nominal capital, which was contributed entirely by Hirsch, was £2,000,000, all of which save a hundred shares he retained in his own hands as trustee. The purposes of the association, as stated by Hirsch himself, were:

> "To assist and promote the emigration of Jews from any part of Europe or Asia—and principally from countries in which they may for the time being be subjected to any special taxes or political or other disabilities—to any parts of the world, and to form and establish colonies in various parts of North and South America and other countries, for agricultural, commercial, and other purposes."

Immediately after the formation of the association he addressed an appeal to the Jews of Russia with regard to the scheme of emigration which he intended to carry out, urging them to assist him by obeying certain necessary prescribed regulations, so that their emigration should not be headlong and reckless and end in failure. He reminded them that he could do nothing without the support of the Russian government; that they should bear their burdens patiently, as at first the number of emigrants would have to be limited, but that as time progressed the emigration could assume larger proportions.

Baron de Hirsch was a great believer in the regeneration of the Russian Jews through industrial pursuits, and especially through agriculture, from which occupations they had been barred in Russia. With this object in view he caused careful inquiries and investigations to be made in countries that offered suitable lands for agricultural development. He sent agents to make investigations in various parts of America—in Brazil, Mexico, Canada, and Argentina. Through the agency of Dr. Löwenthal, who was chiefly entrusted with these inquiries, he came to the conclusion that Argentina, in the first instance, presented conditions most favorable for the commencement of the plan of colonization. Large tracts of land were purchased in Buenos Ayres, Sante Fé, and Entre-Rios.

The Argentine Colonies.

The Russian government, which had rejected the baron's offer for the amelioration of the condition of the Jews in the empire, cooperated with him in the organization of a system of emigration. A central committee, selected by the baron, was formed in St. Petersburg, at the head of which were Barons Horace and David Günzburg, together with S. Poliakoff, M. Sack, Passower, and Raffalovich, the latter three being distinguished members of the St. Petersburg bar. The baron also formed a governing body in Argentina; and the personal direction of the colonies was entrusted to Col. Albert Goldsmid, who obtained temporary leave of absence from the English War Office for the purpose.

The gigantic plan of colonization thus initiated met with the usual percentage of failure and success attending such enterprises. Baron de Hirsch continued to give his personal attention to every detail of this great work, and organized a regular business staff, which attended him wherever he was residing, in Paris or in London. The first floor of his residence was converted into a business bureau, where he regularly spent the morning hours receiving reports and dictating his correspondence.

The large number of Russian Jews who emigrated to the United States attracted his benevolent interest; and in 1891 he caused to be organized under the laws of the state of New York the Baron de Hirsch Fund, with a capital of $2,500,000, which was afterward increased.

Galician Foundation.

Since Hirsch lived the greater part of his life in Austria, it was quite natural that the deplorable condition of the Jews in that empire should especially appeal to him. In 1889, after consultation with Dr. Adolf Jellinek of Vienna, he formulated a plan to aid the Jews of Galicia. The objects of his proposed foundation, which was to commemorate the forty years' jubilee of the reign of Emperor Francis Joseph (1888), were stated to be as follows:

1. The establishment of primary schools and of children's recreation-grounds in Galicia and Bukowina.
2. The granting of subsidies to teachers.
3. The providing of school-books and other educational requirements and of clothing and food for pupils.
4. The granting of subsidies for the establishment of schools for Jewish children.
5. The apprenticing of Jewish youths to handicraftsmen and agriculturists.
6. The granting of assistance to Jewish pupils at commercial and professional schools.
7. The granting of loans, free of interest, to artisans and agriculturists.
8. The establishment of commercial, technical, and agricultural schools.

In 1891 the Austrian government agreed to the plan; and the baron thereupon placed 12,000,000 francs at the disposal of the trustees.

The foregoing are only a few of the benevolent foundations made by the baron. In addition may be mentioned the Canadian Baron de Hirsch Fund, and the large sums given to London hospitals, to which he also devoted the entire proceeds of his winnings on the turf. He always said that his horses ran for charity.

It is impossible to form an accurate estimate of the amount of money Baron de Hirsch devoted to benevolent purposes. That, including the large legacy (amounting to $45,000,000) left to the Jewish Colonization Association, it exceeded $100,000,000 is an estimate justified by the amounts given by him from time to time to the foundations already referred to. There were, besides, many gifts to individuals of which there is no record. In an article referring to his charitable work he said:

> "In relieving human suffering I never ask whether the cry of necessity comes from a being who belongs to my faith or not; but what is more natural than that I should find my highest purpose in bringing to the followers of Judaism, who have been oppressed for a thousand years, who are starving in misery, the possibilities of a physical and moral regeneration?"

The baron was a remarkable man, gifted with extraordinary powers, with a genius for large affairs, which was displayed even in a higher degree in his gigantic plans for the exodus of the Russian Jews than in the amassing of his great fortune. He loved pleasure, but disliked vanity. He was not endowed with sentiment, nor was he religious in the ordinary sense. His ideals were all merged in his devotion to his far-reaching, carefully planned scheme of benevolence. In 1887, when he lost his only child, his son Lucian, a gifted and promising young man of thirty, he said in reply to a message of sympathy: "My son I have lost, but not my heir; humanity is my heir." No appeals made to him—and there were many—to endow some great institution in France, or to erect some artistic public building to perpetuate his name and family, ever induced him to turn aside from his plans for effecting the emigration of the Russian Jews and converting them into agricultural communities. He was firmly convinced that as the Jews were originally an agricultural and pastoral people, they, and especially those in Russia, would under favorable conditions again become tillers of the soil. In an article contributed by the baron to the "Forum," Aug., 1891, he set forth his views and purposes as follows:

> "In the lands where Jews have been permitted to acquire landed property, where they have found opportunity to devote themselves to agriculture, they have proved themselves excellent farmers. For example, in Hungary they form a very large part of the tillers of the soil; and this fact is acknowledged to such an extent that the high Catholic clergy in Hungary almost exclusively have Jews as tenants on mortmain properties, and almost all large landholders give preference to the Jews on account of their industry, their rectitude, and their dexterity. These are facts that can not be hid, and that have force; so that the anti-Semitic movement, which for a long time flourished in Hungary, must expire. It will expire because every one sees that so important a factor in the productive activity of the country—especially in agriculture—can not be spared. My own personal experience, too, has led me to recognize that the Jews have very good ability in agriculture. I have seen this personally in the Jewish agricultural colonies of Turkey; and the reports from the expedition that I have sent to the Argentine Republic plainly show the same fact. These convictions led me to my activity to better the unhappy lot of the poor, downtrodden Jews; and my efforts shall show that the Jews have not lost the agricultural qualities that their forefathers possessed. I shall try to make for them a new home in different lands, where, as free farmers, on their own soil, they can make themselves useful to the country."

His particular concern was to avoid overcrowding with his Russian protégés the countries to which they might emigrate. Of his own accord, quite apart from restrictive laws, he took measures to regulate the exodus and to select men who would apply themselves to handicrafts and agriculture. He never tired of impressing upon his agents and upon the emigrants the importance of directing their energies in these channels exclusively, so that they should become a part of the sturdy yeomanry of the countries wherein they settled, and should "sit every man under his vine and under his fig-tree." He realized that colonizing, like planting a forest, required time and patience. His hopes rested upon the second generation; he knew that the forty years in the wilderness might be shortened but not escaped. His idea was that as colonies became firmly rooted in different parts of the world, they would become self-attracting, and would draw from Russia greater and greater numbers, so that in one or two generations Russia would materially suffer from the loss of the energy and activity of her Jews, and would either stop the exodus by according to those who remained full civil rights, or would fall, as she deserved, the logical victim of her own intolerance.

O. S. S.

HIRSCH, MAX: German economist and deputy; born in Halberstadt Dec. 30, 1832. His parents removed at the end of the thirties to Magdeburg, where Max received his early education. He studied (1850–55) natural science, foreign languages, and jurisprudence at the universities of Tübingen, Heidelberg, and Berlin. After having graduated (1856) he traveled through France and northern Africa to study the economic conditions of these regions. In 1861 he founded at Frankfort-on-the-Main a publishing-house, which he soon transferred to Berlin. On the death of his father (1862) he succeeded to the latter's great produce business. Cherishing political ambitions, he took an active part in the organization of various political societies, and became so prominent that in 1864 he was elected as a member of the permanent executive committee of the German Arbeiterbildungsverein. From 1867 he devoted all his energies to politics. After a visit to England, where he studied thoroughly the organizations of the English working classes, he became one of the principal promoters of the Deutsche (Hirsch-Dunckersche) Gewerksvereine. He was the attorney at law of this great organization, and at the same time editor of its organ, "Der Gewerksverein." In 1869, 1877, 1881, and 1890 he was elected to the Reichstag. In 1898 he was elected to the Chamber of Deputies of Prussia. As a member of the progressive party he turned his attention principally to commercial and industrial questions. At Hirsch's instance the Humboldt-Akademie, an institution similar to the American university extensions, was founded in Berlin in 1878 by the Wissenschaftliche Centralverein. Hirsch is at the head of the institution.

Hirsch wrote the following works: "Ueber den Einfluss der Maschinen auf die Volkswirtschaft"; "Skizze der Volkswirtschaftlichen Zustände in Algerien" (Göttingen, 1857); "Reise in das Innere von Algerien Durch die Kabylie und die Sahara" (Berlin, 1862); "Soziale Briefe aus England"; "Normalstatuten für Einigungsämter" (2 vols., *ib.* 1874); "Gutachten über den Arbeitsvertragsbruch" (in the writings of the Verein für Sozialpolitik, Leipsic, 1874); "Die Gegenseitigen Hilfskassen und die Gesetzgebung" (Berlin, 1875); "Gewerksvereins-Leitfaden" (with Polke, 1876); "Der Staat und die Versicherung" (1881); "Das Krankenversicherungsgesetz vor dem Reichstag" (1883); "Die Hauptsächlichsten Streitfragen der Arbeiterbewegung" (1886); "Die Grundzüge der Alters- und Invalidenversicherung und die Arbeiter" (1888); "Arbeiterstimmen über Unfall- und Krankheitsverhütung" (1889);

"Das Invaliditäts- und Altersversicherungsgesetz" (2 vols., Breslau, 1890); "Die Arbeiterschutzgesetzgebung" (2 vols., *ib.* 1892); "Leitfaden mit Musterstatuten für Freie Hilfskassen" (Berlin, 1892); "Die Arbeiterfrage und die Deutschen Gewerksvereine" (Leipsic, 1893).

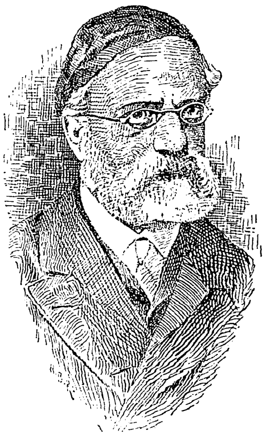
S.

HIRSCH, SAMSON RAPHAEL: German rabbi; born at Hamburg June 20, 1808; died at Frankfort-on-the-Main Dec. 31, 1888. His father, though a merchant, devoted much of his time to Hebrew studies; his grandfather, Mendel Frankfurter, was the founder of the Talmud Torah in Hamburg and unsalaried assistant rabbi of the neighboring congregation of Altona; and his granduncle, Löb Frankfurter, was the author of several Hebrew works. Hirsch was a pupil of Ḥakam Bernays, and the Biblical and Talmudical education which he received, combined with his teacher's influence, led him to determine not to become a merchant, as his parents had desired, but to choose the rabbinical vocation. In furtherance of this plan he studied Talmud from 1823 to 1829 in Mannheim under Jacob Ettlinger. He then entered the University of Bonn, where he studied at the same time as his future antagonist, Abraham Geiger.



Samson Raphael Hirsch.

In 1830 Hirsch was elected chief rabbi ("Landrabbiner") of the principality of Oldenburg, where he remained until 1841, when he was elected chief rabbi of the Hanoverian districts of Aurich and Osnabrück, with his residence in Emden. During this period he wrote his "Neunzehn Briefe über Judenthum," which were published, under the pseudonym of "Ben Usiel" (or "Uziel"), at Altona in 1836. This work made a profound impression in German Jewish circles because it was something new—a brilliant, intellectual presentation of Orthodox Judaism in classic German, and a fearless, uncompromising defense of all its institutions and ordinances. From the appearance of the "Nineteen Letters" dates the origin of the so-called "Neo-Orthodoxy," or the revival of Orthodox Judaism in somewhat modernized and esthetic form. The "Letters" have been translated into Hebrew and English ("Iggerot Ẓafon," by M. S. Aronson, Wilna, 1892; and "The Nineteen Letters of Ben Uziel," by Bernard Drachman, New York, 1899). In 1838 Hirsch published, as a necessary concomitant of the "Letters," his "Horeb, oder Versuche über Jissroel's Pflichten in der Zerstreuung," which is a text-book on Judaism for educated Jewish youth; in 1839, "Erste Mittheilungen aus Naphtali's Briefwechsel," a polemical essay against the reforms in Judaism proposed by Holdheim and others; and in 1844, "Zweite Mittheilungen aus einem Briefwechsel über die Neueste Jüdische Literatur," also polemical in tendency.

In 1846 Hirsch was called to the rabbinate of Nikolsburg in Moravia, and in 1847 he became chief rabbi of Moravia and Austrian Silesia. In Austria he passed five years in the reorganization of the Jewish congregations and the instruction of numerous disciples; he was also, in his official capacity as chief rabbi, a member of the Moravian Landtag.

In 1851 he accepted a call as rabbi of an Orthodox separatist group in Frankfort-on-the-Main, a part of the Jewish community of which had accepted Reform. This group, known as the "Israelitish Religious Society" ("Israelitische Religions-Gesellschaft"), became under his administration a great congregation, numbering about 500 families. Here Hirsch continued to labor until his death. He organized the Bürger- und Realschule, in which thorough Jewish and secular training went hand in hand; he founded and edited the monthly "Jeschurun" (1855–70; new series, 1882 *et seq.*), and wrote the following independent works: "Jüdische Anmerkungen zu den Bemerkungen eines Protestanten" (anon.), 1841; "Die Religion im Bunde mit dem Fortschritt" (anon.), 1854; "Uebersetzung und Erklärung des Pentateuchs," 1867–78 (5 vols.; 3d ed. of vol i., 1893); "Das Princip der Gewissensfreiheit," 1874; "Der Austritt aus der Gemeinde," 1876 (the last two were written in advocacy of the Lasker law, adopted July 28, 1876, permitting Israelites to sever their connection with local congregations without leaving Judaism); "Uebersetzung und Erklärung der Psalmen," 1882; "Ueber die Beziehungen des Talmuds zum Judenthum," 1884, a defense of Talmudic literature against anti-Semitic slanders. He left in manuscript at the time of his death a translation and explanation of the prayer-book which was subsequently published. The publication, in several volumes, of his collected writings ("Gesammelte Schriften") was begun in 1902.

BIBLIOGRAPHY: *Der Israelit*, Mayence, Jan., 1889, and Sept., 1896; B. Drachman, *Samson Raphael Hirsch, a Biographical Sketch*, an introduction to his translation of the *Neunzehn Briefe*, etc.; *Meyers Konversations-Lexikon*, 5th ed.

S. B. D.

HIRSCH, SAMUEL: American rabbi; born at Thalfang, near Treves, Rhenish Prussia, June 8, 1815; died in Chicago, Ill., May 14, 1889; educated at the universities of Bonn, Berlin, and Leipsic (Ph.D.). In 1838 he was appointed rabbi of the congregation in Dessau, where he remained until 1841 ("Allg. Zeit. des Jud." 1841, No. 15), when, on account of his advanced views, he resigned. In 1843 he published his "Die Messias-Lehre der Juden in Kanzelvorträgen" and "Religionsphilosophie der Juden." In the same year he was appointed chief rabbi of the grand duchy of Luxemburg by the King of Holland, which office he filled until 1866.

During this period he published his "Die Humanität als Religion." He took an active part in the annual rabbinical conferences held at Brunswick (1844), Frankfort-on-the-Main (1845), and Breslau (1846). In 1844 he published his "Reform im Judenthum." Having received a call from the Reform Congregation Keneseth Israel, Philadelphia, Pa., in 1866, he resigned his post in Europe and removed to the United States, where he succeeded Dr. David Einhorn, and where, from his arrival, he became closely identified with, and an open advocate of, radical Reform. In 1869 he was elected president of the rabbinical conference held in Philadelphia, at which the principles of Reformed Judaism were formulated; in that year he engaged also in numerous ritual and doctrinal controversies.

Hirsch remained officiating rabbi of the Philadelphia congregation for twenty-two years, resigning in 1888, after having spent fifty years of his life in the ministry. Removing to Chicago, he took up his abode there with his son, Emil G. Hirsch. During his rabbinate in Philadelphia Hirsch organized the Orphans' Guardian Society, and was the founder of the first branch in the United States of the Alliance Israélite Universelle. He was one of the first to advocate the holding of Jewish services on Sunday.

Hirsch is best known as the author of the "Religionsphilosophie," a work written from the Hegelian point of view, but for the purpose of vindicating the claim of Judaism to the rank denied it by Hegel, the rank of an "absolute religion." In this book he proved himself to be an original thinker (see "Allg. Zeit. des Jud." 1895, pp. 126 *et seq.*). His "Katechismus der Israelitischen Religion" was also constructed on original lines; he considered the Biblical legends to be psychological and typical allegories, and the ceremonies of Judaism to be symbols of underlying ideas. From this attitude his Reform principles are derived. He denied that Judaism is a law; it is "Lehre," but is expressed in symbolic ceremonies that may be changed in accordance with historic development. Hirsch was among those that wrote in defense of Judaism against Bruno Bauer (see his "Briefe Gegen Bruno Bauer," Leipsic, 1844). He was also a contributor to the "Archives Israélites," Paris, and to "Die Deborah," Cincinnati, Ohio.

HIRSCH SCHOOL JOURNAL. See PERIODICALS.

HIRSCH, SIEGFRIED: German historian; born at Berlin Nov. 5, 1816; died at Paris Sept. 11, 1860; cousin of Theodor Hirsch. From 1833 to 1836 he studied history at the universities of Berlin and Königsberg. In 1834 he published a prize essay, "Das Leben und die Thaten König Heinrichs I."; and in 1837, conjointly with Waitz, "Die Echtheit der Chronik von Korvei." His first important work was "De Vita et Scriptis Sigiberti," Berlin, 1841. In 1842 he became privat-docent at the University of Berlin, two years later receiving the appointment of assistant professor. Like Stahl, another converted Jew, Hirsch took an active interest in the purification of the Church, and in this connection became a frequent contributor to the "Kreuzzeitung." His principal work, the "Geschichte Heinrich II.," was unfinished at his death. It was published by Usinger, Pabst, and Bresslau in the "Jahrbücher des Deutschen Reiches" (Berlin and Leipsic, 1862–75, 3 vols.).

HIRSCH, SOLOMON: American merchant, diplomatist, and politician; son of Samson Hirsch and Ella Kuhn; born in Württemberg March 25, 1839. He went to the United States at the age of fifteen, and lived successively in the states of New York, Connecticut, and New Hampshire. In 1858 he removed to Oregon, and in 1864 became a resident of the city of Portland, being the head of one of the largest mercantile establishments in the Northwest. In 1872 he was elected a member of the state legislature, as representative of Multnomah county; and upon the expiration of his term of office (1874) was elected state senator for the same county for a term of four years, being reelected for two successive terms in 1878 and 1882. He was president of the state senate in the session of 1880. In 1885 he was a candidate for the office of United States senator from Oregon. The legislature adjourned without proceeding to an election, though Hirsch would have been elected had he voted for himself. In 1889 President Harrison appointed him United States minister to Turkey, which position he filled until 1892, when he resigned. He was president of the Jewish congregation in Portland, and has been prominently associated with many Jewish organizations.

A. S. S. W.

HIRSCH, THEODOR: German historian; born Dec. 17, 1806, at Altschottland, near Danzig; died Feb. 17, 1881. He studied theology, history, and geography at Berlin (having previously embraced Christianity); became professor at the Friedrich Wilhelm Gymnasium; and in 1833 proceeded in a similar capacity to Danzig, where he taught history for thirty-two years. He was devoted to the study of the history of his native town, by the municipal council of which he was charged in 1850 with the rearrangement and supervision of the city archives. His principal work is "Danzig's Handels- und Gewerbegeschichte Unter der Herrschaft des Deutschen Ordens," Leipsic, 1858. He also edited, with Strehlke and Töppen, the "Scriptores Rerum Prussicarum," 5 vols., *ib.* 1861–74. In 1865 Hirsch became assistant professor of history at the University of Greifswald and director of the Royal University Library. In 1880 he published the sixth volume of the "Urkunden und Aktenstücke zur Geschichte des Grossen Kurfürsten."

HIRSCHBERG. See SILESIA.

HIRSCHBERG, ERNST: German statistician; born March 8, 1859, at Königsberg, East Prussia. He was educated in his native town, graduating in 1882. Soon afterward he was employed in the statistical office of the city of Berlin, where he at first (1902) was assistant director and then (1903) became director. He is also chief of the statistical bureau of the city of Charlottenburg. The title of "professor" has been conferred upon him by the government.

Among Hirschberg's works may be mentioned: "Arbeiterversicherungszwang," Berlin, 1882; "Trennung der Alters- und Invaliden-Versicherung," *ib.* 1889; "Beiträge zur Statistik der Brodpreise," *ib.* 1893; "Die Soziale Lage der Arbeitenden Klassen in Berlin," *ib.* 1897; and "Arbeitlosen Versicherung und Armenpflege," *ib.* 1903.

S. F. T. H.

HIRSCHBERG, JULIUS: German ophthalmologist; born at Potsdam Sept. 18, 1843. He received his education at the gymnasium of his native town and at the University of Berlin, graduating as doctor of medicine in 1867. In the same year he became assistant in the ophthalmologic clinic of A. von Graefe. He commenced to practise in 1869, and founded a private dispensary and hospital for diseases of the eye. He was admitted in the following year to the medical faculty of Berlin University as privat-docent in surgery and ophthalmology. In 1879 he was appointed assistant professor; in 1895 he received the title "Geheimer Medizinalrat," and in 1900 was appointed honorary professor.

Hirschberg is one of the leading ophthalmologists of Germany. He has traveled extensively in Europe, Asia, and North America, visiting all the important ophthalmologic hospitals.

In 1877 Hirschberg founded the "Centralblatt für Praktische Augenheilkunde." In 1895, in an appendix to his report of twenty-five years' work of the ophthalmological hospital, he published a complete list of his writings, numbering nearly 200.

Of Hirschberg's works may be mentioned: "Der Markschwamm der Netzhaut," Berlin, 1869; "Klinische Beobachtungen," Vienna, 1874; "Die Mathematischen Grundlagen der Medicinischen Statistik," 1874; "Beiträge zur Praktischen Augenheilkunde," in three parts: Berlin, 1876; Leipsic, 1877 and 1878; "Tunis," *ib.* 1885; "Wörterbuch der Augenheilkunde," *ib.* 1887; "Von New York nach San-Francisco," *ib.* 1888; "Aegypten," *ib.*; "Einführung in die Augenheilkunde," i., *ib.* 1892; "Hilfswörterbuch zum Aristophanes," *ib.* 1898; "Die Magnetoperationen in der Augenheilkunde, nach Eigener Erfahrung," *ib.* 1899; "Augenheilkunde des Aëtius," *ib.* 1899; "Geschichte der Augenheilkunde im Alterthum," 1899; "Um die Erde," *ib.* 1900; "Einführung in die Augenheilkunde," ii., *ib.* 1901; (with J. Lippert) "Die Augenheilkunde des Ibn Sina," translated from the Arabic, with explanatory notes, *ib.* 1902.

HIRSCHEL. See Voltaire.

HIRSCHEL, LEVI ELIAS: German physician; born Oct. 8, 1741, at Berlin; died there Dec. 17, 1772; educated at the Joachimsthalsche Gymnasium in his native town and at the University of Halle (M.D. 1763). He practised medicine for two years in Berlin, then removed to Posen, and in 1770 traveled through Germany, returning to Posen. Visiting Berlin in 1772, he died there.

Among Hirschel's works may be mentioned: "Betrachtung über den Innerlichen Gebrauch des Mercurii Sublimati Corrosi in den Venerischen Krankheiten, und des Schierlings," Berlin, 1763 and 1765; "Gedanken, die Heilungsart der Hinfallenden Sucht Betreffend," *ib.* 1767, 1770; French translation, Paris, 1769; "Gedanken von der Starrsucht," Berlin, 1769; "Vermischte Beobachtungen zur Arzneywissenschaft," *ib.* 1772.

Bibliography: Hirsch, *Biog. Lex.*

HIRSCHEL LEVIN. See Levin, Hirschel.

HIRSCHEL, MOSES (CHRISTIAN MORITZ): German writer; born at Breslau Sept. 13, 1754; continued to live in that city. On being baptized (1804) he took the name of "Christian Moritz." He published the following works: "Das Schach," Breslau, 1784; "Kampf der Jüdischen Hierarchie," *ib.* 1789; "Jüdische Intoleranz und Fanatismus in Breslau," *ib.* 1789; "Patriotische Bemerkungen," *ib.* 1790; "Ueber die Allzufrühen Ehen der Jüdischen Nation," 1790; "Ueber das Schachspiel," etc., 1791; "Apologie der Menschenrechte," Zurich, 1793; "Biographie des Jüdischen Gelehrten und Dichters Ephraim Moses Kuh," Zurich, 1791.

Bibliography: Hamberger, *Das Gelehrte Teutschland*, iii. 344, xi. 358.

S. B. Te.

HIRSCHENSOHN, ISAAC M.: Jerusalem Talmudist; bibliophile; born at Pinsk, in the government of Minsk, Russia, in 1844. As a boy of three he accompanied his father, Jacob Mordecai Hirschensohn, to Jerusalem, and from him he received instruction in the Talmud.

Hirschensohn was an ardent bibliophile, and collected a valuable library of Hebrew books. He treasured also rare and valuable manuscripts, to publish which he founded a printing establishment. Among the important works published by him were: R. Nissim bar Reuben (RaN; *c.* 1350), on the treatise Megillah (Jerusalem, 1883); "Bet ha-Beḥirah," by Menahem bar Solomon of Perpignan (second half of the thirteenth century), to the treatise Yoma (*ib.* 1884); a treatise on the holiness of Palestine, under the title "Ḳedushat Ereẓ Yisrael," by Jacob Mordecai, with preface by Hirschensohn (*ib.* 1884); a portion of a collection of very valuable smaller works (the remainder being still in manuscript), including responsa by Rashi, under the title "Ḳebuẓat Ḳonṭresim"; "Debar ha-Shemiṭṭah," or responsa in favor of the pursuit of agriculture in the "shemiṭṭah" year, collected by Hirschensohn (*ib.* 1887), a work of great importance.

Hirschensohn also founded a weekly under the title "Ha-Ẓebi," which was subsequently edited by Benjudah. By this as well as by various pamphlets that he issued, he rendered great service to the cause of progress in the Holy City. In 1897 Hirschensohn went to London at the instance of some scholars, for the purpose of copying a number of manuscripts in the library of the British Museum.

S. S. L. Grü.

HIRSCHFELD, GUSTAV: German archeologist, geographer, and topographer; born Nov. 4, 1847, at Pyritz, Pomerania; died April 20, 1895, at Wiesbaden. He studied philology and archeology at the universities of Berlin, Tübingen, and Leipsic.

and was particularly influenced by his teacher, Ernst Curtius. He took his Ph.D. degree (Berlin, 1870) with the dissertation "De Titulis Statuariorum Sculptorumque Græcorum Capita Duo Priora," which he subsequently enlarged under the title "Tituli Statuariorum Sculptorumque Græcorum cum Prolegomenis" (Berlin, 1871). From 1871 to 1875 he traveled through Italy, Greece, and extensively in Asia Minor, returning to Berlin with many epigraphic treasures and historico-topographic sketches. From 1875 to 1877 he directed the excavations at Olympia undertaken by the German government. His name will forever be associated with the unearthing of the Heraion, the Temple of Zeus and most of its friezes, and the famous statues of Nike by Paionios and Hermes by Praxiteles, which he himself lifted out of the ground.

In 1877 Hirschfeld embraced Christianity, and in the following year was appointed assistant professor of archeology in the University of Königsberg. Two years later he was made professor. His work there was interrupted only by travels through Asia Minor.

Hirschfeld was the author of the following works: "Athena und Marsyas: 32. Programm zum Winckelmannsfest der Archäologischen Gesellschaft in Berlin," Berlin, 1872; "De Cn. Manlii Consulis Itinere ex Pamphylia in Galatiam Facto," 1879; "Gedächtnissrede auf Karl Zöppritz," Königsberg, 1884; "The Collection of Ancient Greek Inscriptions in the British Museum," part iv., section i., "Knidos, Halikarnassos, and Branchidæ," Oxford, 1893; "Aus dem Orient," Berlin, 1897. He edited Moltke's "Briefe über Zustände und Begebenheiten in der Türkei," with introduction and notes, Berlin, 1893 (in Moltke's "Gesammelte Schriften," vol. viii.). Besides the preceding works he wrote many articles for the publications of the Prussian Academy of Sciences and for other journals.

Bibliography: M. Lehnerdt, *Gustav Hirschfeld*, in *Biographisches Jahrbuch für Altertumskunde*, 1899, pp. 65 *et seq.*; Ernst Curtius, *Zur Erinnerung an Gustav Hirschfeld*, in *Deutsche Rundschau*, 1895, lxxxiv. 377 *et seq.*

S. S. Fra.

HIRSCHFELD, HARTWIG: English Orientalist; born at Thorn, Prussia. He studied at Posen, at the universities of Berlin and Strasburg, and at Paris under Derenbourg. In 1887 he edited Judah ha-Levi's "Cuzari" in Arabic and Hebrew, and translated it into German. Hirschfeld was professor of Biblical exegesis, Semitic languages, and philosophy at the Montefiore College, Ramsgate, England, from 1889 to 1896, and then became master in Semitic languages and sublibrarian at Jews' College, London, which position he still (1903) occupies. He has written many articles on Arabic and Jewish subjects in the "Revue des Etudes Juives," "Jewish Quarterly Review," "Journal of the Royal Asiatic Society," and other publications. The Asiatic society published his "New Researches into the Composition and Exegesis of the Koran," 1901. In 1892 he published an "Arabic Chrestomathy in Hebrew Characters." Hirschfeld is also the author of a "Descriptive Catalogue of the Hebrew Manuscripts of Jews' College Library," which appeared in the "Jewish Quarterly Review," 1902-03.

Bibliography: *Jewish Year Book*, 1900-01.

J. V. E.

HIRSCHFELD, LUDWIK MAURYCY: Polish anatomist; born at Nadarzyn, government of Warsaw, 1816; died at Warsaw 1876. Hirschfeld received a Talmudical education at home, but, not being studiously inclined, at the age of seventeen he went to Berlin, where he earned his living as a violinist. Later he went to Paris, where, after many experiences, he became assistant janitor at the anatomical institute of the Sorbonne. Professor Orfila took an interest in him, and Hirschfeld soon showed his skill in making anatomical preparations. His patron rendered it possible for him to study medicine, which resulted in his receiving the degree of M.D. from the Sorbonne in 1853. Till 1857 Hirschfeld was assistant at the anatomical institute, and from 1857 to 1859 assistant at Rostan's clinic. In 1859 he was appointed professor of descriptive anatomy at the medico-surgical academy at Warsaw, and in 1871 was elected to the chair of anatomy in Warsaw University, which position he held until his death.

Hirschfeld was the author of: "Atlas du Système Nerveux," Paris, 1853; "Anatomie du Système Nerveux," *ib.* 1855; "Anatomja Opisowa Ciala Ludzkiego," Warsaw, 1861-69.

Bibliography: *Tygodnik Illustrovanny*, Warsaw, 1876; Luczkiewicz, in *Klosy*, ib. 1876; *Encyklopedya Powsiechna*, ib. 1900.

S. F. T. H.

HIRSCHFELD, OTTO: German historian, epigrapher, and archeologist; born March 16, 1843, at Königsberg, Prussia. He studied philology and history at the universities of Königsberg and Bonn (Ph.D. 1863), and then spent two years in Italy. In 1869 he acquired the right of holding university lectures in Göttingen, where he was baptized. In 1872 he was called to the University of Prague as professor of ancient history, going thence to Vienna in 1875 as professor of ancient history, archeology, and epigraphy. Here he made valuable contributions to archeology, especially in connection with the numerous Roman inscriptions found in Austria, organizing together with Alexander Conze the Archeologic-Epigraphic Seminary at the University of Vienna, which has gained a wide reputation as a model for similar institutions.

In 1885 Hirschfeld went to Berlin University as professor of ancient history, which position he still (1903) holds. On the occasion of his sixtieth birthday a "Festschrift" was dedicated to him by his colleagues and pupils under the title "Beiträge zur Alten Geschichte und Griechisch-Römischen Altertumskunde" (Berlin, 1903).

Hirschfeld's works include: "De Indigitamentis et Devinctionibus Amatoriis apud Græcos Romanosque," 1863; "Untersuchungen auf dem Gebiete der Römischen Verwaltungsgeschichte," i., Berlin, 1877; "Lyon in der Kaiserzeit," Vienna, 1878; "Zur Geschichte des Lateinischen Rechtes" (in "Festschrift zur 50 Jährigen Gründungsfeier des Deutschen Archäologischen Instituts in Rom"), *ib.* 1879; "Gallische Studien," *ib.* 1883-84; "Inscriptiones Galliæ Narbonensis Latinæ" ("C. I. L." vol. xii.), *ib.* 1888; together with Zangenmeister, "Inscriptiones Trium Galliarum et Germaniarum Latinæ" ("C. I. L." vol. xiii.), *ib.* 1899; "Inscriptionum Orientis et Illyrici

Latinæ Suppl." ("C. I. L." vol. iii., Supplement), *ib.* 1902. Besides these Hirschfeld has published numerous papers in the reports of the Prussian Academy of Sciences, of which he is a member; in the "Annali dell' Istituto Archeologico," etc.

Hirschfeld is associate editor of the "Abhandlungen des Archäologisch-Epigraphischen Seminars der Universität Wien," of the "Archäologisch-Epigraphische Mittheilungen aus Oesterreich," and of the "Ephemeris Epigraphica."

HIRSCHFELD, ROBERT: Austrian writer on music; born Sept. 17, 1857, in Moravia; educated at the universities of Breslau and Vienna. He also studied at the Conservatorium of the latter city, in which institution he was lecturer from 1882 till 1884, and thenceforward teacher of musical esthetics. In the latter year, also, he took his degree of Ph.D.

Hirschfeld is the author of "Joh. de Muris" (1884), and of "Das Kritische Verfahren E. Hanslicks" (3d ed., 1885), an important polemical pamphlet against Hanslick, written in defense of the old "a-cappella" music, to promote the cultivation of which Hirschfeld founded the Renaissance Abende. He also prepared an edition of the songs of Oswald von Wolkenstein, with the melodies, and of Schubert's "Der Vierjährige Posten" (1897).

HIRSCHFELDER, JOSEPH OAKLAND: American physician; born at Oakland, Cal., Sept. 8, 1854. He received his education at San Francisco, Cal., and at the universities at Würzburg, Berlin, Vienna, and Leipsic (M.D. 1876). Returning to America, he settled in San Francisco and built up a large practise.

In 1877 Hirschfelder became professor of materia medica at the University of the Pacific; in 1881, professor of clinical medicine. In 1882 he was elected to the same chair at the Cooper Medical College.

Hirschfelder has contributed many essays to the medical journals.

A. F. T. H.

HIRSCHFELDER, SOLOMON: German genre painter; born May 16, 1832, at Dettensee, near Horb, on the Neckar; died at Munich May 10, 1903. He was a student at the Academy in Munich, where he settled in 1853. Of his genre paintings the following may be mentioned: "Scene in the Campaign of 1871"; "In Prison"; "Startled"; "The Intelligence Bureau"; "The Sweetheart's Letter." S.

HIRSCHFELDT, HERMANN: German physician; born at Neustettin July 30, 1825; died at Colberg June 17, 1885; M.D. Greifswald, 1852. During the two following years he practised in Greifenberg, Pomerania, and in 1854 removed to Colberg, where he continued to practise until his death, receiving the title of "Sanitätsrath" in 1879. Hirschfeldt was one of the physicians through whose energy Colberg became known as a watering-place, and in 1896 the citizens erected a monument in his memory.

Hirschfeldt also took an active interest in the Jewish community of Colberg, and was one of the founders of the Jewish Kurhospital, of which he was the chief physician for eleven years.

He was the author of several essays in medical journals and of: "Die Summe Unseres Wissens vom Sool- und Seebade Kolberg," Colberg, 1864 (2d ed., 1876); "Jubelschrift des Sool- und Seebades Kolberg," *ib.* 1884.

s. F. T. H.

HIRSCHL, ADOLF: Hungarian painter; born at Temesvar, Hungary, Jan. 31, 1860; studied (1874–1882) at the Vienna Academy, where for two years (1882–1884) he won a traveling scholarship of 3,000 kronen. In 1893 he settled at Rome. Among his paintings are: "The Death of St. Cecilia"; "Hannibal's March Across the Alps"; "The Vandals Attacking Rome"; "The Plague at Rome"; "Ahasuerus"; and "The Bridal Procession." Hirschl has been awarded many prizes at the art expositions of Vienna, among them being the "Kaiser-Preis" (1891) and the Great Golden State's Medal (1898). In 1899 he changed his name to Hiremy-Hirschl. S.

HIRSCHLER, IGNAZ: Hungarian oculist; born at Presburg 1823; died at Budapest Nov. 11, 1891. He studied medicine at Vienna. After practising for two years at Paris he went to Budapest, where he achieved a reputation as an oculist. He wrote several works on the influence of alcohol and nicotine on the vision, on clinical treatment of the eyes, and on the pigments of the retina. He was a corresponding member of the Royal Hungarian Academy of Sciences, and was made a life-member of the Hungarian House of Magnates by Francis Joseph I. in recognition of his services to Hungarian Judaism. From 1860 until his death he was the intellectual leader of Jewish affairs in Hungary, being for some years president of the Jewish community of Pest. A personal friend of Baron Joseph Eötvös, he became his closest adviser when, as minister of public instruction and worship, Eötvös convened the Jewish congress at Budapest (1868) for regulating the Jewish communal institutions, of which congress Hirschler was elected president. His intelligence and zeal gave a remarkable impetus to the intellectual development of the Hungarian Jews, but the bitter conflicts which divided Judaism finally induced him to retire.

HIRSCHMANN, HENRI LOUIS: French composer; born at Saint-Mandé, department of the Seine, April 30, 1873. He studied under André Gedalge, and, for two years, under J. Massenet at the Paris Conservatoire. His chief works are: "Ahasuerus," an oratorio (crowned by the French Institute at the Concours Rossini, and performed at the concerts of the Paris Conservatoire Nov., 1892); a suite for orchestra in four parts (presented at the Opéra Jan., 1896); "L'Amour à la Bastille," comic opera (crowned at the Concours Crescent; performed at the Opéra Comique 1898); "Lovelace," opera in four acts (Théâtre Lyrique, 1898); five ballets: "La Favorite" (1898), "Folles Amours" (1899), "Néron"

(1899), "Les Sept Pêchés Capitaux" (1899), "Les Mille et Une Nuits" (1899), all produced at the Théâtre de l'Olympia in Paris.

s. A. A. G.

HIRSCHSPRUNG, HEINRICH: Danish manufacturer and art-collector; born in Copenhagen Feb. 7, 1836; son of **Abraham Marcus Hirschsprung** (1793–1871), who in 1826 founded one of the largest tobacco-factories in Denmark, of which Heinrich Hirschsprung is still (1903) the proprietor.

Hirschsprung's great collection of paintings, pastels, water-colors, etc., was exhibited in Copenhagen in 1888. He is the founder of a legacy for Danish artists (Hirschsprung og Hustru's Kunstnerlegat).

Hirschsprung's brother, **Harald Hirschsprung** (born in Copenhagen Dec. 14, 1830), graduated as M.D. from the University of Copenhagen in 1861. In 1877 his alma mater conferred upon him the title of professor; and since 1879 he has been physician-in-chief of the Queen Louise Hospital in Copenhagen. He was president of the pediatric section at the International Congress of Physicians in 1884.

HIRSHMAN, LEONARD LEOPOLDOVICH: Russian oculist; born at Goldingen, Courland, in 1839. After graduating from the University of Kharkof he worked in the laboratories of Graefe, Helmholtz, Jäger, Knapp, and Pagenstecher. In 1868 he was appointed docent at the University of Kharkof; in 1872, professor. His principal works are: "Zur Lehre von der Durch Arzneimittel Hervorgerufenen Myosis und Mydriosis," in Dubois Reymond's "Archiv für Physiologie," 1863; "Materialy Fiziologii Svyetooshchushcheniya," 1868; "K Lyechenii Trakhomy," 1873.

Bibliography: *Encyclopedicheski Slovar*, St. Petersburg, 1893.

H. R. J. G. L.

HIRSZENBERG, SAMUEL: Polish painter; born at Lodz 1866. He studied at the Academy of Cracow from 1881 to 1885, and completed his studies at Munich (1885–89). He began his artistic career with the paintings "Urania" and "Yeszybolen," for which he received a silver medal at the Paris Exposition of 1889. In Paris he assimilated with the French school, the result being seen in his "Esther and Haman." Returning to Cracow in 1891, he produced "Silence of the Field," a Jewish cemetery being the subject. Since 1893 he has resided in his native town, Lodz. Among his later paintings are "A Little Conference," which won a silver medal at the Berlin Exposition, and "Sabbath Peace," awarded the first prize at Warsaw and Cracow (1894). He has since produced his greatest work, "The Wandering Jew," which was warmly praised at the Paris Exposition of 1900.

Bibliography: *Encyklopedya Powsiechna*, vii., Warsaw, 1900.

H. R. J. L. La.

ḤISDA: Babylonian amora of the third generation; died in 620 of the Seleucidan era (= 308–309; Sherira Gaon, in Neubauer, "M. J. C." i. 30; in 300, according to Abraham ibn Daud, "Sefer ha-Ḳabbalah," in Neubauer, *l.c.* p. 58), at the age of ninety-two (M. Ḳ. 28a); descended from a priestly family (Ber. 44a). Ḥisda studied under Rab (Abba Arika), who was his principal teacher; after the latter's death he attended the lectures of Huna, his companion, and of the same age as himself. He and Huna were styled "the ḥasidim of Babylon" (Ta'an. 23b); he was also one of those just ones ("ẓaddiḳim") who could bring down rain by their prayers (M. Ḳ. 28a). At first he was so poor that he abstained from vegetables because they incited the appetite (Shab. 140b), and when he walked in thorny places he raised his garments, saying: "The breaches in my legs will heal of themselves, but the breaches in my garments will not" (B. Ḳ. 91b). Later, as a brewer, he became fabulously rich (Pes. 113a; M. Ḳ. 28a). At the age of sixteen he married the daughter of Ḥanan b. Raba (Ḳid. 29b), by whom he had seven or more sons and two daughters. One of his pupils, Raba, became his son-in-law (Niddah 61b).

Ḥisda was a great casuist ('Er. 67a), and his acute mind greatly enhanced the fame of Huna's school at Sura. But his very acuteness indirectly caused a rupture between himself and Huna. The separation was brought about by a question from Ḥisda as to the obligations of a disciple toward a master to whom he is indispensable. Huna saw the point and said, "Ḥisda, I do not need thee; it is thou that needst me!" Forty years passed before they became reconciled (B. M. 33a). Ḥisda nevertheless held Huna in great esteem, and although he had established a school, built at his own expense, at Mata Meḥasya four years before Huna's death (Sherira, *l.c.*), he never published any decision during the lifetime of Huna ('Er. 62b). Huna came to recognize Ḥisda's merit later, and recommended his son Rabbah to attend his lectures (Shab. 82a).

Ḥisda presided over the Academy of Sura for ten years following the death of R. Judah (298–299; Sherira, *l.c.*), or following the death of Huna, according to Abraham ibn Daud (*l.c.*). He always preserved great respect for the memory of Rab, whom he referred to as "our great teacher, may God aid him" (Suk. 33a, *passim*). Once, holding up the gifts which are given to the priest, he declared that he would give them to the man who could cite a hitherto unknown halakah in the name of Rab (Shab. 10b). Ḥisda's halakot are frequent in the Babylonian Talmud, some being given on the authority of his pupils. His principal opponent was Sheshet. Besides deducing his halakot in a casuistic way, Ḥisda was peculiar in that he derived his halakot less from the Pentateuch than from other parts of the Bible.

Ḥisda was also an authority in Haggadah, and employed special assistants to lecture in that department ('Er. 21b). Many ethical sentences of his have been preserved (see especially Shab. 140b), mostly for students. The following two sentences may be cited: "Forbearance on the part of a father toward his child may be permitted, but not forbearance on the part of a master toward his disciple" (Ḳid. 32a): "He who opposes his master is as though he opposed the Shekinah" (Sanh. 110a). It is said that the Angel of Death, not being able to approach Ḥisda because he never ceased from studying, cleft the trunk of a cedar-tree. Terrified by the noise, Ḥisda interrupted his studies, whereupon the angel took his soul (Mak. 10a).

S. M. Sel.

HISTORIOGRAPHY: Method of writing history. In Bible times the Jews showed a strong historical sense, as evidenced by the series of books from Genesis to Kings devoted to the history of the people. Without entering into the vexed question of the sources of the historic statements in the Pentateuch, it is clear from actual references in the books of Kings that even before their compilation a considerable number of annals existed independently, from which the statements in the Bible were compiled. These annals appear to have been called "The Book of the Acts of Solomon" (I Kings xi. 41), "The Book of the Chronicles of the Kings of Israel," and "The Book of the Chronicles of the Kings of Judah." There seems, indeed, to have been a royal official, known as the "mazkir," appointed to keep the official record of the events of each reign: those of David (II Sam. viii. 16, xx. 24), Solomon (I Kings iv. 3), and Hezekiah (II Kings xviii. 18, 37). Such works appear to have contained statistical details (I Chron. xxvii. 24), or genealogies (Neh. xii. 26). The Book of Chronicles quotes also a "Book of the Kings of Judah and Israel," which may possibly be the canonical book, and a "Midrash of the Book of Kings" (II Chron. xxiv. 27, Hebr.), which is probably a recasting of the Biblical narrative. Another source of the Chronicles was a series of histories of the Seers and Prophets, including Samuel, Nathan, Gad, Iddo, and Shemaiah.

Hellenistic Period.

The same interest in the records of the past was shown, in the Hellenistic period, by writers in Greek, who often translated from Hebrew or Aramaic sources. Thus the First Book of the Maccabees is such a version, as is also the "History of John Hyrcanus," of which nothing further is known (comp. I Macc. xvi. 23-24). Other adaptations from the Hebrew of the Bible are found in fragments contained in a work of Alexander Polyhistor from Demetrius, Eupolemus, Artapanus, Aristeas, Cleodemus; but these are scarcely histories, and are of no independent value. Jason of Cyrene wrote a book, in five volumes, on the Maccabean period, of which the Second Book of the Maccabees is an abstract. Philo of Alexandria himself wrote an account of the persecutions under Caligula, in five books, of which only two are extant (Schürer, "Gesch." iii. 345-370).

Josephus.

All these are of slight account compared with the contributions to Jewish history made by Joseph, son of Matthias, known as Josephus. Besides his "Jewish Antiquities," which has a certain apologetic tendency, he wrote a "History of the Jewish War," which is the main source of information for the fall and destruction of the Jewish state. Apart from the value of the information conveyed, the work has considerable literary grace and power of presentation. A contemporary, Justus of Tiberias, also wrote a history of the Jewish war, which is referred to and sharply criticized by Josephus.

After the fall of Jerusalem and the dispersion of the Jews, the absence of communication between the scattered communities prevented any systematic account being written of their doings; for a long time, indeed, the only approach to historic composition was connected with ritual observances, as in the Megillat Ta'anit, or list of fast-days, or with the succession of tradition, as in the Pirḳe Abot, continued later on in the Seder Tannaim we-Amoraim (*c.* 887) and the Epistle of Sherira Gaon (*c.* 980). The series of sketches giving the relations of various rabbis to their predecessors, and which occur in later works, though often containing historical facts, are mainly useful in throwing light upon literary annals, and do not call for treatment here. The only work of the Talmudic period which can be considered as historic in tendency is the Seder 'Olam Rabba. A smaller work, Seder 'Olam Zuṭa, on the same subject, is devoted to proving that Bostanai was not descended from David. The "Megillat Ebiatar," published in Schecter's "Saadyana," may also be mentioned here.

"Yosippon."

The revival of independent interest in history appears to be shown, in southern Italy, in the tenth century, by the "Yosippon," a history of the period of the Second Temple, attributed to Joseph b. Gorion and written in fluent Hebrew. Some additions to this were written by one Jerahmeel b. Solomon, about a century later, in the same district. Of the same period is the Ahimaaz Chronicle, describing the invasion of southern Italy by the Saracens, with an account of the Jews of Bari, Otranto, etc. (see Ahimaaz).

Records of Persecutions.

The series of historic chronicles was begun in Spain by the "Sefer ha-Ḳabbalah" of Abraham ibn Daud of Toledo (1161). A continuation of this, by Abraham ben Solomon of Torutiel, has been lately discovered and published by Neubauer. The concluding chapter of Joseph b. Ẓaddiḳ of Arevalo's "Zeker Ẓaddiḳ" gives a chronicle of the world from the Creation to 1467. It was followed by Abraham Zacuto's similar but fuller work, "Sefer Yuhasin," carried down to the year 1505. Items of Jewish interest are contained in general Jewish histories written in Hebrew, like those of Elijah Capsali (1523; on the history of the Ottomans) and Joseph ha-Kohen (1554; on the same subject). David Gans gave a general history of the world up to 1592, while Joseph Sambary, in a work carried down to the year 1672, deals more with the Jews of the East. Material for the history of the Jews in the Middle Ages is given in the various accounts of persecutions, especially in the accounts of the Crusades by Eleazar ben Nathan (on the First Crusade), Eleazar of Worms, and Ephraim of Bonn (on the Second Crusade), and in the Memor-Books, some of which were recently printed by the German Jewish Historical Commission. With the invention of printing many cases of persecution were recorded contemporaneously by Jewish writers, a whole series, for example, being devoted to the Chmielnicki massacres. Many of these separate attempts are enumerated by Steinschneider ("Jewish Literature," pp. 152-156). A summary of these persecutions was written by Judah ibn Verga of Seville, and continued by his son, Joseph (1554), under the title "Shebeṭ Yehudah." Another collection was given by Joseph ha-Kohen under the title "'Emek ha-Baka" (1575), while Gedaliah ibn Yaḥya summed up chronicles, genealogies, and persecutions in his interesting and curious "Shalshelet ha-Ḳabbalah."

Meanwhile, owing to the influence of the Protestant Reformation and to other causes, the attention of the outer world was drawn to the later destinies of the Jews. Schudt, in his "Jüdische Merckwürdigkeiten," gave a short history of the past and a fairly accurate and complete account of the contemporary condition of the Jews. He was followed by Jacob Christian Basnage, who for the first time put in systematic form an account of the history of the Jews during the Christian centuries. His work remained for a long time the chief source of information to the outer world on Jewish history. The more popular sketch of Hannah Adams, and the supplementary portions of Milman's "History of the Jews," add very little to the work of Basnage.

As the attention of Europe became attracted to the constitutional position of the Jews, and as efforts became directed toward their emancipation, recourse was had to the large amount of material contained in the medieval archives of western Europe. The investigation of the sources began in England. There Prynne, in his "Short Demurrer," utilized his unrivaled knowledge of the records to oppose the return of the Jews to England. He was followed later on by Tovey, Webb, and Blunt. On the Continent, in the eighteenth century, similar collections of archival materials were made, by Ulrich for Switzerland, by Aretin for Bavaria, and by Würfel for Nuremberg. Other workers, dealing on the same lines with the general history of a country, often came across material relating to the Jews, which they included in their works, as Madox, in his "History of the Exchequer," and Laurent, in "Ordonnances des Rois de France." With the increased attention paid to the study of sources by Ranke and his school, this source of information for Jewish history proved increasingly fruitful. In England, in particular, a mass of material was collected from the publications of the Record Commission and the Rolls Series; in Germany, from Pertz's "Monumenta Germaniæ Historica."

Jost and Grätz.

Before these additional sources of information were completely accessible to the inquirer, the interest of the Jews themselves was once more attracted to their own history, and attempts were made to summarize its various vicissitudes. I. M. Jost attempted, in his "Gesch. der Israeliten," to give the annals of the purely political history of the Jews, combining at times an estimate of their spiritual and literary development, which he ultimately summed up separately and more exhaustively in his "Gesch. des Judenthums." He was followed at even greater length by Heinrich Grätz, who made his "Gesch. der Juden" in large measure a study of the development of the Jewish spirit as influenced by its historic environment. Grätz's attention was accordingly attracted mainly to the literary and religious development of Judaism rather than to the secular lot of the Jews, though his work also contained a fairly full account of their external history so far as it bore upon the general development. He scarcely claimed, however, to deal fully or adequately with the history of the Jews in the stricter constitutional sense of the term. Beside these should be mentioned the remarkable sketch of S. Cassel in the article "Juden" in Ersch and Gruber's "Encyklopädie," still, in some ways, the most satisfactory survey of the whole subject, though later sketches by Isidore Loeb, in Vivien de St. Martin's "Dictionnaire Universel de Géographie," and Théodore Reinach, in "La Grande Encyclopédie," have also great merit.

Meanwhile the establishment of many specialist scientific journals devoted to Jewish topics gave opportunity for the collection, based on the local records, of many monographs on special parts of Jewish history, such as those of Perles on Posen, Wolf on Worms, etc. The attention of specialist historians not of the Jewish race was again drawn to the subject, resulting in such works as those of Depping ("Les Juifs dans le Moyen Age"), Stobbe ("Die Juden in Deutschland"), Amador de los Rios, Bershadski, Saige ("Les Juifs de Languedoc"), and Lagumina ("Gli Giudei in Sicilia"). The number of these monographs has become so great that they are enumerated annually in the "Jahresberichte der Geschichtswissenschaft," at first by Steinschneider, later by Kayserling.

Historical Exhibition and Societies.

The year 1887 to a certain extent marks an epoch in the tendency of Jewish historical studies, when Jews themselves turned to the secular archives of their native lands. The Anglo-Jewish Historical Exhibition of that year was the first attempt to bring together historical records of the Jews; in the same year the first publications of the German Historical Commission were issued, and a society founded in honor of Julius Barasch started a series of historical researches into the history of the Jews of Rumania which have thrown altogether new light on the history of the Jews in eastern Europe. The Anglo-Jewish Historical Exhibition included a series of works, among which was a whole volume devoted to a bibliography of Anglo-Jewish history by Jacobs and Wolf, and which was itself followed by similar attempts in Russo-Jewish history ("Ukazatel") and Spanish-Jewish history (Jacobs, "Sources").

In 1892 the American Jewish Historical Society was founded, and in 1895 the Jewish Historical Society of England, while the Société des Etudes Juives has throughout given marked attention to the history of the Jews in the French provinces and colonies. These various societies have produced a number of works and transactions during the past decade which have for the first time put the constitutional history of the Jews in various countries on a firm basis. Aid has been given in this direction by the collection of laws relating to the Jews in France (Uhry and Halphen), Prussia (Heinemann), and Russia (Levanda, Minz, and Gradowsky). The first attempt at summing up conclusions with regard to the medieval position of the Jews in Europe has been made by J. Scherer in an introductory essay to his elaborate work on the legal position of the Jews of the Austro-Hungarian empire (1901). As a result of these various lines of inquiry many monographs have been produced devoted to special sections of Jewish history, and derived in large measure from manuscript and secular sources, which are sometimes reproduced verbatim, as in Stern's "Urkundliche Beiträge"; sometimes translated, as in Jacobs' "Jews of Angevin England"; and sometimes worked into a continuous narrative, as in Kayserling's "Gesch. der Juden in Portugal." Work of a similar kind has also been executed in the form of calendars, or "regesta," such as those made by Aronius for Germany (up to 1273), and as the "Regesti y Nadpisi" for Russia (up to 1670).

Scarcely any country has yet had its Jewish history adequately described. The few monographs that exist—like those of Koenen ("Geschiedenis der Joden in Nederland," 1834), on Holland; A. D. Cohen ("De Mosaiske Troesbekendere," Odense, 1837), on Denmark; Wertheimer ("Gesch. der Juden in Oesterreich"), on Austria; J. Picciotto ("Sketches of Anglo-Jewish History," London, 1875), on England; Daly ("Settlements of the Jews in North America," New York, 1893), on the United States—were mainly written before any serious study of the sources had been undertaken. The Iberian Peninsula has fared somewhat better, the works of Amador de los Rios and Kayserling still remaining the best monographs on the history of the Jews in any one country. Few of the chief communities have been adequately treated, the most thoroughly described being those of Berlin (by L. Geiger), Vienna (by G. Wolf, "Gesch. der Juden in Wien," Vienna, 1876), Paris (in a series of monographs by L. Kahn), and, above all, Rome (two excellent works by A. Berliner, 1893, and Rieger and Vogelstein, 1895).

As a rule, few strictly historical records exist in Hebrew. For the Middle Ages these consist mostly of business documents, such as the "sheṭarot" published by the Anglo-Jewish Historical Exhibition and a Hebrew ledger published by Isidore Loeb in the "Revue des Etudes Juives." Items of historic interest, however, often occur in family papers or juridical responsa; and David Kaufmann produced a considerable number of monographs in which he made use both of the public archives and of private family papers. He also showed great interest in the genealogies of Jewish families, which often throw light on obscure historical points. He contributed to the publication of cemetery inscriptions, and edited Glückel von Hameln's valuable diary, which throws considerable light upon the social history of the Jews in Germany in the seventeenth century.

"Culturgeschichte."

Attention has also been given to the "Culturgeschichte" of the Jews of the Middle Ages, chiefly by Güdemann, Berliner, and Israel Abrahams ("Jewish Life in the Middle Ages"). Work in this direction has also been undertaken by the various societies for the study of Jewish ecclesiastical art and folk-lore, especially that founded at Hamburg by Grunwald. As far as any general direction can be discerned at the present day in Jewish historiography, it is in the direction of the study of "Culturgeschichte" and constitutional history.

As regards the historical treatment of the Biblical phases of Jewish history, this has become part of general Biblical exegesis, and does not call for treatment in this place, especially as scarcely any Jewish writers have produced works of importance on this subject, Herzfeld being perhaps the only exception. The portion of Grätz's history relating to this subject is generally recognized to be the weakest side of his work. On the other hand, the studies of the development of the Jewish religion and literature, as by Zunz, Geiger, Weiss, Halévy, Karpeles, etc., can scarcely be regarded as history in the strict sense of the word (see LITERATURE, HEBREW; SCIENCE OF JUDAISM).

HISTORISCHE COMMISSION: Commission appointed by the Deutsch-Israelitische Gemeindebund in 1885 for the collection and publication of material relating to the history of the Jews in Germany. It consisted originally of Privy Councilor Kristeller, and Professors Bärwald, Bresslau, Geiger, Lazarus, Steinthal, Stobbe, Wattenbach, and Weizsäcker. The commission treated the subject as part of German history, and made a special point of utilizing the archival sources. It published, under the editorship of Prof. L. Geiger, "Zeitschrift für Gesch. der Juden in Deutschland" (5 vols., 1886–92).

Its special publications were divided into (1) "Regesten," or calendars of the history of the German Jews (including those of the Carlovingian empire) up to 1273, edited by Aronius (Berlin, 1887–1902); and (2) sources, including the "Judenschreinsbuch" of Cologne (1888); the Hebrew accounts of the Jewish persecutions during the Crusades, edited by Neubauer and M. Stern, and translated by S. Baer (1892); and the "Memorbook of Nuremberg," edited by Salfeld (1898). Much comment was attracted at the time of the formation of the commission owing to the fact that Professor Grätz was not made a member of it. The omission perhaps indicated the strict policy of the commission, which regarded the history of the Jews in Germany as part of the history of that country.

D. J.

HITI, AL-: Karaite chronicler; flourished (probably in Egypt) in the first half of the fifteenth century. He was a native of Hit (whence his surname), on the Euphrates, about thirty leagues to the west of Bagdad. He is supposed by Margoliouth to be identical with David ben Sa'adel ben Joseph, the writer of a manuscript (dated 811 A.H. = 1408–09) quoted by Pinsker ("Liḳḳuṭe Ḳadmoniyyot," p. 64). Margoliouth further assumes that Al-Hiti was a son of Joshua ibn Sa'adel ibn al-Hiti, who is cited by Solomon ben Jeroham, the adversary of Saadia. Al-Hiti was the author of a chronicle in which he registered all the Karaite scholars and their works down to Israel al-Maghrabi (המערבי). Although the author was misled in some important points, his work furnishes valuable information concerning well-known Karaite scholars, and mentions a great number of previously unknown names. Al-Hiti's chronicle was published by Margoliouth from a genizah fragment ("J. Q. R." ix. 429).

HITKÖZSÈGI HIVATALNOK. See Periodicals.

HITTITES (Hebrew, חתים, בני־חת; LXX. Χετταῖοι, Χεττείν, υἱοὶ [τοῦ] Χέτ; Vulgate, "Hethæi," "Cethæi," "filii Heth"; Assyrian, "Khatti"; Egyptian, "Kh-ta"): A race of doubtful ethnic and linguistic affinities that occupied, from the sixteenth century until 717 B.C., a territory of vague extent, but which probably centered about Kadesh on the Orontes and Carchemish on the upper Euphrates. The sources for present knowledge of this people are five: the Old Testament, and Egyptian, Assyrian, Hittite, and Vannic inscriptions.

——**Biblical Data:** In the Old Testament the Hittites are represented as dwelling in the mountains in the heart of Palestine (Num. xiii. 29), and are frequently mentioned with the Canaanites, Amorites, Perizzites, Hivites, and Jebusites (Ex. iii. 8, 17; xiii. 5; xxiii. 23; xxxiv. 11; Deut. xx. 17), as well as with the inhabitants of Jericho (Josh. xxiv. 11), all dwelling to the west of the Jordan, between Baal-gad in the valley of Lebanon and Mount Seir (Josh. xii. 7-8). To this list the Girgashites are added in Deut. vii. 1, Josh. iii. 10, and Neh. ix. 8, while Gen. xv. 19–21 adds also the Kenites, Kenizzites, Kadmonites, and the Rephaim. Of all these the Hittites, Canaanites, and Hivites seem to have been the most important (Ex. xxiii. 28). The geography of these lists is, however, quite vague. In Josh. i. 4 the Hittite territory stretches from Lebanon and the wilderness to the Euphrates (although "all the land of the Hittites" is omitted in the LXX.). Hittites also dwelt at Hebron, for Abraham was buried in a cave in the field of Ephron, son of Zohar, a Hittite (Gen. xxiii. 10, 20; xxv. 9; xlix. 30; l. 13), and the Hittites preserved a certain individuality as late as David's time, since Uriah and Abimelech are expressly characterized as Hittites (I Sam. xxvi. 6; II Sam. xi. 3, 6, 17, 21, 24; xii. 10; xxiii. 39; I Kings xv. 5; I Chron. xi. 41). They were regarded as aliens, however, and taxed as such by Solomon (I Kings ix. 20–21; II Chron. viii. 7–8). The relations between the Israelites, on the one hand, and the Hittites and the rest of the conquered peoples, on the other, had long been friendly, for the Hebrews had not only adopted some portion of the Hittites' religious cult soon after the invasion of Palestine, but had intermarried with them (Judges iii. 5–6), as Esau had done (Gen. xxvi. 34) and as Rebekah feared Jacob might do (Gen. xxvii. 46).

The Hittites are identical with the "children of Heth" (בני־חת; υἱοὶ [τοῦ] Χέτ: Gen. xxiii. 3, 5, 7, 10, 18, 20; xxv. 10; xlix. 32), while their close ethnic affinity with the Canaanites and the other tribes with which they are usually mentioned is implied by the genealogical table of the sons of Canaan (Gen. x. 15–19; I Chron. i. 13–16, where the LXX. and the Vulgate respectively render חת by Χετταῖος and Hethæus"; I Chron. i. 13–16 is omitted in the LXX.). While the Hittites mentioned in the Old Testament are usually regarded as dwelling in the south-central part of Palestine, there are distinct traces of a more northerly habitat in the location of the new city of Luz in the land of the Hittites (Judges i. 26), and this is confirmed by II Sam. xxiv. 6, if, on the basis of the Septuagint (L) γῆν Χεττεὶμ Καδῆς, the corrupt passage ארץ תחתים חדשי (omitted in the Peshiṭta) may be read ארץ החתים קדשה. It was probably for these northern Hittites that Solomon imported Egyptian horses (I Kings x. 29; II Chron. i. 17); and his harem contained Hittite princesses (I Kings xi. 1). The Hittites' power and their friendship for Judah and Israel are shown by the fact that an alliance of Jehoram with the Hittites and Egyptians was regarded by the Assyrians as neither impossible nor improbable (II Kings vii. 6). In the prophetic writings the Hittites are mentioned only in Ezek. xvi. 3, 45 (R. V.), where Yhwh says of Jerusalem: "Thy birth and thy nativity is of the land of the Canaanite; the Amorite was thy father, and thy mother was an Hittite."

——**Non-Jewish Sources:** In the Egyptian inscriptions the Hittites, who had apparently conquered Syria, first appear in the reign of Thothmes III. (1503–1449), when they received their first decisive reverse. After a battle at Megiddo on the Kishon, Thothmes captured the King of Kadesh; in successive campaigns the Egyptians advanced to Carchemish and Kadesh, and traversed Naharina or Mesopotamia. The Hittites were only temporarily checked, however, and on the death of Thothmes they regained their prestige. The conflict continued under Thothmes IV., while his successor, Amenophis III., was obliged to enter into an alliance with the Hittites, and to marry a princess of their royal house. The son of this union was Amenophis IV., better known as Khu-n-aten, who, attempting to overthrow the Egyptian religion, introduced into Egypt the peculiarly Hittite worship of the sun. At this period the Hittite power was such that a treaty, offensive and defensive, was concluded between Rameses I. and Sap(e)lel, King of the Hittites. On the accession of Seti I. to the Egyptian throne in 1366, the Hittite war was renewed, and Kadesh was taken by surprise, although peace was soon restored. But in the following reign, that of Rameses II., Kadesh was again the scene of a battle, which was described by the Egyptian poet Pentaur two years later. This battle seems to have been indecisive, however, and a new treaty was concluded which was confirmed by the marriage to Rameses of the Hittite princess called by the Egyptians "Urma Noferu-Ra." The demoralization resulting from these wars explains the slight opposition to the Hebrew invasion of Palestine after the Exodus. The friendship of the Hittites and Egyptians lasted, however, through the reign of the successor of Rameses, Me(r)neptah II., who aided the Hittites with food in the time of famine. Before long the Hittite power revived, and in the reign of Rameses III. (1180–1150) they were prominent among the invaders of Egypt. They were beaten back at Migdol, their country was laid waste, their king was captured, and their advance south of Kadesh was definitely checked. From this time the Hittite power in Syria waned, and with the cessation of their conflict with

In the Egyptian Inscriptions.

Egypt their name disappears from the Egyptian inscriptions.

In the Assyrian Inscriptions.

There is a gap of almost a century in the history of the Hittites after their defeat by Rameses III. About 1100, however, they became the enemies of the Assyrians. The first expedition of Tiglath-pileser I. was undertaken against them. He forced his way through Kummukh, or Commagene, as far as Malatiyeh, and penetrated to Carchemish. Despite a series of expeditions, however, he was unable to pass the last-named city. After the reign of Tiglath-pileser there is no mention of the Hittites in the Assyrian inscriptions until the time of Assur-naṣir-pal (885–860), who extended his conquests to the Hittite cities of Carchemish, Gaza, and Kanulua, penetrating as far as the Mediterranean, and returning laden with booty. The succeeding Assyrian monarch, Shalmaneser II. (860–825), continued the war, and repeatedly ravaged Syria, draining its wealth, and defeating the Hittites, by this time rich and decadent, at Pethor, Sangara, Carchemish, Karkar, and other cities, thus crushing the Hittite power south of the Taurus. In the reign of Tiglath-pileser III., war against the Hittites again broke out, and in 717, during the rule of Sargon, Carchemish was finally conquered, and its last king, Pisiris, became an Assyrian captive.

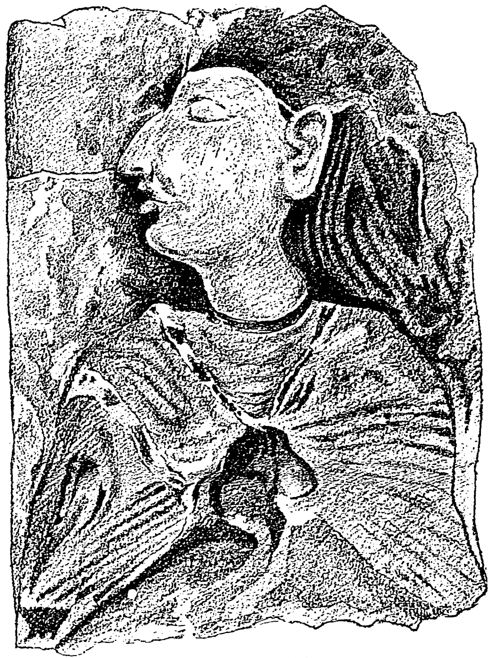
In the Vannic Inscriptions and the Classics.

The inscriptions of Van, dating from the ninth and eighth centuries B.C., contain several allusions to expeditions against the Hittites. In the ninth century the Vannic king Menuas plundered the Hittite cities Surisilis and Tarkhi-gamas, and later forced his way to Malatiyeh, setting up a triumphal inscription at Palu on the northern bank of the Euphrates, the eastern boundary of the Hittite territory at that period, as Malatiyeh was the western. Argistis I., successor of Menuas, continued his father's policy, conquering Niriba and Melitene.

The Hittites are not mentioned by any of the classical writers excepting Herodotus (who speaks of them as "Syrians"), Strabo (who [p. 737] calls them "White Syrians" [Λευκόσυροι], localizing them about Mount Taurus and the Black Sea), and possibly Homer (if the Κήτειοι or Χήτειοι, named once in the "Odyssey" [xi. 521] as allies of the Trojans, were really the Hittites).

Ethnology and Religion.

The Hittites as shown both on their own and on Egyptian monuments were clearly Mongoloid in type. They were short and stout, prognathous, and had rather receding foreheads. The cheek-bones were high, the nose was large and straight, forming almost a line with the forehead, and the upper lip protruded. They were yellow in color, with black hair and eyes, and beardless, while according to the Egyptian paintings they wore their hair in pigtails, although this characteristic does not appear in the Hittite sculptures. They would seem to have come, therefore, from the northeast of Mesopotamia, and to have worked south into Palestine and west into Asia Minor. In Palestine, however, they lost their ethnic individuality to a large extent, and adapted their language and their names to those of the Semites. In religion the Hittites were in great part dependent on the Babylonians. The chief god, according to the Egyptian inscriptions, was Sutekh, or Atys, and the chief goddess was Antarata, who later became Athar-'Ati—respectively the Atargatis and Derceto of the classics. Antarata corresponds closely in attributes and in art with the Babylonian Ishtar; her husband seems to have been the sun-god Tar, or Tarku, called "Sandan" in Cilicia and Lydia. At a later period she apparently superseded Sutekh as the chief divinity. The deluge-legend was known to the Hittites, who called its hero "Sisythes." They seem, moreover, to have had cities of refuge and to have practised sacred prostitution.

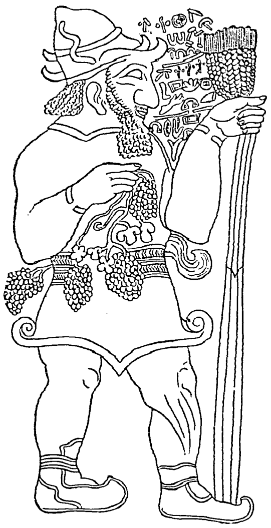


Portrait of a Hittite.

(From an inlaid tile in the tomb of Rameses III.)

Hittite Monuments.

The Hittite monuments are numerous and are found over a wide extent of territory. In their sculpture Babylonian influence is evident, although the physiognomy and costume of the subjects of representation, as well as several minor details, give Hittite art a distinct individuality. As is the case with Babylonian art, the sculptures are usually accompanied with inscriptions. Among the more important monuments of Hittite art may be mentioned those at Ivris in the district corresponding to the ancient Lycaonia; at the Pass of Karabel, near Smyrna; at Sipylus, near Magnesia; at Ghiaurkalessi, in Galatia; at Fassili, in Isauria; at Zenjirli, in the territory corresponding to the ancient Commagene; at Euyuk; and at Boghazkeui, east of the Halys. They are for the most part, therefore, in Asia Minor, although one of the most noteworthy sculptures was found at Sakchegözü in northern Syria. Representations of the Hittites are found also on Egyptian monuments, as at Abu-Simbel and Medinet-Abu. The character of Hittite art is solid, at times even heavy, but excellent in the portrayal of animal forms. The Hittites were also skilled lapidaries and carvers on ivory, as well as clever silversmiths, while their paintings of Egypt give a vivid idea of Hittite tactics in war.



Hittite Divinity.
(After Wright, "Empire of the Hittites.")

The inscriptions, which must be regarded as still uninterpreted, are written in a script partly pictographic and partly alphabetic, syllabic, or ideographic. The number of pictographs frequently aids materially in determining the general content of an inscription, even though the text can not be deciphered. The lines are in boustrophedon style, reading alternately from right to left and from left to right, and possibly influenced in this regard archaic Greek inscriptions. Determinatives, or conventional signs, denoting "god," "king," "country," etc., seem to have been employed. It has been plausibly suggested that the script originated in Cappadocia, since the shoe with pointed, upturned toe (reminiscent of a snow-shoe) and the mitten (used in cold countries) are among the most common signs, while the ideogram for "country" is a mountain peak. The characters thus far discovered number over two hundred, and the list is doubtless still incomplete. The style of carving is peculiar to the Hittites, in that the figures and characters are in relief, the stone having first been carefully dressed, and the portions about the figures and characters then cut away. The most important inscriptions have been found at Babylon, Hamath, Jerabis (the ancient Carchemish), Marash, Izgin, and Bulgarmaden. In addition, a number of seals and cylinders have been discovered.

Language of the Hittites.

The Hittite language, whose alphabet shows at least superficial affinities with the Cypriote and Vannic scripts, is one of the most difficult problems in linguistics. Fantastic theories have not been lacking, of which the hypothesis of Clarke, that the Hittites were akin to the Peruvian Kechua, and that of Campbell, who finds Hittite names in France, Japan, and ancient Mexico, are the most bizarre. A plausible view, defended especially by Sayce and Wright, and more reservedly by De Lantsheere, connects Hittite with the Georgian group of languages, particularly on the basis of the similarity of their formation of the nominative and genitive. Further developments of this view were advanced by Lenormant and Hommel. The latter connects Hittite with New Elamitic, Cossæan, Vannic, and the modern Georgian, and this entire group with Sumerian, thus ultimately with the Turko-Tatar branch of Ural-Altaic. The Altaic affinity of Hittite has been especially emphasized by Conder, whose arguments, however, overleap themselves and prove too much. Rejecting the Altaic hypothesis, Halévy and, for a time, Ball sought to prove Hittite a Semitic language. Their conclusions, however, based on proper names obviously borrowed in many cases from neighboring but unrelated stocks and languages, can not be regarded as valid. The hypothesis has also been advanced that Hittite was an Indo-Germanic language, and was most closely akin to Armenian. The protagonist of this theory is Jensen, who, though confessedly not an expert in Armenian linguistics, has built up a series of ingenious and daring identifications of Hittite words with Armenian. The two Arzava letters, discovered in 1902, are regarded by Bugge and Knudtzon as Hittite, and as connected linguistically with Armenian and even Lycian. The time does not seem yet to have come for a final declaration regarding the linguistic position of the Hittite speech. It is not impossible that a better knowledge of the languages of Asia Minor, shown by the researches of Kretschmer to be neither Semitic nor Indo-Germanic, will throw new light on this problem. Meanwhile, the view which regards Hittite as Georgian in its affinities seems on the whole most probable, although the Armenian hypothesis has certain arguments in its favor. The date of the extinction of Hittite is unknown. If (as is not improbable from the presence of Hittite monuments in Lycaonia) Lycaonian was a Hittite dialect, it was spoken as late as the first century C.E. (Acts xiv. 11).

Bibliography: The bibliography on the Hittites is very extensive. Many studies are scattered through Oriental and theological journals; most of them are antiquated, and many are incorporated in later and fuller works. The most important books dealing with the subject are: Clarke, *The Khita and Khita-Peruvian Epoch*, London, 1877; Conder, *Heth and Moab*, *ib.* 1883; idem, *Altaic Hieroglyphs and Hittite Inscriptions*, *ib.* 1887; idem, *The Hittites and Their Language*, Edinburgh, 1898; Wright, *Empire of the Hittites*, New York, 1884; Perrot and Chipiez, *Histoire de l'Art dans l'Antiquité*, vol. iv. (Sardinia, Judea, and Asia Minor), Paris, 1887; Sayce, *The Hittites*, London, 1888; Puchstein, *Pseudohethitische Kunst*, Berlin, 1890; Campbell, *The Hittites*, London, 1891; De Lantsheere, *De la Race et de la Langue des Hittites*, Brussels, 1892; Peiser, *Die Hetitischen Inschriften*, Berlin, 1892; Menant, *Eléments du Syllabaire Hétéen*, Paris, 1892; De Cara, *Gli Hethei-Pelasgi*, Rome, 1894–1902; Jensen, *Hittiter und Armenier*, Strasburg, 1898; Messerschmidt, *Corpus Inscriptionum Hettiticarum*, Berlin, 1900–1902; Fossey, *Quid de Hethæis Cuneatæ Litteræ Nobis Tradiderint*, Versailles, 1902; Knudtzon, *Die Zwei Arzawa-Briefe*, Leipsic, 1902; Hilprecht, *Explorations in Bible-Lands*, Philadelphia, 1903.

G. L. H. G.

HITZIG, FERDINAND: German Christian theologian; born at Hauingen, Baden, June 23, 1807; died at Heidelberg Jan. 22, 1875. After studying under Gesenius at Halle and under Ewald at Göttingen, he taught at Heidelberg from 1830 to 1833, in which year he received a call from the newly founded University of Zurich. He returned to Heidelberg in 1861. Hitzig was one of the most eminent and independent theologians of the nineteenth century. He was an indefatigable worker, and edited all the prophetical books and nearly all the poetical writings of the Old Testament. His publications include:

"Isaiah," 1833; "The Psalms," two editions, 1835–36 and 1863–65; "The Twelve Minor Prophets," 1839; "Jeremiah," 1841; "Ezekiel," 1847; "Ecclesiastes," 1847; "Daniel," 1850; "Song of Solomon," 1855; "Proverbs," 1858; "History of the People of Israel," 1869; "Job," 1874; and various minor works. Hitzig united extensive scholarship and brilliant penetration with a talent for combination which often led him astray. He always aimed at positive results, and endeavored, for instance, to ascertain the author and date of every psalm. As early as 1836 he maintained that some psalms before the seventy-third, and all psalms after and including the seventy-third, were Maccabean.

HIVITES (החוי): One of the Canaanitic nations dispossessed by the children of Israel (Gen. x. 17; Ex. xxiii. 23, 28; *et al.*). In the Hebrew text the name occurs only in the singular; its meaning is, according to Gesenius, "the villager" (comp. חוות יאיר), or, according to Ewald ("Gesch. des Volkes Israel," i. 318), "the midlander," the Hivites having previously inhabited central Palestine. The Hivite was the sixth son of Canaan (Gen. x. 17). In the first enumeration (Gen. xv. 19–21) of the nations which occupied Palestine in the time of Abraham, the Hivites are not mentioned. Hamor, the Prince of Shechem, was a Hivite; if the Hivites were Shechemites, they are represented as peaceful, credulous, and given to trade and cattle-raising (Gen. xxxiv. 2, 18–29). Like the Hittites, they held their assemblies in the gates of their cities (Gen. xxxiv. 20). Later, in the time of the conquest of Palestine by Joshua, fearing to meet the Israelites in battle, they resorted to stratagem; as they had been outwitted by the sons of Jacob, so they duped Joshua and all the Israelites (Josh. ix. 3–27). The Hivites had then four cities—Gibeon, Chephirah, Beeroth, and Kirjath-jearim (Josh. ix. 17), situated a considerable distance apart. The Gibeonites were spared by Joshua on account of his oath. The Hivites spread toward the north of Palestine, their main body lying under Mount Hermon, in the land of Mizpeh (Josh. xi. 3), "in Mount Lebanon," from Baal-hermon to Ḥamath (Judges iii. 3). Joab, when numbering the Israelites, is stated to have come to the stronghold of Tyre and to all the cities of the Hivites (II Sam. xxiv. 7). Targ. Yer. Gen. x. 17 renders "ha-Ḥiwwi" by "Ṭeripola'e" (Tripolitans?).

J. M. SEL.

ḤIWI AL-BALKHI (חיוי אלבלכֿי): Exegete and Biblical critic of the last quarter of the ninth century; born at Balkh, Persia. He was the author of a work in which he offered two hundred objections to the divine origin of the Bible (Judah ben Barzillai's commentary on the "Sefer Yeẓirah," ed. Halberstam, p. 21; Luzzatto, "Bet ha-Oẓar," p. 12a; *idem*, in Polak's "Halikot Ḳedem," p. 71). Ḥiwi's critical views were widely read, and it is said that his contemporary Saadia Gaon found in Babylonia, in the district of Sura, some schoolmasters who, in teaching children, used elementary text-books which were based upon Ḥiwi's criticisms (Abraham ibn Daud, in "M. J. C." i. 66). Saadia not only prohibited the use of these books, but combated Ḥiwi's arguments in a work entitled "Kitab al-Rudd 'ala Ḥiwi al-Balkhi" (see Saadia's "Kitab al-Amanat wal-'Itiḳadat," ed. Landauer, p. 37). Unfortunately both Saadia's and Ḥiwi's books are lost.

Ḥiwi's book seems to have been one of the most important contributions to skeptical Jewish literature. Only a few of his objections are preserved, in quotations by other authors. In this way it became known that Ḥiwi raised the question why God preferred to live among unclean mankind instead of living among the clean angels (Judah ben Barzillai), and why He required sacrifices and showbread if He did not eat them, and candles when He did not need light (Solomon ben Yeruḥam's commentary on Eccl. vii. 10; Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 28). Another objection of his was based on the claim that God broke a promise which He had made under oath (Harkavy, "Meassef Niddaḥim," i. 3). All these objections are preserved in Saadia's "Kitab al-Amanat" (ed. Landauer, pp. 140 *et seq.*), among twelve other objections of a similar kind, most of which are supposed to have originated with Ḥiwi. They point out several discrepancies in the Scriptures, and infer therefrom a non-divine authorship. Ḥiwi even objected to the teaching of the unity of God, and referred to Deut. xxxii. 9. In this case, as in several others, Saadia combats Ḥiwi without mentioning his name. Some others of Ḥiwi's views are preserved in Ibn Ezra's commentary on the Pentateuch. The passing of the Israelites through the Red Sea Ḥiwi explained by the natural phenomenon of the ebb-tide; and the words "the skin of his [Moses'] face shone" ("ḳaran," literally, "cast horns" or "rays"; Ex. xxxiv. 29) he explained as referring to the dryness of his skin in consequence of long fasting (see Ibn Ezra on the passage in Exodus). Ḥiwi further inquired why manna from heaven no longer descends in the desert of Sinai as it is said to have done in olden times (Ibn Ezra to Ex. xvi. 13).

These few instances of Ḥiwi's criticisms are sufficient to show his skeptical and irreverent spirit, the cause of which D. Kaufmann traced back to anti-Jewish polemical Pahlavi literature (J. Darmesteter, in "R. E. J." xviii. 5 *et seq.*). In "J. Q. R." xiii. 358 *et seq.* Schechter has published one of the most interesting genizah fragments, containing a long series of critical remarks on the Bible which, as Schechter demonstrates, recall very vividly Ḥiwi's method of argumentation. Continuing his essay, Schechter gives also the reasons which speak against the presumption that Ḥiwi was the author of the fragments; he comes to the conclusion, however, that they at least emanated from the school of Ḥiwi (see *ib.* pp. 345 *et seq.*; Bacher, *ib.* pp. 741 *et seq.*; Poznanski, *ib.* pp. 747 *et seq.*; Porges, *ib.* xiv. 129 *et seq.*).

Karaites and Rabbinites agreed in denouncing Ḥiwi as a heretic. His real surname, "Al-Balkhi," is correctly preserved in one instance only; in all others it is changed into "Al-Kalbi" (= "the dog-like").

K. M. Sc.

ḤIYYA BAR ABBA: Palestinian amora of priestly descent; flourished at the end of the third century. In the Palestinian Talmud he is also called **Ḥiyya bar Ba** or **Ḥiyya bar Wa** (ווא; Yer. Ber. iii. 6a, iv. 7d); and in both Talmuds he is frequently mentioned merely as **R. Ḥiyya,** the context showing that Ḥiyya bar Abba is meant. Though a native of Babylon, where, perhaps, for a very short time he came under the influence of Mar Samuel (Weiss, "Dor," iii. 94), he migrated to Palestine at a very early age. There he studied under Ḥanina and Joshua b. Levi, and came into very close contact with Simeon b. Lakish. He is, moreover, known as a disciple of Johanan, after whose death he and his friends Ammi and Assi were the recognized authorities on the Halakah in Palestine.

Ḥiyya was distinguished for the care with which he noted the sayings of his masters (Ber. 38b), and in questions of doubt as to the phraseology of a tradition the version of Ḥiyya was preferred (Ber. 32b, 38b). Though he was the author of many haggadot, he denounced every attempt to collect and commit them to writing, and upon seeing such a collection he cursed the hand that wrote it (Yer. Shab. xvi. 15c). His interest was centered in Halakah, in the knowledge of which he probably excelled all his Palestinian contemporaries. Together with Ammi and Assi, he formed a court of justice before which a certain woman named Tamar was tried. The sentence involved Ḥiyya and his associates in difficulty, and might have had disastrous results had not Abbahu promptly come to their assistance (Yer. Meg. iii. 74a).

Ḥiyya was very poor, and therefore was compelled to go lecturing from town to town in search of a livelihood; he even temporarily left Palestine (Yer. Ma'as. Sh. v. 56b). He was greatly annoyed that the lecturer on Haggadah drew a larger audience than he (see JEW. ENCYC. i. 36, *s.v.* ABBAHU). Through stress of poverty he accepted a commission from Judah II. to collect money to defray the expenses of the decaying patriarchate. The esteem in which Ḥiyya was held is manifested in the credentials obtained for him by Eleazar b. Pedath: "Behold, we have sent you a great man, our envoy. Until his return he possesses all the powers that we do." According to another version the introduction ran: "Behold, we have sent you a great man. His greatness consists in this, that he is not ashamed to say 'I know not'" (Yer. Ḥag. i. 76d; Yer. Ned. x. 42b). At another time Ḥiyya, Ammi, and Assi were appointed by Judah II. to visit the various communities in Palestine, with the view of reawakening interest in the study of the Law (Yer. Ḥag. i. 76c).

Ḥiyya had several brothers: **R. Nathan ha-Kohen,** also known as **R. Kohen** (or **R. Nathan**) **b. Abba; Rabbannai,** or **R. Bannai;** and **R. Simeon b. Abba.** He had several children, among whom were **R. Abba, R. Kahanah,** and **R. Nehemiah.**

S. S. N. St.

ḤIYYA BAR ABBA (surnamed **RABBAH,** "the Great" or "the Elder," to distinguish him from an amora of the same name): Palestinian tanna; born about the middle of the second century, at Kafri, near Sura in Babylonia; pupil of Judah I., and uncle and teacher of Rab. He was a descendant of a family which claimed to trace its origin from Shimei, brother of King David (Ket. 62b). He passed the earlier part of his life in Babylonia, where he married a certain Judith. By her he had twin sons, Judah and Hezekiah (both of whom became renowned rabbis), and twin daughters, Pazi and Tavi (Yeb. 65b). Ḥiyya was unhappy in his married life, for his wife was a shrew. This was so keenly felt by Ḥiyya that when asked by his nephew for a blessing he said: "May God preserve thee from an evil that is worse than death—a contentious woman" (Yeb. 63a). Ḥiyya was especially affected by a trick she played upon him. Disguising herself, she went to him and asked whether the obligation of propagating the human race extended to women; receiving an answer in the negative, she took drugs which rendered her barren (Yeb. 65b). However, Ḥiyya's good nature was so great that he overwhelmed her with presents, meeting the astonishment of his nephew by saying that men should show themselves grateful to their wives for rearing their children and for keeping their husbands from sin (Yeb. 63a).

In Palestine.

In the latter part of his life Ḥiyya emigrated to Tiberias, Palestine, where he established a business in silks, which he exported to Tyre (Ruth R. i. 17; Lam. R. iii. 16; Gen. R. lxix.). The high reputation acquired by him in his native country had preceded him to Palestine, and ere long he became the very center of the collegiate circle of the patriarch Judah I. Regarding him more as a colleague than as a pupil, Judah treated Ḥiyya as his guest whenever the latter chanced to be at Sepphoris, consulted him, and took him with him when he went to Cæsarea to visit Antoninus (Tan., Wayesheb). His admiration for Ḥiyya was so great that he used to say: "Ḥiyya and his sons are as meritorious as the Patriarchs" (B. M. 25b). Judah's friendship and high esteem for Ḥiyya are connected in the Haggadah with a miracle. In course of a conversation with him Judah said that if the Babylonian exilarch R. Huna, who was believed to be a descendant of the family of David, came to Palestine he (Judah) would yield to him the office of patriarch. When R. Huna died and his body was brought to Palestine for burial, Ḥiyya went to Judah and said, "Huna is here," and, after pausing to notice Judah's pallor, added, "his coffin has arrived." Seriously offended, Judah banished Ḥiyya for thirty days. While the latter was away, the prophet Elijah, assuming Ḥiyya's features, presented himself to Judah and healed a toothache from which the patriarch had suffered for thirteen years. Judah was not long in discovering the truth of this wonderful cure, and his respect for Ḥiyya increased (Yer. Kil. ix.).

His Preservation of the Torah.

It was a current saying among the Palestinians that since the arrival of Ḥiyya in Palestine storms did not occur and wine did not turn sour (Ḥul. 86a). His prayers are said to have brought rain in a time of drought and to have caused a lion, which had rendered the roads unsafe, to leave Palestine (Gen. R. xxxi.). Other miracles of the same kind are credited to him. He was especially lauded by his Babylonian compatriots. Simeon ben Laḳish names him after the two other Babylonians, Ezra and Hillel, who came to Palestine to restore the study of the Torah (Suk. 20a). However exaggerated this assertion may be, Ḥiyya was certainly very active in the promotion of learning in Palestine. He founded schools for children and often acted as instructor. It is related that when Ḥanina boasted that he could reconstruct the Torah by logic should it be lost, Ḥiyya said: "To prevent such a loss I proceed in the following way: I cultivate flax, spin thread, twist ropes, and prepare traps by means of which I catch deer. The flesh of these I distribute among poor orphans, and I use the hides to make parchment, on which I write the Torah. Provided with this I go to places where there are no teachers, and instruct the children" (Ket. 103b).

Ḥiyya's activity in the field of the Halakah was very extensive. To him and his pupil Hoshea is due the redaction of the traditional halakot which had not been included by Judah in the Mishnah. These halakot are known under the various names of "Baraitot de-Rabbi Ḥiyya," "Mishnat de-Rabbi Ḥiyya," and "Mishnayot Gedolot." Some of them are introduced in the Talmud with the words "Tane Rabbi Ḥiyya," and are considered the only correct version of the halakot omitted by Judah (Ḥul. 141a). Ḥiyya was the author of original halakot also, which he derived from the Mishnah by the hermeneutic rules. Although very conservative, he opposed the issuing of new prohibitions. "Make not the fence higher than the Law itself, lest it should fall and destroy the plants" (Gen. R. xix.). Ḥiyya seems to have contributed to the Sifra the redaction of the tannaitic midrash to Leviticus, where his sayings are often quoted. From the time of Sherira Gaon, Ḥiyya was generally regarded as the author of the Tosefta; but the supposition has been rejected on very strong grounds by modern scholars (see Tosefta). Ḥiyya's activity extended also to the Haggadah. Sayings of his, and his controversies with Simeon ben Ḥalafta, Bar Ḳappara, Jonathan, and Jannai are frequently quoted in haggadic literature. The dawn is for Ḥiyya the symbol of the deliverance of Israel. "As the dawn spreads gradually, so will the deliverance of Israel come gradually" (Yer. Ber. 3b).

His Haggadot.

As a Babylonian Ḥiyya hated the Romans, whom he compared to obnoxious insects (Tan., Wayesheb, 17). "God foresaw that the Jews could not bear the yoke of the Romans, and therefore designed Babylonia for their place of residence" (Pes. 86a). Ḥiyya's views on some Biblical books are noteworthy. According to him the Book of Job is not the work of a Jew (Yer. Soṭah 15a); and Solomon wrote his works in his old age (Cant. R. 2b). Ḥiyya's haggadot are particularly rich in thoughts concerning the moral life and the relations of human beings to one another.

Ḥiyya was a physician of high repute. The Talmud quotes many of his medical utterances, among which is a description of the development of the embryo in the womb which betrays considerable medical knowledge (Nid. 25a). Ḥiyya is represented in the Talmud as having been a model of virtue and goodness; his house is said to have been always open to the poor (Shab. 151b); even his death is connected by legend with an act of charity. "The angel of death," recites a haggadah, "could not approach him. The angel therefore disguised himself as a poor man and knocked at Ḥiyya's door. Ḥiyya, as usual, gave the order to bring bread for the poor. Then the angel said: 'Thou hast compassion on the poor; why not have pity upon me? Give me thy life and spare me the trouble of coming so many times.' Then Ḥiyya gave himself up" (M. Ḳ. 28a). At his death, relates another haggadah, stones of fire fell from the skies (M. Ḳ. 25b).

S. I. Br.

ḤIYYA BAR ADDA: Palestinian amora of the first half of the third century; son of the sister of Bar Ḳappara; pupil of Simeon ben Laḳish. His name is connected with several halakot (Yer. Hor. iii. 5), and he handed down a number of halakic opinions in the names of Aḥa, Ḥanina, and Johanan (Yer. Ber. vi. 1; Sanh. iv.). He disputed with his uncle Bar Ḳappara concerning the explanation of the word הטיבו (Deut. v. 25), which he rendered "they embellished" (Lev. R. xxxii.; Cant. R. ii. 14). Ḥiyya died young, and in the funeral sermon pronounced by Simeon ben Laḳish he is compared, in allusion to the verse, "My beloved [God] is gone down into His garden, to the bed of spices, to feed in the garden, and to gather lilies" (Cant. R. vi. 2), to a lily which the gardener is desirous to gather.

Bibliography: Heilprin, *Seder ha-Dorot*, ii. 132; Bacher, *Ag. Pal. Amor.* i. 341, 401.

S. I. Br.

ḤIYYA AL-DAUDI: Liturgical poet; died in Castile in 1154; descendant of the Babylonian nasi Hezekiah. Many seliḥot bearing the signature of Ḥiyya (though whether all are by the subject of this article is uncertain) are found in the Maḥzors of Tlemçen, Oran, Avignon, and in the Sephardic Maḥzor. In the seliḥah דלתיך הלילה לשבי פשע the surname "Al-Daudi" is added to the name of Ḥiyya. Two of Ḥiyya al-Daudi's seliḥot have been published in "Betulat Bat Yehudah" by S. D. Luzzatto, who mistook the author for Ḥiyya ha-Ma'arabi, the collector of Judah ha-Levi's poems.

Bibliography: Zunz, *S. P.* p. 218; Luzzatto, *Betulat Bat Yehudah*, p. 7; Steinschneider, *Cat. Bodl.* col. 840; Landshuth, *'Ammude ha-'Abodah*, p. 64; J. Derenbourg, in Geiger's *Jüd. Zeit.* v. 405.

G. I. Br.

ḤIYYA GABRIEL: Turkish Talmudist; lived at Safed in the seventeenth century. Wolf ("Bibl. Hebr." iii., No. 595) and Fürst ("Bibl. Jud." i. 173) call him "Ḥiyya ben Gabriel." He was the author of a work called "Seder Zemannim," a calendar for the years 5435-64 = 1675-1704 (Venice, 1675).

Bibliography: Steinschneider, *Cat. Bodl.* col. 841.
D. M. Sel.

ḤIYYA B. GAMMADA: Palestinian amora of the fourth generation (3d and 4th cent.). His principal teacher was Jose b. Saul, in whose name Ḥiyya transmitted several halakot (M. K. 22a; R. H. 24a, 30a); but he was also a pupil of Jose b. Ḥanina (Soṭah 7b) and of Assi (Meg. 31b). He transmitted halakot in the name of the council ("ḥaburah") of the last of the Tannaim (Ḥul. 30a; Shab. 3a; Pes. 64a, 73b). The following haggadic sentence Ḥiyya transmitted in the name of Jose b. Saul: "At the death of a just man the angels proclaim that one who is righteous has come, and God answers, 'Let the other ẓaddiḳim come out to meet him'" (Ket. 104a). A sentence of the same nature and ascribed to Eleazar b. Pedat (*ib.*) is attributed to R. Ḥiyya ha-Gadol in Pesiḳ. R. 2 (ed. Friedmann, p. 5, a, b). Bacher accordingly suggests that the name is to be amended into "Ḥiyya b. Gammada." Ḥiyya's love for Palestine was so great that he rolled in the dust of that country (Ket. 112b).

Bibliography: Bacher, *Ag. Pal. Amor.* ii. 85; Heilprin, *Seder ha-Dorot*, ii.
S. M. Sel.

ḤIYYA ḲARA: Palestinian scholar of the third and fourth centuries. He was a pupil of Samuel b. Naḥman, in whose name he asserted that since the destruction of the Temple neither good wine nor white earthenware could be obtained (Lam. R. iv. 5). The name "Ḳara" was given him on account of his familiarity with the Bible (comp. "Mattenot Kehunah" on Lam. R. iv. 5).

Bibliography: Heilprin, *Seder ha-Dorot*, ii.
S. M. Sel.

ḤIYYA, MEÏR BEN DAVID: Italian Talmudist of the sixteenth century. He was dayyan of Venice 1510-20, during the rabbinate of Benedet ben Eliezer Acsildor, who esteemed him highly. Like Benedet, he took part in the dispute between Jacob Polak and Abraham Minz, being mentioned third in the list of Italian rabbis who expressed their views concerning this dispute. After 1520 he was employed in the printing establishment of Daniel Bomberg, being one of the editors of the Talmud. He rendered great services as corrector, editing among other works Israel Isserlein's "Terumat ha-Deshen" and Joseph Colon's responsa. His own responsa are printed in Benjamin Ze'eb's responsa collection.

Bibliography: Steinschneider, *Cat. Bodl.* cols. 632, 2865; Mose, *Antologia Israelitica*, v. 307; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 57; Zunz, *Z. G.* p. 10; Eisenstadt-Wiener, *Da'at Ḳedoshim*, p. 60.
K. A. Pe.

ḤIYYA B. MERIA (once, in Yer. Sheb. vi. 1, **MEDIA**)**:** Palestinian amora of the fourth generation (3d and 4th cent.). Ḥiyya is mentioned only in the Jerusalem Talmud; he was the pupil of R. Jonah and R. Jose (Yer. Sheb. vi. 1; Yer. Ket. ix. 1; Yer. Sanh. i. 2; *et al.*). Ḥiyya transmitted, in the name of R. Levi, the following haggadah: "Psalm lxii. 10 proves that a man's wife is chosen for him before his birth" (Pesiḳ. xxiii. 153b). This haggadah reappears in Lev. R. xxix. 7, as transmitted by Ḥiyya b. Abba in the name of R. Levi, but this is evidently a copyist's mistake. A certain Rabbi b. Meria who transmitted a haggadah (Pesiḳ. R. 40 [ed. Friedmann, p. 172a]) is supposed by Buber (note 58 to Pesiḳ. 153b) to be the same as R. Ḥiyya b. Meria.

Bibliography: Bacher, *Ag. Pal. Amor.* ii. 397; Heilprin, *Seder ha-Dorot*, ii.
S. M. Sel.

ḤIYYA ROFE: Rabbi of Safed; died in 1620. Having studied Talmud under Solomon Sagis and Cabala under Ḥayyim Vital, Ḥiyya was ordained in accordance with the old system ("semikah") re-introduced into Palestine by Jacob Berab. In 1612 Ḥiyya gave his approbation to Issachar Baer Eulenburg's "Be'er Sheba'." Most of Ḥiyya's works have been lost; the remainder were published by his son, Meïr Rofe, under the title "Ma'aseh Ḥiyya" (Venice, 1652), containing novellæ on several of the Talmudic treatises, and twenty-seven responsa. These were revised by Moses Zacuto, who added a preface.

Bibliography: Conforte, *Ḳore ha-Dorot*, pp. 41b *et seq.*; Michael, *Or ha-Ḥayyim*, No. 840.
G. M. Sel.

ḤIYYA BEN SOLOMON ḤABIB: Spanish Talmudist of the thirteenth and fourteenth centuries; a native of Barcelona. He was a contemporary of Solomon Adret, but the assertion of Gross that Ḥiyya was Adret's pupil is without foundation, for Ḥiyya never refers to Adret as his master. Ḥiyya was the author of a work entitled "Sefer ha-Shulḥan," a treatise, in four parts, on matters of ritual. Gross conjectures that it is this work that is quoted by Isaac b. Sheshet in No. 40 of his responsa. See Gershon ben Solomon ben Asher.

Bibliography: Gross, *Gallia Judaica*, p. 100; Neubauer, *Cat. Bodl. Hebr. MSS.* Nos. 665, 1; 904, 2.
S. M. Sel.

HLADIK, ABRAHAM: Bohemian Talmudist; flourished about 1230. The name indicates a Czech origin, an assumption supported by the fact that in his commentary on the seliḥot he often explains Hebrew by means of Bohemian words. He seems, however, to have lived in France, according to Zunz, and was the teacher of Hezekiah b. Jacob of Magdeburg. He is often quoted in the Budapest and Vienna manuscripts of the "Mordechai ben Hillel" as well as in a manuscript of De Rossi, in the last under the name of "Abraham Hadlik." In addition to these Talmudic decisions of Abraham there have been preserved minhagim by him for the whole year (Codex De Rossi, Parma, No 506) and a seliḥah commentary in manuscript (Munich, No. 346). Perles attempts to identify Abraham Hladik with Abraham b. Azriel, author of "Arugat ha-Bosem."

Bibliography: Zunz, *Ritus*, pp. 22, 124, note 2; Steinschneider, *Cat. Munich*, p. 163; Samuel Kohn, *Mordechai ben Hillel*, pp. 28, 158, note; Perles, in *Monatsschrift*, xxvi. 362.
S. A. Pe.

HOBAB (חובב): Name occurring twice in the Bible, and borne either by Moses' father-in-law or by his brother-in-law. In the first passage (Num. x. 29), Hobab is said to have been the son of Raguel (R. V. "Reuel"), the Midianite, Moses' father-in-law (comp. Ex. ii. 18), while in Judges iv. 11 Hobab himself is called Moses' father-in-law. The Jewish commentators, as Rashi and Naḥmanides, are inclined to agree with the latter passage. They explain (Ex. ii. 18) that Raguel, who was Zipporah's grandfather, was called "father" by his granddaughters. Ibn Ezra, however, favored the interpretation of "ḥoten Mosheh" (Judges iv. 11) as "Moses' brother-in-law." Hobab, whoever he was, seems to have been well acquainted with the desert, for Moses requested him to stay with the Israelites and serve them as their "eyes" (Num. *l. c.*).

E. G. H. M. SEL.

HOBAH (חובה = "hiding-place"): Place to the north of Damascus to which Abraham pursued the defeated army of Chedorlaomer (Gen. xiv. 15). Wetzstein identified the Biblical Hobah with the modern Ḥobah, 60 miles north of Damascus (Delitzsch, "Genesis," pp. 561 *et seq.*). But the Jews of Damascus affirm that the village of Jobar, not far from Damascus, is the Hobah of the Bible. Rashi, following pseudo-Jonathan, takes "Hobah" as a substitution for "Dan," where Jeroboam had erected a golden calf as an object of worship (I Kings xii. 29), interpreting "Hobah" as "the sinful place." The Targum of Jerusalem renders it by "'Awweta."

E. G. H. M. SEL.

HÖCHHEIMER (HÖCHHEIM, HOCHHEIMER, HECHIM): Bavarian family, named after its original home in Hochheim. The following are its more important members:

Elias ben Ḥayyim Cohen Höchheimer: Astronomer of the eighteenth century; born in Hochheim; died in Amsterdam, whither he had removed after living a long time in Hildburghausen. He was the author of: "Shebile di-Reki'a," on trigonometry and astronomy (2 vols., Prague, 1784); "Sefer Yalde ha-Zeman," a commentary on Jedaiah Bedersi's "Beḥinat ha-'Olam" (*ib.* 1786); and two German text-books on arithmetic.

BIBLIOGRAPHY: *Allg. Zeit. des Jud.* xliv. 652; Fürst, *Bibl. Jud.* i. 367, 402 (where Elias Hechim and Elias Höchheimer are treated as two different authors).

D. M. K.

Henry (Ḥayyim) Hochheimer: American rabbi; born Oct. 3, 1818, at Ansbach, Middle Franconia. His father, Isaac Hochheimer, succeeded his maternal grandfather, Meyer Ellinger, as rabbi at Ichenhausen, whither, at the age of ten, the boy removed with his parents. Three years later he returned to Ansbach to pursue secular studies at the Lateinschule, and Hebrew studies under his paternal grandfather, Moses HÖCHHEIMER.

In 1835 he entered the gymnasium at Augsburg, and in 1839 the University of Munich, graduating in 1844. Meanwhile his Hebrew studies were continued under Rabbis Guggenheimer, in Kriegshaber, near Augsburg, and Hirsch Aub, in Munich. From the latter he received his rabbinical diploma in 1845. From 1844 to 1849 he acted as his father's assistant in Ichenhausen. Political addresses and articles in "Die Zeitung für die Elegante Welt" and "Der Grenzbote" during 1848-49 caused warrants to be issued against him, and he had to flee the country. Hochheimer emigrated to the United States, and on his arrival (Oct. 3, 1849) in New York he was invited to become the rabbi of the Nidche Israel congregation, the oldest in Baltimore. There he officiated until Oct., 1859, when he accepted the rabbinate of Fell's Point Hebrew Friendship Congregation. After an incumbency of thirty-three years he retired from active life in 1892. Since 1841, when he published an article in Fürst's "Orient," he has been a contributor to the Jewish press, especially to "Die Deborah" (Cincinnati), and to the "Allg. Zeit. des Jud." under Philippson's editorship. Several sermons by him appeared in Kayserling's "Bibliothek Jüdischer Kanzelredner"; and many of his addresses have been published in pamphlet form. His best-known contribution to general journalistic literature is "Die Napoleoniden in Amerika," which appeared in "Die Europa" (Stuttgart). He collaborated with Benjamin Szold and Marcus Jastrow in the revision of the prayer-book "'Abodat Yisrael" (1871).

A. H. S.

Isaac Höchheimer: Rabbi; born in Ansbach 1790; died at Ichenhausen 1861; son of Moses ben Ḥayyim Cohen Höchheimer. He was rabbi of Ichenhausen from 1828 until his death.

D. M. K.

Lewis Höchheimer: American attorney; born Aug. 1, 1853, at Baltimore, Md.; son of Rabbi Henry HOCHHEIMER. A graduate from the law department of the University of Maryland, he now practises law in Baltimore. He is actively identified with child-saving and prison work, and is the author of two text-books, "Custody of Infants" (1891) and "Digest of Criminal Procedure in Maryland" (1892), and of occasional magazine articles on subjects relating to legal and social science.

A. H. S.

Moses ben Ḥayyim Cohen Höchheimer: Grammarian; born at Hochheim; died at an advanced age, Feb. 10, 1835, at Ansbach; brother of Elias Cohen. He was dayyan in Fürth, and from 1793 till his death district rabbi of Ansbach. He was the author of "Sefer Safah Berurah," a Hebrew grammar (Fürth, 1790), and of a commentary on David Ḳimḥi's "Miklol" (*ib.* 1793). A number of his Hebrew poems appeared in different periodicals.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 367; Steinschneider, *Bibliographisches Handbuch*, p. 60, who follows Fürst in citing Höchheimer as "Hechim" (Hechingen); Geiger, *Wiss. Zeit. Jüd. Theol.* i. 126.

D. M. K.

Simon Höchheimer: Physician and author; born in Hochheim toward the middle of the eighteenth century; died at Fürth after 1822. He was a very learned man and traveled extensively; but he led an adventurous life. He lived for some years in Berlin, where he associated with Moses Mendelssohn and his friends. On his departure from that city in the summer of 1785, Mendelssohn, Marcus Herz, Marcus Eliezer Bloch, David Friedländer, and several of Mendelssohn's Christian friends gave him their autographs. From Berlin he went to Munich, and thence to Frankfort-on-the-Main. In 1791 he was living in Freiburg-im-Breisgau, and in 1793 in Vienna. On account of his erudition he was exempted from the personal tax. At the time of his death he was physician to the Jewish hospital at Fürth.

Höchheimer was the author of the following works: "Ueber Moses Mendelssohns Tod," Vienna and Leipsic, 1786; "Bestimmte Bedeutung der Wörter Fanatismus, Enthusiasmus, und Schwärmerei," Vienna, 1786; "Systematisch-Theoretisch-Praktische Abhandlung über Krankheiten aus Schwäche und deren Behandlung," Frankfort-on-the-Main, 1803; "Der Spiegel für Israeliten, ein Gegenstück zu Unserem Verkehr," Nuremberg, 1817; "Unterweisung Wie Man die Jugend Unterrichten, Erwachsene Belehren, Menschen Glücklich Machen Kann," Fürth, 1822; Hebrew ed., *ib.* 1825.

D. M. K.

HOCHMEISTER: Name used in German medieval documents for "rabbi" or "grand rabbi." It seems to have been first used in the Palatinate in the fourteenth century. In 1364 Sussmann, the "Hochmeister" of Ratisbon, received permission to open a school in Amberg. The most important incident in connection with the name was the emperor Rupert's appointment (1406) of Rabbi Israel of Krems as "Hochmeister" of the Jews of the Holy Roman Empire. He failed, however, to obtain the acquiescence of the Jews. The emperor's intention was to establish a supreme judicial authority for the Jews of Germany, who formed a separate body, the motive being to strengthen his claim to the exclusive right of taxing the Jews of the empire, which right at that time was contested by the territorial lords. This title is hardly different from Bishop of the Jews, or "Judenmeister," or similar equivalents for "rabbi."

Bibliography: Grätz, *Gesch.* 3d ed., viii. 101-104 (where the older sources, notably Wiener's *Regesten*, are quoted); Löwenstein, *Gesch. der Juden in der Kurpfalz*, p. 5, Frankfort-on-the-Main, 1895; Frankl-Grün, *Gesch. der Juden in Kremsier*, i. 14 *et seq.*, Breslau, 1896; *Ben Chananja*, v. 17; *Allg. Zeit. des Jud.* 1862, pp. 194 *et seq.*

D.

HOCHMUTH, ABRAHAM: Hungarian rabbi; born at Bán, Hungary, Dec. 14, 1816; died at Veszprim June 10, 1889. While attending the University of Prague he pursued the study of the Talmud with S. L. Rapoport. In 1846 he was appointed principal of the newly founded Jewish school at Miskolcz, where in 1850 he opened a private school. In 1852 he was called to the rabbinate of Kula; in 1860, to that of Veszprim. He was a prominent member of the Hungarian Jewish Congress and, later, of the board of the rabbinical seminary in Budapest. He was a contributor to "Ben Chananja," "Neuzeit," and other periodicals. His works include: "Die Jüdische Schule in Ungarn, Wie Sie Ist und Wie Sie Sein Soll," Miskolcz, 1851; "Leopold Löw als Theologe, Historiker und Publicist, Gewürdigt," Leipsic, 1871; "Gotteserkenntniss und Gottesverehrung auf Grundlage der Heiligen Schrift und Späterer Quellen, Bearbeitet als Lehr- und Handbuch zum Religionsunterricht" (also in Hungarian), Budapest, 1882.

HOCHSCHULE, BERLIN. See Lehranstalt für die Wissenschaft des Judenthums.

HOCHSTÄDTER, BENJAMIN: German rabbi; born 1810 at Hürben, Bavaria; died at Frankfort-on-the-Main Dec. 8, 1888. As teacher and preacher at Heddernheim, near Frankfort (1833-38), and at Wiesbaden (1838-45), and as rabbi at Langenschwalbach and at Ems, he exercised a great influence upon Jewish affairs in the duchy of Nassau. It was chiefly at his suggestion that by the new regulations of the Jewish cult (Feb. 3, 1843) four district rabbinates were organized; in 1860, when Treuenfels of Weilburg was elected rabbi of Stettin, these were reduced to three. In 1846 Hochstädter established a teachers' seminary, which by order of the government received an annual subsidy from the general Jewish fund. At Wiesbaden Hochstädter had already prepared some young men for the teacher's vocation, among whom was Seligman Baer of Biebrich. In 1851 Ems became the seat of his rabbinate and of the seminary. The latter existed until 1866, when Nassau was annexed to Prussia. Hochstädter remained at his post until 1883, when he retired to Frankfort. He took an active part in the Jewish synods of Leipsic and Augsburg.

Hochstädter wrote scientific articles for Geiger's "Wiss. Zeit. Jüd. Theol." and other periodicals. Besides some sermons, he published: "Ḳol Omer Ḳera," a Hebrew phonetic primer, Wiesbaden, 1839; "Die Glaubens- und Pflichtenlehre des Judenthums," Ems, 1862; "Sefer ha-Meforash, Religionsphilosophische Erläuterungen zur Glaubens- und Pflichtenlehre," *ib.* 1864; "Biblische und Talmudische Erzählungen für die Israelitische Schuljugend," *ib.* 1865; "Zweistimmige Israelitische Sabbat- und Festlieder für Kleinere Synagogengemeinden."

Bibliography: *Allg. Zeit. des Jud.* 1888, p. 813; Lippe, *Bibliographisches Lexicon*, Vienna, 1881; Schwab, *Répertoire*, p. 172.

HOCHWART, LOTHAR VON. See Frankl, Ludwig August, Ritter von Hochwart.

HOCK, SIMON: Austrian writer; born at Prague Nov. 27, 1815; died at Vienna Oct. 22, 1887. For several decades he gave his spare time to the collection of material relating to the history of the Jews in Prague. The accumulated material was edited and published by David Kaufmann in 1892, under the title "Die Familien Prags nach den Epitaphien des Alten Jüdischen Friedhofes in Prag." Hock is also known as the author of the biographical sketches in Koppelmann Lieben's "Gal 'Ed," 1856.

Bibliography: Kaufmann's preface to Hock, *Die Familien Prags*, Presburg, 1892.

HODU. See Hallel.

HOFFA, JOSEPH: German philologist and archeologist; born Aug. 18, 1803, at Cassel; died about 1843. His father was paymaster of the army. In 1816 he entered the lyceum at Cassel, and in 1821 went to the University of Marburg, where he devoted himself chiefly to philology and archeology, continuing these studies for a year at Heidelberg. Forced by poverty to leave the university, he went, with letters of introduction from the historian Schlosser, to Frankfort-on-the-Main. Here he taught for two years at the institute of Dr. Weil, and then acted as private tutor. He took his Ph.D. degree in 1823 with the dissertation "De Senatu Romano," part i. In the fall of 1827 he obtained the "venia legendi."

During his short life Hoffa displayed a many-sided literary activity, being equally at home in classical, French, and English literature. He published chiefly manuals and text-books, including the following: "Des C. Plinius' Lobrede auf den Kaiser Traian," from the Latin, with introduction and notes, Marburg, 1834; "Qu. Ciceronis de Petitione Consulatus ad M. Tullium Fratrem Liber . . . ," Leipsic, 1837; Isocrates' "Panegyricus," from the Greek, with notes, Marburg, 1838; Cicero, "Cato der Aeltere, oder Abhandlung vom Greisenalter," from the Latin, with introduction and notes, 7th ed., Cassel, 1841; "Handbuch der Römischen Antiquitäten Nebst einer Kurzen Römischen Literaturgesch." from the Danish of C. F. Bojesen, Giessen, 1841; "Hülfsbuch zum Erlernen der Englischen Sprache . . . ," Marburg, 1841; "Ciceronis Epistolarum ad Q. Fratrem, l. iii. . . .," with notes, Heidelberg, 1843.

S. S. FRA.

HOFFER, LEOPOLD: Journalist and chess editor; born 1842, in Budapest. He removed to France about 1866, and began to play chess in Paris. In 1870 he settled in London, where he has since resided. Hoffer has become widely known as a writer on chess, and has been active in the organization of some of the more important international tournaments held of late years in England, notably that at Hastings in 1895.

From 1879 to 1888 he was coeditor with Zukertort of "The Chess Monthly," and on Zukertort's death he became its sole editor. For some years he has been the chess editor of the London papers "The Field" and "The Standard." He is one of the leading analysts of the game.

Hoffer was one of the founders of the Pester Schachklub, and founder and honorary secretary of the British Chess Association.

J. A. P.

HOFFMAN, CHARLES ISAIAH: American editor and communal worker; born at Philadelphia, Pa., Jan. 3, 1864; educated at the University of Pennsylvania, at that of Cambridge, England, and at the Jewish Theological Seminary of America. Hoffman was the editor and one of the founders of "The Jewish Exponent" (Philadelphia); president of the Beth Israel congregation of Philadelphia; president of District No. 3, I.O.B.B.; and was one of the founders and for fifteen years the secretary of the Association of Jewish Immigrants, at Philadelphia.

A. I. G. D.

HOFFMANN, DAVID: Rector of the Rabbinical Seminary at Berlin; born at Verbó, Hungary, Nov. 24, 1843. After attending various yeshibot in his native town he entered the lyceum at Presburg, from which he graduated in 1865. He then studied philosophy, history, and Oriental languages at Vienna and Berlin, taking his doctor's degree in 1871. Soon afterward he accepted the appointment of teacher at the Jewish Realschule at Frankfort-on-the-Main. In October, 1873, he became instructor in the Rabbinical Seminary at Berlin, founded by Israel Hildesheimer, and on the death of the latter succeeded him as rector (1899). He has written: "Mar Samuel," Leipsic, 1873; "Abhandlungen über die Pentateuchischen Gesetze," Berlin, 1878; "Der Shulchan-Aruch," Berlin, 1885 (2d ed., enlarged, 1895); "Collectaneen aus einer Mechilta zu Deuteronomium," Berlin, 1890; "Die Mischna-Ordnung Nesikin, Uebersetzt und Erklärt, mit Einleitung," Berlin, 1893-97. He published the following essays in the programs of the Rabbinical Seminary: "Die Zeit der Omerschwingung und das Wochenfest," 1874; "Der Oberste Gerichtshof in der Stadt des Heiligthums," 1878; "Die Erste Mischna und die Controversen der Tannaim," 1882; "Zur Einleitung in die Halachischen Midraschim," 1888; "Neue Collectaneen aus einer Mechilta zu Deuteronomium," 1897. Of his commentary to the Pentateuch the first volume (Leviticus) has been published (1904). He edited the "Magazin für die Wissenschaft des Judenthums" (with Dr. A. Berliner), 18 vols., Berlin, 1876-93. From 1884 to 1895 he edited the "Israelitische Monatsschrift," the literary supplement to the "Jüdische Presse." Hoffmann has contributed many articles to these and other periodicals, among which may be mentioned "Die Neueste (Wellhausen'sche) Hypothese über den Pentateuchischen Priestercodex," in Berliner's "Magazin," 1879 and 1880, and "Die Mechilta des R. Simon ben Jochai," in "Ha-Peles," i.-iv. (1900-03).

HOFFNUNG, DIE. See PERIODICALS.

HOFMANN, ISAAK LÖW, EDLER VON HOFMANNSTHAL: Austrian merchant; born June 10, 1759, at Prostiebor, near Kladrau, in the district of Pilsen, Bohemia; died at Vienna Dec. 12, 1849. During the famine in Ansbach in the middle of the eighteenth century, Hofmann's parents had emigrated from Pretzendorf, near Bayreuth, to Bohemia, where they lived in very poor circumstances. His early training he received at home, and from his thirteenth year he studied at Prague as a "baḥur" (Talmudic scholar) under Rabbi Abraham Plohn.

After completing his studies he entered as teacher the house of Joel Baruch, a rich merchant who farmed the tobacco monopoly for the Austrian government. Besides giving instruction to the children, Hofmann took charge of the books of his employer. When in 1788 Baruch moved to Vienna and opened a wholesale house there, Hofmann was appointed manager of the entire business. Having received the same year a permit from the Austrian government to do business in Vienna, he chose the name "Isaak Löw Hofmann." On the death of Baruch he was made a partner in, and in 1794 became sole member of, the firm, which bore the name "Hofmann und Löwinger." Becoming interested in 1796 in the manufacture of silk, he was one of the first to farm the silk monopoly from the Hungarian government (1802), a privilege which his house retained for nearly half a century. At his instigation his son **Emanuel** wrote a pamphlet, "Einleitung zur Seidenzucht," of which more than 16,000 copies were distributed. Hofmann was very active in business, and succeeded in making his firm one of the leading houses of Austria-Hungary.

Hofmann took great interest in the Jewish community of Vienna, being president in 1806 and representative in 1812, which latter office he held until his death. In 1822 he founded the institution for the poor ("Armenanstalt"), which is still flourishing. He received many honors, and was knighted by the Emperor of Austria in 1835.

S. F. T. H.

HOGA, STANISLAUS: English convert to Christianity; lived in London in the nineteenth century. He published "Songs of Zion," a selection of English and German hymns translated into Hebrew (1834; 2d ed., with additions, 1842). Hoga also wrote, in Hebrew, "A Grammar of the English Language for the Use of Hebrews" (London, 1840), and "The Controversy of Zion: a Meditation on Judaism and Christianity" (1845). He translated into Hebrew Bunyan's "Pilgrim's Progress" (London, 1844; 2d ed., 1851–52), and McCaul's "Old Paths" (1851). It is said that he ultimately reverted to Judaism.

J. S. Le.

HOHAM: King of Hebron in the time of Joshua. He was one of the five kings who made war on the inhabitants of Gibeon to punish them for making peace with Israel (Josh. x. 3–5). Joshua went to the aid of the Gibeonites, and the five kings, defeated, hid in a cavern. They were put to death by order of Joshua, and hanged on trees till evening (Josh. x. 16–27).

E. G. H. M. Sel.

HOHE RABBI LÖW, DER. See Judah Löw b. Bezaleel.

HOHENEMS: Town in Vorarlberg, Austria, between Tyrol and Lake Constance. In 1890 it had a total population of 3,988, of whom 118 were Jews. In the period of its greatest prosperity (1862) the community numbered 564 souls. The town belonged originally to the sovereign ("reichsunmittelbare") counts of Hohenems, and was ceded to Austria in 1765. In 1617 the Jews who were driven from Burgau found shelter in Hohenems, and each family was obliged to pay for protection an annual sum of ten florins together with two fattened geese. Later the protection-fee was increased. In 1676 the Jews were expelled from Hohenems, but were readmitted in 1688. Some of the exiles settled in the neighboring Austrian village of Sulz, where they formed a small community until 1744, when they were driven out. Thereupon they also returned to Hohenems. A descendant of one of the families which came back from Sulz was the celebrated cantor, Prof. Solomon Sulzer of Vienna; the house at Hohenems in which he was born is marked by a slab bearing an appropriate inscription. In 1765 Hohenems fell as a fief to the house of Austria, which issued a writ of protection for the Jews in 1769. This contained regulations restricting their trade and acquisition of real estate, and fixed the annual fee for protection at fifteen florins for each family. During the period of Bavarian control in Vorarlberg (1806–14) the Jews of Hohenems adopted German family names in accordance with the edict of 1813.

From 1849 to 1878 the Jews of Hohenems formed a politically independent community; since that time they have formed a religious community, with a constitution confirmed by the authorities. Theirs is the only congregation in Tyrol and Vorarlberg, and it comprises all the Jews living in both provinces. The Jewish congregation of Hohenems has a large synagogue (founded 1772), a German school (founded 1785), a poorhouse (Rosenthal Foundation: 1871), a cemetery (1617), and several charitable societies.

The religious tendencies of the community are liberal. It has had several prominent rabbis, among them being Löb and Samuel Ullmann, Abraham Kohn, and Daniel Ehrmann.

D. A. Tä.

HOHENZOLLERN: Two principalities, Hohenzollern-Hechingen and Hohenzollern-Sigmaringen, named from the castle of Zollern, in Swabia; formerly sovereign states, but since 1849 incorporated into the kingdom of Prussia. In a total population of 66,783 there are 576 Jews.

Whereas in the Middle Ages the Frankish line, that of the Burgrave of Nuremberg, had a great many Jews in its territory, under the house of Swabia, which was divided in the seventeenth century into Hohenzollern-Hechingen and Hohenzollern-Sigmaringen, they were found only in isolated cases. In 1701 Prince Frederick William I. (1671–1732) took six Jewish families under his protection, and later gave them a burying-ground "near the gallows." His successor, Frederick Ludwig (1732–1750) was tolerant toward the Jews; but Joseph William (1750–1798), at the wish of his bride, Princess Marie of Spain, proposed to drive them out. This measure, however, was prevented by the sudden death of the princess. The Jews then, through letters of protection, received permission at various times to settle in Hohenzollern; and in 1754 for the first time a small Jewish colony was formed in the Friedrichstrasse of Hechingen. The Jewish community of that town was organized in the following year.

The condition of the Jews soon improved through the influence of Frau Kaulla, daughter of President Raphael of Buchau who had removed to Hechingen from Haigerloch in 1754, and through the efforts of her brother and her son-in-law, Jacob Kaulla, who induced Prince Hermann Frederick Otto (1798–1810) to treat the Jews kindly. The latter could then settle in the principality without difficulty; so that in 1842 their number had increased to 809.

Emancipation.

The conditions in Hohenzollern-Sigmaringen were similar to those in Hohenzollern-Hechingen; the Jews suffered there also at first from prejudices and restrictions, which disappeared under liberal princes. Indeed, the legal position of the Jews as citizens was established there Aug. 9, 1837, whereas in Hechingen it was not established until 1843.

The legal status of the Jewish community as then determined has been preserved under Prussian rule. The community forms a department of the public administration; the Jewish population is divided into "church" communities which are administered by a board. The rabbis are state officials; the religious teachers are examined by the state; and the state holds the right of supervision.

Among the rabbis who have held office in Hohenzollern may be mentioned the following:

Rabbis.

Nathanael Weil, rabbi of the Schwarzwald district; resided in Mühringen from 1745 to 1751, when he was called to Baden-Durlach. Simon Flehingen, who was afterward rabbi at Darmstadt. David Dispeck (1770), afterward rabbi at Metz. Löb Aach, stationed at Hechingen, and later rabbi over the Sigmaringen communities of Haigerloch and Dettensee, as well as director of the bet ha-midrash founded by the Kaulla family in 1803; he occupied the rabbinate until 1817. In 1830, after an interregnum, Dr. Samuel Mayer became district rabbi.

To-day (1903) the Prussian governmental district of Sigmaringen has only the following three communities: Dettensee (19 Jews, 2 ḥebra ḳaddishas, 1 school-fund), Haigerloch (274 Jews, 2 ḥebra ḳaddishas, and numerous benevolent societies), and Hechingen (rabbi, Felix Wolff; 192 Jews, 1 public school, 1 ḥebra ḳaddisha for men and women, and several benevolent institutions).

ḤOL HA-MO'ED. See Holy Days.

Early Training.

HOLDHEIM, SAMUEL: German rabbi and author; leader of the extreme wing of the Reform movement; born at Kempen, Posen, in 1806; died at Berlin Aug. 22, 1860. The son of rigidly Orthodox parents, Holdheim was early inducted into rabbinical literature according to the methods in vogue at the Talmudical yeshibot. Before he was able to speak German with even moderate correctness he had become a master of Talmudic disputatious argumentation, and his fame had traveled far beyond the limits of his native place. This reputation secured for him employment as teacher of young boys in private families both in Kempen and in larger cities of his native province. It was while thus engaged that he began to supplement his store of rabbinical knowledge by private studies in the secular and classical branches. Holdheim went to Prague and subsequently to Berlin to study philosophy and the humanities; and his keen intellect, combined with his eagerness to learn, made it possible for him to reach his goal in an incredibly short time, though the lack of preliminary systematic preparation left its imprint upon his mind, to a certain degree, to the last. Under Samuel Landau of Prague he continued also his Talmudical studies. While still a young man it became his ambition to occupy a rabbinical position in a larger German town; for he desired to show the older rabbis that secular and philosophical scholarship could well be harmonized with rabbinical erudition. But he had to wait until 1836, when, after several disappointments elsewhere, he was called as rabbi to Frankfort-on-the-Oder. Here he remained until 1840, encountering many difficulties, due both to the distrust of those within the congregation who suspected the piety of a rabbi able to speak grammatical German, and who was a graduate of a German university, and to the peculiar legislation which in Prussia under Frederick William III. regulated the status of the Jewish congregations.

Attitude Toward Government.

To bring about a change in this state of affairs was the purpose of Holdheim. In the preface to his "Gottesdienstliche Vorträge" (Frankfort-on-the-Oder, 1839) he appealed both to the government to accord the modern rabbinate the dignity due to it, and to the congregations to cease regarding the rabbi as an expert in Jewish casuistics mainly charged with the duty of answering "she'elot" (ritual questions) and inquiries concerning dietary laws. He insisted upon the recognition of the rabbi as preacher and teacher, who at the same time gives attention to the practical requirements of his office as the expert in Talmudical law.

While in Frankfort, Holdheim scrupulously decided every question according to the Halakah. In his pulpit discourses belonging to this period the intention is plain to steer clear of mere rationalistic moralizing, on the one hand, and dry legalizing and unscientific speculation (in the style of the old "derashah"), on the other. Holdheim thus deserves to be remembered as one of the pioneers in the field of modern Jewish Homiletics, who showed what use should be made of the Midrashim and other Jewish writings. He also repeatedly took pains to arouse his congregation to help carry out Geiger's and Philippson's project of founding a Jewish theological faculty. Judaism even then had ceased for Holdheim to be an end unto itself. He had begun to view it as a force in the larger life of humanity.

Progressive Views.

Holdheim now became a contributor to the Jewish periodicals (*e.g.*, Philippson's "Allgemeine Zeitung des Judenthums" and Jost's "Israelitische Annalen"). Among his articles two especially are worthy of note. One (in "Allg. Zeit. des Jud." ii., Nos. 4-9) discusses the essential principles of Judaism, arriving at the conclusion that Judaism has no binding dogmas; the other (Jost's "Annalen," 1839, Nos. 30-32) treats of the oath demanded of Jewish witnesses in criminal procedures. In the former of these papers Holdheim formulates the principle which is basic to his position and that of other Reformers: Judaism is not a religion of dead creed, but of living deeds. In the latter essay he utilizes his Talmudic juridical erudition to demonstrate the injustice done to the Jews by the Prussian courts. Another of his Frankfort publications bears the title "Der Religiöse Fortschritt im Deutschen Judenthume," Leipsic, 1840. The occasion which called forth this booklet was the controversy waging around Geiger's election as rabbi in Breslau. Holdheim pleads for progress, on the ground that at all times the Torah has been taught in accordance with the changing conditions of succeeding ages; but this progress he holds to be a gradual development, never a noisy opposition to recognized existing standards.

In the meantime Holdheim had received the degree of Ph.D. from the University of Leipsic, and had come to be looked upon by congregations as well as by Jewish scholars as a leader (see "Orient, Lit." 1840, No. 35 *et passim*; Jost's "Annalen," 1840, No. 39). Frankfort having become too restricted a sphere for him, he accepted a call to Schwerin as "Landesrabbiner," leaving Frankfort on Aug. 15, 1840.

Hamburg Temple Controversy.

In his new field Holdheim gave his first attention to the founding of schools for Jewish children. The Hamburg Temple controversy led him to take part in the discussion (see "Annalen," 1841, Nos. 45, 46). He hailed the new movement as an important augury of the quickening influences of modern views. He defended the Hamburg program as thoroughly founded in Judaism and in the very line of the Synagogue's own history, though he was not blind to its inconsistencies. Yet, even though authority of tradition was denied and recognized at one and the same time, the movement stood for the differentiation of the Jewish national from the Jewish religious elements. He also wrote an opinion ("Gutachten") on prayer-book of the Hamburg Temple (Hamburg, 1841), justifying its departures from the old forms by appealing to Talmudical precedents (Soṭah vii. 1; Ber. 10a, 27b, 33a; Maimonides, "Yad," Tefillah, xi. 9). Among the many rejoinders which Ḥakam Bernays' excommunication of this prayer-book evoked, Holdheim's deserves to be ranked as the most thorough and incisive.

Controversies.

Soon after, the most important work by Holdheim appeared under the title "Die Autonomie der Rabbinen," Schwerin and Berlin, 1843. In this he pleads for the abolition of the antiquated Jewish marriage and divorce regulations mainly on the ground that the Jews do not constitute a political nation. The Jewish religious institutions must be rigidly kept distinct from the Jewish national ones, to which latter belong the laws of marriage and divorce. The laws of the modern states are not in conflict with the principles of the Jewish religion; therefore these modern laws, and not the Jewish national laws of other days, should regulate Jewish marriages and divorces (see Samuel Hirsch in "Orient, Lit." 1843, No. 44). The importance of this book is attested by the stir it created among German Jewish communities, many members of which found in its attitude the solution of the problem how loyalty to Judaism could be combined with unqualified allegiance to their German nationality. Evidence of its incisive character is furnished also by the polemical literature that grew out of it. In these discussions such men as A. Bernstein, Mendel Hess, Samson Raphael Hirsch, Zacharias Frankel, Raphael Kirchheim, Leopold Zunz, Leopold Löw, and Adolf Jellinek took part.

The foundation of the Reform Verein in Frankfort-on-the-Main led to another agitation in German Jewry. Einhorn, Stein, Samuel Hirsch, and others deplored the rise of the Verein as a step toward schismatic separation. The obligatory character of the rite of circumcision was the focal issue discussed by no less than forty-one rabbis. Holdheim, in his "Ueber die Beschneidung Zunächst in Religiös-Dogmatischer Beziehung" (Schwerin and Berlin, 1844), takes the position that circumcision is not, like baptism, a sacrament of initiation, but is merely a command like any other. Nevertheless he classifies it not as a national but as a Jewish religious law, and pleads for its retention. Indeed, he was not unreservedly an adherent of the program of the Frankfort Reform Verein. This is clear from his "Vorträge über die Mosaische Religion für Denkende Israeliten" (Schwerin, 1844). While the Verein assumed unlimited possibilities of development, according to Holdheim the Mosaic element, after the elimination of the national, is eternal. Religion must be placed above all temporal needs and desires. To yield to the spirit of the age would make that spirit the supreme factor and lead to the production of a new nineteenth-century Talmud as little warranted as was the Talmud of the fifth century.

Mosaism as contained in the Bible is the continuous religion of Judaism. The belief in this revelation is the constant factor in all variants of Judaism. This is also the main thesis of his "Das Ceremonialgesetz im Messiasreich" (Schwerin and Berlin, 1845). He shows the inconsistency of Talmudism, which, assuming the inviolability of all Biblical laws, still recognizes the suspension of many. Hence the Talmudic insistence on the restoration of the Jewish state. Some ceremonial laws were meant to assure the holiness of the people; others to assure that of the priests. These ceremonies lose their meaning and are rendered obsolete the moment Israel no longer requires special protection for its monotheistic distinctness. As soon as all men have become ethical monotheists, Israel is nowhere in danger of losing its own monotheism; nor is its distinctness further required. Hence in the Messianic time the ceremonies will lose all binding or effective force. This book, too, called forth much discussion, in which Reform rabbis like Herzfeld took a stand opposed to Holdheim's. Answering some of his critics' objections, Holdheim insisted upon being recognized as an adherent of positive historic Judaism. The doctrines, religious and ethical, of Biblical Judaism are, he claimed, the positive contents of Judaism; and a truly historical reform must, for the sake of these positive doctrines, liberate Judaism from Talmudism.

Holdheim took part in the rabbinical conferences at Brunswick (1844), Frankfort-on-the-Main (1845), and Breslau (1846). The stand taken by the last with regard to the Sabbath did not satisfy him. He rightly held it to be a weak compromise. For him

At Rabbinical Conferences.

the essential element of a true Sabbath was not worship, but rest (see his "Offene Briefe über die Dritte Rabbinerversammlung," in "Israelit," 1846, Nos. 46-48). The debates at these conferences had touched on vital subjects. Holdheim felt prompted to treat some of these at greater length, and therefore in quick succession he published the following essays: "Was Lehrt das Rabbinische Judenthum über den Eid?" 1844; "Ueber Auflösbarkeit der Eide," Hamburg, 1845; "Vorschläge zu einer Zeitgemässen Reform der Jüdischen Ehegesetze," Schwerin, 1845: "Die Religiöse Stellung des Weiblichen Geschlechts im Talmudischen Judenthum," *ib.* 1846; "Prinzipien eines dem Gegenwärtigen Religionsbewusstsein Entsprechenden Cultus," 1846.

Holdheim, consulted among others when the Jüdische Reformgenossenschaft was founded in Berlin, was called to be its rabbi and preacher in 1847, delivering his inaugural discourse on Sept. 5. As leader of the Reformgenossenschaft he had a share in the editing of its prayer-book. Under him Sunday became the day of worship, and the "second days" of the holy days (except the second day of Rosh ha-Shanah) were abolished. Three volumes of his sermons preached in Berlin have been published. He officiated at so-called "mixed" marriages (see his "Gemischte Ehen Zwischen Juden und Christen," Berlin, 1850). He had to defend his congregation against many attacks (see his "Das Gutachten des Herrn L. Schwab, Rabbiner zu Pesth," *ib.* 1848). Though engaged in many ways in the development of his society and in the organization of its institutions, during the thirteen years of his stay in Berlin he found leisure to write a text-book for schools on the religious and moral doctrines of the Mishnah (Berlin, 1854), a criticism of Stahl ("Ueber Stahl's Christliche Toleranz," *ib.* 1856), and a catechism ("Jüdische Glaubens- und Sittenlehre," *ib.* 1857). He also wrote a history of the Reformgenossenschaft ("Gesch. der Jüdischen Reformgemeinde," 1857) and a more ambitious work (in Hebrew) on the rabbinical and Karaite interpretations of the marriage laws ("Ma'amar ha-Ishut," 1860).

Holdheim died suddenly, and his opponents even refused to pay his remains the honors due to him as a great rabbi. Sachs objected to his interment in the row reserved for rabbis in the Jewish cemetery; but Oettinger had granted permission for the burial, and so Holdheim was laid to rest among the great dead of the Berlin congregation, Geiger preaching the funeral oration. By a strange coincidence Sachs's grave is very near that of Holdheim. Grätz also has not done Holdheim justice: in vol. x. of his "Gesch. der Juden," the chapter on Holdheim has, not without justice, come to be regarded as a blemish on the whole work. Grätz, who would make of Holdheim an arch-enemy of Judaism—a second Paul—has to admit that none of the families connected with Holdheim's congregation has deserted Judaism through baptism. This fact is sufficient reply to Grätz's misconceptions.

S. E. G. H.

HOLIDAYS. See Holy Days.

HOLINESS (Hebr. "ḳodesh" and "ḳedushah," from a root preserved in the Assyrian "ḳudusu" = "bright"): Unapproachableness; the state of separation from, and elevation above, things common, profane, or sensual, first in a physical and external, and later in a spiritual, sense; moral purity and perfection incapable of sin and wrong.

Holiness of God and Angels.

——**Biblical Data:** To Moses and afterward to Israel, Yhwh on Sinai manifested Himself in fire as an unapproachable deity, and therefore as a holy being (Ex. iii. 2-5, xix. 18-22, xxiv. 9-17: "like devouring fire"; comp. Ex. xxxiv. 29-35, the radiant face of Moses being the effect of his intercourse with Yhwh).

In his first vision Isaiah sees the Lord surrounded by "fiery beings," seraphim, their faces covered with wings so that they can not gaze upon the Lord; and he hears the seraphim cry, "Holy, Holy, Holy [that is, "unapproachable"] is the Lord of Hosts: the whole earth is full of His glory." Isaiah is in fear for his life because his eyes have seen the Lord (Isa. vi. 1-5). Henceforth the burden of his message to Israel is God's holiness (Isa. i. 4; v. 19, 24; x. 20; xii. 6; xvii. 7; xxix. 19, 23; xxx. 11 *et seq.*; xxxvii. 23), and the Isaian expression, "the Holy One of Israel," reappears in the exilic chapters (Isa. xli. 14 *et seq.*; xliii. 3 *et seq.*; xlv. 11; xlvii. 4; xlviii. 17; xlix. 7; lv. 5; lx. 9, 14). It was owing to this conception that the fiery nature of God, which made Him unapproachable, and His nearness awful in its effects upon frail human beings (Lev. xvi. 1; Num. iv. 20; II Sam. vi. 7), was so sublimated and spiritualized that it became a power for righteousness, a fire devouring wrong-doing and injustice, and purifying the doers of evil. Compare Deut. iv. 22-23 ("Take heed unto yourselves, lest ye forget the covenant of the Lord . . . and make you a graven image . . ., for the Lord thy God is a consuming fire, even a jealous God"); or Josh. xxiv. 19-20 ("Ye can not serve the Lord: for he is an holy God; he is a jealous God; . . . if ye forsake the Lord . . . he will . . . consume you" (comp. I Sam. vi. 20).

There is still something of that elemental holiness or fiery nature implied when it is said in Job that before Him man and stars, the heavens, and His angels (literally, "His holy ones") are not clean (Job xv. 14-15, xxv. 5; comp. iv. 18). On account of their fiery nature the angels, though not pure when compared with God, are called "the holy ones," that is "unapproachable" or "majestic" (Job v. 1, vi. 10, xv. 15; Ps. lxxxix. 6; Zech. xiv. 5; Prov. ix. 10, xxx. 3; Dan. iv. 14 [A. V. 17]). But God alone is the Holy and Incomparable One (Hab. iii. 3; I Sam. ii. 2; Ex. xv. 11: "None is wrapt [A. V. "glorious"] in holiness like him").

God's holiness is manifested chiefly in His punitive justice and righteousness (Isa. v. 16; Ps. xcix. 3-5; Lev. x. 3; Num. xx. 12-13; Ezek. xxviii. 22, xxxviii. 23). Therefore sinners must stand in awe of His "devouring fire," and only those free from blemish shall behold the King in His beauty (Isa.

Jewish Ideal of Holiness.

xxxiii. 14–17; comp. iv. 3, vi. 7). It is owing to His holiness that He is too pure to permit His eyes to "behold evil and look on iniquity" without punishing them (Hab. i. 13); "the eyes of His glory are provoked" at the sight of wrong (Isa. iii. 8). At times it is the unapproachable loftiness of God that is expressed in the term "holiness" (Ps. lxxvii. 14 [A. V. 13]: "Thy way is in holiness"; Ps. lxviii. 25 [A. V. 24]: "The goings of my God and King in holiness" [A. V., in both cases inaccurately, "in the sanctuary"]; Isa. lx. 15: "I dwell in the high and holy place"; comp. Jer. xvii. 12; Ps. cii. 20). It is by this "holiness," in the sense of "majesty" or "exaltedness," that God swears (Amos lv. 2; comp. vi. 8; Ps. lxxxix. 35 [A. V. 34]; comp. Isa. lxii. 8); and it is the arm of His holiness (A. V. "his holy arm") that does all His wondrous deeds (Isa. lii 10, Ps. xcviii. 1). His holiness invests His "words" with power (Jer. xxiii. 9; Ps cv. 42) and His "name" with awe (Amos ii. 7: Ezek. xx. 39; Lev. xx. 3). Finally, God, as the Holy Being, high above all things profane and sensual, became the highest ideal and pattern of purity and perfection: "Ye shall be holy, for I the Lord am holy" (Lev. xix. 2; xx. 7, 26).

Here must be noted the striking contrast between the specifically Jewish and the general Semitic conception of holiness. The term "ḳadosh" (also "ḥerem"; = "holy"),—perhaps originally "ḳadesh" ("brightness," *e.g.*, of the well as the fountain of life [" 'En Ḳadesh"]; see Brugsch, "Gesch. Aegyptens," 1877, p. 200; Movers, "Phoenizier," i. 188)—is applied to Astarte, the goddess of fertility, known for abominable orgies, and her lascivious priests and priestesses are called "ḳedeshim" and "ḳedeshot" (the holy ones; Gen. xxxviii. 21; Deut. xxiii. 18; I Kings xiv. 24, xxii. 47; II Kings xxiii. 7; also Hosea xi. 9, xii. 1, where the Masoretic text betrays later emendation). It was the imitation by Israel of this abominable Astarte cult that roused the prophet's indignation (Amos ii. 7), and caused the Israelitish lawgiver to draw the distinction between the holy God of Israel and the gods of the surrounding nations (Lev. xviii. 24–30, xx. 22–26; Deut. xxiii. 18–19), and to insist on the avoidance of every impure act in the camp of Israel, in the midst of which God as the Holy One was present (Deut. xxiii. 15 [A. V. 14]; Num. xv. 39–40).

It is in congruity with this view that God as the Holy One also sanctifies persons and things. In the ancient conception holiness was a transmissible quality; wherefore they that offered incense before the Lord were "hallowed" (Num. xvii. 2–3), and whatsoever touched the altar was thereby made holy (Ex. xxix. 37, comp. xxx. 29; Lev. vi. 11, 20; I Sam. xxi. 6; Hag. ii. 12); even he who touched the officiating priest (Ezek. xliv. 19, xlvi. 20; Isa. lxv. 5) was rendered holy. In the Mosaic system the holiness of consecrated persons and things emanated from God, but men must at the same time declare them holy (comp. Ex. xxix. 44 with xxviii. 41, xxix. 1, 21, 33; Lev. viii. 11; Num. vii. 1; I Sam. xvi. 5; II Sam. viii. 11; I Kings viii. 64). It is the Lord who sanctifies the priestly house of Aaron (Lev. xxi. 15, 23; xxii. 9, 16; Ezek. xx. 16); the Levites (Num. viii. 17); the first-born (Num. iii. 13; comp. Ex. xiii. 2; Deut. xv. 19); Israel (Ex. xxxi. 13; Lev. xx. 8, xxi. 8; Ezek. xx. 12, xxxvi. 28); the Sabbath (Gen. ii. 3; Ex. xx. 11); and the prophet (Jer. i. 5).

The Holiness of Persons and Things.

All things become "holy" that are excluded from common or profane use ("ḥol"; I Sam. xxi. 5) by being connected with the worship of God: (1) The places in which God is supposed to dwell or where He appeared (Ex. iii. 5; Josh. v. 15; Deut. xxiii. 15; II Chron. viii. 11); hence, every sanctuary ("miḳdash," Ex. xxv. 8, or "ḳodesh," Ex. xxviii. 29; Ezek. xlii. 20), and every part of the sanctuary, and every vessel used therein (Ex. xxvi. 33; I Sam. xxi. 6; Ezek. xlii. 13; Num. iii. 31). Such a place with its site was marked off as holy (Ex. xix. 23; Ezek. xlv. 1). The hill of the Temple (Isa. xi. 9 and elsewhere) became "the holy hill"; Jerusalem, "the holy city" (Ps. xlvi. 5; Zeph. iii. 11; Isa. xlviii. 2); and Palestine, "the holy land" (Zech. ii. 16; comp. Hosea ix. 3–4). God's heavenly habitation, "the seat of His holiness," is holy, because of His unapproachable (fiery) majesty (Micah i. 2; Hab. ii. 20; and elsewhere); so, likewise, is "the throne of His holiness" (Ps. xlvii. 9; comp. Ezek. xxviii. 14: "the fiery mountain of the [heathen] gods").

(2) All the things consecrated or brought as sacrifices to God (Ex. xxviii. 38, xxx. 35, xxxvi. 6; I Sam. xxi. 5; Num. xviii. 17, 32; Lev. x. 10; Zech. xiv. 20), and whatever is used in worshiping in the sanctuary (Ex. xxviii. 2 *et seq.*; xxx. 25, 35). These things are not holy in themselves, but "holy unto the Lord" (Ex. xxviii. 36, xxx. 37; Lev. xix. 8, xxiii. 20; and elsewhere); that is, their relation to the divinity renders them holy; and in accordance with their more or less close external or internal relationship to God and His dwelling-place they are differentiated in their degree of holiness, as "holy," or "holy of holies" (Ex. xxvi. 33; xxx. 10, 29, 36; Lev. xvi. 33; and elsewhere).

(3) All persons "separated" from the rest of mankind to serve God or serve in the sanctuary of God. The priest is "holy unto God" (Lev. xxi. 6, 7), and Aaron, being separated from the rest of the Levites, is called "holy of holies" (I Chron. xxiii. 13 [A. V. incorrect]); so also are the Nazarite (Num. vi. 5) and the prophet (II Kings iv. 9).

Israel a Holy People.

Especially is Israel "holy unto the Lord" (Deut. vii. 6; xiv. 2, 21; xxvi. 19; xxviii. 9; Jer. ii. 3); Israel is "His holy kingdom" (Ps. cxiv. 1), "His holy people" (Isa. lxii. 2, lxiii. 18; Dan. xii. 7), "His holy seed" (Isa. vi. 13; Ezra ix. 2); Israel is "the people of holy ones" (Dan. vii. 21, 27; viii. 24). It is "a holy nation" because it has been separated as "a kingdom of priests" from amidst the nations of the earth (Ex. xix. 6); and as "holy men" the people of Israel are to abstain from unclean meat (Ex. xxii. 30; Deut. xiv. 21; Lev. xxi. 25–26; comp. Ezek. xliv. 31). from intermarriage with the idolatrous nations (Deut. vii. 2–6; Mal. ii. 11; Ezra vi. 21, ix. 11), from heathen modes of disfigurement (Deut. xiv. 2); and they are to wear a mark of distinction on their body (Dan. xi. 28, 30) and on their dress (Num. xv. 20).

Here, too, is noticeable a difference between the ancient view of holiness maintained in the priestly legislation, and the higher prophetic view which lends it a loftier ethical meaning. The place where God dwells or the sacrifice is offered wherewith He is especially approached is physically holy, and to draw near or to look upon it brings death (Ex. xxviii. 43, xxx. 20; Lev. x. 2, 9; Num. iii. 10, iv. 20; comp. Ex. xix. 24). The holiness of Israel, also, is at times regarded as inherent in the nation (Num. xvi. 3), or in the land as the seat of Israel's God (Amos vii. 17); but it developed more and more into an ethical obligation (Deut. xxvi. 19, xxviii. 9; Lev. xix. 2, xx. 7), a state of moral perfection to be attained by abstinence from evil and by self control. The title "the holy ones" is given later on to the class of pious ones (Ps. xvi. 3; xxxiv. 110; lxxxix. 6, 8 [A. V. 5, 7]). Possibly it was given to those believed to be imbued with the divine spirit of holiness (see Holy Spirit).

——**In Rabbinical Literature:** While the Levitical legislation—the so-called "Law of Holiness," which, according to the critical view of the Bible, is the precipitate of the writings of the priest-prophet Ezekiel—made holiness the central idea of the Mosaic law (Lev. xix. 2, xx. 26), post-exilic Judaism developed the system in two different directions, the Sadducean priesthood laying all the stress on external sanctity in its various gradations and ramifications, whereas the ancient Ḥasidim, and their successors, the Pharisees and Essenes, made inner holiness more and more the aim of life. It is the priestly system which, following the example of Ezekiel (xl.–xlviii.), counted ten degrees of holiness (beginning with the land of Palestine as the Holy Land and with the Holy City, and ending with the holy of holies of the Temple) and the corresponding ten degrees of impurity (Kelim i. 6–9; Tosef., Kelim, i.; for the holiness of Jerusalem see Tosef., Neg. vi. 2). Similarly, the different sacrifices were classified according to their degrees of holiness (Zeb. v.–xiv.; Me‘i. i.–iii.; Niddah vii. 1). In fact, the entire Temple ritual in all its detail as given in the Mishnah is based upon the sacerdotal view of holiness. The quaint notion that the Holy Scriptures contaminate ("taboo") the hands (Yad. ii. 2–5) is derived from priestly practise (see Geiger, "Urschrift," pp. 170–174; comp. Assumptio Mosis, vii. 10). So does the claim to superior rank made by the Aaronite over the Levite, by the Levite over the common people (Giṭ. 59b), and by the high priest over the Nazarite (Naz. vii. 1) emanate from the Temple, and not from the schoolhouse (Sifra, Aḥare Mot, xiii).

The Ḥasidim, in their battle against Syrian idolatry and the Jewish apostates among the Hellenistic party of the Sadducean priesthood, extended the rules of Levitical holiness to the extent of declaring the very soil of the heathen impure (Shab. 15a). The leading idea is expressed in the Book of Jubilees, xxii. 16–17: "Separate thyself from the nations and eat not with them, and do not according to their works, . . . for their works are unclean and all their ways a pollution, an abomination, and uncleanness. They offer their sacrifices to the dead and worship evil spirits" (see notes in Charles, "The Book of Jubilees," 1902, pp. 140 *et seq.*). Accordingly, the Ḥasidim understood the very command "Be holy" to signify "Separate yourselves from the rest of men" (Sifra, Ḳedoshim, i.), their maxim being, "Wherever the Torah speaks of holiness, it has in view abstinence from idolatry and from its concomitant moral depravity and licentiousness" (*ib.* ix. 11; Lev. R. xxiv.). Holiness "like that of the priests," holiness in body "like that of the angels," became the Ḥasidean ideal (Targ. Yer. to Ex. xxii. 30; Lev. xx. 7; Num. xv. 40); hence, most probably, the name "Perisha" (the one separated from persons and things that may contaminate; see Pharisees).

Part of that system of holiness were regular ablutions before morning prayer and before every meal (Ber. 53b), and nazir-like abstinence from things permitted which may lead to things forbidden (Yeb. 20a; Ta‘an. 11a), and especially from impure sights and thoughts (Shab. 86a, 118b; Shebu. 18b). The Israelites in general are called "holy men" (Sibyllines, ii. 168), especially the martyred Ḥasidim (*ib.* ii. 263); Israel of the future will be "a holy generation" (*ib.* xiv. 359; Psalms of Solomon, xvii. 28, 36); "Israel's character of holiness has been given him by God to last forever" (Lev. R. xxiv.).

In rabbinical ethics, too, holiness is the highest ideal (Soṭah ix. 15). Only the few elect ones were called "saints" (Wisdom v. 5; Pes. 104a; Shab. 118b; Ket. 103b). "Holy Congregation," or "Congregation of the Saints," was the name given to a brotherhood bound together for a life of prayer, study, and labor, in expectation of the Holy Spirit and in preparation for the Messianic time (see ‘Edah Ḳedoshah; Essenes); hence also the saints of the New Testament. All the more significant is the teaching of rabbinical Judaism: "None can be called saint before death" (Midr. Teh. to Ps. xvi. 3), which is interpreted to mean: "The saints are to be trusted only when they are in the earth," because God Himself "putteth no trust in His saints" (Job xv. 15).

Holiness is an ideal state of perfection attained only by God (Yer. Ber. ix. 13a). "Man grows in holiness the more he aspires to the divine while rising above the sensual" (Yoma 39a). The entire system of the Jewish law has the hallowing of life as its aim, to be reached through good works, through observance of the Sabbath and holy days (Ḳiddush), and through the sanctification of God's name ("Ḳiddush ha-Shem"; see Midr. Teh. to Ps. xx. 5). It is holiness which elevates and permeates the thoughts and motives of life, and hence it is the highest possible principle of ethics.

"Holiness" became for rabbinical Judaism synonymous with purity of life, purity of action, and purity of thought; it lent its peculiar sanctification to the Sabbath, to the name of God—nay, to the whole motive of moral conduct (see Ḳiddush ha-Shem)—to portions of the prayers (see Ḳaddish), and to the relations of man and wife (see Marriage); and under its influence personal purity in Judaism became the highest standard and maxim of ethics found in any religious system. Hence Maimonides gave the name "Ḳedushah" (= "Holiness") to the fifth book of his Yad ha-Ḥazaḳah, which treats of the sexual relations, and Naḥmanides laid down rules of conduct for conjugal life in a book entitled "Iggeret ha-Ḳedushah" (= "Letter on Holiness").

K.

HOLITSCHER, PHILIP: Hungarian landholder and author; born in Budapest Aug. 19, 1822. His parents destined him for a mercantile career, and in 1842 he took over his father's factory. He retired, however, from business about thirty years later, and since then has lived on his estate in Alag, devoting himself to economic questions. Under the name of "Fidelius" he wrote a work on political economy entitled "Die Oesterreichische Nationalbank und Ihr Einfluss auf die Wirtschaftlichen Verhältnisse der Monarchie" (Vienna, 1875). He wrote also: "Im Banne Fortunas," a romance (Budapest, 1882); "Erzählungen" (1884); "Gedanken und Gestalten," poems (Breslau, 1887); "Skanderbeg," a drama (*ib.* 1890); "Carols Weltreisen und Abentheuer" (Stuttgart, 1892); "Der Letzte König von Polen," a drama (*ib.* 1893); "Splitter und Balken," poems (*ib.* 1895); "Neues Leben" (*ib.* 1895).

S. L. V.

HOLLAENDERSKI, LÉON LÖB BEN DAVID: Polish scholar and author; born at Wistiniecz, government of Suwalki, Russian Poland, 1808; died in Paris Dec. 20, 1878. He studied at Königsberg, Prussia, and on his return in 1833 was appointed an interpreter at the tribunal of Suwalki. There, in 1835, he founded the first printing and lithographic establishment in the government, as well as three bookstores. His Polish sympathies, however, soon attracted the attention of the Russian government. He was denounced, his property was confiscated, and he barely escaped with his life to Paris (1843).

Through the recommendation of Arago he obtained a position in one of the railroad offices, and employed his leisure time in literary pursuits, which gave him in after years considerable reputation as a philosopher, moralist, historian, and bibliographer.

Of his published works may be mentioned: "Céline la Nièce de l'Abbé" (1832); "Histoire des Juifs en Pologne," the first in its field (1846); "Trilogie Philosophique et Populaire: Moschek," a romance in which are faithfully depicted the Polish customs of that time; "Dix-huit Siècles de Prejugés Chrétiens"; "Dictionnaire Universel Français-Hébreu"; "L'Exemple," an essay on morals; "Israel et Sa Vocation," published in "Arch. Isr." (Paris, 1863-64). Besides these works, he is the author of the following, in verse: "Méditations d'un Proscrit Polonais"; "L'Amour et l'Hymen"; "La Liberté de Franc-Maçons"; "Lamentation de Juifs Polonais sous Nicolas 1er." He also translated Ibn Ezra's "Ma'adanne Melek," under the title of "Délices Royales ou le Jeu des Echecs"; "Mémoire de Kilinsky" from the Polish into French; and the third part of Berakot (Paris, 1871).

His numerous contributions to periodical literature as well as his works appeared variously under the names of "Holland," "Hollander," "Hollaender," and "H. I."

HOLLAND. See Netherlands.

HOLLANDER, JACOB H.: Associate professor of political economy and head of the department of political economy in the Johns Hopkins University; born in Baltimore July 23, 1871. He was educated in the university to which he is attached (B.A. 1891; Ph.D. 1894). Prior to graduation he was appointed instructor in political economy in Amherst College, and taught there in the autumn of 1894, when he was recalled to Johns Hopkins by appointment as assistant in political economy. Since then he has remained a member of its faculty, being successively promoted to the rank of instructor (1895), associate (1896), associate professor of finance (1899), and associate professor of political economy and director of the department (1902). In 1897 he was selected as secretary of the special mission of the United States sent by President McKinley to negotiate a monetary agreement with the leading countries of Europe. He has served as chairman of the committee on municipal finance of the Baltimore Reform League and as chairman of the Municipal Lighting Commission of Baltimore.

Early in 1900 the United States government appointed Hollander special commissioner to revise the laws relating to taxation in Porto Rico, and on May 1, in the same year, treasurer of Porto Rico, which position he held until July 25, 1901, when the island was declared self-supporting. Hollander is now (1903) chairman of the publication committee of the American Jewish Historical Society, and is a member of the publication committee of the Jewish Publication Society. His more important works are: "The Cincinnati Southern Railway: A Study in Municipal Activity" (Baltimore, 1894); "Letters of David Ricardo to John Ramsay McCullah" (New York, 1895); "Letters of David Ricardo to Hutches Trower" (Oxford, 1899); "The Financial History of Baltimore" (Baltimore, 1899); "Studies in State Taxation" (edited; *ib.* 1900); "Reports of Treasurer of Porto Rico" (Washington, 1900-01). He has written many minor papers on financial and economic subjects in scientific journals, and has contributed to the publications of the American Jewish Historical Society articles relating to the history of the Jews in Maryland.

A. F. H. V.

HOLLÄNDER, LUDWIG HEINRICH: German dental surgeon; born at Leobschütz Feb. 4, 1833; died at Halle March 14, 1897; educated at the universities at Würzburg and Breslau (M.D. 1856). During the following nine years he practised medicine in South Africa. Returning to Germany in 1866, he settled in Halle as a dental surgeon, and was admitted to the medical faculty of the university as privat-docent in 1873. When in 1878 a dental department was added to the medical institutions of the university, Holländer became its principal, with the title of professor, which position he held until his death.

Holländer published his experiences in South

Africa in the "Globus," 1866 and 1867. He contributed several essays on dental subjects to the medical journals, and in 1877 translated into German Tomes's "Manual of Dental Anatomy." He was also the author of "Beiträge zur Zahnheilkunde," Leipsic, 1881, and "Die Extraction der Zähne," *ib.* 1882.

HOLLE KREISH: The ceremony of naming infants, especially girls, in the cradle ("shem ha-'arisah"), adopted by the German Jews from their neighbors. On the Sabbath when the mother of the child attends the synagogue for the first time after her confinement, children of from eight to ten years of age are invited to the house for a festivity, where they form a circle around the cradle in which the infant (as a rule, a month old) lies. Lifting the cradle three times, they cry: "Holle! Holle! What shall the child's name be?" Whereupon the child's common, or non-Hebrew, name is called out in a loud voice, while the father of the child recites the first verse of Leviticus. In some places the Book of Leviticus is laid in the cradle, under the child's head. In parts of Germany this ceremony of naming the child was performed in the case of both boys and girls; but generally only girls were named on such occasions, the naming of boys being done in connection with circumcision.,

From Moses Minz (Responsa, No. 19), Yuspa Hahn ("Yosef Omez," p. 212a), and Sefer Ḥasidim, pp. 1139–1140, it appears that the custom was established among the German Jews in the fifteenth century, and that its origin was so little known that the name given it was taken to be partly Hebrew ("ḥol" = "profane," and "kreish" = "naming"), and was interpreted: "the giving of the profane [or non-holy] name." This explanation is even accepted by Zunz ("G. V." p. 439) and by M. Brück ("Pharisäische Volkssitten," 1840, p. 27; see also L. Löw, "Lebensalter," 1895, p. 105, where "holla" is taken as an interjection). But Dr. Perles has shown that the custom originated in Germany, where Holle, like the Babylonian and Jewish LILITH, was a demon eager to carry off infants; and, in order to protect the child from injury, a circle was drawn around it and a name given under forms intended to ward off the power of Holle. As circumcision seemed a sufficient safeguard for boys, holle kreish by the Jews was generally performed in the case of girls only.

K.

HOLLESCHAU: City in Moravia, with about 5,600 inhabitants. The old ghetto of Holleschau still forms a separate township, and contains therefore a German interdenominational school, which is mostly frequented by Jewish children. The Jewish community numbers 1,500. In 1560 the synagogue was rebuilt by permission of Henry von Sternberg, the lord of the manor. The war of Bethlen Gabor against Ferdinand II. (1622) entailed much suffering upon the community, due to Hungarian troops. Twenty-one years later the community was plundered by the Swedes. At a synod held at Holleschau in 1653 the old statutes for the Jewish communities in Moravia (שי"א תקנות) were for the first time revised and amended. In 1682 the Jews were forbidden to appear in the market-place during a procession. During the flood of 1686 hundreds of graves were obliterated, the stones being washed from their original places. In 1741 the community was laid under contribution by the Prussians, and in 1742 it was ordered to pay, within a fortnight, 2,301 gulden as war-tax; the constant exactions of the war left the congregation burdened with a debt of 40,000 florins. When Maria Theresa issued an edict banishing the Jews from Moravia (1745), the synagogue in Holleschau and the sacred vessels were seized, and the most prominent of the Jews arrested. To complete their misery, a fire broke out in the same year, destroying a third of the Jewish quarter. In 1774, when Abraham Skrain killed his servant Josepha Trumczmin, the populace were about to storm and burn the Jewish quarter, but were prevented by the clergy, who placed altars with holy images in front of Skrain's house.

The next hundred years seem to have been comparatively uneventful. Rudolph Eugene, Count of Wrbna and Freudenthal, acted as mayor for the Jewish community from 1864 until his death in 1883. In 1891 the parish of Holleschau was fixed, and since Jan. 1, 1892, the community has included those of the counties of Holleschau, Bistritz, and Wisowitz. A new synagogue was dedicated in 1893. Serious anti-Semitic disturbances occurred in 1899, which were traceable to friction between Germans and Czechs.

The rabbinate of Holleschau, from 1630 to the present century, has been held by:

Isaac Segal, 1630.
Menahem Mendel, 1646.
Eliezer b. Abdeel Isaac, author of "Tiḳḳun Soferim" (Prague, 1658).
Shabbethai Cohen, the "Schach," 1662.
Moses Isaac J. L. Zunz, 1668–78.
Menahem Mendel, 1679–85; author of "Ẓinẓenet Menaḥem."
Israel Fränkel, one of the Vienna exiles; died 1700.
Eliezer Oettinger, 1689–1709; relative and teacher of Jonathan Eybeschütz.
Joseph Oppenheim, 1710–14; son of the bibliophile David Oppenheim.
David Strauss, 1714–22.
Saadia Katzenellenbogen, 1723–26.
Aaron M. M. Hamburg, 1730–59.
Joseph Freistadt, 1760–65.
Isaac b. Abraham, 1767–86.
Judah Löb Teomin (Judah Lisser), 1788-94.
Abraham Stern, author of "Mizraḥi Ma'arabi," 1796–97.
Menahem Mendel Deutsch, 1802–19.
Joseph Biach Feilbogen, 1841-67.
Markus Pollak, 1857–93.
Jacob Freimann (since 1893).

In addition to two synagogues the community has had a bet ha-midrash since 1808; among the scholars appointed to it was Salomon Haas (d. 1847), author of "Kerem Shelomoh."

D. J. FREI.

HOLOCAUST. See BURNT OFFERING; SACRIFICE.

HOLOFERNES, HOLOPHERNES: General of Nebuchadnezzar, mentioned in the apocryphal Book of Judith; killed at Bethulia (Judith xiii. 6–8). The name is evidently of Persian origin, similar in formation to "Artaphernes," "Dataphernes," "Tissaphernes," the last element of each of which is "pharna" = "glorious" Blochet, in "R. E. J." xxxi. 281). A similar name, "Oropherues," or "Olophernes," occurs in Cappadocian history, and is found on coins at Pirene, in inscriptions at Cnidos, and later in classical writers. According to Diodorus of Sicily, a Holofernes, brother of the satrap Ariarathes of Cappadocia, lived at the time of Artaxerxes Ochus (359–337 B.C.). Another was king of Cappadocia (158 B.C.) and a friend of Demetrius I., Soter; with this Holofernes many scholars, following Ewald, E. L. Hicks, and Willrich, identify the subject of this article. Winckler originally ("Altorientalische Forschungen," ii. 273) identified the latter with Asnapper (Assurbanipal); but in Schrader's "K. A. T." 3d ed., p. 290, he seems to consider Cambyses as being the original of the general in the Book of Judith. Klein has not been followed by scholars in identifying Holofernes with Hadrian's general Julius Severus ("Actes du Huitième Congrès . . . des Orientalistes," ii. 85 *et seq.*, Leyden, 1893). For a fuller discussion of this subject see JUDITH.

It is worthy of notice that, though the longer Hebrew midrash based on the Book of Judith does mention Holofernes, the shorter version (which Gaster, "Proceedings Soc. Bib. Archeology," xvi. 156, believes to be the older) substitutes Seleucus.

According to the Book of Judith, Holofernes is said to have been despatched by Nebuchadnezzar with an army of 120,000 foot and 12,000 horse for the purpose of taking vengeance "on all the earth" (Judith ii. 5). After having devastated many countries, Holofernes reached Esdraelon, and encamped between Geba and Scythopolis to collect his forces. The Jews, resolved to defend themselves, fortified the mountain passes. Holofernes was advised by Achior, the captain of Ammon, not to attack the Jews; but, ignoring the advice, he proceeded against Bethulia. Instead of attacking the city, however, he seized the wells, hoping thereby to compel the inhabitants to capitulate. In this he would have succeeded but for a beautiful widow named Judith who visited him at his camp, and, after a banquet at which Holofernes became drunk, cut off his head and escaped to Bethulia. The death of the general spread confusion through the ranks of the army, which retired in disorder before the attack of the Jews. See JUDITH.

HOLON (חלון = "sandy place" or "halting-place"): **1.** City of Judah, in the Hebron hills, allotted, with its suburbs, to the priests (Josh. xv. 51, xxi. 15). In the parallel passage in I Chron. vi. 73 this city is called "Hilen" (A. V. "Anem"). **2.** City of Moab, in the plain of Moab and east of the Jordan; mentioned with Heshbon, Dibon, and other cities (Jer. xlviii. 21).

HOLY DAYS.—Biblical Data and Critical View. See FESTIVALS.

——In Talmudic Law: Upon the six holy days in the Jewish calendar—the first and seventh days of Passover, the first and eighth days of Sukkot (Tabernacles), the day of Shebu'ot (Weeks), and the day of Rosh ha-Shanah (New-Year)—the Bible prohibits every kind of labor (Lev. xxiii. 7, 8, 21, 25, 35, 36). The punishment prescribed for the transgressor of this law is stripes (see CRIME). All kinds of work forbidden on the Sabbath are forbidden also on the holy days, except such work as is necessary for the preparation of food for the day of the festival (Ex. xii. 16; Beẓah 36a). The Day of Atonement is like the Sabbath in this respect, that work of any kind is forbidden; the only difference is in the punishment meted out to the transgressor: for Sabbath-breaking the punishment is stoning; for working on the Day of Atonement it is excision (KARET).

What Work Permitted.

Carrying objects from place to place or kindling a fire, permissible in connection with the preparation of food, is also permitted when done for other purposes, so long as too much labor is not involved. Even with regard to the preparation of food only such work is permitted as could not be done before the holy day, or such as, if done before the holy day, would not result satisfactorily. Thus, it is permitted to slaughter an animal and to cook and bake on the holy day, because, if done before, the food would not taste as well. But it is forbidden to harvest, to gather fruit from a tree, to grind in a mill, or to do anything that could have been done as well before the holy day. The general purpose underlying these laws is to enhance the joy of the festival, and therefore the Rabbis permitted all work necessary to that end, while guarding against turning it into a working-day (Maimonides, "Yad," Shebitot Yom-Ṭob, i. 5–8).

Although only so much work is permitted as is absolutely necessary for the preparation of the food for the day of the festival, an increase, for instance, in the amount of meat cooked, when no extra labor is caused thereby, even though not necessary for the day, is permitted. The housewife may fill the kettle with meat, although only a portion of it will be used on the holy day; she may fill the oven with bread, even though she needs but one loaf (Beẓah 17a; "Yad," Shebitot Yom-Ṭob, i. 10). Washing and anointing were considered by the Rabbis of as much importance as eating, and therefore they permitted the heating of water for the purpose of washing face, hands, and feet, but not for the whole body (Beẓah 21b; "Yad," Shebitot Yom-Ṭob, i. 16; Shulḥan 'Aruk, Oraḥ Ḥayyim, 511, 2).

"Mukẓeh" and "Hakanah."

On the holy days some authorities forbid the use of any object not previously designated for that purpose ("mukẓeh"). A chicken kept for its eggs, or an ox kept for plowing, or fruit kept for business may not be used as food on a holy day unless it has been expressly stated before the holy day that these were destined to be used as food ("hakanah"). All authorities agree that objects that come into existence on a holy day ("nolad") may not be used on that day ("Yad," Shebitot Yom-Ṭob, i. 17, 18; RAbD and Kesef Mishneh *ad loc.*; Oraḥ Ḥayyim, 495, 4, Isserles' gloss). It is forbidden to eat an egg laid on the day of a festival, notwithstanding the fact that it may have been ready the day before. The reason for this law as given in Beẓah 2b is, according to Rabba, as follows: It is not permitted to prepare on the Sabbath for a festival that follows it, or on a festival for the Sabbath following it. Hence, an egg laid on a festival immediately following the Sabbath may not be used on that day because it was prepared on the Sabbath, and in order to make the law uniform so that no mistake could occur ("gezerah"), it was forbidden even if laid on a festival not immediately preceded by a Sabbath. If the holy day occurred on a Friday, no food could be prepared for the coming Sabbath unless express provision had been made for such preparation on the day preceding the holy day by means of "'erub tabshilin" (see 'Erub). This consists of bread and some dish over which the blessing is pronounced and an Aramaic formula recited in which the significance of the 'erub is declared. The idea of the 'erub is that this dish, prepared before a festival for the Sabbath, is regarded as the beginning of the Sabbatical preparations, which need only be continued on the holy day (Beẓah 15b; "Yad," Shebitot Yom-Ṭob, vi. 1, 2; Oraḥ Ḥayyim, 521; see Beẓah).

Second Days of Festivals.

The second-day holy day, although a rabbinical institution established because of the uncertainty of the calendar, was still regarded by the Rabbis as of equal sanctity with the first day, and all work forbidden on the first day is also forbidden on the second. While no punishment is prescribed for the violator of a second-day holy day, the Jewish communities took it upon themselves to inflict punishment upon him. Excommunication, even beating ("makkat mardut"), was frequently the lot of such a transgressor (see Excommunication). The only distinction the Rabbis make between the first and second days concerns burials; on the first day the burial must be carried out by non-Jews, on the second day Jews are permitted to conduct it. The two days are regarded in all respects as two distinct holy days, and objects that come into existence on the first day can be used on the second. The two days of New-Year, however, are considered as one day, except in the case of a burial, which is permitted on the second day (Beẓah 6a; "Yad," Shebitot Yom-Ṭob, i. 22–24; Oraḥ Ḥayyim, 496, 526). For the laws concerning Palestinian Jews, who do not observe the second day, but who have settled in a place outside Palestine where it is observed, or vice versa, see Conflict of Laws; Custom.

To rejoice and be cheerful on the holy days is recommended by the Rabbis. It is customary to give new toys and fruit to children, new garments and ornaments to women, and to have meat and wine on the table during these days. The day should be divided into halves, one to be spent in eating, drinking, and amusement, the other in worship and study. Fasting or the delivering of funeral orations is forbidden. Too much drinking and excessive hilarity, however, are not encouraged. The court used to appoint overseers, who visited the public parks and gardens to see that men and women in their joviality should not commit sin. The law thus succeeded in establishing a dignified observance of the festivals by the Jews, free from asceticism or licentious hilarity (Beẓah 15b; Shebitot Yom-Ṭob, vi. 16–21; Oraḥ Ḥayyim, 529). For the ritual of the holy days see the articles on the several holy days.

Ḥol ha-Mo'ed.

The week-days of the festivals ("Ḥol ha-Mo'ed") of Passover and of Sukkot are considered as semiholy days, and only certain kinds of work are permitted on them. Any kind of labor requiring immediate attention may be done on these days. The Rabbis, however, included a great many kinds of labor under this head, while preserving the sanctity of the ḥol ha-mo'ed by providing certain signs which should remind the Jew of the festival ("shinnui"). It is forbidden to transact regular business on these days, though a man may buy or sell privately, and thus be enabled to spend more for the coming festival. At present in many lands it is customary for storekeepers to go to their places of business during these days, but to make some change by keeping the doors only half open or by keeping the shades down. It is forbidden to write on these days, but it is customary to write letters, though some change is made, as by writing lengthwise instead of across the paper, etc. There is a certain leniency in the interpretation of all these laws; and while the sanctity of the festival is still maintained in various ways, few hesitate to do various kinds of work or to pursue their daily occupations (Ḥag. 18a; M. Ḳ. i., ii., iii.; Shebitot Yom-Ṭob, vii., viii.; Oraḥ Ḥayyim, 530–548).

No marriage should be celebrated on these days, on the principle that one joy should not be confused with another joy. It is permitted, however, to celebrate a betrothal or to remarry a divorced wife (M. Ḳ. 8a). In the case of a funeral there should be no excessive mourning (see Mourning). Shaving or hair-cutting is forbidden, as every one should prepare himself before the holy day begins. Only such as could not possibly do so before the holy day, as the prisoner who has just been released, or the excommunicate whose term has expired, or one arrived from a far-off land, may have his hair cut on these days (M. Ḳ. 14a; Oraḥ Ḥayyim, 531, 532; Isserles forbids also the cutting of one's nails).

Ritual.

The order of services is the same as on working-days, except that the prayer "Ya'aleh we-Yabo" (May Our Remembrance) is inserted in the "Shemoneh 'Esreh." After the regular morning service the "Hallel" is recited and a section of the Law is read, after which the additional service of the festival ("Musaf"), in which, according to the Ashkenazic ritual, the Biblical verses for the day are inserted, is read. During the middle days of Passover, "half Hallel" is read, that is, the first eleven verses of Psalms cxv. and cxvi. are omitted (see Hallel). The lesson of the Law for Ḥol ha-Mo'ed contains Biblical selections connected in some way with the character of the day. If one of these days falls on a Sabbath, the weekly portion is omitted, and instead a portion from Exodus (xxxiii. 12–xxxiv. 26), which contains a short reference to the three festivals, is read. The Haftarah for Passover is the vision of the valley of the dry bones (Ezek. xxxvi. 37–xxxvii. 14), and for Sukkot the account of the wars of Gog and Magog (Ezek. xxxviii. 18–xxxix. 16). It is also customary in many communities to read the scroll of Canticles on the Sabbath of the middle days of Passover, and of Ecclesiastes on that of the middle days of Sukkot (Oraḥ Ḥayyim, 490, 663). Peculiar ceremonies attend the services on the last of the middle days of Sukkot, which is known by a distinct name—"Hosha'na Rabbah."

There is a difference of opinion among the early authorities as to whether tefillin are to be worn on these days or not, and in consequence various customs arose. The Sephardic Jews do not wear tefillin on these days, while the Ashkenazim do. Some are careful not to pronounce the blessings on tefillin at all, while others say them in a whisper. The Ḥasidim follow the Sephardim in this as in many other customs. However, before Musaf on the middle days of Passover, and before "Hallel" on Sukkot, the tefillin are always removed (Oraḥ Ḥayyim, 31, 2, Isserles' gloss; see PHYLACTERIES).

These days being a period of leisure to many Jews, they were devoted by the medieval Jewish communities to the consideration of congregational affairs. In Germany the election of the governing body of the congregation took place upon them. Collections for charity were taken up, and house-to-house begging was also permitted (sometimes also on Fridays). In spite of the stringent laws against gambling in some medieval Jewish communities, many indulged in card-playing and in other games of chance (see GAMBLING).

In commemoration of the rejoicings that accompanied the ceremony of the "drawing of water" in Temple times (Suk. 51a; "Yad," Lulab, viii. 12–15), many Jewish communities, especially in Russia and Poland, indulge in festivities and merrymaking during the evenings of the middle days of Tabernacles ("Simḥat Bet ha-Sho'ebah"). Various hymns taken from the ritual are chanted, refreshments are served in the bet ha-midrash, and the young are permitted to indulge in various pleasures.

HOLY GHOST. See HOLY SPIRIT.

HOLY OF HOLIES (Vulgate, "Sanctum Sanctorum"; Hebr. "Ḳodesh ha-Ḳodashim," or, more fully, "Bet Ḳodesh ha-Ḳodashim," II Chron. iii. 8, 10; R. V. "the most holy house"): That part of the Tabernacle and of the Temple which was regarded as possessing the utmost degree of holiness (or inaccessibility), and into which none but the HIGH PRIEST—and he only once during the year, on the Day of Atonement—was permitted to enter (see ATONEMENT, DAY OF).

A similarly high degree of holiness was ascribed to the following: the altar (Ex. xxix. 37; A. V. "most holy"); the incense-altar (*ib.* xxx. 10); all the implements of the sanctuary (*ib.* xxx. 29; Num. iv. 4, 19); the things reserved for the priests ("minḥah"; Lev. ii. 3, 10; vi. 10; x. 12; Num. xviii. 9; Ezra xlii. 13); the sin-offering (Lev. vi. 18, 22; x. 17); the guilt-offering (Lev. vii. 1, 6; xxxi. 14); the offering of the leper (because it belongs to the priests; Lev. xiv. 13); and the showbread (Lev. xxiv. 9). The designation "most holy" is applied also to the work of Aaron and his sons (I Chron. vi. 49).

In the Tabernacle and the Temple.

The inner room or cell of the sanctuary, termed also the "miḳdash ha-ḳodesh" (Lev. xvi. 33; A. V. "the holy sanctuary"), is known as the "Holy of Holies" par excellence. As such it comprised that smaller western part of the Tabernacle, the "mishkan," which was divided off from the remainder of the meeting-tent by a curtain or veil suspended from four pillars of acacia overlaid with gold and having sockets of silver (Ex. xxvi. 32, xxxvi. 36, R. V.). This curtain was woven in four colors: white, blue, scarlet, and purple, and was made of byssus, *i.e.*, linen. The cell was cubelike in shape, being 10 ells high, 10 ells long, and 10 ells broad. It contained the ARK OF THE COVENANT (Ex. xxvi. 34; comp. Josephus, "Ant." iii. 6, §§ 4, 5).

In Solomon's Temple the Holy of Holies formed a part of the house of YHWH (I Kings vi. 1 *et seq.*), which was 60 cubits in length, 20 cubits in breadth, 30 cubits in height, and built of stone (Josephus, "Ant." viii. 3, § 2: "white marble"), and was divided into two sections by a partition of cedar-wood with a door covered by a costly curtain (Josephus, *l.c.* § 3; II Chron. iii. 14). The section farthest from the entrance, designated also as the "debir" (the "oracle," "the most holy place," I Kings vi. 5, R. V. margin), was 20 cubits high and presented the shape of a cube. The stone of this inner or hinder part, like the outer room, was completely hidden with cedar boards carved with knops or gourds and open flowers and then covered with pure gold. This room must have been without light. In it was placed the Ark (*ib.* vi. 18, 19).

In the Second Temple, details of the construction of which are not preserved in the Biblical documents (Ezra vi. 3 mentions dimensions), the Holy of Holies was curtained off (I Macc. i. 22, iv. 51). It was empty, except for a stone three fingers in breadth on which the high priest deposited the censer (Josephus, "B. J." v. 55; Yoma v. 2). In Ezekiel's ideal Temple the Holy of Holies measured 20 cubits in length and the same in breadth (Ezek. xli. 4). Ezekiel (*ib.* 21, 23) calls this inner section simply קדש (R. V. "sanctuary"), in contrast to the "hekal" (= "temple").

In the Herodian Temple.

In the Herodian Temple the Holy of Holies was not divided off from the rest of the hekal by a wall, but two curtains, a cubit apart, partitioned the inner chamber from the outer room. These curtains were richly wrought (Sheḳ. viii. 5), and were so arranged that in order to enter the high priest had to lift them diagonally at the sides; the outer opening was at the south end, the inner at the north (Yoma v. 1). The length of the Holy of Holies was 20 cubits. Above both the inner and the outer rooms was an upper chamber, constructed to enable builders to make the necessary repairs. A trap-door was above the Holy of Holies, and through this the workmen were lowered in boxes, to guard against profanation (lit. "feasting their eyes"). In this upper chamber the location of the two rooms underneath was marked off (Mid. iv. 5).

According to Maimonides ("Yad," Bet ha-Beḥirah, iv. 1; see Yoma 23a), in the Holy of Holies of the

Tabernacle was a stone on which the Ark rested; before it was placed the flask of manna and Aaron's staff. Solomon made a depression in order that these objects might, if necessary, be hidden therein, which was done by Josiah (comp. Hor. 12a; Ker. 5b; Yoma 21a, 52a).

——**Critical View:** It is generally contended that the Tabernacle represents a later priestly reconstruction patterned after the Solomonic and Ezekiel's ideal Temples (see Graf, "Die Geschichtl. Bücher des Alten Testaments," Leipsic, 1868; Popper, "Der Biblische Bericht über die Stiftshütte"). The account of Solomon's Temple (I Kings vi.) is also very much involved, and probably represents various sources. The legislation in P is based partly on actual practise, partly on theoretical insistences anticipated to a certain extent in Ezekiel, gradually realized in the Second (Zerubbabel's) Temple and fully recognized as authoritative in the Maccabean-Herodian-Mishnaic Temple. According to Büchler ("Die Priester und der Cultus," Vienna, 1895), during the last period of the Temple's existence certain concessions were made with latitude for "laymen." On the one hand, the use of the term "Ḳodesh ha-Ḳodashim" as a synonym for, or a later explanation of, "debir" (= "oracle"), and the application of the same designation to all the things that were accessible only to the priests, and, on the other, the uncertainty of the use of the double phrase in Ezekiel (see above; Smend, Commentary on Ezek. lxi.; Bleek, "Einleitung," 4th ed., p. 234), indicate a gradual evolution of the notion that certain places and things partook of a higher degree of holiness than others. The analysis of the various passages shows that "Ḳodesh," originally designating "property of or reserved for YHWH," only gradually came to admit of different degrees. In distinction from all tithes which are holy those belonging to the priests are further designated as "miḳdash" (Num. xviii. 29; comp. *ib.* viii. 32).

Applied to locality, this distinction in degrees is noticeable first in Ezekiel. His idea of the ascending scale of holiness is apparent in his designation of the Temple territory as "Holy of Holies" in comparison with the surrounding Levitical land (Ezek. xliii. 12, xlviii. 12). This notion pervades the Priestly Code and is determinative of the later Jewish conception, which ascribes to the land of Israel, the city of Jerusalem, the different courts and buildings of the Temple, in a fixed but ascending scale, different degrees of sanctity (Sanh. 2a, 16a; Sheb. 14a; "Yad," *l.c.* vi.).

HOLY LAND. See PALESTINE.

HOLY SCRIPTURES. See BIBLE CANON.

HOLY SPIRIT (Hebr. רוח הקדש; Greek, *πνεῦμα ἅγιον*): The most noticeable difference between sentient beings and dead things, between the living and the dead, is in the breath. Whatever lives breathes; whatever is dead does not breathe. Aquila, by strangling some camels and then asking Hadrian to set them on their legs again, proved to the emperor that the world is based on "spirit" (Yer. Ḥag. 41, 77a). In most languages breath and spirit are designated by the same term. The life-giving breath can not be of earthly origin, for nothing is found whence it may be taken. It is derived from the supernatural world, from God. God blew the breath of life into Adam (Gen. ii. 7). "The Spirit of God hath made me, and the breath of the Almighty hath given me life" (Job xxxiii. 4; comp. *ib.* xxvii. 3). God "giveth breath unto the people upon it [the earth], and spirit to them that walk therein" (Isa. xlii. 5). "In whose hand is the soul of every living thing, and the breath of all mankind" (Job xii. 10). Through His spirit all living things are created; and when He withdraws it they perish (*ib.* xxxiv. 14; Ps. civ. 29, 30). He is therefore the God of the spirits of all flesh (Num. xvi. 22, xxvii. 16). The breath of animals also is derived from Him (Gen. vi. 17; Ps. civ. 30 [A. V. 29]; Eccl. iii. 19-21; Isa. xlii. 5). The heavenly bodies likewise are living beings, who have received their spirit from God (Job xxvi. 13; Ps. xxxiii. 6). God's spirit hovered over the form of lifeless matter, thereby making the Creation possible; and it still causes the most tremendous changes (Gen. i. 2; Isa. xxxii. 15).

Biblical View of the Spirit.

Hence all creatures live only through the spirit given by God. In a more restricted sense, however, the spirit of God is not identical with this life-giving spirit. He pours out His own spirit upon all whom He has chosen to execute His will and behests, and this spirit imbues them with higher reason and powers, making them capable of heroic speech and action (Gen. xli. 38; Ex. xxxi. 3; Num. xxiv. 2; Judges iii. 10; II Sam. xxiii. 2). This special spirit of God rests upon man (Isa. xi. 2, xlii. 1); it surrounds him like a garment (Judges vi. 34; II Chron. xxiv. 20); it falls upon him and holds him like a hand (Ezek. xi. 5, xxxvii. 1). It may also be taken away from the chosen one and transferred to some one else (Num. xi. 17). It may enter into man and speak with his voice (II Sam. xxiii. 2; Ezek. ii. 2; comp. Jer. x. 14). The prophet sees and hears by means of the spirit (Num. xxiv. 2; I Sam. x. 6; II Sam. xxiii. 2; Isa. xlii. 1; Zech. vii. 12). The Messianic passage in Joel ii. 28-29, to which special significance was subsequently attached, is characteristic of the view regarding the nature of the spirit: "And it shall come to pass afterward, that I will pour out my Spirit upon all flesh; and your sons and your daughters shall prophesy, your old men shall dream dreams, your young men shall see visions: And also upon the servants and upon the handmaids in those days will I pour out my Spirit."

The Divine Spirit.

What the Bible calls "Spirit of YHWH" and "Spirit of Elohim" is called in the Talmud and Midrash "Holy Spirit" ("Ruaḥ ha-Ḳodesh," never "Ruaḥ Ḳedoshah," as Hilgenfeld says, in "Ketzergesch." p. 237). Although the expression "Holy Spirit" occurs in Ps. li. 11 (LXX. *πνεῦμα τὸ ἅγιον*) and in Isa. lxiii. 10, 11, it had not yet the definite meaning which was attached to it in rabbinical literature: in the latter it is equivalent to the expression "Spirit of the Lord," which was avoided on account of the disinclination to the use of the Tetragrammaton (see, for example, Targ. to Isa. xl. 13). It is probably owing to this fact that the Shekinah is often referred to instead of the Holy Spirit. It is said of the former, as of the Holy Spirit, that it rests upon a person. The difference between the two in such cases has not yet been determined. It is certain that the New Testament has *πνεῦμα ἅγιον* in those passages, also, where the Hebrew and Aramaic had "Shekinah"; for in Greek there is no equivalent to the latter, unless it be *δόξα* (= "gleam of light"), by which "ziw ha-shekinah" may be rendered. Because of the identification of the Holy Spirit with the Shekinah, *πνεῦμα ἅγιον* is much more frequently mentioned in the New Testament than is "Ruaḥ ha-Ḳodesh" in rabbinical literature.

Nature of the Holy Spirit.

Although the Holy Spirit is often named instead of God (*e.g.*, in Sifre, Deut. 31 [ed. Friedmann, p. 72]), yet it was conceived as being something distinct. The Spirit was among the ten things that were created on the first day (Ḥag. 12a, b). Though the nature of the Holy Spirit is really nowhere described, the name indicates that it was conceived as a kind of wind that became manifest through noise and light. As early as Ezek. iii. 12 it is stated, "the spirit took me up, and I heard behind me a voice of a great rushing," the expression "behind me" characterizing the unusual nature of the noise. The Shekinah made a noise before Samson like a bell (Soṭah 9b, below). When the Holy Spirit was resting upon him, his hair gave forth a sound like a bell, which could be heard from afar. It imbued him with such strength that he could uproot two mountains and rub them together like pebbles, and could cover leagues at one step (*ib.* 17b; Lev. R. viii. 2). Similarly Acts ii. 2 reads: "And suddenly there came a sound from heaven as of a rushing mighty wind, and it filled all the house where they were sitting" (it must be noted that this happened at Pentecost, *i.e.*, the Feast of Revelation). Although the accompanying lights are not expressly mentioned, the frequently recurring phrase "he beheld ["heẓiẓ"] in the Holy Spirit" shows that he upon whom the spirit rested saw a light. The Holy Spirit gleamed in the court of Shem, of Samuel, and of King Solomon (Gen. R. lxxxv. 12). It "glimmered" in Tamar (Gen. xxxviii. 18), in the sons of Jacob (Gen. xlii. 11), and in Moses (Ex. ii. 12), *i.e.*, it settled upon the persons in question (see Gen. R. lxxxv. 9, xci. 7; Lev. R. xxxii. 4, "niẓoẓah" and "heẓiẓ"; comp. also Lev. R. viii. 2, "hitḥil le-gashgesh"). From the day that Joseph was sold the Holy Spirit left Jacob, who saw and heard only indistinctly (Gen. R. xci. 6). The Holy Spirit, being of heavenly origin, is composed, like everything that comes from heaven, of light and fire. When it rested upon Phinehas his face burned like a torch (Lev. R. xxi., end). When the Temple was destroyed and Israel went into exile, the Holy Spirit returned to heaven; this is indicated in Eccl. xii. 7: "the spirit shall return unto God" (Eccl. R. xii. 7). The spirit talks sometimes with a masculine and sometimes with a feminine voice (Eccl. vii. 29 [A. V. 28]); *i.e.*, as the word "ruaḥ" is both masculine and feminine, the Holy Spirit was conceived as being sometimes a man and sometimes a woman.

In the Form of a Dove.

The four Gospels agree in saying that when Jesus was baptized the Holy Spirit in the shape of a dove came down from the opening heaven and rested upon him. The phraseology of the passages, especially in Luke, shows that this description was not meant symbolically, as Conybeare ("Expositor," iv., ix. 455) assumes, following Alexandrian views (comp. Matt. iii. 16; Mark i. 10; Luke iii. 22; John iv. 33; and Hastings, "Dict. Bible," ii. 406a). This idea of a dove-like form is found in Jewish literature also. The phrase in Cant. ii. 12, "the voice of the dove" (A. V. "turtle"), is translated in the Targum "the voice of the Holy Spirit." The passage in Gen. i. 2, "And the Spirit of God moved upon the face of the waters," is interpreted by Ben Zoma (*c.* 100) to mean, "As a dove that hovers above her brood without touching it" (Ḥag. 15a). As the corresponding passage in the Palestinian Talmud (Ḥag. 77b, above) mentions the eagle instead of the dove, the latter is perhaps not named here with reference to the Holy Spirit. A teacher of the Law heard in a ruin a kind of voice ("bat ḳol") that complained like a dove: "Wo to the children, because of whose sins I have destroyed my house" (Ber. 3a, below). Evidently God Himself, or rather the Holy Spirit, is here referred to as cooing like a dove (comp. Abbot, "From Letter to Spirit," pp. 106-135). See DOVE.

Dissemination of the Holy Spirit.

The Holy Spirit dwells only among a worthy generation, and the frequency of its manifestations is proportionate to the worthiness. There was no manifestation of it in the time of the Second Temple (Yoma 21b), while there were many during the time of Elijah (Tosef., Soṭah, xii. 5). According to Job xxviii. 25, the Holy Spirit rested upon the Prophets in varying degrees, some prophesying to the extent of one book only, and others filling two books (Lev. R. xv. 2). Nor did it rest upon them continually, but only for a time. The stages of development, the highest of which is the Holy Spirit, are as follows: zeal, integrity, purity, holiness, humility, fear of sin, the Holy Spirit. The Holy Spirit conducts Elijah, who brings the dead to life (Yer. Shab. 3c, above, and parallel passage). The pious act through the Holy Spirit (Tan., Wayeḥi, 14); whoever teaches the Torah in public partakes of the Holy Spirit (Cant. R. i. 9, end; comp. Lev. R. xxxv. 7). When Phinehas sinned the Holy Spirit departed from him (Lev. R. xxxvii. 4; comp. Gen. R. xix. 6; Pesiḳ. 9a).

In Biblical times the Holy Spirit was widely disseminated, resting on those who, according to the Bible, displayed a propitious activity; thus it rested on Eber and, according to Josh. ii. 16, even on Rahab (Seder 'Olam, 1; Sifre, Deut. 22). It was necessary to reiterate frequently that Solomon wrote his three books, Proverbs, Canticles, and Ecclesiastes, under the inspiration of the Holy Spirit (Cant. R. i. 6-10), because there was a continual opposition not only to the wise king personally, but also to his writings. A teacher of the Law says that probably for this reason the Holy Spirit rested upon Solomon in his old age only (*ib.* i. 10, end).

Holy Spirit and Prophecy.

The visible results of the activity of the Holy Spirit, according to the Jewish conception, are the books of the Bible, all of which have been composed under its inspiration. All the Prophets spoke "in the Holy Spirit"; and the most characteristic sign of the presence of the Holy Spirit is the gift of prophecy, in the sense that the person upon whom it rests beholds the past and the future. With the death of the last three prophets, Haggai, Zechariah, and Malachi, the Holy Spirit ceased to manifest itself in Israel; but the Bat Ḳol was still available. "A bat ḳol announced twice at assemblies of the scribes: 'There is a man who is worthy to have the Holy Spirit rest upon him.' On one of these occasions all eyes turned to Hillel; on the other, to Samuel the Lesser" (Tosef., Soṭah, xiii. 2-4, and parallels). Although the Holy Spirit was not continually present, and did not rest for any length of time upon any individual, yet there were cases in which it appeared and made knowledge of the past and of the future possible (*ib.*; also with reference to Akiba, Lev. R. xxi. 8; to Gamaliel II., *ib.* xxxvii. 3, and Tosef., Pes. i. 27; to Meïr, Lev. R. ix. 9; etc.).

The Holy Spirit rested not only on the children of Israel who crossed the Red Sea (Tosef., Soṭah, vi. 2), but, toward the end of the time of the Second Temple, occasionally on ordinary mortals; for "if they are not prophets, they are at least the sons of prophets" (Tosef., Pes. iv. 2). The Holy Spirit is at times identified with the spirit of prophecy (comp. Seder 'Olam, 1, beginning; Targ. Yer. to Gen. xli. 38, xliii. 14; II Kings ix. 26; Isa. xxxii. 15, xl. 13, xliv. 3; Cant. R. i. 2). Sifre 170 (to Deut. xviii. 18) remarks: "'I will put My words into his mouth,' means 'I put them into his mouth, but I do not speak with him face to face'; know, therefore, that henceforth the Holy Spirit is put into the mouths of the Prophets." The "knowledge of God" is the Holy Spirit (Cant. R. i. 9). The division of the country by lot among the several tribes was likewise effected by means of the Holy Spirit (Sifre, Num. 132, p. 49a). On "inspiration" see Jew. Encyc. iii. 147, *s.v.* Bible Canon, § 9; especially Meg. 7a; and Inspiration. It may simply be noted here that in rabbinical literature single passages are often considered as direct utterances of the Holy Spirit (Sifre, Num. 86; Tosef., Soṭah, ix. 2; Sifre, Deut. 355, p. 148a, six times; Gen. R. lxxviii. 8, lxxxiv. 12; Lev. R. iv. 1 [the expression "and the Holy Spirit cries" occurs five times], xiv. 2, xxvii. 2; Num. R. xv. 21; xvii. 2, end; Deut. R. xi., end).

Gentiles and the Holy Spirit.

The opposite of the Holy Spirit is the unclean spirit ("ruaḥ ṭum'ah"; lit. "spirit of uncleanliness"). The Holy Spirit rests on the person who seeks the Shekinah (God), while the unclean spirit rests upon him who seeks uncleanness (Sifre, Deut. 173, and parallel passage). Hence arises the contrast, as in the New Testament between πνεῦμα ἅγιον and πνεῦμα ἀκάθαρτον. On the basis of II Kings iii. 13, the statement is made, probably as a polemic against the founder of Christianity, that the Holy Spirit rests only upon a happy soul (Yer. Suk. 55a, and elsewhere). Among the pagans Balaam, from being a mere interpreter of dreams, rose to be a magician and then a possessor of the Holy Spirit (Num. R. xx. 7). But the Holy Spirit did not appear to him except at night, all pagan prophets being in possession of their gift only then (*ib.* xx. 12). The Balaam section was written in order to show why the Holy Spirit was taken from the heathen—*i.e.*, because Balaam desired to destroy a whole people without cause (*ib.* xx. 1). A very ancient source (Sifre, Deut. 175) explains, on the basis of Deut. xviii. 15, that in the Holy Land the gift of prophecy is not granted to the heathen or in the interest of the heathen, nor is it given outside of Palestine even to Jews. In the Messianic time, however, the Holy Spirit will, according to Joel ii. 28, 29, be poured out upon all Israel; *i.e.*, all the people will be prophets (Num. R. xv., end). According to the remarkable statement of Tanna debe Eliyahu, ed. Friedmann, the Holy Spirit will be poured out equally upon Jews and pagans, both men and women, freemen and slaves.

In the New Testament.

The doctrine that after the advent of the Messiah the Holy Spirit will be poured out upon all mankind explains the fact that in the New Testament such great importance is assigned to the Holy Spirit. The phrase τὸ πνεῦμα τὸ ἅγιον occurs from eighty to ninety times (Swete, in Hastings, "Dict. Bible," ii. 404); while the phrase τὸ πνεῦμα τοῦ θεοῦ is comparatively rare, it occurs several times. In Acts i. 5, 8 it is said, as in the midrash quoted above, that in the Messianic time the Holy Spirit will be poured out upon every one, and in Acts ii. 16 *et seq.* Peter states that Joel's prophecy regarding the Holy Spirit has been fulfilled. "While Peter yet spake these words, the Holy Ghost fell on all them which heard the word. And they of the circumcision which believed were astonished, as many as came with Peter, because that on the Gentiles also was poured out the gift of the Holy Ghost. For they heard them speak with tongues, and magnify God" (*ib.* x. 44-46). Luke also says (Luke xi. 13) that God gives the Holy Spirit to those that ask Him. The phrase "joy of the Holy Ghost" (I Thess. i. 6) also recalls the Midrash sentence quoted above referring to the contrast between the clean and the unclean spirit (Mark iii. 30). The inspiration of the Biblical writers is acknowledged in the same way as in rabbinical literature (Matt. xxii. 43; Mark xii. 36; II Peter i. 21). Hence the conception of the Holy Spirit is derived from one and the same source. But as the New Testament writers look upon the Messiah, who is actually identified with the Holy Spirit, as having arrived, their view assumes a form fundamentally different from that of the Jewish view in certain respects; *i.e.*, as regards: (1) the conception and birth of the Messiah through the Holy Spirit (Matt. i. 18 *et seq.*; Luke i. 35; John iii. 5-8); (2) the speaking in different tongues ("glossolalia"; Acts ii. *et passim*); (3) the materialistic view of the Holy Spirit, evidenced in the idea that it may be communicated by means of the breath (*e.g.*, John xx. 22); and (4) the strongly developed view of the personality of the Holy Spirit (comp., for example, Matt. xii. 32; Acts v. 3; I Cor. iii. 16; Eph. ii. 22; I Peter ii. 5; Gospel to the Hebrews, quoted in

Hastings, "Dict. Bible," ii. 406, foot, *et passim*). In consequence of these fundamental differences many points of the Christian conception of the Holy Spirit have remained obscure, at least to the uninitiated.

In the Apocrypha.

It is noteworthy that the Holy Spirit is less frequently referred to in the Apocrypha and by the Hellenistic Jewish writers; and this circumstance leads to the conclusion that the conception of the Holy Spirit was not prominent in the intellectual life of the Jewish people, especially in the Diaspora. In I Macc. iv. 45, xiv. 41 prophecy is referred to as something long since passed. Wisdom ix. 17 refers to the Holy Spirit which God sends down from heaven, whereby His behests are recognized. The discipline of the Holy Spirit preserves from deceit (*ib.* i. 5; comp. *ib.* vii. 21–26). It is said in the Psalms of Solomon, xvii. 42, in reference to the Messiah, the son of David: "he is mighty in the Holy Spirit"; and in Susanna, 45, that "God raised up the Holy Spirit of a youth, whose name was Daniel." Josephus ("Contra Ap." i. 8) expresses the same view in regard to prophetic inspiration that is found in rabbinical literature (comp. Jew. Encyc. iii. 147b, *s.v.* Bible Canon; Josephus, "Ant." iv. 6, § 5; vi. 8, § 2; also Sifre, Deut. 305; Ber. 31b, above; Gen. R. lxx. 8, lxxv. 5; Lev. R. vi.; Deut. R. vi.—the Holy Spirit defending Israel before God; Eccl. R. vii. 23; Pirḳe R. El. xxxvii., beginning). See also Hosanna; Inspiration; Ordination; Tabernacles, Feast of.

D.

HOMBERG, HERZ: Austrian educator and writer; born at Lieben, near Prague, Sept., 1749; died Aug. 24, 1841. He studied Talmud at Prague, Presburg, and Gross-Glogau, and began the study of general literature in his seventeenth year. The reading of Rousseau's "Emile" awakened in him the desire to devote himself to pedagogy. He prepared himself at Berlin, where he became tutor (1779) to Mendelssohn's eldest son, Joseph. During the three years he remained under Mendelssohn's roof he himself became a pupil of the philosopher, who continued to take an interest in him, as may be seen by his fifteen letters to Homberg (Mendelssohn's "Gesammelte Schriften," v., Leipsic, 1844).

Under Emperor Joseph II. the status of the Jews in Austria underwent a complete change. German normal schools were to be introduced into the Jewish communities, but there were no men available to organize these schools and take charge of the public instruction. Homberg now decided to return to his native country. Being very highly recommended by Mendelssohn, he was appointed (1784) superintendent of all the German-Jewish schools of Galicia. In 1793 he was called by Emperor Francis II. to Vienna to formulate laws regulating the moral and political status of the Jews in Austria. The work appeared in 1797, and won for Homberg the great gold medal. When the normal schools of Galicia were placed under the general direction of the district schools, Homberg retired to Vienna, employing his time partly as censor and partly in compiling such readers for Jews as had been ordered by the royal commission for studies. He was not successful in either of these directions. Homberg was later appointed assistant professor of religious and moral philosophy at Prague, with the title of "Schulrath," retaining this position until his death. His published works include:

Bi'ur, Hebrew commentary to Deuteronomy. Berlin, 1783.

Vertheidigung der Jüdischen Nation Gegen die in den Provinzblättern Enthaltenen Angriffe. Görz, 1785.

Sendschreiben über das Unterrichtswesen in Galizien. Published in "Der Sammler," p. 227.

Sendschreiben an die Rabbiner und Jüdischen Gemeindevorsteher in Galizien. Published in Hebrew and German. Lemberg, 1788.

Ueber die Moralische und Politische Verbesserung der Israeliten in Böhmen. Published in "Hufnagel's Journal." Frankfort-on-the-Main, 1796.

Imre Shefer (his chief work), a religious and moral reader for young people. Published in Hebrew and German. Vienna, 1802.

Zwölf Fragen, vom Minister des Innern in Frankreich der Israelitischen Deputation in Paris Vorgelegt und von Ihr Beantwortet. From the French, with notes. Vienna, 1806.

Bne Zion, religious-moral reader for children. Augsburg, 1812.

HOMBURG. See Hesse.

HOMEL or **GOMEL** (in Russian documents, **Gomi** or **Gum**; among Hebrew writers, **Homiah**): District town in the government of Moghilef, Russia, situated on the right bank of the River Sozh, an affluent of the Dnieper. In 1902 its Jews numbered 26,161 in a total population of 46,446, or 56.4 per cent. It is not certain when Jews first settled in Homel; but as it came into the possession of Lithuania in 1537, it is probable that a Jewish community was established soon after that date. During the Cossacks' uprising in 1648 about 1,500 Jews were killed at Homel. Shabbethai Cohen in "Megillat Efah" and Gabriel Schusburg in "Petaḥ Teshubah" gave full accounts of the massacre. They relate that many of the wealthy Jews of the Ukraine sought refuge in Homel, which was a strongly fortified town after it came into the possession of Prince Chartoryski, and that the commandant of the fortress treacherously delivered them over to Hodki, leader of the Cossacks, in consideration of a payment of 1,200 florins. Outside of the city walls the Jews were stripped, and, surrounded by the Cossacks, were called upon to embrace the Greek Orthodox religion or meet a most terrible death. The rabbi, whose name was Eliezer (Shusburg calls him "Rabbi Moses"), persuaded them to hold fast to their faith. With the exception of a small number who managed to escape to the adjacent woods and of a few young men, the Jews remained faithful to their religion, and were killed in a horrible manner. Grätz ("Gesch." 2d ed., xi. 107) erroneously speaks of another massacre of thousands of Jews in Homel by the Haidamacks under Gonta June 20, 1768. He mistook Uman, which among the old Hebrew writers was called "Homian," for Homel (known in Hebrew as "Homiah").

Cossack Persecutions.

Anti-Jewish outbreaks occurred in Homel in Sept., 1903. Rumors of impending riots had been circulated in the latter part of the previous month. The trouble arose on Friday, Sept. 11, when a watchman wished to buy from a Jewish woman a barrel of herring worth six rubles for one ruble fifty copecks. In the fight which followed between the Jewish pedlers of the market-place and the Christians who came to the aid of the watchman, one of the Christians was injured and died the same day. The riot was renewed on the following day, and when it had been quelled the town was practically under martial law.

Meanwhile a number of anti-Semitic agitators, probably executing the orders of the authorities, inflamed the passions of the mob, exhorting them not to leave their fellow Christians unavenged. On Monday, Sept. 14, about 100 railway employees gathered and began to break the windows and to enter and plunder the houses of the Jews in the poorest quarters of the town, one of which is called "Novaya Amerika" (= "New America"). A number of Jews armed and began to defend themselves; but the soldiers prevented them from entering the streets where the plundering was going on, and forced them back to their homes, beating and arresting those who resisted. According to a reliable report, other soldiers and the police looked on in an indifferent way while the mob continued its plundering and committed all kinds of excesses. The shrieks of children could be heard in the streets which the soldiers had blocked against the Jews without; and when some of the Jews tried to force their way down the side-streets, the soldiers fired on them, wounding several among them and killing six.

Anti-Jewish Riots in 1903.

The total number of Jews killed is given as 25; seriously injured, 100; slightly injured, 200. Three hundred and seventy-two Jewish houses and 200 stores were plundered and destroyed.

On Sept. 17 the bodies of the following persons who had been killed in the riots were buried in the Jewish cemetery of Homel: Elijah Oberman (tailor); Phoebus Halperin (aged 24; merchant); Zalman Kaganski (aged 20; only son); Mordecai Kaganski; Boruch Petitzki (aged 25); Behr Leikin (aged 45); Meïr Davydov; Zalman Cohn; Ḥayyim Piachetzki; and Behr Kevas.

The scroll of the Law, which was torn by the rioters during the destruction of the synagogue, was also buried. About one-third of the Jewish population escaped. While the chief of police and certain other God-fearing Christians gave shelter to some of the victims, several of the merchants took part in the riots.

From a report presented by representatives of the Jewish community of Homel to Assistant Minister of the Interior Durnovo (Oct. 1, 1903), it is evident that the first account of the riots in the official organ of the government was incorrect, and that they had been carefully planned several weeks previously.

H. R. G. D. R.

HOMEM, ANTONIO: Jewish martyr; born in 1564 of Neo-Christian parents at Coimbra, Portugal; suffered death at the stake in Lisbon May 5, 1624. His father's name was Vaez Brandão; and his mother was a granddaughter of Nuñez Cardozo, called "the rich Jew of Aveiro." Like many secret Jews who, in order to escape from the snares and persecutions of the Inquisition, caused their sons to embrace a clerical career, the parents of Antonio had him educated for the Church. He entered a religious order and studied at the university of his native town. On Feb. 22, 1592, he took his degree as doctor and "magister," and after having served the Church in various offices he was appointed deacon and professor of canon law at Coimbra University. He aroused the suspicion of the Inquisition and had to appear before its tribunal (Feb. 1, 1611), but as the author of some theological works he was acquitted. His colleagues closely watched him, however; and in 1619 a secret synagogue was discovered in Lisbon in which Homem conducted the services and preached. On Dec. 18 of that year he was brought before the tribunal of the Inquisition and condemned to death: and five years later at an auto da fé at Lisbon he was burned alive. His house was demolished, and in its place was erected a pillar bearing the inscription "Præceptor infelix."

HOMER. See Weights and Measures.

ḤOMESH. See Pentateuch.

HOMICIDE.—Biblical Data: That bloodshed should be punished with bloodshed was, according to Scripture, proclaimed to Noah and his family: "Surely your blood of your lives will I require; at the hand of every beast will I require it, and at the hand of man; at the hand of every man's brother will I require the life of man. Whoso sheddeth man's blood, by man shall his blood be shed: for in the image of God made he man" (Gen. ix. 5, 6). The main prohibition, however, is contained in the

Decalogue (Ex. xx. 13; Deut. v. 17): "Thou shalt not kill."

Scripture distinguishes two kinds of unlawful homicide, the voluntary (murder) and the involuntary (manslaughter). Homicide is voluntary when the killing is the result of malice and premeditation (Ex. xxi. 14; Num. xxxv. 20; Deut. xix. 11); it is involuntary when it is caused by accident (Ex. *l.c.* 13; Num. *l.c.* 22; Deut. *l.c.* 4). The criteria of voluntary homicide are the following: enmity, hatred (איבה, שנאה) on the part of the perpetrator (Num. *l.c.* 20, 21; Deut. *l.c.* 11); lying in wait, ambushing (ארב, צדה; *ib.*); guile, premeditation (ערמה; Ex. *l.c.* 14); the procuring of the instrument or means calculated to produce fatal results (Num. *l.c.* 16–20; comp. Ex. *l.c.* 20). Where these or any of these indices are present the killing, according to the Bible, is to be considered voluntary and felonious. On the other hand, where there is neither lying in wait nor premeditation, neither enmity nor a deadly weapon or other means calculated to prove fatal, the killing is to be adjudged involuntary or accidental (Ex. *l.c.* 13; Num. *l.c.* 22; Deut. *l.c.* 4). As an example of accidental homicide the Bible (Deut. *l.c.* 5) cites the supposititious case of a man who "goeth into the wood with his neighbor to hew wood, and his hand fetcheth a stroke with the ax to cut down the tree, and the head slippeth from the helve, and lighteth upon his neighbor, that he die" (see below).

Penalties.

The penalty imposed for homicide in ante-Mosaic times, alike for unpremeditated and for premeditated killing, seems to have been death at the hands of any man (comp. Gen. iv. 14), man and beast being included in the same statute (*ib.* ix. 5, 6). In the Mosaic law discrimination is made between the two species. In this law the punishment of the wilful manslayer is, after trial and conviction (Num. *l.c.* 24; Deut. *l.c.* 12), death at the hands of the victim's nearest relation, the "redeemer of the blood" (גאל הדם; Num. *l.c.* 19, 21; Deut. *l.c.*); and the penalty for accidental homicide is seclusion in asylum, in one of the "cities of refuge" (מקלט; Ex. *l.c.* 13; Num. *l.c.* 11, 15; Deut. *l.c.* 5), where the slayer must "abide until the death of the high priest" (Num. *l.c.* 25–28). In neither case is satisfaction or ransom (כפר) permitted to substitute or commute the statutory penalty. The voluntary murderer must be put to death, and the involuntary manslayer must retire into and abide in asylum (Num. *l.c.* 31–33).

In case an animal kills a man, the animal must be stoned to death, and its flesh must not be eaten; but its owner is not to be punished except the victim be a slave, when he must remunerate the master of the slave. Where, however, the animal was known to be vicious, and the owner was warned of the fact and did not confine it, the animal is, as in the first case, stoned to death, and its owner is also liable to be punished with death; but the latter's punishment may be commuted for a sum of redemption money (Ex. *l.c.* 28–32).

When a human body is found lying in the field, and it is not known who the murderer is, then the elders and the judges of the nearest city must strike off the head of a heifer in a barren valley, and in the presence of priests they must wash their hands over the beheaded animal, declaring that neither have their hands shed the blood of the slain nor have their eyes seen the deed committed. Thereupon they must invoke God to be merciful, and not to lay the innocent blood to Israel's charge (Deut. xxi. 1–9).

——**In Rabbinic Law:** By the rabbinic system homicide is clearly classified as (1) justifiable, (2) misadventurous, (3) accidental, (4) culpable, or (5) felonious.

When Justifiable.

(1) Homicide is justifiable when it is committed in obedience to duty, as in executing a condemned criminal (Lev. xx. 2; Deut. xvii. 5, 7; xxii. 24); or in defense of human life or chastity (Sanh. viii. 7, 73a; see below); or even in killing the thief who breaks in at night (Ex. xxii. 2; see BURGLARY), whether the killing is done by the proprietor of the premises or by a stranger (Sanh. viii. 6, 72b; Maimonides, "Yad," Genebah, ix. 7).

(2) Homicide is misadventurous (קרוב לאונס) when the killing is the result of pure chance; as when, in the Biblical example quoted above, the head of the ax, instead of slipping from the helve swayed by the hewer, rebounds from the block and kills (Mak. ii. 1, 7b; comp. "Yad," Roẓeaḥ, vi. 15); or when one throws a missile on his own premises, and a stranger, without the proprietor's knowledge or consent, just then intruding, is struck and killed by such missile (Mak. *l.c.* 2, 8a; B. Ḳ. 32b). In such cases no blame attaches to the unfortunate slayer; therefore no punishment of any kind is incurred by him, not even at the hands of the redeemer of blood, the "go'el" (Mak. *l.c.*; B. Ḳ. *l.c.*; "Yad," *l.c.* 3).

Accidental Homicide.

(3) Homicide is accidental (שוגג) when it is the effect of constructive negligence, but entirely free from felonious intention; as when an officer of the court, in chastising a convict (Deut. xxv. 2, 3), by mistake administers more than the number of stripes awarded in the sentence, and thereby causes the death of the culprit (Mak. iii. 14, 22a; B. Ḳ. 32b); or when one throws a missile on his own premises, and a visitor just then entering by permission is struck and killed by the missile (Mak. ii. 2, 8a; "Yad," *l.c.* vi. 11). This species of homicide, although not attended by premeditation or malice, savors of negligence, and is therefore not altogether free from blame and consequent punishment, which latter is exile (גולה; Mak. ii. 1, 2, 7a; see above), or the risk of being killed by the go'el (Mak. *l.c.* 7, 12a; "Yad," *l.c.* v. 9, 10). However, the accidental manslayer is not subject to exile, unless the victim dies immediately after the accident. If the victim survives the accident even a single astronomical day, no exile is imposed (Yeb. 120b; Giṭ. 70b; "Yad," *l.c.* v. 2).

(4) Homicide is culpable (קרוב למזיד) when it is the result of actual negligence on the part of the perpetrator; as when one engaged in razing a structure near a thoroughfare thoughtlessly lets some of the material fall on a passer-by, killing him (B. Ḳ.

Culpable Homicide.

33b; Mak. ii. 2, 8a); or when one endeavoring to prevent the commission of murder or of rape (see above) intentionally kills the would-be criminal without attempting any other means of prevention (Sanh. 74a; "Yad," *l.c.* i. 13); or when one commits homicide in the belief that he has a right to do it (see Hatra'ah), *e.g.*, when one kills a criminal before his judicial conviction (Mak. 7b, 9b). In all such cases the perpetrators are outlaws in the broadest sense of the term: they are criminals, but stand beyond the provisions of the penal laws. The laws concerning murder (see below) can not be applied to them, because the slaying was not preceded by deliberation; and the law concerning accidental homicide can not be applied to them, because the slaying was either the result of criminal negligence or the consequence of choice; therefore the go'el may kill them at any time or place, exile not protecting them against him ("Yad," *l.c.* vi. 4).

In the following cases, though they are even more criminal than those just mentioned, the homicide is likewise included among the culpable: Where a man is an accessory, *e.g.*, hires others to do the deed (see Abetment); where the perpetrator is a principal in the crime, but the victim has a chance to avert fatal results, as where one wilfully throws another into a well which at the time is provided with a ladder, but the assailant removes the ladder and the victim is drowned (Sanh. 77b; "Yad," *l.c.* iii. 9); where the death is the result of miscarried felonious intent, as where one maliciously aims a deadly missile at a certain person, and it strikes and kills another (Sanh. ix. 2, 79a; B. Ḳ. 44b); where the missile, not deadly if striking the part aimed at, miscarries and strikes the intended victim in a more vital spot, with fatal results (Sanh. *l.c.*; "Yad," *l.c.* iv. 2); and even where none of the aggravating circumstances here detailed are present, but it is proved that the slayer had nourished enmity against the victim (Mak. ii. 3, 7b; Sifre, Num. 160). The penalty for the culpables, whom, as stated, exile does not protect against the go'el, depends on the exigencies of the times. If circumstances require exemplary rigor, the court may order the infliction of capital punishment; otherwise scourging and imprisonment (M. Ḳ. 16a; Sanh. 46a; "Yad," *l. c.* ii. 4, 5). To the category of culpable homicides excluded from the penal statute may be added the suicide.

Murder.

(5) Homicide is felonious when the act is the result of wilful and malicious deliberation (מזיד; see above and Hatra'ah). To establish it as such, there must be none of the mitigating circumstances attending any of the cases hitherto enumerated. It must be perpetrated by one man only, without the physical aid of others (see Abetment); but persuasion or threats (see Duress) will not be considered as an excuse for or extenuation of the crime (Sanh. 74b; Yeb. 53a). Where danger threatens the lives of two men, and one can save his life by increasing the danger of the other, the Rabbis lay down the ethical principle, "Thine own life takes precedence over that of thy neighbor" (B. M. 62a; comp. Yer. Hor. iii. 48b); but where one is threatened with the forfeiture of his own life unless he take that of an innocent party, the Rabbis argue, "There is no reason for supposing that thy blood is redder than that of the other"; hence one may not save his own life by spilling the innocent blood of another (Sanh. 74a).

Condition of Murderer and Victim.

The perpetrator, to be amenable to the penalty incurred by the commission of the crime, may be a male or a female, a free person or a slave; but he or she must be an adult, and of sound mental and physical condition (Mek., Nez. 7; Sifra, Emor, xx.; see Abduction). In case he is a diseased person, the species of the crime is determined by the parties witnessing it. If the crime is committed in the presence of a full court (twenty-three qualified judges), the perpetrator will be convicted of murder and suffer the full penalty; otherwise he will be classed as a culpable homicide (Sanh. 78a; "Yad," Roẓeaḥ, ii. 9).

As to the victim, the Rabbis understand by the term איש ("man"), used in connection with the crime (Ex. xxi. 12; Lev. xxiii. 17), a person; hence male or female, free or slave, old or young (Mek., *l.c.*; Sifra, *l.c.*; "Yad," *l.c.* 10). If young, by which is meant a new-born infant, it must be proved that it was not of premature birth; if prematurely born, it must be at least thirty days old to be considered a human being (Sifra, *l.c.*; Niddah 44b; "Yad," Roẓeaḥ, ii. 2). But the unborn child is considered as part of its mother (Sanh. 80b); killing it in its mother's womb is therefore a finable offense only (Mek., Nez. 8; B. Ḳ. 42b). And where the victim is a diseased person, even moribund, the killing will be considered murder, unless the malady was the direct result of an assault previously made on him by man or brute, and competent physicians declare it to be in itself inevitably fatal (Sanh. 78a; Mak. 7a; "Yad," *l.c.* ii. 8).

It matters not by what means the crime is accomplished (Sifre, Num. 160; Sanh. 76b), provided the fatality is the immediate and natural result of the assault (Sanh. 79; "Yad," *l.c.* iii.). Hence it is the duty of the court to investigate the nature of the missile used (Sanh. ix. 2, 79b; B. Ḳ. 90), the force of the blow, and the part hit (Sanh. 78a); or to note the height of the fall (Sanh. 76b), and estimate whether there was sufficient weight or force or momentum to cause the fatal result. If a sharp or pointed metal instrument was the weapon, neither weight nor bulk nor size will enter into consideration, since even a needle may cause death (Sanh. 76b; "Yad," *l.c.* iii. 4). Also, the physique and condition of the criminal and those of the victim at the moment of the assault must be compared, to determine the likelihood of the one causing the death of the other (Sanh. ix. 2; "Yad," *l.c.* 5). Where doubt arises as to whether the death was really the natural result of the assault, the benefit of that doubt is given to the culprit (B. Ḳ. 90a; Sanh. 79a). Thus, if the fatal missile be placed among others, and can not be identified, the smallest of the number is selected and considered as the one used (Tosef., Sanh. xii. 4; Mek., Nez. 6).

If the victim is found alive, the court must carefully examine his condition and ascertain the nature of the injuries and whether there is a probability of his recovery. If the diagnosis is favorable, the culprit is set at liberty after being assessed legal dam-

Diagnosing Injuries.

ages (see Damages), and he can not be again called upon to answer for his crime, even if the victim subsequently dies (Sanh. ix. 1, 78b; "Yad," *l.c.* iv. 3). If the court, however, regards the injuries as necessarily fatal, the culprit is placed in detention to await the final result. When death ensues the culprit is tried for his life; if recovery follows, he pays the amercements (Sanh. *l.c.*; "Yad," *l.c.* iv. 4). If, however, the victim improves sufficiently to give promise of ultimate recovery, and the court so diagnoses, even if his condition afterward grows worse and he dies, the favorable diagnosis will protect the culprit against retrial (Sanh. ix. 1, 78b; Tosef., B. Ḳ. ix. 6; comp. Yer. Sanh. ix. 27; "Yad," *l.c.* iv. 5).

The penalty for murder is death by the sword, slaying (הרג; see Capital Punishment). The duty of carrying out the sentence of the court devolves primarily upon the go'el (see above); but where the go'el shirks his duty, the court must see that it is performed by others (Sanh. 45b; Mak. 12b). If for some reason the legal death can not be inflicted, the convict may be put to death by any means possible (Sanh. *l.c.*; "Yad," *l.c.* i. 2).

HOMILETICS ("derush," "derashah" = "homily"; "darshan" [pl. "darshanim"], "darosha" = "preacher"): That branch of rhetoric which treats of the composition and delivery of sermons or homilies. Although from the very nature of the case provision had been made for public worship among the people of Israel from the earliest times, this was confined to the sacrificial ritual and to the Levitical, priestly, and musical functions. Of preaching as a feature of the service there is no trace till after the Exile. True, the Deuteronomist commands that the Torah be read to the people at the end of seven years, on the Feast of Tabernacles, "when all Israel is come to appear before the Lord" (Deut. xxxi. 11-13); and the Rabbis refer the institution of the religious address to Moses (Sifra, Emor, xvii.; Meg. 32a; Yalḳ., Ex. 408). Moreover, the belief was current that preaching was a very old institution, as is seen from the tradition ascribing activity in this direction to Noah (Sibyllines, i. 149; Sanh. 108a). Still it may be safely asserted that the preacher and the homily were late growths on the stem of Jewish religious development.

Traditional Antiquity of Preaching.

In the Bible the nearest approach to the art of preaching is found in the activity of the Prophets. These were not officials in any sense of the word, however, nor were their addresses delivered only on stated religious occasions or in fixed places devoted to religious purposes. They spoke as the spirit moved them, anywhere and everywhere they felt that circumstances made it necessary to do so. Some of their addresses were undoubtedly delivered on Sabbaths and holy days (see Isa. i. 10-17, lviii.), but not as part of the public services in the Temple; the "nabi" was more often in opposition to than in accord with the professional representatives of religion. Still, in spite of this, it remains true that the prophet was the forerunner of the preacher, and that the Prophets' addresses, though not an official religious institution, were the earliest sermons.

The real beginning of the exposition of Scripture as a homiletic exercise on the Sabbath, on holy days, and on other occasions when the people assembled for religious purposes is to be found in the custom, instituted by Ezra, of reading a portion of the Torah at the service and explaining or paraphrasing it in the vernacular (Neh. viii. 1-9, ix. 3). This translation or paraphrase was called Targum, and from it developed the practise of preaching in the synagogue—a custom that was in all likelihood in vogue as early as the fourth century B.C. (Zunz, "G. V." p. 330). Josephus ("Contra Ap." ii. 17) speaks of it as a very ancient custom (comp. Acts xv. 21); Philo mentions it as an important element of the public services ("De Septennario," vi.; "Quod Omnis Probus Liber," xii.); and in a fragment preserved in Eusebius ("Præparatio Evangelica," viii. 7, 12-13) the same author reports that the Jews of Rome assembled on Sabbaths in the synagogues, where they were instructed in the philosophy of their fathers ("Legatio ad Caium," xxiii.).

Beginnings of Sermons.

In the New Testament "teaching in the synagogue" is mentioned so frequently that by that time preaching must have become very general among the Jews (comp. Matt. iv. 23; Mark i. 21, vi. 2; Luke iv. 15, vi. 6, xiii. 10; John vi. 59, xviii. 20; Acts xiii. 42, xv. 21). The two heads of the Sanhedrin in the first century B.C., Shemaiah and Abṭalion, are distinguished by the title "darshanim" (= "preachers"; Pes. 70b). Doubtless the term "darshan" was originally applied to the expounder of the Law, and hence to the teacher of the Halakah; but the title lost this significance in the course of time, and became the designation of the preacher as such, who addressed the people in general, taught them the doctrines of religion and morality, comforted them in the grievous days that followed the destruction of the Temple, and expounded texts of Scripture not with a view to their halakic or legal interpretation, but to their haggadic or edifying possibilities. [Hence also "darash" and "darshan" for the allegorization of Scripture (Ḥag. ii. 1; Soṭah 49a; Gen. R. v. 2; comp. "doreshe reshumot," Mek., Beshallaḥ, 1, 5, and elsewhere).—K.]

After the Destruction of the Temple.

After the discontinuance of the sacrifices consequent upon the destruction of the Temple, prayer and the religious address were the elements of the services; all the rabbis of note instructed and solaced the people who flocked to hear them. Rabbi Meïr's sermons on Friday evenings and Sabbath afternoons attracted large congregations (Lev. R. ix. 9; Yer. Soṭah i. 16d). The sermons were delivered either in the synagogue or in the school. Preaching took place not only in public, but also on private occasions, as at weddings and funerals (Ber. 6b; Shab. 153a; M. Ḳ. 25b; Meg. 6a; Ket. 8b; Ned. 61b), upon departure from a house where hospitality had been enjoyed (M. Ḳ. 9b), or at the ordination of rabbis (Sanh. 14a). The expounder of the Law used to address the congregation through an interpreter called "meturgeman" or "amora" (Pes. 50b; Ḥag. 14a; Meg. 23b, 24a; M. Ḳ. 21a; Ket. 8b; Soṭah 37b; Sanh. 7b). The sentiment entertained for the interpreter was not always the most cordial, as may be inferred from the interpretation of the verse: "It is better to hear the rebuke of the wise than for a man to hear the song of fools" (Eccl. vii. 5). Says the Midrash (Eccl. R.) to this verse: "'It is better to hear the rebuke of the wise'—these are the darshanim, the preachers—'than the song of fools'—these are the meturgemanim, the interpreters who raise their voices aloft in song in order to be heard by the whole congregation."

The homiletic addresses of the rabbis of the Talmudic period are found in the Talmud, but particularly in the so-called midrashic collections. As far as can be distinguished from the remains that have been thus preserved, it appears that there was a regular form for the sermon. It consisted of three parts: (1) the opening or introduction ("petiḥa"), (2) the exposition proper of the text ("derush"), and (3) the conclusion. The preacher began by quoting a verse from some portion of the Bible other than the Pentateuch text, explaining the same by illustration or parable, gradually leading up to his text. This connecting of the introductory verse with the text was called "ḥaruz" (= "stringing together"), a term taken from the custom of boring pearls preparatory to stringing them together.

Thus, when preaching on the text, "And Abraham was old" (Gen. xxiv. 1), a rabbi began by quoting the verse, "The hoary head is a crown of glory; it shall be found in the way of righteousness" (Prov. xvi. 31, R. V.), and continued by illustrating it with the following incident:

"Rabbi Meïr went to Mimla, where he noticed that all the inhabitants were black-haired. He therefore said to them: 'Tell me, are you all descended from the house of Eli? as it is written: "And all the increase of thy house shall die as young men."' They answered, 'Rabbi, pray for us'; whereupon he said, 'Go and practise righteousness, and you will become worthy of old age.' Whence did he derive his reason for this statement? From the words 'A hoary head is a crown of glory.' And where is old age found? 'In the way of righteousness.' From whom dost thou learn this? From Abraham, of whom it is written: 'He will command his children to observe the way of the Lord, to do righteousness and justice'; therefore he was found worthy to reach old age, as it is written, 'And Abraham was old, well stricken in age'" (Gen. R. lix. 1).

The preacher, having thus led up to his text, explained it, and the ideas he derived from it, by parable, story, fable, allegory, or other extracts from the Bible. The Midrash is replete with such expositions, whereof the following may serve as an example:

Rabbi Ḥama is preaching from the text, "And Abraham gave all that he had unto Isaac. But unto the sons of the concubines, which Abraham had, Abraham gave gifts" (Gen. xxv. 5-6). Said the preacher: "Abraham gave Isaac not blessings, but gifts. The case was like unto that of a king who had a beautiful park, which he entrusted to a gardener. In it were two trees whose branches were interlocked: one tree was filled with the sap of life; the other, with the poison of death. Said the gardener, 'If I water the tree which flows with the sap of life, the other will flourish also; and if I do not water the tree containing the poison of death, the goodly tree will perish too.' Upon consideration he continued, 'I shall do my duty as gardener and water both trees; then let the owner of the park do as he will.' Thus also said Abraham: 'If I bless Isaac, the children of Ishmael and Keturah, who are also my children, will be included in the blessing; and if I do not bless the children of Ishmael and Keturah, how can I bless Isaac?' Upon consideration, he continued: 'I am but mortal: to-day I am here, and to-morrow in my grave. I can but do my duty. I will make gifts to all my children: the outcome rests with God, who will do what He wishes in His world.' When Abraham our father died God revealed Himself to Isaac, and blessed him, as it is written: 'And it came to pass after the death of Abraham that God blessed Isaac his son'" (Gen. R. lxi. 6).

The final portion of the homily consisted of a brief repetition of the ideas drawn from the text; and the preacher closed with a prayer of praise, usually the Ḳaddish.

The great homiletic collections in Hebrew literature date from the period immediately following the redaction of the Babylonian Talmud; viz., from the sixth to the tenth century, known usually as the period of the Geonim. During this era the Midrash Rabbah, the Pesiḳta de-Rab Kahana, the Midrash Tanḥuma, the Jerusalem Targum, and the Tanna debe Eliyahu were compiled. The Yalḳut Shim'oni dates from the eleventh century.

The "derashah," or sermon of the geonic period, was not so much a clearly worked-out exposition of a text as a string of midrashic passages. The sermon as a skilfully elaborated explanation of the text occurs in the preaching of Spanish darshanim of the post-geonic period, such as Jacob Anatoli and Naḥmanides in the thirteenth century and Nissim Gerondi in the fourteenth.

The Darshanim.

It was particularly among the Sephardic Jews in Spain, Portugal, Italy, the Orient, northern Africa, Holland, and England, between the fifteenth and the eighteenth century, that the darshanim flourished. Their sermons had a definite form. There were usually a double text, a verse of Scripture called "ma'amar," and a Talmudic or midrashic passage termed "nose ha-derush"; this was followed by an introduction that led to the derashah proper. This latter consisted of a great number of Scriptural verses and Talmudic and midrashic quotations which the preacher expounded, each quotation serving as an explanation of the preceding, and the last being used to interpret the text itself. The derashah closed with a prayer for the redemption and moral improvement of the people, many of the later darshanim using the concluding words: "May the Redeemer come to Zion, and may this be the will of God."

The rabbis themselves were the preachers. The sermon was delivered from the "almemar" in the synagogue at either the morning or the afternoon service. Funeral addresses were usually made in the cemetery; but on the death of a celebrated man they were delivered in the synagogue or the school. The sermons touched all or any points of interest in the lives and experiences of the hearers; and the preachers did not even hesitate to quote passages from the sages of pagan antiquity and to deduce moral lessons from them (see "J. Q. R." viii. 513).

The most celebrated preachers in the Spanish tongue were Isaac Aboab, Abraham Bibago, and Isaac Arama in the fifteenth century; Isaac Adarbi, Moses Albelda, Moses Almosnino, Solomon Levi, and Samuel Laniado, all of whom lived in the Orient, in the sixteenth century; Judah Bigo, Isaac Pardo, Solomon Algazi, Joshua Benveniste, and Solomon Almarillo, also in the Levant, in the seventeenth century. A number of celebrated preachers officiated in the Spanish congregation of Amsterdam in the seventeenth century; viz., Isaac Uzziel, Abraham Lombroso, Manasseh ben Israel, Saul Levi Mortara, and Joshua da Silva. All of these rabbis preached in Spanish; but whenever they published their "derashot," they did so in Hebrew, because they felt that by this means they could reach Jews everywhere.

In Italy.

Italy, too, had many Jewish preachers during this period; notably Judah Moscato, Samuel Judah Katzenellenbogen, Jacob Albo, Judah Leon di Modena, Azariah Figo, Jacob Zahalon, Judah Perez, and Isaac Cavallero. A number of Spanish-speaking Jewish preachers of note flourished also during the first half of the eighteenth century in various localities; among them may be mentioned Abraham Yiẓḥaḳi and Israel Algazi in Jerusalem, Elia Cohen in Smyrna, David Nieto in London, Isaac Abendana and Solomon Shalom in Amsterdam, and Abraham Isaac Castello in Leghorn.

In Germany and France.

In Germany and France the title "darshan" can be traced back as far as the eleventh century (Zunz, "G. V." p. 416); but preaching was not so general in these countries during the medieval period as among the Sephardim; this was due to the fact that the prayer-book was overloaded with piyyuṭim which so lengthened the service that there was no time left for the derashah. In truth, the German and French Jews paid far more attention to the study of the Halakah than to the cultivation of the Haggadah, with the result that in time the delivery of sermons ceased almost altogether. The only approach to preaching took place on three occasions of the year. Two of these were the Sabbath ha-Gadol (immediately preceding the Passover Feast) and the Sabbath Teshubah (in the penitential season between the New-Year's Day and the Day of Atonement). On these two Sabbaths the rabbi explained to the congregation the laws to be observed in connection with the coming holy days. The third occasion was the eve of the Day of Atonement, when a discourse more haggadic in character, dwelling on sin and repentance, was delivered.

The terrible persecutions experienced by the Jews in Germany and France, and the inferior social position which they occupied, combined so to depress the spirit that "thought was paralyzed, the ear was deafened to the word of comfort, and hope became a mute glance to the heights" (Zunz, *l.c.* p. 418). A further reason for the neglect of the sermon lay in the ever-increasing attention that was paid to the pilpulistic dialectics of the Talmud. The hair-splitting argumentation sharpened the wits, it is true; but it engrossed the interest of the rabbis and their pupils to the exclusion of all else. In lieu of discourses by regularly appointed preachers, occasional sermons were delivered in various communities by wandering preachers, who hailed for the most part from Poland and were called "maggidim" or "mokiḥim."

Eighteenth Century.

Preaching became somewhat more general, however, among German-speaking Jews in the seventeenth and eighteenth centuries; a number of darshanim flourished in Germany and Poland during this time. Some of the larger congregations had regularly appointed darshanim; and in places where there were yeshibot, preachers were never lacking. The smaller communities, it is true, never heard a derashah unless perchance a wandering maggid happened their way. The derashah among German-speaking Jews (which designation includes, of course, the Jews of Poland, Austria, Bohemia, Galicia, Moravia, etc.) reflected the pilpulistic method in vogue in the study of the Talmud. The object of the darshan was not so much religious and moral edification as the ingenious explanation of a text. His greatest feat was to spring a surprise upon the congregation by a new and startling interpretation of a passage; and the more unexpected the "ḥiddush" (novelty) and the more striking the "ḥarifut" (sharpness), the more praised was the darshan. Chief among the darshanim of this time were Jacob Möllin ha-Levi (MaHaRiL) and Jonathan Eybeschütz in Germany; Solomon Ephraim Lenczyz and Eliezer Fleckeles in Austria; and Ẓebi Hirsch Waidislow and Jacob Dubno in Poland. The last-named was particularly celebrated as a preacher, and is known as the "Dubnoer Maggid." He preached in the Judæo-German jargon, which was spoken by the people whom he addressed.

Beginnings of Modern Vernacular Sermons.

The first sermons in pure German were written by Moses Mendelssohn; they were three in number, and were preached in the synagogue of Berlin by Rabbi David Hirschel Fränkel in celebration of the victories of Frederick the Great at Rossbach and Leuthen and of the conclusion of the treaty of peace at Hubertsberg. These sermons were, however, exceptional. It was not until 1806 that preaching in the vernacular became a feature of the service in the synagogue. In that year Joseph Wolf inaugurated preaching in the German tongue in the town of Dessau; and he was soon followed by Israel Jacobson at Cassel; by I. L. Auerbach and Karl Siegfried Günsberg in the Beer private synagogue at Berlin; and by Kley and Salomon at Hamburg. Since then preaching in the vernacular has become general among the Jews in all lands where they have acquired modern culture. Where formerly the service was all-important, and of such length as to displace the derashah altogether from the Sabbath morning service, quite the contrary is now the case. The service has been much shortened, particularly by the elimination of the piyyuṭim; and the sermon in the vernacular has taken its place as a regular and perhaps the most popular feature of the services.

During the nineteenth century the Jews produced many notable preachers; the most prominent among those no longer living have been:

Gotthold Salomon in Hamburg; Isaac Noah Mannheimer in Vienna; Abraham Geiger in Breslau and Berlin; Samuel Holdheim and Michael Sachs in Berlin; David Einhorn in Mecklenburg-Schwerin; Samuel Hirsch in Luxemburg; Samson Raphael Hirsch and Leopold Stein in Frankfort-on-the-Main; Ludwig Philippson in Magdeburg; Adolf Jellinek in Vienna; M. Joël in Breslau; E.-A. Astruc in Brussels; Lelio della Torre in Italy; A. A. Wolff in Denmark; Leopold Löw in Hungary. Among the rabbis who emigrated to the United States a number became prominent as preachers; of these the most noteworthy were (besides David Einhorn and Samuel Hirsch) Isaac M. Wise, Max Lilienthal, Isaac Leeser, M. Jastrow, Liebmann Adler, G. Gottheil, Adolf Hübsch, B. Szold, James K. Gutheim, and Adolf Moses. Among the men who are still officiating in the pulpit are quite a number who have taken high places among the preachers of the day.

The sermon in the vernacular when introduced in Germany followed the Protestant model in form and structure; the old-style derashah gave way to the modern sermon. An introduction led to the text, after which followed the sermon proper, usually in three parts, ending with an appeal. Adolf Jellinek of Vienna gave a new turn to modern Jewish preaching by the skilful use of the old midrashim: he showed in his sermons what fine homiletical material for the modern preacher is to be found in the old midrashic collections. This gave a distinctiveness to the Jewish sermon; and the path that the great Viennese preacher blazed has been followed more and more by other Jewish preachers.

Adolf Jellinek.

Instruction in homiletics has been introduced into the Jewish theological seminaries both in Europe and in America. In the Berlin rabbinical seminary ("Hochschule") it is conducted by Sigmund Maybaum; in the rabbinical seminary at Breslau by Saul Horovitz; at Vienna by Adolf Schwarz; at Budapest by Wilhelm Bacher; at New York (Jewish Theological Seminary) by Joseph M. Asher; and at Cincinnati (Hebrew Union College) by David Philipson.

Many collections of sermons have been published both in Europe and in America which give evidence of the important position that preaching has taken in Jewish religious life during the past century: indeed, this has become the chief work of the rabbi. The juridical functions that at one time primarily enlisted his attention have been displaced by his homiletical activity; and this promises to be the case to an ever greater extent as the medieval codes become less and less the norms of authority in Jewish life.

HONEY (דבש): Often mentioned in the Old Testament as a choice article of food. It was eaten alone (Judges xiv. 9; I Sam. xiv. 27, *et al.*), as well as with other foods. In pastry it took the place of sugar (Ex. xvi. 31). It was, with milk, the food of children (Isa. vii. 15). Canaan is frequently praised as a land "flowing with milk and honey" (Ex. iii. 8, *et al.*; Jer. xi. 5; Ezek. xx. 6). Palestine abounded and still abounds in wild bees, but it is to be assumed that bees were domesticated in Palestine in Biblical times. In a few passages (*e.g.*, Gen. xliii. 11; Ezek. xxvii. 17) "debash" may denote artificial honey, or sirup, prepared from the juice of various fruits, which to the present day forms, under the name of "dibs," an important article of export in Syria and Palestine (comp. Bliss, "A Mound of Many Cities," pp. 69–71, who describes an apparatus for boiling down fruit into a sirup, found at Tell al-Ḥasi, the ancient Lachish). Though the first-fruits of honey were brought to the sanctuary (II Chron. xxxi. 5), it was excluded from sacrifices on account of its fermenting properties (Lev. ii. 11; comp. Pliny, "Historia Naturalis," xi. 15). "Because coming from an unclean animal" is the reason given by Philo, ed. Mangey, ii. 255, for its exclusion. On account of its sweetness, honey is used as a figure for gracious and pleasant things (for the words of God, Ps. xix. 11 [A. V. 10], cxix. 103; for wisdom, Prov. xxiv. 13, xxv. 16; for the speech of a friend, Prov. xvi. 24; Cant. iv. 11).

The Talmud dilates on the preciousness of honey. It is one-sixtieth as sweet as manna (Ber. 57b), and to infants manna had the taste of honey (Yoma 75b); it lighteth up the eye of man (*ib.* 83b; comp. I Sam. xiv. 27). A drink composed of honey, wine, and oil is mentioned under the name of "nomelim" or "onomelin" (*οἰνόμελι*; Ter. xi. 1; Shab. 139b). Honey by itself was considered a beverage (Maksh. v. 9; comp. Ḳid. 48b). In taking out the combs ("ḥallot"; comp. the Biblical "ya'arah," I Sam. xiv. 27; Cant. v. 1) from the hive ("kawweret"), which was made of straw or wickerwork, the bees were first stupefied by smoke; at least two combs were left in the hive as food for the bees during the winter (B. B. 80a; Kelim xvi. 7). Adulteration of honey by admixture of water or flour is referred to (Soṭah 48b; Maksh. v. 9). Honey was produced from dates (Ter. xi. 2; comp. Josephus, "B. J." v. 8). For the medicinal use of honey see Ber. 44b; Shab. 76b, 154b; B. M. 38a. The employment of honey in embalming is mentioned by Josephus ("Ant." xiv. 7, § 4; comp. Pliny, *l.c.* xv. 18; B. B. 3b). ḤONI HA-ME'AGGEL. See ONIAS (HA-ME'AGGEL).

HÖNIG, ISRAEL (EDLER VON HÖNIGSBERG): Austrian tobacco-manufacturer; born at Kuttenplan, Bohemia, Oct., 1724; died at Vienna Jan. 19, 1808. He is noteworthy in the history of the Austrian Jews as the first among them to be ennobled. The son of a poor merchant, he received his early instruction in Bible and Talmud from his father. At the age of thirteen he went to Prague to continue his Talmudic studies, but two years later was obliged to join his father in business. During his business trips in company with his brother Moses he became acquainted with the tobacco industry, which at that time was almost unknown in Austria. In 1752 he was able, with his father and brother, to take over the lease of the tobacco trade of Prague, which lease, under contract with the government, he extended to several Austrian provinces. During the Seven Years' war his firm held the imperial army provision contracts. The empress Maria Theresa rewarded his services by twice granting him letters patent ("Freibriefe"). In conformity with the wish of Emperor Joseph II., Hönig surrendered his contract in 1783, before its expiration, and the emperor then appointed him councilor and "Tabak- und Siegelgefälldirektor," and in the following year "Bankaldirektor." In 1789 the emperor conferred upon him the patent of hereditary nobility with the title "Edler von Hönigsberg."

HÖNIG, SIDONIE: Austrian actress; born at Vienna 1871; prize-winner at the Vienna Conservatorium. She made her début in 1889, at the Hoftheater, Carlsruhe, as *Jane Eyre* in "Die Waise aus Lowood." In 1890 she went to the Deutsche Volkstheater, Vienna. Two years later she joined the Stadttheater, Hamburg. In addition to *Jane Eyre*, her most successful rôles are *Desdemona, Rutland*, and *Philippine Welser*.

HÖNIGSMANN, OSWALD: Austrian deputy; born in Rzeszow, Austrian Galicia, Dec. 2, 1824; died Oct. 24, 1880. He was educated at Lemberg, where he graduated as doctor of law. His democratic tendencies delayed his admission to the bar in Lemberg for several years. Hönigsmann was a member of both the city and communal councils of Lemberg. He defended Dr. Florian Ziemialkowski, afterward minister, who was accused of participation in the Polish revolution of 1863.

Hönigsmann represented the city of Brody in the Galician Diet, and delivered (Oct. 8, 1868) an effective speech in behalf of the emancipation of the Jews, bringing about a victory for Franz Smolka's efforts in that direction. In 1872 he settled in Vienna. In 1873, after a hard campaign, Hönigsmann was returned to the Austrian Parliament from the Galician district of Kolomea-Sniatyn-Buczacz.

HONOR (Hebr. "kabod"; Aramaic, "yeḳar"; in A. V. used also as translation of "hadar"): Either the distinction or excellence manifested by a man, or the mark of distinction accorded to him. "Kabod," when a manifestation of God, is translated "glory" (Ex. xvi. 10, and elsewhere); occasionally also when predicated of man (Ps. lxii. 7; Prov. iii. 35); but when coupled with "hod" (= "glory") it is rendered "honor" (Ps. xxix. 2; Mal. i. 6). From God comes honor to man (I Chron. xxix. 12; Ps. viii. 6 [A. V. 5]; I Kings iii. 13; Dan. v. 18). Honor comes through wisdom (Prov. iii. 16, iv. 8) and fear of the Lord (*ib.* xxii. 4). "Before honor is humility" (Prov. xv. 33, xviii. 12); the humble in spirit upholds it (Prov. xxix. 33). Honor is due to God (Prov. iii. 9; Mal. i. 6; comp. Isa. xxix. 13; Prov. xiv. 31), to parents (Ex. xx. 12), to the aged (Lev. xix. 32), to the Sabbath (Isa. lviii. 13), and to those that fear the Lord (Ps. xv. 4).

Ben Sira (Ecclesiasticus) enlarges upon the idea of honor: the honor of parents ("Take not honor to thyself by the shame of thy father, for it is no honor to thee"; iii. 10, Greek); the honor of the priest (vii. 31); the honor of those that fear the Lord, whose honor is greater than that of judges and potentates (x. 19–24); the honor of self, or self-respect (x. 28–31, xli. 12). God being the source of all glory and honor (I Chron. xvi. 27; Ps. xcvi. 6, civ. 1), man, endowed by Him with honor (Ps. viii. 5–6), claims honor or recognition by his fellow man. "Let the honor of thy fellow man be as near to thee as thine own" (Abot ii. 10; see especially Ab. R. N. xv., Recension A; xxix., Recension B [ed. Schechter, p. 60]). "Who is honored? He that honors mankind; for it is said, 'For them that honor me I will honor'" (I Sam. ii. 30; Abot iv. 1). "Great is the honor due to mankind; it supersedes a prohibition of the Law" (Ber. 19b; comp. B. Ḳ. 79b). "He who seeks honor by the shame of his fellow man has no share in the world to come" (Gen. R. i.; comp. Meg. 28a). "He who honors the Torah is honored by mankind"; "Selfish desire for honor is one of the things that drive man out of the world" (Abot iv. 4, 6, 21). On the other hand, true honor "is one of the things befitting the righteous and of benefit to the world" (Abot vi. 8).

Honor is, above all, due to God, whose glory (honor) fills the world (Ber. 43b; Yoma 38a; Ḥag. 11b). Similar to the honor of God are the honor of parents (Yer. Peah i. 15c; Sifra, Ḳedoshim, i.; Ḳid. 30 *et seq.*) and the honor of the teachers of the Law (Ḳid. 32b *et seq.*; Shab. 114a); even if the latter be wiser in but one thing, honor is due them (Abot vi. 3; Pes. 113b); even a teacher who has forgotten his learning is entitled to honor (Ber. 8b). Honor is due to the assembly (Yoma 70a; Soṭah 39b; M. Ḳ. 21b); to pupils and associates (Abot iv. 12); to the wife (B. M. 59a; Ḥul. 44b); to oneself, through cleanliness (see Hillel in Lev. R. xxxiv.) and proper garments (Shab. 113b), as well as through the labor which renders man independent (Ned. 49b). "It is not the place that honors the man, but the man that honors the place" (Ta'an. 21b).
K.

HONORIUS: Emperor of the Western Roman Empire (395–423). The laws of Arcadius, the Eastern emperor, regarding the Jews were signed also by Honorius, and applied at first equally to the Western Empire. But Honorius later promulgated independent laws in reference to them, mostly with hostile intent. He annulled the decree exempting the Jews of Apulia and Calabria from holding curial offices ("Codex Theodosianus," xii. 1, § 10). In 396 he assured state protection to the "illustrious" patriarch of the Jews, but in a law dated from Milan, April 11, 399, he designated the patriarch as a "robber of the Jews," forbade the payment of the patriarch's tax, and seized for the royal treasury the sum already collected. It is possible that he merely intended thereby to erect a barrier between his dominions and those of his brother Arcadius. Five years later (July 25, 404), however, he again permitted as a special favor the collection of the patriarch's tax (*ib.* xvi. 8, § 17). On April 22, 404, he decreed at Rome that Jews and Samaritans should not be admitted into the army (*ib.* xvi. 8, § 16), a decree that the Jews certainly did not regard as a deprivation, but as a privilege.

From that time on the laws of the Western empire were in general more favorable than those of the Eastern. In 409 the authorities were enjoined to respect the Sabbath of the Jews, and neither to call them into court nor impose work upon them on that day (*ib.* ii. 8, § 3); but in 412 this law was changed. At the same time disturbance of the Jewish worship and robbing of synagogues were forbidden, and Jews were even permitted to keep Christian slaves, on condition, however, of not converting them to Judaism. Honorius also permitted them to study and practise law, remarking that their unfitness for military service did not imply unfitness for the legal profession. Baptized Jews were permitted to return to Judaism.

G. S. Kr.

HOOGSTRATEN (HOCHSTRATEN), JACOB VAN: Belgian controversialist; born at Hoogstraeten, Belgium, about 1460; died at Cologne Jan. 21, 1527. He studied at Louvain and Cologne, and became prior of a Dominican convent, professor of theology at Cologne University, and inquisitor (*censor et quæstor fidei*) in the archbishoprics of Cologne, Mayence, and Treves. A fanatical opponent of the humanists and of the Reformation, he exercised a strong influence in the councils of the Church. He took under his protection the baptized Jew John Pfefferkorn, and assisted him in his attacks upon his former coreligionists and upon Reuchlin. In his ambition to emulate the example of his Spanish predecessors, Torquemada and Ximenes, he attacked the Talmud and other Jewish books, with their defenders. With his assistance, Pfefferkorn, on Aug. 19, 1509, secured from the emperor Maximilian authority to confiscate and examine all Jewish writings and to destroy those directed against the Christian faith. When these plans failed, Pfefferkorn turned upon Reuchlin, who had given a formal opinion against the suppression of the Jewish books. Attacked by Pfefferkorn (1511) in a gross libel under the title of "Handspiegel," Reuchlin retorted in his "Augenspiegel." Hoogstraten and the other members of the Cologne faculty declared the "Augenspiegel" a dangerous book, and called upon its author to recant. Reuchlin successfully refuted their accusations in "Defensio Contra Calumniatores Suos Colonienses" (Tübingen, 1513).

Notwithstanding an imperial edict imposing silence upon both parties, the Dominicans continued the controversy. In his capacity as inquisitor, and without authorization from his provincial, Hoogstraten summoned Reuchlin (Sept. 15, 1513) to appear within six days before the ecclesiastical court of Mayence to be tried on the charges of favoring the Jews and of heresy. On Sept. 20, with a number of Dominicans, Hoogstraten arrived at Mayence, and opened the session as accuser and judge. He was encouraged in his procedure by the universities of Cologne, Louvain, and Erfurt, which had declared against Reuchlin. At this point Archbishop Uriel of Mayence interfered; and Pope Leo X. authorized the Bishop of Speyer to decide the question. Meanwhile Hoogstraten had Reuchlin's "Augenspiegel" publicly burned at Cologne. On March 29, 1514, the Bishop of Speyer pronounced judgment in favor of Reuchlin, and condemned Hoogstraten to pay the expenses incurred (111 guilders).

Against this decision Hoogstraten appealed to the pope, founding his hope of success upon the venality of the court of Rome. "At Rome everything can be had for money," he used to say. At Rome he made use of all the means at his disposal, but he had to content himself with a decision of the pope indefinitely postponing the trial (July, 1516). The Dominicans, intimidated by Knight Franz von Sickingen, divested Hoogstraten of the offices of prior and inquisitor. But four years later, Jan. 23, 1520, the pope reversed the judgment of the Bishop of Speyer, condemned Reuchlin's "Augenspiegel," and reinstated Hoogstraten.

During these four years Hoogstraten and Ortuin Gratius were the butt of satirical attacks in the "Epistolæ Obscurorum Virorum." In an "Apologia" (Cologne, 1518), addressed to the pope, Hoogstraten defended himself against such attacks, and especially against George Benignus, a warm defender of Reuchlin, and stigmatized the latter as a heretic and a champion of the Jews. Against this pamphlet Reuchlin, Busch, and Hutten addressed letters to Hermann von Neuenaar, who published them under the title "Epistolæ Trium Illustrium Virorum." Neuenaar, who, in a letter to Emperor Maximilian, had called Hoogstraten "the pestilence of Germany," also published an apology of Reuchlin's entitled "Defensio Nuper ex Urbe Roma Allata," which Hoogstraten answered in "Apologia Secunda" (Cologne, 1519). In the same year he wrote "Destructio Cabalæ," in which he endeavored to refute Reuchlin's cabalistic works, but showed his own ignorance of this literature.

In Luther Hoogstraten saw the most dangerous enemy of the Church. Chiefly at his instigation, Luther's writings were burned at Cologne (Nov. 27, 1519). Hoogstraten's "Colloquia cum Divo Augustino" (1521), "De Christiana Libertate Tractatus V Contra Lutherum" (1526), and "Disputationes Contra Lutherum Aliquot" were directed against Luther. In these and in other polemical writings he defended the worship of saints, the celibacy of priests, and other institutions of the Church, and justified the burning of two heretics for which he was mainly responsible.

D. S. Man.

HOORNBEEK, JOHN: Dutch controversialist of the seventeenth century. He was the author of "Libri VIII pro Convincendis et Convertendis Judæis," a manual for missionaries to the Jews, with copious prolegomena (Leyden-Amsterdam, 1655). Although he was apparently in sympathy with the Jews, his real purpose was to attack their religion. These eight books, without the prolegomena, had already appeared under the title "Disputationes Anti-Judaicæ" (Utrecht, 1645). He also wrote "Summa Controversiarum Religionis cum Infidelibus," a manual for missionaries to the heathen (Frankfort-on-the-Main, 1697).

Bibliography: Fürst, *Bibl. Jud.* i. 407; Grätz, *Gesch.* x. 118.

D. S. Man.

HOPE: The expectation of something desired. The Hebrew terms for "hope" are "tiḳwah" and "seber," while "miḳweh" and "kislah" denote "trust"; and "toḥelet" signifies "expectation."

——**Biblical Data:** Hope, a characteristic element of religion in general, is fundamentally such in the Old Testament.

"The Lord is my portion, saith my soul; therefore will I hope in him. The Lord is good unto them that wait for him, to the soul that seeketh him. It is good that a man should hope and quietly wait for the salvation of the Lord" (Lam. iii. 24-26). "Trust ye in the Lord forever" (Isa. xxvi. 4). "To God alone silently submit, O my soul; for my hope depends upon him" (Ps. lxii. 5, Hebr.; comp. *ib.* lxxi. 5).

This hope was kindled by the firm belief that the Lord, the Creator of the world, controls all things for the special happiness of man. This was especially felt in regard to Israel, God being the Redeemer (Ex. vi. 6-8; comp. Deut. vii. 6; Isa. xliii. 4, lxv. 19-25; Ps. ciii. 13). Israel was the chosen people, and God, the friend of the Patriarchs, its special guardian (Isa. xli. 8, xlviii. 20). Relying on the experiences of the past and on the promise of their God for the future, the hope of the people naturally turned to the Lord in all emergencies. "O the hope of Israel, the savior thereof in time of trouble" (Jer. xiv. 8; comp. *ib.* xvii. 13, l. 7; Ps. xlvi. 5, cxix. 116).

In the darkest hour of adversity the Prophets did not despair for Israel. When Jerusalem was desolate and in captivity, the voice of prophecy spoke most confidently, pointing back to the divine guidance that had watched over the race. Nor was the hope of a brighter future ever entirely lost by the people; especially did it increase after the Maccabean rising. Whenever any incongruity appeared between their actual condition and the belief that the Israelites were especially favored by Providence, refuge was taken in the hope of the establishment of the kingdom of God. When Antiochus Epiphanes (175-163) assailed the religion of the Fathers, Daniel dreamed of the kingdom of Heaven. The righteous nation, being immortal, was to be delivered from thraldom and ushered into an era of peace and prosperity; and from that kingdom belief in the true God was to spread over the face of the earth (see PROPHECY).

Hope was further based upon the conviction that God was the moral governor and judge of the world. Thus, the ever-recurring theme of prophecy and psalm and the basic thought of the Wisdom literature are the final vindication of virtue and the destruction of vice. "The hope of the righteous shall be gladness: but the expectation of the wicked shall perish" (Prov. x. 28; comp. Ps. ix. 19, xxxiii. 5, xlvii. 2 *et seq.*, xcvii.). This belief stayed the Jewish mind when face to face with the great mysteries of life. No matter what were the doubts produced by foreign doctrine, confidence in the moral government of the universe remained steadfast.

"Is not thy fear [of God] thy confidence, and thy hope the integrity of thy ways?" (Job iv. 6, Hebr.). "Blessed is the man that maketh the Lord his trust" (Ps. xl. 4). "God is our refuge and strength, a very present help in trouble" (*ib.* xlvi. 1; comp. Job v. 16; Ps. lvii. 3, lxxxv. 9; Isa. liv. 10).

——**In the Apocrypha and the Talmud:** In the Apocrypha the following passages occur:

"Trust in Him, and He will help thee; order thy ways aright and set thy hope on Him" (Ecclus. [Sirach] ii. 6). "Whatsoever is brought upon thee, take cheerfully, and be patient when thou art changed to a low estate" (*ib.* ii. 4). "Ye that fear the Lord, believe Him; and your reward shall not fail. Ye that fear the Lord, hope for good, and for everlasting joy and mercy" (*ib.* ii. 8-9). "For though they be punished in the sight of men, yet is their hope full of immortality" (Wisdom iii. 4). "But by such works hast Thou taught Thy people that the just man should be merciful, and hast made Thy children to be of a good hope" (*ib.* xii. 19). "There is promised us an everlasting hope" (II Esd. vii. 50). "For my hope is in the Everlasting" (Baruch iv. 22; comp. Ecclus. [Sirach] xiii. 6, xxiv. 18, xxxiv. 13, xlix. 10; II Macc. ii. 17; vii. 11, 14, 20; ix. 20).

The following are some of the Talmudic references to hope:

"To him who puts his hope in God will the Lord be a protection in this world and in the world hereafter" (Men. 29b). "Those who have faith in God need not worry about the coming day" (Soṭah 48b). "Man ought to accustom himself to say, 'All that happens, God lets happen for the best'" (Yoma 76a). "All Israel will inherit the future world" (Sanh. x. 1).

Hope in a brighter day, based upon ardent faith in God's justice and in His special friendship for the descendants of Jacob, has been the stay and consolation of the Jew throughout the ages. The darker the present, the brighter appears the future. Comp. Agadat Bereshit, § 42; Midrash ha-Gadol, pp. 414 *et seq.*

K. A. G.

HOPHNI (חפני): The older of Eli's two sons who officiated as priests in the tabernacle of Shiloh (I Sam. i. 3). Hophni and his younger brother Phinehas are reproved as sons of Belial, and as rapacious and lustful (I Sam. ii. 12-17, 22). Their misdeeds provoked the indignation of the people, and the divine curse was pronounced first by an unknown prophet and afterward by Samuel (I Sam. ii. 23-36, iii. 11-14). They were both killed on the same day, in a battle between the Israelites and the Philistines (I Sam. iv. 11). The Talmudists do not agree as to the wickedness of both brothers: Rab concluded (Shab. 55b) that Phinehas was not guilty of any of the crimes mentioned, but that Hophni alone committed them; but R. Jonathan, quoted by R. Samuel b. Naḥmani (*l.c.*), declares that neither was wicked, and that the words in which the crimes are imputed to them in I Sam. ii. 22 have a figurative meaning in this instance.

E. G. H. M. SEL.

HOPHRA (חפרע): King of Egypt at the time of the destruction of Jerusalem by Nebuchadnezzar. The name occurs but once in the Bible (Jer. xliv. 30); in the other passages where this king is referred to (Jer. xxxvii. 5, 7, 11; Ezek. xxix. 2 *et seq.*) he is called "Pharaoh." He is to be identified with the *'Ουάφρης* of Manetho and the *'Απρίης* of Herodotus and Diodorus. Hophra was the fourth king of the twenty-sixth dynasty, the son of Psammetichus II. and grandson of Necho. When Jerusalem was besieged by Nebuchadnezzar, Hophra marched to the assistance of the Jews, and the siege was interrupted for a short time (Jer. xxxvii. 5, 7, 11). According to Herodotus (ii. 161), Hophra also helped the Tyrians against Nebuchadnezzar, and had a certain degree of success. It is very likely that the words of Ezekiel xxix. 18 refer to this event. Jeremiah (xliv. 30) and Ezekiel (xxix. 2-xxxii.) predicted the fall of Hophra and Egypt through the Babylonians; but according to historical statements these predictions were not fulfilled. Hophra was dethroned by Amasis and strangled by the mob (Herodotus, ii. 169).

E. G. H. M. SEL.

HOR (הר ההר): **1.** Mountain on the border-land of Idumæa; the next stopping-place after Kadesh of the children of Israel during their wanderings in the wilderness; famous as the scene of Aaron's death (Num. xx. 22 *et seq.*, xxxiii. 37, and elsewhere). Josephus ("Ant." iv. 4, § 7), without giving the name, says that Aaron died on a mountain near Petra; the same topography is indicated by Eusebius ("Onomasticon," *s.v.* "Or"). This corresponds with the situation of Jabal Harun ("the mountain of Aaron"), a two-peaked mountain on the eastern edge of Wadi al-'Arabah. The double peak may account for the Biblical name "Hor ha-Har" ("a mountain on a mountain"; comp. Rashi to Num. xx. 22).

2. Mountain which marked the northern limit of the inheritance of the Israelites in the land of Canaan (Num. xxxiv. 7-8). The line was to be drawn from the Mediterranean Sea to Mount Hor, and thence to Hamath. The term "Hor ha-Har" (Num. *l.c.*) indicates, probably, some conspicuous mountain, perhaps Mount Hermon. But pseudo-Jonathan renders it, as well as No. 1, by "Ṭawros Umanos"; and the Jerusalem Targum renders it by "Ṭawros Manos" (= "Mount Amanus"), apparently identifying it with the "Amana" of Cant. iv. 8. In the Talmud the northern limit of the Holy Land is Ṭure Amnon (Giṭ. 8a) or Ṭure Amanah (Yer. Sheb. vi. 1), on which mountain there is a place called "Ḳapelaria." According to Estori Farḥi ("Kaftor wa-Feraḥ," ed. Berlin, ii. 42), the Biblical Mount Hor is to be identified with Jabal al-Aḳra', the ancient Mons Casius, between Latakia and Antioch. He supports his contention by identifying several places in the territory of Asher, along the northern frontier, with towns in the neighborhood of Jabal al-Aḳra'. His contention is also supported by the Targum of Jerusalem, which renders the "Hamath" of Num. xxxiv. 8 by "Antioch." Schwarz ("Das Heilige Land," p. 18), refuting Estori's opinion, identifies Mount Hor with the Ras al-Shaḳḳa, on the road from Tripoli to Beirut.

HORAM: King of Gezer at the time of the war between Joshua and the inhabitants of the land of Canaan. Horam went to the assistance of Lachish, but Joshua slew him and all his people (Josh. x. 33).

E. G. H. M. Sel.

HORAYOT ("decisions"): The name of a Talmudic treatise in Seder Neziḳin ("damages"), the fourth in order of the six "sedarim" of the Mishnah. In the Mishnah edition it occupies the tenth and last place in the "seder"; in the Babylonian Talmud the ninth place, in the Jerusalem Talmud the eighth. The treatise has gemara in both Talmuds. It consists of three chapters in the Mishnah and of two in the Tosefta, and treats of the special sin-offerings to be brought by the community, the anointed priest, and the "nasi" (ruler) for sins committed unwittingly. The Biblical law (Lev. iv.) distinguishes, with regard to the kind of sacrifice and the manner of offering, between a private individual, an anointed priest, a nasi, and an entire community. A private individual who transgressed a commandment unwittingly ("shogeg") was required to offer a female kid, a prince ("nasi") a male kid, and an anointed priest or a community a ram. Various forms connected with the offering of the sacrifice are also prescribed for each case. The discussion of these laws occupies the greater part of the treatise.

Sacrifice for Unintentional Sins.

Ch. I. The special communal offering may be brought only when the sin was committed in accordance with an erroneous enactment passed by the higher court. Maimonides (introduction to commentary on the mishnah of this treatise) sums up the conditions necessary for the bringing of such a sacrifice, found in the first and second chapters, as follows: (1) the head of the Sanhedrin and all its members must have been present when the decision was rendered; (2) every one of them must have been fully qualified to serve as a member of that body; (3) the decision must have been passed by a unanimous vote; (4) the error must concern a Biblical law; (5) at least a majority of the people must have followed the decision in practise; (6) those who followed the decision in practise must have been unaware of the mistake, and must have supposed that they were acting in accordance with law; (7) the error must have been due merely to ignorance of a matter of detail, and not to ignorance of the existence of the whole Biblical law in question. Unless these conditions are present every one of those who has acted in accordance with the erroneous enactment must bring an individual offering.

Ch. II. The anointed priest who had interpreted some Biblical law erroneously and had acted accordingly was required to bring a special sacrifice. The same conditions that governed the case of an erroneous enactment of the court with regard to the practise of the community governed also the erroneous decision of the anointed priest with regard to his own practise. The laws regarding the special sacrifice of the nasi are also discussed in this chapter.

Precedence.

Ch. III. In the cases of the anointed priest and the nasi, whose tenure of office is temporary, a question might arise as to the kind of sacrifice they must bring for sins committed before entering upon their respective offices, or after relinquishing them. If the sin was committed before they assumed office, they were both regarded as private individuals, and were obliged to bring a female kid. If, however, the sin was committed after they had relinquished their offices, the nasi was regarded as an individual, while the status of the anointed priest was unchanged. After the Mishnah has defined the term "anointed priest" and determined his position in the Temple, it enters upon a discussion of matters of priority—as between man and woman in cases of charity, or as regards the return of a lost object. It then enumerates the various castes among the Jews and their order of priority with regard to the calling up to read the Law, etc.—priests, Levites, Israelites, illegitimates, "netinim" (the Gibeonites), proselytes, and freed slaves. In conclusion, the following significant remark is made: "This is only when all other things are equal, but in the case of an ignorant priest and a scholar who is an illegitimate, the latter must precede the priest in all honors."

The gemara is mainly devoted to the interpretation of the laws of the Mishnah, with a few haggadic digressions in the third chapter. Rashi's commentary is much more profuse here than in other parts of the Talmud, and the tosafot published in the new Wilna edition of 1889 extend only to the first two chapters, the style and method, mainly of an interpretative nature, being very different from those of the tosafot to other books. In the same edition, besides the commentary of Hananeel, there is a commentary called "Tosafot ha-Rosh," attributed to Asher b. Jehiel. The laws of Horayot are classified in Maimonides' "Yad" under "Shegagot," xii.-xv.

E. C. J. H. G.

HOREB, MOUNT. See Sinai.

HOREM (חרם = "sacred" or "fortified"): Fortified city of Naphtali, named with Iron and Migdalel (Josh. xix. 38). It is generally identified with the modern Ḥurah, west of Kedesh-naphtali.

E. G. H. M. Sel.

HORESH: The word בחרשה, indicating the place in the wilderness of Ziph where David hid himself from Saul (I Sam. xxiii. 15, 18, 19), generally translated "in the wood," is taken in the R. V. (*ib.* xxxiii. 15, margin) and by several modern critics as a proper name. The final ה is considered by them as the local "postpositive," though it never occurs elsewhere in a word with the preposition ב. The word has the appearance of a proper name; if it be one it must be translated "in Horeshah." The Septuagint version renders *'εν τῇ καινῇ*, reading בחרשה, "in the new city."

E. G. H. M. Sel.

HOR-HAGIDGAD (חר הגדגד): Place in the desert where the Israelites encamped; said to be situated between Bene-jaakan and Jotbathah (Num. xxxiii. 32, 33; in R. V. "Hor-haggidgad"). In Deut. x. 7 the name is changed to "Gudgodah" (הגדגדה). Robinson ("Researches," i. 267) mentions a Wadi al-Ghuḍaghiḍ on the west side of the 'Arabah.

E. G. H. M. Sel.

HORI (החרי; plural, **Horites,** החרים = "the cave-dwellers"): **1.** Surname of Seir, who, with his descendants, the Horites, occupied the land subsequently called "Edom" (Gen. xxxvi. 20 *et seq.*). The name occurs in the plural only once (Deut. ii. 12), and with the definite article; its meaning indicates the nature of the dwellings of the aboriginal inhabitants of Idumæa, and is confirmed by the presence of excavated dwellings in the mountains of Edom. The Horites are first mentioned in connection with their defeat by Chedorlaomer and his allies in the time of Abraham (Gen. xiv. 6). They were finally destroyed by the Edomites, who occupied their land (Deut. ii. 12, 22; see Edom).

2. Son of Lotan, a Horite (Gen. xxxvi. 22; I Chron. i. 39).

3. Father of Shaphat, who represented the tribe of Simeon among the spies sent by Moses into Canaan (Num. xiii. 5). In this case the name is written חורי, and may mean "the noble."

E. G. H. M. Sel.

HORMAH (חרמה = "inviolable," "asylum"; in Biblical folk-etymology it is explained as signifying "under the ban ["ḥerem"]," "devoted to destruction"): Name of a city, usually found without the article, but in Num. xiv. 45 (Hebr.) written "ha-Ḥormah." It is not certain whether only one, or more than one, place is represented by the name, though the latter is more probable. Hormah is mentioned between Chesil and Ziklag in the list of the "uttermost cities" of Judah, toward the territory of Edom "southward," in the Negeb (Josh. xv. 21, 30-31). It is also among the places allotted to Simeon, and is mentioned between Bethul and Ziklag (Josh. xix. 4-5; I Chron. iv. 30).

The "elders of Judah . . . which were in Hormah" were included by David among those that shared in the distribution of the spoils captured from the Amalekites (I Sam. xxx. 30). Situated in the southwestern part of the Judean Negeb, this Hormah can not well be held to be identical with the Hormah described as being in Seir, though modern critics suggest the emendation "mi-Se'ir" = "*from* Seir," in the account of the repulse the invading Israelites met at the hands of the Canaanites (Deut. i. 44). This Hormah must have been situated not far from Kadesh (Num. xiv. 45). It is not plain to which of these two localities (if they are distinct) the narrative that is twice given to account for the name (Num. xxi. 1-3; Judges i. 17) refers. The first passage suggests that the older native name was "Arad"; with the neighboring cities the place was destroyed by the Israelites during their earlier wanderings, as a punishment for the hostilities of its king. Hence the new name, "devoted to destruction." The second passage (Judges i. 17) gives "Zephath" as the original appellation; Judah aiding Simeon to destroy it, it came to be known as "Hormah." Some critics (among them Johannes Bachmann) have contended that the city was twice destroyed; others explain that Num. xxi. 3 narrates by anticipation the destruction of the town by Judah and Simeon.

Arad and Zephath must then also be held to be identical, which raises new difficulties. For this reason the change of "Zephath" into "Arad" in the reading of Judges i. 17 has been suggested, while Moore ("Judges," p. 36) would omit the words "melek Arad" in Num. xxi. 1 (Hebr.) as an interpolation. This would leave the two passages without any connection, except in that they both contain explanations of the name "Hormah." Robinson connects Zephath with the pass Nakb al-Ṣafa, southeast of Kurnub ("Researches," 2d ed., ii. 181). Rowlands identifies it with Sebata or Sebaita (see Williams, "Holy City," 2d ed., i. 464), and is supported by Palmer ("The Desert of the Exodus," pp. 371 *et seq.*). Moore (*l.c.*) rejects both identifications. Cheyne ("Encyc. Bibl.") solves the difficulties by the transposition of the consonants of the name חרמה to read רחמה, which, of course, is then brought into relation with the Jerahmeelites. E. G. H.

HORN, EDUARD. See Einhorn, Ignatz (Eduard Horn).

HORNET. See Insects.

HORNS OF MOSES: Owing to the representations of the old painters and sculptors, it has become a wide-spread belief that Moses, when he came down from Mount Sinai with the tables of the Law, had two horns on his forehead. This strange idea, however, is based upon a wrong interpretation of Ex. xxxiv. 29, 35, והנה קרן עור פניו ("And behold the skin of his face shone"), in which קרן means "to shine" (comp. Hab. iii. 4, קרנים מידו לו = "brightness was on his side").

The old translations give קרן = "shine," with the exception of Aquila and the Vulgate, which read "his face had horns." This misunderstanding, however, may have been favored by the Babylonian and Egyptian conception of horned deities (Sin, Ammon), and by the legend of the two-horned Alexander the Great (see the Koran, sura xviii. 85).

HORNTHAL, FRANZ LUDWIG VON: German jurist and author; born in Hamburg March 5, 1763; died at Bamberg June 27, 1853. After studying at Bamberg he was appointed teacher to the pages of the Bishop of Bamberg. A few years later he established himself as an attorney at law. In 1803 he became district president ("Landescommissar"), and then attained in quick succession the positions of "Landesdirectionsrath," "Stadtcommissar," and chief of police. In 1806 he became "Regierungscommissar," and judge at the supreme court of justice of Franconia. At this time he was called upon to regulate the disorganized financial affairs of the city of Nuremberg. In 1809 he visited Vienna. During the War of Liberation (1813–15) he was very active in recruiting and equipping volunteers in Bavaria. For the services thus rendered to his fatherland he was ennobled (1815). About this time he became mayor of Bamberg, and through his organization of philanthropic and other institutions rendered the greatest services to his fellow citizens.

Hornthal wrote: "Ueber das Anlehensgeschäft der Vereinigten Bayerischen Gutsbesitzer," Bamberg, 1824; "Ansichten über den Wechselseitigen Einfluss der Umwälzung des Staats und des Staatscredites," 1816; "Werden die Deutschen Bundesfürsten an einem Feindlichen Einfalle in Spanien Theil Nehmen?" Nuremberg, 1823; "Ueber den Congress zu Verona," *ib.* 1822; "Darstellung der Ereignisse bei dem vom Fürsten Hohenlohe Unternommenen Heilverfahren," Bamberg, 1822; "Darstellung der Verhältnisse der Stiftungen in Bamberg," *ib.* 1821; "Ueber Souverainetät, Staatsverfassung und Repräsentativform," Nuremberg, 1816; "Ueber das Grossherzoglich Weimar'sche Strafurtheil Gegen den Hofrath Ofen," *ib.* 1819; "Vorschläge über Abwendung der Fruchttheuerung," *ib.* 1817; "Briefe aus Bamberg über das Wundervolle des Fürsten v. Hohenlohe," Erlangen, 1821; "Minister Londonderry und Sein Federmesser," Nuremberg, 1822.

Bibliography: *Jüdischer Plutarch*, ii. 91-94.

S.

HOROLOGY: The science of the measurement of time. Portions of time are distinguished in the first chapter of Genesis. The term "from time to time" (I Chron. ix. 25) means from hour to hour, that is, a complete day, just as in the Talmud and in rabbinical literature מעת לעת denotes twenty-four hours, a full day. The phrase עתים ורגעים ("hours and minutes"; Ber. 3b) shows that עת is sometimes used to distinguish the hour. The Hebrew word רגע is used in the Talmud to describe also a second, a moment. The Chaldaic equivalent for "hour" is שעה, שעתא (Dan. iv. 16, 30 [A. V. 19, 33]). Other Biblical expressions of time are עצם היום ("noon"), צהרים ("midday"), יום גדול ("high day"), and חצי הלילה or חצות ("midnight"). According to the Talmud, the night is divided into three or four parts (משמורות = "watches"; Ber. 3a). Other subdivisions of the day are שחר ("dawn") and בין הערבים ("twilight"). In the Midrash the hour is divided into quarters termed "hands" (Yalḳ., Gen. 76). A "hand" signifies a quarter of an hour, as the hands and feet are the four principal members of the body.

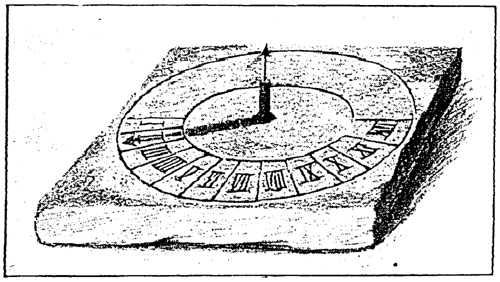
The length of the hour is not given in the Bible, but in the Talmud, as stated above, twenty-four hours constitute a day. The hours of the night begin with sunset; and twelve hours from this the twelve hours of the day begin. The third hour of the day corresponds to 9 a.m.; the sixth hour to noon; the ninth hour to 3 p.m.; and so on. It is very probable that the same division of hours prevailed in Biblical times. The apportioning of twelve hours each to the day and the night was doubtless due to the Babylonian astrologers or authorities on horoscopes, who thought that the twelve constellations (מזלות; Ber. 32b) represented the hours, each having a supernatural power over a certain hour of the day or the night.

The device of the circle known as the dial, divided into twelve equal segments with a rod in the center, was probably first invented to point out the constellations. "Whoever wishes to know, may take a straight-cut rod and set it up on the level [in the center] between twelve fingers [inches, spaces] and measure its shadow for twelve degrees" ("Baraita di-Shemuel ha-Ḳaṭan," iii. 11, Frankfort-on-the-Main, 1863). Shabbethai b. Abraham (tenth century) writes that a Gentile of Babylon taught him the art of measuring the rod-shadow described in the Baraita of Samuel (Zunz, "G. V." p. 98).

Sun-Dial.

The first use of the sun-dial (צל המעלות = "the shadow of the degrees"; Isa. xxxviii. 8) in Biblical times is generally credited to Ahaz, King of Judah (739 b.c.); and some authorities suppose that he imported it from Assyria when he visited Tiglath-pileser at Damascus, where he also copied the architecture of the altar (II Kings xvi. 10). Probably Ahaz constructed the dial in connection with the "covert of the Sabbath" (*ib.* verse 18), explained by Rashi to be a shaded place which Ahaz had built in the court of the Temple for rest and recreation. See Dial. The Talmud, however, does not credit the dial to Ahaz personally, as it must have been in existence before him, and it is not mentioned in his lifetime.

The sun-dial is known in the Mishnah as the "hour-stone" (אבן השעות); and its style or gnomon is called מסמר (= "nail" or "wire"; 'Eduy. iii. 8). Maimonides (Commentary to 'Eduy. *ad loc.*) describes the contrivance as "a broad and level stone set in the ground, with a circular line drawn on it; a perpendicular style [in the center] is raised on a perpendicular projection, in length usually a little less than that of a quarter of the segment indicated on the stone. The shadow of the style at every hour is marked and numbered on the circle of the stone."



Sun-Dial as Described by Maimonides.
(After a sketch by J. D. Eisenstein.)

The Gold Candelabrum.

The Mishnah relates that Helen, the mother of Monobaz II., King of Adiabene, made a gold "nebrashta," which she caused to be placed in front of the entrance to the Temple (Yoma iii. 10). The Tosefta adds that at daybreak sparks were emitted by the nebrashta; and it was then known that it was time to say the "Shema'" (*ib.* ed. Zuckermandel, ii. 183; comp. Gem. Yoma 37b). The Temple was situated on the west side of Mt. Moriah, and the nebrashta at its entrance on the east side. The latter thus caught the first rays of the sun, and served the useful purpose of indicating to the multitude in front of the entrance the exact time of sunrise. There are two interpretations for "nebrashta": one amora defines it as a candelabrum; another as a "ḳonbeta" (Yer. Yoma iii. 41b; comp. Jastrow, "Dict." *s.v.* קונביתא = "snuffers").

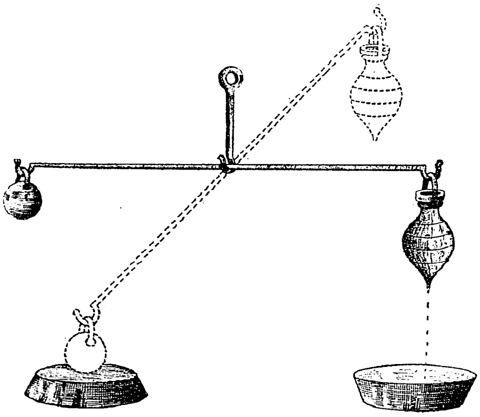
The sun-dial in its primitive state was a series of marks showing the position of the sun's shadow on a wall at various hours of the day. The Midrash, commenting on Abraham's visitors who predicted the birth of Isaac at the anniversary of "this existing hour" (כעת חיה; Gen. xviii. 10), states that the visitors made a scratch on the wall, and said "when the sun reaches this spot" (Pesiḳ. R. 6 [ed. Friedmann, p. 24b]). Regarding a similar phrase, "to-morrow about this time" (כעת מחר = "at the same hour"; Ex. ix. 18), Zebedee b. Levi says Moses made a scratch on the wall and predicted the hailstorm "when the sun reached this spot on the following day" (Ex. R. xii. 3). Rabban Simeon b. Gamaliel says any one can detect the difference between the lunar and the solar year (354 and 365 days respectively) by marking the shadow of the sun at the time of the solstice in Tammuz (July) and watching when the sun reaches the same spot in the following year. He will find a gain of eleven days over the lunar year (Seder 'Olam iv., end; Gen. R. xxxiii. 10).

The Clepsydra.

While the sun-dial was used to indicate the hours of the day when the sun shone, the clepsydra, or water-clock, was designed to designate the hours in cloudy weather and at night. Its earliest use was probably limited to the indication of the exact time of midnight. The Talmud explains that Moses, because he feared that the astronomers of Pharaoh would err in their calculations and consider him unreliable, said the Lord would kill the first-born in Egypt "about" midnight (Ex. xi. 4), whereas the event happened exactly at midnight (*ib.* xii. 29; Ber. 4a).

A unique and artistic contrivance to indicate midnight is said to have been invented by King David. As told by R. Simeon Ḥasida, David had his harp hanging over his couch and adjusted to the north wind, which at midnight blew across the strings, thus playing the instrument automatically. The music awakened David, who immediately prepared to study the Law until the morning star appeared (Ber. 3b). This story is based on the passages: "At midnight I will rise to give thanks unto thee" (Ps. cxix. 62), and "Awake up, my glory; awake, psaltery and harp: I myself will awake early" (*ib.* lvii. 9 [A. V. 8]).

The clepsydra is mentioned in Mishnah and Talmud under various names, perhaps to distinguish different forms and designs, all, however, signifying one thing; namely, the slow escape—literally the stealing away—of the water, drop by drop, which is the meaning of "clepsydra" in Greek. The actual word occurs in Gen. R. xlix., § 12 in the form חלף סדרה = חלפסדרה. The variety known as "arpakas" (= ארפכס [misspelled אפרכס] = *ἅρπαξ*, *ἁρπάγιον* = "harpax," or perhaps = *πρόχους*) was made both of metal and of glass (Kelim xiv. 8, xxx. 4). This device was so arranged that, when completely filled, the pressing of a finger on the top, making it air-tight, would stop the running of the water from the bottom (Gen. R. iv. 3). Another form, called "tiatorus" (*διατόρος* = טיטרוס), was made of metal. R. Jose considered it a "receptacle" because its contents dropped out slowly (Ḳelim ii. 6).



Clepsydra as Described in the Zohar.
(After a sketch by J. D. Eisenstein.)

A third kind was called "araḳ" (ארק). The version in 'Er. 104a, מעלין בדיופי ומטיפין מיארק,

should be read מעלין דיופטין ומטיפין מי ארק (= "it is permitted to raise the plummet [διαβήτης = "weight" or "ball"] and to allow the water to drop from the clepsydra"). This kind was used in a sick-room to awaken the patient at certain intervals. According to another account, the constant dropping of the water had a soothing effect on the patient's nerves (*ib.*). A correct description of this form of clepsydra is given in the Zohar, where it is related that R. Abba, on his way from Tiberias, stopped at an inn in the village of Tarsus. Before retiring he asked the innkeeper whether he had a rooster that would awaken him exactly at midnight for "ḥazot." The innkeeper assured Abba that he had a better device; namely: "A scale, having on one side a weight, and on the other a jug filled with water which escapes drop by drop. Exactly at midnight the vessel becomes empty, causing the weight on the other side to fall and sound an alarm throughout the house, thus announcing the hour of midnight. We made this appliance for the old man who stays here and who arises regularly at midnight to study the Law" (Zohar, Lek Leka, p. 182, Wilna, 1882).

In the Zohar.

The clepsydra in its simplest form is traced by some historians to the Greeks (about 430 B.C.), and by others to the censor Scipio Nasico (595 B.C.).

The general term "horologe" for a timepiece is used in Talmud and Midrash with reference to the passage, "This month shall be unto *you* the beginning of months" (Ex. xii. 2). The Rabbis understood the word לכם (= "unto you") as indicating a surrender of the right to fix the time of the calendar; and they illustrate the idea in the Midrash with a parable of the horologe (אורלוגין) which was delivered by the king to his son who succeeded him. Similarly the Almighty delivered the key for regulating the time for the months and the festivals to Israel (Yer. R. H. i. 3; Pesiḳ. R. 15 [ed. Friedmann, p. 77a]). In medieval literature the clock is known as מורה שעות ("the hour-guide"); in modern Hebrew, as שעון.

HOROMITE. See SANBALLAT.

HORONAIM (חרנים = "the two hollows"): City of Moab (Isa. xv. 5; Jer. xlviii. 3, 5), mentioned also in the Mesha inscription (lines 31, 32) under the name הורנן. Its site is supposed by some to be to the south of the Arnon. Josephus ("Ant." xiii. 15, § 4; xiv. 1, § 4) speaks of a Moabite city named "Oronas" or "Orone" as having been taken by Alexander Jannæus.

E. G. H. M. SEL.

HOROVITZ, MARKUS: German rabbi and historian; born March 14, 1844, at Ladány, near Tokaj, Hungary. The descendant of an ancient family of scholars, he pursued his rabbinical studies at the yeshibot of Ujhely, Verbó, and Eisenstadt (the last-named then in charge of Israel Hildesheimer). He studied (1868-71) philosophy and Orientalia at the universities of Vienna, Budapest, and Berlin, taking his Ph.D. degree at Tübingen. In Dec., 1871, he was called as rabbi to Lauenburg in Pomerania; in 1874, to Gnesen, Prussian Posen; and in Sept., 1878, to Frankfort-on-the-Main. At Frankfort he organized two model religious schools. Horovitz is one of the directors of the Deutsche Rabbinerverband, and president of the German Jewish orphan asylum at Jerusalem.

Besides numerous sermons; "Maṭṭeh Lewi," a work in Hebrew on letters of divorce (Frankfort-on-the-Main, 1891); and essays on the origin of the Hungarian Jews (in "Izraelita Közlöny," 1869) Horovitz has published the following works: "Zur Gesch. der Jüdischen Gemeinde in Eisenstadt," 1869; "Jose ben Jose," in "Jüdische Presse," 1873; "Frankfurter Rabbinen," 4 parts, Frankfort-on-the-Main, 1882-85; "Jüdische Aerzte in Frankfurt-a.-M." 1886; "Die Wohlthätigkeitspflege bei den Juden im Alten Frankfurt," 1896; "Zur Statistik der Jüdischen Bevölkerung im Alten Frankfurt," 1896; "Die Frankfurter Rabbinerversammlung vom Jahre 1603," 1897; "Die Inschriften des Alten Friedhofes der Israelitischen Gemeinde zu Frankfurt-a.-M." 1901.

S. A. F.

HOROWITZ, AARON BEN JACOB HA-LEVI: Russian Talmudist; lived in the second half of the seventeenth century; son-in-law of Joseph ben Löb, rabbi of Minsk. He revised David ben Samuel's commentary to Rashi on the Pentateuch, published at Dyhernfurth in 1689 under the title "Dibre Dawid," to which he added a commentary of his own covering the whole of Genesis, as well as a letter justifying his work.

H. R. I. BR.

HOROWITZ, ISAIAH: German cabalist, rabbi, and author; born at Prague about 1555; died at Safed about 1630. At an early age he accompanied his father, Abraham Horowitz, to Poland and studied under Solomon Rabbi Lebush's in Cracow. He married the daughter of Abraham Maul, a wealthy resident of Vienna, and seems to have enjoyed comfortable circumstances during his whole lifetime, devoting a large part of his income to charity and to the acquisition of a library. He soon became one of the leaders in the communal affairs of the Jews of Poland. Thus he appears as early as 1590 as one of the signatories of the resolution, passed at the fair of Lublin, which condemned the giving of bribes for rabbinical positions. He held various rabbinical offices; his son mentions those in Posen and Cracow; contemporary sources show him to have held rabbinates at Dubno (1600; Meïr Lublin, Responsa, No. 39), Ostrog, Volhynia (1603; see his approbation to Solomon of Miezdzyrzecz's "Mizbaḥ ha-Zahab," Basel, 1602), Frankfort-on-the-Main (about 1606), and Prague (1614). He left Frankfort-on-the-Main, probably on account of the FETTMILCH riots, in 1614; at Prague he was at first corabbi with Solomon Ephraim of Lenczyza; upon the death of the latter, however, he became sole rabbi.

In 1621, after the death of his wife, Horowitz went to Palestine, where he lived during the remainder of his life. According to cabalistic views (see Emden's autobiography in "Ha-Meassef," 1810, i. 79), no one should live in Palestine unmarried; Horowitz proposed to marry Eva Bacharach, who, however, declined (Jair Ḥayyim Bacharach, in the preface to "Ḥawwot Ya'ir"). Horowitz nevertheless married again, and left a widow and a little daughter, the latter of whom died soon after him ("'Aṭeret ha-Lewiyim," p. 42). Though various Palestinian congregations offered him rabbinates, he preferred to go to Jerusalem, where he arrived Nov. 19, 1621. His fame tempted the pasha to adopt one of the usual methods of extortion practised in the East: the pasha imprisoned the famous rabbi and held him for ransom (1625). After being liberated, Horowitz settled in Safed, where he died.

His Works and Theology.

Horowitz wrote the following works: (1) notes to his father's "'Emeḳ Berakah," on benedictions, Cracow, 1597; (2) notes on his father's ethical will, "Yesh Noḥalin," *ib.* 1597, often reprinted; (3) "Shene Luḥot ha-Berit," usually known by the abbreviation "Shelah" (של"ה), edited by his son Shabbethai Sheftel, Amsterdam, 1649; (4) "Sha'ar ha-Shamayim," prayer book, edited by his great-grandson Abraham ben Isaiah Horowitz, *ib.* 1717, (5) notes on Mordecai ben Hillel's compendium, of which one part only, with an edition of "'Emeḳ Berakah," was printed by the author's descendant Shabbethai Sheftel Fränkel of Breslau, *ib.* 1787. A compendium of the laws of tefillin and his notes on the Ṭur and on the Zohar remained in manuscript. Various religious hymns are scattered through his works, but they are without poetic value

The "Shelah."

Of Horowitz's works the "Shene Luḥot ha-Berit" has become the most popular; it, as well as its author, came to be known as "Shelah ha-Ḳadosh" (Holy Shelah). Glückel of Hameln records that, not long after its publication, her husband, Ḥayyim, read it on his death-bed ("Memoiren," ed. Kaufmann, p. 199, Frankfort-on-the-Main, 1896). Aaron Bernstein, in his novel "Vögele der Maggid," depicts one of the characters, Ḥayyim Mikwenitzer, as finding everything in his "Holy Shelah." Pious Jews drew consolation and instruction from this book (see Mielziner in "Ben Chananja," iv. 96), which has frequently been printed in abridged form (see Benjacob, "Oẓar ha-Sefarim," p. 535). As the title indicates, it was intended as a compendium of the Jewish religion. Its divisions are, however, very unsystematic, and its confusion of titles and subtitles renders it difficult to analyze. The principal divisions fall under the heading "The Gate of the Letters," and comprise: a compendium of religious ethics, alphabetically arranged; a division dealing with the laws of the holy days and beginning with a section entitled "Massekt Ḥullin," treating largely of the laws of ẓiẓit, tefillin, mezuzah, etc., enjoining rigorous observance of the Law, and emphasizing the moral lessons derived from its practise; another division treating of the weekly Pentateuchal portions from the halakic view-point, and of their mystic meanings and moral lessons (the moral lessons, entitled "Tokaḥot Musar," are printed in some editions of the Pentateuch, as those of Amsterdam, 1760 and 1764, and Vienna, 1794); an essay on the principles of rabbinical law entitled "Torah she-Be'al Peh," of some scientific value. Horowitz finds mystical lessons in the number of the fingers and of their bones, which numbers indicate symbolically the Ten Sefirot and the name of God. He believes strictly every word found in rabbinical literature; thus he derives from the Talmudic legend of David's death an argument against a decision found in the Shulḥan 'Aruk (137a; comp. 408a). He is very strict in matters of ritual law. His book contains likewise many ethical teachings of an exalted character (see 242a, where he advises the advocates [see Shtadlan] always to remember that real power does not come from kings and princes, but from God alone).

While Horowitz's prayer-book is full of sincere religious ideas, it is also a presentation of cabalistic doctrines. Thus he says that the morning prayer is an appeal to divine mercy because the growing light represents God's kindness, while the declining light of the afternoon represents God's stern justice. Abraham ordained the morning prayer because he was the incarnation of divine mercy, and Isaac ordained the afternoon prayer because he was the incarnation of divine power (p. 144a).

Horowitz quoted extensively from his immediate predecessors in cabalistic literature, especially from De Vidas, Cordovero, and Isaac Luria. The fame of the last-named had attracted Horowitz to Palestine, where he expected to find the master's disciples and to acquire through them some of his esoteric teachings; his own work, however, became far more popular than those of any other of the disciples. At least ten editions are known of the "Shene Luḥot ha-Berit," while his prayer-book, though not so often reprinted, has largely influenced all subsequent editions of the ritual.

D.

HOROWITZ, LAZAR (ELEAZAR): Austrian rabbi; born at Flosz, Bavaria, 1803; died at Vöslau, near Vienna, June 11, 1868. He was the son of David Joshua Hoeshel, rabbi of Flosz, and grandson of Ẓebi Hirsch Horwitz, rabbi of Frankfort-on-the-Main. In 1822 his father was called to the rabbinate of Frauenkirchen, Hungary. Horowitz was educated in Talmud by his father until, at the age of eighteen, he was sent to Presburg to continue his studies under Moses Schreiber (from 1821 to 1825). In the latter year he was called home by the death of his father, and the congregation of Frauenkirchen elected him as his successor; Horowitz, however, refused the call. He lived for some time at Deutsch-Kreuz, where he married. In 1828 private affairs called him to Vienna, where he made the acquaintance of the banker Isaac Löw von Hoffmannsthal, through whose influence he was appointed rabbi of the community; Horowitz held that position until his death. As the Jews of Vienna, however, were not recognized as a corporation and could not engage a rabbi, his official title was that of "supervisor of ritual" ("Ritualienaufseher") until the constitution of 1848 abolished their disabilities. In 1828 he instituted the Talmud Torah; in 1835 he established a society (Shas Ḥebra) for the study of the Talmud.

Among Horowitz's disciples were Albert Cohn, Gerson Wolf, and Abraham Schmiedel. True to the teachings of his master, he was very strict in all questions of the ritual law, though he made many concessions to the spirit of the time, especially where the harmony and peace of the congregation were involved. He prohibited not only the use, but even the sale, during Passover, of loaf sugar which had not been manufactured under ritual supervision ("Yad Eleazar," No. 22); he would not allow during Passover the use of enameled vessels which had been used during the year (*ib.* Nos. 84, 96); he prohibited the sale of sacred scrolls to non-Jews, even when it could be safely presumed that they would not profane them (*ib.* No. 76); he prohibited the use of stearin candles in the synagogue (*ib.* No. 58); in the case of a Jewish manufacturer of chinaware, he insisted that he should not manufacture any human figure without a defect sufficient to avoid transgression of the second commandment (*ib.* No. 129). He supported those who decided, in the Flörsheim case in Frankfort-on-the-Main, that an uncircumcised boy was not a Jew (Trier, "Rabbinische Gutachten über die Beschneidung," Frankfort-on-the-Main, 1844), as well as those who protested against the rabbinical conference of Brunswick ("Shelome Emune Yisrael," 1845); and he rendered a decision against the Reform party in Mantua who wished to abolish the second day of the holy days ("Yad Eleazar," No. 131). On the other hand, he decided, supported by Moses Schreiber, that meẓiẓah was not obligatory in CIRCUMCISION, physicians having declared it dangerous (*ib.* No. 55; "Kokebe Yiẓḥaḳ," i. 44–51). When a difficulty arose in the congregation of Dessau in regard to performing in the synagogue a marriage ceremony which the Orthodox had condemned, he declared that the maintenance of peace in the congregation was of far greater weight than such a question.

Horowitz's mild attitude toward those who differed with him was especially noticeable in the case against Leopold Kompert, who was accused of having libeled the "Orthodox Jewish religion" by publishing in his year-book an article by Grätz, who had denied that Isaiah taught a personal Messiah. Horowitz, who was called as an expert, declared at the trial (Dec. 30, 1863) that he knew no "Orthodox Judaism" as a distinct church, and that, while he considered the belief in a personal Messiah as essential in Judaism, there was room for differences in regard to the explanation of the prophecies of the coming of the Messiah. This broad-mindedness provoked a strong opposition. Israel Hildesheimer, then in Eisenstadt, issued a protest against this view which received the signatures of 156 rabbis, who had not looked with favor upon the fact that Horowitz lectured in the bet ha-midrash founded by Jellinek; but the storm soon subsided, and, as may be seen from the names of the rabbis who addressed ritualistic questions to him, Horowitz came to be a recognized authority. Besides articles in various Hebrew periodicals, and an introduction to the "Ḥeḳer Halakah" (Vienna, 1838) of his maternal grandfather, Horowitz wrote a volume of responsa ("Yad Eleazar," Vienna, 1870), published after his death by his sons

D.

HOROWITZ, LEOPOLD: Hungarian painter, born in 1837 at Rozgony, near Kaschau, where he attended the gymnasium. He received instruction in painting from Roth until 1850, when he went to the Vienna Academy to study under Geiger, Meyer, and Wurzinger. There he remained for seven years, winning the first prize at his graduation. In 1860 he visited Berlin, Dresden, Munich, and finally Paris, where he resided for eight years, and obtained a reputation as an excellent portrait- and genre-painter, his subjects at this time being taken principally from child life. His most important picture of this period is "The First-Born." In his portraits he followed at first Rembrandt, and then Van Dyck, the character of his women's portraits being strongly reminiscent of the latter's style.

In 1868 he went to Warsaw in order to familiarize himself with the life of the Polish Jews. He also made frequent visits to Budapest, Vienna, and Berlin, where he was especially esteemed as a portrait painter by the ladies of the nobility. Among the scenes taken from the life of the Polish Jews may be mentioned: "Prayers in a Polish Synagogue on the Anniversary of the Destruction of the Temple of Jerusalem"; "The Polish Tutor"; "The Harmless War." His finest portraits are those of the Princess of Sapieha, the Countess of Wedel, Georg Brandes, Maurice Jókai, Count Bariatinszky, Count and Countess Zamoyiski, and F. von Pulszky, director of the museum in Budapest. In 1891 Horowitz received a gold medal at the Berlin International Exhibition.

S. J. So.

HOROWITZ, MOSES HA-LEVI: Judæo-German playwright; born on the 7th of Adar, 1844, at Stanislau, Galicia. After the usual Jewish education he studied German and went to Bucharest. In 1876 he established a Jewish theater there, and has been connected with the Jewish stage ever since. He was the first to introduce actresses on the Jewish stage; previously men had always taken the feminine rôles in Jewish plays. Horowitz went to New York in 1884, taking with him a company of his own.

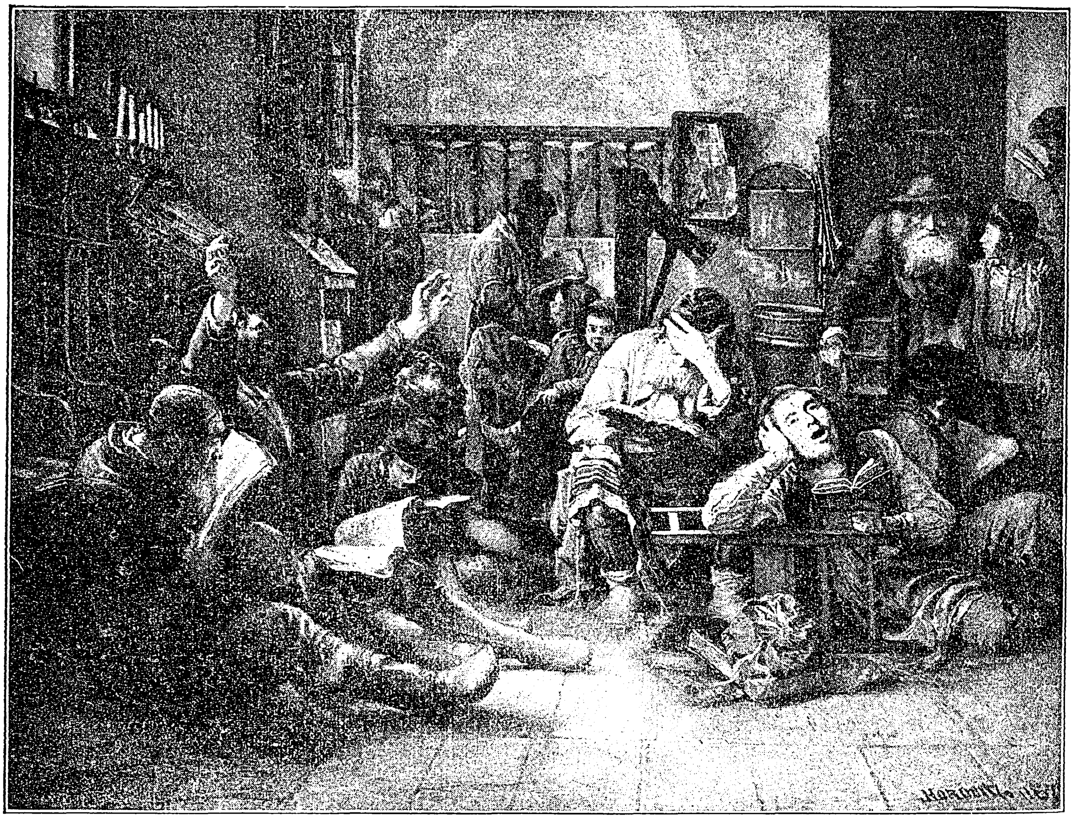
He has written no less than 169 plays, "Das Polishe Yingel" being his first dramatic production. Among his more successful plays are: "Schlome Chochom," "Kuzri," "Chochmath Noshim," "Ben Hador," and "Yetziath Mizraim." Most of Horowitz's plays are historical, but he is always on the lookout for "zeit piessen" (topical subjects). Thus he found dramatic material in the strike at Homestead and in the massacre of Kishinef (1903). The most successful of his "zeit piessen" was "Tissa Eslar." Many of his dramas were composed in the course of a few days, and he utilized without hesitation whole scenes of foreign dramas. Though a successful playwright, Horowitz failed as an actor, and after he went to America he abandoned acting entirely.

H. R. B. G.

HOROWITZ (HORWITZ), PHINEHAS LEVI: Rabbi and Talmudic author; born in Poland about 1731; died in Frankfort-on-the-Main July 1, 1805. The descendant of a long line of rabbinical ancestors and the son of Rabbi Ẓebi Hirsch Horowitz of Czortkow, he received a thorough Talmudic education, chiefly from his older brother, Schmelke. He married at an early age the daughter of the wealthy Joel Heilpern, who provided for him and permitted him to occupy himself exclusively with his studies. Adverse circumstances then forced him to accept a rabbinical position, and he became rabbi of Witkowo, from which place he was called later on to Lachovice. A decision rendered in a complicated divorce case attracted attention to him, and in 1771 he was elected rabbi of Frankfort-on-the-Main. Although a cabalist, he joined the agitation against Nathan ADLER, who held separate services in his house according to the cabalistic ritual. When Mendelssohn's Pentateuch appeared, Horowitz denounced it in unmeasured terms, admonishing his hearers to shun the work as unclean, and approving the action of those persons who had publicly burned it in Wilna (1782). Following the same principle, he opposed the establishment of a secular school (1794). Toward the end of his life he became blind, and his son, **Hirsch Horowitz,** acted as his substitute.

Horowitz's chief work is "Hafla'ah," novellæ on the tractate Ketubot, with an appendix, "Ḳontres Aharon," or "Shebet Aḥim," Offenbach, 1786. The second part, containing novellæ on the tractate Ḳiddushin, also with an appendix, appeared under the title "Sefer ha-Miḳnah," *ib.* 1800. Other works are: "Netibot la-Shabet," glosses on sections 1–24 of the Shulḥan 'Aruk, Eben ha-'Ezer, Lemberg, 1837; "Gib'at Pineḥas," a collection of eighty-four responsa, *ib.* 1837; and "Panim Yafot," a cabalistic commentary on the Pentateuch, printed with the Pentateuch, Ostrog, 1824 (separate ed. 1851, n.p.).

Horowitz was one of the last pilpulists in Germany, and he therefore represents the most highly developed stage of rabbinical dialectics. It was in keeping with these views that he opposed secular education and even the slightest change of the traditional form of public worship (see his denunciation of a choir in the synagogue, in "Gib'at Pineḥas," No. 45). The progress of modern civilization toward the end of the eighteenth century



THE NINTH OF AB IN A POLISH SYNAGOGUE.
(From the painting by Leopold Horowitz.)

made him partly change his views, and in 1803 he indorsed Wolf Heidenheim's translation of the Maḥzor.

HOROWITZ, SCHMELKE (**Schmuelche**, pet name for "Samuel"): Rabbi and cabalist: born in Poland 1726; died at Nikolsburg April 28, 1778; son of Hirsch Horowitz, rabbi of Czortkow, and brother of Phinehas Horowitz of Frankfort-on-the-Main. A disciple of Bär of Meseritz, he was a devotee of the Cabala; and this brought him the reputation of a saint, to which he owed his call to Nikolsburg in 1773, after he had been rabbi of Ryczywol (Ritschenwalde) in Poland. In 1775 he was appointed chief rabbi of the province of Moravia. Horowitz's fame as a saint increased; and his arrival was supposed to have broken a long spell of drought. In Nikolsburg he established for those observing the Ḥasidic rite a synagogue ("Chasidimschul") which existed to the end of the nineteenth century. His cabalistic homilies on the Pentateuch were published under the title "Dibre Shemu'el" (Lemberg, *c.* 1870).

D.

HOROWITZ, SHABBETHAI (usually called "the Younger"): Rabbi and Talmudist; born, probably in Ostrog, Volhynia, about 1590; died at Vienna April 12, 1660. He was the son of the cabalist Isaiah Horowitz, and at an early age married the daughter of the wealthy and scholarly Moses Ḥarif of Lublin. With his father he seems to have gone to Prague, where he occupied a position as preacher; from Prague he went as rabbi to Fürth, whence he was called to Frankfort-on-the-Main about 1632, and finally to Vienna about 1650.

Horowitz wrote additions to his grandfather Abraham's "'Emeḳ Berakah" (which appeared first in the Amsterdam edition of 1729), additions to his father's prayer-book, and a treatise on religious ethics under the title "Wawe ha-'Ammudim." This work he modestly designated as an introduction to his father's celebrated work entitled "The Two Tablets of the Covenant," with which it is always printed as an appendix. He also wrote an ethical testament ("Ẓawwa'ah," Frankfort-on-the-Oder, n.d., often reprinted). It contains, besides some very charitable teachings, exhortations to strictness in ritual practise and in cabalistic studies. Shabbethai further wrote some prayers (included in his father's prayer-book), especially a seliḥah for the 20th of Siwan.

BIBLIOGRAPHY: Horovitz, *Frankfurter Rabbinen*, pp. 30-35, Frankfort-on-the-Main, 1883; Kaufmann, *Letzte Vertreibung der Juden aus Wien*, pp. 66 *et seq.*, Vienna, 1889.

D.

HOROWITZ, SHABBETHAI SHEFTEL (commonly called "the Elder"): Cabalistic author: flourished in Prague in the sixteenth and seventeenth centuries. His father, named Akiba according to Steinschneider and Benjacob, not Jacob, was the son of Abraham Sheftels and the brother of Isaiah Horowitz. He wrote "Nishmat Shabbethai ha-Lewi," a cabalistic treatise on the nature of the soul (Prague, 1616), and "Shefa' Ṭal" (Prague, 1612; Frankfort-on-the-Main, 1719), another cabalistic compendium, containing also some works of others. The latter has been often reprinted, and is highly recommended by his cousin, Shabbethai the Younger, in his will.

D.

HORSCHETZKY, MORITZ: Austrian physician and writer; born at Bydzov, Bohemia, in 1788; died Nov. 7, 1859, at Nagy-Kanizsa, Hungary, where he had been practising medicine since 1811. As a writer he devoted himself chiefly to the works of Josephus, whose "Antiquities" he translated and in part annotated (1826, 1843, 1851). Horschetzky possessed remarkable humor, which appears in his fictitious "Reiseberichte Nathan Ghazzati's" (in "Orient, Lit." 1848). This work Julius Fürst took to be a translation from the Hebrew.

HORSE.—Biblical Data: The Hebrew terms are: סוס, the generic and most common term; רכש (I Kings v. 8; Micah i. 13; Esth. viii. 10, 14), the swift horse (A. V. "mule"); פרש (only in the plural), the riding-horse, also the horseman (I Sam. viii. 11; Isa. xxviii. 28); רמך, in the combination בני הרמכים (Esth. viii. 10; A. V. "young dromedaries"; R. V. "breed of stud"); and lastly, more as a poetical epithet, אביר, "the strong one" (Judges v. 22; Jer. viii. 16).

The horse is not indigenous to Palestine, nor is it among the ordinary possessions of the Semitic pastoral nomads. This accounts for its omission from the catalogue of the domestic animals of the Patriarchs; and in the Decalogue, while the ox and the ass are among the animals the coveting of which is prohibited, the horse is not mentioned (see Michaelis, "Mosaisches Recht," 2d ed., part iii., Appendix, "Etwas von der Aeltesten Gesch. der Pferde," etc.). Where the horse is referred to, it is the war-steed of the enemy, from whom for warlike purposes the Hebrews must have learned the art of training and utilizing the animal. The horse was not used for riding. It is represented as harnessed to the war-chariot manned by archers; for the soldier equipped with bow and arrows had to have both of his hands free. Where upon the monuments the bowman is depicted on horseback, he is always attended by another horseman, whose business it was to lead the bowman's horse. In II Kings xxiii. 11 bronze horses are mentioned as being dedicated to the sun, which idolatrous institution Josiah is reported to have removed. This gloss corroborates the assumption of the foreign origin of the use of the horse (Victor Hehn, "Kulturpflanzen und Hausthiere," 3d ed., pp. 29 *et seq.*, Berlin, 1877).

The first mention of the horse in the Old Testament is in connection with Egypt (Gen. xlvii. 17). The only allusion in the Pentateuch to the horse as a factor in Israel's life is found in the law forbidding the king to "multiply horses" (Deut. xvii. 16). On

Introduced from Egypt.

Palestinian soil the animal was employed as a war-horse by the non-Israelite tribes (Joshua xi. 4). David seems to have been the first to adopt this use of the horse (II Sam. viii. 4, xv. 1); Solomon imported many horses and chariots from Egypt (I Kings x. 28); and they became a permanent feature of the armies of the later kings (II Kings ix. 21, 33; xiii. 7). The horse was not used for draft purposes, though Isa. xxviii. 28 mentions the use of the horse for thrashing. As a king's state animal it is mentioned in connection with the Persian court (Esth. vi. 8). From the horse as a war animal are derived various descriptions and similes, *e.g.*, from its strength and swiftness (Hab. i. 8; Jer. iv. 13), its flint-like hoofs (Isa. v. 28); its prancing and trampling (Judges v. 22; Jer. xlvii. 3; Nahum iii. 2); the splendid poetical description in Job xxxix. 19–25 should be especially noted. Frequent warning is given against putting one's trust in the horse (Isa. xxx. 16; Ps. xx. 7, xxxiii. 17).

In later times the horse seems to have become common in Palestine. The exiles brought with them horses from Babylon (Neh. vii. 68); and there was a "horse gate" in Jerusalem (II Chron. xxiii. 15). Horses were imported into Palestine from Egypt (Isa. xxxi. 1, 3; Ezek. xvii. 15), and especially through the Phenicians from Armenia (Togarmah), which was one of the staple markets for horses (Ezek. xxvii. 14). The whip and trappings and ornaments of the horse are mentioned in Ps. xxxii 9; Prov. xxvi. 3; and Zech. xiv. 20.

——**In Rabbinical Literature:** Six characteristics are predicated of the horse in the Talmud: (1) it is salacious (comp. Ezek. xxiii. 20); (2) it loves war; (3) it is high-spirited; (4) it needs little sleep; (5) it consumes large quantities of food; and (6) its evacuations are small (Pes. 113b and parallels). The Medes and Persians were especially rich in horses (Sanh. 98b). In connection with Zech. i. 8 the Talmud distinguishes red, yellow, and white horses (Sanh. 93a).

The horse was considered one of the most useful of the domestic animals; hence one should not live in a city where the neighing of the horse is not heard (Pes. 113a). It was used for riding (Bek. 2a) and in the chase (Shab. 94a), and covers were made of the hair of its mane and tail (Suk. 20b, Rashi). Non-Israelites ate its flesh (Yer. Shek. xii. 2).

Much labor was spent in the care of the horse (Shab. 113b; M. Ḳ. 10a, b). The general use of horseshoes is not mentioned in the Talmud; but in war time horses were sometimes provided with metal shoes (Shab. 59a). Among the objects used for the outfit of the horse are mentioned the bridle, an iron mouthpiece called "scorpion" ("'aḳrab"), and the collar (Kelim xi. 5, xxi. 2). For a white horse a red bridle was considered becoming (Ḥag. 9b). The forehead was decorated with scarlet-colored ornaments, and for protection against the evil eye the tail of a fox was hung between the eyes (Shab. 53a). At the death of its master the horse of a king was disabled by cutting through the tendons of the hoofs, so that it should not be used by any one else ('Ab. Zarah 11a). The horse was also employed as an instrument of punishment, culprits being bound to its tail and dragged over thorns (Sanh. 26b; Yoma 69a). The appearance in a dream of a white horse was considered a favorable omen (Sanh. 93a).

E. G. H. I. M. C.

HORTICULTURE: That department of the science of agriculture which relates to the cultivation of gardens. The garden is called "gan" or "gannah" in the later Biblical books, and in the Mishnah "ginnah." Originally the word "gan" was probably applied to all kinds of gardens; but in later Biblical times an orchard came to be denoted by the Persian word "pardes," which, as connoting the religious idea of paradise, was introduced into the vocabularies of all civilized nations ("Z. D. M. G." xxxii. 761; S. Fränkel, "Die Aramäischen Fremdwörter im Arabischen," p. 149), and gained a wider recognition than the Biblical expression "Eden." The words "gannah" and "pardes" are both used in Ecclesiastes (see "parc" in Rashi to Ps. l. 9; Ibn Ezra to Eccl. ii. 5; Cant. iv. 13; Bacher, Ibn Ezra, p. 170).

The Garden.

In ancient Israel the garden was probably an orchard, vineyard, or kitchen-garden, although the royal gardens had doubtless more the nature of a park. The references to the nut-orchard in Cant. vi. 11—a passage often interpreted symbolically—and to the "orchard of pomegranates" ("pardes rimmonim") in the same book (*ib.* iv. 13) indicate the late origin of the Song of Solomon and the strong foreign influence under which it was composed. The description of the garden in Cant. iv. 13–14 is not that of an existing Palestinian garden, but of a purely imaginary one. The Biblical words "kerem," doubtless at first applied only to a vineyard, and "karmel," denoting cultivated land in contrast to the fallow field, were also used later to designate a garden.

The garden, which was divided into beds ("'arugot"), was naturally laid out near water, or was provided with cisterns and channels for irrigation (compare the stories of Bath-sheba and Susanna). The place-name "'En Gannim" (lit. "garden-spring") occurs twice in Palestine (Baedeker-Socin, "Palästina," 5th ed., p. 255). There are direct Biblical references to gardens near Jerusalem; and another is found in the name "Gate of Gennath" (*i.e.*, "garden gate"), which is mentioned by Josephus (Baedeker-Socin, *l.c.* p. 28). The gardener has often been confounded with the farmer (in the Mishnah "aris," which in the Midrash, however, probably does mean also "gardener"). An overseer of the royal forests, "shomer ha-pardes," is mentioned in Neh. ii. 8; otherwise "nozer" and "noṭer," the equivalents of the Aramaic "naṭora" and the Arabic "naṭura," are used. In post-Biblical times there are many references to gardens and gardeners; and the number of terms used to denote them increases correspondingly. Side by side with the Biblical "gannot u-pardesim" (gardens and parks)—a favorite phrase in Mishnaic times—the Persian words "baga" and "bustana," found also in Syriac and other related languages, appear in the Talmud, indicating the prevalence of Persian horticulture (comp. "Sha'are Ẓedeḳ," p. 87d). In tannaitic works, side by side with "gan," is used the form "ginnah"; the older form "gannah," found in the Mishnah, being due apparently to incorrect tradition. The plural "gannim" seems to have become obsolete by that time.

Halakot.

The Halakah gave occasion for many references to gardens in the Mishnah, some of which references may be noted here. It is declared that the garden should always be fenced in, though this custom is not uniformly observed (B. B. i. 4a; Yer. B. B. i. 12d). The garden generally lay near the house (B. M. x. 5; Yer. B. B. iii. 14b). As a person had to pass through the courtyard into the garden, the two are often contrasted (Ma'as. iii. 10; Ter. viii. 3; Yer. B. B. i. 12d; Yer. Giṭ. viii. 49b); domestic fowls could easily go from the yard into the kitchen-garden and do damage there (Tosef., B. Ḳ. ii. 347; Ḥul. xii. 1; Tosef., Ḥul. x. 511; Tosef., Beẓah, i. 201). Swarming bees frequently settled in neighboring gardens (Tosef., B. Ḳ. x. 369).

Legal ordinances refer to: the right of the poor to enter gardens (Sheb. ix. 7); the right of a merchant to pass through a garden belonging to one person into that of another whose fruit he desires to buy (B. B. vi. 6; comp. Mek., Beshallaḥ, 30b); the damages to be paid for cattle entering a garden (B. Ḳ. vi. 2); and the right of planting gardens and parks upon the site of a city destroyed for idolatry (Sanh. x. 6; Tosef., Sanh. xiv. 437).

The Biblical command not to cut down fruit-trees is treated in detail by Talmudic and rabbinical authorities, including the latest casuists; for example, in connection with the questions whether a nut-tree standing among vines may be cut down ("Ẓemaḥ Ẓedeḳ," No. 41), and whether worthless grape-vines may be uprooted to make room for something else (Steinach, "Yoreh De'ah," No. 63; on the cutting down of fruit-trees in general see "Simlat Binyamin," p. 169c). The existence of parks around synagogues is not sanctioned, in view of their resemblance to "asherim" ("Ben Chananja," vi. 688, viii. 589), although, according to Philo, many synagogues in Alexandria were surrounded by trees, as is the Elijah synagogue in that city to-day. As irrigation was necessary in post-Biblical times, there are many halakic and midrashic references to it (Gen. R. xv. 3; Lev. R. xv. 3).

Manure was applied both in Biblical and in Talmudic times, dung, the blood of animals, fine sand, ashes, leaves, straw, chaff, the scum of oil, and the residue of the fruits of the field being used. Blood was used exclusively for gardens; ashes and oil-scum, only for orchards; sand, for orchards and vegetable gardens; dung, chiefly for gardens. Gardens were often laid out in terraces on mountain-sides (B. M. x. 4-6). The owner is called "ba'al ha-ginnah," the term being also used haggadically of God (Yer. B. M. iii. 50d). A garden may be so small that the vintner may just enter within the enclosure with his basket ('Eduy. ii. 4), though the minimum size is fixed by some at 130 square meters; by R. Akiba at 32.7 square meters (B. B. i. 6, vii. 2). Plants were sometimes raised in pots.

Traces of Greek influence upon Palestinian horticulture are few; indeed, this science was brought to Europe from the Aramean countries. The grape-pole (*δίκρανον*) was of Greek origin, as were the following plants: the laurel (*δάφνη*), iris (*ἶρις*), ivy (*κισσός*), mint (*μίνθα*), narcissus (*νάρκισσος*), rue (*πήγανον*), box, and the oleander (*ῥυδοδάφνη*).

A famous garden of Mishnaic time was the rose-garden at Jerusalem, said to date from the time of the Prophets (Ma'as. ii. 5), but this, it is declared, was the only garden or park permitted in that city (Tosef., Neg. vi. 625; B. Ḳ. 82b). The parks of Sebaste must be mentioned, as well as those of Jericho, and the gardens of Ashkelon ('Ar. iii. 2; Tosef., 'Ar. ii. 544; Sifra, Beḥuḳḳotai, ed. Weiss, p. 114a). Of the Middle Ages the garden of the community of Worms should be mentioned ("Liḳḳuṭe Maharil," p. 109b; "Monatsschrift," xlv. 62).

The gardener is called "gannan" (Talmudic, "ginna'a" or "gannana"). The guardians are called "shomere gannot u-fardesim." The planter is called "shattala" (B. M. 93a; Yer. B. M. viii. 11c). Babli mentions a gardener in the service of Rabina. In the Haggadah, aside from God Himself, Noah is designated as the first gardener; he planted also cedar-trees (Gen. R. xxx.). He said to his children after the Flood, "You will go and build cities for yourselves, and will plant in them all the plants that are on the earth, and all the trees that bear fruit" (Book of Jubilees, vii. 35). Abraham is also considered as a planter, as is Solomon, the appurtenances of the latter's kingship being, among other things, vineyards, gardens, and parks (Kallah, ed. Coronel, p. 16a). Because the Egyptians forced the children of Israel to lay out gardens and parks, in order to prevent them from multiplying (Seder Eliyahu R. vii. 42, ed. Friedmann), the plague of hail was sent upon their land, in order to fulfil the words of Ps. lxxviii. 47.

Haggadic References.

The Haggadah often refers to gardens and parks, especially the gardens of the emperor. The passages in which such references occur have been collected by Ziegler, "Die Königsgleichnisse des Midrasch," pp. 286 *et seq.* Similes and metaphors in which reference is made to imperial gardens are found as early as the tannaitic period; *e.g.*, in Tosef., Ḥag. ii. 234, and in the Mekilta; also in Exodus Rabbah, Tanḥuma, and Pesiḳta—hence within the domain of the Roman empire—while the Babylonian sources contain hardly any such figures. These figures show a deeper and more intimate observation of nature than is found in later rabbinic times. The Haggadah in general confines itself to the Biblical figures that have suggested the comparison. Canticles especially has stimulated the imagination of the haggadists.

In Biblical times the garden was perhaps also used as a burial-ground (II Kings xxi. 18, 26; comp. John xix. 41), though later on the Jewish cemeteries did not present the appearance of gardens. R. Hananeel cites an old Babylonian tradition, according to which Abba Arika planted trees upon graves, but only a small part of them took root and blossomed, and such as did were all on the graves of those that had not died before their time ("'Aruk," vi. 157). The following proverbs referring to gardens may be mentioned: "As the garden, so the gardener";

"Whoever rents one garden may eat birds; whoever rents more than one at the same time will be eaten by the birds" (Dukes, "Rabbinische Blumenlese," Nos. 202, 456; Weissberg, "Mishle Ḳadmonim," p. 6).

Book-Titles.

The Jews of the Middle Ages did not possess a highly developed sense of natural beauty, nor were they much given to horticulture. Poets writing in Hebrew were restricted, for the names of flowers, to the Biblical vocabulary. Foreign influence is shown in the predilection for horticultural names as book-titles, and in the division of books into "flower-beds"; for example, "Gan Elohim" ("R. E. J." xli. 304); "Gan 'Eden," the numerical value of which corresponds to the number of chapters in Maimonides' "Moreh" (Steinschneider, "Hebr. Uebers." p. 429); "Pardes," in which the methods of Scriptural exegesis were summed up (Bacher, in Stade's "Zeitschrift," 1893, p. 294; Jew. Encyc. iii. 171); "Ginnat Weradim" (rose-garden), occurring twice as a book-title; "Ginnat Egoz" (nut-garden), "Ginnat ha-Bitan" (palace garden), occurring once each; "Kaftor wa-Feraḥ" (if the original meaning of the words, which in the Bible are descriptive of the golden candlestick, may be taken to assign the title to this class), used as a book-title three times; and "Kerem," occurring sixteen times in different combinations, six of these being "Kerem Shelomoh." "Maskit ha-Orot ke-Pardes ha-Niẓẓanim" is the title of Ghazali's work in Isaac b. Joseph Alfasi's translation (Steinschneider, *l.c.* p. 346). "Neṭa'" (plantation) is found twelve times in titles, three of these being "Niṭ'e Na'amanim," and five "Neṭa' Sha'ashu'im." "Sefer ha-Peraḥ" = "Flores" of Abu Ma'asher; "Shoshan ha-Refu'ah" = *Lilium medicinæ*; "Peraḥ ha-Refu'ah" = *Flos medicinæ* (Steinschneider, *l.c.* pp. 531, 785, 800); there is also a Karaite "Sefer ha-Niẓẓanim" (Steinschneider, *l.c.* p. 450). Joseph al-Ḳirḳisani's commentary on the passages of the Pentateuch referring to the Law is "Al-Riyaḍ wal-Ḥada'iḳ" (beds and gardens; see Steinschneider, "Arabische Literatur der Juden," p. 79). Better known is Rashi's "Sefer ha-Pardes." Under "'Arugat ha-Bosem" (Steinschneider, "Hebr. Uebers." pp. 411, 753) Benjacob records ten titles of books; under "Pardes," eighteen; and in combination with "Peraḥ," eighteen. Aside from "Sefer ha-Gan," occurring twice, sixteen titles are combinations of "gan," while "shoshannah" (lily) enters into twenty-three titles; comp. also the titles "'Arugat Bosem ha-Mezimmah," "Pardes Rimmone ha-Ḥokmah," "Pardes ha-Ḥokmah," "Gan Te'udot" ("Z. D. M. G." xxvii. 555, 557, 559; Steinschneider, *l.c.* pp. 389, 392, 394). See Botany; Flowers in the Home; Plants.

HORTUS JUDÆORUM. See Cemetery.

HORWITZ, AARON B. JOSEPH HA-LEVI: Russo-German rabbi; born in Lithuania in the early part of the eighteenth century; died at Berlin 1779. Early in life he lived at Königsberg and at Prague, where he acquired a fair knowledge of German. He then held the position of rabbi successively at Shkud, Lithuania, at Hasenpoth, Courland, and at Berlin. He was recognized as a rabbinical authority, and his approbations appear in the first edition of Mendelssohn's translation of the Bible, in the "'Ammude Bet Yehudah" of Judah b. Mordecai ha-Levi Hurwitz (Amsterdam, 1764), and in other well-known works. He was the author of ḥiddushim, etc., to the Talmud, with a supplement, and containing a responsum on the law of divorce (Frankfort-on-the-Main, 1770).

Bibliography: Fuenn, *Keneset Yisrael*, p. 83; Wunderbar, *Gesch. d. Juden in Liv- Est- und Kurland*, Mitau, 1853; Landshuth, *Toledot Anshe Shem*, p. 85.

H. R.

HORWITZ, ARYEH LÖB BEN ẒEBI HA-LEVI (otherwise known as **R. Löb Zietiler**): Lithuanian Talmudist of the seventeenth century. After having been "rosh yeshibah" in several German towns Horwitz was called in a similar capacity to the yeshibah of Minsk while Jehiel Heilprin was chief rabbi there. Horwitz was the author of "Margenita Ṭaba," a defense of Maimonides' "Sefer ha-Miẓwot" against the strictures of Naḥmanides, published with the "Sefer ha-Miẓwot" at Frankfort-on-the-Main, 1756. According to the preface, added by his son, Horwitz wrote also novellæ on the Talmud, and "Elef ha Magen," defending Maimonides against the attacks of Abraham b. David.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 533; Benjacob, *Oẓar ha-Sefarim*, p. 362; Ben-Zion Eisenstadt, *Rabbane Minsk*, p. 15.

S. S. M. Sel.

HORWITZ, BELLA (called also **Bella Ḥazzan**): Daughter of the martyr Be'er ben Hezekiah ha-Levi Horwitz and wife of Joseph ben Ḥayyim Ḥazzan, who died at Prague in 1713. In 1705 she published "Gesch. des Hauses David." In conjunction with Rachel Porges, the wife of Löb Porges, she edited a primeval history, mostly legendary, of the Prague Jews, entitled "Eine Schöne Geschichte, so Ist Geschehen, Ehe noch Jehudim zu Prag Gewohnt." She also wrote a "Teḥinnah" for the ten penitential days.

Bibliography: Fuenn, *Keneset Yisrael*; Kayserling, *Die Jüdischen Frauen*, pp. 153 *et seq.*; Kaufmann, *Die Letzte Vertreibung der Juden aus Wien und Niederösterreich*, p. 189.

S. I. Z.

HORWITZ, BERNARD: Chess-player and writer on chess; born 1809 in the grand duchy of Mecklenburg; died in London 1885. A chess pupil of Mendheim in Berlin, he became known as one of the "Pleiades," a name given to the seven leaders of the new school of chess which arose in that city between 1830 and 1840. After residing some time in Hamburg, Horwitz went to England, in which country he settled about 1845, and competed in most of the tournaments up to 1862.

With J. Kling, Horwitz published "Chess Studies" (London, 1851), devoted mainly to end games (previous works on chess having treated principally of the openings); and with the same collaborator he issued "The Chess-Player," of which four volumes appeared (*ib* 1851-53). His last work was "Chess Studies and End Games Systematically Arranged" (*ib.* 1884).

Bibliography: *The Times*, London, Aug. 30, 1885; *Dict. National Biography*, xxvii. 393.

J. A. P.

HORWITZ, ẒEBI HIRSCH BEN PHINEHAS: Rabbi at Frankfort-on-the-Main; died there

Sept. 8, 1817. He succeeded his father in the rabbinate of Frankfort in 1805. He was the author of the following works: "Maḥaneh Lewi," halakic novellæ, Offenbach, 1801; "Laḥme Todah," supplementing and completing the preceding work, *ib.* 1816; novellæ on Talmudical treatises in his father's "Ketubah," *ib.* 1887. Carmoly claims to have seen in manuscript two other works by Horwitz: "Ḥomer ha-Ḳodesh," consisting of responsa; and a commentary on various Biblical passages, entitled "Birkat ha-Torah."

Bibliography: Carmoly, in *Revue Orientale*, iii. 306; Steinschneider, *Cat. Bodl.* col. 2752; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 292.

D. I. Br.

HOSANNA (הושענא = "Oh, save!"): The cry which the people of Jerusalem were accustomed to raise while marching in procession and waving branches of palm, myrtle, and willow in the joyous Sukkot festival, especially on the seventh day, when the willow-branches of the "lulab" procession were piled up and beaten against the altar (Suk. iii. 9, iv. 5). The willow-branch thus received the name "hosha'na" (Suk. 30b, 31a, 34a, 37a, b, 46b); and the seventh Sukkot day was called "Day of Hosha'na" or "Hosha'na Rabbah." It was a popular festival, of ancient, probably Canaanitish, origin, connected with the prayer for the year's rain (Zech. xiv. 8–17); the multitudes accompanied the priests each night of the Sukkot feast to the spring of Shiloah, where the water for the libation ("nissuk ha-mayim") was drawn amidst great solemnity and rejoicing (Suk. v. 1–4), while the last day formed the climax of the festivities. "Anna Adonai hoshi'ah-nna" (Ps cxviii. 25), the refrain of the psalms recited by the assembly, was, probably owing to constant repetition, abbreviated by the people into "Hosha'na," just as the old Canaanite cry "Hoi Dod" ("Wo Adonis") was turned into a common interjection, "Hedad." Thus "Hosha'na" became a popular cry used in solemn processions wherewith was connected the carrying of the palm-branches as described in I Macc xiii. 51 and II Macc. x. 7.

According to John xii. 13 (in the Sinaitic codex), which has the story preserved in its original form, the same cry was raised by the multitude on the occasion of Jesus' arrival at Jerusalem. They "took branches of palm-trees, and went forth to meet him, and cried, Hosanna: Blessed is he that cometh in the name of the Lord"—that is, the verse following "Anna Adonai hoshi'ah-nna" in the Hallel psalm—and then called him "the King of Israel." Luke (xix. 38), writing for the Gentiles, omits the palm-branches and the Hosanna cry, and changes the Biblical verse into "Blessed be the King that cometh in the name of the Lord," while adding the Messianic salutation of the angels in the birth story, "Peace in heaven, and glory in the highest." Mark (xi. 8–10) combines the two versions, and changes the words of Luke into "Blessed be the kingdom of our father David, that cometh. . . . Hosanna in the highest," the closing words of which no longer give any sense The same is the case with the words "Hosanna to the son of David" in Matt xxi. 9, "Hosanna in the highest" being a corruption of the original version. The Psalm verses recited have been interpreted by the Rabbis also as referring to the advent of the Messiah (see Midr. Teh. to Ps. cxviii. 17, 21, 22; comp. Matt. xxi. 42).

Wünsche ("Erläuterungen der Evangelien aus Talmud und Midrasch," p. 241) thinks that the Passover and the Sukkot festivals have been confounded by the Gospel narrator (see also Festivals). It is noteworthy that the Easter week in the Syrian Church received the name "Shabbeta de-Osha'na" (= "Hosanna week"; Bar Hebræus, "Chronicle," quoted by Geiger in "Wiss. Zeit. Jüd. Theol." 1836, p. 417).

K.

HOSEA, THE PROPHET: Hosea must have been a citizen of the Northern Kingdom of Israel, and must have remained there permanently during the period of his prophetic activity; for "the land" (i. 2) means Israel, and "our king" (vii. 5) the king of the Northern Kingdom. According to the superscription of the book, Hosea was the son of Beeri, and, from what he says (i.–iii.) about his marriage, he had a wife who was faithless to him. When she fled from his house, he had to redeem her from the person into whose hands she had given herself. It has been assumed by some that this account has no historical basis, being merely an allegory. It is not, however, correct to maintain that the narrative is an allegory merely because the names can be interpreted allegorically, "Gomer the daughter of Diblaim" evidently meaning "destruction in consequence of idolatry" (דבלים = properly, "cakes of figs," which according to iii 1 [אשישי ענבים] were offered as an oblation). There seems also to be intended an assonance with "Shomron bat Efrayim." The narrative must be regarded as historical, and the faithlessness of the woman as a fact. Hosea, however, knew nothing of her character at the time of his marriage, on the contrary, it was made manifest to him only afterward, as if through a special intervention of God, in order to serve to the prophet as a symbol of Israel's unfaithfulness to the Lord. Other views derived from the Book of Hosea—for instance, that of Ewald, that the prophet was obliged to retire to Judah on account of the increasing hostility toward him, and that he there wrote his book, or that he belonged to the caste of priests—lack support, as do the stories concerning the prophet found in the later Jewish and the Christian traditions. For example, "Yuḥasin," 12a identifies בארי with בארה (I Chron. v. 6), and assumes that Hosea belonged to the tribe of Benjamin—an assumption entirely impossible on historical grounds, as the addition in I Chron. v. 5 shows. According to the Christian tradition, Hosea was a native of Beelmoth (Ephraem Syrus) or Belemoth (pseudo-Epiphanius and Isidorus) or Belemon (pseudo-Dorotheus), and belonged to the tribe of Issachar; while, according to Jerome, the prophet was a native of Beth-shemesh The Jewish tradition says ("Shalshelet ha-Ḳabbalah," p. 19) that he died at Babylon, and that his body, having been carried by a camel to Safed in upper Galilee, was buried there. All these stories are, however, historically worthless.

E. G. H V. Ry.

HOSEA, BOOK OF.—Biblical Data: The contents of the book may be summarized as follows:

Contents and Analysis.

Part i., ch. i.-iii.—Two symbolical actions: (*a*) At the command of YHWH, Hosea takes to wife an adulterous woman, as a symbol of the people of Israel, who have deserted their God and must be punished for their desertion, but who will be restored to YHWH'S favor after a time of probation. (*b*) At the further command of YHWH, Hosea is once more married to his former, unfaithful wife, as a symbol of the enduring love of YHWH for His people in spite of their faithlessness.

Part ii., ch. iv.-xiv.—Hosea's prophetic sermon on the sinful and idolatrous people of Israel. Announcement of the ruin that shall overtake Israel, now become morally and religiously degraded through the fault of its priests (iv. 1-14). To this is added a warning to Judah (iv. 15-18). Judgment is pronounced on the priests and the rulers who have led the people into sin, bringing upon them the inevitable punishment (v. 1-7). Description of the ruin that shall come upon Ephraim and Judah, which even the Assyrian king will not be able to turn away: Hosea in a vision anticipates its coming (v. 8-15). The exhortation to repentance (vi. 1-3); YHWH'S answer censuring the inconstancy of the people (vi. 4-7); the moral degradation of Israel, and especially of its priests (vi. 8-11); the rulers are made responsible for the sins of the people, because they rejoice therein instead of preventing them, and because, despite the national distress, they continue in their spirit of revelry and revolt (vii. 1-16). Renewed announcement of judgment upon Israel for its impiety, its idolatry, and its leagues with foreign nations; the punishment to be in the form of exile, into which the Israelites shall be led in spite of their fenced cities (viii. 1-14). In the distant land of exile they shall eat the bread of mourners, instead of rejoicing like the heathen over rich harvests and vintages (ix. 1-6), as a punishment for disregarding the warnings of the Prophets, who were persecuted even in the house of God (ix. 7-9). As they turned from YHWH in the wilderness, so they must now go into exile because of their idolatry, since YHWH will cast them away (ix. 10-17). Their ingratitude for YHWH'S love, as shown in their idolatry, must be punished by the destruction of the altars and images of Samaria (x. 1-8). Israel's sins in general, prevalent among the people from olden times, deserve bitter punishment (x. 9-15). In spite of YHWH'S loving care, they have ever been faithless to Him (xi. 1-7); therefore punishment will not be delayed: it will not, however, destroy, but purge them, leaving a remnant, YHWH'S infinite pity overcoming His anger (xi. 8-11). An examination of Israel's early history shows that Israel, as well as Judah, has always been faithless to YHWH, its guilt being all the heavier in view of YHWH'S loving care (xii. 1-15). Because of Israel's idolatry YHWH must destroy Israel's power and glory (xiii. 1-11); the sins of the people demand pitiless punishment, which, however, will not utterly destroy them (xiii. 12-xiv. 1). An appeal to Israel to return to YHWH, and a promise of forgiveness to the repentant people (xiv. 2-10).

Time of Composition.

——**Critical View:** The nature of Hosea's prophecies shows that he appeared at a time when the kingdom of Israel, which reached the zenith of its power under Jeroboam II. (782-741 B.C.), had begun to decline (*c.* 750 B.C.). The first part of the book, more particularly (ch. i.-iii.), dates from this time; for, according to i. 4, the crime of Jehu had not yet been atoned, it being avenged only after the murder (743 B.C.) of Zachariah, son of Jeroboam II. Hosea, however, continued his prophetic activity after the death of Jeroboam II., the period that marked the decline of the Northern Kingdom. This becomes evident especially from the passage vii. 2, referring to the usurpers who were supplanted by their successors at short intervals (comp. II Kings xv. 10-14). But nothing in the book itself, much less the statement in the superscription (part of which certainly is spurious) to the effect that he prophesied in the days of King Hezekiah, justifies the assumption that he lived to see the expedition of Tiglath-pileser of Assyria (745-728 B.C.) against Pekah of Israel (734 B.C.); for at that time a large part of the inhabitants of northern Israel and of the land east of the Jordan were led away captive by the Assyrians (II Kings xv. 29 *et seq.*), while, according to vi. 8 and xii. 12, Gilead still belonged to the kingdom of Israel. Hence the second part of the book (ch. iv.-xiv.) must have been written between 738 and 735 B.C., the "terminus a quo" of this prophecy being the year 738, because in that year King Menahem of Israel (741-737) was obliged to pay tribute to Assyria (II Kings xv. 17 *et seq.*). In agreement with this assumption it is evident that Hosea borrowed from Amos, since the expression "bet awen" (iv. 15; v. 8; x. 5, 8) could have been derived only from Amos v. 5, and viii. 14 is probably derived from Amos i. 14 *et seq.*

Authenticity and Integrity of the Book.

The authenticity of Hosea's prophecies is evidenced by their eminently individualistic and subjective character, consistently maintained throughout. Various additions, however, seem to have crept into the original text. The enumeration of the four kings of Judah—Uzziah, Jotham, Ahaz, and Hezekiah—is certainly spurious, Hosea being thereby made a contemporary of Isaiah. In the text itself, also, there appear various distinct interpolations. The passage i. 7, indeed, seems to be a Judaic addition, referring to the saving of Jerusalem from the hands of the Assyrians by Hezekiah in 701 B.C. It has been objected that Judah was really less guilty in comparison with Israel, and could therefore be set up as a contrast, implying not a delay of judgment, but an intensification of it.

And, again, since Hosea's descriptions of the future contain no allusion to a Messianic king of David's line, speaking merely of YHWH and Israel without any intermediary, it has been assumed that any references to the Messianic hopes were added by a later Judaic hand, including the passages ii. 1-3 and iv. 15a, the words "and David their king" in iii. 5, and "without a king, and without a prince" in iii. 4. Although such interpolations are perfectly possible a priori, there are certain difficulties in admitting them. Thus, the passage ii. 1-3 could only have been misplaced from its original position as a speech of Hosea, and have become corrupted. In fact, the assumption of Kuenen and others that the words were originally added to ii. 25, smooths away the greatest difficulty. And the further objections, that, according to this assumption, ii. 25 and ii. 2b-3 do not dovetail, and that ii. 3, compared with ii. 25, could never have been the end of a longer speech, are answered by the assumption that it was only after this transposition that the text was changed in order to make a better ending, such secondary emendations being often traceable.

The other alleged interpolations, also, are somewhat doubtful. For instance, the expression "David, their king" (iii. 5a) finds its parallel in the repetition of "YHWH" in 5b (in place of the אלין which might have been expected), although this also may be a secondary emendation. Grave objections might also be brought against the assertion that in iv. 15a, if Hosea had been the author of this passage, Judah ought to have been the one addressed. Finally, the authenticity of viii. 14 has been doubted on account of the resemblance to Amos ii. 4 *et seq.*; but, as it may be taken for granted that Hosea was acquainted with the prophecies of Amos (see above), there is no reason whatever to set aside viii. 14 as an interpolation.

Importance for Israel's Religious Development.

Amos and Hosea elevated the religion of Israel to the altitude of ethical monotheism, being the first to emphasize again and again the moral side of Yhwh's nature. Israel's faithlessness to Yhwh, which resisted all warnings, compelled Him to punish the people because of His own holiness; and these two prophets, recognizing that fact, were forced to the conclusion that Yhwh would not only punish Israel for the sake of His holiness, but would even allow Israel to perish in order to maintain the supremacy of His moral law. While Amos lays stress chiefly on justice and righteousness as those elements of the religious consciousness most acceptable to God, Hosea considers infidelity as the chief sin, of which Israel, the adulterous wife, has been guilty against her loving husband, Yhwh; and over against this he sets the unquenchable love of Yhwh, who, in spite of this infidelity, does not cast Israel away forever, but will take His people unto Himself again after the judgment.

HOSHAIAH (in the Babylonian Talmud generally **Oshaya**): Palestinian amora of the third and fourth amoraic generations (died about 350 c.e.). It is supposed that his colleague Ḥanina was his brother (Sanh. 14a; see Edels, "Ḥiddushe Agadot," *ad loc.*). They were lineal descendants from Eli the priest, which circumstance they assigned as reason for Johanan's failure to ordain them. For a living they plied the shoemaker's trade (see Hananiah [Ḥanina]). Hoshaiah and Ḥanina are mentioned in connection with a certain bath-house, the ownership of which was contested by two persons, one of whom turned over the property as "heḳdesh" (for sacred use), causing Hoshaiah, Ḥanina, and other rabbis to leave it (B. M. 6b). On the day Hoshaiah died, it is claimed, the largest date-palm in Tiberias was uprooted and fell (Yer. 'Ab. Zarah iii. 42c).

HOSHAIAH RABBAH, ROBA, BERABBI or **BERIBBI**: Palestinian amora of the first amoraic generation (about 200 c.e.); compiler of baraitot explaining the Mishnah-Tosefta. He was closely associated with the successors of Rabbi, as was his father with Rabbi himself. Hoshaiah's father, Ḥama, lived in Sepphoris, the residence of Rabbi and the seat of the patriarchs (see Ḥama b. Bisa).

Hoshaiah's yeshibah, also, was for many years located at Sepphoris, where pupils crowded to hear his lectures. Johanan, one of his greatest disciples, declared that Hoshaiah in his generation was like R. Meïr in his: even his colleagues could not always grasp the profundity of his arguments ('Er. 53a). And the esteem in which Hoshaiah was held by his pupils may be gaged by the statement that, even after Johanan had himself become a great scholar and a famous teacher and no longer needed Hoshaiah's instruction, he continued visiting the master, who in the meantime had grown old and had removed his school to Cæsarea (Yer. Sanh. xi. 30b).

"Father of the Mishnah."

Hoshaiah was called the "father of the Mishnah," not so much because of his collection and edition of the mishnayot, as because of the ability with which he explained and interpreted them (see Yer. Ḳid. i. 60a; Yer. B. Ḳ. iv. 4c). Hoshaiah's most important halakic decision is directed against the standard weights and measures, held by Johanan to be traditional from the Sinaitic period. Hoshaiah's radical point of view can be traced to his theory of the development of the Mishnah. He even goes so far as to overrule both Bet Shammai and Bet Hillel with reference to offerings brought on visiting the Temple three times every year (Ḥag. i. 2). The custom of greeting mourners on the Sabbath was permitted in southern Galilee, including Cæsarea, and prohibited in other places. Hoshaiah happened to be in a certain town on the Sabbath, and, meeting mourners, greeted them, saying, "I do not know your custom, but I greet you according to our custom" (Yer. M. Ḳ. iii. 82d).

Hoshaiah's consideration for others is exemplified in his gracious apology to the blind teacher whom he had engaged for his son, and whom he did not suffer to meet visitors at dinner for fear that he might be embarrassed (Yer. Peah viii. 21b).

Hoshaiah's authority must have been very powerful in his later years, when he successfully resisted the efforts of R. Gamaliel ha-Nasi, the son of Rabbi, to introduce "demai" (the "suspicion," on buying wheat from an 'am ha-areẓ, that he had not separated the tithes) into Syria (Yer. Ḥal. iv. 60a) It is also indicated by his remarkable interposition in regard to the mishnah which declares that "a Gentile's testimony in the case of an 'agunah is allowed only if stated as a matter of fact and without any intention to testify" (Yer. Yeb. xvi. 5; Yeb. 121b).

His Haggadah.

The haggadic utterances of Hoshaiah are numerous, scattered principally in Midrash Rabbah, which some have erroneously attributed to him because of the opening words "R. Hoshaiah Rabbah." In Genesis Rabbah, Hoshaiah's text with reference to the Creation is the verse "Then I was by him, as one brought up [= אמון] with him" (Prov. viii.

30). He transposes the letters to read אומן ("an architect"), and explains that "wisdom" (the Torah) was used as an instrument by God to create the universe. He illustrates this by the example of an earthly king who, in building a palace, needs an architect with plans and specifications. Freudenthal points out the analogy between Philo's ideas and those of Hoshaiah, and Bacher expresses his opinion that if Hoshaiah had not himself read the philosopher's works, he at least had heard of them from Origen, the most important champion of Philo ("J. Q. R." iii. 357). In a dialogue with Hoshaiah regarding circumcision, a "philosopher" (identified as Origen by Bacher) asked: "If the rite possesses such virtue, why did not God create the first man circumcised?" Hoshaiah replied that man, with all things created on the first six days, needs improving and perfecting, and that circumcision conduces to perfection (Gen. R. xi. 6). Bacher quotes a passage in which Hoshaiah refuted the incarnation dogma: "When God created Adam the angels mistook him for a deity and wished to sing the hymn 'Holy! Holy! Holy!' But when God put Adam to sleep they knew him to be mortal, as the prophet said: 'Cease ye from man, whose breath is in his nostrils: for wherein is he to be accounted of?'" (Isa. ii. 22; Gen. R. viii. 10).

Relations with Origen.

There are more examples in the Talmud to justify the assertion that Hoshaiah as the representative of Judaism was in constant touch with the early Christians at Cæsarea, and particularly with Origen, who was ordained presbyter at Cæsarea in 228, and who in 231 opened a philosophical and theological school which was attended by persons from all parts, anxious to hear his interpretation of the Scriptures. Origen died in 254 at Tyre, so that his last twenty-five years were spent in the region in which most of the Amoraim lived. The "philosopher" whom the latter mention as controverting Hoshaiah's Biblical interpretations was doubtless Origen himself or one of his students. The influence brought to bear by Hoshaiah and others probably induced Origen to formulate the doctrine of the different degrees of dignity in the Trinity, for which Origen was accused as a heretic.

Hoshaiah was very strict in requiring from a proselyte both circumcision and immersion (baptism) in the presence of three rabbis (Yeb. 46b); this was very likely directed against the free conversion of the Gentiles by the Christian Jews. In a case of partition by heirs or partners the Mishnah says: "They can not divide the Scriptures between them, even when all parties are satisfied." Hoshaiah adds: "even if they wish to divide by volumes, one to take the Psalms and another the Chronicles" (Yer. B. B. i. 13a). It is explained that such an exchange would be considered as unequal and as giving the impression that one Biblical book is holier than another. This is more easily understood in view of the exaltation by the Judæo-Christians of the Psalms in comparison with the other books of the Old Testament, especially with the Chronicles, as against the contrary view of Judaism, which recognizes no preference between the various books.

HOSHAIAH OF TURYA. See Abba Hoshaya.

HOSHAIAH ZE'ERA DE-MIN ḤABRAYA: Palestinian amora of the third amoraic period (died about 350 C.E.). In the Tosafot it is claimed that "Ḥabraya" was the name of his birthplace, but according to Rashi the word means a "society of colleagues," and the surname "Ze'era" (minor, junior) is used to distinguish him from Hoshaiah the Elder (Ḥul. 12b). He belonged to the rabbis "of the south" (southern Galilee), and may be identified with Hoshaiah, the brother of Ḥanina, who was also a "ḥaber." Only one halakah is mentioned in the name of Hoshaiah Ze'era (Niddah 26a).

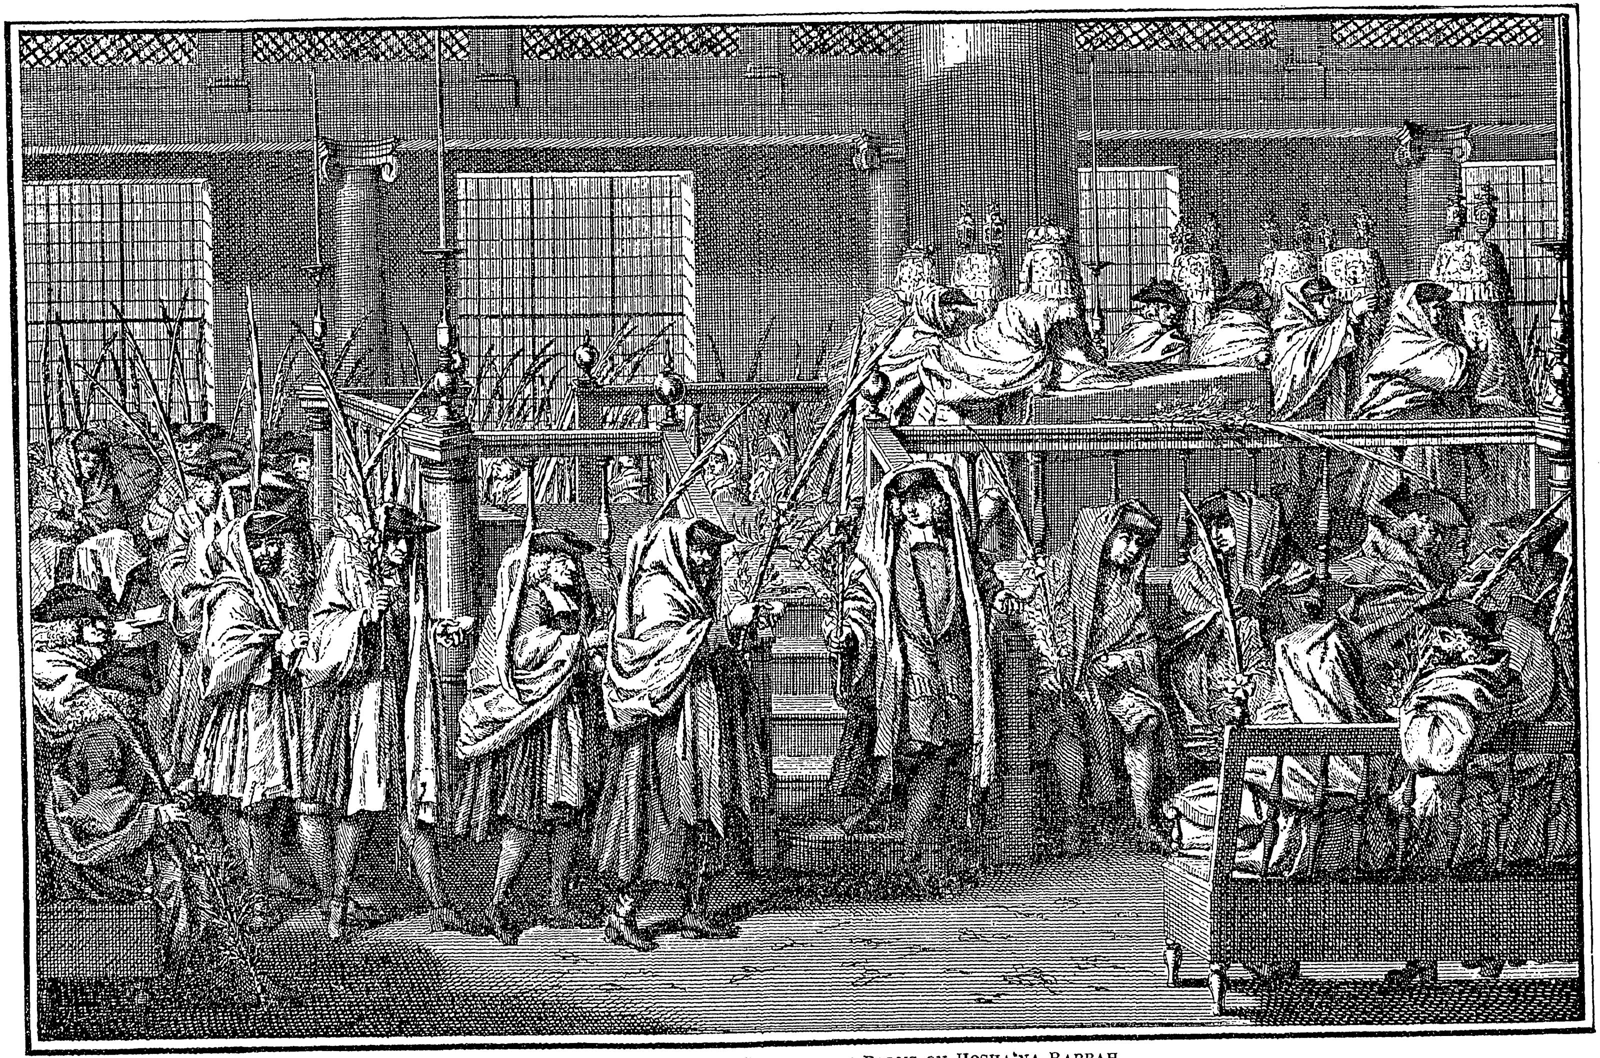
E. C. J. D. E.

HOSHA'NA RABBAH ("the great Hosha'na"): The popular name for the seventh day of the Feast of Booths (Sukkot); the day on which the exclamation "Hosha'na!" (save now!) is often repeated, while on the other days of the feast it is used but sparingly. While the name arose comparatively late, the character of the day as distinguished from the rest of the feast dates back to the days of the Temple, probably to the first Hasmoneans or even earlier. The Gospels mention the word as the cheerful cry of men carrying palm-branches, but by a mistake place the custom in the season shortly before the Passover, instead of in the Feast of Booths. The Mishnah (Suk. iv. 5) mentions the processions around the altar during the feast, once each on six days, but seven times on the seventh day. It explains the "commandment of willows" thus: At a place below Jerusalem called Colonia willows were gathered—big branches, about eleven cubits long; these were set up at the sides of the altar with the foliage overhanging it. The willow is furthermore mentioned in Suk. iv. 1, 3 as being in use on six or seven days—six times when Sabbath fell other than on the seventh day of the feast, seven times when it fell on the seventh day. From this it would seem that the use of the willow on the seventh day was deemed of sufficient importance in the Temple service to justify its retention even on the Sabbath.

Ceremonies.

The joyousness of the Feast of Booths, as it gathered around the "drawing of water" and developed in music and torchlight processions (Suk. iv. 5), attained its height on the seventh day. Many of the exercises were in conflict with the Sabbath or even with a feast-day (Suk. v. 1, "the flute-playing lasts five or six days"); but although with the destruction of the Temple nearly all these exercises had fallen into disuse, yet in framing the new Calendar, about 361, the patriarch Hillel and his advisers deemed Hosha'na Rabbah so important and so much in conflict with the Sabbath that, to prevent Hosha'na Rabbah falling on a Sabbath, they would not allow the New-Moon of Tishri to occur on a Sunday. All the ceremonies or services of praise or prayer which belonged to the other middle days of the feast



Procession Showing the Carrying of Palms on Hosha‘na Rabbah.

(After Picart, 1723.)

while the Temple stood, or which belong to them now, such as Hallel and the swinging of the "lulab," or the sitting in the booth, belong also to Hosha'na Rabbah. The bunch of five willow-twigs in no way supersedes the two willow-twigs in the lulab.

Abudarham speaks of the custom, followed by some of his contemporaries, of reading the Pentateuch on the night of Hosha'na Rabbah, out of which has grown the modern custom of meeting socially on that night and reading Deuteronomy, Psalms, and passages from the Zohar, of reciting some cabalistic prayers, and of eating in the intervals cakes, fruits, and other refreshments. Before the regular morning service the Sephardim have now (though they evidently did not have them in the days of Abudarham) their "selihot," in which the "thirteen attributes" (Ex. xxxiv. 6, 7) play an even greater part than on other occasions for selihot. In Amsterdam and in a few places in England, America, and elsewhere they also sound the shofar in connection with the processions. In both rituals, in the early part of the morning service, the Sabbath psalms are inserted, and the fuller "Ḳedushah" is recited in the "Additional," just as on true festival days. After this prayer all the scrolls are taken out of the Ark (on the six preceding days only one or two; none on the Sabbath); the reader, in making the circuit round the platform, is followed by men bearing scrolls; after them come others carrying the lulab. On this and the preceding days they begin: "Hosha'na! for Thy sake, our God! Hosha'na! for Thy sake, our Creator!" etc. Then come the seven processions. The compositions chanted in these are quite different in the two rituals, and much changed from those given in the Maḥzor Vitry (dated 4968 = 1208); the Sephardim refer successively to Abraham, Isaac, Jacob, Moses, Aaron, Phinehas, and David. Later on the lulab is laid aside, every worshiper takes up a small bunch of willows, and all join in the hymn, "Ḳol mebasser, mebasser we-omer" (A voice brings news, brings news and says), expressing thus their Messianic hopes.

Prayers.

The compositions recited during or after the processions generally consist of twenty-two versicles each, alphabetically arranged, "Hosha'na" being repeated or implied after each, as, for instance, "The land from evil—save now!" After the processions the Germans sing a hymn of eleven distichs. The Mishnah gives the invocation "I and He! ["Ani wahu"] Save now!" addressed to God on the days of the feast, and it is still recited once in each Hosha'na service (the Hebrew for "save now" is here "Hoshi'ah-na," which has come into English through Christian sources as "Hosanna"). It also records that the verse from Ps. cxviii. 25, Hebr., "I pray, O Lord, save now! I pray, O Lord, give success now," was sung during each procession round the altar.

Bibliography: *Maḥzor* of the several modern rituals; also the *Maḥzor Vitry*; *Suk.* 42a to 51b; *Suk.* iv. and v.; and *Yer. Suk.* iv., v.; also "tiḳḳun," or arrangement, for Shabu'ot and Hosha'na Rabbah, which gives the readings for the night-meeting.

HOSH'ANOT. See Hakkafot.

HOSHEA (הושע = "[God is] salvation"; in the Assyrian tablets, "Ausi(a)" ["Zeitschrift für Assyriologie," ii. 261]).—**Biblical Data:** Last of the nineteen kings of Israel; son of Elah (II Kings xv. 30). Hoshea secured the throne through a conspiracy in which he was the leader, and which resulted in the assassination of Pekah, "in the twelfth year of Ahaz king of Judah" (II Kings xvii. 1). He reigned nine years (*ib.*), and did that which was evil in the eyes of Yhwh, though not to the extent to which his predecessors had gone (II Kings xvii. 2). Coming into conflict with Shalmaneser, King of Assyria, Hoshea was reduced to vassalage, and was forced to pay an annual tribute to his Assyrian conqueror (II Kings xvii. 3). After a time, however, having negotiated an alliance with the Egyptian ruler So, he discontinued the tribute. This was taken as a sign of rebellion by the Assyrian monarch, and Hoshea was seized and imprisoned (II Kings xvii. 4). Samaria was besieged by the Assyrian forces, which, after three years, "in the ninth year of Hoshea," captured the city and carried its population into exile (II Kings xvii. 6).

——**Critical View (1):** The motives of Hoshea's policy are made intelligible by reference to the Assyrian documents and to the political conditions in western Asia reflected by them. Under Ahaz, Judah had rendered allegiance to Tiglath-pileser III. of Assyria, while the Northern Kingdom under Pekah, in league with Rezin of Damascus, had attempted to coerce the Judean king into joint action against Assyria (II Kings xvi. 5; Isa. vii. 1–6). Tiglath-pileser, however, went to the aid of his ally (comp. II Kings xvi. 9). At this juncture Hoshea placed himself at the head of the Assyrian party in Samaria and removed Pekah by assassination; Tiglath-pileser rewarded Hoshea by making him king over Israel, or, rather, over Ephraim, then reduced to very small dimensions.

So long as Tiglath-pileser was on the throne Hoshea remained loyal; but when Shalmaneser IV. succeeded, he made an effort to regain his independence. In Egypt the Ethiopian dynasty had begun to reign, and Hoshea entered into negotiations with So (סוא, probably more correctly vocalized as סֶוֵא), an underling of King Shabako (see Winckler, "Untersuchungen zur Altorientalischen Gesch." pp. 92–94; *idem*, in "Mittheilungen der Vorderasiatischen Gesellschaft," i. 5; Rogers, "Hist. of Babylonia and Assyria," ii. 144; comp. Meyer, "Gesch. des Alten Egyptens," pp. 343–346). Hoshea, probably misled by favorable promises on the part of the Ethiopian ruler of Egypt, discontinued paying tribute. Shalmaneser IV. soon interpreted this symptom, and directed his armies against Samaria. The details of the campaign are not known. It is likely that Hoshea, disappointed by the "broken reed" (="Egypt"; see Isa. xx., xxx. 1–5, xxxi. 1–3), endeavored to avert the calamity by resuming the payment of tribute, but that, distrusted, he was forced to fight, and was taken prisoner in battle (Hommel, "Gesch. Babyloniens und Assyriens," p. 675; Rogers, *l.c.*). The capital, though deprived of the ruler, made an effective defense, and Shalmaneser died before it was captured (comp. Winckler, in Schrader, "K. A. T." 3d ed., p. 268).

The chronology of Hoshea's reign is involved in difficulties. The Biblical statement in II Kings xv. 30, giving the twentieth year of Jotham as the beginning of the reign, is to be dismissed either as due to a scribal error or as dating from the beginning of Jotham's reign. The "nine years" given Hoshea extend from 733, the year of Pekah's assassination, to 724, the year of Hoshea's capture and three years before the fall of Samaria. These dates, however, are not accepted by all modern scholars (see Hommel, *l.c.* pp. 964 *et seq.*; *idem,* "Assyria," in Hastings, "Dict. Bible"; Tiele, "Babylonisch-Assyrische Gesch." i. 232; Winckler, "Gesch. Babyloniens und Assyriens," p. 230). References to the events of Hoshea's reign are found in Hosea xi.-xiv. and Isa. xxviii.

E. G. H. I. M. P.

——**Critical View (2):** This last king of Israel appears on the Assyrian monuments as "Ausi(a)." The statement of II Kings xvii. 1 that he ascended the throne in the twelfth year of Ahaz must be dismissed as unhistorical. Hoshea became king in 733 (or in 734); for when Assyria came to the rescue of Ahaz against Rezin of Damascus and Pekah of Israel, the last-named was assassinated and Hoshea appointed or confirmed as king by Tiglath-pileser III. (Schrader, "K. A. T." 2d ed., p. 475; *idem,* "K. B." ii. 32). From II Kings xv. 29, 30 and xvii. 3-6 it would appear that Hoshea had rebelled twice against Assyria. This at first glance is highly improbable. He had been the leader of the pro-Assyrian party and owed his throne to Tiglath-pileser III. It is reasonable to infer that the death of this monarch brought about the change in Hoshea's relations to the Assyrian suzerain, and induced him to look for foreign allies to enable him to throw off the burden of the annual tribute, which must have been a terrible drain on the people (comp. Hosea v. 11-13).

Winckler first attempted to separate the Biblical passages quoted above into two parallel accounts of one event, in order to eliminate the assumption of two uprisings with refusal of tribute under Shalmaneser. Kittel ("Die Bücher der Könige" on II Kings xvii. 3) meets the difficulty by omitting Shalmaneser as a later gloss. Under Tiglath-pileser, Hoshea paid the annual tribute; after that ruler's death, he regarded, contrary to Hosea's warning, the political conditions as favorable for declaring himself independent.

According to II Kings xvii. 4, So, King of Egypt, was the monarch from whom Hoshea expected effective assistance. Generally this So (or Sewe = Assyrian "Sib'e") is identified with Shabako, the Ethiopian, who at the time controlled the destinies of Egypt. Winckler makes him a prince or vassal prince or even a general of the North-Arabian empire of Muṣri ("Mitt. der Vorderas. Ges." 1898, p. 5), and contends that in this anti-Assyrian movement, in which also Tyre had a share, the last effort was made on the part of the Arabic commercial states to gain control of Palestine, and thus to shut out Assyria from the Arabo-Indian commerce, for which possession of the Mediterranean ports was of vital importance (Schrader, "K. A. T." 3d ed., pp. 268 *et seq.*).

Hoshea's attempt, whoever were his supporters, failed. In 725 B.C. Shalmaneser invaded Israel. Hoshea must have surrendered to him at once. This would give nine years to his reign. He was blinded (read ויעורהו instead of the tautological ויעצרהו in II Kings xvii. 4), and was led away a prisoner. The three years' siege of Samaria is not to be counted as part of his reign.

The assumption that Hoshea's wickedness was less than his predecessors' (II Kings xvii. 2) is probably an afterthought (if it is not due to a corruption of the original text; see Lucian's recension of LXX.). Possibly his earlier fidelity to Assyria, which was regarded by the prophetic party as God's predestined instrument, may underly the conception of his (by comparison) less censurable impiety (see ISAIAH).

E. G. H.

HOSHKE, REUBEN (called also **Reuben ben Hoshke Sofer** and sometimes **Abraham Reuben**): Cabalist; rabbi of Prague; died April 3, 1673. "Hoshke," his father's name, is a Polish diminutive for "Joshua," mistaken by De Rossi ("Dizionario," *s.v.* "Oski, Ruben") and Zunz ("Z. G." p. 402) for his family name. He wrote: "Yalḳuṭ Re'ubeni," a cabalistic work (an imitation of the "Yalḳuṭ Ḥadash") containing a collection of sayings taken from other cabalistic works and arranged in alphabetical order (Prague, 1660); "Yalḳuṭ Re'ubeni ha-Gadol," a cabalistic midrash on the Pentateuch arranged according to the order of the parashiyyot (Wilmersdorf, 1681); "Dabar Shebi-Ḳedushah," a manual of asceticism and repentance (Sulzbach, 1684); "'Oneg Shabbat," cabalistic reflections on the Sabbath laws, followed by an appendix entitled "Derek Ḳabbalat Shabbat" (*ib.* 1684).

HOSPITAL: House set apart for the treatment of the sick. In early times such institutions were required only for strangers, the idea of sanitary isolation being quite modern, except in case of LEPROSY, when a "house of separation" ("bet ha-ḥofshit") was used (II Kings xv. 5; II Chron. xxvi. 21). Visitation of the sick in their own houses was the ancient substitute. It has been claimed that in its origin the hospital is a specifically Christian institution, but the very passage, from Jerome, which is quoted to substantiate this claim ("Epistola," 77) shows that the Roman lady Fabiola, whom Jerome praises for founding one was, in his opinion, only imitating Jewish custom in "transplanting the terebinth of Abraham to Ausonian shores." As far as evidence goes, the early equivalents of hospitals were only portions of homes for strangers reserved for those who might fall sick. Such homes were usual among Jews in Talmudical times (see HOSPITALITY), and became especially frequent in Jewish communities after the Crusades.

The specific Jewish name for hospital ("heḳdesh") was first used at Cologne in the eleventh century (Brisch, "Gesch. der Juden in Köln," i. 19 *et seq.*). Berliner ("Aus dem Inneren Leben," p. 100) shows that a similar institution existed at Munich early in the fourteenth century. But with the continual migration of the Jews it was difficult to keep a special house for the sick, who were mainly cared for by the ḥebra ḳaddisha. Doubtless in the Jews' inns of Spain, as in the "Auberge Juive" of Paris, strangers who fell sick were attended to. The wealthy Sephardim appear to have been the first to found special hospitals for the Jewish sick. The Beth Ḥolim of London, which is an asylum for the aged as well, dates from 1747; the Krankenhaus of Berlin from 1753; in Metz a special Jewish hospital was founded at the end of the eighteenth century, toward the foundation of which the municipality contributed. The Jews of Paris were content with a medical attendant attached to the ḥebra ḳaddisha, who visited the sick in their homes till 1836, when the first Jewish hospital was founded (L. Kahn, "Institutions des Juifs à Paris," p. 36).

In modern times Jews very often utilize the general hospitals of the cities in which they dwell, after making the arrangements rendered necessary by the requirements of the dietary laws. This is done in London and most other English cities. In other places special Jewish hospitals have been erected, as the Mount Sinai, Beth Israel, and Lebanon hospitals of New York, which, however, receive patients of other creeds. The Jews' Hospital of London (founded 1795) is not a hospital in the strict sense of the word, but a home for the aged. The Jewish Hospital of Philadelphia combines the characteristics of both (see Charity; Colorado; Heḳdesh).

J.

HOSPITALITY.—Biblical Data: The "ger," the sojourner who lived with a Hebrew family or clan, was assured by the Biblical law not only of protection against oppression (Ex. xxiii. 9) and deceit (Lev. xix. 33), but also of love from the natives (Deut. xvi. 14), who were to love him even as themselves (Lev. xix. 34). He was to be invited to participate in the family and tribal festivals (Deut. *l.c.*), the Passover excepted; and even in the latter he could take part if he submitted to circumcision. He received a share in the tithes distributed among the poor (*ib.* xiv. 19); and "one law and one statute" applied equally to the native and to him (Ex. xii. 49). God Himself loves the stranger (Deut. x 18) and keeps him under His special protection (Ps. cxlvi. 9).

Biblical Examples.

While these laws, scattered throughout the Bible (see Gentile; Proselytes), point to a deep-seated feeling of kindness toward strangers among the ancient Hebrews, the intensity of the feeling of hospitality among them can best be learned from the casual references to it in the narrative portions of the Bible. Thus Abraham, the archetype of the Hebrew race, entertained three strangers at his house and showed them many kindnesses (Gen. xviii 1-8). His kinsman Lot was ready to risk his life and the honor of his daughters rather than transgress the laws of hospitality (*ib.* xix. 1-8). Laban showed kindness to Jacob and to Eliezer (*ib.* xxix. 13, xxvi 31) when they came to him as strangers. Jethro rebuked his daughters because they did not invite Moses, who was a stranger in Midian, to the house (Ex. ii. 20); and Rahab was greatly rewarded because she had entertained Joshua's spies (Josh. ii.). Manoah would not allow the angel to depart before he had partaken of his hospitality (Judges xiii. 15); Gideon punished the elders of Succoth and of Penuel for their breach of hospitality (*ib.* viii. 5, 8); and David demanded hospitable treatment from Nabal (I Sam. xxv. 8). Barzillai was invited to the royal table because he had been kind to David when the latter fled from Absalom (II Sam. xvii. 27, xix. 32). The Shunammite woman had a room furnished with a bed, a table, a chair, and a lamp for Elisha the prophet (II Kings iv. 8-11).

The abuse of hospitality once caused a civil war in Israel which might have resulted in the extinction of the whole tribe of Benjamites (Judges xix., xx.). In one instance, the case of Jael and Sisera, a breach of hospitality is lauded by the Biblical writer (*ib.* iv. 18-21, v. 24-27). This was probably due to the bitter enmity entertained by the oppressed Jews toward their Canaanitish neighbors. Otherwise such a transgression could never have been tolerated in primitive Jewish society (see Cheyne and Black, "Encyc. Bibl." *s.v.*).

Behavior to Guests.

From these scattered references an idea can be formed of the manner in which a guest was received in an ancient Jewish household and of the relations that existed between guest and host. The latter would go out to meet the stranger on his way, and would ask no questions as to his name and condition until his first needs had been satisfied (Gen. xxiv. 33). On entering the house he was given water to wash his feet, and a meal was then put before him, his animals being meanwhile attended to (*ib.* xviii. 4; xix. 2; xxiv. 25, 32). During his stay the host felt himself personally responsible for any injury that might befall his guest (*ib.* xix. 8). On leaving, another repast was served (*ib.* xxvi. 30; Judges xix. 3), when a covenant was sometimes entered into by the guest and his host (Gen. xxvi. 31), and the latter again accompanied the stranger some distance on his way (*ib.* xviii. 16). On his part, the guest blessed the host before taking leave (*ib.* 10), and asked him whether he stood in need of anything (II Kings iv. 13). If the guest wished to remain in the clan or in the locality, he was permitted to select a dwelling-place (Gen. xx. 15).

The practise of hospitality did not decline with the changes in social conditions. Even in later times, when the Jews were settled in cities, this virtue was held in highest esteem. Isaiah (Isa. lviii. 7) preferred charity and hospitality to fasting. Job, in complaining of his misfortunes in spite of the fact that he had led a virtuous life, mentions among other things that he had always opened his door to the stranger (Job xxxi. 32); while Eliphaz accounts for the misery which had befallen Job on the ground that he had not been hospitable (*ib.* xxii. 7).

Ben Sira lays down rules for table manners for the guest (Ecclus. [Sirach] xxxi. 12-26), and condemns in the strongest terms the habits of the parasite who takes advantage of the custom of hospitality (*ib.* xxix. 23-28; xl. 28, 30).

E. G. H. J. H. G.

——**In Rabbinical Literature:** Among the ethical teachings of the Rabbis, the duties of hospitality occupy a very prominent position. Some regard hospitality more highly than the reception given to the Shekinah (Divine Presence); others make it superior to visiting the house of study; others, again, consider it as one of the six meritorious deeds whose reward is like a tree, the fruit of which man enjoys in this world, while the trunk remains for his enjoyment in the world to come (Shab. 127a). Special emphasis was laid upon the hospitality due to a scholar, so that it was said that one who shows hospitality to a student of the Law is regarded as if he had offered the daily sacrifice (Ber. 10b, 63b, Ḳid. 76b; Gen. R. lviii. 12).

Abraham and Job were regarded by the Rabbis as the models of Jewish hospitality. Numerous legends cluster about these names in the haggadic literature, illustrative of their generosity and hospitality (see Abraham; Job). The doors of their houses were open at each of the four corners, so that strangers coming from any side might find ready access (Gen. R. xlviii. 7; Yalḳ., Job, 917; comp. Soṭah 10a). Of Job it is related that he had forty tables spread at all times for strangers and twelve tables for widows (compare Testament of Job, ed. Kohler, in Kohut Memorial Volume, Berlin, 1897, Introduction.

"Let thy house be open wide; let the poor be the members of thy household," is the precept expounded by one of the earliest Jewish teachers (Ab. i. 5). Rab Huna observed the custom of opening the door of his house when he was about to take his meal, and saying, "Any one who is hungry may come in and eat" (Ta'an. 20b). This custom has survived in modern times on Passover eve, when the above-cited passage is read in the Haggadah The custom of opening the door during the "Seder," while variously explained, probably has the same origin. Some rabbis suggested that every house should have doors on all four sides, so that the poor might find easy access from all parts (Ab R. N. viii.). To sit long at the table, so as to give an opportunity to the belated poor to enter and partake of the meal, was regarded as a highly meritorious act, for which one's days on earth would be prolonged (Ber. 54b) In Jerusalem the custom prevailed of displaying a flag in front of the door, thereby indicating that the meal was ready, and that guests might come in and partake thereof. The removal of the flag was a sign that the meal was finished, and that guests should cease entering (B. B. 93b; Lam. R. iv. 4; see Custom).

Duty of Host.

It is the duty of the host to be cheerful during meals, and thus make his guests feel at home and comfortable at the table (Derek Ereẓ Zuṭa ix.). It is commendable that the host himself serve at the table, thereby showing his willingness to satisfy his guest (Ḳid. 32b). The host is warned against watching his guest too attentively at the table, for thereby the visitor may be led to abstain from eating as much as he would like ("Sefer Ḥasidim," ed. Wistinetzky, § 105). Women were regarded as being better able than men to recognize the character of a stranger (Ber. 10b, from II Kings iv. 9), but less liberal in supplying the wants of a guest (B. M. 87a; comp. Derek Ereẓ Rabbah vi.). The Jew is commanded to teach his children to be kind and courteous to strangers. If one knocks at the door inquiring after the master of the house, the son or the daughter answering the knock should not reply gruffly, but should take the stranger into the house and prepare some food for him (Ab. R. N. ed. Schechter, p. 17a, b, Vienna, 1887). It was the custom with some in Jerusalem to place all the dishes on the table at once, so that the fastidious guest was not compelled to eat something he did not desire, but might choose anything he wished (Lam. R. iv. 4).

Duty of Guest.

The guest was enjoined to show his gratitude to the host in various ways. The grateful and ungrateful guests are well contrasted by the Rabbis (Ber. 58a). While the host was to break bread first, the guest was expected to pronounce grace after the meal, in which he included a special blessing for the host: "May it be the will of God that the master of this house shall not be ashamed in this world, nor abashed in the world to come; that he shall be successful in all his undertakings; and that his property (and our property) shall prosper and be near the city; and that Satan shall have no dominion over his handiwork (and over our handiwork); and that no sinful act or iniquitous thought shall occur to him (and to us) from now even to all eternity" (Ber. 46a; Maimonides, "Yad," Berakot, vii. 2; Shulḥan 'Aruk, Oraḥ Ḥayyim, 201, 1). The guest was expected to leave some of the food on his dish, to show that he had more than enough. If, however, the host asked him to finish his portion, it was not necessary for him to leave any ("Sefer Ḥasidim," §§ 870-878, 883). It was the duty of the guest to comply with all the requests of the host (Pes. 86b; Oraḥ Ḥayyim, 170, 5; comp. "Magen Abraham" *ad loc.*). He might not give of his meal to the son or to the daughter or to the servant of the host without the host's permission (Ḥul. 94a; Derek Ereẓ Rabbah ix.; "Yad," *l.c.* vii. 10; Oraḥ Ḥayyim, 170, 19). The habitual parasite, who took every opportunity to partake of meals at the house of another, was very strongly denounced by the Rabbis, especially if the parasite happened to be a scholar (Pes. 49a).

In the Middle Ages, especially after the period of the Crusades, hospitality became a necessity among the Jews. The poor mendicants or itinerant students were distributed among the households of the town, and a system of "Pletten"—*i.e.*, "Billetten," bills for which the poor traveler received meals and lodging at a household—was introduced. This system still survives in many Jewish communities, especially where meals for the Sabbath-day are provided for the poor guests. Most of the Jewish communities have their "haknasat orehim," institutions where travelers may obtain lodging during their stay in town. For further details concerning these organizations see Baḥur and Charity.

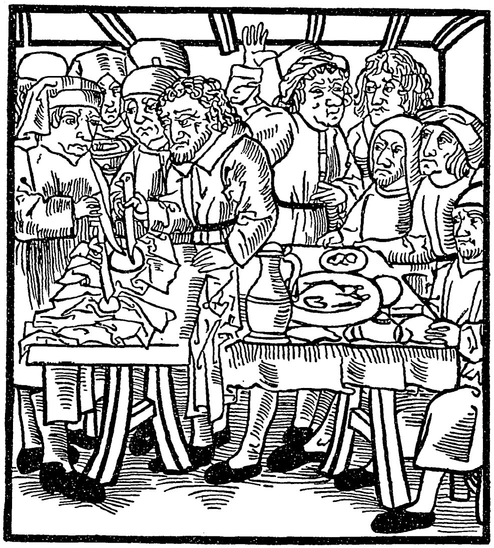
S. S. J. H. G.

HOST, DESECRATION OF:

Defiling the host or sacred wafer of the mass. In the Middle Ages the

Jews were frequently accused of desecrating the host, an accusation equal in gravity to that of desecrating relics and images of Jesus and the saints. This accusation has brought thousands of Jews to the stake. The Jews were alleged to steal the host or to acquire it by purchase or bribery, to break it or seethe it, and to stick needles into it or transfix it, whereupon it began to bleed. Even when such an accusation was supported only by the testimony of a thief, a disreputable woman, a recent convert, or some one having a grudge against the accused Jews, the alleged perpetrators were put on trial, and, on evidence that was often preposterous, or after a confession exacted by torture, were condemned and burned, sometimes with all the other Jews of the place. The question, Why did not the Jews destroy the pierced host, the corpus delicti? the chronicles answer by the following statement: The Jews, frightened on seeing the blood, endeavored to hide the host, but while doing so miracles happened which aroused the attention of the Christian population and led to the discovery of the crime. The story is told, for instance, that once when the Jews were burying pieces of a pierced host in a meadow, these pieces were changed into butterflies, which began to heal cripples and blind persons. Another time, when some Jews were burning such pieces in a stove, angels and doves flew out. Again, the pieces fluttered out of a swamp, and a herd of grazing oxen, on seeing them, bowed down before them. The blood from the host was said to have splashed the foreheads of the Jews, leaving an indelible mark that betrayed them. It was also said that the pierced host had once whimpered and cried like an infant; this story is perhaps the earliest. As a rule, the later the chronicles the more stories of this nature they contain.



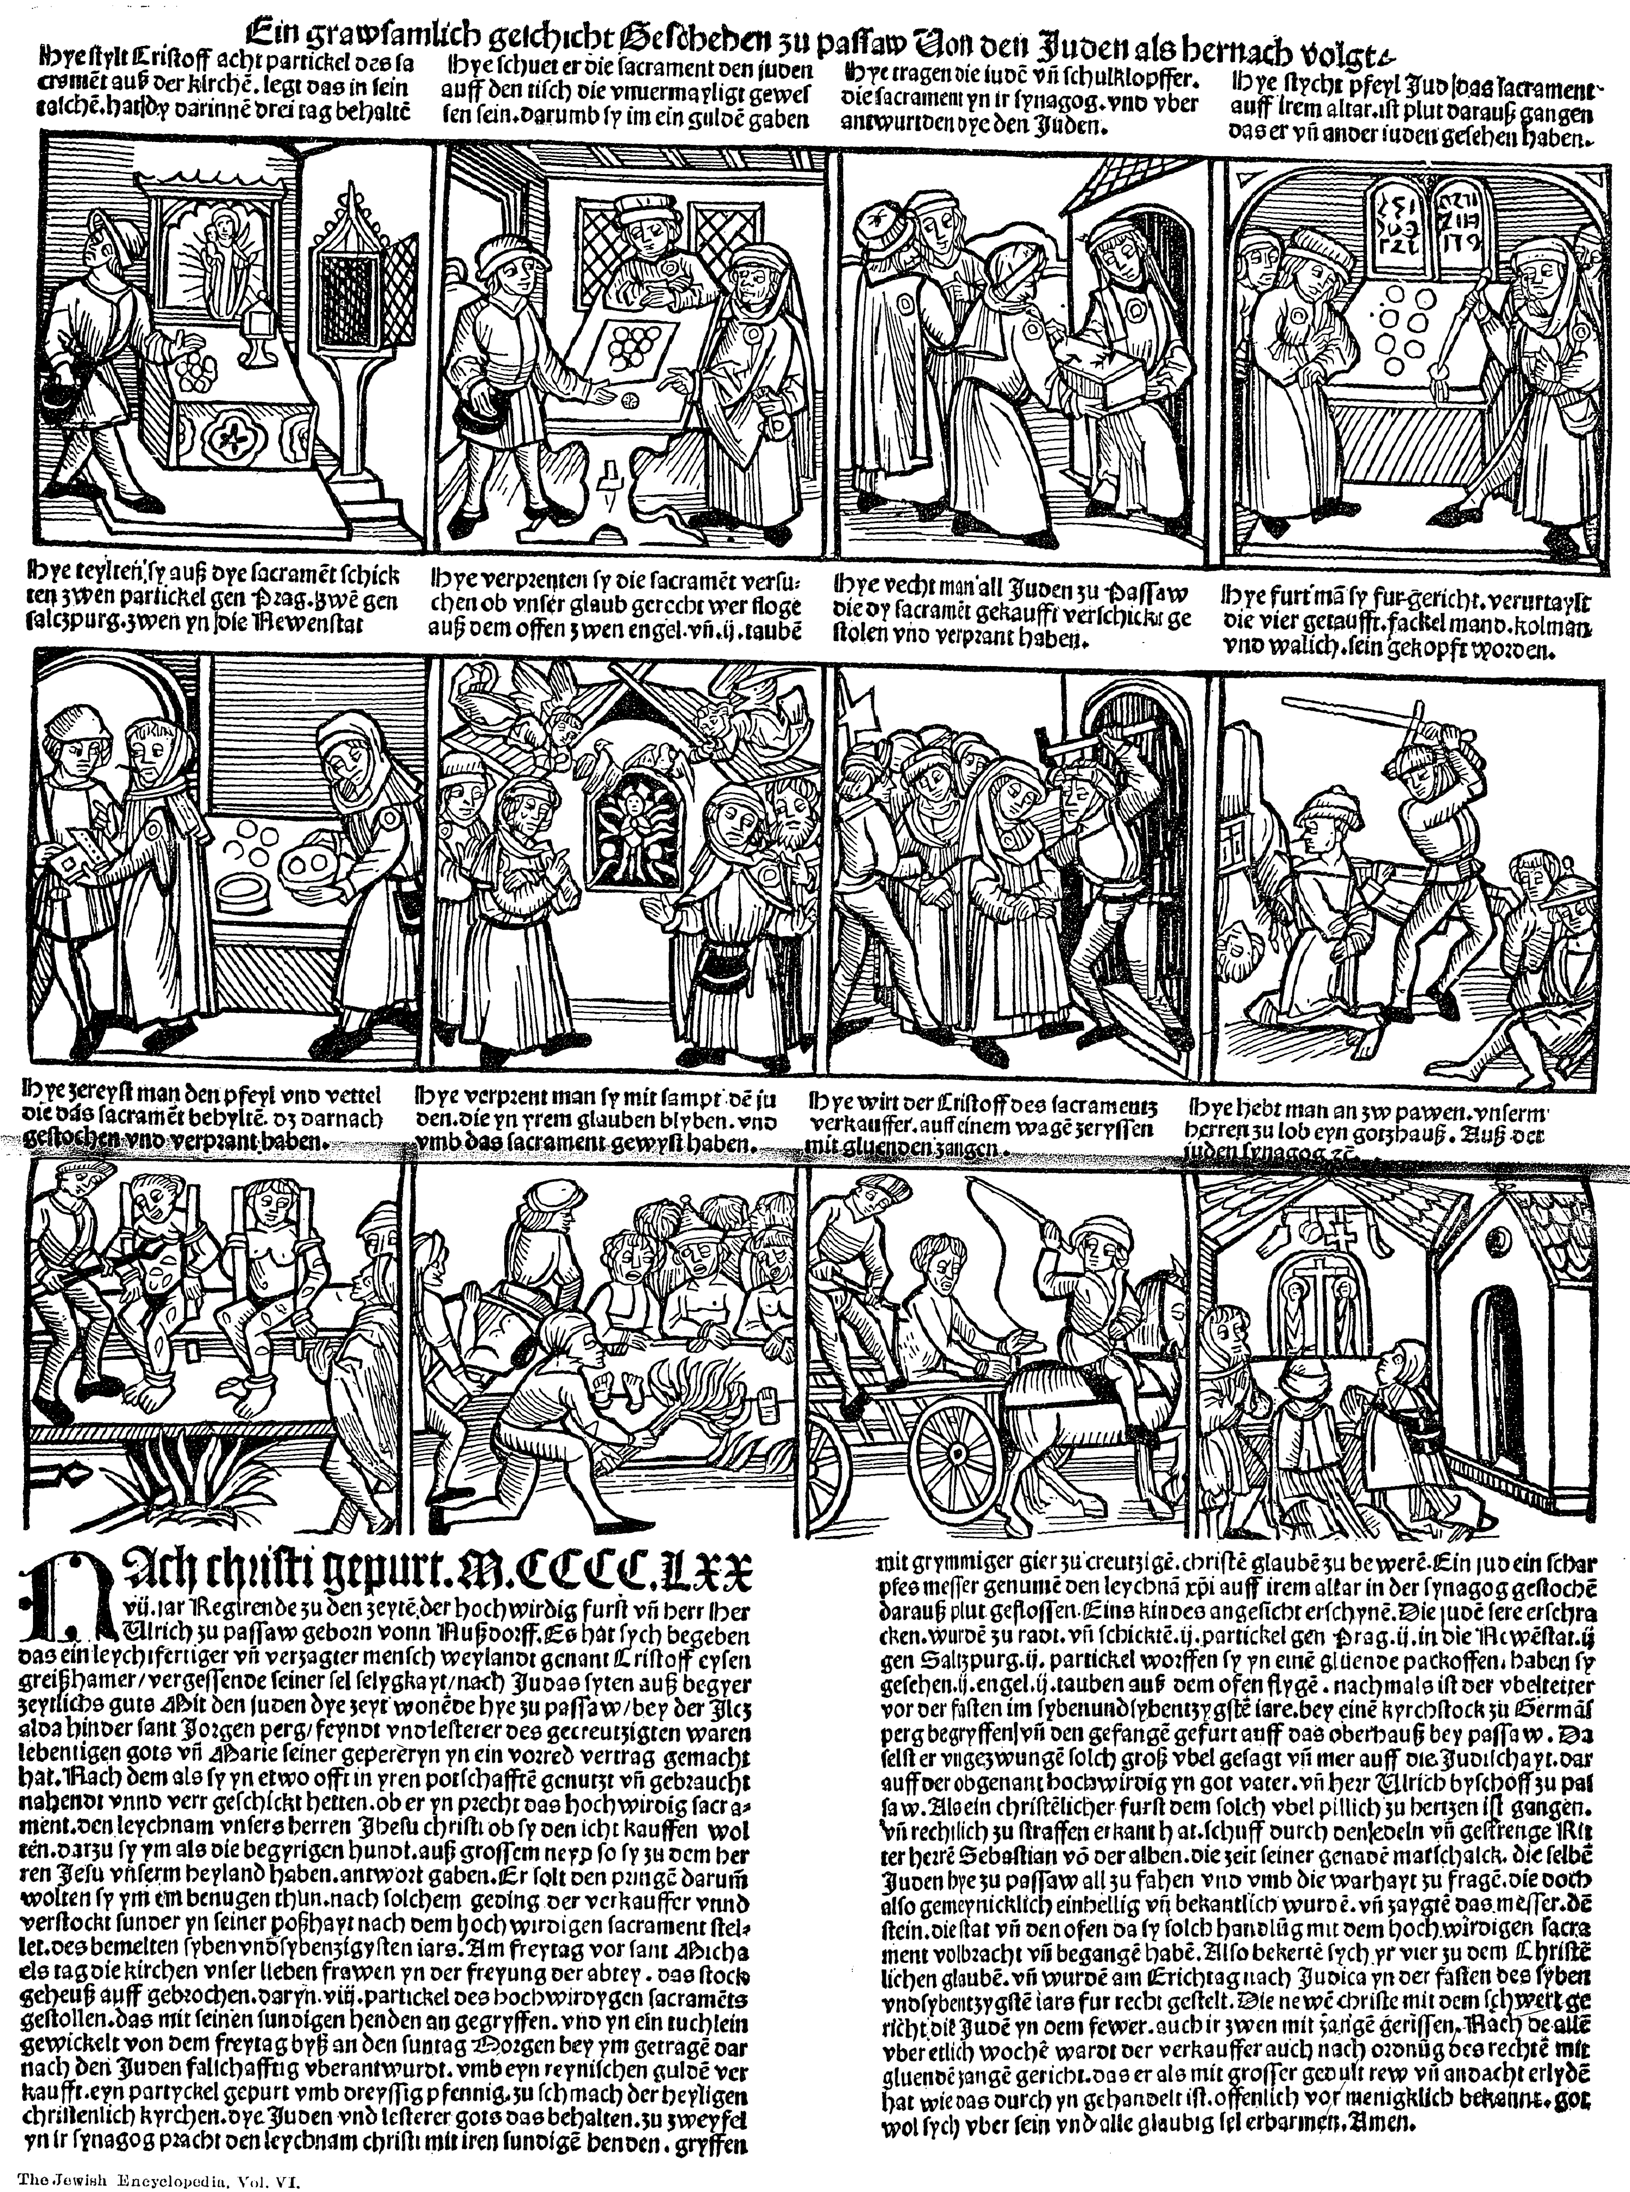
Jews of Sternberg Represented as Transfixing Hosts.
(From a woodcut issued by M. Brandis, Lübeck, 1492.)

First Accusations.

The accusation of the desecration of the host arose after Pope Innocent III. had recognized (1215) the doctrine of transubstantiation, which resulted in the public and general worship of the consecrated host. Hence the first authentic accusation does not occur before the middle of the thirteenth century. This was made in 1243 at Belitz, near Berlin, and in consequence of it all the Jews of Belitz were burned on the spot subsequently called "Judenberg." Similar accusations, resulting in more or less extensive persecutions of the Jews, were brought forward in 1290, at Paris; 1294, at Laa, in Austria; 1298, at Röttingen, near Würzburg, and at Korneuburg, near Vienna; 1299, at Ratisbon; 1306, at Saint-Pölten; 1325, at Cracow; 1330, at Güstrow; 1337, at Deggendorf; 1338, at Pulka; 1370, at Enghien (see Brussels); 1388, at Prague; 1399, at Posen; 1401, at Glogau; 1410, at Segovia; 1420, at Ems; 1453, at Breslau; 1478, at Passau; 1492, at Sternberg, in Mecklenburg-Schwerin; 1510, at Berlin; 1514, at Mittelberg, in Alsace; 1558, at Sochaczew, in Poland. The last Jew burned for stealing a host died in 1631, according to Basnage, quoting from Manasseh b. Israel. Casimir IV. of Poland (1447), Martin Luther (1523), and Sigismund August of Poland (1558) were among those who repudiated the accusation, the repetition of which gradually ceased after the Reformation. The accusation of desecration of the host was based on the hypothesis that the Jews, like the Christians, identify the host with the true body of Jesus; that by crucifying the host they imagine they are crucifying Jesus anew; and that they use the blood supposed to have flowed from the host in order to get rid of the "fœtor Judaicus," or to color their cheeks to give them a fresh and rosy appearance. In a lecture delivered before the Royal Prussian Academy of Sciences in 1848 Ehrenberg explained the phenomenon of the bloody host, which had caused such excitement in the Middle Ages. He showed that red microscopical infusoria, exactly resembling blood, and which he called "pur purmonade" (*Monas prodigiosa*, later termed *Micrococcus prodigiosus* by Cohn), settle on bread and other food, especially on wafers, kept in the dark for any length of time. He furthermore showed that this growth had been observed in former times, and a superstitious interpretation given to it. See Micrococcus Prodigiosus.

Host-Tragedies and Jubilees.

"Host-tragedies," or miracle-plays, were occasionally given in memory of these desecrations. The story of the desecration at Deggendorf in 1337 was represented as late as 1800 at Regen. A host-tragedy was produced at Constance in 1334. Centenaries or jubilees were held in commemoration of such events, as, for instance, the quadricentennial jubilee in 1799 in commemoration of the desecration of the host in Posen. As late as 1820 a great jubilee was celebrated at Brabant in commemoration of the desecration of the host at Enghien in 1370. This festival lasted eight days, during which sixteen hosts studded with diamonds were borne in solemn procession through the streets. Fifty years later (1870), while a committee and the clergy of Brussels were making preparations for this ancient festival, an article appeared in the "Revue Belgique," entitled "Le Jubilé d'un Faux Miracle,"



Ein grawſamlich geſchicht Geſchehen zu paſſaw Von den Juden als hernach volgt.

Hye ſtylt Criſtoff acht partickel des ſacramēt auß der kirchē. legt das in ſein taſchē. hat ſy darinnē drei tag behaltē

Amen.

HOST DESECRATION AT PASSAU, 1477.
(From a contemporary wood-cut.)

etc., which proved by the original sources that, although three Jews had been burned in 1370 on the charge of having stolen a host, "pro sacramentis punice et furtive captis," the original document had been changed sixty-five years later to read "pro sacramento puncto et furtive accepto," in order to fabricate an accusation of desecration of the host. Other falsifications being discovered in the document, Pope Pius IX. felt obliged to stop the festival. In the Church of Sainte-Gudule, Brussels, are several Gobelin tapestries containing representations of the supposed desecration of the host in 1370. See Brussels.

J.

HOST OF HEAVEN (צבא השמים): Term occurring several times in the Bible, but not always with a definite meaning. The word "ẓaba" usually designates an army, and thus connotes a vast body of organized and officered men; it conveys, however, also the meaning of a numerous throng actually engaged in warfare. The singular "ẓaba" has a different meaning from the plural as used in the expression "Yhwh of hosts," a frequent though comparatively late name for the God of Israel. In this expression it is most likely that the reference is to the armies of Israel, at whose head Yhwh is marching to battle. All the more probable is it that the phrase "host of heaven" originally covered the idea of stars arrayed in battle-line (comp. Judges v. 20), with a mythological background, perhaps going back to remote Assyro-Babylonian conceptions (see Zimmern in Schrader, "K. A. T." 3d ed., p. 421).

The "host of heaven" is mentioned as the recipient of idolatrous veneration (Deut. iv. 19, xvii. 3; II Kings xvii. 16, xxi. 3, 5; xxiii. 4; Jer. viii. 2, xix. 13; Zeph. i. 5). The express mention of sun, moon, and stars as forming the "host of heaven" in this connection leaves no doubt that astral bodies and their cult are referred to. Sidereal worship was practised among the Canaanites, as many old names of cities (*e.g.*, Jericho = "moon city") indicate, and the astral character of the Assyro-Babylonian religion is well authenticated. The cult of the "host of heaven" was in favor among the Hebrews, but whether in imitation of the customs of their neighbors or as expressing their own original polytheistic religion (as suggested by Hommel) remains a matter for conjecture. Certain kings are mentioned as especially devoted to this form of idolatry (*e.g.*, Manasseh and Ahaz; II Kings xxiii. 3, 5, 12). It is an open question whether מלכת השמים (Jer. vii. 18, xliv. 17-19, 25) should be read "queen of heaven" or "kingdom of heaven." If the latter reading be accepted, "host of heaven" is synonymous; and even if the pointing indicating "queen of heaven" is preferred, the phrase throws light on the connotations of the other phrase (Stade's "Zeitschrift," vi. 123 *et seq.*, 289 *et seq.*; Schrader, "Sitzungsberichte der Berliner Akademie," 1886, pp. 477-491; "Zeit. für Assyr." iii. 353-364, iv. 74-76).

Connected with this meaning as the gathering or muster of the stars, to which, singly or collectively, divine honors are paid, is the implication of the phrase in other passages, in which it has been held to designate "angels" (I Kings xxii. 19; II Chron. xviii. 18). The great stars (= gods; *e.g.*, Ishtar) "muster" their retinue of smaller stars, who attend them. This passes over naturally into the phraseology of the purer and later Yhwh religion. Yhwh is attended by his "host," and the originally polytheistic term is retained in poetic expression (Ps. ciii. 21, cxlviii. 2). The original star-deities having been looked upon as warriors marshaling their forces for the fray (even Yhwh is a "man of war"), the implications of an orderly army under command of a chief are naturally involved in the phrase "host of heaven" (comp. Josh. v. 14; Dan. viii. 10). In Isa. xxiv. 21 (Hebr.) "host of the height" is used, the term conveying the same idea as "host of heaven"; the context shows that this variant, too, is rooted in some mythological conception, perhaps apocalyptically employed, as is the case also in Isa. xxxiv. 4.

The "host of the stars" (gods) is in the later religion conceived of as the assembly of angels.

HOSTS, LORD OF. See NAMES OF GOD.

HOTTINGER, JOHANN HEINRICH: Swiss Christian Hebraist; born at Zurich March 10, 1620; drowned in the Limmat, in Switzerland, June 5, 1667. Having studied Oriental languages and theology at Geneva, Groningen, and Leyden, Hottinger was in 1642 appointed professor of Church history at the University of Zurich. Six years later he was called to the chair of Oriental languages; in 1653, to that of rhetoric and logic. In 1655 he went to Heidelberg as professor of Old Testament exegesis and Oriental languages; in 1661 he returned to Zurich, and the next year was appointed rector of Zurich University. Hottinger published many works on theology and philology, of which the most important to the Hebrew student are: "Exercitationes anti-Morinianæ de Pentateucho Samaritano," Zurich, 1644; "Rabbi J. Abarbanel Commentarium Super Danielem Prophetam," *ib.* 1647; "Erotematum Linguæ Sanctæ Libri Duo," *ib.* 1647; "Thesaurus Philologicus seu Clavis Scripturæ," *ib.* 1649; "De Heptaplis Parisiensis ex Pentateucho Instituta," *ib.* 1649; "Promptuarium sive Bibliotheca Orientalis," Heidelberg, 1658; "Grammatica Quatuor Linguarum [Hebrew, Chaldean, Syriac, and Arabic] Harmonica," *ib.* 1658; "Compendium Theologiæ Judaicæ," in his "Enneas Dissertationum," *ib.* 1662; "Lexicon Harmonicum Heptaglotton," Frankfort-on-the-Main, 1661; "Grammatica Linguæ Sanctæ," Zurich, 1666; "Libri Jobi post Textum Hebræum et Versionem Verbalem Latinam Analysis," etc., *ib.* 1689.

T. M. SEL.

HOUBIGANT, CHARLES FRANÇOIS: French Christian Hebraist; born in Paris in 1686; died there Oct. 31, 1783. In 1704 Houbigant entered the order of the Congregation of the Oratory. The pupil of Maclef, he was imbued with his teacher's anti-Masoretic prejudices. After lecturing at Jeuilly, Marseilles, and Soissons, he went to Paris in 1722, and lectured at St. Magloire until, at an advanced age, total deafness compelled him to retire. His "Racines de la Langue Hébraïque" is of the nature of a Hebrew dictionary (Paris, 1732), in the preface to which, defending Maclef's system, he endeavors to show the uselessness of vowel-points in Hebrew. In his "Prolegomena in Scripturam Sacram" (*ib.* 1746) he maintains that the original text of the Old Testament has undergone many alterations in consequence of the carelessness of the copyists, and gives rules by which these faults may be discovered and corrected.

Houbigant also wrote: "Psalmi Hebraici" (Leyden, 1748), the Psalms corrected in accordance with the principles of his "Prolegomena"; "Biblia Hebraica cum Notis Criticis et Versione Latina" (Paris, 1753). This latter is his most important work, and shows his entire disregard of the Masorah. The text is printed without vowel-points, and his corrections, in which he takes no account of the "keri" and "ketib," are made mostly from the Samaritan Pentateuch, to which Houbigant, like Morin, attached great importance. These corrections, as well as his "Prolegomena," arrayed against him such well-known scholars as Rave, Kalle, Stridsberg, and Michaelis, who accused Houbigant of ignorance of Hebrew and of arbitrary alterations. The critical notes of the "Biblia Hebraica," and the "Prolegomena" have been published separately under the title "Notæ Criticæ in Universos Veteris Testamenti Libros" (Frankfort-on-the-Main, 1777).

J. M. SEL.

HOURWICH, ISAAC AARONOVICH: American statistician; born at Wilna, Russia, April 27, 1860; educated at the gymnasium of Minsk and the University of St. Petersburg. As a student, he became interested in the nihilistic propaganda. Arrested in 1879 on the charges of hostility to the government and of aiding to establish a secret press, he was expelled, without trial, from St. Petersburg; after the assassination of Alexander II. (1881) he was banished, again without trial, to Siberia, as a "dangerous character." Released after four years of exile, he entered the Demidov lyceum of jurisprudence at Yaroslav, graduated in 1887, and began the practise of law. To escape a second term of exile in Siberia he left Russia in 1890, and settled in the United States. He became a student at Columbia University, New York city, and graduated in 1893 (Ph.D.), when he became a lecturer on statistics at the University of Chicago. Returning to New York city, he practised law until 1900, when he entered the service of the United States government as statistician.

In addition to various essays contributed to Yiddish and other publications, Hourwich has written: "The Persecutions of the Jews," in "The Forum," Aug., 1901; "Russian Dissenters," in "The Arena," May, 1903; "Religious Sects in Russia," in "The International Quarterly," Oct., 1903.

H. R. F. T. H.

HOURWITZ, ZALKIND: Polish scholar; born at Lublin, Poland, about 1740; died at Paris in 1812. Endowed with great ability and thirsting for learning, he left his native country when a youth, lived for a time in Berlin (where he associated with Moses Mendelssohn), Nancy, Metz, and Strasburg, and finally settled in Paris. He did not know French, and his only means of obtaining a livelihood was by peddling old clothes. In time, however, his condition improved, and when (1789) the post of secretary and interpreter of Oriental languages in the Bibliothèque Royale fell vacant he applied for it. With his application he forwarded his "Apologie des Juifs," which had been crowned in the previous year by the Academy of Metz. This work so pleased the minister that, notwithstanding the distinction of some of the numerous candidates, Hourwitz received the appointment. In the same year the "Apologie des Juifs" was published and attracted much attention. Mirabeau quoted it in his writings, and Clermont-Tonnerre, the advocate of Jewish emancipation, said of it: "Le Juif Polonais seul avait parlé en philosophe." Hourwitz enthusiastically embraced the cause of the Revolution, and became one of the most zealous contributors to the revolutionary papers. With force and wit he attacked all forms of oppression, but was especially active in advocating the emancipation of the French Jews.

Toward the end of the eighteenth century Hourwitz, no longer secretary and interpreter at the Bibliothèque, earned his livelihood by teaching foreign languages, and at the close of his life he was in very straitened circumstances. This, with his carelessness in regard to his personal appearance, kept Hourwitz from taking a seat in the Sanhedrin. He was, however, frequently consulted by the commission which prepared the decisions of that assembly. Besides the work mentioned above, Hourwitz wrote: "Projet d'une Nouvelle Carte de Paris," published by the "Journal de Paris" (1799); "Polygraphie sur l'Art de Correspondre à l'Aide d'un Dictionnaire dans Toutes les Langues, Même dans Celles Dont on ne Possède pas Seulement les Lettres Alphabétiques" (Paris, 1801); "Origine des Langues" (*ib.* 1808); "Lacographie ou Entretiens Laconiques Aussi Vite que l'On Peut Parler" (*ib.* 1811).

S. I. Br.

HOUSE: In the warm countries of the East the house is not so important a factor as it is in Western civilization, the climate permitting the Palestinian to live almost entirely in the open air. Artisans do not ply their trades in the house, but directly in the street, or in an open shop looking onto the street. The Palestinian, therefore, requires few domestic conveniences beyond a sheltered place for sleeping and a quiet place for eating. The style of the house is influenced by the material. Since historic times Palestine has had no large forests, and hence no timber for building. Solomon had to import the beams for his edifices (I Kings v. 20 [A. V. 6]), and builders usually had to be very economical with wood. In the plains they generally used bricks of clay, baked in the sun (comp. "bet ḥomer," Job iv. 19, xiii. 12, *et al.*). In the mountains limestone furnished a good material, being easily quarried and worked.

Caves as Houses.

As these conditions have always obtained, it may be assumed that the house of the ancient Israelite did not differ materially from that of the present inhabitant of the country; indeed, it could hardly have been much more primitive. The present village of Siloam illustrates the way in which the Palestinian houses were modeled on, and developed from, the cave. First, the natural cave was enlarged; then a cave was hewn in the rock; and finally a wall was built in front, converting the cave into a sheltered dwelling. Houses of all these kinds are found in Siloam; some are merely enlarged caves; others have at least a firmly built front wall: and others again are merely built against the rock.

Clay Houses.

The ancient houses, with the exception of the palaces of the great, consisted of only one apartment. In the plains four simple brick walls constituted a house. The walls were often smeared with clay (Lev. xiv. 41 *et seq.*). The Hebrews began to use lime also at an early date (Amos ii. 1; Isa. xxxiii. 12), and the walls of the better class of houses were plastered (Ezek. xiii. 10 *et seq.*; Deut. xxvii. 4). The roof was constructed of a few untrimmed logs, branches, and brushwood; a layer of earth was pounded into this framework, and the whole covered with a coating of clay and straw. A roof of this kind keeps off the rain, provided it is repaired and rolled before the rainy season begins. But a house of clay frequently gets so soaked with rain that it falls in, and it is not surprising that villages so built should disappear entirely soon after being abandoned.

Stone Houses.

The stone houses in the mountains are more solid structures. The smaller houses are built of unhewn stones, the more pretentious ones of correspondingly larger stones, with vaulted roofs. It is an open question how the Hebrews of ancient times succeeded in building vaulted domes over square edifices. Ancient ruins indicate that they knew how to meet the difficulty without resort to the dome proper: if the space was too large to be covered by slabs of stone extending from wall to wall, stone beams were laid across the corners, and the process then repeated over the corners formed by each successive series of beams, until the space was narrowed to the desired extent. These vaulted roofs were covered with clay on the outside; only enough space for walking was left round the dome. Frequently, however, the entire space around the dome was filled in so as to convert the whole roof into a flat surface.

The level roof was a favorite resort in the cool of the evening (II Sam. xi. 2), and was much used as a sleeping-place in the summer (I Sam. ix. 25), as it is to-day; small huts of branches were built on the roof as a protection against the sun (II Sam. xvi. 22; Neh. viii. 16). A person on the roof could see what was going on in the street or in the neighborhood without being seen himself (I Sam. ix. 25): and a flight of steps led directly to the roof from the street or the court. Ancient law required the roof to be surrounded with a battlement (Deut. xxii. 8): yet a person could easily step from one roof to the next, and walk the length of whole streets in that way (comp. Mark xiii. 15; Josephus, "Ant." xiii. 140, ed. Niese). Among the peasants the single apartment of the house served for both man and beast, the clay flooring of the part reserved for the former being slightly raised. There being no chimney, the smoke escaped through the windows (Hosea xiii. 3, A. V. "chimney"), which were covered with wooden lattices (Judges v. 28; I Kings vi. 4; Prov. vii. 6). The opening for the door was very low (Prov. xvii. 19). The Furniture of the ordinary house was as simple as it is to-day. It included a few mats, spread upon the floor at night for sleeping, and rolled up during the day, or a kind of divan set against the wall; there were a table and chairs; a large jug for grain stood in the corner, and others for water, wine, oil, etc.; a niche in the wall held the lamp.

Upper Apartment.

This ordinary house, however, frequently had an upper apartment ("'aliyyah") on the roof, either the hut of branches referred to above (Judges iii. 20), or a more substantial room, where guests of honor were lodged for the night (I Kings xvii. 19; II Kings iv. 10). The "palace" of the rich differed from this only in having a larger number of rooms, arranged in a suite on the ground floor rather than in stories. Special rooms for the summer and the winter are mentioned (Amos iii. 15; Jer. xxxvi. 22). The increasing luxury in the time of the later kings is exemplified in the building of palatial houses with many rooms (Jer. xxii. 14), and especially in the richness of the materials. Hewn stone was used instead of brick (Amos v. 11); in post-exilic times marble also (I Chron. xxix. 2; Cant. v. 15; Josephus, "Ant." xv. 392, ed. Niese; "B. J." v. 4, § 4). The walls were painted or paneled (Jer. xxii. 14); olive- or cedar-wood was used for doors and windows (*ib.*); the floor was paved, or covered with wood (I Kings vi. 15; II Kings xvi. 17); the woodwork of the walls and the jambs of doors and windows were inlaid with ivory (Amos iii. 15; I Kings xxii. 39), covered with beaten gold (I Kings vi. 20), or ornamented with carving (I Kings vi. 18). But the style of building remained, and still remains, unchanged. The Greco-Roman style, with which the Jews became acquainted in the Hellenic period, did not exert any great or lasting influence on the domestic architecture of Palestine, being confined to the larger edifices—palaces, baths, and theaters.

HOUSEBREAKING. See BURGLARY.

HOUSEMAN, JULIUS: American financier; born at Zeckendorf, Bavaria, Dec. 8, 1832; died at Grand Rapids, Mich., Feb. 8, 1892. He attended school up to the age of fifteen, and after two years' commercial study he sailed for America. After working as a mercantile clerk in Cincinnati, Ohio, and in other cities, he went (1852) to Grand Rapids, where he became proprietor of a clothing establishment, subsequently opening branch houses in other cities of America. He afterward turned his attention to the lumber trade, and soon owned a large portion of the city. He became connected with several companies, was vice-president of the City National Bank, and a stockholder in many other concerns. He was elected mayor of Grand Rapids in 1872 and reelected in 1874, and from 1871 to 1872 he sat in the state legislature. He was member of the Forty-eighth Congress, representing the Fifth Michigan District. Houseman was interested in all matters relating to the local Jewish community.

A.

HOUSTON: Capital of Harris county, Texas; situated on the banks of Buffalo Bayou. It had a population in 1897 of 45,000, of whom about 1,200 were Jews. It has the oldest Jewish congregation in the state, the Congregation Beth Israel having been organized in 1854, while the cemetery is ten years older. Attracted doubtless by its commercial possibilities, Jews were among its earliest settlers. Eugene Joseph Chimene went there from New York as early as 1835, just before the city was chosen as the capital of the state. He fought at San Jacinto, while Henry Wiener, another early settler, fought at Buena Vista. In 1847 Jacob de Cordova represented Harris county in the state house of representatives. The first settlers were mostly of German or Alsatian origin, but during the last years of the nineteenth century many Russian and Polish emigrants settled in Houston. In 1887 these seceded from the Beth Israel (Reform) congregation and founded the Orthodox congregation Adath Yeshurun. The existing synagogue of the Reform congregation was dedicated in 1870, and by 1903 had become inadequate to accommodate its membership.

There are three Jewish benevolent societies—the Ladies' Hebrew Benevolent Society, founded in 1875; the Bikor Cholim Society, organized by the Orthodox Jews in 1895; and the Beth Israel Benevolent Society, organized in 1903. There are also a Ladies' Relief Society and two B'nai B'rith lodges (Lone Star Lodge No. 210, and Houston Lodge No. 434), while the order B'rith Abraham is represented by Anshel Hirsch Lodge No. 200. The social and literary life of the community is represented by the Concordia Club, the Young Men's Hebrew Society, and the Beth Israel Literary Society. The following rabbis of Houston may be mentioned: Samuel Raphael, Z. Emmich, E. Steiner, Kaiser, Meyer, Jacob Voorsanger, W. Wilner, Max Heller, S. Rosenstein, G. Löwenstein, A. Lazarus, and H. Barnstein (the present [1903] incumbent).

HRADISCH, UNGARISCH. See UNGARISCH HRADISCH.

HÜBSCH, ADOLPH: American preacher; born at Liptó-Szent-Miklós, Hungary, Sept. 18, 1830; died in New York city Oct. 10, 1884. Hübsch was descended from the Jaffe family. At the age of ten he was sent to Budapest, where he attended the evangelical gymnasium, studying Hebrew at the same time. In 1845, before he had graduated, he accepted a position at the Jewish school of Alt-Ofen. He was concerned in the Hungarian Revolution of 1848, in which he fought as a "Honvéd" officer; at the defeat at Világos he barely escaped with his life. After the collapse of the revolution he attended the Talmudic school of R. Julius Ungar at Paks, where he studied until 1854; his rabbinical diploma was signed by Ungar and R. Löw Schwab of Pest. Soon after graduation he was called to the Orthodox community of Miawa. In 1857 he went to the University of Prague, and, after receiving the degree of Ph.D. in 1861, accepted the rabbinate of the Neu-Synagoge of Prague.

In 1866 he went to America, and became rabbi and preacher of the Congregation Ahawath Chesed, New York city, then composed almost entirely of Bohemian Jews; under him it became one of the leading Jewish congregations of New York. He introduced a moderate Reform ritual, and the prayer-book which he compiled for his own congregation was adopted by many others. In connection with the synagogue he established a religious school, attended by more than 400 boys and girls, and a Young Men's Union for the study of Jewish literature. Hübsch was specially noted as a preacher. While at Prague he issued his chief work, "Die Fünf Megilloth Nebst dem Syrischen Targum . . . in Hebräischer Quadratschrift, mit einem Kommentare zum Texte aus einem Handschriftlichen Pentateuch Codex der K. K. Universitäts Bibliothek zu Prag und einem Kommentare zum Thargum," etc. (Prague, 1866), and contributed numerous philological and critical articles to Leopold Löw's "Ben Chananja" and to the "Monatsschrift." After going to America his literary activity was confined chiefly to a number of discourses published in various periodicals. His "Gems from the Orient" is a collection of Arabic aphorisms or sayings (1885). A memorial volume, published by his widow, contains translations, extracts from his sermons, and many of his poems.

A. M. W.

HUESCA (anciently **Osca** and **Wescah**; hence the Hebrew **אושקה**): City in Aragon. Toward the end of the thirteenth century it contained a specially privileged Jewish community of 160; it also had a rabbinical college of its own (Solomon ben Adret, Responsa, Nos. 300, 1179). The congregation, which had imposed a special tax upon bread, meat, and wine consumed by its members, was obliged, by the indigence of the people, to remit part of such tax in 1257. During the wars of King Alfonso III. of Aragon with Sicily and France it raised such considerable subsidies that in 1288 the king remitted part of the taxes. The Shepherd persecutions threatened the Huesca congregation; in 1391 it was attacked, and many members were baptized. By 1437 the congregation had declined to such an extent that it paid only 300 sueldos in taxes.

The congregation had a regulated communal system; its statutes were enacted and its administrators and syndics (12) appointed with the approval of the king. At the disputation in Tortosa it was represented by Don Todros Alconstantini. Huesca was a seat of Jewish scholarship; here lived, in the thirteenth century, Jacob b. Moses Abbasi and Joseph b. Isaac Alfual, translators of portions of Maimonides' commentary, and contemporaries of Isaac b. Sheshet, Ḥayyim Galipapa, Joseph b. Ḥayyim b. Ardot, Abraham and Ḥayyim b. Solomon ibn Baka, Joseph Cohen, Baruch and Isaac Alitensi, Abraham Bibago, etc. Petrus Alfonsi was baptized at Huesca July 29, 1106. The Usque family, which lived in Italy, probably came from Huesca, which was also the birthplace of the Almosnino family; Abraham Almosnino of Huesca was burned at the stake on Dec. 10, 1489. The Jews of Huesca were engaged in weaving; one of the most important woolen factories at the time of the expulsion was Don Solomon Abenaqua's. The total population in 1887 was 13,041.

G. M. K.

HUETE (formerly **GUETE**): Spanish city, in the bishopric of Cuenca. A considerable Jewish community lived there in the thirteenth century. The city is especially known because of the "Padron de Huete," the apportioning, in 1290, of the taxes which the Jews of Castile were required to pay to the king, or to the prelates, magnates, cathedral chapters, grand masters, etc. In 1391 many of the Jews of Huete were killed or forced to accept baptism. Joseph ha-Kohen says that his grandparents, who were expelled from Cuenca in 1414, found protection and shelter at Huete, his birthplace. The aljama of this city paid taxes to the amount of 5,700 maravedis as late as 1474.

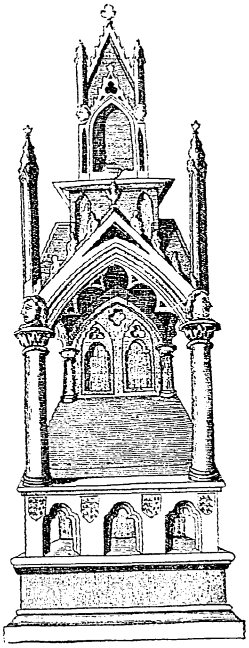
G. M. K.

HUGH OF LINCOLN: Alleged victim of ritual murder by the Jews of Lincoln in 1255. He appears to have been the illegitimate son of a woman named "Beatrice," and was born in 1247. He disappeared July 31, 1255, and his body was discovered on Aug. 29 following in a well belonging to the house of a Jew named "Jopin" or "Joscefin." On promise of having his life spared, Jopin was induced by John of Lexington, a priest who was present at the time of the discovery, to confess that the child had been crucified by a number of the most prominent Jews of England, who had gone to Lincoln on the pretext of a wedding. The remains of the lad were taken to the cathedral and were buried there in great pomp. Henry III., on arriving at Lincoln about a month afterward, revoked the pardon of Jopin, and caused him to be dragged around the city tied to the tail of a wild horse, and then hanged. The remaining Jews of Lincoln, including some who were there as visitors—probably to attend the marriage of Bellaset, daughter of Berechiah de Nicole—were carried, to the number of ninety-two, to London, where eighteen of them were executed for refusing to plead. Berechiah was released, and the remainder lingered in prison until Richard, Earl of Cornwall, who was in possession of the Jewry at the time, made terms for them.



Tomb of St. Hugh in Lincoln Cathedral.
(From Tovey, "Anglia Judaica," 1738.)

The accusation, as usual, rested upon no particle of evidence; all that was known was that the lad had been found dead; and even if it was a murder, it could not have been connected with any ritual observance on the part of any Jew. But the prepossessions of the time, and the "confession" forced from Jopin caused the case to be prejudged, and enabled Henry III. to confiscate the property of the executed Jews, and to obtain, probably, a ransom for those afterward released from captivity. The case made a great impression on the popular mind, and forms the theme of various French, Scottish, and English ballads, still existing; Chaucer refers to it at the beginning of his "Prioress' Tale." A shrine was erected over Hugh's tomb in Lincoln Cathedral; it was known as the shrine of "Little St. Hugh" to distinguish it from the shrine of Great St. Hugh of Lincoln, the twelfth-century bishop whose death was mourned equally by Jew and Christian. See Blood Accusation.

J.

HUKKOK (חקק = "engraved"): Place on the borders of Naphtali, near Aznot Tabor (Josh. xix. 34). As the frontier line coincided with the western limit of Asher (*l.c.*), it is probable that this place is identical with the Hukok that fell to the lot of Asher (I Chron. vi. 60), though the latter is written חוקק. Estori Farḥi ("Kaftor wa-Feraḥ," xviii.), followed by such scholars as Schwarz and Robinson, identifies Hukkok with the modern Yaḳuḳ, a village 6 miles southwest of Safed and 12 miles north of Mount Tabor, where tradition places the grave of Habakkuk. Estori saw at Yaḳuḳ a Jewish synagogue; he says that the place must not be confounded with the Hukok of Asher.

HULDAH (חלדה).—**Biblical Data:** Prophetess; wife of Shallum, the keeper of the wardrobe in the time of King Josiah. She dwelt in the second quarter of Jerusalem. It seems that Huldah enjoyed great consideration as a prophetess, for when Hilkiah found the scroll of the Law he, with his four companions, took it to her. On that occasion she prophesied that God would bring evil upon Jerusalem and upon its inhabitants. The king, however, was told that he would die in peace before the evil days came (II Kings xxii. 14-20; II Chron. xxxiv. 22-28).

E. G. H. M. Sel.

——**In Rabbinical Literature:** Huldah and Deborah were the only professed prophetesses, although other pious women had occasional prophetic revelations. Both had unattractive names, "Huldah" signifying "weasel," and "Deborah" signifying "bee" or "wasp." Huldah said to the messengers of King Josiah, "Tell the man that sent you to me," etc. (II Kings xxii. 15), indicating by her unceremonious language that for her Josiah was like any other man. The king addressed her, and not Jeremiah, because he thought that women are more easily stirred to pity than men, and that therefore the prophetess would be more likely than Jeremiah to intercede with God in his behalf (Meg. 14a, b; comp. Seder 'Olam R. xxi.). Huldah was a relative of Jeremiah, both being descendants of Rahab by her marriage with Joshua (Sifre, Num. 78; Meg. 14a, b). While Jeremiah admonished and preached repentance to the men, she did the same to the women (Pesiḳ. R. 26 [ed. Friedmann, p. 129]). Huldah was not only a prophetess, but taught publicly in the school (Targ. to II Kings xxii. 14), according to some teaching especially the oral doctrine. It is doubtful whether "the Gate of Huldah" in the Second Temple (Mid. i. 3) has any connection with the prophetess Huldah; it may have meant "Cat's Gate"; some scholars, however, associate the gate with Huldah's schoolhouse (Rashi to Kings *l.c.*).

HULL: Seaport of Yorkshire, England. It has a population (1901) of over 241,753, including about 2,500 Jews. The earliest trace of Jews there occurs toward the end of the eighteenth century, when they acquired for a synagogue a Catholic chapel in Posterngate which had been wrecked in 1780 during the Gordon riots. Dissensions in the congregation led to another house of prayer being secured near the present Prince's Dock, but the two congregations reunited in a synagogue in Robinson row, built in 1826; this remained the chief Jewish house of worship until Sept., 1903, when the congregation removed to a new synagogue situated in Osborne street. When the Russian immigration set in, one of the frequent routes was from the Continent to Hull and across to Liverpool, and a certain number of the refugees settled in Hull, necessitating the building of a second synagogue (1886) in Waltham street. This soon proving insufficient for the growing community, another synagogue, known as the "Western Synagogue," was built in Linnæus street, in May, 1903. The community has the usual charitable organizations, including a Ladies' Hebrew Benevolent Society, founded as far back as 1861, and a girls' school, founded in 1863.

J.

ḤULLIN (**ḤOLIN**, חולין, plural of חול = "profane," applied to things for ordinary use): Treatise of the Babylonian Talmud, including Mishnah, Tosefta, and Gemara; it is not found in the Jerusalem Talmud. While it is included in the Seder Ḳodashim, it treats mainly of non-consecrated things and of things used as the ordinary food of man, particularly meats; it is therefore sometimes called "Sheḥiṭat Ḥullin" (Slaughtering for Ordinary Use). Its place in the order varies in the several compilations. Its contents may be summed up as follows:

I. As to when, and by whom, an animal must be killed to be ritually fit for food; the instrument with which the killing must be done; the space within which the incision must be made, and the exceeding of which renders the animal "ṭerefah." Incidentally, it discusses the differences between "sheḥiṭah" and "meliḳah" (pinching off the heads of birds brought as sacrifices; see Lev. i. 12, v. 8), and the various degrees in which different vessels are susceptible to uncleanness.

Contents.

II. Concerning the organs that must be severed; in quadrupeds, the trachea and the gullet, or the greater part of each, must be cut through; in fowls, cutting through one of these organs, or the greater part of one, suffices. In both cases the jugular vein must be severed. Rules as to the character of the incision follow. Then comes a series of rules regarding animals killed in honor of foreign deities or of deified natural objects; regarding the localities where the formal killing of an animal might create a suspicion of idolatry; regarding the prohibition against using as ordinary food the flesh of animals killed for sacred purposes (see SHEḤIṬAH).

III. On organically diseased animals and animals injured by accident or by beasts or birds of prey. The Mishnah here enumerates eighteen diseases and injuries that would render an animal ṭerefah, including perforations of the lungs or of the small intestines, and fractures of the spine or of the ribs. It also cites diseases and injuries that do not render the animal ṭerefah, and concludes with an enumeration of the marks by which clean birds and fishes are distinguished from the unclean (see DIETARY LAWS).

IV. On embryos, living or dead, found in a slaughtered female animal; on the Cæsarian section.

V. On the prohibition against killing a female animal and her offspring on the same day (see Lev. xxii. 28). If both animals have been consecrated and killed within the sacred precincts, the animal first killed may be used, but not the second; the killer of the second is subject to "karet" (cutting off, excision). If neither animal has been consecrated and both have been killed beyond the sacred precincts, the flesh of both may be used for food: but the killer of the second is subject to flagellation. To prevent an unwitting violation of this prohibition the cattle-dealer is required to notify the purchaser of the sale of the mother or the offspring for the meat-market. This notice must be given whenever meat is in greater demand than usual, as on the eve of a festival.

VI. On the duty of covering the blood of ritually killed animals of the chase, and of birds (see Lev. xvii. 13), and on the material with which it should be covered. This applies only to the blood of animals which, after being slaughtered, are found to be kasher, and only when the killing has been done on legitimate ground (see § V.).

VII. On the prohibition against eating the sinews of animals (Gen. xxxii. 32), which is always and everywhere in force, and which extends to consecrated and unconsecrated animals, and to the live young found in a slaughtered mother (see § IV.).

VIII. On the prohibition against cooking meat and milk together (see Ex. xxiii. 19); by "meat" is meant any animal flesh except fish and locust. While this is admittedly merely a rabbinical provision, nevertheless meat and milk should not be placed near each other on the dining-table.

IX. On carcasses and reptiles that communicate Levitical uncleanness by contact; particles from different parts of a "nebelah" (piece of carrion) are considered as one piece, and if they are collectively of sufficient bulk they render Levitically unclean any food with which they come in contact. For example, a particle of skin and a particle of bone or sinew, if together equaling an olive in size, render food otherwise clean unclean.

X. On the parts of every ritually killed animal which the layman is required to reserve for the priest (Deut. xviii. 3), and on the rules concerning injured animals that should be presented to the priest or should be redeemed.

XI. On the duty of surrendering to the priest the first-fruit of the sheep-shearing (Deut. xviii. 4); on the differences between this duty and that treated in the preceding chapter; on the number of sheep one must possess before this regulation comes into force, and on the circumstances under which one is exempt.

XII. On the duty of setting free the mother of a nest of birds (Deut. xxii. 6-7). This duty devolves only when the mother is actually in the nest with her young, and when the birds are nesting in the open, where they can easily escape. Unclean birds and "Herodian" birds (= birds produced by mating different species, said to have been practised by Herod) are not included in this provision.

The Tosefta and the Mishnah correspond in the first seven chapters. Ch. viii. Tosefta corresponds to ch. viii. and ix. Mishnah; ch. ix. Tosefta to ch. x. Mishnah; ch. x. Tosefta to ch. xi. and xii. Mishnah. On the other hand, the Tosefta is more prolix than its older sister compilation, and sometimes cites episodes from the lives of great men in connection with the subject-matter. Thus, speaking of the forbidding of meat prepared for idolatrous purposes, it quotes the reports of Eleazar b. Dama's last illness and alleged apostasy (see BEN DAMA; ELIEZER BEN HYRCANUS).

The Gemara.

The Mishnah of Ḥullin is but rarely cited in the Jerusalem Gemara; in fact, only 15 of the 75 mishnayot from the treatise are quoted in the entire Jerusalem Talmud. This is not so in the Babylonian Gemara, which discusses and explains every section of the Mishnah and also much of the Tosefta. It affords a clear insight into the main object of the provisions of this treatise—the prevention of cruelty and pain, and the draining of every drop of blood from the body in order to render the flesh wholesome. A single illustration will suffice to prove the humanitarian motive of this treatise. Samuel Yarḥinai, a rabbi of the third century, great both as a physician and as an exponent of the Law, established this rule: "When the 'ṭabbaḥ' [butcher] is not familiar with the regulations concerning sheḥiṭah, one must not eat anything slaughtered by him"; all the regulations concerning sheḥiṭah, on which Yarḥinai lays much stress, he sums up in the following five mishnaic words: "shehiyyah" (delaying), "derasah" (chopping), "ḥaladah" (sticking the knife in under the veins), "hagramah" (cutting in another than the proper part of the animal), and "'iḳḳur" (tearing; Ḥul. i. 2; ii. 3, 4), against all of which one must guard himself (Ḥul. 9a; see SHEḤIṬAH; comp. Rabbinowicz, "Médecine du Talmud," Introduction).

Haggadot.

As in other treatises, grave halakic discussions are interspersed with instructive and entertaining haggadot. In a statement of the marks by which clean are distinguished from unclean animals, a unicorn is mentioned, and is said to be the gazel of Be-Ilai. The mention of the latter suggests the "lion of Be-Ilai," and thereupon the compiler proceeds to tell an elaborate story of Cæsar (the emperor) and Joshua ben Hananiah (59b *et seq.*).

HÜLSNER. See POLNA AFFAIR.

ḤULTHA or **ḤILTHA** (חולתא, חילתא = "sandy"): One of the seven seas which, according to the Talmudists, surround Palestine (B. B. 74b; Yer. Ket. xii. 3; Kil. ix. 5; Midr. Teh. to Ps. xxiv.). In the enumeration of the seven seas in the Yalḳuṭ to Ps. xxiv., the "Sea of Acre" is substituted for "Ḥultha," thus identifying the latter with the Bay of Acre. It is identified by Lightfoot with Lac Sirbonis, south of Palestine; by Bochart, who reads אילת instead of חולתא, with the Red Sea; by Schwarz, with Lake Phiala.

HUMAN SACRIFICE. See SACRIFICE.

HUMANISTS: Scholars who revived the culture of antiquity and the study of classical literature. The Renaissance, which heightened enthusiasm for the classics, began in Italy in the fifteenth century. From Italy humanism advanced to France, Holland, and other European countries. In the fifteenth and sixteenth centuries it gained great influence in Germany and cleared the way for the Reformation. The most prominent German humanists were Hutten and Reuchlin, both contemporaries of

Luther. Reuchlin called attention to the importance of the study of Hebrew, and gained for it a place in the curricula of the German universities. As a strong defender of Hebrew literature against the attacks of Pfefferkorn and his accomplices, he also vindicated the cause of the Jews and pleaded for the freedom of science and for humanity. Although not all humanists were free from anti-Jewish prejudices, humanism, and through it the Reformation, brought relief to the Jews and mitigated the severity of the exceptional laws under which they had suffered in the Middle Ages.

D. S. Man.

HUMILITY: The quality of being humble.

—**Biblical Data:** Judaism, in its conception of humility as in its conception of many other things, stands between the two extremes of self-deification and self-effacement. Jeremiah, in urging the quality of humility and in denouncing boastfulness, qualifies his statement by saying, "Let not the wise man glorify himself in his wisdom, neither let the strong man glorify himself in his might, let not the rich glorify himself in his riches: but let him that glorifieth himself glorify in this, that he understandeth and knoweth me, that I am God who exercises love, justice, and righteousness" (Jer. ix. 22-23).

The prophet does not consider it sinful for man to rejoice in his achievements so long as he recognizes that all blessings flow from God, that they are all gifts of God. Riches, strength, and wisdom are nothing without God. "The silver is mine, and the gold is mine, saith the Lord" (Hag. ii. 9). God hath no pleasure "in the strength of the horse," nor in "the legs of a man" (Ps. cxlvii. 11 [A. V. 10]). "There is no wisdom nor understanding nor counsel against the Lord" (Prov. xxi. 30). Micah reduced the duties of man to three: justice, love, and humility. Abraham was humble: he spoke of himself as "but dust and ashes" (Gen. xviii. 27). Moses' greatest virtue was humility (Num. xii. 3). That this quality of the greatest prophet is particularly mentioned is sufficient proof of its importance in Jewish theology. But the humility of Moses shows best what this term means. While Moses at first does not wish to accept his great mission to redeem his enslaved people, because he mistrusts his ability to do so, after he has accepted it he is full of courage, energy, and decision. Yet he listens to the advice of Jethro, his father-in-law, and acts on it. When Joshua asked Moses to prohibit Eldad and Medad from prophesying in the camp, Moses answered: "Would God that all the Lord's people were prophets" (*ib.* xi. 29).

Heathendom, with its belief in fate which ordains man's destiny irrespective of merit, did not encourage humility and meekness, but gave rise to man's overbearing and arrogance. Not so Judaism.

> "Except the Lord build the house, they labor in vain that build it" (Ps. cxxvii. 1). "Beware that thou forget not the Lord thy God. . . . And when thy herds and thy flocks multiply, and thy silver and thy gold is multiplied, and all that thou hast is multiplied, then thine heart be lifted up and thou forget the Lord thy God, which brought thee forth out of the land of Egypt, from the house of bondage. . . . And thou say in thine heart, My power and the might of mine hand have gotten me this wealth. But thou shalt remember the Lord thy God: for it is he that giveth thee power to get wealth" (Deut. viii. 10-18).

Isaiah says:

> "Shall the ax boast itself against him that heweth therewith? shall the saw magnify itself against him that shaketh it? as if a rod should shake them that lift it up, or as if a staff should lift up him that is not wood" (Isa. x. 13-15, R. V.).

The same prophet pours out the vials of his righteous indignation against the proud in Israel:

> "Their land also is full of silver and gold, neither is there any end of their treasures. . . . Their land also is full of idols; they worship the work of their own hands. . . . And the mean man is bowed down, and the great man is brought low. . . . Enter into the rock, and hide thee in the dust. . . . The lofty looks of man shall be brought low, and the haughtiness of men shall be bowed down, and the Lord alone shall be exalted in that day. For there shall be a day of the Lord of hosts upon all that is proud and haughty and upon all that is lifted up; and it shall be brought low" (*ib.* ii. 7-12, R. V.).

In the touching penitential psalm ascribed to David after his terrible arraignment by the prophet Nathan on account of his crime against Uriah and his wife Bath-sheba, humility is pointed out as the only true sacrifice acceptable to God: "For thou desirest not sacrifice; else would I give it: thou delightest not in burnt offering. The sacrifices of God are a broken spirit: a broken and a contrite heart, O God, thou wilt not despise" (Ps. li. 18-19). The second Isaiah lays more stress on humility than on grand temples, churches, and mosques. "The heaven is my throne, and the earth is my footstool: Where is the house you can build me? Where is the place for my rest? For all these things has my hand made. But upon such a one will I look, upon the humble and him who is of a contrite spirit" (Isa. lxvi. 1-2).

It may thus be seen that the Jewish conception of humility is based on a proper estimate of the world and of the worth of man. Abraham, Moses, Gideon (who refused a crown), Saul, and David are set up as types of humility and meekness.

——**In Rabbinical Literature:** The Talmud has even a higher view of humility than the Bible, and the teachers of Jewish ethics urge upon man not to rely too much on his own merits, as this might lead to self-conceit or self-deification. Our greatest merits are the result of God's aid. This is expressed in the daily morning prayer:

> "Lord of all worlds, we can not plead the merit of our deeds before Thee. What are we? What is our virtue, what is our righteousness, our power, our strength? Truly, our mighty men are as naught before Thee, and the men of fame as though they had never been: the learned appear void of knowledge, and the wise like men without understanding."

But Judaism is likewise remote from the self-effacement of Buddhism and from the contempt of life preached by Christianity. It does not look upon earth as upon a "valley of tears" nor upon man as upon a worm creeping in the dust.

God is the highest type of humility. Among the ten degrees of moral perfection humility stands highest ('Ab. Zarah 20b; 'Ar. 16b). It is the expression of the highest reverence (Sanh. 43b), and the distinguishing feature of the "disciples of Abraham" (Ab. iii.). The prophet, in order to attain inspiration, must possess humility (Ned. 38a). It belongs next to mercy and charity among the ornaments of the true Jew (Lev. R. ix.). "Even poverty is blessed because it leads to humility" (Cant. R. i.). "He who humbles himself, him will God elevate; he who elevates himself, him will God humiliate. He who runs after greatness, from him greatness will flee; he who flees from greatness, him will greatness follow" ('Er. 13a). "Be not like the upper threshold, which can not be reached by everybody, but be like the undermost, which is accessible to everybody. Even though the building may fall, the lowest threshold remains unharmed" (Ab. R. N. xxvi.; Derek Ereẓ Zuṭa iii.). Hillel said: "Remove from thy place two or three rows of seats and wait until they call thee back" (Lev. R. i.). Do not underrate the bad opinion which the common people may entertain regarding you (B. Ḳ. 93a; Pes. 113b; Sanh. 37). The small should not say to the great, "Wait" (Shab. 127; Pes. 6b; Yoma 37; Suk. 29; 'Er. 55). "Happy is the generation in which the great listen to the small, for then the more anxiously will the small listen to the great" (R. H. 25b; Ta'an. 15a, 18b; Meg. 11a, 13b, 14b, 18b).

The reason why the high priest was not allowed to officiate in his golden garments on the Day of Atonement was to remind him of humility (Yoma vii. 4; Yer. Yoma xii.; Ex. R. xli.; Lev. R. i.). Pride humiliates man (Yalḳ., Sam. 3). The "miẓnefet" (miter) atones for the sin of haughtiness (Zeb. 88b; Ḥul. 5b).

Examples of Humility.

The prayer of man will be effective only when he regards himself as dust (Soṭah v. 48b, 71a, 82a; B. Ḳ. 81b; B. B. 10, 18b, 98a; Sanh. xi. 19b, 81a, 93b). "Jeroboam, the generation of the Flood, and the Sodomites were haughty" (Sanh. 106a, 108a, 109a). "Through humility calumny will cease" ('Ar. 15a). "I am God's creature, so is our fellow man: my sphere of usefulness is in the city; his, in the country. I have no more right to be overbearing on account of my work than he on account of his"—this was the motto of the sages of Jabneh (Ber. 17a). He who walks about haughtily insults the Shekinah (Ber. 43b). Humility is a quality especially appropriate for Israel (Ḥag. 9b; Ned. 20a; Mek., Yitro, xx. 17; Ber. 7a). Plagues come on account of haughtiness ('Ar. 17). The Messiah will not come until haughtiness shall have ceased in Israel (Sanh. 98). The haughty man, even if he be wise, will lose his power of prophecy (Pes. 6b). The haughty pollutes the land and curses God (Mek., Yitro, ix.; Soṭah 4b; Kallah 7). Humility is just as important as wisdom and the fear of God (Derek Ereẓ Rabbah viii., xi.). The habit of the sage is to be humble, modest, and to bear insult (Shab. 88; Derek Ereẓ Zuṭa i.). Do not forget that the fly was created before man (Sanh. 38; Tan., Shemini, 9). "Be not proud on account of thy decisions" (Derek Ereẓ Zuṭa 6; Ab. iv. 7; Sanh. 7; Midr. Teh. cxix.; Soṭah 21; Pes. 50). R. Jonathan ben Amram during a famine insisted on receiving no more consideration in the distribution of bread than any other creature (B. B. 8b). Rabbi Ṭarphon felt sorry all his lifetime because he once saved his life by saying that he was a scholar (Ned. 62a). The ornament of the Torah is wisdom; and the ornament of wisdom is humility (Derek Ereẓ Zuṭa iv.).

God said to Moses, "Because of thy self-denial, the Torah shall be called by thy name" (Shab. 89a). Five men were highly endowed by divine grace, but pride was their downfall: Samson suffered through his strength; Saul, through his stature; Absalom, through his hair; Asa, through his feet; and Zedekiah, through his eyes (Soṭah 10a). Wherever God's omnipotence is found, one finds also his humility—in the Torah, in the Prophets, in the Hagiographa (Meg. 29). Learn humility from Moses (Ab. R. N. ix., xxiii.). The spirit of God rests on the humble, as is seen in Moses (Ned. 35a; Mek., Yitro, ix.). David said: "My heart was not haughty when I was anointed king by Samuel, and when I conquered Goliath" (Yer. Sanh. 11; Ḥul. 88a). Johanan ben Zakkai said: "If thou hast acquired much knowledge of the Torah, do not pride thyself therein" (Ab. ii. 8; Sanh. 93; Ber. 9; Meg. 26). Why were the decisions of the Hillelites accepted? Because they were humble, quiet, and meek ('Er. 13). Saul and Judah acquired the kingdom through their humility (Tosef., Ber. iii.; Sanh. 92b). Be humble toward all people, but particularly toward thy own household (Tanna debe Eliyahu iv.). While God despises what is broken among the animals, he loves in man a broken heart. Man is ashamed to use a broken vessel; but God is near to men whose heart is broken (Lev. R. vii.). "If you minimize your merits, people will minimize your faults" (R. H. 17a). Among three who are participants of special divine love is he who does not insist on the recognition of his virtues (Pes. 113b; Ab. i. 19).

Maxims of Humility.

"Be pliant and flexible like the reed, because scholarship is only with the humble" (Derek Ereẓ Zuṭa viii. 1; Ta'an. 7; 'Ab. Zarah 6). He who humbles himself on account of the Torah will ultimately be elevated through it (Derek Ereẓ Zuṭa v.). Just as water in its course seeks the low lands and not the high ground, so the words of the Torah will be realized only among those who are endowed with a humble spirit (Ta'an. 7, with reference to Isa. lv. 1). The Shekinah will rest upon him that is of a meek spirit (Mek., Yitro). Hillel said: "My humility is my greatness, and my greatness is my humility" (Lev. R. i.). Pharaoh said boldly: "Who is God?" (Ex. v. 2); Nebuchadnezzar, "I shall ascend to the heights of the clouds" (Isa. xiv. 14); and Hiram, "Like a god I dwell in the midst of the ocean" (Ezek. xxviii. 2). But Abraham said, "I am but dust and ashes" (Gen. i. 18, 27); Moses and Aaron, "Who are we to go to Pharaoh?" (Ex. xvi. 16); and David, "I am a worm and no man" (Ps. xxii. 7); therefore God gave to them honor and greatness, and said, "When I made you great and exalted, you made yourselves lowly and humble" (Ḥul. 9). When man sacrifices a burnt offering he receives a reward for his offering; but whosoever offers his humility has merit as if he had offered all the sacrifices of the earth; for "not sacrifices of animals demandest thou, neither hast thou pleasure in burnt offerings. The sacrifices of God are a broken heart" (Ps. li. 18–19; Soṭah 8; Sanh. 63b; Ber. 32b). R. Levitas said: "Be of a humble spirit; for the end of man is the worm" (Ab. iv. 3). Even the eighth part of an eighth portion of haughtiness is an abomination in God's eyes (Soṭah 5). God intentionally selected for the purification of the leprous not only the proud cedar, but also the humble hyssop (Lev. xiv. 4, 6). God ignored the high mountains and selected the smallest, Mount Sinai, for the revelation of the Ten Commandments (Soṭah 8). The humble stand higher than the pious ('Ab. Zarah 2). The spirit of God will not rest on the haughty (Suk. iii. 1; Ḥag. 14b; Shab. 92a; Ned. 38). He only will share in the blessings of future salvation who is humble and continually enriches his store of knowledge without the least self-conceit (Sanh. 88b).

But, while Judaism highly praises humility and meekness, it wisely limits and restricts this virtue, which, carried to the extreme, would be cowardice. Humility must not be practised at the expense of manhood. "The disciple of the wise," the Rabbis say, "should have sufficient pride to stand in defense of the Law he represents" (Soṭah 5a).

K. E. Schr.

HUNA (called also **Huna the Babylonian**): Babylonian amora of the second generation and head of the Academy of Sura; born about 216 (212 according to Grätz); died in 296–297 (608 of the Seleucidan era; Sherira Gaon, in Neubauer, "M. J. C." i. 30) or in 290 according to Abraham ibn Daud ("Sefer ha-Ḳabbalah," in Neubauer, *l.c.* p. 58). He lived in a town called דרוקרת (Ta'an. 21b), identified by Wiesener ("Scholien zum Babylonischen Talmud," ii. 193) with Tekrit, but read by Grätz דיוקרת (= "Diokart"). He was the principal pupil of Rab (Abba Arika), under whom he acquired so much learning that one of Raba's three wishes was to possess Huna's wisdom (M. Ḳ. 28a). He was also styled "one of the Babylonian ḥasidim," on account of his great piety (Ta'an. 23b); and the esteem in which he was held was so great that, though not of a priestly family, he read from the Torah on Sabbaths and holy days the first passage, which is usually read by a priest. Ammi and Assi, honored Palestinian priests, considered Huna as their superior (Meg. 22a; Giṭ. 59b). Although Huna was related to the family of the exilarch (Sherira Gaon, *l.c.*) he was so poor at the beginning of his career that in order to buy wine to consecrate the Sabbath he had to pawn his girdle (Meg. 27b). But Rab blessed him with riches, and Huna displayed great wealth at the wedding of his son Rabbah (*ib.*). He owned numerous flocks of sheep, which were under the special care of his wife, Ḥobah (B. Ḳ. 80a), and he traveled in a gilded litter (Ta'an. 20b). Huna was very generous. When the houses of the poor people were thrown down by storms he rebuilt them; at meal-times the doors of his house would be left open, while his servants cried, "He who is hungry, let him come and eat" (*ib.*).

His Liberality.

After Rab's death Huna lectured in his stead in the Academy of Sura, but he was not appointed head till after the death of Rab's companion, Samuel (*c.* 256). It was under Huna that the Academy of Sura, till then called "sidra," acquired the designation of "metibta" (Hebr. "yeshibah"), Huna being the first "resh metibta" (Hebr. "rosh yeshibah"; comp. Zacuto "Yuḥasin," p. 118b, Königsberg, 1857; and see Academies in Babylonia). Under Huna the academy increased considerably in importance, and students flocked to it from all directions; during his presidency their number reached 800, all supported by himself (Ket. 106a). Thirteen assistant lecturers ("amora'e") were occupied in teaching them. When his pupils, after the lesson, shook their garments they raised so great a cloud of dust that when the Palestinian sky was overcast it was said, "Huna's pupils in Babylon have risen from their lesson" (*ib.*). Under Huna, Palestine lost its ascendency over Babylonia; and on certain occasions he declared the schools of the two countries to be equal (Giṭ. 6a; B. Ḳ. 80a). In Babylonia, during his lifetime, the Sura academy held the supremacy. He presided over it for forty years, when he died suddenly, more than eighty years of age (M. Ḳ. 28a). His remains were brought to Palestine and buried by the side of Ḥiyya Rabbah (*ib.* 25a).

Huna's principal pupil was Rab Ḥisda, who had previously been his fellow pupil under Rab. Other pupils of his whose names are given were: Abba b. Zabda, Rab Giddel, R. Ḥelbo, R. Sheshet, and Huna's own son, Rabbah (Yeb. 64b).

He transmitted many of Rab's halakot, sometimes without mentioning Rab's name (Shab. 24a *et al.*). His own halakot are numerous in the Babylonian Talmud, and although some of his decisions were contrary to Rab's (Shab. 21a, b, 128a), he declared Rab to be the supreme authority in religious law (Niddah 24b). Huna's deductions were sometimes casuistical; he interpreted the text verbatim even where the context seems to prohibit such an interpretation (Shab. 20a; Men. 36a; *et al.*). According to Huna, the halakah transmitted in the Mishnah and Baraita is not always to be taken as decisive (Ber. 24b, 59b). He had some knowledge of medicine and natural history, and used his knowledge in many of his halakic decisions (Shab. 20a, 54b; Yeb. 75b). He also interpreted many of the difficult words met with in the Mishnah and Baraita (Shab. 53b, 54b, *et al.*).

Method of Deduction.

Huna was equally distinguished as a haggadist, and his haggadot were known in Palestine, whither they were carried by some of his pupils, Ze'ira among them. His interpretation of Prov. xiv. 23, transmitted by Ze'ira, is styled "the pearl" (Pesiḳ. ii. 13b; comp. Yer. Shab. vii. 2, where also many halakot of his are preserved, transmitted by Ze'ira). Many of his haggadot, showing his skill in Biblical exegesis, are found in the Babylonian Talmud, some in the name of Rab, some in his own. He took special pains to reconcile apparently conflicting passages, as, for instance, II Sam. vii. 10 and I Chron. xvii. 10 (Ber. 7b). He endeavored to solve the problem presented by the sufferings of the righteous, inferring from Isa. liii. 10 that God chasteneth those whom He loves (Ber. 5a). The following of Huna's utterances may be given: "He who occupies himself with the study of the Law alone is as one who has no God" (inferred from II Chron. xv. 3; 'Ab. Zarah 17b). "When leaving the synagogue, one must not take long steps" (Ber. 6b). "He who recites his prayer behind the synagogue is called 'impious'" = "rasha'" (inferred from Ps. xii. 9 [A. V. 8]; *ib.*). "He who is accustomed to honor the Sabbath with light will have children who are scholars; he who observes the injunction as to the mezuzah will have a beautiful house; he who observes the rule as to the ẓiẓit will have fine clothes; he who consecrates the Sabbath and the holy days as commanded will have many skins filled with wine" (Shab. 23b). Huna was very tolerant, and on several occasions he recommended mild treatment of Gentiles (B. Ḳ. 113a; B. M. 70a). He was also very modest; he was not ashamed, before he was rich, to cultivate his field himself, nor to return home in the evening with his spade on his shoulder (Meg. 28a). When two contending parties requested him to judge between them, he said to them: "Give me a man to cultivate my field and I will be your judge" (Ket. 105a). He patiently bore Rab's hard words, because the latter was his teacher ('Er. 15a; Yer. 'Er. i. 3), but he showed on several occasions that a scholar must not humiliate himself in presence of an inferior (Ket. 69a; B. M. 33a).

HUNA, ABBA HA-KOHEN. See Huna bar Abbin.

HUNA BAR ABBIN HA-KOHEN (called also **Neḥunya, Ḥuna,** and **Ḥunya**): Palestinian amora of the first half of the fourth century; pupil of R. Jeremiah, in whose name he reports some halakic and haggadic sayings (Yer. Dem. 21d; Pes. 36d; and frequently). That the name "Neḥunya," from which are derived "Ḥuna" and "Ḥunya," designates Huna is shown by the fact that a saying which is quoted in the Pesiḳta (xviii. 174) in the name of Huna is given by his pupil Tanḥuma in the Midrash Tehillim (to Ps. xiv. 6) in the name of Neḥunya. Huna occupied a prominent position in the school of Tiberias, directed by Jose, with whom he had halakic controversies (Yer. Sheḳ. 48b). Huna sojourned some time in Babylonia (Yer. R. H. ii. 2) and was well acquainted with the halakot of the Babylonian amoraim, often quoted by him in the Yerushalmi. It was probably during his residence there that he made the acquaintance of Rabba, head of the school of Meḥuza, to whom he made an important communication concerning intercalary months (Yer. R. H. 21a). With regard to certain calendary calculations, Huna relates that in consequence of the Roman persecutions (under Gallus) the rabbis of Tiberias, who had sought refuge in a grotto, deliberated on the advisability of intercalating an additional month. In the grotto they distinguished day from night by lamps, which were dim in the daytime and bright at night (Sanh. 12a). Huna seems to have had some medical knowledge; he speaks of the effects of *Rubia tinctorum* (madder = פואה) and asafetida (חלתית), in which latter article he traded (Yer. Shab. 8b, 17c). Although of a priestly family Huna refused to take tithes (Yer. Ma'as. Sh. ii. 2).

Huna was an able haggadist, and his sayings are frequently quoted in midrashic literature. His haggadot bear the stamp of ardent patriotism. He appears as a bitter enemy of the Romans, to whom, according to him, the Psalmist applied the epithet נבל (Ps. xiv. 1), because they filled Palestine with Jewish corpses (Midr. Teh. to Ps. *ad loc.*). "In three things," he declared, "the Greeks are superior to the Romans in legislation, in painting, and in literature" (Gen. R. xvi. 4). Huna held the study of the Law in such high estimation that he declared it could atone for a deadly sin (Lev. R. xxv.). Huna considered envy the greatest sin. Israel was exiled only because it transgressed the tenth commandment (Pes. R. 24).

HUNA B. ḤANINA (ḤINENA): Babylonian amora of the fifth generation (4th cent.). His principal teachers were Abaye (in whose school R. Safra and Abba b. Huna were his fellow pupils; B. B. 167b) and Raba; R. Papa, his senior, was a fellow pupil under Raba (Sanh. 87a). On one occasion Huna and Huna b. Naḥman contested Raba's decision ('Ab. Zarah 57b). Huna has transmitted a halakah in the name of Ḥiyya b. Rab (Ber. 30a).

Bibliography: Heilprin, *Seder ha-Dorot*, ii.

s. M. Sel.

HUNA B. JOSHUA: Babylonian amora of the fifth generation; died in 410 (Samson of Chinon, "Sefer Keritut," p. 26a, Cremona, 1558). He was the pupil of Raba (Ḳid. 32b), who seems to have been his principal teacher, and who sometimes praised him (Hor. 10b), but occasionally blamed him (Ket. 85a; Giṭ. 73a). He appears to have been the pupil of Abaye also (R. H. 24b). His principal companion was R. Papa, from whom he was inseparable, both in and out of school ('Er. 12a; Ber. 58b; *et al.*). When R. Papa became head of the school of Naresh (נריש), Huna was appointed president of the general assembly ("resh kallah") in the same school (Ber. 57a). As senior pupils, Huna and R. Papa took part in the halakic deliberations of their teachers. Their halakot are often mentioned in the Babylonian Talmud, and, according to Moses of Coucy ("Sefer Miẓwot Gadol," i., No. 67), Isaac Alfasi decided with them against R. Huna I., head of the Academy of Sura.

Huna was wealthy (Hor. 10b); he never walked more than four cubits bareheaded (Shab. 118b); he ate very slowly, so that R. Papa consumed in the same time four times as much and Rabina eight times as much (Pes. 89b). Huna lived to a great age, outliving Raba by fifty-seven years. Once in the lifetime of R. Papa, Huna fell desperately ill, but his life was spared to him because he was forbearing (R. H. 17a).

HUNA, MAR. See Exilarch.

HUNA B. NATHAN: Babylonian scholar of the fourth and fifth centuries. He was the pupil of Amemar II. and a senior and companion of Ashi, to whom he repeated several of Amemar's sayings and halakot (Giṭ. 19b; B. B. 55a, 74b). He was wealthy; but though "in him learning and dignity met," he was nevertheless subject to Ashi (Giṭ. 59a). He had access to the royal court of Persia, and the esteem in which he was held by King Yezdegerd is instanced by the fact that on one occasion at court (as told by Huna to Ashi) the king himself adjusted Huna's belt (Zeb. 19a; see AMEMAR II.). According to Sherira (Neubauer, "M. J. C." i. 32), Huna was exilarch in the time of Ashi. Another Huna b. Nathan was a companion of Raba (Ned. 12a) and, apparently, a pupil of Naḥman (Ket. 7a).

HUNGARY (in Hebrew literature, מלכות ההגרי [see HAGAR]; אונגארין; ארץ הגר; הונגאריא): Kingdom in central Europe, forming part of the Austro-Hungarian monarchy. It is not definitely known when Jews first settled in Hungary. According to legend, King Decebalus of Dacia permitted the Jews who aided him in his war against Rome to settle in his territory. A Latin inscription, the epitaph of Septima Maria, discovered within the territory of the ancient province of Pannonia, clearly refers to Jewish matters. But, although it may be unhesitatingly assumed that Jews came to Hungary while the Roman emperors held sway in that country, there is nothing to indicate that at that time they had settled there permanently. In the Hungarian language the Jew is called "Zsidó," a term which the Hungarians adopted from the Slavs.

Earliest References.

The first historical document relating to the Jews of Hungary is the letter written about 960 to King Joseph of the Chazars by Ḥasdai ibn Shaprut, the Jewish statesman of Cordova, in which he says that the Slavic ambassadors promised to deliver the message to the King of Slavonia, who would hand the same to Jews living in "the country of Hungarin," who, in turn, would transmit it farther (see JEW. ENCYC. iv. 3, *s.v.* CHAZARS). About the same time Ibrahim ibn Jacob says that Jews went from Hungary to Prague for business purposes. (See COMMERCE.) Dr. Samuel Kohn suggests that Jewish Chazars may have been among the Hungarian troops that under Arpad conquered the country in the second half of the ninth century. Nothing is known concerning the Jews during the period of the Vajdas, except that they lived in the country and engaged in commerce there. Two hundred years later, in the reign of St. Ladislaus (1077–95), the Synod of Szabolcs decreed (May 20, 1092) that Jews should not be permitted to have Christian wives or to keep Christian slaves. This decree had been promulgated in the Christian countries of Europe since the fifth century, and St. Ladislaus merely introduced it into Hungary.

The Jews of Hungary formed at first small settlements, and had no learned rabbis; but they were strictly observant of all the Jewish religious laws and customs. Jews from Ratisbon once came into Hungary with merchandise from Russia, and the wheel of their wagon broke on a Friday, near Ofen (Buda) or Gran (Esztergom). By the time they had repaired it and had entered the town, the Jews were just leaving the synagogue; and the unintentional Sabbath-breakers were heavily fined. The ritual of the Hungarian Jews faithfully reflected their German origin.

Eleventh Century.

King Coloman (1095–1114), the successor of St. Ladislaus, renewed the Szabolcs decree of 1092, adding further prohibitions against the employment of Christian slaves and domestics. He also restricted the Jews to cities with episcopal sees—probably to have them under the continuous supervision of the Church. Soon after the promulgation of this decree Crusaders came to Hungary; but the Hungarians did not sympathize with them, and Coloman even opposed them. The infuriated Crusaders attacked some cities, and if Gedaliah ibn Yaḥya is to be believed, the Jews suffered a fate similar to that of their coreligionists in France, Germany, and Bohemia.

The cruelties inflicted upon the Jews of Bohemia induced many of them to seek refuge with their treasures in Hungary. It was probably the immigration of the rich Bohemian Jews that induced Coloman soon afterward to regulate commercial and banking transactions between Jews and Christians. He decreed, among other regulations, that if a Christian borrowed from a Jew, or a Jew from a Christian, both Christian and Jewish witnesses must be present at the transaction.

Golden Bull.

During the reign of King Andrew II. (1205–35) there were Jewish chamberlains and mint-, salt-, and tax-officials. The nobles of the country, however, induced the king, in his Golden Bull (1222), to deprive the Jews of these high offices. When Andrew needed money in 1226, he farmed the royal revenues to Jews, which gave ground for much complaint. The pope thereupon excommunicated him, until, in 1233, he promised the papal ambassadors on oath that he would enforce the decrees of the Golden Bull directed against the Jews and the Saracens; would cause both peoples to be distinguished from Christians by means of badges; and would forbid both Jews and Saracens to buy or to keep Christian slaves.

Thirteenth Century.

The year 1240 was the closing one of the fifth millennium of the Jewish era. At that time the Jews were expecting the advent of their Messiah. The irruption of the Tatars (1241) seemed to conform to expectation, as Jewish imagination expected the happy Messianic period to be ushered in by the war of Gog and Magog. The wild Tatars treated the Jews with great cruelty, although it had been reported that they (the Tatars) were in reality Jews who had been secretly furnished with arms by their European brethren. Béla IV. (1235–70) appointed a Jew, Henul by name, court chamberlain (the Jew Teka had filled this office under Andrew II.); and Wölfel and his sons Altmann and Nickel held the castle at Komárom with its domains in pawn. Béla also entrusted the Jews with the mint; and Hebrew coins of this period are still found in Hungary. In 1251 a "privilegium" was granted by Béla to his Jewish subjects which was essentially the same as that granted by Duke Frederick II. the Belligerent to the Austrian Jews in 1244, but which Béla modified to suit the conditions of Hungary (Löw, in Busch's "Jahrbuch," v. 63). This "privilegium" remained in force down to the battle of Mohacs (1526).

At the Synod of Ofen (1279), held in the reign of King Ladislaus IV. (1272–90), it was decreed, in the presence of the papal ambassador, that every Jew appearing in public should wear on the left side of his upper garment a piece of red cloth; that any Christian transacting business with a Jew not so marked, or living in a house or on land together with any Jew, should be refused admittance to the Church services; and that a Christian entrusting any office to a Jew should be excommunicated. Andrew III. (1291–1301), the last king of the house of Arpad, declared, in the "privilegium" granted by him to the community of Presburg (Pozsony), that the Jews in that city should enjoy all the liberties of citizens.

Expulsion and Recall.

Under the foreign kings who occupied the throne of Hungary on the extinction of the house of Arpad, the Hungarian Jews suffered many persecutions; and at the time of the Black Death (1349) they were expelled from the country (see "R. E. J." xxii. 236). Although the Jews were immediately readmitted, they were again persecuted, and were once more expelled in 1360 by King Louis the Great of Anjou (1342–82) on the failure of his attempt to convert them to Catholicism. They were graciously received by Alexander the Good of Moldavia and Dano I. of Wallachia, the latter affording them special commercial privileges.

When, some years later, Hungary was in financial distress, the Jews were recalled. They found that during their absence the king had introduced the custom of "Tödtbriefe," *i.e.*, canceling by a stroke of his pen, on the request of a subject or a city, the notes and mortgage-deeds of the Jews. An important office created by Louis was that of "judge of all the Jews living in Hungary," this official being chosen from among the dignitaries of the country, the palatines, and treasurers, and having a deputy to aid him. It was his duty to collect the taxes of the Jews, to protect their privileges, and to listen to their complaints, which last-named had become more frequent since the reign of Sigismund (1387–1437).

The successors of Sigismund—Albert (1437–39), Ladislaus Posthumus (1453–57), and Matthias Corvinus (1458–90)—likewise confirmed the "privilegium" of Béla IV. Matthias created the office of Jewish prefect in Hungary. The period following upon the death of Matthias was a sad one for the Hungarian Jews. He was hardly buried when the people fell upon them, confiscated their property, refused to pay debts owing to them, and persecuted them generally. The pretender John Corvinus, Matthias' illegitimate son, expelled them from Tata (Totis), and King Ladislaus II. (1490–1516), always in need of money, laid heavy taxes upon them. During his reign Jews were for the first time burned at the stake, many being executed at Tyrnau (Nagy-Szombat) in 1494, on suspicion of ritual murder.

Sixteenth Century.

The Hungarian Jews finally applied to the German emperor Maximilian for protection. On the occasion of the marriage of Louis II. and the archduchess Maria (1512), the emperor, with the consent of Ladislaus, took the prefect, Jacob Mendel, together with his family and all the other Hungarian Jews, under his protection, according to them all the rights enjoyed by his other subjects. Under Ladislaus' successor, Louis II. (1516–26), persecution of the Jews was a common occurrence. The bitter feeling against them was in part augmented by the fact that the baptized Emerich Szerencsés, the deputy treasurer, embezzled the public funds, following the example of the nobles who despoiled the treasury under the weak Louis.

Under the Turks.

The Turks vanquished the Hungarians at the battle of Mohacs (Aug. 29, 1526), on which occasion Louis II. was slain. When the news of his death reached the capital, Ofen, the court and the nobles fled together with some rich Jews, among them the prefect. When the grand vizier, Ibrahim Pasha, preceding Sultan Sulaiman, arrived with his army at Ofen, the representatives of the Jews who had remained in the city appeared garbed in mourning before him, and, begging for grace, handed him the keys of the deserted and unprotected castle in token of submission. The sultan himself entered Ofen on Sept. 11; and on Sept. 22 he decreed that all the Jews seized at Ofen, Gran, and elsewhere, more than 2,000 in number, should be distributed among the cities of the Turkish empire.

While some of the Jews of Hungary were thus deported to Turkey, others, who had fled at the approach of the sultan, sought refuge beyond the frontier or in the royal free towns of western Hungary. The widow of Louis II., the queen regent Maria, favored the enemies of the Jews. The citizens of Oedenburg (Sopron) began hostilities by expelling the Jews of that city, confiscating their property, and pillaging the vacated houses and the synagogue. The city of Presburg also received permission from the queen (Oct. 9, 1526) to expel the Jews living within its territory, because they had expressed their intention of fleeing before the Turks. The Jews left Presburg on Nov. 9. On the same day the Diet at Stuhlweissenburg (Székesfehérvár) was opened, at which John Zapolya (1526–40) was elected and crowned king in opposition to Ferdinand. During this session it was decreed that the Jews should immediately be expelled from every part of the country. John Zapolya, however, did not ratify these laws; and the Diet held at Presburg Dec., 1526, at which Ferdinand of Habsburg was chosen king (1526–64), annulled all the decrees of that of Stuhlweissenburg, including Zapolya's election as king.

Blood Accusation at Bösing.

As the lord of Bösing (Bazin) was in debt to the Jews, a blood accusation was brought against these inconvenient creditors in 1529. Although Mendel, the prefect, and the Jews throughout Hungary protested, the accused were burned at the stake. For centuries afterward Jews were forbidden to live at Bösing. The Jews of Tyrnau soon shared a similar fate, being first punished for alleged ritual murder and then expelled from the city (Feb. 19, 1539).

In 1541, on the anniversary of the battle of Mohacs, Sultan Sulaiman again took Ofen by a ruse. This event marks the beginning of Turkish rule in many parts of Hungary, which lasted down to 1686. The Jews living in these parts were treated far better than those living under the Hapsburgs. During this period, beginning with the second half of the sixteenth century, the community of Ofen was more flourishing than at any time before or after. While the Turks held sway in Hungary, the Jews of Transylvania (at that time an independent principality) also fared well. At the instance of Abraham Sassa, a Jewish physician of Constantinople, Prince Gabriel Bethlen of Transylvania granted a letter of privileges (June 18, 1623) to the Spanish Jews from Turkey.

Expelled from Presburg.

On Nov. 26, 1572, King Maximilian (1564–77) intended to expel the Jews of Presburg, stating that his edict would be recalled only in case they accepted Christianity. The Jews, however, remained in the city, without abandoning their religion. They were in constant conflict with the citizens. In 1582 (June 1) the municipal council decreed that no one should harbor Jews, or even transact business with them. The feeling against the Jews in that part of the country not under Turkish rule is shown by the decree of the Diet of 1578, to the effect that Jews were to be taxed double the amount which was imposed upon other citizens. By article xv. of the law promulgated by the Diet of 1630, Jews were forbidden to take charge of the customs; and this decree was confirmed by the Diet of 1646 on the ground that the Jews were excluded from the privileges of the country, that they were unbelievers, and had no conscience ("veluti jurium regni incapaces, infideles, et nulla conscientia præditi"). The Jews had to pay a special war-tax when the imperial troops set out toward the end of the sixteenth century to recapture Ofen from the Turks. The Ofen community suffered much during this siege, as did also that of Stuhlweissenburg when the imperial troops took that city in Sept., 1601; many of its members were either slain or taken prisoners and sold into slavery, their redemption being subsequently effected by the German, Italian, and Turkish Jews. After the conclusion of peace, which the Jews helped to bring about, the communities were in part reconstructed; but further development in the territory of the Hapsburgs was arrested when Leopold I. (1657–1705) expelled the Jews (April 24, 1671). He, however, revoked his decree a few months later (Aug. 20). During the siege of Vienna, in 1683, the Jews that had returned to that city were again maltreated. The Turks plundered some communities in western Hungary, and deported the members as slaves.

Seventeenth Century.

The imperial troops recaptured Ofen on Sept. 2, 1686; and the whole of Hungary now came under the rule of the house of Hapsburg. After the troops of Leopold had driven out the Turks, the king would not suffer any but Catholics in the reconquered counties; and Protestants, Jews, and Mohammedans renounced their faiths. As the devastated country had to be repopulated, Bishop Count Leopold Kollonitsch, subsequently Archbishop of Gran and Primate of Hungary, advised the king to give the preference to the German Catholics in order that the country might in time become German and Catholic. He held that the Jews could not be exterminated at once, but they must be weeded out by degrees, as bad coin is gradually withdrawn from circulation. The decree passed by the Diet of Presburg, imposing double taxation upon the Jews, must be enforced. Jews must not be permitted to engage in agriculture, nor to own any real estate, nor to keep Christian servants.

This advice soon bore fruit and was in part acted upon. In Aug., 1690, the government at Vienna ordered Oedenburg to expel its Jews, who had immigrated from the Austrian provinces. The government, desiring to enforce the edict of the last Diet, decreed soon afterward that Jews should be removed from the office of collector. The order proved ineffective, however; and the employment of Jewish customs officials was continued. Even the treasurer of the realm set the example in transgressing the law by appointing (1692) Simon Hirsch as farmer of customs at Leopoldstadt; and at Hirsch's death he transferred the office to Hirsch's son-in-law.

Revolt of the Kuruczes.

The revolt of the Kuruczes, under Francis Rákóczy, caused much suffering to the Hungarian Jews. The Kuruczes imprisoned and slew the Jews, who had incurred their anger by siding with the king's party. The Jews of Eisenstadt (Kis-Márton), accompanied by those of the community of Mattersdorf (Nagy-Márton), sought refuge at Vienna, Wiener-Neustadt, and Forchtenstein (Fraknó); those of Holics and Schlossberg (Sasvár) dispersed to Göding; while others, who could not leave their business in this time of distress, sent their families to safe places, and themselves braved the danger. While not many Jews lost their lives during this revolt, it made great havoc in their wealth, especially in the county of Oedenburg, where a number of rich Jews were living. The king granted letters of protection to those that had been ruined by the revolt, and demanded satisfaction for those that had been injured; but in return for these favors he commanded the Jews to furnish the sums necessary for suppressing the revolt.

After the restoration of peace the Jews were expelled from many cities that feared their competition; thus Gran expelled them in 1712, on the ground that the city which had given birth to St. Stephen must not be desecrated by them. But the Jews living in the country, on the estates of their landlords, were generally left in quiet.

Eighteenth Century.

The lot of the Jews was not improved under the reign of Leopold's son, Charles III. (1711–40). He informed the government (June 28, 1725) that he intended to decrease the number of Jews in his domains, and the government thereupon directed the counties to furnish statistics of the Hebrew inhabitants. In 1726 the king decreed that in the Austrian provinces, from the day of publication of the decree, only one male member in each Jewish family be allowed to marry. This decree, restricting the natural increase of the Jews, materially affected the Jewish communities of Hungary. All the Jews in the Austrian provinces who could not marry there went to Hungary to found families; thus the overflow of Austrian Jews peopled Hungary. These immigrants settled chiefly in the northwestern counties, in Neutra (Nyitra), Presburg, and Trencsén.

The Moravian Jews continued to live in Hungary as Moravian subjects; even those that went there for the purpose of marrying and settling promised on oath before leaving that they would pay the same taxes as those living in Moravia. In 1734 the Jews of Trencsén bound themselves by a secret oath that in all their communal affairs they would submit to the Jewish court at Ungarisch-Brod only. In course of time the immigrants refused to pay taxes to the Austrian provinces. The Moravian Jews, who had suffered by the heavy emigration, then brought complaint; and Maria Theresa ordered that all Jewish and Christian subjects that had emigrated after 1740 should be extradited, while those who had emigrated before that date were to be released from their Moravian allegiance.

The government could not, however, check the large immigration; for although strict laws were drafted (1727), they could not be enforced owing to the good-will of the magnates toward the Jews. The counties either did not answer at all, or sent reports bespeaking mercy rather than persecution.

Expelled from Mining-Towns.

Meanwhile the king endeavored to free the mining-towns from the Jews—a work which Leopold I. had already begun in 1693. The Jews, however, continued to settle near these towns; they displayed their wares at the fairs; and, with the permission of the court, they even erected a foundry at Ság. When King Charles ordered them to leave (March, 1727), the royal mandate was in some places ignored; in others the Jews obeyed so slowly that he had to repeat his edict three months later.

Statistics in 1735.

In 1735 another census of the Jews of the country was taken with the view of reducing their numbers. There were at that time 11,621 Jews living in Hungary, of which number 2,474 were male heads of families, and 57 were female heads. Of these heads of families 35.31 per cent declared themselves to be Hungarians; the rest had immigrated. Of the immigrants 38.35 per cent came from Moravia, 11.05 per cent from Poland, and 3.07 per cent from Bohemia. The largest Jewish community, numbering 770 persons, was that of Presburg.

Most of the Jews were engaged in commerce or industries; only a few pursued agriculture. Of the 2,531 heads of families 883 were engaged in trade; 116 were tailors supplying garments to their coreligionists. There were also a number of furriers and glaziers and 59 butchers. There were 203 brandy-distillers and 150 innkeepers. The heavy taxation imposed upon the Jews is evidenced by the fact that 23 families in the county of Abauj had to pay 38 gulden, 45 denars a year to their foreign landlords and 879 gulden to their Hungarian landlords. In several places the landlords accepted provisions instead of money in payment of the yearly tax.

During the reign of Charles III. the religious affairs of the Jews of Hungary were directed by a chief rabbi; Samson Wertheimer, the famous factor of the court of Vienna, being chosen by his coreligionists to fill the office in gratitude for the interest he had shown in their welfare. His election was confirmed May 6, 1716, by the king, who also granted him permission, when he was unable to personally decide cases submitted to him, to employ representatives. Wertheimer's representatives in the Hungarian communities between 1708 and 1717 were Meïr b. Isaac, rabbi of Eisenstadt and author of "Panim Me'irot"; Alexander b. Menahem; Phinehas Auerbach; Jacob Eliezer Braunschweig; Hirsch Semnitz; and (after 1717) Simon Jolles.

Wertheimer and his representatives judged especially those cases that arose in consequence of the Kurucz revolt. The Jews had fled before Rákóczy's troops as before their enemies, and Jewish communal life was for a time disorganized; but when peace was restored and the work of reorganizing the communities was begun, many difficulties arose that had to be solved by Wertheimer.

Wertheimer died Aug. 6, 1724; and his death was scarcely an assured fact when his son-in-law, Bernhard Eskeles, took steps to obtain the chief rabbinate. Nineteen days later he was appointed to the office by Count Georg Erdödy, and the king confirmed the appointment Sept. 10, 1724. On the death of Eskeles (March 2, 1753) the office of chief rabbi of Hungary was abolished.

Transylvania, at the present time belonging to Hungary, had in the eighteenth and nineteenth centuries a chief rabbi of its own, who was generally the rabbi of Gyula-Fehérvár (Karlsburg). The following rabbis of this interesting community officiated as chief rabbis of Transylvania: Joseph Reis Auerbach (d. 1750); Shalom Selig b. Saul Cohen (officiated 1754–57); Johanan b. Isaac (1758–60); Benjamin Ze'eb Wolf of Cracow (1764–77); Moses b. Samuel Levi Margaliot (1778-1817); Menahem b. Joshua Mendel (1818–23); Ezekiel Paneth (1823–1843); Abraham Friedmann, the last chief rabbi of Transylvania (d. 1879).

Under Maria Theresa.

During the reign of Queen Maria Theresa (1740–1780), daughter of Charles III., the Jews were expelled from Ofen (1746), and the "toleration-tax" was imposed upon the Hungarian Jews. On Sept. 1, 1749, the delegates of the Hungarian Jews, except those from the county of Szathmár, assembled at Presburg and met a royal commission, which informed them that they would be expelled from the country if they did not pay this tax. The frightened Jews at once agreed to do so; and the commission then demanded a yearly tax of 50,000 gulden. This sum being excessive, the delegates protested; and although the queen had fixed 30,000 gulden as the minimum tax, they were finally able to compromise on the payment of 20,000 gulden a year for a period of eight years. The delegates were to apportion this amount among the districts; the districts, their respective sums among the communities; and the communities, theirs among the individual members.

The queen confirmed this agreement of the commission, except the eight-year clause, changing the period to three years, which she subsequently made five. The agreement, thus ratified by the queen, was brought Nov. 26 before the courts, which were powerless to relieve the Jews from the payment of this "Malkegeld" (queen's money), as they called it.

The Jews, thus burdened by new taxes, thought the time ripe for taking steps to remove their oppressive disabilities. While still at Presburg the delegates had brought their grievances before the mixed commission that was called "delegata in puncto tolerantialis taxæ et gravaminum Judeorum commissio mixta." These complaints pictured the distress of the Jews of that time. They were not allowed to live in Croatia and Slavonia, in the counties of Baranya and Heves, or in several free towns and localities; nor might they visit the markets there. At Stuhlweissenburg they had to pay a poll-tax of 1 gulden, 30 kreuzer if they entered the city during the day, if only for an hour. In many places they might not even stay overnight. They therefore begged permission to settle, or at least to visit the fairs, in Croatia and Slavonia and in those places from which they had been driven in consequence of the jealousy of the Greeks and the merchants. They had also to pay heavier bridge- and ferry-tolls than the Christians; at Tyrnau they had to pay three times the ordinary sum, namely, for the driver, for the vehicle, and for the animal drawing the same; and in three villages belonging to the same district they had to pay toll, although there was no toll-gate. Jews living on the estates of the nobles had to give their wives and children as pledges for arrears of taxes. In Upper Hungary they asked for the revocation of the toleration-tax imposed by the chamber of Zips (Szepes), on the ground that otherwise the Jews living there would have to pay two such taxes; and they asked also to be relieved from a similar tax paid to the Diet. Finally, they requested that Jewish artisans might be allowed to follow their trades in their homes undisturbed.

The commission laid these complaints before the queen, indicating the manner in which the evils could be relieved; and their suggestions were dictated in a rare spirit of good-will.

The queen relieved the Jews from the tax of toleration in Upper Hungary only. In regard to the other complaints she ordered that the Jews should specify them in detail, and that the government should remedy them in so far as they came under its jurisdiction.

The toleration-tax had hardly been instituted when Michael Hirsch petitioned the government to be appointed primate of the Hungarian Jews in order to be able to settle difficulties that might arise among them, and to collect the tax. The government did not recommend Hirsch, but decided that in case the Jews should refuse to pay, it might be advisable to appoint a primate to adjust the matter.

Before the end of the period of five years the delegates of the Jews again met the commission at Presburg and offered to increase the amount of their tax to 25,000 gulden a year if the queen would promise that it should remain at that sum for the next ten years. The queen refused; and not only did she turn a deaf ear to the renewed gravamina of the Jews, but caused still heavier burdens to be imposed upon them. Their tax of 20,000 gulden was increased to 30,000 gulden in 1760; to 50,000 in 1772; to 80,000 in 1778; and to 160,000 in 1813.

Under Joseph II.

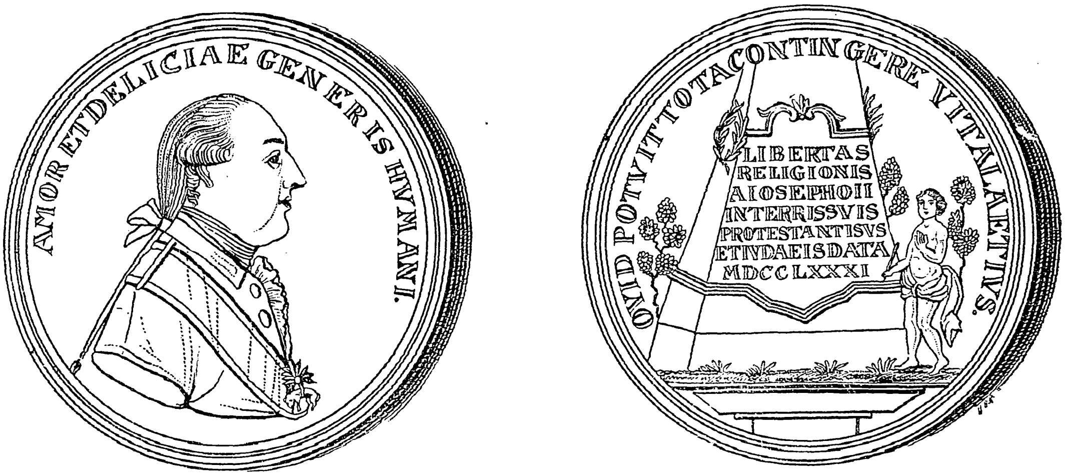
Joseph II. (1780–90), son and successor of Maria Theresa, showed immediately on his accession that he intended to alleviate the condition of the Jews, communicating this intention to the Hungarian chancellor, Count Franz Esterházy, as early as May 13, 1781.

Tolerance Edict.

In consequence the Hungarian government issued (March 31, 1783) a decree known as the "systematica gentis Judaicæ regulatio," which wiped out at one stroke the decrees that had oppressed the Jews for centuries. The royal free towns, except the mining-towns, were opened to the Jews, who were allowed to settle at pleasure throughout the country. The "regulatio" decreed that the legal documents of the Jews should no longer be composed in Hebrew, or in the corrupt Judæo-German, but in Latin, German, and Hungarian, the languages currently used in the country, and which the young Jews were required to learn within two years. Documents written in Hebrew or in Judæo-German were not legal; Hebrew books were to be used at worship only; the Jews were to organize elementary schools; the commands of the emperor, issued in the interests of the Jews, were to be announced in the synagogues; and the rabbis were to explain to the people the salutary effects of these decrees. The subjects to be taught in the Jewish schools were to be the same as those taught in the national schools; the same text-books were to be used in all the elementary schools; and everything that might offend the religious sentiment of non-conformists was to be omitted. During the early years Christian teachers were to be employed in the Jewish schools, but they were to have nothing to do with the religious affairs of such institutions. After the lapse of ten years a Jew might establish a business, or engage in trade, only if he could prove that he had attended a school. The usual school-inspectors were to supervise the Jewish schools and to report to the government. The Jews were to create a fund for organizing and maintaining their schools. Jewish youth might enter the academies, and might study any subject at the universities except theology. Jews might rent farms only if they could cultivate the same without the aid of Christians. They were allowed to peddle and to engage in various industrial occupations, and to be admitted into the gilds. They were also permitted to engrave seals, and to sell gunpowder and saltpeter; but their exclusion from the mining-towns remained in force. Christian masters were allowed to have Jewish apprentices. All distinctive marks hitherto worn by the Jews were to be abolished, and they might even carry swords. On the other hand, they were required to discard the distinctive marks prescribed by their religion and to shave their beards. Emperor Joseph regarded this decree so seriously that he allowed no one to violate it. The Jews, in a petition dated April 22, 1783, expressed their gratitude to the emperor for his favors, and, reminding him of his principle that religion should not be interfered with, asked permission to wear beards. The emperor granted the prayer of the petitioners, but reaffirmed the other parts of the decree (April

24, 1783). The Jews organized schools in various places, at Presburg, Alt-Ofen (Ó-Buda), Waag-Neustadtl (Vág-Ujhely), and Grosswardein (Nagy-Várad). A decree was issued by the emperor (July 23, 1787) to the effect that every Jew should choose a German surname; and a further edict (1789) ordered, to the consternation of the Jews, that they should henceforth perform military service.

After the death of Joseph II. the royal free cities showed a very hostile attitude toward the Jews. The citizens of Pesth petitioned the municipal council that after May 1, 1790, the Jews should no longer be allowed to live in the city. The government interfered; and the Jews were merely forbidden to engage in peddling in the city. Seven days previously a decree of expulsion had been issued at Tyrnau, May 1 being fixed as the date of the Jews' departure. The Jews appealed to the government; and in the following December the city authorities of Tyrnau were informed that the Diet had confirmed the former rights of the Jews, and that the latter could not be expelled.



Medal of Joseph II. Commemorating Grant of Religious Liberty to Protestants and Jews of Hungary, 1786.

(From F. Szecheny, Catalogue of Hungarian Coins in the National Institute at Szegedin, 1807–10.)

Reception of the Petition.

The Jews of Hungary handed a petition, in which they boldly presented their claims to equality with other citizens, to King Leopold II. (1790–92) at Vienna Nov. 29, 1790. He sent it the following day to the chancelleries of Hungary and Moravia for their opinions. The question was brought before the estates of the country Dec. 2, and the Diet drafted a bill showing that it intended to protect the Jews. This decision created consternation among the enemies of the latter. Tyrnau addressed a further memorandum to the estates (Dec. 4) in which it demanded that the Diet should protect the city's privileges. The Diet decided in favor of the Jews, and its decision was laid before the king.

The Jews, confidently anticipating the king's decision in their favor, organized a splendid celebration on Nov. 15, 1790, the day of his coronation; on Jan. 10, 1791, the king approved the bill of the Diet; and the following law, drafted in conformity with the royal decision, was read by Judge Stephen Atzel in the session of Feb. 5:

> "In order that the condition of the Jews may be regulated pending such time as may elapse until their affairs and the privileges of various royal free towns relating to them shall have been determined by a commission to report to the next ensuing Diet, when his Majesty and the estates will decide on the condition of the Jews, the estates have determined, with the approval of his Majesty, that the Jews within the boundaries of Hungary and the countries belonging to it shall, in all the royal free cities and in other localities (except the royal mining-towns), remain under the same conditions in which they were on Jan. 1, 1790; and in case they have been expelled anywhere, they shall be recalled."

Thus came into force the famous law entitled "De Judæis," which forms the thirty-eighth article of the laws of the Diet of 1790–91.

Law "De Judæis."

The "De Judæis" law was gratefully received by the Jews; for it not only afforded them protection, but also gave them the assurance that their affairs would soon be regulated. Still, although the Diet appointed on Feb. 7, 1791, a commission to study the question, the amelioration of the condition of the Hungarian Jews was not effected till half a century later, under Ferdinand V. (1835–48), during the session of the Diet of 1839–40.

In consequence of the petition of the Jews of Pesth, the mover of which was Dr. Philip Jacobovics, superintendent of the Jewish hospital, the general assembly of the county of Pesth drafted instructions for the delegates June 10, 1839, to the effect that if the Jews would be willing to adopt the Magyar language they should be given equal rights with other Hungarian citizens.

Simon Dubraviczky, the delegate of the county of Pesth, in the district session of March 9, 1840, expressed the wish of his constituents that the Jews should enjoy all the rights of tax-paying citizens. The delegates received the words of Dubraviczky enthusiastically. A bill to this effect was passed and laid before the magnates, who agreed with the lower chamber, differing merely as to the way in which the bill should be carried out. They advised deliberate procedure, deeming it to be sufficient if the toleration-tax should be recalled, and the following privileges be granted to the Jews: namely, permission to rent the estates of the nobles, to settle in any part of the country, to be admitted into the gilds and commercial associations, and to be entitled to purchase not merely property hitherto held in socage, but even the estates of citizens in the royal free and privileged towns. The lower chamber accepted this recommendation, and altered its bill accordingly. But a royal decree, issued May 10 in the interests of the royal free towns, not only did not support the legislation of the estates in favor of the Jews, but in some respects even made the condition of the latter worse. The estates were not satisfied with the decree, and again petitioned the king to ratify their bill; but the towns interfered. Thus the twenty-ninth article of the Law of the Diet was drafted, which Kossuth rightly called "the small result of big words." This law granted freedom of residence—except in the mining-towns—to all native or naturalized Jews of good repute; it permitted Jews to engage in manufactures and to study for the professions; but it restricted their right to own real estate to the cities, where they already possessed this right.

Emancipation Debates.

Although this law did not satisfy the hopes of the Jews, the favorable attitude of the Diet led them to Magyarize themselves. From now onward much attention was paid to the teaching of Hungarian in the schools; Moritz Bloch (Ballagi) translated the Pentateuch into Hungarian, and Moritz Rosenthal the Psalms and the Pirke Abot. Various communities founded Hungarian reading-circles; and the Hungarian dress and language were more and more adopted. Many communities began to use Hungarian on their seals and in their documents, and some liberal rabbis even began to preach in that language.

Magyarization of the Jews.

The Diet of 1839-40 unanimously condemned the toleration-tax, or the "Kammertaxe," as it had been called since the time of Joseph II. The king, influenced by the Diet, was willing to remit the tax if the Jews would pay the arrears that had accumulated for a number of years and amounted to 2,554,293 gulden. The Jews finally induced the king to accept 1,200,000 gulden as a compromise.

In answer to a call issued by the community of Pesth the Jewish representatives of Hungary assembled in that city March 4-14, 1846, Jonas Kunewalder presiding, and offered to pay 1,200,000 gulden into the treasury within five years, to secure the abrogation of the toleration-tax. The offer was accepted; and King Ferdinand V. abrogated the "Kammertaxe" forever (June 24, 1846).

Abolition of Toleration-Tax.

The unfavorable attitude of the Diet of 1843-1844 toward emancipation induced the community of Pesth and the commission for the apportionment of the toleration-tax to petition the king for the appointment of a commission which should investigate the oppressed condition of the Jews. The king referred the petition to the government, and the latter, in turn, referred it to a commission, under Baron Nikolaus Vay.

At the sessions of the Diet subsequent to that of 1839-40, as well as in various cities, a decided antipathy—at times active and at times merely passive—toward the Jews became manifest. In sharp contrast to this attitude was that of Baron Joseph Eötvös, who published in 1840 in the "Budapesti Szemle," the most prominent Hungarian review, a strong appeal for the emancipation of the Jews. This cause also found a friend in Count Charles Zay, the chief ecclesiastical inspector of the Hungarian Lutherans, who warmly advocated Jewish interests in 1846.

Appeal of Baron Eötvös.

Although the session of the Diet convened Nov. 7, 1847, was unfavorable to the Jews, the latter not only continued to cultivate the Hungarian language, but were also willing to sacrifice their lives and property in the hour of danger. During the Revolution of 1848-49 they displayed their patriotism, even though attacked by the populace in several places at the beginning of the uprising. On March 19 the populace of Presburg, encouraged by the antipathies of the citizens—who were aroused by the fact that the Jews, leaving their ghetto around the castle of Presburg, were settling in the city itself—began hostilities that were continued after some days, and were renewed more fiercely in April. At this time the expulsion of the Jews from Oedenburg, Fünfkirchen (Pécs), Stuhlweissenburg, and Steinamanger (Szombathely) was demanded; in the last two cities they were attacked. At Steinamanger the mob advanced upon the synagogue, cut up the Torah scrolls, and threw them into a well. Nor did the Jews of Pesth escape, while those at Waag-Neustadtl especially suffered from the brutality of the mob. Bitter words against the Jews were also heard in the Diet. Some Jews advised emigration to America as a means of escape; and a society was founded at Pesth, with a branch at Presburg, for that purpose. A few left Hungary, seeking a new home across the sea, but the majority remained.

Jews entered the national guard as early as March, 1848; although they were excluded from certain cities, they reentered as soon as the danger to the country seemed greater than the hatred of the citizens. At Pesth the Jewish national guard formed a separate division. When the national guards of Pápa were mobilized against the Croatians, Leopold Löw, rabbi of Pápa, joined the Hungarian ranks, inspiring his companions by his words of encouragement. Jews were also to be found in the volunteer corps, and among the honved and landsturm; and they constituted one-third of the volunteer division of Pesth that marched along the Drave against the Croatians, being blessed by Rabbi Schwab June 22, 1848. Many Jews throughout the country joined the army to fight for their fatherland; among them, Adolf Hübsch, subsequently rabbi at New York; Schiller-Szinessy, afterward lecturer at the University of Cambridge; and Ignatz Einhorn, who, under the name of "Eduard Horn," subsequently became state secretary of

Jews in the Hungarian Army, 1848.

the Hungarian Ministry of Commerce. The rebellious Servians slew the Jews at Zenta who sympathized with Hungary; among them, Rabbi Israel Ullmann and Jacob Münz, son of Moses Münz of Alt-Ofen. The conduct of the Jewish soldiers in the Hungarian army was highly commended by Generals Klapka and Görgey. Ignatz Einhorn estimated the number of Jewish soldiers who took part in the Hungarian Revolution to be 20,000; but this is most likely exaggerated, as Béla Bernstein enumerates only 755 combatants by name in his work, "Az 1848–49-iki Magyar Szabadságharcz és a Zsidók" (Budapest, 1898).

The Hungarian Jews served their country not only with the sword, but also with funds. Communities and individuals, ḥebra ḳaddishas and other Jewish societies, freely contributed silver and gold, armor and provisions, clothed and fed the soldiers, and furnished lint and other medical supplies to the Hungarian camps. Meanwhile they did not forget to take steps to obtain their rights as citizens. When the Diet of 1847–48—in which, according to ancient law, only the nobles and those having the rights of nobles might take part—was dissolved (April 11), and the new Parliament—at which under the new laws the delegates elected by the commons also appeared—was convened at Pesth (July 2, 1848), the Jews hopefully looked forward to the deliberations of the new body.

Reform and Emancipation.

Many Jews thought to pave the way for emancipation by a radical reform of their religious life, in agreement with opinions uttered in the Diets and in the press, that the Jews should not receive equal civic rights until they had reformed their religion. This reform had been first demanded in the session of 1839–40. From this session onward the necessity of a reform of the Jewish cult was generally advocated in the press and in general assemblies, mostly in a spirit of friendliness. Several counties instructed their representatives not to vote for the emancipation of the Jews until they desisted from practising the externals of their religion.

Louis Kossuth voiced the wish of nearly the whole nation when he declared in the "Pesti Hirlap" in 1844 that it was necessary to convene a Jewish Sanhedrin for the purpose of instituting reforms among the Jews. But the ideas of Reform found little response among the Hungarian Jews at this time, the community of Pesth being the most eager to adopt it. Among its advocates in that city were students at the university, teachers, physicians, and some merchants, who organized a Reform society similar to that which had been founded by rabbi Samuel Holdheim at Berlin May 8, 1845. The organ of the Pesth society was the German weekly "Der Ungarische Israelit," founded by I. Einhorn April 15, 1848, and which included in its program not only the emancipation of the Jews and the reform of Jewish worship, but also the encouragement of Hungarian sympathies and Hungarian culture among the Jews. The founders, desiring to extend the influence of the Reform society, organized it as a central society for the propagation of Reform ideas and the direction of branch societies in the provinces. But the appeals addressed to the communities outside of Pesth met with few responses, except at Arad, Fünfkirchen, Grosswardein, and Nagy-Becskerek. The rabbi of the Reform society at Grosswardein was Dr. Leopold Rockenstein, who soon exchanged the Bible for the sword, and rose to the rank of lieutenant during the Revolution. Moses Bruck, of Nagy-Becskerek, the enthusiastic advocate of Reform, also took part in the Revolution as officer.

For the purpose of urging emancipation all the Jews of Hungary sent delegates to a conference at Pesth on July 5, 1848; there a commission consisting of ten members was chosen, to which was entrusted the task of agitating in behalf of emancipation; but the commission was instructed to make no concessions in regard to the Jewish faith, even if the Parliament should stipulate such as the condition on which civic equality to the Jews would be granted. The commission soon after addressed a petition to the Parliament, but it proved ineffective.

Reform Society Founded.

The great indifference displayed by the Jews of the provinces did not discourage the reformers at Pesth. Aided by the counsel and encouragement of Holdheim and the Hungarian press, they called a general assembly, July 8, 1848, at which the founding of the Ungarischer Israelitischer Central-Reformverein was definitely determined upon. On Saturday, Sept. 23, the Reform society informed the Pesth congregation that it had chosen Ignatz Einhorn as its rabbi. Einhorn was sent to Berlin in order to investigate the institutions and customs of the Reform society there; and he entered upon his pastoral duties with the beginning of the great festivals.

The object for which the society was fighting, the emancipation of the Jews, was granted by the national assembly at Szeged on Saturday, the eve of the Ninth of Ab (July 28, 1849). The bill, which was quickly debated and immediately became a law, realized all the hopes of the Reform party. The Jews obtained full citizenship; and the Ministry of the Interior was ordered to call a convention of Jewish ministers and laymen for the purpose of drafting a confession of faith, and of inducing the Jews to organize their religious life in conformity with the demands of the time. The bill also included the clause referring to marriages between Jews and Christians, which clause both Kossuth and the Reform party advocated.

Reaction.

The Jews enjoyed their civic liberty just two weeks. When the Hungarian army surrendered at Világos to the Russian troops that had come to aid the Austrians in suppressing the Hungarian struggle for liberty, the Jews were severely punished for having taken part in the uprising. Haynau, the new governor of Hungary, imposed heavy war-taxes upon them, especially upon the communities of Pesth and Alt-Ofen, which had already been heavily mulcted by Prince Alfred Windischgrätz, commander-in-chief of the Austrian army, on his triumphant entry into the Hungarian capital at the beginning of 1849. The communities of Kecskemét, Nagy-Körös, Czegléd, Irsa, Szeged, and Szabadka (Maria-Theresiopel) were punished with equal severity by Haynau, who even laid hands upon the Jews individually, executing and imprisoning several; others sought refuge in emigration. The several communities petitioned to be relieved of the tax imposed upon them. The ministry of war, however, decided that the communities of Pesth, Alt-Ofen, Kecskemét, Czegléd, Nagy-Körös, and Irsa should pay this tax not in kind, but in currency to the amount of 2,300,000 gulden. As the communities were unable to collect this sum, they petitioned the government to remit it, but the result was that not only the communities in question but the communities of the entire country were ordered to share in raising the sum, on the ground that most of the Jews of Hungary had supported the Revolution. Only the communities of Temesvár and Presburg were exempted from this order, they having remained loyal to the existing government. The military commission subsequently added a clause to the effect that individuals or communities might be exempted from the punishment, if they could prove by documents or witnesses, before a commission to be appointed, that they had not taken part in the Revolution, either by word or deed, morally or materially. The Jews refused this means of clearing themselves, and finally declared that they were willing to redeem the tax by collecting a certain sum for a national school-fund. Emperor Francis Joseph therefore remitted the war-tax (Sept. 20, 1850), but ordered that the Jews of Hungary without distinction should contribute toward a Jewish school-fund of 1,000,000 gulden; and this sum was raised by them within a few years.

On the restoration of peace the Austrian government undertook to destroy all the marks of the Revolution, in consequence of which the Reform society of Pesth was dissolved (1852). Ignatz Einhorn emigrated; and his successor, David Einhorn, went to America.

Emancipation Movement Revived.

The emancipation of the Jews remained in abeyance while the house of Hapsburg held absolute sway in Hungary; but it was again taken in hand when the Austrian troops were defeated in Italy in 1859. In that year the cabinet, with Emperor Francis Joseph in the chair, decreed that the status of the Jews should be regulated in agreement with the times, but with due regard for the conditions obtaining in the several localities and provinces. The question of emancipation was again loudly agitated when the emperor convened the Diet April 2, 1861; but the early dissolution of that body prevented it from taking action in the matter.

The decade of absolutism in Hungary (1849–59) was beneficial to the Jews in so far as it forced them to establish schools, most of which were in charge of trained teachers. The government organized with the Jewish school-fund model schools at Sátoralja-Ujhely, Temesvár, Fünfkirchen, and Pesth. In the last-named city it founded in 1859 the Israelitish State Teachers' Seminary, the principals of which have included Abraham Lederer, Heinrich Deutsch, and Joseph Bánóczi (1903). The graduates of this institution have rendered valuable services in the cause of patriotism and religious education.

Emancipation.

When the Parliament dissolved in 1861, the emancipation of the Jews was deferred to the coronation of Francis Joseph. On Dec. 22, 1867, the question came before the lower house, and on the favorable report of Coloman Tisza and Sigmund Bernáth a bill in favor of emancipation was adopted, which was passed by the upper house on the following day. This bill (article xvii. of the Laws of the Parliament session of 1867) was received with universal satisfaction not only by the Jews, but also by the whole country.

Even before the passage of the bill, Minister of Public Worship Baron Joseph Eötvös, who, as stated above, had written in 1840 an appeal for the emancipation of the Jews, asked the community of Budapest for information in regard to the wishes of the Hungarian Jews. In reply they asked him to consider the evils that had crept into the Jewish communities, and advised the convening of a general assembly of Jews to regulate these affairs. Eötvös thereupon called an assembly of Jewish delegates at Budapest (Feb., 1868), which drafted decrees relating to the organization of the communities and schools. These were subsequently discussed at the General Jewish Congress convened by the king at Budapest (Dec. 14, 1868–Feb. 23, 1869). The president of this congress, which later sat in the county house of Pesth, was the physician Ignatz Hirschler, president of the congregation of Pesth in 1861, who was highly esteemed for his activity, scholarship, and courage; and the vice-presidents were Leopold Popper and Moritz Wahrmann, the latter being the first Jewish delegate in the Hungarian Parliament.

Divisions.

The discussions of the congress did not bear fruit as was expected, but resulted in bitter dissensions and a split in the Hungarian Jewry. The rules and regulations drawn up by the congress and approved by the king were to be enforced by communal district commissioners; but these failed in their efforts in consequence of the bitter opposition of many of the provincial communities. The Orthodox Shomere ha-Dat society encouraged many communities to petition the lower house to suspend these regulations, on the ground that they were hostile to the ancient spirit of Judaism. The Parliament decreed March 18, 1870, that in view of the principle of religious liberty, the petitioners were not obliged to submit to regulations of the congress which were contrary to their convictions. In consequence of this decree the Orthodox Jewish delegates drafted another set of regulations, and appointed a commission to lay them before the king, who immediately approved them.

The secession of the Orthodox Jews was not the only schism in Hungarian Judaism; there were communities which would accept neither the decrees of the congress nor those of the Orthodox party, but adopted a neutral stand, clinging to their ancient communal statutes, and called themselves the "Status Quo Ante" party. There were, furthermore, communities of Ḥasidic tendencies, which in styling themselves Jewish Sephardic communities either emphasized their Sephardic ritual or merely wished to be distinguished from the Orthodox, with whom they were otherwise identical. Of these four factions of Hungarian Judaism, all of which, however, retained the same fundamental religious principles, two organized a central office at Pesth: those that adopted the regulations of the congress instituted a "central bureau"; while the Orthodox party established an "executive commission."

In the midst of these dissensions, which weakened Judaism and impaired its prestige, the Theological Seminary at Budapest (as the incorporated towns of Buda and Pesth were now called) was opened Oct. 4, 1877, in spite of the bitter opposition of the Orthodox party. Its body of professors, some of whom are among the foremost Jewish scholars, as well as the students who have received their training there, have justified the expectations of its founders.

Map of Hungary Showing Chief Centers of Jewish Population, 1901.

After the Hungarian Jews were finally emancipated they endeavored to have their faith duly recognized as one of the legally acknowledged religions of the country. Their demand, which had already been voiced by the congress, and as early as 1848 by Leopold Löw, was frequently brought up by the Jewish central bureau and continued to form a standing subject of discussion in the Jewish press and by public men. On April 26, 1893, Minister of Public Worship Count Albin Csáky sent a bill acceding to the demand to the lower house, which in the following year passed it almost unanimously. The upper house, after twice rejecting it, finally passed it May 16, 1896. The law (article xlii. of the Laws of the Parliament of 1895) reads: "The Jewish religion is hereby declared to be a legally recognized religion."

Since their emancipation the Jews have taken an active part in the political, industrial, scientific, and artistic life of Hungary. In all these fields they have achieved prominence. They have also founded great religious institutions. Their progress has not been arrested even by anti-Semitism, which first developed in 1883 at the time of the Tisza-Eszlár accusation of ritual murder.

HUNTING: Pursuit of wild game; the common means of obtaining food before the pastoral or agricultural stage of development. The Hebrews of the Biblical age, however, seem to have passed this stage, as the heroes of Biblical story (Abraham, Jacob, Joseph, David) are invariably regarded as shepherds. Hunting was at that time regarded as something foreign. Nimrod was "a mighty hunter before the Lord" (Gen. x. 9), and Esau, as a cunning hunter, is contrasted with Jacob (Gen. xxxv.). Yet the pursuit of wild game was frequent even after the Israelites had settled in Canaan (comp. Lev. xvii. 13). Provision was made for the undisturbed use of the timber-lands by the beasts of the field in Sabbatical years (Ex. xxiii. 11; Lev. xxv. 7). Many wild animals, like the hart, roebuck, chamois, and antelope, were used for food and regarded as clean. A few dangerous beasts of prey, like the bear and the lion, had their habitats in Palestine, and means were taken to destroy them, as shown in the well-known instances of Samson and David. Pitfalls as well as nets were employed to entrap the lion (Ezek. xix. 4, 8); bows and arrows (Gen. xxvii. 3) as well as the snare (Ps. xci. 3) were used against game. Nets were employed also to capture the gazel (Isa. xxxi. 1). Other traps were also utilized (Ps. xcii. 3; II Sam. xxiii. 15). It is doubtful whether Prov. xii. 27 refers to hunting as a sport or as a means of livelihood, though the term "ẓedo" seems to imply that part of the food of the Hebrews was derived from the chase.

Hunting is not often mentioned after Bible times, and Herod's proficiency in this direction (Josephus, "B. J." i. 20, § 13) may have been a result of his Hellenistic tendencies. Horses were used regularly for the chase (*idem*, "Ant." xv. 7, § 7; xvi. 10, § 3). Few references to hunting occur in the Talmud (B. B. 75a; Ḥul. 60b; 'Ab. Zarah 18b). Objection to hunting seems to have arisen on the ground that it was cruel, and therefore un-Jewish. "He who hunts game with dogs as Gentiles do will not enjoy the life to come," said Meïr of Rothenberg (Responsa, No. 27). Instances occur of Jews enjoying the chase in medieval times (comp. Zunz, "Z. G." p. 173). In Provence they were even skilled in falconry, and followed the game on horseback (Berliner, "Aus dem Innern Leben," p. 17). An instance is on record in which the Jews of Colchester, in 1267, joined some Gentile neighbors in the pursuit of a doe (Jacobs, "Jewish Ideals," p. 226). One objection to hunting on the part of Jews was due to the fact that, owing to the requirements of the dietary laws, they could rarely enjoy the results of the hunt (S. Morpurgo, Responsa, 66b).

J.

HUPFELD, HERMANN: German Christian Biblical scholar; born at Marburg March 31, 1796; died at Halle April 24, 1866. He was professor of Old Testament exegesis at Marburg from 1825 to 1843, when he succeeded Gesenius at Halle (1843–1866). In his "Die Quellen der Genesis und die Art Ihrer Zusammensetzung von Neuem Untersucht" (1853), Hupfeld, reviving a suggestion of Ilgen (1798), with fresh proofs demonstrated the distinction between E and P, and the independence of J, and showed that the combination of J, E, and P was the work of a redactor. He thus refuted the then current supplementary hypothesis, established the documentary hypothesis, and permanently directed Pentateuch analysis into its present channels. His commentary on the Psalms ("Die Psalmen Uebersetzt und Ausgelegt," 1855–62; later eds., 1867–71 and 1888) is highly esteemed for its grammatical analysis. He wrote also "De Rei Grammaticæ apud Judæos Initiis Antiquissimisque Scriptoribus" (Halle, 1846), on Jewish grammatical writers, and "Commentatio de Primitiva et Vera Festorum apud Hebræos Ratione" (Halle, 1851–64), on the Jewish festivals.

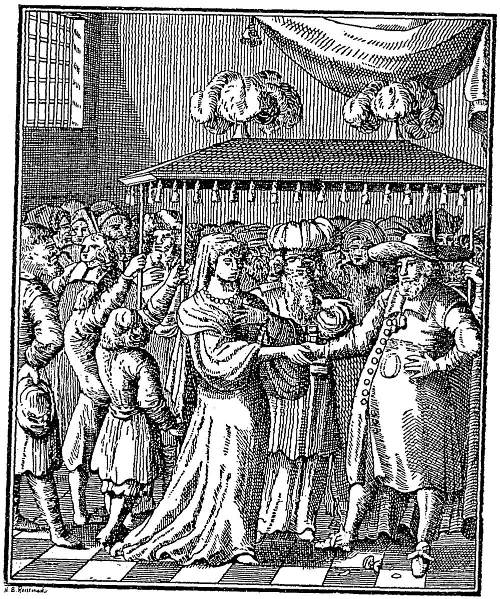
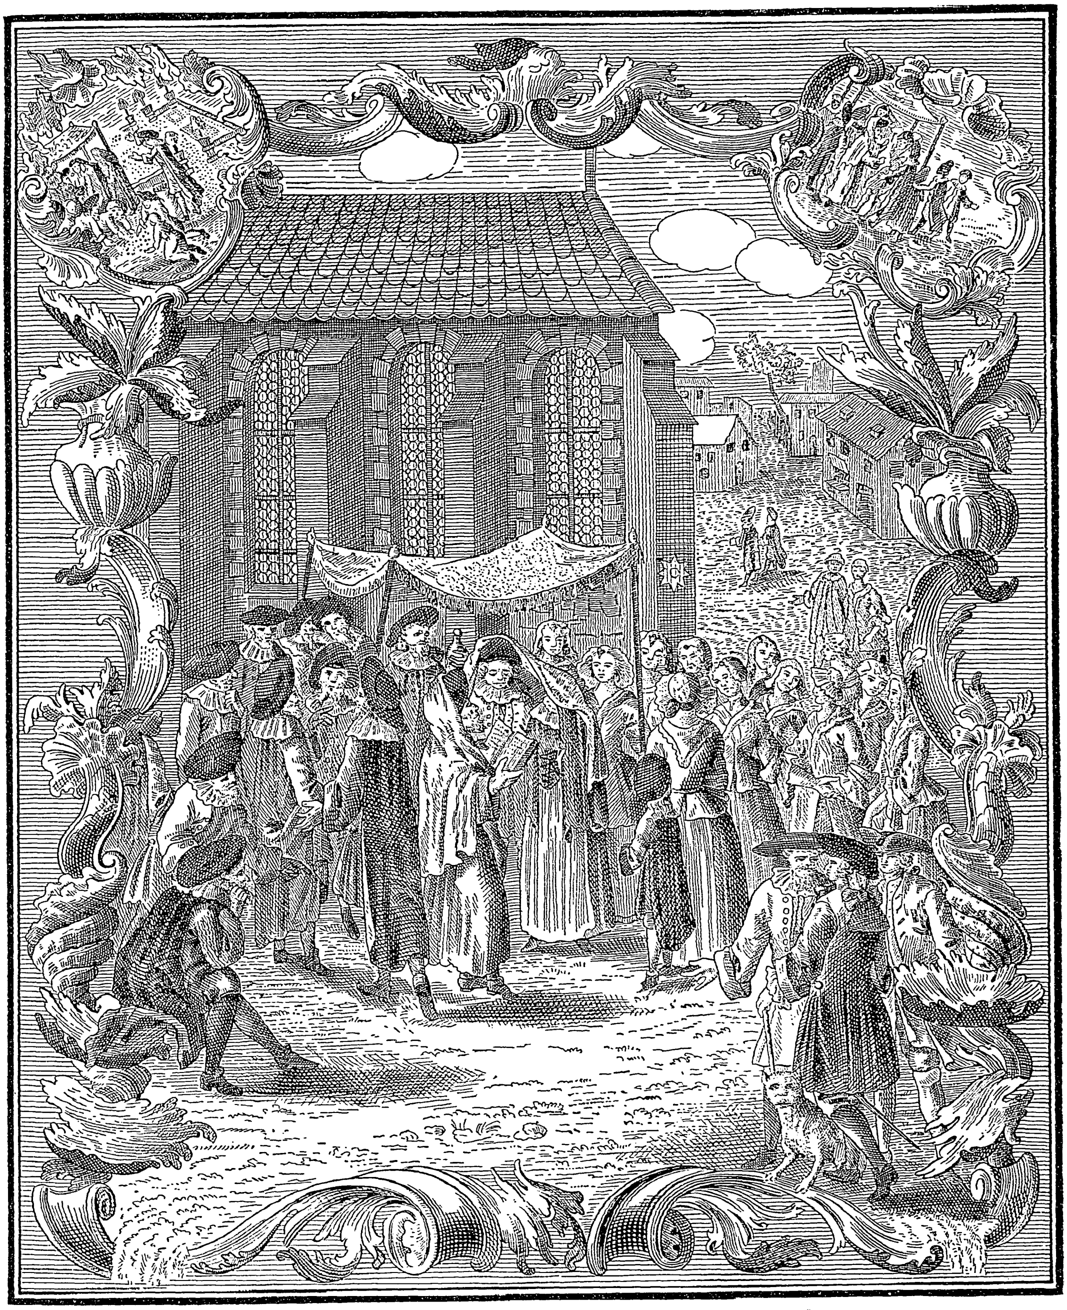
T. K. H. C.

ḤUPPAH: A Hebrew word signifying a canopy (Isa. iv. 5; Lev. R. xxv.; Eccl. R. vii. 11), especially the bridal canopy. Subsequently it became also the term for a wedding. Originally the ḥuppah was the chamber in which the bride awaited the groom for the marital union; hence the Biblical statement that the sun comes out of his tabernacle in the morning "as a bridegroom cometh out of his chamber [ḥuppah]" (Ps. xix. 6 [A. V. 5]; comp. Joel ii. 16). The bridal procession—a festal affair in which the whole town participated—culminated in the ushering into the ḥuppah of the bride and bridegroom, this act signifying the actual surrender of the daughter by her father to the man who was henceforth to be her lord as well as her husband (Tobit viii. 4; Ḳid. 5a; Yer. Ket. iv. 7, 28d; Maimonides, "Yad," Ishut, x. 1-2). Before entering the ḥuppah the bridegroom had to recite the seven nuptial benedictions (Tobit viii. 5; Ket.



Ḥuppah, or Wedding-Baldachin, Among Dutch Jews, Seventeenth Century.
(From Leusden, "Philologus Hebræo-Mixtus," Utrecht, 1657.)

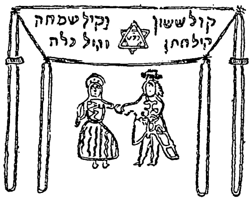
7b; "Yad," *l.c.* 4; Shulḥan 'Aruk, Eben ha-'Ezer, 34, 1). Outside the ḥuppah (in former times inside) the groomsmen and bridesmaids stood as guards awaiting the good tidings that the union had been happily consummated with reference to Deut. xxii. 17 (see Yer. Ket. i. 25a; Tan., Ḳoraḥ, ed. Buber, p. 96; Pirḳe R. El. xii.), while the people indulged in dancing, singing, and especially in praises of the bride (comp. John iii. 29; Matt. xxv. 1-13). The bride had to remain in the ḥuppah for seven days, as long as the wedding festivities lasted (Judges xiv. 15); hence the name of these festivities, "the seven days of her" or "of the ḥuppah" (Pesiḳ. 149b).



Ḥuppah, or Wedding-Baldachin, Among German Jews, Eighteenth Century.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

The wedding party was called "bene ḥuppah," and could dispense with the performance of other religious obligations, such as sitting in the sukkah (Yer. Suk. ii. 53a). To it belonged, besides the groomsmen ("shushbinim"), the respective fathers of the bride and bridegroom. The bridegroom's father was required to build and adorn the bridal canopy for his son and to lead him into it (Sanh. 108a; Ber. 25b; Lev. R. xx.). At times the mother built the ḥuppah for her son (Soṭah 12b). When a young man reached his eighteenth year the father was obliged to lead him into the ḥuppah (Ab. v. 21). At the circumcision ceremony the people blessed the father, wishing him to be privileged also to lead his son to the ḥuppah (Yer. Ber. ix. 14a).

The ḥuppah was a baldachin made of precious purple cloth adorned with golden jewels of a moon-like shape (Soṭah 49b; Yer. Soṭah ix. 24c); later it was in the form of a bower, made of roses and myrtles ("Tanya," 90). For Adam's wedding with Eve God built, one above the other, ten (Kol Bo lv. reads "seven") baldachins of precious stones (Pirḳe R. El. xii.), the angels keeping watch outside and dancing (comp. Gen. R. xviii.).



Representation of a Ḥuppah.
(From a sampler.)

When in the course of time the character of the wedding ceremony changed, the ḥuppah changed with it, and was transformed into a portable canopy resting on four poles carried by four youths. Under it the bridal couple stood during the performance of the wedding ceremony by the rabbi (Shulḥan 'Aruk, *l.c.*), the real idea of the marital union being expressed symbolically by the spreading of the ṭallit over them (Ibn Yarḥi, "Ha-Manhig," pp. 109–110; Kol Bo lxxv.; Shulḥan 'Aruk, Eben ha-'Ezer, lv. 1). Even this essential custom, expressing the symbolic union, has been discarded by many Orthodox Jews, while the Reform rabbis have given up the ḥuppah, regarding it as an empty form void of meaning. The portable canopy came into use owing to the fact that formerly weddings took place in front of the synagogue, as it was considered to be especially auspicious to be married under the canopy of heaven (Jacob Mölin, "Minhage Maharil," ch. "Minhag ha-Nissu'im"; Mordecai Jafe, in "Lebush," Hilk. Ḳiddushin, p. 59). See MARRIAGE CEREMONIES.

K.

HUR (חור).—1. Biblical Data: Man of Judah, the grandfather of Bezaleel, the chief artificer of the Tabernacle (Ex. xxxi. 2, xxxv. 30, xxxviii. 22). According to the fuller genealogy in I Chron. ii. 18–20, he was the first-born son of Ephrath, the second wife of Caleb ben Hezron. Besides Uri, Hur had three other sons, founders of Kirjath-jearim, Beth-lehem, and Beth-gader (I Chron. ii. 50, 51). In I Chron. iv. 4, however, Hur is called the father of Beth-lehem. He is first mentioned with Moses and Aaron on the occasion of the battle with Amalek at Rephidim, when he aided Aaron to uphold the hands of Moses (Ex. xvii. 10, 12); he is again mentioned as having, with Aaron, been left in charge of the people while Moses ascended Mount Sinai (Ex. xxiv. 14). According to Josephus ("Ant." iii. 2, § 4), Hur was the husband of Miriam; in the Targum to I Chron. ii. 19, iv. 4, Hur's mother, Ephrath, is identified with Miriam. There is a tendency among modern critics to regard the Hur associated with Moses as another than Hur, grandfather of Bezaleel.

E. G. H. M. SEL.

——**In Rabbinical Literature:** Hur was the son of Caleb, and when Moses was about to be taken by God, he appointed his nephew Hur, with Aaron, as leader of the people. While Moses tarried on the mountain, the people came to Aaron and Hur with the request to make them a god in the place of Moses (Ex. xxxii. 1). Then Hur, remembering his lineage and high position, rose up and severely reproved the people for their godless intentions; but they, aroused to anger, fell upon him and slew him. The sight of his lifeless body induced Aaron to comply with the wishes of the people, as he preferred to commit a sin himself rather than see the people burdened with the crime of a second murder (Pirḳe R. El. xliii.; Ex. R. xli. 7; Lev. R. x. 3; Num. R. xv. 21; Tan., ed. Buber, ii. 113; Sanh. 7a; comp. also Ephraem Syrus to Ex. xxxii. 1). As a reward for Hur's martyrdom, his son, Bezaleel, was the builder of the Tabernacle; and one of his descendants was Solomon, who had the Temple built (Ex. R. xlviii. 5; comp. Soṭah 11b).

J. L. G.

2. The fourth of the five kings of Midian who were slain with Balaam (Num. xxxi. 8), and who are described in Josh. xiii. 21 as "princes of Midian" and "dukes of Sihon." **3.** Father of the Rephaiah who ruled "the half part of Jerusalem," and assisted Nehemiah in the repair of the walls (Neh. iii. 9).

E. G. H. M. SEL.

HUREWITZ, ISRAEL (Z. LIBIN): Russian-American playwright; born Dec., 1872, at Gorki, government of Moghilef. Between 1885 and 1888 he received some secular tuition from his brother, Ḥayyim Dob Hurwitz, the Hebrew economist and journalist. After working at a trade for some years, he emigrated to London (1892), and nine months later went to the United States. There he made his way, step by step, to a well-earned reputation as a writer. In 1902 his "Yidishe Sketches" appeared, under the pseudonym "Z. Libin," depicting with accuracy and vividness many phases of Russian-Jewish life in New York. In 1898 he successfully essayed writing plays for the Judæo-German stage of New York. Since then he has been writing regularly and successfully for that stage. He has produced: "Dovid und Zain Tochter" (1899); "Die Gebrochene Schwue" (1900); "Die Idishe Medea" (1901); and "Gebrochene Hertzer" (1903).

H. R. M. GAR.

HURWITZ. See HORWITZ.

HURWITZ, ADOLF: German mathematician; born March 26, 1859, at Hildesheim; studied at Munich, Berlin, and Leipsic. In 1882 he became privat-docent at Göttingen; in 1884 he was appointed assistant professor at the University of Königsberg; in 1892, professor at the Polytechnicum of Zurich. He has contributed articles to the mathematical periodicals, especially to the "Mathematische Annalen," "Acta Mathematica," and the "Nachrichten" of the Gesellschaft der Wissenschaften zu Göttingen, of which society he was elected a corresponding member in 1892. S.

HURWITZ, ḤAYYIM DOB: Russian economist and journalist; born about 1864 at Gorki, government of Moghilef. His father, a teacher of religion, destined him for a rabbinical career, but the boy's inclination led him to modern studies. After attending the local public schools, Hurwitz drifted, about 1880, to Berlin and Vienna, where he studied languages and general philosophy. In 1898 he began to attract attention by his occasional sketches of Jewish life in Russia, in various Hebrew periodicals, especially in "Ha-Shiloaḥ" (1898-99). In 1900 appeared his "Ha-Mamon" (Warsaw), in two volumes, a profound exposition, in clear Hebrew, of the development and extension of the existing economic system. During the year 1902 he was engaged as assistant editor of the "Volksblatt," a Judæo-German journal published at Warsaw, and at the beginning of 1903 became subeditor of "Der Fraind," a Yiddish daily published at St. Petersburg.

H. R. M. Gar.

HURWITZ, ḤAYYIM BEN JOSHUA MOSES ABRAHAM HA-LEVI: Russian rabbi in the seventeenth and eighteenth centuries. He was the author of: "Sefer Mayim Ḥayyim," explanations of the Pentateuch and the five Megillot (Dyhernfurth, 1690); "Sefer Mayim Ḥayyim Sheni," supplement to the above-mentioned work (*ib.* 1703); "Sefer Naḥalat Ḥayyim," novellæ on several Talmudical treatises, with an index (Wilmersdorf, 1713; 2d ed., without index, 1722); "Sefer Naḥalat Ḥayyim Sheni," commentaries on the Pentateuch (Wilmersdorf, 1714).

Bibliography: Wolf, *Bibl. Hebr.* i., iii., No. 612; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 102; Fürst, *Bibl. Jud.* i. 409; Steinschneider, *Cat. Bodl.* col. 827; Benjacob, *Oẓar ha-Sefarim*, pp. 324, 396; Fuenn, *Keneset Yisrael*, i. 347.

H. R. M. Sc.

HURWITZ, HYMAN: Professor of Hebrew and author; born 1770; died 1844. He was a native of Poland, in which country he acquired great proficiency in Biblical and Talmudical lore. He then went to England, and, making rapid progress with the English language, was soon employed as teacher in a Christian academy, where he studied science and the classics. He gained many friends, who in 1799 assisted him in establishing a seminary for Jewish youth, which was called "The Highgate Academy." In 1806 he produced an "Introduction to Hebrew Grammar," in which his critical and intimate knowledge of Hebrew is shown to advantage. This was followed by a Hebrew grammar in two parts, a third edition of which appeared in 1841. Later he published "Hebrew Tales," a selection from the writings of the ancient sages. This work was translated into various languages; and a later edition was produced at Edinburgh in 1863, nearly twenty years after his death. In 1821 he published "Vindiciæ Hebraicæ," a work in which he blended much erudition and elegance of style.

Hurwitz retired from active teaching in 1821. A few years afterward he was elected to the chair of Hebrew in University College, London.

Bibliography: *Voice of Jacob*, Aug. 2, 1844.

J. G. L.

HURWITZ, JUDAH BEN MORDECAI HA-LEVI: Russian physician and author; born at Wilna in the first half of the eighteenth century; died at Grodno Nov. 12, 1797. He graduated in medicine from the University of Padua, traveled extensively through Europe, and settled in Wilna, where he was appointed physician to the Jewish community. Later he practised medicine at Ponedeli, Zhagory, and Mitau, and finally settled in Grodno. In 1765 he traveled through Germany and to Amsterdam.

He wrote: "Sefer 'Ammude Bet Yehudah," on moral philosophy (Amsterdam, 1765: this work was approved by Moses Mendelssohn and Hertz Wessely; appended to it is "Gan 'Eden ha-Ma'amin," on the thirteen articles of belief by Maimonides); "Ẓel ha-Ma'alot," 360 ethical sentences (Königsberg, 1764; 2d ed., Dubno, 1796); "Sefer Kerem 'En Gedi," commentary on "Ḥad Gadya" (Königsberg, 1764; 2d ed., Dubno, 1796); "Sefer Maḥberet Ḥayye ha-Nefesh," on the immortality of the soul (Poretchye, 1786); "Sefer Megillat Sedarim," on the differences between cabalists, Talmudists, and philosophers (Prague, 1793); "Hekal 'Oneg," moral sentences (Grodno, 1797). He also published a Hebrew poem on the occasion of the opening of the government gymnasium in Mitau (1775). The library of this gymnasium preserves a number of manuscript Hebrew poems of his, chiefly translations of Lichtwer's fables and of other German poems.

Bibliography: H. Rosenthal, in *Ha-Meliẓ*, 1862, p. 207; Fuenn, *Keneset Yisrael*, p. 394; Delitzsch, *Zur Gesch. der Jüdischen Poesie*, pp. 85, 114, Leipsic, 1836; Recke and Napierski, *Allg. Schriftsteller-Lexikon*, etc., iii. 53, Mitau, 1831.

H. R.

HURWITZ, LAZAR LIPMAN: Russian scholar; born 1815; died at Wilna Oct. 21, 1852. He acted for many years as private instructor at Wilna, and then became teacher in a public school at Riga. Later he was appointed by the government head master in the rabbinical school of Wilna.

With S. J. Fuenn, Hurwitz issued a periodical entitled "Pirḥe Ẓafon," devoted to Jewish history, literature, and exegesis; the first number appeared in 1841, the second in 1844. He was the author of the following works: "Ḥaḳirot 'al Sefer Iyyob," studies on Job, published in Jost's "Ẓiyyon," ii. (1842); "Ḳorot Toledot Meleket ha-Shir weha-Meliẓah," history of ancient Jewish poetry, published in "Pirḥe Ẓafon."

Bibliography: Zeitlin, *Bibl. Post-Mendels.* p. 151.

H. R. I. Br.

HURWITZ, MOSES B. ISAAC HA-LEVI: Russian preacher; native of Krozh, government of Kovno, Russia; died in Wilna Oct. 25, 1820. He was on intimate terms with Elijah of Wilna, and was the teacher of his sons. He became "maggid," or preacher, of Wilna, and occupied that position for many years, until he lost his voice. He was succeeded by R. Ezekiel Feiwel of Dretchin (about 1811). His son Ḥayyim was the father of Lazar Lipman Hurwitz. The work entitled "Mo'ade ha-Shem" (Wilna, 1802), on the Jewish calendar, is supposed to be by Hurwitz, but the evidence for the supposition is very slight.

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, pp. 247, 288.
H. R. P. Wi.

HURWITZ, PHINEHAS ELIJAH: Hebrew writer; born in Wilna; died in Cracow in 1812. While a youth he went to Buchach, a hamlet in Galicia, where he began his "Sefer ha-Berit," which afterward became widely known. Nachman Reiss, a wealthy philanthropist in Lemberg, enabled him to complete his work, which he published in Brünn, Moravia, in 1797. Although it appeared anonymously, its success was remarkable; it found its way to the remotest parts of Europe, and met a ready sale even in Egypt, Algeria, and Morocco. A Christian publisher, tempted by its popularity, took advantage of its anonymity to issue an unauthorized and garbled edition of the work in Prague (1799). This prompted Hurwitz to issue a new edition at Zolkiev (1807), with supplementary notes and textual alterations, which was republished without change in 1811 by the publishing firm of Romm in Wilna, and about sixty years later in Warsaw. Its popularity is due to the fact that it represents a singular combination of material, appealing to readers of varying characters and opinions. It is an encyclopedic work in two parts: the first part contains a series of tracts on natural science and philosophy, chemistry, anatomy, physics, cosmography, and metaphysics; the second part, entitled "Dibre Emet," is a conglomeration of mysticism, theology, and ethics, and discusses obscure cabalistic problems and the mysteries of divine revelation, etc. Hurwitz left other works in manuscript.

Bibliography: *Voskhod*, Oct., 1888.
H. R. M. R.

ḤUSAIN, IMMANUEL BEN MENAHEM SEFARDI IBN (ן' חסין): Talmudist of the sixteenth century; author of "Kelale ha-Gemara," rules of the Gemara, published in the collection of Abraham ibn 'Aḳra ("Sefer me-Harare Nemerim," Venice, 1599). This small work is divided into four chapters: the first two are on the acquisition of the right method of Talmudical study and on halakic phraseology and technical terms; the last two chapters deal with the study of the Talmudical commentaries, especially that of Rashi. The author advises the pupil not to consult the commentaries on any Talmudic passage until he thoroughly understands the passage in question. He quotes the "Sefer Keritut" of Simson of Chinon and the "Halikot 'Olam" of Joshua ha-Levi of Toledo (15th cent.). As regards the spelling of the name חסין see Steinschneider in "J. Q. R." x. 539.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 282; Steinschneider, *Cat. Bodl.* cols. 665, 1058; Benjacob, *Oẓar ha-Sefarim*.
S. M. Sc.

HUSBAND AND WIFE.—Legal Relations: As a punishment for her initiative in the first sin, the wife is to be subjected to her husband, and he is to rule over her (Gen. iii. 16). The husband is her owner ("ba'al"); and she is regarded as his possession (comp. Ex. xx. 17). This was probably the case in early times, although women were frequently consulted in matters of importance, and occasionally exerted an influence in national affairs (see Woman). Here, as elsewhere, popular sentiment and practise soon took precedence over legal prescriptions; and in later codes the position of the Jewish wife became well defined, and was often superior to that of the women of many other nations.

Nowhere in the Bible are the duties of the husband to the wife explicitly stated. Incidentally, three obligations that the husband owes to his wife are mentioned in Ex. xxi. 10 as being self-understood; namely, the provision of food and of raiment, and cohabitation. Upon this casual reference the Rabbis base an elaborate system of duties and of rights which accrue to the husband in relation to his wife. Besides the three obligations mentioned above, the rabbinic law imposes on the husband four, and also restricts his privileges to four. These duties are incumbent upon him, whether they are stipulated at the time of marriage or not.

The additional duties are: (1) To deliver a "ketubah" (marriage contract) providing for the settlement upon the wife, in the case of his death or of divorce, of 200 zuz, if she is a virgin at marriage, or of 100, if she is not. This document includes three conditions (תנאי כתובה) which provide for the sustenance of the wife and the children after the husband's death. These are: (*a*) that the wife shall obtain her support from her deceased husband's estate as long as she remains in his house; (*b*) that their daughters shall be supported from the estate until they reach the age of maturity or until they become betrothed; (*c*) that the sons shall inherit their mother's ketubah over and above their portion in the estate with the children of other wives. (2) To provide medical attendance and care for her during sickness. (3) To pay her ransom if she be taken captive. (4) To provide suitable burial for her (Ket. 46b *et seq.*; Maimonides, "Yad," Ishut, xii. 2; Shulḥan 'Aruk, Eben ha-'Ezer, 69).

Support of Wife.

The husband must allow for the support of his wife as much as comports with his dignity and social standing. "She ascends with him, but does not descend," is the Talmudic principle; that is to say, she is entitled to all the advantages of his station in life without losing any of those which she enjoyed before marriage (Ket. 48a, 61a). The poorest man must furnish his wife with bread for at least two meals a day; with sufficient oil for eating and for lighting purposes, and wood for cooking; with fruit, vegetables, and wine where it is customary for women to drink it. On the Sabbath-day he must furnish her with three meals consisting of fish and meat; and he must give her a silver coin ("ma'ah") every week for pocket-money. If he can not afford to give her even that much, he is, according to some, compelled to grant her a bill of divorce (see "Ḥatam Sofer" on Eben ha-'Ezer, 131, 132). Others think that he should hire himself out as a day-laborer to provide for his wife. If he refuses to support her, the court compels him to do so (Ket. 77a).

The wife is to receive her board at her husband's table; and in the opinion of most authorities he can not send her away from his table against her will, even if he gives her sufficient money for all her requirements. She can, however, leave his house, either if he lives in a disreputable neighborhood or if he maltreats her; and in such cases he is obliged to support her wherever she takes up her abode. If the husband leaves her for some time, the court allows her support from his property; and even if she sells his property for her support without consulting the authorities, the sale is valid. If she borrows money for her actual support during his absence, the husband has to pay the debt on his return; but if some one of his own free will gives her money for her support, he "puts his money on the horns of a deer," *i.e.*, he can not collect it from the husband. The same law applies if the husband becomes insane ("Yad," *l.c.* xii. 10–22; Eben ha-'Ezer, 70).

Clothing and Lodging.

The husband's duty to furnish raiment to his wife is also regulated by his station and by local custom. He is obliged to provide a home, which must be suitably furnished in accordance with his position and with custom. Besides furnishing her with the proper garments suited to the seasons of the year, and with new shoes for each holy day, he must also provide her with bedding and with kitchen utensils. She must also be supplied with ornaments and perfumes, if such is the custom. If he is unable to provide his wife with a suitable outfit, he is compelled to divorce her (Ket. 64b; "Yad," *l.c.* xiii. 1–11; Eben ha-'Ezer, 73). On the duty of the wife to follow her husband when he wishes to change his abode see Domicil.

The duty of cohabitation is regulated by the Rabbis in accordance with the occupation in which the husband is engaged (Ket. 61b). Continued refusal of cohabitation constitutes a cause for divorce ("Yad," *l.c.* xiv. 1–16; Eben ha-'Ezer, 76, 77; see Ketubah).

The husband must defray all medical expenses in case of his wife's illness. If she suffers from a disease which may be prolonged for many years, although legally he may pay her the amount fixed in her ketubah and give her a bill of divorce, such action is regarded as inhuman, and he is urged to provide all that is necessary for her cure (Ket. 51a; "Yad," *l.c.* xiv. 17; "Maggid Mishneh," *ad loc.*; Eben ha-'Ezer, 79; "Be'er Heṭeb," § 5; comp. "Pithe Teshubah" to 78, 1, concerning a case where sickness follows a fault of her own).

Ransom.

The husband is obliged to ransom his wife from captivity, even when the expense is far above the amount promised her in the marriage settlement. Ordinarily, it is the law not to pay for captives more than their market value as slaves, so as not to encourage pirates and officials in their nefarious practise (Giṭ. 45a); but according to some, in the case of the capture of his wife the husband must, if necessary, expend all his belongings for her ransom. The priest whose wife has been taken captive, although he can not afterward live with her (see Priest), is still obliged to pay her ransom, to restore her to her father's house, and to pay her the amount of her ketubah. If they were both taken captive, the court may sell part of his property and ransom her first, even though he protests (Ket. 51a; "Yad," *l.c.* xiv. 18–22; Eben ha-'Ezer, 78; Shulḥan 'Aruk, Yoreh De'ah, 252, 10).

If she die before him, he must provide for her burial according to the custom of the land and according to his position. He must hire mourners, if such be the custom, erect a tombstone, and make such other provisions as custom may demand. If he refuse to do so, or if he be absent, the court may sell part of his property to defray the burial expenses (Ket. 46a; "Yad," *l.c.* xiv. 23, 24; Eben ha-'Ezer, 89).

The rights of the husband are as follows: He is entitled (1) to all the wife's earnings, (2) to all her chance gains, and (3) to the usufruct of her property, and (4) he becomes her sole heir at her death (this last principle, however, was modified in the Middle Ages in various ways).

Married Women's Duties.

The husband's right to his wife's earnings is in consideration of his duty to support her; hence if she wishes to support herself, she need not deliver her earnings to him. Yet he can not compel her to live on her earnings. The wife has to do all the housework, such as baking, cooking, and washing, as well as nurse her children. If she has twins, the husband has to provide a nurse for one, while she nurses the other (Ket. 59b). If she brought him a large dowry, she need not do any work in the house, except such as tends to the ease and comfort of her husband and as is of an affectionate nature, viz., prepare his bed, serve at the table, and so forth. At all times, however, she must do something; for "idleness leads to immorality." Raising animals or playing games is not regarded as an occupation (Ket. 52b, 61b; "Yad," *l.c.* xxi.; Eben ha-'Ezer, 80).

For the husband's right in the usufruct of his wife's property and for his right of inheritance see Dowry and Inheritance.

Besides these positive legal enactments, Talmudic literature abounds with maxims and precepts regarding the attitude of the husband toward his wife. He shall love her as himself and honor her more than himself (Sanh. 76b; Yeb. 62b). "If thy wife is small, bend down and whisper into her ear," was a common saying among the Rabbis; meaning that one should take counsel with his wife in all worldly matters (B. M. 59b; comp. Midr. Leḳaḥ Ṭob to Num. xvi.). He shall not afflict her; for God counts her tears. One who honors his wife will be rewarded with wealth (B. M. 59b). The husband shall not be imperious in his household (Giṭ. 6b). God's presence dwells in a pure and loving home (Soṭah 17a). The altar sheds tears for him who divorces his first wife; and he is hated before God (Giṭ. 90b). He who sees his wife die before him has, as it were, seen the destruction of the Temple: his world is darkened; his step is slow; his mind is heavy. The wife dies in the husband's death; he in hers (Sanh. 22a).

The rights of the wife are implied in the husband's duties, while her duties are mainly comprised in his rights. She should not go out too much (Gen. R. lxv. 2), and should be modest even if alone with her husband (Shab. 140b). The greatest praise that can be said of a woman is that she fulfils the wishes of her husband (Ned. 66b). See also MARRIAGE.

HUSBANDRY. See AGRARIAN LAWS; LANDLORD AND TENANT; SABBATICAL YEAR.

HUSHAI (**חושי**): Companion of David, generally called the ARCHITE. When David was pursued by Absalom he sent Hushai to frustrate Absalom's plans. Hushai pretended adherence to the cause of Absalom, and his advice, preferred to that of Ahithophel, caused the ruin of Absalom (II Sam. xv. 32-34, xvi. 16-18 *et seq.*). The Hushai whose son was one of Solomon's commissaries (I Kings iv. 16) is to be identified with David's companion.

PORTION OF AUTOGRAPH LETTER OF ḤUSHIEL BEN ELHANAN.

(From the Cairo Genizah by courtesy of Prof. S. Schechter.)

ḤUSHIEL BEN ELHANAN: President of the bet ha-midrash at Kairwan toward the end of the tenth century. He was born probably in Italy. According to Abraham ibn Daud, he was one of the four scholars who were captured by Ibn Rumaḥis, an Arab admiral, while voyaging from Bari to Sebaste to collect money "for the dowries of poor brides." Ḥushiel was sold as a slave in North Africa, and on being ransomed went to Kairwan, an ancient seat of Talmudical scholarship (Harkavy, "Teshubot ha-Ge'onim," Nos. 199, 210). There his Talmudical knowledge gained for him the position of president of the bet ha-midrash (Neubauer, "M. J. C." i. 67 *et seq.*)—probably after the death of Jacob ben Nissim. But an autograph letter from Ḥushiel (discovered and published by S. Schechter, "J. Q. R." xi. 643) addressed to Shemariah ben Elhanan, chief rabbi of Cairo (supposed by Ibn Daud to have been captured with Ḥushiel), tends to show that Ḥushiel merely went to visit his friends in Mohammedan countries, and was retained by the community of Kairwan.

There is considerable difference of opinion in regard to Ḥushiel's nativity. Grätz, Harkavy, and D. Kaufmann claim that he, with the other three scholars, came from Babylonia; while Rapoport, Weiss, and Isaac Halévy give Italy as his birthplace. This latter opinion is now confirmed by the wording of the above-mentioned letter, in which Ḥushiel speaks of having come from the country of the "'arelim," meaning "Christian" countries. According to another but unreliable source (Menahem Meïri's "Bet ha-Beḥirah"; see Neubauer in "M. J. C." ii. 225), he came from Spain. Two of Ḥushiel's pupils were his son Hananeel and Nissim ben Jacob (see Weiss, "Dor," iv. 265, note 1). According to the genizah letter, Ḥushiel seems to have had another son, named Elhanan, if "Elhanan" and "Hananeel" are not identical.

It is not known whether Ḥushiel wrote any book; but a few of his sayings have been transmitted by his pupils. Thus Nissim ben Jacob reports in his "Mafteaḥ" (p. 13) that the story which the Talmud, without giving any particulars, mentions as having been related by R. Papa (Ber. 8b), was transmitted to him (Nissim) in full by Ḥushiel. Ḥushiel's son Hananeel quotes explanations in his father's name (see "'Aruk," *s.v.* בר; Isaac ibn Ghayyat, "Hilkot Lulab," ed. Bamberger, p. 113).

Ḥushiel was certainly one of the greatest, if not the greatest, of the Talmudical teachers of the tenth century; and Samuel ha-Nagid, recognizing his importance and value, ordered that memorial services in his honor should be celebrated in Granada, Lucena, and Cordova. Samuel also wrote a letter of condolence to Ḥushiel's son Hananeel. This has been published by Firkovich in "Ha-Karmel," viii. ("Ha-Sharon," No. 31, p. 245), and in Berliner's "Magazin," v. 70 *et seq.* ("Oẓar Ṭob," p. 64), the German translation being by David Kaufmann. The letter, ending with a Hebrew poem in the "Hazaj" meter, and written in a very difficult style, praises Ḥushiel's knowledge and virtue, and compliments Hananeel.

S. S. M. Sc.

HUTH, GEORG: German Orientalist and explorer; born Feb. 25, 1867, at Krotoschin, Prussia. In 1885 he entered the University of Berlin, and he graduated at the University of Leipsic (Ph.D.) in 1889. In 1891 he established himself at Berlin University as lecturer in Central Asiatic languages and in Buddhism. In 1897 he undertook a journey to Siberia for the purpose of studying Tungusic, receiving a subvention from the Imperial Academy of Sciences of St. Petersburg. He went to eastern Turkestan with the Turfan expedition of the Königliches Museum für Völkerkunde of Berlin, in 1902, and spent the following year in western Turkestan studying Turkish dialects and folk-lore. He has published, among others, the following works: "Die Zeit des Kālidāsa" (Berlin, 1889); "The Chandoratnākara of Ratnākaraçānti" (Sanskrit text with Tibetan transl.), a work on Sanskrit prosody (*ib.* 1890); "Gesch. des Buddhismus in der Mongolei: aus dem Tibetischen des 'Jigs-med-nam-mkha" (vol. i., Tibetan text; vol. ii., German transl., Strasburg, 1892–96); "Die Inschriften von Tsaghan Baišing," Tibet-Mongolian text with linguistic and historical notes, printed at the expense of the Deutsche Morgenländische Gesellschaft (Leipsic, 1894); "Die Tungusische Volkslitteratur und Ihre Ethnologische Ausbeute," in the Bulletin of the St. Petersburg Academy of Sciences (1901). S.

HUTTEN, ULRICH VON: Poet and satirist; born in the castle of Steckelberg, near Fulda, April 21, 1488; died on the Isle of Ufnau, Lake Zurich, Aug. 29, 1523. As a humanist and one of the strongest champions of the Reformation wielding a sharp and vigorous pen in defense of religious freedom, he sided with Reuchlin in his literary feud with Pfefferkorn, Hoogstraten, and the Dominicans of Cologne. When Reuchlin's adversaries, accusing him of heresy and partiality toward the Jews, failed in their efforts to have his "Augenspiegel," together with the Talmud and other Jewish books, burned by decree of the theological faculty of Mayence, Hutten hailed Reuchlin's victory in a satirical poem. This struggle of Reuchlin against obscurantism and intolerance inspired Hutten to undertake the task of freeing Germany from the yoke of ecclesiastical tyranny and of opening the way for freedom of faith and learning. In a Latin satire he castigated the corruption and venality at the court of Pope Leo X., before whom Reuchlin and Hoogstraten were summoned to appear. When the accusation against Reuchlin was pending before the council at Rome, and the long delay of the decision had brought him to despair, Hutten, who then happened to be in Italy, sent him words of encouragement and inspired him with the hope of a speedy success. In "Exclamatio in Sceleratissimum Joannem Pfefferkorn" (a poem) he depicted the misdeeds and crimes for which a baptized Jew named "Pfaff Rapp" was executed at Halle. As it was thought that "Pfefferkorn" was his real name, Hutten took occasion to satirize this base persecutor of his former brethren.

D. S. Man.

ḤUYAYY IBN AKHṬAB: Chief of the Banu al-Naḍir; executed at Medina March, 627. Ḥuyayy was a courageous warrior and the most inveterate enemy of Mohammed, so that Ibn Hisham, Mohammed's biographer, calls him "the enemy of Allah." He was also a learned man, and on one occasion had a discussion with Mohammed upon the mystical letters beginning some of the suras in the Koran. At first, when the Banu al-Naḍir were located at Medina, Ḥuyayy's hostility to Mohammed was not pronounced, and when Abu Sufyan, the Ḳuraiẓite leader and an enemy of Mohammed, presented himself before Ḥuyayy's house, Ḥuyayy, fearing to compromise himself, refused to admit him. But when the Jews, driven by Mohammed from Medina, settled at Khaibar, Ḥuyayy incited them, with the Arab tribes of Ḳuraish and Ghaṭafan, into active revolt against Mohammed. When Ḥuyayy came to Ka'b ibn As'ad, the chief of the Banu Ḳuraiẓa, the latter, having sworn allegiance to Mohammed, hesitated to receive him; but Ḥuyayy convinced him of the danger which threatened the Jews from Mohammed, and induced the Banu Ḳuraiẓa to support him. Later, Mohammed took Ḳamuṣ, the fortress of the Ḳuraiẓites, carried to Medina from seven to eight hundred Jews, among them being Ḥuyayy, and executed them in the market-place. When Ḥuyayy was brought before Mohammed, he said to him: "I reproach not myself for having carried on war against thee." Ḥuyayy's daughter Safiyyah was also captured by Mohammed, and a few months afterward embraced Islam and became a wife of the prophet.

G. M. Sel.

ḤUẒPA: Aramaic word meaning "impudence," used frequently in the Talmud, in late rabbinical literature, and in common parlance. In Biblical Aramaic only the verb חצף is found: it occurs twice (Dan. ii. 15, iii. 22) in the sense of "to be strict" (R. V. "urgent"). In Talmudic literature from the earliest times both the verb ("ḥaẓaf") and the noun ("ḥuẓpa") are used in many legal maxims and moral sayings in the senses respectively of "to be brazen-faced" and "impudence"; for instance, in the sentence. "No man would be so impudent as to fell a tree which is not his or to pick fruit which is not his" (B. B. 33b). If a man signs a document with his father's name only, *e.g.*, "Ben Jacob" instead of "Reuben ben Jacob," the signature is invalid; and the plea that he did so in order to protect his signature against forgery is not accepted, because no one would be so "impudent" as to use his father's name as a ruse (Giṭ. 87b). If a father enters into a marriage contract for his son, the contract is invalid, because a son would not be so "impudent" as to make his father his agent (Ḳid. 45b).

The word "ḥuẓpa" is often used in the Talmud in proverbial sayings also; for example: "In the footprints of the Messiah [before the arrival of the Messiah] impudence will increase" (Soṭah 49b); "Impudence succeeds even with God" (Sanh. 105a). Similarly: "The impudent will defeat the wicked, and naturally then the best of the world" (Yer. Ta'an. 65b), the last phrase, according to Levy ("Neuhebr. Wörterb." *s.v.*), meaning God; "Impudence is a kingdom [*i.e.*, power] without a crown" (Sanh. *l.c.*); "Impudence is a sign of wickedness" (B. M. 83b). In modern literature the word is spelled "chutzpah" and "chuzpe."

HYAMS, ABRAHAM: Beni-Israel physician; died March 20, 1897; son of Hacem Samuel, president of the Beni-Israel School, Bombay. After taking his degree of licentiate in medicine and surgery, Hyams practised as a physician in Bombay, and in addition to a flourishing private practise was from 1889 in charge of the Bohara Sanatorium in that city. He was engaged in the plague hospital, opened in the sanatorium; and it is believed that he contracted the fatal disease while employed in this service.

Hyams was a member of the managing committee of the Beni-Israel School.

Bibliography: *Jew. Chron.* April 16, 1897.

J. G. L.

HYAMS, HENRY MICHAEL: American lawyer; born at Charleston, S. C., March 4, 1806, of English parents; died at New Orleans 1875; educated in Charleston and in New Orleans, to which latter city he went in 1828, together with Judah P. Benjamin, to whom he was related. Hyams studied law at New Orleans, and was admitted to the Louisiana bar in 1830. For some time he was cashier of the Canal Bank at Donaldsonville, La. Later he returned to New Orleans, where he practised law and formed a partnership with B. F. Jonas. He was an original secessionist, and in 1859 was elected lieutenant-governor of Louisiana as a Democrat, serving until 1864. Most of his fortune was swept away by the Civil war, in which he took a very prominent part.

A. I. G. D.

HYENA.—Biblical Data: The translation by the Septuagint of "ẓabua'" (Jer. xii. 9); the rendering of the Vulgate being "avis tincta," and that of the English versions "speckled bird." The rendering of the LXX., which is adopted by most commentators, is supported not only by the Arabic "ḍabu'," but also by the parallel passage (*ib.* xii. 8), which implies that by "ẓabua'" some strong, fierce animal, similar to the lion, is intended (comp. Ecclus. [Sirach] xiii. 18). The striped hyena (*Hyæna striata*) is common in every part of Palestine; and its former frequency is perhaps indicated by the place-name "Zeboim" (I Sam. xiii. 18; Neh. xi. 34; comp. also the personal name "Zibeon," Gen. xxxvi. 20).

——**In Rabbinical Literature:** The Talmud has, besides "ẓabua'," three other names for the hyena, "bardales," "napraza," and "appa"; and this variety of names has its counterpart in a variety of metamorphoses, each lasting seven years, through which the male hyena passes, namely, of a bat, an "'arpad" (*i.e.*, some other form of bat), a nettle, a thistle, and lastly an evil spirit ("shed"; B. Ḳ. 16a). A similar popular fable, about the hyena changing its sex every year, is found in Pliny, "Historia Naturalis," viii. 30, 44; Ælianus, "De Animalium Natura," i. 25. As regards dangerousness, the hyena is placed in the same category as the wolf, lion, bear, leopard, and serpent (B. Ḳ. 15b; Yer. B. Ḳ. 2, 6).

E. G. H. I. M. C.

HYKSOS: Name of a line of Egyptian kings, occurring in a passage of Manetho quoted by Josephus ("Contra Ap." § 14). It is said that they ruled for 511 years. Manetho explains "hyk" as "kings" (which Josephus disputes) and "sos" as "shepherds." The latter is "shasu" on the monuments. The Hyksos came as conquerors from Syria and Arabia; and Josephus claims them as the close kindred of his race. They were gradually expelled in a native rebellion, which began at Thebes. They form the fifteenth and sixteenth, perhaps also the seventeenth, dynasties. During the eighteenth dynasty Thothmes III. brought Egypt to its highest power; the nineteenth embraces Rameses I., Sethos (Setoy), Rameses II., usually taken to be the Pharaoh of the oppression, and Me(r)neptaḥ, the supposed Pharaoh of the Exodus.

The words in Ex. i. 8, "Now there arose up a new king over Egypt, which knew not Joseph," are thought to fit the long rule of Semitic kings, one of whom, Apopy, raised Joseph to high rank and settled his brethren in Goshen. If Adolf Erman, in his "History of Egypt," has rightly fixed the beginning of the eighteenth dynasty at 1530 B.C., and if the Biblical chronology (I Kings vi. 1), placing the Exodus 480 years before the completion of Solomon's Temple (*i.e.*, in 1478 B.C.), is correct, then the first king of the eighteenth dynasty is clearly that "new king" who takes measures for keeping the Israelites in check. Modern critics will not allow this; first, because the Israelites were put to build the store-city of Raamses, bearing the name of the later kings; secondly, because the El-Amarna letters and other monuments indicate that long after 1438 B.C., the supposed year of Joshua's invasion, Palestine was still under Egyptian control.

If the "new king" is to be placed at the end of the eighteenth dynasty rather than at its opening (which hypothesis is not in conflict with that of Joseph's ministration under a Hyksos king), it may be explained thus: Amenophis (Amen-hotep IV.), of the eighteenth dynasty, and his two successors attempted to reform the religion of the country, setting up a supreme god, Aten (= אדון ?), in place of the many divinities of Egypt; this movement came to an end, and the worship of Amon, Ra, etc., was resumed; hence a king, not indeed new in race, but new in faith and in sympathies.

BIBLIOGRAPHY: See EGYPT.

HYMNOLOGY. See POETRY, RELIGIOUS.

HYNEMAN: American family of remote Spanish and modern German origin, the record of whose early history is fragmentary. The first authentic record of any member of it in the United States is the signature of **Henry Hyneman** to the oath of allegiance to the state of Pennsylvania in the year 1779.

Elias Hyneman: Born in Holland, whither his progenitors had fled from Spain. He was a contemporary of Henry Hyneman. At an early age Elias emigrated to America and settled as an innkeeper and general merchant in a Pennsylvania country town, where he remained until his marriage, when he removed to Philadelphia and engaged in commerce. He was the father of thirteen children.

Leon Hyneman: Prominent freemason; born in Montgomery county, Pennsylvania, May 14, 1808; died in New York March 4, 1879; eldest son of Elias Hyneman. On attaining manhood he left home and earned his living as tutor in country schools. Returning to Philadelphia in 1834, he became interested in freemasonry, and four years later he joined the order as member of the Lafayette Lodge of Philadelphia, being elected master in 1840. At one time he was also a member of the Grand Lodge of Pennsylvania. Hyneman was the founder (1849) of the Order of Druidesses, and the author of its ritual. In 1852 he established "The Masonic Mirror and American Keystone," which he edited until 1860. He was the author of "The Fundamental Principles of Science" and of several works on masonic subjects, the chief among them being "The Origin of Freemasonry" and "Freemasonry in England from 1567 to 1813." In 1845 Hyneman was one of the members of the Jewish Publication Society of America.

Hyneman had eight children, among them being **Leona Hyneman,** who married Jacob Lowengrund, and, under the stage name of "Leona Moss," became a talented actress. Another daughter was **Alice Hyneman,** authoress; born in Philadelphia Jan. 31, 1840; contributor to "The North American Review"; "The Forum"; "The Popular Science Monthly"; and the author of "Woman in Industry," a treatise on the work of woman in America, and of "Niagara," a descriptive record of the great cataract and its vicinity. She married twice; her first husband being Henry Rhine of Philadelphia; her second, Charles Sotheran of New York.

Benjamin Hyneman, the representative of another branch of this family, who married Rebekah Gumpert, left his home in the pursuit of his vocation and was never seen afterward.

Rebekah Gumpert Hyneman: Authoress; born in Philadelphia Sept. 8, 1812; died Sept. 10, 1875. A non-Hebrew by birth, she embraced Judaism, and became devotedly attached to her new faith. She was a regular contributor to "The Masonic Mirror," published a volume of "Tales for Children," and wrote essays descriptive of the women of the Bible and the Apocrypha. She also published a number of poems under the titles "The Leper and Other Poems," "The Muses," etc.

Elias Leon Hyneman: Born in 1837; died Jan. 7, 1865; son of Benjamin Hyneman. At the outbreak of the Civil war he enlisted as a volunteer in Company C, Fifth Pennsylvania Cavalry, being mustered in on July 26, 1861. Accompanying his regiment to Virginia in 1862, he served with distinction there, and was promoted sergeant. He was present at the battle of Gettysburg, and took part in that of the Wilderness, but was subsequently taken prisoner during a cavalry raid in the vicinity of Petersburg, Va., June 29, 1864. He owed his capture to acts of heroism—surrendering his horse to a wounded comrade whose beast had been shot under him, and giving his own shoes to a barefooted, wounded fellow soldier. Taken to Andersonville, Ga., he was imprisoned in the stockade there, and within six months died of disease accelerated by insufficient food and by exposure in unsanitary quarters. His remains were taken to Philadelphia for burial.

Isaac Hyneman: The first member of the German branch of the family concerning whom any data have been preserved; born in Germany in 1804; died Jan., 1886. He emigrated to the United States, and there married Adeline Ezekiel of Richmond, Va.

Jacob Ezekiel Hyneman: Born in Richmond, Va., Aug. 5, 1843, and accompanied his father, Isaac Hyneman, to Philadelphia in 1850. He enlisted in the army Aug. 14, 1862, and was wounded at the battle of Fredericksburg. On recovery he was assigned to the United States Army Signal Corps—temporarily in April, 1863, and permanently on Aug. 17 of the same year. Hyneman took part in the battles of Chancellorsville, Brandy Station (where he was wounded), Gettysburg, Mine Run (where he was again wounded), Wilderness, Spottsylvania Court House, Cold Harbor, Five Forks, Petersburg, and Appomattox Court House, and was present at the surrender of Lee. He was mustered out of service June 24, 1865.

A few years after the war Hyneman joined the First Regiment of the Pennsylvania National Guard, and took part in subduing the riots at Susquehanna Station and Hazleton. When the Veteran Corps of the First Regiment of the Pennsylvania National Guard was formed, Hyneman joined it. He was elected first lieutenant April 19, 1880, and quartermaster, with the rank of captain, in 1883. He resigned April 17, 1891. During the railroad and mining riots at Pittsburg, Scranton, and Wilkesbarre during July and August, 1877, he raised two companies of National Guards of Pennsylvania, and commanded Company G, Twentieth Regiment. In 1889 he was appointed aide-de-camp, with rank of colonel, on the staff of Gen. William Warren, commander-in-chief of the Grand Army of the Republic.

Herman Naphtali Hyneman: Painter; born in Philadelphia July 27, 1849. At an early age he showed a taste for drawing. He studied art for eight years in Germany and France (1874), and in Paris became a pupil of Bonnat. Hyneman exhibited at the Salon of 1879 a painting entitled "Desdemona," which was subsequently shown at the Pennsylvania Academy of Fine Arts in Philadelphia. Two years later another painting of his, entitled "Juliet," was exhibited at the Salon, and afterward in New York city at the National Academy of Design. He won the silver medal at the American Art Exhibition, Philadelphia, 1902. Hyneman's chief work has been portrait-painting. Among his imaginative works may be mentioned "It Might Have Been," representing a young girl in contemplation, and "Marguerite in Prison," a scene from "Faust."

Samuel Morais Hyneman: Lawyer; born at Philadelphia May 26, 1854; admitted to the bar of that city June 2, 1877. He was a member of the board of managers of Mikve Israel congregation 1879–1901, and parnas 1887–90; member of the board of trustees, Jewish Theological Seminary at New York, 1886–1902, and of the board of trustees of Gratz College, Philadelphia, 1894–1900; president of the Young Men's Hebrew Association, Philadelphia, 1880–82; and officer of The Hebrew Education Society, Philadelphia, 1894–1900.

Bibliography: Morais, *The Jews of Philadelphia*; *The American Jews' Annual*, 5646 (1886).

A. F. H. V.

HYPOCRISY: A word derived from the Greek *ὑποκρίσις* = "the playing a part on the stage." It denotes acting a false part in life; pretending to be pious or righteous when one is not. It is only in later Hebrew that "ḥanufah" and "ḥanef" refer to this failing; hence it is incorrect for the Authorized Version to use "hypocrisy" as the translation of the Biblical "ḥanufah" and "ḥanef," which really denote respectively "wickedness" or "impiety" and "the wicked" or "the impious"; so Isa. ix. 16 (A. V. 17), xxxii. 6, xxxiii. 14; Ps. xxxv. 16; Prov. xi. 9; Job viii. 13, xiii. 16, xv. 34, xvii. 8, xx. 5, xxvii. 8, xxxiv. 30. Hypocrisy is a vice scarcely known in primitive times when men are natural; it is practised only in a society that has established rules of piety and rectitude, and is deceived by appearances. The hypocrite is rebuked in Ecclus. (Sirach) xxxii. 15, xxxiii. 2: "Let God destroy them that live in hypocrisy in the company of the saints." "Let the ravens peck out the eyes of the men that work hypocrisy" (Psalms of Solomon, iv. 7, 22–25; hypocrites are called also "men-pleasers" in the heading of this psalm).

It is especially in the rabbinical literature that hypocrites are singled out as dangerous. "One should make known the hypocrites in order to avoid the profanation of God's name" (Tosef., Yoma, iv. 12; Yoma 89a; comp. Eccl. R. iv. 1). "Be not afraid of the Pharisees nor of the Sadducees [literally "of those who are not Pharisees"], but of the chameleon-like men ["zebu'im"] who simulate the Pharisees, and while they do the deed of Zimri [Num. xxv. 14] claim the reward of Phinehas" (*ib.* xxv. 12), said the dying King Jannæus to Queen Alexandra (Soṭah 22b, referring probably to the same class of men as is characterized in Psalms of Solomon, iv., quoted above). Such a class of Pharisees, who were mere pretenders and men-pleasers, is alluded to in Soṭah iii. 4, and characterized in Soṭah 22b; Yer. Ber. ix. 14b. The characterization of all the Pharisees as "hypocrites," as "whited sepulchers, which indeed appear beautiful outward, but are within full of . . . all uncleanness," as "a generation of vipers" (originally probably also "zebu'im" = "many-colored vipers"; Matt. xxiii. 13–33; comp. vi. 2, 5, 16; xv. 7; xvi. 3; xxii. 18; Mark xii. 15; Luke xi. 44; xii. 1, 56), betrays a spirit of rancor and partizan prejudice.

Nothing was more loathsome to the Rabbis than hypocrisy. Gamaliel II. announced that no disciple "whose inside is not like his outside should enter the schoolhouse" (Ber. 28a); "he must be like the Ark of the Covenant, gold within as without" (Yoma 72b, after Ex. xxv. 11).

"Ḥanufah" in the Talmud denotes also flattery, which is another mode of simulation (so Soṭah 41b); wherefore it is difficult to say whether flattery or hypocrisy is meant when it is said: "He in whom there is ḥanufah brings wrath upon the world, nor will his prayer be heard" (after Job xxxvi. 13). "A just hin . . . shall ye have" (Lev. xix. 36) is interpreted to mean: "Thy yea ["hen"] shall be yea, and thy nay nay: thou shalt not speak one thing and mean another" (B. M. 49a). "I would rather rule over the whole world than over two judges wrapped up in their cloaks"—that is, hypocrites—said David (Midr. Teh. xviii. 34; Ab. R. N. xxv. [ed. Schechter, p. 82]). K.

HYPOTHECATION. See Mortgage or Hypothec.

HYPSISTARIANS: Semi-Jewish sect found on the Bosporus in the first Christian century and in Asia Minor down to the fourth century. They worshiped God under the name of *Θεὸς Ὕψιστος Παντοκράτωρ* (the Most High and Almighty One), observed the Sabbath and some of the dietary laws, but not circumcision, and cherished a certain pagan veneration for fire and light, earth and sun, without observing, however, any idolatrous rite (see Gregory Nazienzen, "Oratio," xviii. 5; Gregory of Nyssa, "Contra Eunomium," p. 2). They are probably related to, if not identical with, the Massalians ("Meẓallin"), or the Euchomenoi, or Euphemitai, "the God-worshipers, who also worshiped the Almighty God at the blaze of many lights" (Epiphanius, "Panarion, Hæresis," lxxx. 1–3), and the so-called Cœlicolæ ("worshipers of heaven"; "yire'e shamayim") mentioned in "Codex Theodosianus," xvi. 5, 43; 8, 19. They were undoubtedly a remnant of Jewish proselytes who retained a few pagan notions, but were regarded as hostile to Christian doctrines.

K.

HYRCANUS: Collector of the royal revenues in Egypt; born in Jerusalem about 220 B.C.; died in 175; youngest son of the tax-farmer Joseph ben Tobiah by his second wife, the daughter of his brother Solymius. Displaying from his childhood the most extraordinary abilities and accomplishments, he became the favorite of his father, which predilection made his elder half-brother jealous, and subsequently became a source of misery to the whole nation. His father, being unable on account of his infirmities to be present at an Egyptian court solemnity, sent Hyrcanus as his representative, the two elder half-brothers refusing to attend for reasons of their own. The occasion of the solemnity is unknown. It could not have been the birth of Ptolemy V., Epiphanes (209 B.C.), as Hyrcanus was then only eleven years old. His half-brothers wrote to their friends at court to put Hyrcanus out of the way.

Hyrcanus, promising his father to be very economical in all expenditures, obtained from the latter a letter of credit to his steward at Alexandria. He soon gained favor at court by his cleverness and by his adroitness of speech. He pleased Ptolemy and his courtiers by his wit and especially by his extravagant presents; and when he left Alexandria he himself was loaded with gifts. He was probably awarded also the office of tax-collector. His half-brothers, who had now still greater reason for jealousy, lay in wait to kill him; and even his father was incensed against him on account of the enormous sums he had spent. A battle ensued in which Hyrcanus and his companions killed two of his half-brothers. Fearing for his safety, Hyrcanus left Jerusalem.

At the death of Joseph the quarrels of the brothers were espoused by the people. The elder sons, out of hatred to Hyrcanus, who probably succeeded his father in office, sided with Antiochus against Egypt, and raised a Seleucidan party, while Hyrcanus and his adherents supported the Ptolemies. At the final triumph of the Seleucids, Hyrcanus took up his abode beyond the Jordan, in territory granted to him by Ptolemy V., and was at war continually with the Arabian and other tribes, which he obliged to pay taxes.

Hyrcanus erected a strong castle of white marble upon a rock near Heshban, and surrounded it with a wide moat of great depth. This castle was called "Tyrus." For seven years Hyrcanus remained in his retreat and accumulated immense wealth, a part of which was deposited in the Temple at Jerusalem (II Macc. iii. 11). At the accession of Antiochus Epiphanes the Tobiads renewed their hostilities against Hyrcanus and persuaded the new king to capture him. Hyrcanus, dreading an ignominious death, committed suicide.

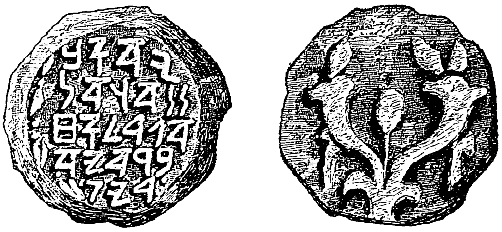
G. I. Br.

HYRCANUS, JOHN (JOHANAN) I.: High priest; prince of the Hasmonean family; born about 175; died 104 (Schürer). He was a wise and just ruler and a skilful warrior. As a young man he distinguished himself as a general in the war against the Syrian general Cendebeus, whom he defeated. That John was given the surname "Hyrcanus" on account of this victory, is a tradition to which Grätz and others attribute historical significance. When his father, Simon Maccabeus, was assassinated at Jericho by his son-in-law Ptolemy, John succeeded in escaping from those sent by Ptolemy to murder him also. From Gadara, where he at that time lived, John hastened to Jerusalem, where the people gladly received him as Simon's successor (135). He never assumed the title of king, being content with that of high priest. The beginning of his reign was not happy. He could not avenge the murder of his father, for Ptolemy, whom he had shut up in the fort Dagon, subjected Hyrcanus' mother to cruel tortures on the walls of the fort whenever her son attempted to attack it. Hyrcanus, therefore, raised the siege after several months, although his mother bore the tortures with heroic determination, and encouraged him to punish the murderer. Finally, however, she was put to death, as was, presumably, an imprisoned brother also; while Ptolemy himself fled to Rabbath Ammon (Philadelphia; 135 B.C.).



Copper Coin of Hyrcanus.

Obverse: יהוכנן הכהן הגדל וחבר היהודים—"Johanan the High Priest and the 'Senate' of the Jews," within a laurel wreath.
Reverse: two cornucopiæ; in the middle a poppy-head.
(After Madden, "History of Jewish Coinage.")

Besieged by Antiochus Sidetes.

A still greater danger threatened Hyrcanus when the Syrian king Antiochus Sidetes marched against Jerusalem with a large army, and besieged him. The besieged suffered from lack of provisions; the besiegers from lack of water. Hyrcanus found himself forced into the apparent cruelty of driving out of the city all who could not carry arms. After Antiochus had unsuccessfully besieged the city during an entire summer, he was willing, in view of the danger which menaced him from the east, to enter into peace negotiations. Hyrcanus asked an armistice of seven days, extending over the Feast of Tabernacles, which was granted. Hard pressed, Hyrcanus willingly agreed to the terms of peace. The Jews were compelled to surrender their weapons and pay tribute for Joppa and for some other towns which formerly were Syrian. In preference to having Jerusalem occupied by Syrian troops, Hyrcanus gave hostages (among whom was his own brother), and undertook to pay five hundred talents of silver, of which three hundred were demanded at once. He is said to have taken this sum from the treasure in David's sepulcher. In conformity with another stipulation the battlements on the walls of Jerusalem were destroyed.

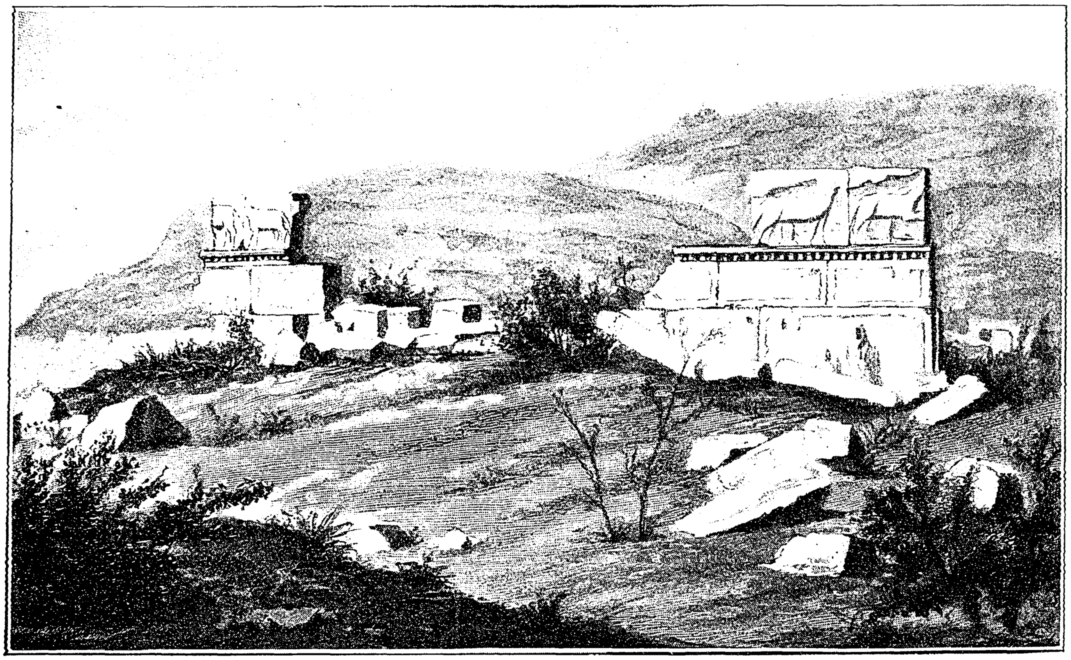
In 130 Hyrcanus, as a vassal of the Syrian king, marched against the Parthians. Antiochus Sidetes fell in the ensuing battle, or (as Appian, "De Rebus Syriacis," ch. 68, states), in despair at his ignominious defeat (129), sought death. His brother, Demetrius II., ascended the throne for the second time, but retained it for only a short period. Hyrcanus now seized the opportunity presented by the weak-

Alliance with the Romans.

ness of the Syrian kingdom to extend the borders of Judea to the line it had held in the days of its prosperity. To shake off the Syrian bondage and enlarge his domains, he endeavored to form an alliance with the Romans. To this end he followed the example set by his predecessor, and sent an embassy to Rome. A great deal of confusion, however, exists with regard to this embassy and the senatorial enactments connected with it (see Josephus, "Ant." xiii. 9, § 2; xiv. 10, § 22; Grätz, "Gesch." iii. 500 *et seq.*; Werner, "Johann Hyrcan," pp. 33 *et seq.*).

Forcibly Converts the Edomites.

Hyrcanus, who had been confirmed by the Romans in the possession of the important seaport of Joppa, subjugated other Syrian towns, such as Berœa (Aleppo). He marched against the fort of Madaba, on the banks of the Jordan, which had always been hostile to the Hasmoneans, and conquered it after a six months' siege; he also conquered the town of Samaya (Samega), on the Sea of Galilee, of special importance on account of its geographical position. He then proceeded against the Samaritans, who had always sided with the enemies of the Jews. He conquered Shechem, one of the most important towns of Samaria, and destroyed the temple on Mount Gerizim (21st Kislew = December, about 120). After victoriously ending the war in Samaria, he proceeded to subdue the Edomites, always a menace to the southern parts of his domains. With funds which he is said to have obtained from David's sepulcher he hired foreign troops, dismantled Adora and Marissa, the strong places of Edom, and forced the Edomites to accept the Jewish religion and submit to circumcision. This is the first instance of forcible conversion in Jewish history. In this Hyrcanus allowed his zeal for the Jewish cause to lead him to take a step which later wrought harm; for to the Edomites belonged the family of the Herodians, who were to bring about the ruin of the Hasmoneans. The Samaritans, who still held their strongly fortified metropolis of Samaria, with a part of Jezreel, remained hostile toward the Jews. For this reason Hyrcanus renewed his attacks upon them. He marched against Samaria at the head of a great army, but as his presence in Jerusalem was necessary, he left the siege of the former city to his two sons, Aristobulus and Antigonus.



Ruins of the Palace of Hyrcanus.
(After Vogüé, "Syrie Centrale.")

The war was unexpectedly prolonged by the interference of the Syrian king, Antiochus IX.; and after he had been defeated by Aristobulus, the Egyptian prince Lathyrus, son of Ptolemy Physcon, was called to the Syrians' assistance. Aristobulus and Antigonus not only conquered the whole of the Plain of Jezreel, especially the important town of Bethsan (Scythopolis; June, 110 or 111), but also, five months later (25th Ḥeshwan = November), took the fort of Samaria. The latter was completely demolished, and water-trenches were dug through the town. Hyrcanus had refortified the walls of Jerusalem, had secured the independence of Judea, and had raised it to a level with the neighboring states. During his reign the different religious sects in the country—Pharisees, Sadducees, and Essenes—became firmly established. Hyrcanus, who was a pupil of the Pharisees, remained long the faithful adherent of the latter, although he had friends also among the Sadducees. Several of his religious ordinances showed his Pharisaic sympathies; thus, he ordered Ps. xliv. stricken from the Temple liturgy on the ground that its anthropomorphisms might give rise to misunderstanding; and he ordered that animals destined for the altar should not be wounded before the time for slaughter.

Opposes the Sanhedrin.

But when Hyrcanus withdrew all religious authority from the Sanhedrin, the love he had enjoyed was changed to a hatred which was soon openly declared. At a great festival to which he invited the leaders of the Pharisees and Sadducees, he asked whether the Pharisees had any matter which they desired to bring before him; whereupon a certain Eleazar ben Po'era demanded that he should be content with the temporal power, and should lay aside the diadem of the high priest. According to another source, an old man named Judah ben Gedidim is said to have declared that, Hyrcanus' mother having been held captive in Modin by the enemy, Hyrcanus, as the son of a captive, could not legally be high priest (Josephus, "Ant." xiii. 10, § 5; Ḳid. 66a). Hyrcanus ordered an investigation, and the statement concerning his mother was proved to be untrue. He then requested the Sanhedrin to punish his traducer, but the latter was sentenced to flagellation only. Hyrcanus then joined the Sadducees, without, however, as some assert, persecuting the Pharisees. He suspended the Pharisaic rules, and made the Sadducean statutes the standard for the interpretation of the Law. It must be noted that Hyrcanus, or Johanan, the high priest, is not always referred to when that name is mentioned in the Talmud.

John Hyrcanus, who, as Josephus says, was endowed with three godly gifts—the temporal power, the dignity of a high priest, and the gift of prophecy—died after a reign of thirty years. His death ended the power of the young Jewish kingdom.

G. M. K.

HYRCANUS II.: High priest from about 79 to 40 B.C.; eldest son of Alexander Jannæus and Alexandra. His mother, who had installed him in the office of high priest, named him as her successor to the throne. He had scarcely reigned three months when his younger brother, Aristobulus, rose in rebellion; whereupon Hyrcanus advanced against him at the head of his mercenaries and his Sadducean followers. Near Jericho the brothers met in battle; many of the soldiers of Hyrcanus went over to Aristobulus, and thereby gave the latter the victory. Hyrcanus took refuge in the citadel of Jerusalem; but the capture of the Temple by Aristobulus compelled Hyrcanus to surrender. A peace was then concluded, according to the terms of which Hyrcanus was to renounce the throne and the office of high priest (comp. Schürer, "Gesch." i. 291, note 2), but was to enjoy the revenues of the latter office.

Intrigues of Antipater.

The struggle would have ended here but for Antipater. That astute Idumean saw clearly that it would be easier to reach the object of his ambition, the control of Judea, under the government of the weak Hyrcanus than under the warlike and energetic Aristobulus. He accordingly began to impress upon Hyrcanus' mind that Aristobulus was planning his death, finally persuading him to take refuge with Aretas, king of the Nabatæans. Aretas, bribed by Antipater, who also promised him the restitution of the Arabian towns taken by the Hasmoneans, readily espoused the cause of Hyrcanus and advanced toward Jerusalem with an army of fifty thousand. During the siege, which lasted several months, the adherents of Hyrcanus were guilty of two acts which greatly incensed the majority of the Jews: they stoned the pious Onias (see Onias ha-Me'aggel), and, instead of a lamb which the besieged had bought of the besiegers for the purpose of the paschal sacrifice, sent a pig. Onias, ordered to curse the besieged, prayed: "Lord of the universe, as the besieged and the besiegers both belong to Thy people, I beseech Thee not to answer the evil prayers of either." The pig incident is derived from rabbinical sources. According to Josephus, the besiegers kept the enormous price of one thousand drachmas they had asked for the lamb.

Intervention of the Romans.

While this civil war was going on the Roman general Scaurus went to Syria to take possession, in the name of Pompey, of the kingdom of the Seleucids. He was appealed to by the brothers, each endeavoring by gifts and promises to win him over to his side. At first Scaurus, moved by a gift of four hundred talents, decided in favor of Aristobulus. Aretas was ordered to withdraw his army from Judea, and while retreating suffered a crushing defeat at the hands of Aristobulus. But when Pompey came to Syria (63) a different situation arose. The conqueror of Asia, who had decided to bring Judea under the rule of the Romans, took the same view of Hyrcanus' ability, and was actuated by much the same motives, as Antipater: as a ward of Rome Hyrcanus would be more acceptable than Aristobulus. When, therefore, the brothers, and delegates of the people's party, which, weary of Hasmonean quarrels, desired the extinction of the dynasty, presented themselves before Pompey, he delayed the decision, in spite of Aristobulus' gift of a golden vine valued at five hundred talents. The latter, however, fathomed the designs of Pompey, and entrenched himself in the fortress of Alexandrium; but, soon realizing the uselessness of resistance, surrendered at the first summons of the Romans, and undertook to deliver Jerusalem over to them. The patriots, however, were not willing to open their gates to the Romans, and a siege ensued which ended with the capture of the city.

Thus, between the weakness of Hyrcanus and the ambition of Aristobulus, Judea lost its independence. Aristobulus was taken to Rome a prisoner, and Hyrcanus was reappointed high priest, but without political authority. This, however, was restored to him by Julius Cæsar, who made him ethnarch (47); but Hyrcanus left all authority in the hands of Antipater, who used it for the promotion of the interests of his own house. Indeed, Hyrcanus' incapacity and weakness were so manifest that, while he was defending Herod (whom he had previously saved from the hands of the Sanhedrin) before Mark Antony, the latter stripped him of his nominal political authority and of his title of ethnarch, and bestowed them upon the accused.

The crisis which arose in Palestine in the year 40 put an end to the career of Hyrcanus. By the help of the Parthians, Antigonus was proclaimed king and high priest, and Hyrcanus was seized and carried to Babylonia, after being made permanently ineligible for the office of high priest by the loss of his ears. For four years, until 36, he lived amid the Babylonian Jews, who paid him every mark of respect. In that year Herod, who feared that Hyrcanus might induce the Parthians to help him regain the throne, invited him to return to Jerusalem. In vain did the Babylonian Jews warn him. Herod received him with every mark of respect, assigning to him the first place at his table and the presidency of the state council. But he only waited an opportunity to get rid of him. In the year 30, charged with plotting with the King of Arabia, Hyrcanus was condemned and executed.

Carried Prisoner to Babylon.

G. I. Br.

HYSSOP (Hebr. אזוב; so rendered after the Septuagint and the Vulgate; comp. also Josephus, "B. J." vi. 3, § 4): There is great uncertainty as to what specific plant is intended either by the Hebrew "ezob" or by the Greek ὕσσωπος, nor is it clear that the words are identical. The Greek ὕσσωπος was credited with purifying qualities (comp. Dioscorides, i. 105, iii. 30; Pliny, "Hist. Naturalis," xxvi. 15 *et seq.*; Porphyry, "De Abstin." iv. 6), and is commonly identified with the *Origanum Smyrnæum* or *O. Syriacum*, belonging to the order *Labiatæ*. The Hebrew "ezob" is described as a small plant found on or near walls (I Kings iv. 33), apparently of aromatic odor, so that it was burned with the Red Heifer (Num. xix. 6). It was also used in the purification of lepers and leprous houses (Lev. xiv. 4, 6, 49, 51; comp. Num. xix. 18; Ps. li. 9), and in the sprinkling of the blood of the paschal lamb on the door-posts (Ex. xii. 22).

The "ezob" is evidently not common hyssop (*Hyssopus officinalis*), which is not a native of Palestine. The Talmud (see below) also distinguishes the ezob of the Pentateuch from the Greek and Roman hyssop. Maimonides (on Neg. xiv. 6) interprets "ezob" by the Arabic "ṣa'tar," denoting some species of *Satureia*, which is cognate to the *Origanum* and of which the *S. Thymbra* is found in Palestine; so also the other old Jewish exegetes, as Saadia in his Arabic translation of the Pentateuch; Ḳimḥi in his "Oẓar ha-Shorashim," *s.v.*; Abu al-Walid, etc. Some modern authorities would identify the ezob with the caper-plant (*Capparis spinosa*), which abounds in Egypt, in the Sinaitic peninsula, and in Palestine, and the cleansing properties of which seem to have been traditional in the Orient. This view finds support in the similarity of "ezob" to "aṣaf," the Arabic name for the caper.

In Neg. xiv. 6 and parallels are enumerated, besides the ezob of the Pentateuch, five other kinds, namely, the Greek, the colored, the wild, the Roman, and that "with some [other] epithet." For the regulations of the ritual use of the ezob, see Parah xi., xii.; in Parah xi. 8 the ezob is considered as a wood; while in Suk. 13a it is counted among the reeds and branches with which the booth may be covered. With allusion to I Kings iv. 33 the ezob is metaphorically applied to the humble and lowly (M. Ḳ. 25b).

I

I. See Yod.

IBIS. See Heron.

IBN: Arabic word (in Hebrew אבן) meaning "son," and having the shortened form "ben" or "bin" (בן) when standing between the proper name of the father and that of the son, provided both names form part either of the subject or of the predicate of the sentence; plural, "banu" (nominative) and "bani" (accusative and genitive). It was common among the Semites and other peoples to designate a person as the son of so-and-so, the father's name being more usual than the mother's. In medieval Hebrew the Arabic word "ibn" was pronounced "aben" (comp. Geiger, "Moses ben Maimon," in "Nachgelassene Schriften," iii. 74), the change in the pronunciation of the first letter being due to the different value of א as a vowel-letter in the two languages. The abbreviation for אבן is 'ן, noteworthy as being the only instance of a word in Hebrew shortened at the beginning instead of at the end. This form, "son of so-and-so," came to be used in Arabic (as it was used also in the Bible) as a simple surname or family name (compare the names "Mendelssohn," "Johnson" = respectively "son of Mendel," "son of John").

Family Names Compounded of "Ibn."

In Hebrew writings the Jews rarely used "ibn" or "aben" before the proper name of the father, placing it more usually before the name of the supposed founder of the family. Naḥmanides (13th cent.) says that all the Arabs called themselves by the names of their respective ancestors, and all the Israelites who dwelt in Egypt by those of their families. Such family names, originally composed with אבן, are, for example: Ibn

'Abbas
'Abbasi
Abun
Adoniya
'Aḳnin
'Aḳra
'Arama
'Aṭṭar
Ayyub
Berakyah
Burgil
Dabi
Danan
Ezra
Fakhkhar
Fandari
Ḥasdai
Ḥason
Ḥayyun
Ḳimḥi
Laṭif
Migas
Sason
Verga

The Arabic "ibn" (אבן) as a designation for the "son" or "descendant" of some one became so naturalized in Hebrew that Joseph ibn Caspi (14th cent.) in his Hebrew lexicon really considered it to be a Hebrew word (אבן = "stone"), meaning the substance of a person or a thing.

In Spanish and Portuguese as well as in Latin translations of the Middle Ages (and hence in the rest of the European languages) "Ibn" is found in the forms "Iben" and "Iven," as in Hebrew, and in composition with other words formed such names as "Abenzarbarre" ("Ibn Zabarra"), "Abendanan," "Abenshaprut," "Avengayet" ("Ibn Ghayyat"; see Jacobs in "J. Q. R." vi. 614), "Avencebrol," and finally "Avicebron" ("Ibn Gabirol"), "Averroes" ("Ibn Roshd"), "Avicenna" ("Ibn Sina"), etc.

IBN ABUN, SAMUEL BEN JUDAH. See Samuel ibn Abun ben Judah.

IBN ALFANGE: Spanish author; flourished in the eleventh century. Nothing is known of his life except that he embraced Christianity in 1094 and filled the position of "official" under the famous hero Cid Campeador (Rodrigo, or Ruy Diaz de Vivar), who died at Valencia in 1099. Ibn Alfange wrote in Arabic a biography of his master, Spanish translations of which were made by the Spanish historian Pero Anton Beuter and by the Spanish poets.

IBN BAL'AM, ABU ZAKARYA YAḤYA (R. JUDAH): Hebrew grammarian of Toledo, Spain, about 1070–90. In the introduction to his "Moznayim" Abraham ibn Ezra mentions Ibn Bal'am among the early masters of Hebrew grammar, and Moses ibn Ezra, in his "Kitab al-Muḥaḍarah," gives the following data:

> "Ibn Bal'am came from a respected family in Toledo, and settled later in Seville. In his old age he devoted himself to the study of law [that is, to theology]. He possessed a quick comprehension and an excellent memory. His style was direct and terse, so that he could present comprehensive subjects in a few words. His literary work extended especially to compendious treatises, in which he availed himself of the thorough and comprehensive studies of his predecessors, but from which he extracted with care only their most essential and valuable contents. . . . Against his otherwise noble character and sedate nature his irritable temperament stood in marked contrast. Nobody escaped his criticism, which consisted not merely in the pointing out of faulty passages, but in a trenchant and ruthless analysis of their errors."

This characterization is fully borne out by Ibn Bal'am's writings.

Ibn Bal'am wrote altogether in Arabic. Some of his works are known only from quotations or references, by himself or by others. Those of his writings which have been preserved are partly in Arabic, partly in Hebrew translations. The following works are known to be his: (1) "Ta'lif fi al-Muṭabiḳ wal-Mujanis" (in Hebrew, "Sefer ha-Tagnis"), on Hebrew homonyms, still unpublished. Only a fragment of the original Arabic has been preserved (see Poznanski in "R. E. J." xxxvi. 298). (2) "Ḥuruf al-Ma'ani" (in Hebrew, "Otiyyot ha-'Inyanim"), on Hebrew particles. Its publication was commenced by S. Fuchs in "Ha-Ḥoḳer" (i. 113 *et seq.*), but was not finished. Fragments of the original Arabic are to be found in the notes to Ibn Janaḥ's "Kitab al-Uṣul," published by Neubauer. (3) "Al-Af'al al-Mushtaḳḳah min al-Asma'" (in Hebrew, "Ha-Pe'alim Shehem mi-Gizrat ha-Shemot"), on verbs; published by G. Polak in "Ha-Karmel" (iii. 321 *et seq.*), and republished by B. Goldberg and Adelman in "Ḥayye 'Olam" (Paris, 1879). A third edition was begun in "Ha-Misderonah" (i. 21 *et seq.*), but remained unfinished. (4) "Al-Irshad," a lost grammatical treatise mentioned by Ibn Barun ("Kitab al-Muwazanah," p. 21). (5) "Ta'did Mu'jizat al-Taurat wal-Nubuwwat," an enumeration of the miracles in the Pentateuch and in the Prophets. It is mentioned by Moses ibn Ezra, but is otherwise unknown. (6) "Kitab al-Tarjiḥ," a commentary to the Pentateuch; unpublished; only Numbers and Deuteronomy are extant. (7) "Nuḳaṭ al-Miḳra," a short Biblical commentary. The greater part of this work is still in existence. The commentary on the Book of Isaiah has been published by Derenbourg ("R. E. J." xvii. 172 *et seq.*). (8) Two liturgical hymns; Hebrew translations (see Landshuth, "'Ammude ha-'Abodah," i. 66).

In addition to the above, a work on Masoretic rules and accents, "Hidayat al-Ḳari" (in Hebrew, "Horayat ha-Ḳore"), an extract from which, under the title "Ṭa'ame ha-Miḳra," was published by Mercier (Paris, 1565), who also published the second part, containing the accentuation of the books of Psalms, Proverbs, and Job (*ib.* 1556), has usually been attributed to Ibn Bal'am. Wickes, however, who published the Arabic original on the poetic accents, has questioned this authorship.

G. C. L.

IBN BARUN, ABU IBRAHIM ISḤAḲ: Spanish grammarian; lived in the eleventh and twelfth centuries, probably at Barcelona. He was a pupil of the grammarian Levi ibn Tabban of Saragossa (author of the "Mafteaḥ"), and a contemporary of Judah ha-Levi and Moses ibn Ezra, who dedicated to him several of their poems; the latter also wrote an elegy on his death (comp. "Kokebe Yizḥaḳ," 1858, p. 28; Neubauer, "Cat. Bodl. Hebr. MSS." No. 1972; Brody, in "Monatsschrift," xl. 33). Ibn Barun was well versed in Arabic literature, and was the first to realize the close connection existing between Hebrew grammatical and lexicographical forms and those of the Arabic. This connection was pointed out by him in a work entitled "Kitab al-Muwazanah," divided into two parts, the first treating of Hebrew grammar in comparison with Arabic, the second of lexicography. Fragments of this work, which until recently was known only from quotations, were discovered in the Imperial Library of St. Petersburg, and published, with introduction, translation, and notes in Russian, by Paul v. Kokowzow (St. Petersburg, 1894).

Ibn Barun frequently quotes the Koran, the "Mu'allaḳat," the "Kitab al-'Ain" of Khalil, and many other standard works of Arabic literature, with which he was thoroughly acquainted. His Hebrew sources were Saadia Gaon, Hai Gaon, Dunash ibn Tamim, Ḥayyuj (whose theories he frequently criticized), Ibn Janaḥ, Samuel ha-Nagid, Solomon ibn Gabirol, Ibn Jashush, Ibn Bal'am, and Moses Gikatilla. Moses ibn Ezra says that Ibn Barun also compared Hebrew with Latin and Berber, and that his dictionary is superior to that of Dunash ibn Tamim. Nevertheless, Ibn Barun's work passed almost unnoticed by the Hebrew philologists of the Middle Ages. He is mentioned by name only by Moses ibn Ezra in his treatise on Hebrew poetry and rhetoric. Several of his comparisons are cited without acknowledgment by Joseph Ḳimḥi, by Abraham ben Solomon of Yemen in his work on the Prophets, and by an anonymous fifteenth-century commentator to the "Moreh Nebukim."

IBN BILIA, DAVID BEN YOM-ṬOB: Portuguese philosopher; lived in the thirteenth and fourteenth centuries. Steinschneider believes him to have been the father of the astronomer Jacob Poel. Ibn Bilia was the author of many works, the greater part of which, no longer in existence, are known only by quotations. Among them were: "Me'or 'Enayim," a commentary on the Pentateuch, quoted by Caspi, Levi ben Gershon, and chiefly by the author's countryman Samuel Zarza, who often criticized Ibn Bilia's interpretations as being too mystical; "Yesodot ha-Maskil," published, with a French translation by S. Klein, in the collection "Dibre Ḥakamim," Metz, 1849. In the "Yesodot" Ibn Bilia propounded thirteen articles of belief in addition to those of Maimonides. These are: (1) The existence of incorporeal intellects; (2) The creation of the world; (3) The existence of a future life; (4) Emanation of the soul from God; (5) The soul's existence through its own substance and its self-consciousness; (6) Its existence independent of the body it subsequently occupies; (7) Retribution of the soul; (8) Perdition of the souls of the wicked; (9) Superiority of the Mosaic law over philosophy; (10) The presence of an esoteric as well as an exoteric meaning in Holy Scripture; (11) Inadmissibility of emendations of the Torah; (12) The reward of the fulfilment of the divine precepts implied in the precepts themselves; (13) The inadequacy of ceremonial laws alone for the realization of human perfection. These, together with the thirteen articles of Maimonides, make twenty-six, the numerical value of the Tetragrammaton.

Ibn Bilia also wrote "Ẓiyyurim," an ethical work; "Kilale ha-Higgayon," a work on logic, of which only a fragment has been preserved (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2168); "Ma'amar bi-Seguliot 'Or ha-Naḥash," a treatise on the medicinal virtues of the skin of the serpent, translated from Johannes Paulinus' Latin translation "Salus Vitæ" (Munich, No. 228); a treatise on astrology and its connection with medicine.

K. I. Br.

IBN DANAN, SAADIA BEN MAIMUN BEN MOSES: Lexicographer, philosopher, and poet; flourished at Granada in the second half of the fifteenth century. He exercised the function of dayyan at Granada and enjoyed a great reputation as Talmudist. When the Jews were banished from Spain, Saadia and his father, Maimun, settled at Oran, where they remained until their deaths (compare Neubauer, "Cat. Bodl. Hebr. MSS." No. 1492).

Ibn Danan was the author of the following works: (1) "Al-Ḍaruri fi al-Lughah al-'Ibraniyyah" (The Necessary [Rule] of the Hebrew Language), a Hebrew grammar with a chapter on Hebrew prosody (this chapter, translated by the author into Hebrew at the request of his pupils not acquainted with Arabic, was published by A. Neubauer in his "Meleket ha-Shir," Frankfort, 1865); (2) a Hebrew dictionary in Arabic; (3) commentary on ch. liii. of Isaiah, published by Neubauer in "The Fifty-third Chapter of Isaiah According to the Jewish Interpreters," Oxford, 1877; (4) a philosophical treatise on the shape of the letters of the alphabet, still extant in a manuscript in the Bodleian Library which contains many other small treatises by Danan on various subjects; (5) "Sefer he-'Aruk," a Talmudical lexicon, still extant in manuscript (compare Neubauer, "Cat. Bodl. Hebr. MSS." No. 1492); (6) responsa, printed at the end of the collection of responsa entitled "Pe'er ha-Dor," by Maimonides (§§ 225-230); (7) "Ma'amar 'al Seder ha-Dorot" (Treatise on the Order of the Generations), giving the chronology of the Jewish kings, published by Edelmann in "Ḥemdah Genuzah," Königsberg, 1856; (8) "Ḳaṣidah," a poem in honor of Maimonides' "Moreh Nebukim," inserted in the collection "Dibre Ḥakamim" published by Eliezer Ashkenazi of Tunis (Metz, 1849).

G. I. Br.

IBN DAUD HA-LEVI. See Abraham ibn Daud.

IBN EZRA, ABRAHAM BEN MEÏR (ABEN EZRA): Scholar and writer; born 1092-1093; died Jan. 28 (according to Rosin, Reime und Gedichte, p. 82, n. 6, 1167 (see his application of Gen.

xii. 4 to himself). His father's name was Meïr and his family was probably a branch of the Ibn Ezra family to which Moses ibn Ezra belonged. Moses in his poems mentions Abraham by his Arabic name, Abu Isḥaḳ (Ibrahim) ibn al-Majid ibn Ezra (Steinschneider, "Cat. Bodl." col. 1801), together with Judah ha-Levi. Both were, according to Moses, from Toledo, and afterward settled in Cordova. Ibn Ezra himself once—in an acrostic—names Toledo as his native place ("Monatsschrift," xlii. 19) and at another time Cordova (beginning of the Ḥayyuj translation). According to Albrecht ("Studien zu den Dichtungen Abraham ben Ezra," in "Z. D. M. G." *l.c.* p. 422), it is certain that he was born in Toledo. Through his emigration from Spain his life was divided into two periods. In the first and longer of these, which extended almost to the year 1140, he won for himself in his native land a name as a poet and thinker. Moses ibn Ezra, who was an intimate friend of his, extols him as a religious philosopher ("mutakallim") and as a man of great eloquence; and a younger contemporary, Abraham ibn Daud, at the end of his history ("Sefer ha-Ḳabbalah," ed. Neubauer, p. 81), calls him the last of the great men who formed the pride of Spanish Judaism and who "strengthened the hands of Israel with songs and with words of comfort." In this first period of his life Ibn Ezra's creative activity was chiefly occupied with poetry; and the greater number of his religious and other poems were probably produced during that time. He likes to call himself "the poet" ("ha-shar," introduction to Pentateuch commentary) or "father of poems" (end of the versified calendar regulations); and in a long poem of lamentation (Rosin, "Reime und Gedichte des Abraham ibn Ezra," p. 88) he says: "Once in my youth I used to compose songs with which I decorated the Hebrew scholars as with a necklace." The fact, however, that Ibn Ezra had pursued serious studies in all branches of knowledge during his life in Spain, is shown by the writings of the second period of his life. The wealth and variety of their contents can be explained only by the compass and many-sidedness of his earlier studies.

First Period: to 1140.

His Friends.

The most prominent scholars among the Jews of Spain were Ibn Ezra's personal friends: in Cordova itself, which was his permanent residence, Joseph ibn Ẓaddiḳ and especially Judah ha-Levi. The latter was only a few years older than Ibn Ezra; and on one occasion addressed a very witty saying to Ibn Ezra's father-in-law (see Geiger, "Nachgelassene Schriften," iv. 332). In his Bible commentary Ibn Ezra afterward reported many text interpretations from his talks with Judah ha-Levi (see Bacher, "Die Bibelexegese der Jüdischen Religionsphilosophen," etc., pp. 132 *et seq.*). That he associated and debated with the representatives of Karaism, which was so widely spread in Spain in his time, and that he was well acquainted with their literature, is shown by many passages in his commentary on the Bible.

His Son Isaac.

Ibn Ezra nowhere says anything about his family connections; but from a remark in a long comment on Ex. ii. 2 it may be concluded that his marriage had been blessed with five children. They probably died early, however, except his son Isaac, who left Spain at the same time as his father, and who in 1143 composed in Bagdad songs in honor of the Arab Hibat Allah (Nathanael). According to Albrecht, however, Abraham left Spain after Isaac, perhaps because of the conversion of the last-named to Islam, and with the purpose of bringing him back to Judaism. Isaac's conversion was a severe blow to his father; and the latter expressed his grief in two moving poems ("Diwan," Nos. 203 and 205; Rosin, *l.c.* pp. 84 *et seq.*). Albrecht says Ibn Ezra left Spain in 1137. Unable to bring his son back to Judaism, he went to Rome (1140), where after many troubles he found a period of rest.

Second Period: After 1140.

In the second half of his life one must imagine Ibn Ezra a lonely man, who, bound by no family ties, led the unsettled life of a wanderer. Nevertheless he resided for periods of several years in various places each. The year 1140 is given as the definite date with which this second period begins. In that year he composed several works in Rome. This date, as well as those following, is furnished by Ibn Ezra in some of his works. He says of himself in the introductory poem to his Kohelet commentary: "He departed from his native place, which is in Spain, and came to Rome." But this proves nothing against the supposition that some at least of his journeys in northern Africa and Egypt, concerning which there is definite information, were made between his departure from Spain and his arrival at Rome. Ibn Ezra was perhaps in Africa at the same time with Judah ha-Levi. A statement of Solomon ibn Parḥon's ("Maḥberet he-'Aruk," 4b) seems to speak of their joint stay there, although his remark may have another meaning. But it is possible that Ibn Ezra's travels in the East, which, as many suppose, took him to Palestine and even to Bagdad (tradition states that he went even as far as India), interrupted his stay in Italy, or occurred between that time and his sojourn in Provence.

In Provence.

A whole series of works on Bible exegesis and grammar was the fruit of his stay in Italy. He is known to have been in the following cities: Rome (1140), Lucca (1145), Mantua (1145–46), Verona (1146–1147). In Rome he had for a pupil Benjamin b. Joab, for whose benefit he composed his commentary on Job. Ibn Ezra went to Provence before 1155, stopping in the town of Béziers, where he wrote a book on the names of God, dedicated to his patrons Abraham b. Ḥayyim and Isaac b. Judah. A native of that city, Jedaiah Bedersi, speaks enthusiastically, more than a hundred and fifty years afterward, of Ibn Ezra's stay in Provence (Solomon ibn Adret, Responsa, No. 418). Judah ibn Tibbon of Lunel, a contemporary of Ibn Ezra, speaks of the epoch-making importance of the latter's stay in southern France (preface to "Riḳmah"). Ibn Ezra was in Narbonne in, or shortly before, 1139, and answered certain questions for David b. Joseph. He made a stay of several years in northern France, in the town of Dreux (department of Eure). On account of a corruption (רדום) of the Hebrew name of this town (דרום), it was for a long time thought that Ibn Ezra wrote his works on the Island of Rhodes, and later (since Grätz) that he wrote them in the town of Rodez (Rhodez) in southern France ("R. E. J." xvii. 301; "Monatsschrift," xlii. 22).

In Northern France.

In Dreux Ibn Ezra completed several of his exegetical works, and, after recovering from an illness, began a new commentary on the Pentateuch ("Monatsschrift," xlii. 23). In 1158 Ibn Ezra was in London, where he wrote his religio-philosophic work "Yesod Mora" for his pupil Joseph b. Jacob, also his letter on the Sabbath. In northern France Ibn Ezra came into contact (at Rouen ?) with the celebrated grandson of Rashi, R. Jacob Tam, and a poem in praise of his brother R. Samuel b. Meïr written there by Ibn Ezra has been preserved (Rosin, *l.c.* p. 225).

In 1160 he was again in Provence, and at Narbonne he translated an astronomical work from the Arabic. If the dates given in a poem concluding his commentary on the Pentateuch are correct (comp. Rosin, *l.c.* p. 81), Ibn Ezra's life ended at the place where the second period of his activity began, namely, Rome, where he put the finishing touches to his commentary and probably also began his last grammatical work ("Safah Berurah"). In the introductory verse of this uncompleted work, which he wrote for his pupil Solomon, Ibn Ezra expresses the hope that "it will be a legacy of Abraham the son of Meïr, and will preserve his memory from generation to generation." These are the farewell words of a writer who at the same time feels his end approaching and reckons on lasting fame. If Abraham Zacuto's statement ("Yuḥasin," ed. London, p. 218)—which, however, is not substantiated—be accepted, that Ibn Ezra died in Calahorra (in northern Spain on the boundary between Navarre and Old Castile), it must be supposed that a longing to see his old Spanish home made him leave Rome and that he died on the way on Spanish soil.

In one of his best-known poems ("Nedod Hesir Oni") Ibn Ezra has characterized the second period of his life in the words: "I resided in that place as a stranger, wrote books, and revealed the secrets of knowledge." He is the only example of a wandering scholar who developed an unusually rich literary activity in his roaming existence under the stress of circumstances, and who wrote works of lasting importance.

A Roving Scholar.

Ibn Ezra himself regarded his life as that of an exile. He always called himself a Spaniard ("Sefardi"), and gives a touching expression of his love for his fatherland in an elegy on the persecution by the Almohades which began in 1142. In this poem ("Diwan," No. 169) he enumerates the Spanish and the North-African towns in which the communities fell victims to the persecution. His remark on the commandment concerning the festal bunch of greens (Lev. xxiii. 40) gives a glimpse into his longing for his beautiful native land: "Whoever is exiled from Arabian lands to the lands of Edom [Christian Europe] will understand, if he has eyes, the deep meaning of this commandment."

His Mission.

The wandering life of an exile, such as Ibn Ezra led for nearly three decades, gave him the opportunity to carry out a mission which was to an eminent degree historical. He became a propagator among the Jews of Christian Europe, who were unacquainted with Arabic, of the science of Judaism, a science which had been founded long before with that language as its literary medium. He was fitted for this mission, as no one else, through the versatility of his learning and through his clear and charming Hebrew style. The great compass of his literary activity will be seen from the following résumé of his works:

Biblical Exegesis: Ibn Ezra's importance in this field has already been mentioned (see JEW. ENCYC. iii. 169, *s.v.* BIBLE EXEGESIS). His chief work is the commentary on the Pentateuch, which, like that of Rashi, has called forth a host of supercommentaries, and which has done more than any other work to establish his reputation. It is extant both in numerous manuscripts and in printed editions (1st ed., Naples, 1488). The commentary on Exodus published in the printed editions is a work by itself, which he finished in 1153 in southern France. A shorter commentary on Exodus, more like the commentaries on the remaining books of the Pentateuch, was first published in 1840 at Prague (ed. I. Reggio).

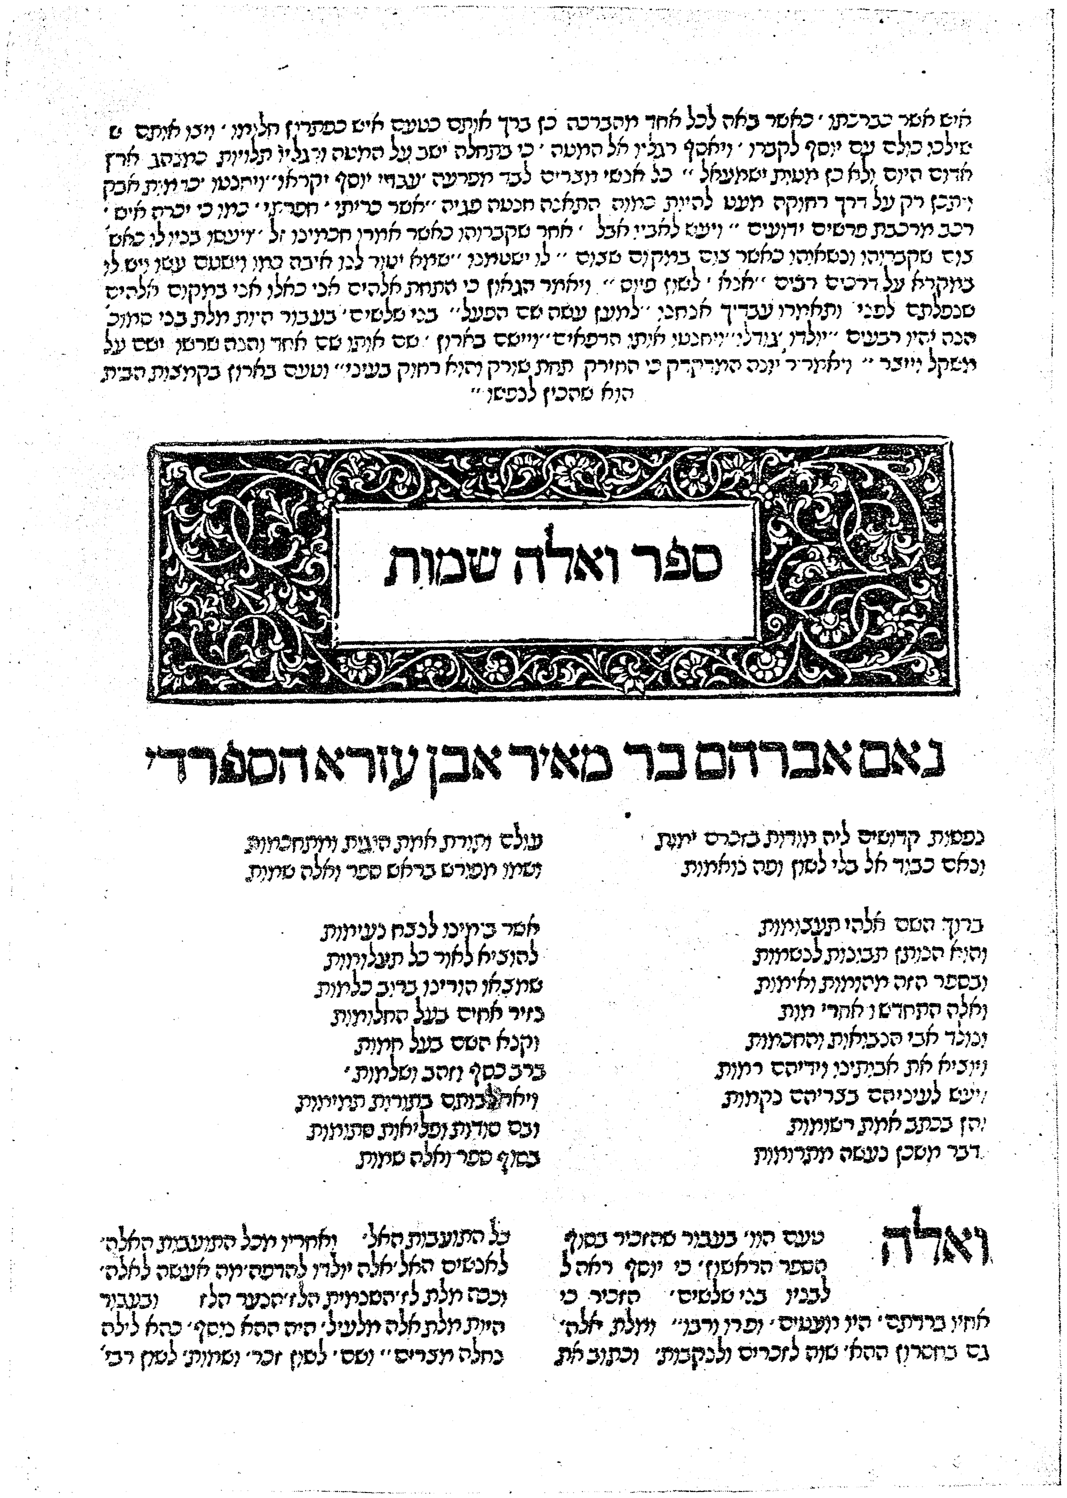
Commentaries.

A combination of these two commentaries is found in an old and important Cambridge MS. (Bacher, "Varianten zu Abraham ibn Ezra's Pentateuchcommentar, aus dem Cod. in Cambridge No. 46," Strasburg, 1894). M. Friedländer has published the beginning of a second commentary on Genesis ("Essays," 1877). The complete commentary on the Pentateuch, which, as has already been mentioned, was finished by Ibn Ezra shortly before his death, was called "Sefer ha-Yashar." In the rabbinical editions of the Bible the following commentaries of Ibn Ezra on Biblical books are likewise printed: Isaiah (1874; separate ed. with English translation by M. Friedländer); the Twelve Minor Prophets; Psalms; Job; the Megillot; Daniel. The commentaries on Proverbs and Ezra (with Nehemiah) which bear Ibn Ezra's name are by Moses Ḳimḥi. Another commentary on Proverbs, published in 1881 by Driver and in 1884 by Horowitz, is also erroneously ascribed to Ibn Ezra. Additional commentaries by Ibn Ezra to the following books are extant: Song of Solomon (ed. Mathews, 1874); Esther (ed. Zedner, 1850); Daniel (ed. Mathews, 1877). He also probably wrote commentaries to a part of the remaining books, as may be concluded from his own references (see Ludwig Levy, "Reconstruction des Commentars Ibn Ezra's zu den Ersten Propheten," Berlin, 1903).

Hebrew Grammar: (1) "Moznayim" (1140), chiefly an explanation of the terms used in Hebrew grammar; as early as 1148 it was incorporated by Judah Hadassi in his "Eshkol ha-Kofer," with no mention of Ibn Ezra (see "Monatsschrift," xl. 74), first ed. in 1546. (2) Translation of the work of Ḥayyuj into Hebrew (ed. Onken, 1844). (3) "Sefer ha-Yesod," or "Yesod Diḳduḳ," still unedited (see Bacher, "Abraham ibn Ezra als Grammatiker," pp. 8-17). (4) "Ẓaḥot" (1145), on linguistic correctness, his best grammatical work, which also contains a brief outline of modern Hebrew meter; first ed. 1546. (5) "Safah Berurah" (see above), first ed. 1830. (6) A short outline of grammar at the beginning of the unfinished commentary on Genesis. The importance of Ibn Ezra's grammatical writings has already been treated in GRAMMAR, HEBREW.

Smaller Works, Partly Grammatical, Partly Exegetical: (1) "Sefat Yeter," in defense of Saadia Gaon against Dunash ben Labraṭ, whose criticism of Saadia, Ibn Ezra had brought with him from Egypt; published by Bislichs 1838 and Lippmann 1843. (2) "Sefer ha-Shem," ed. Lippmann, 1834. (3) "Yesod Mispar," a small monograph on numerals, ed. Pinsker, 1863, at the end of his book on the Babylonian-Hebrew system of punctuation. (4) "Iggeret Shabbat," a responsum on the Sabbath, dated 1158, ed. Luzzatto, in "Kerem Ḥemed," iv. 158 *et seq.*

Religious Philosophy: "Yesod Mora" (1158), on the division of and reasons for the Biblical commandments; 1st ed. 1529. For Ibn Ezra's religious philosophy, in which Neoplatonic ideas predominate, see Rosin in "Monatsschrift," xlii., xliii. Rosin has not noticed the metaphysical works "'Aruggat ha-Ḥokmah" and "Pardes ha-Mezimmah" (see "Kerem Ḥemed," iv. 1-5), written in rimed prose, the authenticity of which is



איש אשר כברכתו · כאשר באה לכל אחד מהברכה כן ברך אותם כטעם איש כפתרון חלומו · ויצו אותם שילכו כולם עם יוסף לקברו · ויאסף רגליו אל המטה · כי בתחלה ישב על המטה ורגליו תלויות כמנהג ארץ הדוס היום ולא כן מנהג ישמעאל ·· כל אנשי מצרים לבד מפרעה · עבדי יוסף יקראו ·· ויחנטו · אין לו ריע במקרא רק על דרך רחוקה מעט להיות כמוהו התאנה חנטה פגיה ·· אשר כריתי · חפרתי · כמו כי יכרה איש · רכב מרכבת פרשים ידועים ·· ויעש לאביו אבל · אחר שקברוהו כאשר אמרו חכמינו ז״ל ·· ויעשו בניו לו כאשר צום שקברוהו ונשאוהו כאשר צום במקום שצום ·· לו ישטמנו ·· שמא ישוב לבו איבה כמו וישטם עשו ויש לו במקרא על דרכים רבים ·· אנא · לשון פיוס ·· ויאמר הגאון כי התחת אלהים אני כאלו אני במקום האלהים שנפלתם לפני ותאמרו עבדיך אנחנו ·· למען עשה שם הפעל ·· בני שלשים · בעבור היות אלת בני כמוך הנה יהיו רבעים ·· ילדו על ברכי ·· ויחנטו אותו הרפאים ·· ויישם בארון · שם אותו שם אחד והנה שרשו ושם על משקל וייצר ·· ואמר ר׳ יונה המדקדק כי החירק תחת שורק והוא רחוק בעיני ·· וטעם בארון בקופסות הבית הוא שהכין לנפשו ··

ספר ואלה שמות

נאם אברהם בר מאיר אבן עזרא הספרדי

כפות קדושים ליה מודות בזכרם יתנת · עולם ותורת אמת הוגות ומתאמנות
ונאם כבוד אל בלי לשון ושפה נואמות · ושמו מפרש בראש ספר ואלה שמות

ברוך השם אלהי תעצומות · אשר ביקרנו לבאר נעימות
והוא הנותן תבונות לנשמות · להוציא לאור כל תעלומות
ובספר הזה מהומות ואימות · שמצאו הורינו בריב כלמות
ואלה הקדושים אחרי מות · נזיר אחים בעל החלומות
ונולד אבי הנביאות והחכמות · וקנא השם בעל קמות
ויוציא את אבותינו וידיהם רמות · ברב כסף וזהב ושלמות ·
ויעש לעיניהם בצריהם נקמות · ויאר לבותם בתורות תמימות

PAGE FROM THE FIRST EDITION OF ABRAHAM IBN EZRA'S COMMENTARY TO THE PENTATEUCH, NAPLES, 1488.
(In the Columbia University Library, New York.)

maintained by Schreiner ("Der Kalam in der Jüdischen Litteratur," p. 35).

Mathematics, Astronomy, Astrology: (1) "Sefer ha-Eḥad," on the peculiarities of the numbers 1-9 (ed. Pinsker and Goldhardt, Odessa, 1867). (2) "Sefer ha-Mispar" or "Yesod Mispar," arithmetic. Steinschneider, on the basis of twenty manuscripts, describes its contents in "Abraham ibn Ezra," pp. 103-118. (3) "Luḥot," astronomical tables. (4) "Sefer ha-'Ibbur," on the calendar (ed. Halberstam, 1874). (5) "Keli ha-Neḥoshet," on the astrolabe (ed. Edelmann, 1845). (6) "Shalosh She'elot," answer to three chronological questions of David Narboni (ed. Steinschneider, 1847). (7) Translation of two works by the astrologer Mashallah: "She'elot" and "Ḳadrut" (Steinschneider, "Hebr. Uebers." pp. 600-603). The second work was edited by M. Grossberg in an appendix to Dunash b. Tamim's "Yeẓirah" commentary, London, 1902. Various astrological writings in two versions (written in 1146 and 1198; see Steinschneider, "Abraham ibn Ezra," pp. 126 *et seq.*; idem, "Cat. Bodl." col. 687).

Pseudepigraphic: The two commentaries on Biblical books which are falsely ascribed to Ibn Ezra mentioned above. In addition: (1) "Sefer ha-'Aẓamim" (Steinschneider, "Hebr. Uebers." p. 448). (2) "Sha'ar ha-Shamayim," the introduction to which has been published by Luzzatto in "Betulat Bat Yehudah," pp. v.-xi. See, further, Steinschneider, "Abraham ibn Ezra," pp. 71-75; *idem*, "Die Arabische Litteratur der Juden," p. 156.

As Poet.

Some of Ibn Ezra's poems are contained in the "Diwan" (260 numbers), which was edited by I. Egers from the only manuscript in existence. This also contains the religio-philosophical poem "Ḥai b. Meḳiẓ," in rimed prose, the contents of which are based on an Arabic prose work of Avicenna (Ibn Sina). Besides those contained in the "Diwan," there are a great many other poems by Ibn Ezra, some of them religious (the editor of the "Diwan" in an appended list mentions nearly 200 numbers) and some secular. Rosin has critically edited and translated a considerable number of these in several yearly reports of the Breslau Seminary (1885 to 1894). They have also been edited, together with an introduction and notes, by David Kahana, 2 vols., Warsaw, 1894.

Al-Ḥarizi ("Taḥkemoni," iv.) says of Ibn Ezra's poetry: "The poems of Ibn Ezra provide help in time of need, and cause refreshing rain in time of drought. All of his poetry is lofty and admirable in its contents." Zunz ("Literaturgesch." p. 207) says: "Through him the gap between piyyut [synagogal poetry] and classic style came clearly to be recognized. Yet poetry was not his special line of activity. Number and measure lurk in his verses, and flashes of thought spring from his words—but not pictures of the imagination."

It should also be noticed that no work by Ibn Ezra in Arabic has been preserved, although he was perfectly familiar with that language.

IBN EZRA, ISAAC (ABU SA'D): Spanish poet of the twelfth century; son of Abraham ibn Ezra. He won fame as a poet at an early age, probably while still in his Spanish home. Al-Ḥarizi ("Taḥkemoni," iii.) says of him: "Like his father, Isaac also drew from the springs of poetry; and some of the father's brilliancy flashes in the songs of the son." He probably left Spain with his father, before 1140. In 1143 Isaac was in Bagdad as a protégé of the Arab Abu al-Barakat Hibat Allah (Nathanael). The poem in which he extols his patron and his commentary on Ecclesiastes has been preserved (ed. by Dukes in "Kokebe Yiẓḥaḳ," xxiv.; comp. Steinschneider, "Hebr. Bibl." i. 91). When Hibat Allah became converted to Islam, Isaac ibn Ezra followed his example. Al-Ḥarizi says (*ib.*): "But when he came into Eastern lands the glory of God no longer shone over him; he threw away the costly garments of Judaism, and put on strange ones." Abraham ibn Ezra mourned in two elegies over the apostasy of his son. One of these poems was composed three years after Isaac's abandonment of Judaism, as appears from the second strophe. Abraham ibn Ezra, therefore, could not have heard of the sad event until a long time afterward. Regarding the possible identity of Isaac ibn Ezra and an Isaac b. Abraham ha-Sefaradi, for whom a copy of the Hebrew translation of Ḥayyuj's works and of the Mustalḥiḳ was made by Abu al-Walid, see "R. E. J." xx. 140.

G. W. B.

IBN EZRA, JOSEPH BEN ISAAC: Oriental rabbi of the sixteenth and seventeenth centuries; descendant of the Ibn Ezra family of Spain. Brought up in Salonica, he studied under the direction of Samuel di Modena, and became head of the Talmudic school there; among his pupils were Aaron Ḥazzan, Meïr Melammed, and Shabbethai Jonah. Late in life Ibn Ezra was compelled to seek refuge in Constantinople, whence he was called to the rabbinate of Sofia, in which city he died. Ibn Ezra was a learned Talmudist, and his works were highly esteemed. He wrote: "Rosh Yosef," a commentary on the Ṭurim, of which the part treating of communal taxes and contributions was published at Salonica (1601), under the title "Massa' Melek"; "'Aẓamot Yosef," commentary on Ḳiddushin (*ib.* 1601; Berlin, 1699; Fürth, 1767). In the preface to the latter the author states that the object of the commentary is to give, in addition to the ordinary exposition of the text ("peshaṭ"), a clear insight into the methodology of the Talmud. He states further that the responsa of Joseph ibn Leb (1576), which reached him after he had finished his commentary, compelled him to make some changes therein. Appended to the work are the halakic decisions of the treatise in question with explanations of some difficult passages in various other treatises. Ibn Ezra also wrote: a commentary on Baba Meẓi'a, mentioned in the "'Aẓamot Yosef"; rules for the interpretation of the Talmud; responsa, some of which are found in the "'Aẓamot Yosef," the responsa of Salomon ha-Kohen, Samuel di Modena's "Beno Shemuel," and the "Shai la-Mora" of Shabbethai Jonah.

S. I. Br.

IBN EZRA, JUDAH: Son of Joseph ibn Ezra of Granada; Spanish state official of the twelfth century. He was raised by Alfonso VII. of Castile to the position of commander of the frontier fort of Calatrava, to the dignity of "nasi" (prince), and, a few years later, to the post of majordomo of the royal household. Judah used his position and wealth to benefit his coreligionists, who were persecuted by the victorious Almohades. With the permission of Alfonso, Judah also vigorously combated Karaism, which was gaining ground in Castile, and wrote in refutation of its arguments.

G. M. K.

IBN EZRA, MOSES BEN JACOB HA-SALLAḤ (ABU HARUN MUSA): Spanish philosopher, linguist, and poet; born at Granada about 1070; died after 1138; relative of Abraham ibn Ezra and pupil of Isaac ibn Ghayyat. The surname "ha-Sallaḥ" is generally believed to have been given him on account of the numerous "seliḥot" written by him. Ibn Ezra belonged to one of the most prominent families of Spain. According to Isaac Israeli ("Yesod 'Olam," part iv., ch. xviii., end), he had three brothers, Isaac, Joseph, and Zerahiah, all of whom were distinguished scholars. From his correspondence with his junior and friend Judah ha-Levi, who dedicated to him many poems, it is known that Ibn Ezra suffered a great disappointment in the rejection of his addresses by a niece, who died shortly after her marriage to one of his brothers. To this affair of the heart, doubtless the cause of his leaving his native city, is probably due the note of melancholy and resignation which distinguishes his poetry.

Many-Sided Activity.

Ibn Ezra's activity was extensive and many-sided. He was a distinguished philosopher, an able linguist, and, above all, a powerful poet, of whom Judah al-Ḥarizi said: "Moses ibn Ezra draws pearls from the well of thought" ("Taḥkemoni," ch. iii.). To the domain of philosophy belongs Ibn Ezra's "Al-Ḥadiḳah fi Ma'ani al-Mujaz wal-Ḥaḳiḳah," anonymously translated into Hebrew under the title "'Arugat ha-Bosem." The Arabic original and a fragment of the translation are still extant in manuscript, the former in the Imperial Library of St. Petersburg, the latter in the libraries of Hamburg and Oxford (Steinschneider, "Hamburg Cat." No. 256; Neubauer, "Cat. Bodl. Hebr. MSS." No. 1180, 20). The "'Arugat ha-Bosem" is divided into seven chapters: (i.) general remarks on God, man, and philosophy; (ii.) the unity of God; (iii.) the inadmissibility of applying attributes to God; (iv.) the impropriety of giving names to God; (v.) motion; (vi.) nature; (vii.) the intellect. The authorities quoted in this work are Hermes (identified by Ibn Ezra with Enoch), Pythagoras, Socrates, Aristotle, Plato, (pseudo-) Empedocles, Alfarabi, Saadia Gaon, and Solomon ibn Gabirol. However, the brilliancy of Ibn Ezra's achievements in other directions was prejudicial to his philosophical reputation, and although his "'Arugat ha-Bosem" betrays profound knowledge of the Greco-Arabic philosophy, it was somewhat neglected; the only known instance of its quotation is in a letter of Jedaiah Bedersi to Solomon ben Adret.

His Rhetoric.

Far more successful was the "Kitab al-Muḥaḍarah wal-Mudhakarah," a treatise on rhetoric and poetry, which was composed on the lines of the "Adab" writings of the Arabs, and is the only work of its kind in Hebrew literature. It was written at the request of a friend who had addressed to him eight questions on Hebrew poetry, and is divided into a corresponding number of chapters. In the first four the author treats generally of prose and prose-writers, of poetry and poets, and of the natural poetic gift of the Arabs, which he attributes to the climate of Arabia. He concludes the fourth chapter with the statement that, with very rare exceptions, the poetical parts of the Bible have neither meter nor rime. The fifth chapter is the most important. It begins with the history of the settlement of the Jews in Spain, which, according to the author, began during the Exile, the word "Sepharad" used by the prophet Obadiah (verse 20) meaning "Spain." Then comes a full description of the literary activity of the Spanish Jews, giving the most important authors and their works. In the sixth chapter the author quotes various maxims and describes the general intellectual condition of his time, which seems not to have been very brilliant. He deplores the indifference shown by the public to scholars. This indifference, he declares, does not affect him personally; for he can not count himself among those who have been ill-treated by fate; he has experienced both good and bad fortune. Moreover, he possesses a virtue which permits him to renounce any pretension to public recognition—the virtue of contentment and moderation. In the seventh chapter the author discusses the question whether it is possible to compose poetry in dreams, as some trustworthy writers claim to have done. The eighth chapter is divided into two parts, the first dealing with poetry and poems, and the second (in twenty paragraphs) with tropes, figures, and other poetic forms.

The "Kitab al-Muḥaḍarah" is still extant in manuscript in the libraries of Berlin, Oxford, and St. Petersburg. A part of the work, including the first four chapters, was published by Paul Kokowzow, St. Petersburg, 1895; the second chapter was published by H. Hirschfeld in his Judæo-Arabic chrestomathy. An estimate and analysis of the work have been given by Schreiner ("R. E. J." xxi., xxii.); an index of the authors and works referred to therein was made by Steinschneider ("Berlin Cat." ii. 30 *et seq.*). A fragment of a Hebrew translation (entitled "Eshkol ha-Kofer") of the "Kitab al-Muḥaḍarah" is cited by Zacuto ("Yuḥasin," p. 220, ed. London). In this work Ibn Ezra mentions another work of his, "Fi Faḍa'il Ahl al-Adab," which is no longer in existence.

His Poetry.

Ibn Ezra was an unrivaled master of the Hebrew language. His poetical productions, both sacred and secular, are distinguished by their beauty of form and style, and were, according to Al-Ḥarizi ("Taḥkemoni," iii.), preferred by poets even to those of Judah ha-Levi and Abraham ibn Ezra. Ibn Ezra's secular poems are contained in two works: in the "Tarshish" (so called on account of the 1,210 lines it comprised), or "'Anaḳ" (Arabic title "Zahr al-

Riyaḍ"), and in the first part of his "Diwan." The "Tarshish" is divided into ten chapters, each of which contains in order the twenty-two letters of the alphabet. It is written in the Arabic style of poetry termed "tajnis," which consists in the repetition of words in every stanza, but with a different meaning in each repetition. The first chapter is dedicated to a certain Abraham (certainly not Abraham ibn Ezra), whose merits he exalts in Oriental fashion. In the nine remaining chapters are discussed: (ch. ii.) wine, love, and song; (iii.) the beauty of country life; (iv., v.) love-sickness and the separation of lovers; (vi.) unfaithful friends; (vii.) old age; (viii.) vicissitudes of fortune, and death; (ix.) confidence in God; (x.) the glory of poetry.

Ibn Ezra's earnestness is reflected even in the most frivolous parts of the "Tarshish." It would seem that even when he sings of love and wine and of kindred subjects his mind is still occupied with the grave problems of life. He is a great lover of nature, and interprets it in vivid language. Especially striking is the seventh chapter, in which he bewails the loss of youth. His gray hair renders him sad and morose; "O that the night [blackness] still crowned my hair instead of the day!" he exclaims. His only consolation is that old age will free him from passions and enable him to lead a decorous life. The "Tarshish" was published by David Günzburg, Berlin, 1886. In the manuscript copies found in various European libraries (Munich, Oxford, Paris, etc.) the "Tarshish" is accompanied by a commentary explaining the signification of the homonyms used. It is possible that the elements of this commentary come from the author himself.

The "Diwan," still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1792), contains three hundred secular poems, consisting in part of praises of friends and elegies on the death of scholars.

Sacred Poems.

The greater part of Ibn Ezra's 220 sacred compositions, which are scattered in nearly all the Maḥzorim (that of the Ashkenazim excepted) and in the "Diwan," are penitential poems ("seliḥot") for the New-Year and the Day of Atonement. Their aim is to invite man to look within himself; they depict the emptiness of life, the vanity of worldly glory, the bitter disillusion which must be experienced at last by the pleasure-seeker, and the inevitableness of divine judgment. A skilfully elaborated piece of work is the "'Abodah," the introduction to which is a part of the Portuguese Maḥzor. Unlike his predecessors, Ibn Ezra begins his review of Biblical history not with Adam, but with the giving of the Law. The piyyuṭim which follow the mishnaic text of the Temple service, especially the piyyuṭ "Happy is the eye that beheld it," are of remarkable beauty.

IBN EZRA, SOLOMON BEN MOSES: Rabbi of Venice; flourished in the second half of the seventeenth century. He was a disciple of Joseph Escapa and wrote a preface to, and edited the second part of, the latter's "Rosh Yosef" (Smyrna, 1659). He also edited: Solomon Algazi's "Me'ullefet Sappirim," to which he wrote a preface (*ib.* 1665); R. Jacob Berab's responsa (Venice, 1663, with many of his own); and "Meḳor Baruk," the responsa of Baruch Kalai (Smyrna, 1660).

D. M. Sel.

IBN GABIROL, SOLOMON BEN JUDAH (ABU AYYUB SULAIMAN IBN YAḤYA IBN JABIRUL), known also as **Avicebron:** Spanish poet, philosopher, and moralist; born in Malaga about 1021; died about 1058 in Valencia. He is called by Grätz "the Jewish Plato," and by Steinschneider "the most original philosophical writer among the Jews and Arabs." The name "Avicebron" is a corruption of "Ibn Gabirol" ("Ibngebirol," "Avengebirol," "Avengebrol," "Avencebrol," "Avicebrol," "Avicebron"). Little is known of Gabirol's life. His parents died while he was a child. At seventeen years of age he became the friend and protégé of Jekuthiel Hassan. Upon the assassination of the latter as the result of a political conspiracy, Gabirol composed an elegy of more than 200 verses. The death of Hai Gaon also called forth a similar poem. When barely twenty Gabirol wrote "'Anak," a versified Hebrew grammar, alphabetical and acrostic, consisting of 400 verses divided into ten parts. Of this grammar, which Ibn Ezra characterizes as of incalculable value, ninety-five lines have been preserved by Solomon Parḥon. In these Gabirol reproaches his townsmen with their neglect of the holy tongue.

Gabirol's residence in Saragossa, in which city he passed his early days, was embittered by strife. Envy and ill-will pursued him, which accounts for the pessimistic strain underlying his work. Life finally became unbearable in Saragossa, and he fled. He thought of leaving Spain, but remained and wandered about. He gained another friend and patron in the person of Samuel ibn Nagdela, whose praises he sang. Later an estrangement arose between them, and Nagdela became for a time the butt of Gabirol's bitterest irony. All testimonies agree that Gabirol was comparatively young at the time of his death, which followed years of wandering. The year of his death was probably 1058 or 1059, the former date being accepted by Steinschneider ("Hebr. Uebers." p. 379, note 76) and Neubauer ("Monatsschrift," xxxvi. 498 *et seq.*). The erroneous supposition that Gabirol died before reaching his thirtieth year is due to a misunderstanding of some words of Sa'id by Moses ibn Ezra and by Al-Ḥarizi (comp. Kaufmann, "Studien," pp. 79-80, note 2; Kämpf, "Beiträge," p. 189; Wise, "Improvement of Moral Qualities," p. 6, note 3, New York, 1901). The incorrect date (1070) of Gabirol's death given in the "Yuḥasin" was accepted by many medieval and modern writers, among the latter being Munk, Dukes, Grätz, and Guttmann.

A strange legend concerning the manner of Gabirol's death is related by Ibn Yaḥya in "Shalshelet ha-Ḳabbalah." A Mohammedan, jealous of Gabirol's poetic gifts, slew him, and buried him beneath the roots of a fig-tree. The tree bore fruit abundantly; and the fruit was of extraordinary sweetness. This strange circumstance excited attention; a search was instituted, the remains of the murdered Gabirol were brought to light, and the murderer expiated his crime with his life.

Restorer of Neoplatonism.

Gabirol was the first teacher of Neoplatonism in Europe. He essayed again the part played by Philo. Philo had served as the intermediary between Hellenic, especially Platonic, philosophy and the Oriental world. He had Orientalized European philosophy and prepared the way for its Christianization. A thousand years later Gabirol Occidentalized Greco-Arabic philosophy and restored it to Europe. Strangely enough, the philosophical teachings of Philo and Gabirol were alike ignored by their fellow Jews; and the parallel may be extended by adding that Philo and Gabirol alike exercised a very considerable influence in extra-Jewish circles: Philo upon primitive Christianity, and Gabirol upon the scholasticism of medieval Christianity. Gabirol's service, in common with that of other Arabic and Jewish philosophers, in bringing the philosophy of Greece under the shelter of the Christian Church, was but a return for the service of the earlier Christian scholars, who had translated the chief works of Greek philosophy into Syriac and Arabic.

Seyerlen ("Beziehungen," pp. 24-25) adduces a further parallel between Gabirol and Spinoza, who respectively introduced medieval and modern philosophy, and holds that each kept his philosophical speculation free from theological bias.

"Fons Vitæ" (*i.e.*, מקור חיים; Ps. xxxvi. 10) is a philosophical dialogue between master and disciple. The book derives its name from the fact that it considers matter and form as the basis of existence and the source of life in every created thing (Kaufmann, "Gesch. der Attributenlehre aus der Jüdischen Religionsphilosophie des Mittelalters," p. 95, note 1). It was translated from the Arabic—the original title having probably been "Yanbu' al-Ḥayat"—into Latin in the year 1150 under the patronage of Archbishop Raymond of Toledo, who had founded a veritable bureau of translation (Löwenthal, "Pseudo-Aristoteles," p. 5, note 2) consisting of the Archdeacon of Segovia, Dominicus Gundisalvi or Gundisallinus, assisted by a Jewish physician who had been converted to Christianity, John Hispanus or Hispalensis, better known as "Ibn Daud" (corrupted into "Avendehut," or "Avendeath"). Jourdain called attention in 1843 to the important place of Avicebron in the history of philosophy. Haureau, in his "History of Scholastic Philosophy" (1850), dwelt on the philosophy of Avicebron as known through the citations in the "De Substantiis Separatis" of Aquinas. He was followed by Seyerlen, who, having discovered in 1855 a manuscript copy of the "Fons Vitæ" in the Mazarine Library in Paris, gave a synopsis of Gabirolean philosophy in Baur and Zeller's "Theologische Jahrbücher," xv.-xvi.

Identity with Avicebron.

In 1846 Solomon Munk discovered among the Hebrew manuscripts in the Bibliothèque Nationale, Paris, a work by Shem-Ṭob Palquera, which, upon comparison with a Latin manuscript of the "Fons Vitæ" of Avicebron (likewise found by Munk in the Bibliothèque Nationale), proved to be a collection of excerpts from an Arabic original of which the "Fons Vitæ" was evidently a translation. Munk concluded that Avicebron or Avencebrol, who had for centuries been believed to be a Christian scholastic philosopher, was identical with the Jew Ibn Gabirol ("Orient, Lit." 1846, No. 46). In 1859 Munk published his "Mélanges," containing the Hebrew text of Palquera's "Liḳḳuṭim min Sefer Meḳor Ḥayyim" with a French translation, an analysis of the contents, and some chapters on the life and writings of Gabirol, his sources, and the fate of his doctrine. In recent years the "Fons Vitæ" has received ample and scholarly treatment in the works of Seyerlen, Guttmann, Wittmann, Kaufmann, and Bäumker.

The "Fons Vitæ" consists of five tractates, treating respectively of (1) matter and form in general and their relation in physical substances ("substantiæ corporeæ sive compositæ"); (2) the substance which underlies the corporeality of the world ("de substantia quæ sustinet corporeitatem mundi"); (3) proofs of the existence of "substantiæ simplices," of intermediaries between God and the physical world; (4) proofs that these "substantiæ simplices," or "intelligibiles," are likewise constituted of matter and form; (5) universal matter and universal form.

The chief doctrines of the "Fons Vitæ" may be summarized as follows: (1) All created beings are constituted of form and matter. (2) This holds true of the physical world, of the "substantiis corporeis sive compositis," and is not less true of the spiritual world, of the "substantiis spiritualibus sive simplicibus," which latter are the connecting-link between the first substance, "essentia prima," that is, the Godhead, and the "substantia quæ sustinet novem prædicamenta," that is, the substance divided into nine categories—in other words, the physical world. (3) Matter and form are always and everywhere in the relation of "sustinens" and "sustentatum," "propriatum" and "proprietas," substratum and property or attribute.

Gabirol in the "Fons Vitæ" aims to outline but one part of his philosophical system, the doctrine of matter and form; hence the "Fons Vitæ" also bore the title "De Materia et Forma." The manuscript in the Mazarine Library is entitled "De Materia Universali." The main thesis of the "Fons Vitæ" is that all that exists is constituted of matter and form; one and the same matter runs through the whole universe from the highest limits of the spiritual down to the lowest limits of the physical, excepting that matter the farther it is removed from its first source becomes less and less spiritual. Gabirol insists ever and over again that the "materia universalis" is the substratum of all that exists. Wittmann ("Thomas von Aquin," p. 13) considers Gabirol's many arguments in proof of the universality of matter as among his most original contributions to philosophy.

Stated differently, Gabirol's position is that everything that exists may be reduced to three categories: the first substance, God; matter and form, the world; the will as intermediary.

The "Fons Vitæ."

Gabirol derives matter and form from absolute being. In the Godhead he seems to differentiate "essentia," being, from "proprietas," attribute, designating by "proprietas" the will, wisdom, creative word ("voluntas, sapientia, verbum agens"). In reality he thinks of the Godhead as being, and as will or wisdom, regarding the will as identical with the divine nature. This position is implicit in the doctrine of Gabirol, who teaches that God's existence is knowable, but not His being or constitution, no attribute being predicable of God save that of existence.

Kaufmann holds that Gabirol was an opponent of the doctrine of divine attributes. While there are passages in the "Fons Vitæ," in the "Ethics," and even in the "Keter Malkut" (whence Sachs deduces Gabirol's acceptance of the theory of the doctrine of divine attributes) which seem to support this assumption, a minute examination of the questions bearing on this, such as has been made by Kaufmann (in "Gesch. der Attributenlehre"), proves very clearly that will and wisdom are spoken of not as attributes of the divine, but with reference to an aspect of the divine, the creative aspect; so that the will is not to be looked upon as intermediary between God and substance and form. Matter or substance proceeds from the being of God, and form from God as will, matter corresponding to the first substance and form to the will; but there is no thought in the mind of Gabirol of substance and will as separate entities, or of will as an attribute of substance. Will is neither attribute nor substance, Gabirol being so pure a monotheist that he can not brook the thought of any attribute of God lest it mar the purity of monotheism. In this Gabirol follows strictly in the line of Hebrew tradition.

Relations to Plotinus.

Joël and Guttmann hold that the "Fons Vitæ" is merely a text-book of Neoplatonism; but Kaufmann objects that it contains not only certain teachings not to be found in Plotinus, but others irreconcilable with Neoplatonism. Plotinus speaks of a twofold matter; Gabirol, of a single or universal matter. According to Plotinus the whole question is one of minor importance; it is the corner-stone of Gabirol's system. Despite some differences, Gabirol is, however, in many of his essential teachings dependent upon Plotinus; not directly, since the "Enneads" were not translated into Arabic, but rather through secondary sources. This is notably the case, in the so-called Theology of Aristotle, with the commentary of Porphyry, which V. Rose has shown to be a paraphrase of the last three "Enneads" of Plotinus, possibly in part the work of Porphyry.

Another source was the pseudo-Empedoclean writings. In connection with pseudo-Empedocles, it must not be overlooked that the book of Gabirol which might have given clearer evidence of this is lost—"Origo Largitatis et Causa Essendi" (Kaufmann, "Studien," pp. 56-57)—if it was ever written. In the introduction to the "Likkuṭim" Palquera suggests such dependence of Gabirol upon the "Five Substances" of pseudo-Empedocles. Whereas the influence of Empedocles on the Cabala is a fantastic supposition, the work of pseudo-Empedocles exercised a real influence on the Jewish religious philosophy and the Cabala of the Middle Ages. Kaufmann gives three versions of the excerpts from the "Five Substances." These fragments do not adequately show the debt of Gabirol to pseudo-Empedocles, except that they aim to prove that all spiritual substances are constituted of a spiritual matter. Moreover, the place of matter in the system of Gabirol reminds one of the "Five Substances," the teaching of Gabirol concerning the intermediaries that bind together all degrees of creation being illustrated by pseudo-Empedocles' picture of the air between the seer and the seen, partaking of the properties of both.

That Gabirol was influenced by "The Encyclopedia of the Brethren of Sincerity" has been clearly demonstrated by Haneberg. Saadia is the only Jewish author whose influence upon Gabirol is distinctly perceptible; and Sa'id, the Mohammedan, is the only Arabic writer cited in the "Fons Vitæ."

It has been argued with some show of plausibility that Gabirol deliberately set out to reconcile Neoplatonism with the monotheistic conception of Judaism. Geiger finds complete harmony between Gabirol's conception of the Deity and the historical Jewish conception; and Guttmann and Eisler hold that in Gabirol's doctrine of the will there is a departure from the pantheistic emanation doctrine of Neoplatonism and an attempted approach to the Biblical doctrine of creation. It is undeniable that a suggestion of Judaic monotheism is to be found in Gabirol's doctrine of the oneness of the "materia universalis." Moreover, the Neoplatonic doctrine that the Godhead is unknowable naturally appealed to a Jewish rationalist, who, while positing the existence of God, studiously refrained from ascribing definite qualities or positive attributes to Him. But this theory is contradicted by the fact that Gabirol, unlike other medieval Jewish philosophers who regarded philosophy as the "handmaid of theology," pursued his philosophical studies regardless of the claims of religion, keeping "his philosophical speculation free from every theological admixture."

Independent Position.

In this respect Gabirol is unique. The "Fons Vitæ" shows a total and absolute independence of Jewish religious dogma; not a verse of the Bible nor a line from the Rabbis is cited. For this reason Gabirol exercised comparatively little influence upon his Jewish successors—though this may be accounted for on the ground of the predominance of Aristotelianism from the twelfth century—and was accepted by the scholastics as a non-Jew, as an Arab or a Christian. The odor of heresy which clung to him prevented Gabirol from exercising a great influence upon Jewish thought: his theory of emanation was irreconcilable with the Jewish doctrine of creation; and the tide of Aristotelianism turned back the slight current of Gabirol's Neoplatonism.

Moses ibn Ezra is the first to mention Gabirol as a philosopher. He speaks of Gabirol's character and attainments in terms of highest praise, and in his "'Aruggat ha-Bosem" quotes several passages from the "Fons Vitæ." Abraham ibn Ezra, who gives several specimens of Gabirol's philosophico-allegorical Bible interpretation, borrows from the "Fons Vitæ" both in his prose and in his poetry without giving due credit. Joseph ibn Ẓaddiḳ, in his "Mikrokosmos," borrows very largely from the "Fons Vitæ" at every point of his system.

Treatment by Successors.

Abraham ibn Daud of Toledo, in the twelfth century, was the first to take exception to Gabirol's teachings. In the "Sefer ha-Ḳabbalah" he refers to Gabirol as a poet in complimentary phrase. But in order to counteract the influence of Gabirol the philosopher, he wrote an Arabic book, translated into Hebrew under the title "Emunah Ramah," in which he reproaches Gabirol with having philosophized without any regard to the requirements of the Jewish religious position, and bitterly accuses him of mistaking a number of poor reasons for one good one. Guttmann suspects that Ibn Daud may have entered the lists against Gabirol because he detected in Gabirol's theory of the will and its identification with the word of God an approach to the Christian Logos-doctrine. Schmiedel ("Monatsschrift," 1860, p. 311) holds, curiously enough, that the "Fons Vitæ" fell into disrepute because there are suggestions in it of belief in the Trinity; but Eisler ("Vorlesungen,"

p. 80, note 2) correctly says that such allusions are also to be found in the "Sefer Yeẓirah," and that they did not suffice to bring that book into disrepute. On the other hand, it is possible that, instead of banishing Gabirol from the remembrance of the Jews, this criticism only made him more widely known. Two hundred years after the writing of the "Fons Vitæ" and one hundred years after the appearance of "Emunah Ramah," Palquera made a compilation of extracts from the former work.

After Maimonides the inconsiderable influence of Gabirol was further lessened, though occasional traces of it are to be detected in the cabalistic literature of the thirteenth century and, especially after Palquera had compiled the extracts from the "Fons Vitæ," in the works of some post-Maimonidean authors, such as Aaron b. Joseph, Isaac ibn Laṭif, Abraham ibn Ḥisdai, Samuel ibn Ẓarẓa, Moses Solomon of Salerno. Later references to Gabirol, such as those of Eli Ḥabillo, Isaac Abarbanel, Judah Abarbanel, Moses Almosnino, and Joseph Solomon Delmedigo, are based upon an acquaintance with the scholastic philosophy, especially the works of Aquinas. Ḥabillo, as late as 1472, in a translation of the "Quæstio de Anima" of Aquinas, recognized in Avicebron "Ben Gabriol, the author of 'Fons Vitæ'"; and Abravanel the Younger refers to Gabirol as "il nostro Albenzubron."

Though Gabirol the philosopher was forgotten in Israel, Gabirol the poet kept alive the remembrance of the ideas of the philosopher; for his best-known poem, "Keter Malkut," is a religio-philosophical treatise in poetical form, the "double" of the "Fons Vitæ." Thus the eighty-third line of the poem points very clearly to one of the teachings of the "Fons Vitæ"; viz., that all the attributes predicated of God exist apart in thought alone and not in reality.

Influence on Scholasticism.

If Gabirol the philosopher was forgotten by the Jews, or deliberately ignored, abundant compensation awaited him in the treatment accorded him by the Christian world. Jourdain held, without exaggeration, that a knowledge of the philosophy of the thirteenth century was impossible without an understanding of the "Fons Vitæ" and its influence. Regarded as the work of a Christian philosopher, it became a bone of contention between the Platonist Franciscans led by Duns Scotus, who supported Gabirol, and the Aristotelian Dominicans led by Albertus Magnus and Thomas Aquinas, the latter holding in special horror the possible influence of Arabic-Jewish philosophy on Christian doctrine. The first sure sign of a direct influence exercised by Gabirol is to be found in the works of Dominicus Gundisallimus, who not merely translated the "Fons Vitæ" into Latin, but incorporated the ideas of Gabirol into his own teaching. William of Auvergne refers to the work of Gabirol under the title "Fons Sapientiæ." He speaks of Gabirol as a Christian, and praises him as "unicus omnium philosophantium nobilissimus." Alexander of Hales and his disciple Bonaventura accept the teaching of Gabirol that spiritual substances consist of matter and form. William of Lamarre is likewise a defender of Gabirolean doctrine.

The most zealous of the champions of Gabirol's theory of the universality of matter is Duns Scotus, through whose influence the basal thought of the "Fons Vitæ," the materiality of spiritual substances, was perpetuated in Christian philosophy, influencing later philosophers even down to Giordano Bruno, who refers to "the Moor, Avicebron." The main points at issue between Gabirol and Aquinas were three: (1) the universality of matter, Aquinas holding that spiritual substances are immaterial; (2) the plurality of forms in a physical entity, which Aquinas denied; and (3) the power of activity of physical beings, which Gabirol affirmed. Aquinas held that Gabirol made the mistake of transferring to real existence the theoretical combination of genus and species, and that he thus came to the erroneous conclusion that in reality all things are constituted of matter and form as genus and species respectively.

Munk and Löwenthal have supposed that the "Liber de Anima" of Gundisallimus is a work of Gabirol or of his school, because of certain resemblances to the doctrines of Gabirol. They ignore the many contradictions of Neoplatonic teachings scattered throughout the book, as well as Gabirol's failure to refer to any such work on the soul in the introduction to the "Fons Vitæ," in the course of which he refers to other books of his which have not been preserved. Löwenthal holds that Gabirol probably wrote an Arabic book on the soul in ten chapters, which was translated into Hebrew and cited by Gershon b. Solomon about 1250, and into Latin about 1130 by Hispalensis, and used in a compilation by Gundisallimus; that this included a large part of Gabirol's hypothetical work, extracts from a psychological work of Avicenna; and that the translator dropped the name of Gabirol and attached to the book the charmed name of Aristotle.

Ethical Treatise.

"The Improvement of the Moral Qualities" is an ethical treatise which has been called by Munk "a popular manual of morals." It was composed by Gabirol at Saragossa in 1045, at the request of some friends who wished to possess a book treating of the qualities of man and the methods of effecting their improvement. In two respects the "Ethics" (by which abbreviation the work may be cited) is highly original. In the first place, as compared with Saadia, his predecessor, and Baḥya and Maimonides, his successors, Gabirol took a new stand, in so far as he set out to systematize the principles of ethics independently of religious belief or dogma. Further, his treatise is original in its emphasis on the physio-psychological aspect of ethics, Gabirol's fundamental thesis being the correlation and interdependence of the physical and the psychical in respect of ethical conduct. Gabirol's theses may be summed up as follows:

The qualities of the soul are made manifest through the senses; and these senses in turn are constituted of the four humors. Even as the humors may be modified one by the other, so can the senses be controlled and the qualities of the soul be trained unto good or evil. Though Gabirol attributes the virtues to the senses, he would have it distinctly understood that he treats only of the five physical senses, not of the "concealed" senses, such as perception and understanding, which partake of the nature of the soul. In order to cultivate his soul, man must necessarily know its peculiarities, study himself as he is, closely examine his character and inclination, habituate himself to the abandonment of whatever is mean, *i.e.*, whatsoever draws him into close contact with the physical and temporal, and aim at the spiritual and the abiding. This effort in itself is blessedness. A man's ability to make such an effort is proof of divine benevolence.

Next follows the most original feature of Gabirol's ethical system, the arrangement of the virtues and vices in relation to the senses: every sense becoming the instrument, not the agent, of two virtues and two corresponding vices. To illustrate the branching forth of the twenty qualities from the five senses, Gabirol gives the following tabular diagram:

SIGHT.
Pride.
Meekness.
Pudency.
Impudence.

HEARING.
Love.
Hate.
Mercy.
Hard-heartedness (cruelty).

SMELL.
Wrath.
Good-will (suavity).
Jealousy.
Wide-awakeness.

TASTE.
Joy (cheerfulness).
Grief (apprehensiveness).
Tranquillity.
Penitence (remorse).

TOUCH.
Liberality.
Niggardliness.
Valor.
Cowardice.

Quaintness of Analogy.

While the underlying thought is both original and ingenious, Gabirol finds it necessary to resort to far-fetched and fanciful arguments in the working out of his plan. Thus he says, "Meekness is caused by a clear perception of the insignificance of the individual man as compared with the greatness and grandeur of the world." Pride is related to the sense of sight; for the proud man raises his eyebrows haughtily, superciliously. Gabirol's far-fetched attribution of love to the sense of hearing is in the highest degree absurd: "Hear, O Israel" (Deut. vi. 4) is followed by the command, "Thou shalt love the Lord thy God." The qualities attributed to the sense of smell, such as good-will and wrath, are revealed or expressed in the act of breathing. Other qualities, such as joy and tranquillity, are attributed to the sense of taste because they imply enjoyment and gratification, or the reverse, privation and care. Qualities such as liberality and niggardliness are attributed to the sense of touch on the slenderest grounds: the liberal man is called open-handed, and the niggardly man is designated as close-fisted.

The chief aim of the author was to guide his readers to the improvement of the moral qualities; and this he expected to do by citing the simplest and commonest facts of physical life. The organs of perception are not alone the instruments, but also the emblems, of the various manifestations of physical life. Having attributed to each of them a number of impulses, which are designated as virtues or vices, he develops a general conception of life as it is in this world (the animal life in man, as he distinctly wishes one to understand), which should and must be guided and governed by reason. Man must always see to it that his "animal soul" be in perfect submission to his "rational soul," *i.e.*, his intelligence must control his natural impulses. The consciousness of holding the animal impulses under control is felicity. The very effort that a man puts forth to make his animal soul subject to his rational soul affords him happiness. The principal agent in the exercise of this control is reason or intelligence. This intelligence is the mediator between the divine and the animal in man; and any human being who makes his intelligence master over his natural inclinations may enjoy the bliss to which Gabirol points. For an extended survey of the "Ethics" comp. "J. Q. R." iii. 159–181; Guttmann, "Thomas von Aquino," pp. 16–18; Horovitz, "Die Psychologie Ibn Gabirols," pp. 138–142; and Wise, *l.c.* pp. 9–28.

Gabirol cites some Bible verses and some Talmudic passages, and quotes Saadia, Galen, Socrates, Diogenes, Aristotle, Ardashir, Buzurg-Mihr, Alkuti, etc. The Arabic text contains some verses left untranslated by Ibn Tibbon. The "Ethics" is interesting as a collection of terse and pregnant ethical maxims, many of which seem to have been borrowed from the Arabic original of the מוסרי הפילוסופים of Ḥunain ibn Isḥaḳ (comp. Löwenthal, "Sinnsprüche der Philosophen," pp. 33–34).

The "Ethics" is cited less often than the "Choice of Pearls," and even less often than the "Fons Vitæ" Still it is mentioned by Ḥisdai, Bedersi, Berachiah ha-Naḳdan, and others. Although definite proofs of the acquaintance of Maimonides with the "Ethics" are not at hand, it is highly probable that he was familiar with it, and that under its influence he stated the object of ethics to be "the improvement of the qualities," *i.e.*, character. The influence of Gabirol upon Baḥya, as attested by the many points of resemblance between the "Ethics" and the "Ḥobot ha-Lebabot," was very considerable. This has been demonstrated by Brüll ("Jahrb." v. 71–79; comp. Jew. Encyc. ii. 447–448, and Wise, *l.c.* p. 17, note 3).

A unique manuscript of the original Arabic text is in the Bodleian Library at Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1422, 2), and has been published together with an English translation by S. S. Wise (New York, 1901). The Hebrew translation is the work of Judah ibn Tibbon (1167) for Asher b. Meshullam of Lunel. The following are the printed editions: (*a*) Constantinople, 1550, together with Baḥya's "Ḥobot ha-Lebabot"; (*b*) Riva di Trento, 1562, together with Ḥunain's "Musere ha-Pilusufim" and "Sefer ha-Tapuaḥ," under the general title "Goren Nakon"; (*c*) Lunéville, 1807 (same title and contents as the Riva di Trento edition); (*d*) Lyck, 1859 (same general title, "Goren Nakon," but containing only the "Ethics"); (*e*) Warsaw, 1886; (*f*) Budapest, 1896. The Hebrew poem in acrostic form, אריה, on the four elements, which is to be found in some editions after the tabular diagram of the virtues and vices, is not included in the old manuscripts nor in the Constantinople edition, and is probably unauthentic.

"Choice of Pearls."

The "Mibḥar ha-Peninim" (Choice of Pearls) is, as its name implies, a collection, in sixty-four chapters, of maxims, proverbs, and moral reflections, many of them of Arabic origin. It has often been cited by philosophers, exegetes, Talmudists, and moralists. It is very similar to the "Florilegium" of Ḥunain and other Arabic and Hebrew collections of ethical sayings, which were highly prized by the proverb-loving Arabs and Jews. Many manuscript copies of the text exist, as well as a large number of

(In the collection of the Hon. Mayer Sulzberger.)

printed editions, some of the latter together with translation and commentary.

The editio princeps was published, together with a short commentary, in Soncino, Italy, in 1484. Among the more important editions enumerated by Steinschneider are those of the Hebrew text with Judæo-German translation, 1739 and 1767, and that with German translation, 1842. Drusius gave a Latin version of 299 sentences in the third part of his "Apothegmata" (1591, 1612). Jacob Ebertus and his son Theodore published 750 maxims in vocalized text with Latin translation, in Frankfort-on-the-Main, 1630. Filipowski edited the Hebrew text (London, 1851); and Asher collated five manuscripts in London and Oxford libraries, and published 652 maxims together with an English translation, an introduction, and valuable notes. Steinschneider ("Manna," Berlin, 1847) gave a versified German rendering of a number of maxims together with notes.

The "Choice of Pearls" is not to be ascribed to Gabirol unconditionally. No old manuscripts and no editions published prior to the nineteenth century refer to Gabirol as the author or compiler. Joseph Ḳimḥi versified the work under the title "Sheḳel ha-Ḳodesh," and only two of the five manuscripts of this versification give Gabirol as the name of the author of the original. Steinschneider finds it difficult to answer the question whether the versified paraphrase of Ḳimḥi is based upon a Hebrew translation or upon the Arabic original, but concludes that Ḳimḥi's version does not represent his own translation of the Arabic original, but rather a versified paraphrase of the translation of another. The Hebrew translator of the "Choice of Pearls" is mentioned in two manuscripts as Judah ibn Tibbon of Seville; and Ḳimḥi apparently made use of the translation attributed to him.

The mention of the name of Gabirol as the author by Ḳimḥi seems to have remained unnoticed among Jewish scholars. Ibn Tibbon mentions and cites the work without any reference to author or translator. Palquera refers to the book, but does not mention the author. Some contradictions exist between the "Ethics" and the "Choice of Pearls"; and the careless arrangement of the latter work is hardly in keeping with the systematic method of Gabirol. Steinschneider thinks it quite possible that the reference to Ibn Tibbon as translator is an interpolation, based upon his mention of the book and the circumstance that he was the translator of Arabic religious and philosophical works (comp. "Hebr. Uebers." pp. 382-388).

His Exegesis.

Some specimens of Gabirol's skill as an exegete are preserved in the commentaries of Abraham ibn Ezra (comp Bacher, "Bibelexegese," pp. 45-55; *idem*, "Ibn Ezra als Grammatiker," p. 183; and Bárány, "Salamon ibn Gabirol mint Exegeta," 1885, pp. 10-17). It is not known whether Ibn Ezra cited these exegetical passages from a Biblical commentary of Gabirol, to which work there is no extant reference, or from a special work devoted to Biblical exegesis. Most striking among these selections of Ibn Ezra is a carefully and curiously elaborated interpretation of the story of paradise, "a classical example of the introduction of philosophical ideas into a Biblical text."

Another specimen, which is a remarkably far-fetched interpretation of Eccl. ix. 11, is to be found in the "Ethics" (comp. Bacher, *l.c.* p. 52, and Wise, *l.c.* p. 13, note 4). Solomon Parḥon and David Ḳimḥi (both of the twelfth century) likewise give specimens of Gabirol's exegesis. Two of the citations of Ibn Ezra prove Gabirol to have been a supporter of the rationalistic Bible interpretation of Saadia, as opposed to Samuel ibn Ḥofni; Gabirol defending the Saadian interpretation, which explained away the miracles connected with the speech of the serpent (Gen. iii. 1) and of the ass of Balaam (Num. xxii. 28)

G. S. S. W.

His Poetry.

Gabirol's poetical productions are characterized by Al-Ḥarizi in the following terms: "Rabbi Solomon the Little ["ha-Ḳaton"] spread such a fragrance of song as was never produced by any poet either before or after him. The poets who succeeded him strove to learn from his poems, but were unable to reach even the dust of his feet as regards the power of his figures and the force of his words. If he had lived longer he would surely have accomplished wondrous things in poetry; but he was snatched away when still young, . . . and his light was extinguished before he had completed his thirtieth year" ("Taḥkemoni," xviii.). Gabirol was the first of the Hebrew poets to elaborate the use of the strict Arabic meter introduced by Dunash ben Labrat (comp. JEW. ENCYC. v. 13); and he is therefore called by Ibn Ezra (Commentary on Gen. iii. 1) "the writer of metric songs." In his grammar ("Sefer Ẓaḥot") Ibn Ezra illustrates his description of the various meters by examples quoted from Ibn Gabirol's poems. Gabirol's diction is pure and his Hebrew is Biblical, and on this account he became the model for the Spanish school of Hebrew poets.

The poems of Ibn Gabirol are rimed; all the lines of a poem, whether long or short, ending with the same syllable, even the 400 lines of his "'Anaḳ." In this also he followed the Arabic poets. His poems, including the non-liturgical ones, are permeated by a strong religious feeling; they are lofty and elevating. The finest compositions are the poems which he wrote in praise of wisdom; his panegyrics on Rabbi Jekuthiel, a wealthy and influential man in Saragossa and a supporter of learning and literature; his lament (see above) on the death of this rabbi (1040), which occurred when Ibn Gabirol was about nineteen years old; his poem (see above) on the death of Hai Gaon; and his verses in praise of Samuel ibn Nagrela (Brody and Kaufmann, in "Monatsschrift," xliii. 304 *et seq.*). He frequently complains that his lot has not fallen in pleasant places; he had to listen to reproaches of friends who mocked at his lofty thoughts, and advised him to turn his mind to more profitable matters. His comfort was that though his body was on earth his mind dwelt in heaven. When his distinction as a poet was attacked either by opponents or by rival poets, he pointed to the excellence of his poems and to their perfection in form and contents. That he occasionally had lighter moments is proved by his excellent satire upon a man named Moses who had invited him to dine, but had not been liberal with his wine ("Shir ha-Mayim"). A new and critical edition of his secular poems is in course of publication by H. Brody ("Shir ha-Shirim," Berlin, 1897 *et seq.*).

Liturgical Poems.

Far nobler and loftier, however, are his liturgical compositions. "The liturgic poetry of the Spanish-Arabic Jews attained its perfection with Ibn Gabirol," says Zunz ("Literaturgesch." p. 187). Gabirol has almost entirely liberated Hebrew religious poetry from the fetters of payyeṭanic form and involved expression. In his "Keter Malkut" or "Royal Crown," a philosophical and ethical hymn in rimed prose, he describes the universe as composed of spheres one within the other. It is a detailed panegyric of the glory of God both in the material and in the spiritual world, permeated with the loftiest ethical and religious thoughts, and has in part been imitated by subsequent writers, Judah ha-Levi, Al-Ḥarizi, and Samuel Ẓarẓa. In many liturgies it occurs as part of the Day of Atonement service. A German translation is given in Dukes, "Ehrensäulen," pp. 58 *et seq.*; in Sachs, "Festgebete der Israeliten," iii.; *idem*, "Die Religiöse Poesie," p. 3; and a versified English translation of extracts, by Alice Lucas, in "J. Q. R." viii. 239 *et seq.* He wrote also more than 100 piyyuṭim and seliḥot for the Sabbath, festivals, and fast-days, most of which have been received into the Maḥzor not only of the Spanish rite, but also of the Rumanian, German, and even Karaitic rites. German translations of some of his poems will be found in Geiger's and Sachs' works mentioned in the bibliography; in Kämpf's "Nichtandalusische Poesie," pp. 167 *et seq.*; also in Karpeles' "Zionsharfe" (Leipsic, 1889). For English specimens see Mrs. Henry Lucas, "Songs of Zion," London, 1894.

There are two lengthy poems of Gabirol's which, on account of the subjects treated, do not give opportunity for a display of poetical beauty. These are: (1) "Azharot," a rimed enumeration of the 613 precepts of the Torah, and (2) "'Anaḳ," mentioned above, and evidently based on Saadia's "Agron." Solomon Parḥon prefixed to his "Maḥberet" a fragment of the "'Anaḳ" containing 98 lines, reedited by J. Egers in the "Zunz Jubelschrift," Hebrew part, p. 192 (comp. Kaufmann, in "Göttingische Gelehrte Anzeiger," 1885, No. 11, p. 460).

IBN GHAYYAT, ISAAC BEN JUDAH:

Spanish rabbi, Biblical commentator, philosopher, and liturgical poet; born at Lucena in 1038 (Graetz cites 1030); died at Cordova in 1089; buried at Lucena. According to some authorities he was the teacher of Isaac Alfasi; according to others, his fellow pupil. The best known of his pupils were his son Judah ibn Ghayyat, Joseph ibn Sahl, and Moses ibn Ezra. He was held in great esteem by Samuel ha-Nagid and his son Joseph, and after the latter's death (1066), Ibn Ghayyat was elected to succeed him as rabbi of Lucena, where he officiated until his death. He was the author of a compendium of ritual laws concerning the festivals, published by Bamberger under the title of "Sha'are Simḥah" (Fürth, 1862; the laws concerning the Passover were republished by Zamber under the title "Hilkot Pesaḥim," Berlin, 1864); and a philosophical commentary on Ecclesiastes, known only through quotations in the works of later authors (Dukes, in "Orient, Lit." x. 667–668). The greatest activity of Ibn Ghayyat was in liturgical poetry; his hymns are found in the Maḥzor of Tripoli under the title of "Sifte Renanot."

IBN GHAYYAT, JUDAH BEN ISAAC:

Spanish Talmudist and Hebrew poet of the twelfth century. He was the author of a Hebrew translation, from the Arabic, of a casuistic dissertation of Isaac Alfasi on a passage of Shebu'ot. As a poet Judah ibn Ghayyat was held in great esteem by Judah ha-Levi, who composed four poems in his honor (see L. Dukes in "Kokbe Yiẓḥaḳ," xxvi. 16–19). Ibn Ghayyat is also mentioned as a poet by Shem-Ṭob Palquera and by Al-Ḥarizi ("Taḥkemoni," iii.).

IBN ḤAYYIM, AARON B. ABRAHAM. See Aaron (ben Abraham ben Samuel) ibn Ḥayyim.

IBN HUACAR. See Ibn Waḳar.

IBN ḤUSAIN (ABU SULAIMAN) DAUD: Karaite liturgical poet; flourished in the first half of the tenth century. He compiled a prayer-book for the Karaites, entitled "Tefillat Bene Miḳra," in which he inserted many poems and prayers composed by himself. The prayers were interwoven with homilies, Biblical explanations, arguments in favor of the Karaite dogmas, and polemics against the Rabbinites. According to Jephet ben Ali (in "'Inyan Tefillah") and his son Levi (in "Sefer ha-Miẓwot," 97a), Ibn Ḥusain, in his ritual, which is no longer extant, criticized the Rabbinites for their belief that the recitation in the morning and in the evening of the Eighteen Benedictions is obligatory. Ibn Ḥusain was a bitter adversary of Saadia Gaon, whom he severely attacked in various writings which are no longer in existence.

K. I. Br.

IBN JANAḤ, ABU AL-WALID MERWAN (also known as **R. Marinus**; his Hebrew name was **Jonah** [lit. "dove"]; hence "Ibn Janaḥ" = "the winged"): Greatest Hebrew philologist of the Middle Ages; born at Cordova between 985 and 990; died at Saragossa in the first half of the eleventh century. He studied at Lucena, Isaac ibn Saul and Isaac ibn Gikatilla being his principal teachers. He studied poetry with the former and essayed poetry himself as a youth, although he recognized later that the gift of poetry had been denied him. Isaac ibn Gikatilla, an accomplished Arabic scholar, seems to have exercised a powerful influence over Ibn Janaḥ, who early attained an intimate acquaintance with the Arabic language and literature, and acquired an easy and graceful Arabic style. Ibn Janaḥ adopted the profession of medicine, and became a skilful physician ("the physician" is often added to his name).

Ibn Abi Uṣaibi'a, the biographer of Arabic physicians, says that Ibn Janaḥ wrote a book on simple remedies and their weights and measures ("Kitab al-Talkhiṣ"), which acquired some reputation. He also studied logic with especial interest, but was an opponent of metaphysical speculation. His principal pursuit, however, was the study of the Holy Scriptures and the Hebrew language, in which he was aided by other masters in Lucena besides the two already mentioned. Judah Ḥayyuj was reverenced by Ibn Janaḥ as his chief master in the field of Hebrew philology, although he can hardly have been personally his teacher, for when Ibn Janaḥ returned to Cordova, Ḥayyuj was dead. In 1012 Ibn Janaḥ, with some of his fellow citizens, was obliged to leave Cordova. After a long period of wandering he settled in Saragossa, where all his works were written. In regard to his external circumstances it is known only that at Saragossa he was the center of a circle occupied with scientific questions, and that he had young pupils, for whose benefit he wrote some of his works. The Talmudic scholars of Saragossa were hostile to him and opposed his scientific studies. In the introduction to his chief work Ibn Janaḥ severely criticizes their ignorance, which, he says, they hid under a mantle of piety, and defends his own efforts by appealing to the example of the Geonim and of the teachers of the Talmud. He knew and quoted the Vulgate.

His Opponents.

In Saragossa Ibn Janaḥ gradually drifted into polemical relations with both Mohammedan and Christian teachers. The great event of his life was his dispute with Samuel ha-Levi ibn Nagdela, his celebrated compatriot, who had left Cordova at the same time as himself, and had acquired high repute in southern Spain. The dispute arose from Ibn Nagdela's wish to defend his teacher Ḥayyuj against the criticism to which Ibn Janaḥ had subjected his writings. The dispute was a very acrimonious one, but only a few fragments have been preserved. The "Epistles of the Companions" ("Rasa'il al-Rifaḳ"), as Ibn Nagdela calls the pamphlets which he and his friends launched against Ibn Janaḥ, as well as Ibn Janaḥ's "The Book of Shaming," or "The Book of Confounding" ("Kitab al-Tashwir"; Hebr. "Sefer ha-Haklamah"), which appeared in four consecutive parts, has been lost. But the substance of the lost pamphlets is to be found in Ibn Janaḥ's "Kitab al-Tanḳiḥ," in which the author often refers to these polemical writings, which he valued highly.

The "Kitab al-Tanḳiḥ" (Book of Minute Research) is Ibn Janaḥ's chief work, on which he was engaged during his dispute with Ibn Nagdela. It is devoted to the study of the Bible and its language, and was the first complete exposition of the Hebrew vocabulary and grammar. The book is divided into two parts, grammatical and lexicographical. Each of these parts has a separate name and appears as a separate book. The first part is called "Kitab al-Luma'" (Book of Many-Colored Flower-Beds). It is preceded by a very interesting grammatical introduction to the entire work. The Arabic original of the "Luma'" was published by Joseph Derenbourg in association with W. Bacher (Paris, 1886). The Hebrew translation by Judah ibn Tibbon (who translated "Luma'" by "Riḳmah") was edited in 1855 (Frankfort-on-the-Main) by B. Goldberg and R. Kirchheim. The second, lexicographical part of the work, "Kitab al-Uṣul," is provided with a special introduction. The Arabic original was edited by Neubauer (Oxford, 1875); the Hebrew translation by Judah ibn Tibbon ("Sefer ha-Shorashim") was edited by W. Bacher (Berlin, 1897). A French translation of the "Luma'" was made by Metzger, with the title "Le Livre des Parterres Fleuris" (Paris, 1889).

His Chief Work.

Since Ibn Janaḥ excludes, as the established results of research, everything found in Ḥayyuj's fundamental works and much found in his own earlier writings, and since he does not discuss vowels and accents, on the ground that their treatment belongs properly to Masoretic works, both the grammar and the dictionary contain serious gaps, which, however, are balanced by a mass of other material outside the province of a purely grammatical and lexicographical work. The "Kitab al-Tanḳiḥ" is indeed a rich mine of information on Biblical syntax, rhetoric, hermeneutics, and exegesis. Its historical and scientific value is discussed under BIBLE EXEGESIS; DICTIONARIES, HEBREW; GRAMMAR, HEBREW. The other writings of Ibn Janaḥ are as follows:

Other Works.

Kitab al-Mustalḥaḳ (not "Mustalḥiḳ"; see "R. E. J." xxx. 299; Hebr. "Hassagot," or "Tosefot"): this was Ibn Janaḥ's first work, and was begun in Cordova. It is a criticism of, and "supplement" to, the two works of Ḥayyuj on the verbs with weak and double consonants. Ibn Janaḥ states that he read the Scriptures eight times to collect material for this book.

Kitab al-Tanbih (Book of Excitation [Hebrew, "Ha‘arah"]), a polemic against a pamphlet written by his enemies in Saragossa. It is in the form of a letter to a friend at Cordova, and discusses at length several questions of grammar.

Kitab al-Taḳrib wal-Tashil (Book of Bringing Near and Making Easy: "Sefer ha-Ḳerub weha-Yishshur"), a commentary on some passages in Ḥayyuj's writings, with an independent grammatical excursus.

Kitab al-Taswiyah (Book of Retribution: Hebr. "Hashwa'ah," or "Tokaḥat"), an account of a dispute which took place at Saragossa in the house of a friend, Abu Sulaiman ibn Taraḳa. In this dispute a stranger from Granada, who belonged to Ibn Nagdela's circle, gave the first information of the attacks on Ibn Janaḥ in course of preparation. Ibn Janaḥ enumerates the criticisms advanced by the stranger against single points of the "Mustalḥaḳ," and then proceeds to refute them. This inaugurated the great controversy. The four books enumerated here have been published, with Arabic texts and French translations, by Joseph and Hartwig Derenbourg ("Opuscules et Traités d'Aboû l-Walîd Merwan ibn Djanâh de Cordoue," Paris, 1880).

His Motive.

Although Ibn Janaḥ is careful to exclude his personal affairs from his works, his personality can be plainly seen. He regarded the study of the Scriptures as his life-work, and considered as indispensable thereto an exhaustive and exact knowledge of the Hebrew language. The study of Hebrew philology was in his eyes a religious duty. In the introduction to his principal work ("Luma‘," p. 1; "Riḳmah" iv.) he makes this statement: "Since the revealed Scriptures can be understood only by the aid of the science of language, the endeavor to comprehend them from all sides becomes a more imperative duty the higher the end aimed at and the more our reason recognizes the greatness and majesty of Him who has revealed these books."

The consciousness of the value of the results of his tireless research, and his indignation at the petty disparagements and injustices he had to endure, made him at times refer with pride to the work he had accomplished. Once he says ("Kitab al-Uṣul," col. 552): "This explanation belongs to the sum of what I have produced of unusual thoughts and noteworthy opinions which no one else has expressed or noticed. I was enabled to do so much through God's grace and goodness manifested toward me, together with great endurance and a zeal for study and research by day and by night; so that I have expended twice as much on oil as another on wine." With this proud self-consciousness Ibn Janaḥ united respect for the achievements of others. He characterizes the opinions of earlier authorities with great precision, whereby his writings have become an excellent source of information concerning the literary history of linguistic science and Biblical exegesis. His relation to Ḥayyuj should especially be mentioned. Although he criticized him and corrected his errors, he vigorously upheld his grammatical system, even against the prejudices of the followers of the old school. In his criticisms he never forgets the respect and gratitude due the man to whom he owes his knowledge of science. In the introduction to his first work Ibn Janaḥ says: "If we can criticize him, we owe our ability to do so to his teaching and to the good we have received from his writings." Ibn Janaḥ's own estimate of himself coincided with the estimate of him held by the Spanish historian of Judaism, Abraham ibn Daud ("Sefer ha-Ḳabbalah," end): it fell to him to complete that which Ḥayyuj had begun. The annals of Hebrew philology and Bible exegesis bear witness to the effects of Ibn Janaḥ's writings. They, indeed, fell into comparative oblivion after David Ḳimḥi; but they were brought again into notice during the nineteenth century, and became once more a source of inspiration and suggestion.

IBN JAU, JACOB: Silk-manufacturer at Cordova, occupying a high position at the court of the calif Hisham; died about 1000. Amador de los Rios calls him "Ibn Gan." Jacob and his brother Joseph, finding in the court of the palace a large sum of money which had been lost by some Moors from the province during an assault upon them, resolved to use the money for presents for the calif and the "ḥajib" Al-Manṣur ibn Abi Amir, to gain favor thereby. They accordingly manufactured precious silks for garments, and flags with artistically woven Arabic mottos and emblems, the like of which had never been seen in Spain, and presented them to the calif and the powerful ḥajib. Al-Manṣur thereupon made Jacob prince and chief judge of all the Jewish communities of the Andalusian califate, investing him with the right of appointing judges and rabbis, and of determining the taxes which the Jews were to pay to the state.

Jacob was also invested with princely splendors; eighteen pages in gold-brocaded garments formed his guard of honor, and a state carriage was always at his disposal. The community of Cordova unanimously recognized him as its chief and granted him the right of entailing his dignities upon his descendants. In the dispute regarding the rabbinate of Cordova, Jacob and his family were on the side of Joseph ibn Abitur. Jacob deposed R. Enoch, and called in his place Ibn Abitur, who was then staying in Africa. Ibn Abitur, however, refused the rabbinate out of respect for the learned and pious Enoch. Jacob ibn Jau retained his position only a short time, for Al-Manṣur, disappointed because Jacob would not extort large sums of money from his coreligionists as presents for him, cast Jacob into prison. After languishing there for a year Jacob was liberated through the intervention of the calif himself, and reinstated, without, however, regaining his former prestige. Isaac ibn Saul, and Isaac b. Gikatilla of Elisana (Lucena) praised him in enthusiastic verses.

IBN KILLIS, YA‘ḲUB BEN YUSUF (ABU AL-FARAJ): Vizier to the calif of Egypt, Al-‘Aziz Nizar; born at Bagdad 930; died at Cairo 990-991. His parents were Jews; and he himself professed the Jewish religion during the first half of his life. His biographers relate that he claimed descent from Aaron, or, according to another statement, from the poet Samuel ibn Adiyah. Having been instructed in writing and arithmetic, Ya‘ḳub was sent by his father to Egypt. There he made the acquaintance of an officer on whose recommendation he was appointed by the calif of Egypt, Ḳafur al-Ikshidi, to supervise the furnishing of his palace. Having satisfactorily discharged this duty, Ya‘ḳub was entrusted with more important public offices, in which he displayed such ability and probity that he soon became Ḳafur's confidential minister (960), and all the public expenditures were placed under his control.

The difficulties surrounding this high position, which must have excited much jealousy, probably urged Ya‘ḳub to embrace Islam, which he did in 967. His power continued to increase till the death of Kafur, when he was arrested by the vizier, Ibn al-Furat, whose jealousy he had excited. The intervention of his friends, and still more effectively his bribes, soon set him at liberty. He then secretly betook himself to Maghreb, where he entered into the service of Al-Mu‘izz al-‘Ubaidi. Ya‘ḳub soon won the confidence of his new master; and when the latter conquered Egypt and established the Fatimite dynasty, he appointed Ya‘ḳub director of the civil administration (978). In 979, at the death of Al-Mu‘izz, his son and successor, Al-‘Aziz Nizar, appointed Ya‘ḳub vizier, which position he continued to hold throughout the remainder of his life.

The historians of that time represent Ya‘ḳub as one of the most able and upright of Egyptian viziers. He was fond of learning; and his palace was open to scholars, especially to poets. Ya‘ḳub composed a work on jurisprudence, "Kitab fi al-Fikh," treating of the Shiitic doctrines which he had learned from Al-Mu‘izz and Al-‘Aziz. At Ya‘ḳub's death ‘Aziz himself attended the funeral, and kept no table and received no guests for three days. For eighteen days the government offices remained closed, and no business was transacted; and for a month Ya‘ḳub's grave was a place of pilgrimage, where poets recited the virtues of the departed at the calif's expense and a legion chanted the Koran day and night.

G. I. Br.

IBN LAṬIF, ISAAC B. ABRAHAM: Spanish physician and cabalist; probably born at Toledo; died at Jerusalem, whither he had gone in indigent circumstances, about 1290. He was the natural philosopher among the cabalists of his period. Cabalistic terms had not become fixed at that time, and Ibn Laṭif attempted to give them a more scientific character, and to base the doctrine of the Sefirot upon natural philosophy; in this, however, he was not successful, although his works were otherwise highly valued. He wrote the following: (1) "Sha‘ar ha-Shamayim," his chief work, still in manuscript, part of which has been published by Jellinek in "Ha-Shaḥar"; said to have been written about 1244; it is in four parts and follows the style of Maimonides' "Moreh"; the introduction contains a historical sketch of Jewish science up to the time of Maimonides; (2) "Ginze ha-Melek," published by Jellinek in "Kokebe Yiẓḥaḳ," 1847, p. 28; (3) "Ẓeror ha-Mor," dedicated to Todros Abulafia, the Mæcenas of the cabalists; printed in "Kerem Ḥemed," 1833, ix. 154; (4) "Iggeret ha-Teshubah," a letter from Jerusalem addressed to Abulafia in regard to various scientific matters; it contains thirty-nine questions and answers, twenty-six of which have been published in the "Teḥiyyah" (1857, ii. 50) by Senior Sachs; (5) "Ẓurat ha-‘Olam," printed by S. Stern in "Ḳebuẓat Ḥakamim," 1860; (6) "Rab Pe‘alim," on metaphysics and natural philosophy, edited by Schönblum in 1885; (7) Letter from Jerusalem, still in manuscript (Parma, De Rossi, MS. No. 402). He also wrote a commentary to Job, not yet edited, and a commentary to Ecclesiastes, probably printed at Constantinople in the sixteenth century. All the editions of his works are too imperfect to convey a clear impression of his cabalistic ideas. Isaac b. Sheshet's criticism of Ibn Laṭif in his Responsa, No. 197, is noteworthy.

Bibliography: Jellinek, in *Kerem Ḥemed*, ix.; idem, in *Kokebe Yiẓḥaḳ*, xxv., xxvii.-xxx.; Schönblum, Introduction to *Rab Pe‘alim*; Steinschneider, *Hebr. Bibl.* 1874, xv. 83.

K. P. B.

IBN MALKAH, JUDAH BEN NISSIM: Spanish philosopher; flourished either in Spain or in Africa in the middle of the fourteenth century. He was imbued with Neoplatonic ideas, and he wrote from that standpoint an important philosophical work in Arabic in three parts. Of these the first, entitled "Uns al-Gharib," is an introduction to the "Sefer Yeẓirah," arranged in the form of dialogues between the author and his soul and between a pupil and his master. Appended are ten chapters on man's acquirement of perfect bliss. The second part, "Tafsir Yeẓirah," is a philosophical commentary on the same work; and the third part, "Tafsir Pirḳe R. Eli‘ezer," is a commentary on the Pirḳe R. Eli‘ezer, finished Feb. 8, 1365. He also cites a work, "Al-Miftaḥ," and a commentary on the prayers, "Tafsir al-Ṣalawat," written by himself, but now lost.

Ibn Malkah's commentary on the "Sefer Yeẓirah" is quoted by Samuel Motot in his commentary on Ibn Ezra (according to Dukes, the commentator who quotes Ibn Malkah is Joseph ha-Sefardi). Ibn Malkah's theory of the "active intellect" ("sekel ha-po‘el") is similar to that of Ibn Gabirol; but there is no evidence of his having known the latter's "Fons Vitæ."

G. M. Sel.

IBN MATKAH, JUDAH BEN SOLOMON HA-KOHEN: Spanish philosopher, astronomer, and mathematician; born at Toledo in 1215. On his mother's side he was the grandson of Ziza ibn Shushan. Although Ibn Matkah was a pupil of Meïr Abulafia, an anti-Maimonist, and was greatly inclined to mysticism, yet the "Moreh" of Maimonides induced him to occupy himself with philosophical studies. In fact, Ibn Matkah was the intermediary between philosophy and mystic doctrines. While a youth of eighteen he corresponded with Johannes Palermitanus and Theodorus of Antioch, the philosophers of the Roman emperor Frederick II. The emperor himself consulted him about scientific matters, and his answers proved so satisfactory that he was invited to settle in Tuscany (1247), where he had free access to the imperial court.

Ibn Matkah became known as a philosopher by the encyclopedic work which he wrote in 1247 in Arabic and himself translated into Hebrew under the title "Midrash ha-Ḥokmah." It is divided into two parts. The first treats of logic, physics, and metaphysics, adapted from Aristotle, and contains, besides, a treatise on certain passages in Genesis, Psalms, and Proverbs. The second treats of mathematics, and contains, also, two treatises: the first, a mystical one on the letters of the alphabet; the other, a collection of Biblical passages to be interpreted philosophically. Ibn Matkah divides all creatures into three categories, spiritual, celestial, and terrestrial, *i.e.*, mortal. He therefore divides the sciences also into three branches, physics, mathematics, and metaphysics. In the introduction to this work he gives an anthology of Aristotle's sentences.

Ibn Matkah made an adaptation of Ptolemy's "Almagest," which he arranged in eight chapters, and of his "Quadripartitum" under the Hebrew title "Mishpeṭe ha-Kokabim," a treatise on astrology. He also made an adaptation of Al-Biṭruji's astronomy, under the title "Miklal Yofi."

IBN MIGAS, ABRAHAM BEN ISAAC HA-LEVI: Spanish physician and rabbinical scholar; lived at Constantinople in the sixteenth century. He was court physician to Sulaiman the Great, and followed the latter's army into Syria. Several years after his return to Constantinople the Jews of Damascus requested him to settle in their city. He was also known as a Talmudist, and he consulted Joseph Caro on rabbinical matters. A responsum of his is to be found in Caro's "Abḳat Rokel" (No. 27). In his only published work, "Kebod Elohim" (Constantinople, 1585), he gives an account of his travels and of the customs of the Kurds and Druses. Another work of his is entitled "'Emeḳ ha-Siddim."

Bibliography: Michael, *Or ha-Ḥayyim*, No. 134; Zunz, *G. S.* i. 184; Carmoly, *Revue Orientale*, ii. 198; Fürst, *Bibl. Jud.* ii. 378.

G. M. Sel.

IBN MIGAS, JOSEPH: Spanish Jew of the eleventh century; ancestor of an important family of scholars. Joseph ibn Migas, greatly respected among the Jews of Granada, where he was probably born, became involved in Granada politics when, after the death of Ḥabus, King of Granada (1037), quarrels broke out between his two sons, Badis and Balḳin. The Moorish nobles and the Jews, especially Joseph ibn Migas, Isaac de Leon, and Nehemiah Isḳaffa, took the part of Balḳin, the younger, and desired to elect him king, while the rest of the population sided with Badis, whom they made king in Oct., 1037. Balḳin submitted; but Badis, fearing his brother would regret his submission and seek vengeance, caused him to be killed. Joseph ibn Migas and the other Jewish adherents of Balḳin were compelled to flee. They were, however, kindly received by the King of Seville, an opponent of Badis, and Joseph ibn Migas was employed by him in the public service.

G. M. Sc.

IBN MIGAS, JOSEPH (JEHOSEF) BEN MEÏR HA-LEVI: Spanish rabbi and head of a school in Lucena; born 1077; died in Lucena 1141. His birthplace was probably Seville, where his father, Meïr ha-Levi ibn Migas, and his grandfather, Joseph ha-Levi ibn Migas, had lived after the departure of the latter from Granada (Saadia ibn Danan, in Edelmann's "Ḥemdah Genuzah," p. 30a; De Rossi, "Dizionario," *s.v.*; D. Cassel, in Ersch and Gruber, "Encyc." section ii., pt. 31, p. 85; Weiss, "Dor," iv. 289; Neubauer, "M. J. C." i. 76). Abraham ibn Daud says (see "M. J. C." i. 76) that after the removal to Lucena (1089) of the Talmudist Isaac Alfasi, Joseph also went there, from Seville, he being then twelve years old. Steinschneider, however, because of a citation in Moses ibn Ezra, supposes Joseph to have been born in Granada, which was the home of his father's bosom friend R. Isaac ben Baruch Albalia. Joseph studied under Isaac Alfasi at Lucena for fourteen years. Alfasi shortly before his death (1103) ordained Joseph as a rabbi, and wrote a testimonial for him. Passing over his own son, he appointed Joseph, then twenty-six years of age, to be his successor as director of the academy.

Head of Academy at Lucena.

This position Joseph held for thirty-eight years. His "accession to the throne" was commemorated by his contemporary Judah ha-Levi (Grätz, "Blumenlese," p. 76; Brody, "Diwan des Abu-l-Hasan Jehuda ha-Levi," p. 141). On the occasion of his marriage, which occurred soon after, the same poet wrote an epithalamium (Luzzatto, "Betulat Bat Yehudah," p. 38; partly translated into German in Geiger's "Nachgelassene Schriften,"

ii. 113; see also Edelmann and Dukes, "Ginze Oxford," p. xiii.).

To R. Baruch ben Isaac ben Baruch Albalia, who was of the same age as himself and had been his fellow student under Isaac Alfasi, he was bound by ties of intimate friendship (Conforte, "Ḳore ha-Dorot," p. 10a). His external life passed quietly. He himself mentions (Responsa, No. 75) that he was once in Fez. It is narrated that on the eve of a Day of Atonement, which was also the Sabbath, he caused the execution of a Jew in Lucena who had turned informer in the wars between the Spanish Arabs and the Almoravid Berbers (Judah ben Asher, Responsa, No. 75).

An elegy in manuscript at Oxford, mentioned by Dukes in his "Naḥal Ḳedumim" (p. 11), is taken by Grätz ("Blumenlese," p. 112) to have been written by Jekuthiel on the death of Ibn Migas. Dukes, on the contrary, considers Jekuthiel to have been the subject of the poem, and Ibn Migas—about whom nothing further is said—to have been the author (על מות ר׳ יקותיאל מר׳ ן׳ מיגאש).

Among the pupils of Ibn Migas may be mentioned his son, R. Meïr, whose son Isaac is mentioned by Judah al-Ḥarizi ("Taḥkemoni," xliv.; see also D. Cassel in "Zunz Jubelschrift," p. 126); a nephew of the same name (Edelmann, *l.c.* p. 30); and Maimun, the father of Maimonides. That Joseph ibn Migas was a teacher of Maimonides—who was only six years old at the time of Joseph's death—is an old error (see Menahem Meïri, "Bet ha-Beḥirah," in Neubauer, "M. J. C." ii. 228; Edelmann, *l.c.* p. 30; Sambari, in Neubauer, "M. J. C." i. 127; Ibn Yaḥya, "Shalshelet ha-Ḳabbalah," p. 32a; Weiss, "Dor," iv. 290; Jew. Encyc. i. 375, *s.v.* Alfasi) which has already been refuted by Zacuto ("Yuḥasin," p. 131a). It rests upon a gloss in Abraham ibn Daud's "Sefer ha-Ḳabbalah" (Neubauer, *l.c.* i. 76) and upon a misunderstood passage in Maimonides' writings.

His Works.

Of Joseph ibn Migas' works may be mentioned: (1) Responsa (Salonica, 1791; Warsaw, 1870), two hundred and fourteen of which were collected by Joseph Elijah ha-Levi, partly translated from the Arabic, and published from a poor manuscript. Many of his responsa are given in Bezaleel Ashkenazi's "Shiṭṭah Meḳubbeẓet" and in Azulai's "Birke Yosef"; and a few appear in the Maimonidean collection of letters "Pe'er ha-Dor" (Nos. 211 *et seq.*). Azulai claimed to have possessed a volume of Joseph's responsa in manuscript ("Shem ha-Gedolim," i. 81). Joseph's responsa were cited also by older Jewish law teachers, as those of an esteemed authority, under the abbreviation הרי"ם. (2) Talmud commentaries (Menahem Meïri, "Bet ha-Beḥirah," in Neubauer, "M. J. C." ii. 228), of which there have been preserved, (*a*) Novellæ on Baba Batra, quoted by Zerahiah ha-Levi (see Reifmann, "Toledot Rabbenu Zeraḥyah ha-Levi," p. 41, Prague, 1853), by Solomon ben Adret (Responsa, No. 180), and by others (first printed in Amsterdam, 1702; with Eleazar ben Aryeh's commentary "Zer Zahab," 1809); (*b*) Ḥiddushim on Shebu'ot, mentioned in the "Pe'er ha-Dor," No. 145 (first printed in Prague, 1809, in "Uryan Telitai"; together with other novellæ, *ib.* 1826). His novellæ contain no explanations of words; but, conformably to the character of the halakic Ḥiddushim, he lays emphasis on the clearness and intelligibility of the whole context, sometimes giving two or more explanations of one passage. He names Hananeel and Alfasi as his authorities. He is of the opinion that it would be impossible to obtain religious decisions directly from the Talmud (Responsa, No. 114) without utilizing those of the Geonim ("Teshubot").

A work entitled "Megillat Setarim," which Zerahiah ha-Levi mentions as having been written by Joseph ibn Migas (Reifmann, *l.c.* p. 41), has not been preserved; nor can it be determined whether, as Grätz ("Gesch." vi. 108) supposes, "Megillat Setarim" was the title of his Talmud commentary.

In view of the few, poorly edited fragments of his works, an independent criticism of his importance as a scholar is hardly possible. Maimonides says of him in the introduction to his Mishnah commentary (Pococke, "Porta Mosis," p. 108): "The Talmudic learning of this man amazes every one who understands his words and the depth of his speculative spirit; so that it might almost be said of him that his equal has never existed." Judah ha-Levi eulogizes him in six poems (see, besides those already cited, Brody, *l.c.* pp. 87, 191), and is full of his praise (*ib.* p. 173).

G. M. Sc.

IBN MIGAS, MEÏR: Spanish rabbi, and president of the bet ha-midrash of Seville; flourished in the eleventh century. He was the son of Joseph ibn Migas and the father of Joseph ibn Migas ben Meïr ha Levi. Late in life he was compelled to leave Seville and retire to Toledo.

Bibliography: Abraham ibn Daud, *Sefer ha-Ḳabbalah*, in Neubauer, *M. J. C.* i. 76; Grätz, *Gesch.* vi. 157.

G. M. Sc.

IBN MUHAJAR, AHUB BEN MEÏR HA-NASI IBN שרתמיקש: Spanish-Arabian poet of the twelfth century; probably a brother of the poet Joseph ben Meïr and of Abraham b. Meïr ibn Muhajar. In the earlier sources he is called either "Ahub" or "Oheb"; and it is difficult to say which is correct. If "Oheb," then he is probably the author of the poems signed "Oheb," and beginning respectively: (1) "Eloah ḥai asher yaẓar" (Luzzatto, "Naḥlat," p. 13); (2) "Asher libbi we-kilyotai," "reshut" for the Torah festival (Zunz, "Literaturgesch." p. 587). Judah ha-Levi dedicates a song of praise ("Mi ya'abor lanu le-'eber yam") to a certain Ahub, but the latter's surname is אלמהדוי ; and although the name "Ahub" is a rare one, it is improbable that the poem was addressed to the subject of this article.

The designation שרתמיקש, found in various other forms, has not yet been explained.

Bibliography: Abraham b. David, in Neubauer, *M. J. C.* i. 81; Joseph b. Zaddik, *ib.* p. 93 (where "Oheb" or "Ahub" should be read instead of "Abraham"); Conforte, *Ḳore ha-Dorot*, p. 8a. On "Oheb" and "Ahub" see Steinschneider in *J. Q. R.* x. 131, 529; on "Muhajar," xi. 137.

G. H. B.

IBN NUÑEZ, JACOB: Physician to King Henry IV. of Castile and his chief judge ("juez mayor"); also rabbi, as he calls himself. In 1474 he was commissioned by the king to apportion at Segovia the taxes which the "aljamas" of the Jews in all the king's dominions had to pay annually. These taxes were not collected by Ibn Nuñez, but by the royal tax-collectors to whom Ibn Nuñez applied for that purpose.

Bibliography: Rios, *Estudios*, p. 140; following him, Lindo, *History of the Jews in Spain*, p. 242, and Grätz, *Gesch.* viii. 233; Rios, *Hist.* iii. 590–602, where the tax-lists of the several communities were for the first time published, from a manuscript in the National Library at Madrid.

IBN PALQUERA. See Falaquera (Palaquera), Shem-Ṭob b. Joseph.

IBN PULGAR (PULKAR, or POLKAR), ISAAC BEN JOSEPH: Spanish philosopher, poet, and controversialist; flourished in the first half of the fourteenth century. Where he lived is not known, for though "Avilla" is given at the end of his translation of Al-Ghazali's "Maḳaṣid," the town-name as well as the date is probably the copyist's (Grätz, "Gesch." vii. 446). He was a warm defender of Isaac Albalag, and continued his translation of Al-Ghazali's work. It seems from his "'Ezer ha-Dat" that he had been a friend of Abner of Burgos; but when the latter, after conversion, sent him one of his anti-Jewish writings, he replied in a stinging satirical poem.

Ibn Pulgar wrote the following: (1) Hebrew translation of the third book of Al-Ghazali's "Maḳaṣid" (completed in 1307); (2) "'Ezer ha-Dat," the most important of his writings (see below), a polemical work in five books, in the form of dialogues, and interspersed with verse; (3) "Iggeret ha-Ḥarfit," a refutation of Abner of Burgos' "Minḥat Ḳena'ot"; (4) a refutation in Spanish of astrology; (5) verse (see De Rossi, "Codices," No. 861, 3).

Ibn Pulgar defended the Halakah, but said that the Haggadah did not belong to the Talmud. One of the points in dispute between Ibn Pulgar and Abner of Burgos was in regard to the immortality of the individual soul, which Ibn Pulgar denied, believing only in the immortality of the universal soul (Ibn Shaprut, "Eben Boḥan," xv., § 3). Ibn Pulgar's theory was that laws were not instituted for the sake of God, who has no need of them, but for the sake of man. Therefore he who observes these laws must not expect any future reward, as he is rewarded in the observance of them. Thus the question, "Why are sinners often happy and the pious unhappy?" has no meaning, for virtue and wisdom contain happiness in themselves, while sin and folly contain unhappiness.

Of the "'Ezer ha-Dat," the first book, in eight chapters ("she'arim"), is a demonstration of the superiority of the Jewish religion, in which Ibn Pulgar attacks both apostates and Christians; the second attacks infidels and skeptics; the third, astrologers; the fourth, those who explain the Bible in a strictly literal sense and those who, like the Christians, interpret it in a figurative and allegorical sense; the fifth, those who do not believe in the immortality of the soul. The second book, a dialogue between an aged partizan of Talmudic Judaism ("Torani") and a youthful philosopher, has been printed in Eliezer Ashkenazi's "Ṭa'am Zeḳenim" (Frankfort-on-the-Main, 1855). Ibn Pulgar's object here was to prove the superiority of philosophical Judaism; but his arguments are more clearly expressed in the fourth book, in which he attacks cabalists, sorcerers, and false philosophers. His diatribes against the first two classes have been published by Isidore Loeb ("R. E. J." xviii. 66–70).

Bibliography: Grätz, *Gesch.* 3d ed., vii. 291, 292, 305–308, 446; Steinschneider, *Hebr. Uebers.* pp. 299, 300; idem, *Jewish Literature*, pp. 97, 171, 296; *He-Ḥaluẓ*, iv. 83; Isidore Loeb, in *R. E. J.* xviii. 63–70.

IBN ROSHD. See Averroes.

IBN SAHL, ABU AL-HASAN. See Ali ibn Sahl ibn Rabban al-Tabari.

IBN SAHL, ABU OMAR JOSEPH BEN JACOB: Poet and scientist; died at Cordova 1124. He was a pupil of Isaac ibn Ghayyat, was rabbi at Cordova for nine years, and was distinguished for both learning and piety. Joseph ibn Sahl, who must not be confounded with the poet Joseph ibn Suli, is counted by Al-Ḥarizi among the foremost poets of his time; though his verse is without any peculiar elegance, it is easy and fluent. He was intimately acquainted with Moses ibn Ezra, who addressed several poems to him.

Bibliography: Abraham ibn Daud, *Sefer ha-Ḳabbalah*, in Neubauer, *M. J. C.* i. 75; L. Dukes, *Moses ibn Esra*, pp. 101 *et seq.*; Sachs, *Die Religiöse Poesie*, p. 256; Grätz, *Gesch.* vi. 123; Steinschneider, *Hebr. Uebers.* pp. 912, 1024.

G. M. K.

IBN SENEH. See Ẓarẓah, Samuel ibn Seneh.

IBN SHAPRUT, ḤASDAI. See Ḥasdai Abu Yusuf ibn Shaprut.

IBN SHAPRUT (SHAFRUT, not Sport or Sporta), SHEM-ṬOB BEN ISAAC: Spanish philosopher, physician, and polemic; born at Tudela in the middle of the fourteenth century; often confused with the physician Shem-Ṭob ben Isaac of Tortosa, who lived one hundred and fifty years later. While still a young man he was compelled to debate in public, on original sin and redemption, with Cardinal Pedro de Luna, afterward Pope Benedict XIII. This disputation took place in Pamplona, Dec. 26, 1375, in the presence of bishops and learned theologians (see his "Eben Boḥan"; an extract, entitled "Wikkuaḥ," in manuscript, is in the Bibliothèque Nationale, Paris, No. 831). A devastating war which raged in Navarre between the Castilians and the English obliged Ibn Shaprut, with many others, to leave the country. He settled at Tarazona, in Aragon, where he practised his profession of physician among both Jews and Christians. As a Talmudic scholar he carried on a correspondence with Sheshet. At Tarazona he completed his "Eben Boḥan" (May, 1380 or 1385), a polemical work against baptized Jews. As a model and guide for this work, which consists of fourteen chapters, or "gates," and is written in the form of a dialogue, he took the polemical "Milḥamot Adonai" of Jacob ben Reuben, falsely attributed to David Ḳimḥi.

Ibn Shaprut's work, however, is not a partial reproduction of the "Milḥamot," as has been incorrectly stated ("Oẓar Neḥmad," ii. 32); it is rather an extension or continuation of it, since it goes into details which are either not mentioned, or are mentioned only briefly, in the other. In the fifteenth chapter, which Ibn Shaprut added later, he criticizes a work written by Alfonso de Valladolid against Jacob ben Reuben. The thirteenth chapter contains a very interesting fragment by a fourteenth-century Schopenhauer, who wrote under the pseudonym "Lamas" ("Samael"). The "Eben Boḥan" has been preserved in several manuscripts. In order to assist the Jews in their polemical writings, Ibn Shaprut translated portions of the Four Gospels into Hebrew, accompanying them with pointed observations; answers to the latter, written by a neophyte named Jona, also exist in manuscript.

Ibn Shaprut wrote a commentary to the first book of Avicenna's canon entitled "'En Kol," for which he probably made use of the Hebrew translation of Sulaiman ibn Yaish and that of Allorqui, which latter he criticizes severely. He also wrote a supercommentary, entitled "Ẓafnat Pa'aneaḥ," to Ibn Ezra's commentary on the Pentateuch (see M. Friedländer in the "Publications of the Society of Hebrew Literature," series ii., vol. iv., p. 221, where "Shem-Ṭob ben Joseph Shaprut of Toledo" should read "Shem-Ṭob ben Isaac of Tudela"). The following works of Ibn Shaprut have been printed: "Pardes Rimmonim," explanations of difficult Talmudic haggadot (Sabbionetta, 1554); "Besorat Mattai," Hebrew translation of the gospel of Matthew according to the editions of Seb. Münster and I. de Tillet Mercier, reedited by Ad. Herbst (Göttingen, 1879).

Wörterb.* p. 301; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 352; Grätz, *Gesch.* viii. 23 *et seq.*; Isidore Loeb, *La Controverse Religieuse*, in *Revue de l'Histoire des Religions*, xviii. 145 *et seq.*; idem, in *R. E. J.* xviii. 219 *et seq.* (with several extracts according to the Breslau MS.); Fürst, *Bibl. Jud.* iii. 259 *et seq.* (where Ibn Shaprut is confounded with Shem-Ṭob b. Isaac of Tortosa).

G. M. K.

IBN SHEM-ṬOB, ISAAC: Philosophical commentator of the fifteenth century; younger brother of Joseph ibn Shem-Ṭob, and a follower of Maimonides. Isaac sided with his brother against their father, Shem-Ṭob ibn Shem-Ṭob, who, in his "Sefer ha-Emunot," had attacked Maimonides. Isaac's commentary on Maimonides' "Moreh" is known only through a quotation by Moses Alashkar ("Hassagot," p. 6, ed. Ferrara, 1556). According to Steinschneider, he is probably identical with the Isaac ibn Shem-Ṭob who wrote, at Aguilar de Campo in 1459, a commentary on Ghazali's "Metaphysics" (Paris MS. No. 906).

Bibliography: Grätz, *Gesch.* viii. 180; Steinschneider, *Hebr. Uebers.* p. 320.

G. M. Sc.

IBN SHEM-ṬOB, JOSEPH BEN SHEM-ṬOB: One of the most prolific Judæo-Spanish writers of the fifteenth century; born in Castile; died 1480. He lived in various cities of Spain: Medina del Campo de Leon (1441); Alcala di Henares (1451); Segovia (1454). Though it is not known precisely what office he held at court, he occupied a position which brought him in contact with distinguished Christian scholars. According to the custom of the time, he held public disputations with them in the presence of the court; this probably led him to study the polemical literature of the Jews. In the preface to his commentary on Profiat Duran's "Al-Tehi ka-Aboteka," he recounts a disputation with a Christian scholar concerning the doctrine of the Trinity. He seems to have elaborated this disputation and to have used it later in various anti-Christian writings. In 1452 he was sent by the Prince of Asturia, Don Enrique, to Segovia to prevent an outbreak of popular rage at Easter against the Jews. He speaks occasionally in his writings of great sufferings which drove him from place to place, and of passing through a severe illness. Grätz ("Gesch." viii. 422) has discovered, from a quotation in Joseph Jabez's "Or ha-Ḥayyim," that Ibn Shem-Ṭob died a martyr.

Ibn Shem-Ṭob's numerous writings, a list of which was compiled by Munk and supplemented by Beer and Steinschneider, are divisible into (*a*) independent works and (*b*) commentaries. Among the former are:

Original Works.

"Hanhagat ha-Bayit," treatise on economics, written in his youth (see his "'En ha-Ḳore"); nothing further is known concerning it. According to Steinschneider, it may be a revision of Aristotle's "Economics."

"'En ha-Ḳore," the only medieval scientific Hebrew homiletical work extant (Zotenberg, "Cat. Hebr. MSS. Paris," No. 325, 2; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2052, 2). The book is very rich in quotations from Christian and from Mohammedan authors. It treats systematically of the science of homiletics, defines the limitations of exegesis, and expresses itself in regard to the fundamental aim of Jewish preaching. It contains frequent references to Aristotle's "Ethics," Ibn Shem-Ṭob's favorite work.

"Kebod Elohim," on the summum bonum and the aim of life; written in 1442, printed at Ferrara in 1555.

"Da'at 'Elyon," a refutation of a fatalistic writing of the baptized Jew Abner of Burgos (Wolf, "Bibl. Hebr." iii. 428; the Oppenheim MS. cited by Wolf is no longer to be found in the collection at Oxford).

The following are his commentaries:

Commentary on Jedaiah ha-Penini's "Beḥinat 'Olam."

His Commentaries.

Commentary on his father's "Sefer ha-Yesodot," known only through a citation in "'En ha-Ḳore." Just as "Sefer ha-Yesodot" is, probably, only another title of his father's "Sefer ha-Emunot," so is this commentary, according to Steinschneider, probably identical with the "Sefer Kebod Elohim."

Commentary on the anti-Christian letter of Profiat Duran, "Al-Tehi ka-Aboteka," edited and printed together for the first time at Constantinople, 1577; reprinted by A. Geiger in "Ḳobez Wikkuḥim," Breslau, 1844.

"Biṭṭul 'Iḳḳere ha-Noẓerim," a Hebrew translation of and commentary on Ḥasdai Crescas' refutation, in Spanish, of the chief dogmas of Christianity. It was written at Alcala di Henares in 1451, and published anonymously at Salonica (?) in 1860. The original work by Crescas and its title have been lost (Steinschneider, "Hebr. Uebers." p. 462). These last two commentaries were in accord with the anti-

Christian polemical spirit prevailing in the Jewish religio-philosophic literature of the time.

Commentary on Lamentations, written at Medina del Campo in 1441, after the author had recovered from an illness (Parma, De Rossi MSS. No. 177).

Commentary on the "Isagoge" of Porphyry, after Averroes, of which no manuscript has yet been found (see Steinschneider, "Cat. der Hebr. Handschriften in der Stadtbibliothek zu Hamburg," p. 106; *idem,* "Hebr. Uebers." p. 86).

Commentary on Averroes' treatise on the possibility of union with the active intellect ("Sekel ha-Po'el"), after Moses Narboni's translation, with a long introduction (Steinschneider, "Cat. der Hebr. Handschriften Berlin," No. 216; Zotenberg, *l.c.* No. 885). Ibn Shem-Ṭob made a short extract from this voluminous commentary, which he finished at Segovia in 1454 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1253; see Steinschneider in "Monatsschrift," xxxii. 459 *et seq.*; *idem,* "Hebr. Uebers." pp. 194 *et seq.*).

Commentary on part of Averroes' "large commentary" on the "De Anima" of Aristotle, cited in Ibn Shem-Ṭob's commentary on Aristotle's "Ethics" (Steinschneider, *l.c.* p. 150).

Short commentary on Maimonides' "Moreh," ii. 68, cited in his son's commentary on the same work. Nothing further concerning it is known.

Commentary on the Sidra Bereshit, cited by him in the "'En ha-Ḳore," and a commentary on Deut. xv. 11, cited in his commentary on the "Nicomachean Ethics" (according to Steinschneider these two may be only sermons).

Commentary, containing minute and diffuse explanations of words and subject-matter, on the Hebrew translation of the "Nicomachean Ethics" of Aristotle ("Sefer ha-Middot"). Finished at Segovia in 1455, this was probably the last and most extensive of his works; he worked upon it for one hundred days continuously in order that no interruption might hinder him from an understanding of the text. The commentary exists in many manuscripts and was widely circulated in the Middle Ages. It has been made use of in Satanow's edition of the "Sefer ha-Middot" (Berlin, 1784; Steinschneider, *l.c.* pp. 212 *et seq.*).

Ethical Views.

The "Kebod Elohim" is Joseph's chief work. His leading ideas and principles, scattered throughout his other writings, are here brought together. In it he compares the ethical opinions of the Greeks, especially of Aristotle, with those of Judaism, a thing which had not before been earnestly or thoroughly done. For this purpose he gives many extracts ("peraḳim") from the "Ethics" of Aristotle, and translates chapters ix. and x., though from a Latin version. In answer to the question as to man's summum bonum he concludes it to be the Torah, which teaches and promises immortality, whereas the Greeks only speculate as to man's final goal. That the Torah and the philosophy of the Greeks have one and the same end, as some maintain, he denies, declaring the claim to be incompatible with the essence of positive religion; the Torah ordains the fulfilment of the 613 commandments, not the ethical teachings of Aristotle. Speculation within the bounds of the Torah is permitted, even commanded: and its province should be "the secret meanings of the Torah and of its rules, and the teachings of the Prophets." By this he probably indicates cabalistic dogmas. The divine commands are reasonable, although explanations based on reason, without the help of tradition often fail to explain the foundations of the commands.

Characterization.

Joseph ibn Shem-Ṭob was one of the most learned writers of his time. His knowledge of science and philosophy was intimate, and he had a very thorough acquaintance with Aristotle, his chief commentator Averroes, and the prominent Jewish, Mohammedan, and Christian writers. At the same time he was an independent and outspoken critic. He not only passed judgment upon Christianity and Islam, but he criticized Maimonides, with whose fundamental ideas he was not in sympathy, and maintained that the claim made by the cabalists that Simeon ben Yoḥai was the author of the Zohar was baseless. Nevertheless, in a discussion as to the proofs of the unity of God, he prefers the arguments of the cabalists to those of the philosophers. His attitude might be termed "positive Jewish," with a remarkable mixture of rationalism and dogmatism. He would allow no obscurity or confusion of ideas, and emphatically asserted that religion and philosophy are not identical in their final aim: "The Aristotelian laws make men; Jewish laws make Jews."

In the strife then raging over the study of rationalistic sciences Ibn Shem-Ṭob took the following position: The Jew in possession of the divine revelation could dispense with the sciences, although their study was useful to him, since they perfected him as a human being; but their study should be deferred to an advanced age. In this he agreed with Solomon ben Adret. He thought it was the "sophistry" of "Greek wisdom," in which speculative knowledge was the chief end of life, which made materialists of so many prominent Jews, causing their defection from Judaism and the extinction of whole communities in Aragon and Castile. In other districts, he said, not affected by this spirit, there were thousands of Jews who would rather be killed than surrender their faith.

J. M. Sc.

IBN SHEM-ṬOB, SHEM-ṬOB (BEN JOSEPH?): Spanish cabalist; a fanatical opponent of rationalistic philosophy; president of a yeshibah in Spain; lived about 1390–1440 (Gedaliah ibn Yaḥya, "Shalshelet ha-Ḳabbalah," ed. Venice, p. 62b). He was the father of Joseph and Isaac ibn Shem-Ṭob. He wrote: "Sefer ha-Emunot," on religious dogmas (Ferrara, 1556); "Sefer Yesodot" (perhaps only another title for the preceding); a commentary on the Pesaḥ Haggadah (Steinschneider, "Cat. Munich," 264, 3; *idem,* "Cat. Bodl." col. 99). The "Sefer ha-Emunot" is an attack on the Aristotelian philosophy and on the rationalistic and speculative conception of Judaism in vogue in the author's day. It is also a eulogy of the Cabala, "the true teaching, which has lived on through tradition and which alone can help Israel." Shem-Ṭob endeavors to prove that, from the standpoint of positive Judaism, there is not the agreement between religion and philosophy that is claimed by many Jewish philosophers. In the introduction he makes the philosophical investigators and the "enlightenment" brought about by them responsible for the defection from Judaism and for the political persecutions of the times. He renders especially severe judgments upon Maimonides (who withheld belief in resurrection), upon Abraham ibn Ezra, upon Levi ben Gershon, and upon other men of liberal views.

In his survey of the historical development of the Cabala Ibn Shem-Ṭob cites a number of older cabalistic writers, whose existence, however, is not thereby proved. This reference to them is appended to a short passage from the Zohar. Moses Alashkar violently opposed Shem-Ṭob's dogmatic system in his "Hassagot 'Al Mah She-Katab R. Shem-Ṭob Neged ha-RaMbaM" (Ferrara, 1556). The "Sefer ha-Emunot" has been much cited by both old and modern authors, and is valuable for the history of the Cabala. To judge from a remark on page 31b it would seem that Ibn Shem-Ṭob wrote other works, but nothing is known concerning them.

J. M. Sc.

IBN SHEM-ṬOB, SHEM-ṬOB BEN JOSEPH BEN SHEM-ṬOB: Spanish writer and philosopher; flourished about 1461–89; lived in Segovia and Almazan. He was a follower of Maimonides, even though his grandfather Shem-Ṭob ibn Shem-Ṭob was one of Maimonides' most uncompromising opponents, and though his father did not agree with Maimonides on essential points in his philosophy. Ibn Shem-Ṭob was the author of the following works: (1) Treatise on matter and its relation to form, according to the opinions of the ancient philosophers, especially Aristotle and his commentators; written in Segovia, 1461 (Paris MS. No. 898, 4). (2) Commentary to book iii., ch. 4–7 of Averroes' "middle commentary" on Aristotle's "De Anima," on the ratiocinative power of the soul; finished in Almazan, in 1478, under the title "Bi'ur ha-Koaḥ ha-Dabri" (Paris MS. No. 3). The other parts of the commentary were written by one of Shem-Ṭob's pupils in the same year (1478), and probably were either based upon the teacher's lectures or dictated by him (Paris MS. No. 967, 2). (3) Commentary on Averroes' "middle commentary" on Aristotle's "Physics"; finished in Almazan in 1480 (Paris MS. No. 967, 4). (4) "Ha-Ma'amar ba-Sibbah ha-Taklitit," treatise on the final cause or purpose of the creation of the world (Paris MS. No. 998, 2). The author quotes and discusses several of the opinions of ancient writers on this subject, and agrees with the last one cited, that the purpose of creation is the existence of mankind. The end of all humanity, according to him, is to approximate to the image of God. (5) "Teshubot" to Eli Ḥabillo's philosophical questions (De Rossi, MS. Parma No. 457, 2). (6) Commentary on Pirḳe Abot (Wolf, "Bibl. Hebr." iii. 1135). (7) Commentary on Maimonides' "Moreh" (Venice, 1551). This commentary, his chief work, was written with the purpose of reconciling "reason" (philosophy) and "law" (religion). He frequently quotes the commentary of Profiat Duran, to which his remarks are sometimes only supplementary. In the preface he states his intention to be merely to reproduce explanations and comments already given and in his opinion correct. A compendium, therefore, rather than a commentary, the work is very prolix (see Friedländer, "The Guide of the Perplexed," vol. iii., p. xxii.). (8) "Derashot ha-Torah," homilies on the Pentateuch, written in 1489 and printed three times during the sixteenth century (Salonica, 1525 or 1530; Venice, 1547; Padua, 1567). It soon, however, fell into comparative oblivion.

IBN SHOSHAN (Hebr. form, שושן or שושאן) or **IBN SUSAN** (Arab. form, "Susan," both forms meaning "lily"): Spanish family of Toledo, which can be traced back to the twelfth century and which is known to have existed up to the seventeenth century. Its first known representative was Solomon, called "Paṭṭish he-Ḥazaḳ" (= "the mighty hammer"). He was nasi in Toledo in the twelfth century (Graetz, "Hist." iii. 384).

Joseph ben Solomon ibn Shoshan (called also **Yazid ibn Omar ha-Nasi**): Communal worker in Toledo; died there 1205. He succeeded his father as nasi in that city, and stood high in the favor of the court. Graetz says that he was a favorite of Alfonso VIII. of Castile (1166–1214). He built a beautiful synagogue in Toledo, which is mentioned in "Ha-Manhig" (ed. Constantinople, p. 27a), and is also alluded to in the chronogram "1205," the year of his death, in his epitaph (see S. D. Luzzatto, "Abne Zikkaron," No. 75; Rapoport, in "Kerem Ḥemed," vii. 249–253). He gave a friendly reception at his home in Toledo to Abraham ben Nathan, the author of "Ha-Manhig." The poet Al-Ḥarizi composed two elegies on his death, one of which exists in manuscript, while the other is printed in the "Taḥkemoni" (ed. Warsaw, 1890, l. 412; comp. xlvi. 350).

Joseph's son **Solomon** was also nasi of Toledo, in succession to his father.

Bibliography: D. Cassel, in *Zunz Jubelschrift*, p. 125; A. Geiger, in *Wiss. Zeit. Jüd. Theol.* ii. 129; Grätz, *Gesch.* vi. 189, 328 *et seq.*; Zunz, *Z. G.* Index, s.v. *Schoschan*.

Among other members of the family who lived in the thirteenth century were: **Abraham**, who built houses of shelter for poor travelers in Toledo. **Judah**, known for his generosity. **Sisa**, grandfather of the writer Judah ben Moses of Toledo. **Samuel**, who provided the Talmudical high schools of Cairo and Jerusalem with oil, and who suffered in a persecution of the Jews in Toledo. **Jacob,** a Jewish judge, appointed by the government.

In the fourteenth century prominent members of the family were: **David,** a judge, son of the above-mentioned Jacob. He was associated with Asher ben Jehiel. **Meïr ben Abraham,** representative of the community, and his son ABRAHAM (see JEW. ENCYC. i. 119b). **Jacob,** who in 1340 was divorced from his wife Satbona, daughter of Judah Benveniste of Loria. **Isaac,** a physician; born 1324; died of the plague in 1399 (Graetz, *l.c.* iv. 113). **Joseph,** a thorough student of the Talmud and of theology; author of a commentary on Pirḳe Abot (Neubauer, "Cat. Bodl. Hebr. MSS." No. 385, 2; MS. Paris, No. 769, 5).

Noteworthy members in the fifteenth century were: **Meïr ben Joseph,** physician, "a helper of the poor"; died in Toledo 1415. An **Ibn Shoshan,** whose given name is not known; author of a short commentary on Ibn Gabirol's "Azharot" (Neubauer, *l.c.* No. 1177, 1b). **Samuel ben Zadok,** author of a festival prayer (De Rossi, MS. Parma No. 1377) and of a short compendium on Jacob ben Asher's "Ṭur Oraḥ Ḥayyim," under the title "Sefer 'Eẓ Ḥayyim" (MS. Paris, No. 444). **Samuel,** author of Sabbath sermons (Buxtorf, "Bibl. Rab." p. 467) and of a supercommentary on Rashi's commentary on the Pentateuch (Neubauer, *l.c.* No. 201). Another **Ibn Shoshan,** whose given name is not known; died as a martyr in Seville in 1481. **Judah ben Isaac,** rabbi in Magnesia about 1500; quoted by several halakists; author of a commentary on Ruth.

To the sixteenth century belong: **Joseph,** lived in Constantinople; publisher of Midrash Tanḥuma (1522). **David,** physician in Jerusalem (1536). **Isaac,** copyist of a cabalistic work in Safed (Neubauer, *l.c.* No. 1540). **David ben Samuel,** author of a commentary on Ecclesiastes (Geiger, "Jüd. Zeit." iii. 444). **Solomon ben Samuel** lived in Salonica.

Issachar ben Mordecai ibn Susan: Palestinian mathematician; flourished 1539–72. In early youth he removed from the Maghreb, perhaps from Fez, to Jerusalem, where he became a pupil of Levi ibn Ḥabib. From there he went to Safed, where, under great hardship, he continued his studies. But his increasing poverty induced him, in 1539, to leave Safed and seek a living elsewhere. At this time he commenced a work on the calendar, giving, among other things, tables which embraced the years 5299–6000 (1539–2240). After his return to Safed he resumed his work on the calendar, in which he was assisted by the dayyan Joshua. It was published at Salonica, in 1564, under the title "Tiḳḳun Yissakar." The second edition, under the title "'Ibbur Shanim" (Venice, 1578), is not as rare as the first. The tables in both editions begin with the year of publication.

The book also contains, in two appendixes, a treatise on rites ("minhagim") depending upon the variations in the calendar from year to year, and a treatise on the division of the weekly portions and the hafṭarot according to the ritual of the different congregations. For the latter treatise the author quotes as his source ancient manuscript commentaries, and holds that, according to the opinion of a certain scholar, the division of the weekly portions is to be traced back to Ezra. Rites, anonymously given, are, according to p. 51, 2d edition, taken from Abudarham, to whom the author attributes great authority.

David ibn Shoshan: A blind and very rich man of Salonica; died in Constantinople. Of good general education, he was intimately acquainted with the Talmud as well as with philosophy and mathematics. He was well known for his thorough knowledge of the law-books of the Mohammedans, and many Moslem scholars and judges came to him at Salonica to be taught their own law. Later he left for Constantinople, where he remained till his death and where, on account of his scholarship, he was highly respected by the Mohammedan students. One of his pupils was Asher Cohen ibn Ardot (d. 1645).

Members of the family in the seventeenth century were: **Eliezer,** son of the above-mentioned David, in Constantinople (1622). It is related of him that every Friday he cleaned with his beard the place in front of the Holy Ark. **David ben David,** rabbi in Salonica about 1660.

IBN SHU'AIB, BISHR (BASHAR) BEN PHINEHAS: Oriental mathematician; lived at the end of the tenth century. According to Hottinger ("Promptuarium," p. 96), the Arabic works of Ibn Shu'aib are often quoted by Arabic writers. In 997 the Jacobite Abu 'Ali 'Isa ibn Zara'ah addressed to Ibn Shu'aib a pamphlet against Judaism which seemed to be an answer to a pro-Jewish work by Ibn Shu'aib (see Ibn Abi Uṣaibi'a, "'Uyun al-Anba'," ii. 236).

G. M. SEL.

IBN SHU'AIB, JOEL: Rabbi, preacher, and commentator of the fifteenth century; born in Aragon; lived also at Tudela. He wrote: "'Olat Shabbat," sermons, in the order of the Sabbatical sections, written in 1469 (Venice, 1577); a commentary on Lamentations, written at Tudela in 1480, and published together with Galante's commentary on the same book (*ib.* 1483); a commentary on Job, mentioned in his "'Olat Shabbat"; a short commentary on Canticles (1556); "Nora Tehillot," a commentary on the Psalms, with a preface by his son Samuel (Salonica, 1568–69).

K. I. BR.

IBN SHU'AIB, JOSHUA: Preacher and cabalist; flourished about 1328. He was a pupil of Solomon ben Adret and the teacher of Menahem ibn Zerah. Together with Shem-Ṭob ben Abraham ibn Gaon, he was accused by Isaac the Blind of Acco of untrustworthiness in his account of the utterances and explanations of his teachers.

Shu'aib was the author of "Derashot al ha-Torah," homilies on the Pentateuch.

K. P. B.

IBN TIBBON: Family of translators that lived principally in southern France in the twelfth and thirteenth centuries. On the name "Tibbon" see Steinschneider in "J. Q. R." xi. 621. The more important members of the family were:

Abraham ibn Tibbon: Translator of Aristotle's "Economics"; his exact relationship to the Tibbon family is unknown (Steinschneider, "Hebr. Uebers." p. 227).

M. Sc.

Jacob ben Machir ibn Tibbon: Provençal astronomer; born, probably at Marseilles, about 1236; died at Montpellier about 1304. He was a grandson of Samuel ben Judah ibn Tibbon. His Provençal name was **Don Profiat Tibbon**; the Latin writers called him **Profatius Judæus.** Jacob occupies a considerable place in the history of astronomy in the Middle Ages. His works, translated into Latin, were quoted by Copernicus, Reinhold, and Clavius. He was also highly reputed as a physician, and, according to Jean Astruc ("Mémoires pour Servir à l'Histoire de la Faculté de Médecine de Montpellier," p. 168), was regent of the faculty of medicine of Montpellier.

In the controversy between the Maimonists and the anti-Maimonists Jacob defended science against the attacks of Abba Mari and his party; the energetic attitude of the community of Montpellier on that occasion was due to his influence.

Jacob became known by a series of Hebrew translations of Arabic scientific and philosophical works, and above all by two original works on astronomy. His translations are: (1) the "Elements" of Euclid, divided into fifteen chapters; (2) the treatise of Kosta ben Luka on the armillary sphere, in sixty-five chapters; (3) "Sefer ha-Mattanot," the "Data" of Euclid, according to the Arabic translation of Isḥaḳ ben Ḥunain; (4) "Ma'amar Ṭalḳus," treatise of Autolycus on the sphere in movement; (5) three treatises on the sphere of Menelas of Alexandria; (6) "Ma'amar bi-Tekunah," or "Sefer 'al Tekunah," in forty-four chapters, from Abu 'Ali ibn Ḥassan ibn al-Ḥaitham; (7) treatise on the use of the astrolabe, in forty chapters, from Abu al-Kasim Aḥmad ibn al-Ṣaffar; (8) compendium of the "Almagest" of Ptolemy, from Abu Muhammed Jabar ibn Aflaḥ; (9) "Iggeret ha-Ma'aseh be-Luaḥ ha-Niḳra Sofiḥah," from Abu Isḥaḳ ben al-Zarḳalah; (10) preface to Abraham bar Ḥiyya's astronomical work; (11) an extract from the "Almagest" on the arc of a circle; (12) "Ḳiẓẓur mi-Kol Meleket Higgayon," Averroes' compendium of the "Organon" (Riva di Trento, 1559); (13) Averroes' paraphrase of books xi.–xix. of Aristotle's history of animals; (14) "Mozene ha-'Iyyunim," from Ghazali.

The two original works of Jacob are: (1) a description of the astronomical instrument called the quadrant (Bibliothèque Nationale, Paris, MS. No. 1054), in sixteen chapters, the last of which shows how to construct this instrument; it was translated several times into Latin; (2) astronomical tables, beginning with March 1, 1300 (Munich MS. No. 343, 26). These tables, also, were translated into Latin and enjoyed the greatest repute.

Bibliography: Munk, *Mélanges*, p. 489; Carmoly, *Histoire des Médecins Juifs*, p. 90; Steinschneider, *Cat. Bodl.* col. 1232; idem, *Hebr. Uebers.*; Grätz, *Gesch.* vii. 246; Renan-Neubauer, *Les Rabbins Français*, pp. 599 *et seq.*; Gross, *Gallia Judaica*, p. 332.

I. Br.

Judah ben Moses ibn Tibbon: Rabbi in Montpellier; took part in the dispute between the followers and the opponents of Maimonides. He induced his relative Jacob ben Machir ibn Tibbon to support the Maimonidean party by pointing out that the anti-Maimonideans were the opponents of his grandfather Samuel ibn Tibbon and of the son-in-law of the latter, Jacob ben Abba Mari ben Samson ben Anatoli. In consequence of this, Jacob ben Machir ibn Tibbon protested against the reading of Solomon ben Adret's letter to the community of Montpellier, which nevertheless took place in the synagogue of that city on the following day, a Sabbath, in the month of Elul, 1304 ("Minḥat Ḳena'ot," Nos. 21, 22). According to Jacob ben Machir ibn Tibbon (*ib.* No. 39), Judah wrote various works, and made several translations which were praised even by Naḥmanides. None of them are extant.

Bibliography: Perles, *Salomo b. Abraham b. Adereth*, pp. 30, 37; Grätz, *Gesch.* vii. 228 *et seq.*, 248; Renan-Neubauer, *Les Rabbins Français*; Zunz, *Z. G.* p. 477; Geiger, *Wiss. Zeit. Jüd. Theol.* v. 99; Gross, *Gallia Judaica*, p. 333.

Judah ben Saul ibn Tibbon: Translator; born at Granada, Spain, 1120; died after 1190. He left his native place in 1150, probably on account of persecution by the Almohades, and went to Lunel in southern France. Benjamin of Tudela mentions him as a physician there in 1160. Judah lived on terms of intimacy with Meshullam ben Jacob and with Meshullam's two sons, Asher and Aaron, whom in his will he recommends as friends to his only son, Samuel. He was also a close friend of Abraham ben David of Posquières and of Zerahiah ha-Levi, the latter of whom he freely recognized as a greater scholar than himself, and whose son he also wished to have as a friend for his own son. He had two daughters whose marriage caused him much anxiety.

Judah was very active as a translator. his works including the translation into Hebrew of the following:

Translations of Philosophic Works.

(1) Baḥya ben Joseph ibn Paḳuda's "Al-Hidayah ila Fara'iḍ al-Ḳulub," under the title "Torat Ḥobot ha-Lebabot." He was induced to undertake this work by Meshullam ben Jacob and his son Asher, at whose desire he translated the first treatise, in 1161. After its completion Joseph Ḳimḥi translated the other nine treatises and afterward the first one also. At the wish of Abraham ben David of Posquières, Judah continued his translation of the work. Judah's translation is the only one that has held its place. That of Ḳimḥi was gradually superseded and at last came to be forgotten entirely. Only a small fragment of it has been preserved (published by A. Jellinek in Benjacob's edition of "Ḥobot ha-Lebabot," Leipsic, 1846). Judah's translation of Baḥya's work was first printed at Naples in 1489 without a title.

(2) Solomon ibn Gabirol's "Kitab Iṣlaḥ al-Akhlaḳ," under the title "Tiḳḳun Middot ha-Nefesh" (printed together with the first-mentioned translation at Constantinople in 1550).

(3) Judah ha-Levi's "Kitab al-Ḥujjah," under the title "Sefer ha-Kuzari" (1167; printed at Fano in 1506 and many times

since). In this instance also Judah's translation drove that of his rival, Judah ibn Cardinal, out of the field, so that only a small portion of the latter's work has been preserved (see Cassel's ed., pp. 344 *et seq.*).

(4) Two works by Ibn Janaḥ: (*a*) His grammar, "Kitab al-Luma'," under the title "Sefer ha-Riḳmah" (1171; edited by B. Goldberg, with notes by R. Kirchheim, Frankfort-on-the-Main, 1856). The translator's preface is interesting for the history of literature, and it gives Judah's opinions on the art of Hebrew translation. (*b*) "Kitab al-Uṣul," under the title "Sefer ha-Shorashim" (edited by Bacher, Berlin, 1896). Isaac al-Barceloni and Isaac ha-Levi had already translated this dictionary as far as the letter "lamed," and Judah finished it in 1171.

(5) Saadia's "Kitab al-Amanat wal-I'tiḳadat," under the title "Sefer ha-Emunot weha-De'ot" (1186; first ed. Constantinople, 1562).

Spurious Works Attributed to Judah.

Judah is also said to have translated the collection of poems "Mibḥar ha-Peninim," usually attributed to Solomon ibn Gabirol. This translation is ascribed to Ibn Tibbon in a very doubtful note in Neubauer, "Cat. Bodl. Hebr. MSS." No. 1975, and in manuscript Parma, de Rossi, No 1394. In no other manuscript is Judah ibn Tibbon called the translator. Further, the note mentions Seville instead of Granada as his home. The translation of Aristotle's "Analytica Posteriora" is also ascribed to Judah. This translation, however, is not extant; and it is altogether improbable that Judah translated the work in question.

Judah's independent works are:

(1) Sod Ẓaḥut ha-Lashon, on rhetoric and grammar. It is doubtful if this work was ever completed; and nothing but its title has been preserved (in Ibn Tibbon's testament; see No. 2, below).

It is also doubtful whether he wrote a commentary on the last chapter of Proverbs. The remark on the subject in his will (see below), "Remember also my explanation of 'Eshet Ḥayil,' p. 9," can refer to an oral explanation.

(2) Ẓawwa'ah, his ethical will, written in 1190 or after, and addressed to his son, Samuel, who at that time already had a son of his own (published with a biographical sketch in German by M. Steinschneider, Berlin, 1852; with an English translation by H. Edelmann in "Derek Ṭobim," London, 1852).

His Ethical Will.

Judah's testament, with its homely style and frankness, is one of the most interesting in this class of literature. It gives a deep insight into the soul of the man and his relation to his indisputably greater son, Samuel. Against the latter his chief complaint is that he never initiated his father into his literary or business affairs, never asked for his advice, and, in fact, hid everything from him.

He recommends Samuel to practise writing in Arabic, since Jews like Samuel ha-Nagid, for example, attained rank and position solely through being able to write in that language. He exhorts him to morality and to the study of the Torah as well as of the profane sciences, including medicine. He is to read grammatical works on Sabbaths and festivals, and is not to neglect the reading of "Mishle" and of "Ben Mishle." In regard to his medical practise he gives his son sage advice. He further advises his son to observe rigorously the laws of diet, lest he, like others, become ill frequently in consequence of intemperate and unwholesome eating, which would not fail to engender mistrust in him as a physician on the part of the general public. Interesting are Judah's references to his library as his "best treasure," his "best companion," and to his book-shelves as "the most beautiful pleasure-gardens." He adds:

"I have collected a large library for thy sake so that thou needest never borrow a book of any one. As thou thyself seest, most students run hither and thither searching for books without being able to find them. . . . Look over thy Hebrew books every month, thy Arabic ones every two months, thy bound books every three months. Keep thy library in order, so that thou wilt not need to search for a book. Prepare a list of the books on each shelf, and place each book on its proper shelf. Take care also of the loose, separate leaves in thy books, because they contain exceedingly important things which I myself have collected and written down. Lose no writing and no letter which I leave thee. . . . Cover thy book-shelves with beautiful curtains, protect them from water from the roof, from mice, and from all harm, because they are thy best treasure."

His fine linguistic sense and his conception of the art of translating are shown by his counsels on this subject.

He advises his son to read the weekly portion in Arabic every Sabbath so as to initiate himself into the art of translating, in case he should ever feel an inclination for it. He recommends to him an easy, pregnant, elegant style, not overburdened with words; further, he is to avoid foreign words and unusual and affected constructions, and is to use words which have a harmonious sound and are easy to pronounce. He always lays great weight upon the advantages of having a beautiful, clear handwriting and of using beautiful paper, good ink, etc. The testament closes with a poem summarizing the contents of the will.

Views on Translation.

Judah ibn Tibbon well understood the difficulties of the translator's task. He says in the preface to his translation of Baḥya's "Ḥobot ha-Lebabot" that he hesitated to translate the book because he did not feel sufficiently acquainted with Hebrew, and that he undertook the task only in compliance with the wish of his friend. He knows that he is laying himself open to adverse criticism with his translation, as is the case with every innovation. He attributes the imperfect character of his predecessors' translations from Arabic into Hebrew to the fact that either they did not have a thorough knowledge of Arabic or of Hebrew or that they gave in the translation their own opinions instead of those of the author. Judah is also of the opinion that the Hebrew translation can not always reproduce the pregnancy of the Arabic original. He holds that a translator should first make a strictly literal rendering of the original, and then revise his translation as though it were an original production of his own. For his creation of new word-forms (in the use of which he was not without precedents), and for the rabbinicisms in his Hebrew style, he excuses himself to the reader by saying that they are unavoidable. It is true that he often translated the mistakes of the original without heeding the sense, or rather lack of sense, expressed therein.

His son, Samuel, in his introduction to the "Moreh Nebukim" justly calls Judah "the father of translators"; since Gedaliah ibn Yaḥya he has also had the title of "chief of translators" (Wolf, "Bibl. Hebr." i. 455). Maimonides speaks very flatteringly of Judah in a letter to Samuel.

Moses ibn Tibbon: Physician and author; born in Marseilles; flourished between 1240 and 1283; son of Samuel ibn Tibbon and father of the Judah ibn Tibbon who was prominent in the Maimonidean controversy which took place at Montpellier.

Original Works.

The number of works written by Moses ibn Tibbon makes it probable that he reached a great age. With other Jewish physicians of Provence, he suffered under the order of the Council of Béziers (May, 1246) which prohibited Jewish physicians from treating Gentiles. He wrote the following works: (1) Commentary on Canticles (Lyck, 1874). Written under the influence of Maimonides, it is of a philosophical and allegorical character, and is similar to that by his brother-in-law Abba Mari ben Simson ben Anatoli, whom he quotes repeatedly. In a long preface he deals with the poetical form and the philosophical content of the book, especially discussing the three classes of poetry according to the "Organon" of Aristotle. This part of the preface, taken from Immanuel ben Solomon's commentary to Canticles, was published by Dukes in his "Naḥal Ḳedumim" (pp. 55, 56; Brüll's "Jahrb." iii. 171 *et seq.*; Steinschneider, "Hebr. Bibl." xiv 99, Salfeld, in Berliner's "Magazin," vi. 25).

(2) Commentary to the Pentateuch, according to Isaac de Lattes' "Sha'are Ẓiyyon" (see p. 42 of Buber's Yaroslav, 1885, edition of the latter work) and Gedaliah ibn Yaḥya's "Shalshelet ha-Ḳabbalah (see Wolf, "Bibl. Hebr." i. 1055). This commentary is quoted in the Commentary on Canticles (p. 24a). Azulai, in his "Shem ha-Gedolim" (i. 144), mentions that, according to an early source, Moses ibn Tibbon composed a work of this kind. But an ancient authority, Judah Mosconi (*c.* 1370), in his supercommentary on Abraham ibn Ezra, expresses some doubt as to the authenticity of this commentary on account of its often very unsatisfactory explanations. According to Steinschneider, it was merely a supercommentary on Abraham ibn Ezra (see "Cat. Bodl." col. 2004; "Hebr. Bibl." xiv. 103; Berliner's "Magazin," iii. 47, 150; comp. Neubauer, "Cat. Bodl. Hebr. MSS." No. 2282, 9).

(3) "Leḳeṭ Shikḥah," mentioned by Isaac de Lattes (*l.c.*) as contained in the foregoing work, though he does not give any further indication of its contents. Gedaliah ibn Yaḥya (*l.c.* p. 54b, ed. Venice) gives only the title.

(4) "Sefer Pe'ah," an allegorical explanation, in ninety-one chapters, of haggadic passages in the Talmud and the Midrash (Neubauer, "Cat. Bodl. Hebr. MSS." No. 939, 9). Its tendency is apologetical. After Raymund de Pennaforte had established schools, in which Arabic and Hebrew were taught, for the purpose of converting Jews and Moors, Christian clerics, in their incomplete knowledge of the rabbinical writings, attempted to cast scorn on the anthropomorphisms of the Midrashim. Moses ibn Tibbon traces this to those who took the anthropomorphic passages in a literal instead of, as Maimonides had taught, an allegorical sense (see Isaac de Lattes, *l.c.*; Zunz, "G. V." p. 400; Steinschneider and Cassel, "Jüdische Litteratur," in Ersch and Gruber, "Encyc." section ii., part 28, p. 409; "Cat. Bodl." *l.c.*).

(5) Commentary on the weights and measures of the Bible and the Talmud (Vatican MSS., No. 298, 4; see Assemani, "Catal." p. 283; Steinschneider, "Joseph ibn Aḳnin," in Ersch and Gruber, "Encyc." section ii., part 31, p. 50; "Ginze Nistarot," iii. 185 *et seq.*).

(6) "Sefer ha-Tanninim," mentioned by Isaac de Lattes (*l.c.*), but without indication of its contents; the Vatican MS. has the title "Ma'amar 'al ha-Tanninim." According to Assemani (*l.c*), it contained explanations on the creation of the Tanninim (comp. Gen. i. 21). Gedaliah ibn Yaḥya (*l.c.*) gives its title as "Sefer ha-Ḳinyanim," which has been accepted as correct by Azulai ("Shem ha-Gedolim") and Benjacob ("Oẓar ha-Sefarim," p. 531); it is, however, certainly incorrect, as the contents of the book show.

(7) "'Olam Ḳaṭon," a treatise on the immortality of the soul, several manuscripts of which exist (Vatican MSS., No. 292, 2; Paris MSS., No. 110. see Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1319, 7, 1324, 10, 1335, 2, 1600, 13; see also Carmoly in "Orient, Lit." ii. 235, 314). Moses ibn Tibbon's authorship is doubtful. According to a Bodleian manuscript, No. 1318, 7, his father, Samuel ibn Tibbon, was its author; in another passage Judah, his grandfather, is said to be its author (see Steinschneider, "Cat. Bodl." cols. 2003–2004).

(8) Letter on questions raised by his father, Samuel ibn Tibbon, in regard to Maimonides' "Moreh Nebukim" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2218, 2).

Gedaliah ibn Yaḥya (*l.c.*) erroneously ascribes to Moses ibn Tibbon a "Sefer ha-Kolel," a "Sefer ha-Melek," and a "Sefer 'Asarah Debarim" (see Zunz, "Z. G." pp. 471–472; Steinschneider, *l.c.*). Moses was also wrongly accredited with three other works: a commentary on Abot, a commentary on Ibn Gabirol's "Azharot," and notes on the "Sefer ha-Madda'" of Maimonides (Steinschneider, *l.c.*).

Moses ibn Tibbon's translations are even more important and numerous than his original works. They include versions of Arabic works on philosophy, mathematics, astronomy, and medicine. The name of the author of the work from which the translation was made precedes, in the following list, the title by which the translation is known. His most important translations are as follows:

Averroes: Commentaries, etc., on Aristotle: "Physica Auscultatio" (about 1250; Steinschneider, "Hebr. Uebers." p. 109); "Kelale ha-Shamayim weha-'Olam" ("De Cœlo et Mundo"; *l.c.* p. 126); "Sefer ha-Hawayah weha-Hefsed" (1250: "De Generatione et Corruptione"; *l.c.* p. 130); "Sefer Otot 'Elyonot" ("Meteora"; *l.c.* p. 135); "Kelale Sefer ha-Nefesh" (1244: "De Anima"; *l.c.* p. 147); "Bi'ur Sefer ha-Nefesh" (1261: "The Middle Commentary"; *l.c.* p. 148): "Ha-Ḥush weha-Muḥash" (1254: "Parva Naturalia"; *l.c.* p. 154); "Mah she-Aḥar ha-Ṭeba'" (1258: "Metaphysica"; *l.c.* p. 159); "Bi'ur Arguza" (commentary on Avicenna's "Arjuzah"; Renan, "Averroes," p. 189; Steinschneider, *l.c.* p. 699).

Avicenna: "Ha-Seder ha-Ḳaṭon" (1272: "The Small Canon"; *l.c.* p. 696, comp. p. 285).

Baṭalyusi: "Ha-'Agullot ha-Ra'yoniyyot" ("Al-Ḥada'iḳ," on the "similarity of the world to an imaginary sphere"; *l.c.* p. 287), edited by D. Kaufmann ("Die Spuren al-Bataljusi's in der Jüdischen Religionsphilosophie," Leipsic, 1880).

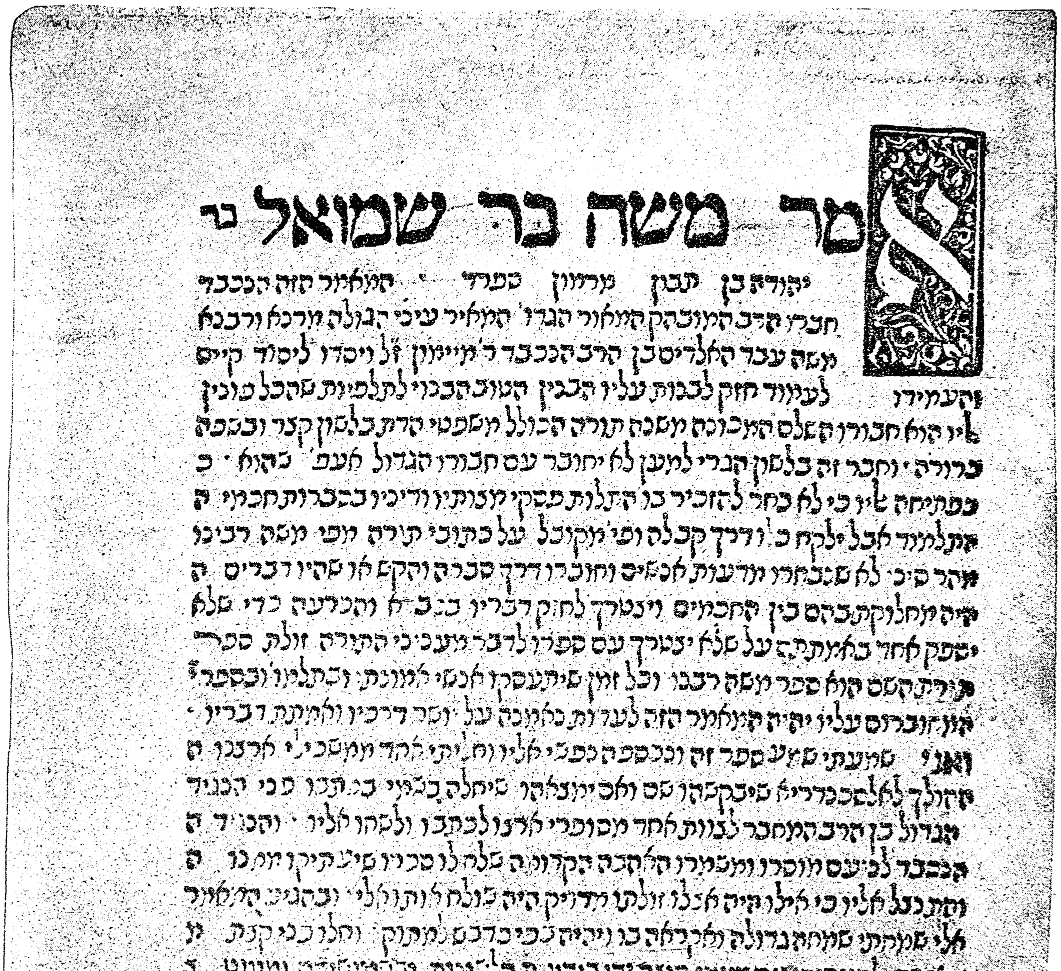
Al-Ḥaṣṣar: "Sefer ha-Ḥeshbon" (1271: Treatise on Arithmetic; Steinschneider, *l.c.* p. 558; "Isr. Letterbode," iii. 8).

Euclid: "Shorashim," or "Yesodot" (1270: "Elements"; Steinschneider, *l.c.* p. 506, comp. p. 510).

Alfarabi: "Hatḥalot ha-Nimẓa'ot ha-Ṭib'iyyim" (1248: "Book of the Principles"; *l.c.* p. 291, comp. p. 47), edited by H. Filipowski, in a Hebrew almanac of 5610 (Leipsic, 1849).

Geminus: "Ḥokmat ha-Kokabim," or "Ḥokmat Tekunah" (1246, Naples: Introduction to the "Almagest" of Ptolemy; *l.c.* p. 539).

Ibn al-Jazzar: "Ẓedat ha-Derakim" (1259: "Viaticum").



אמר משה בר שמואל נ״ע
יהודה בן תבון מרמון ספרדי · המאמר הזה הנכבד
חברו הרב המובהק המאור הגדול המאיר עיני הגולה מרנא ורבנא
משה עבד האלהים בן הרב הנכבד ר׳ מיימון ז״ל ויסדו ליסוד קיים
והעמידו לעמוד חזק לבנות עליו הבנין הטוב הבנוי לתלפיות שהכל פונין
אליו הוא חבורו הגדול המכונה משנה תורה הכולל משפטי הדת בלשון קצר ובשפה
ברורה · וחבר זה בלשון הערבי למען לא יחובר עם חבורו הגדול הנזכ׳ כאשר · ב
בפתיחה שלו כי לא בחר להזכיר בו התלות פסקי מצותיו ודיניו בסברות חכמי ה
התלמוד אבל ילקח כ׳ ודרך קבלה ומפי מקובל על כתובי תורה ומפי משה רבינו
מהר סיני · לא שנבחרו ודעות חכמים וחוברו דרך סברה ויקשו או שהיו דברים ה
שיה מחלוקת בהם בין החכמים ויצטרך לחזק דבריו בב״א והכרעה כדי שלא
יספק אחד באמתתם על שלא יצטרך עם ספרו לדבר מעניני התורה זולת ספר
תורת השם הוא ספר משה רבינו וכל זמן שיתעסקו חכמי האומות בתלמוד ובספרי
אם חוברים עליו יהיה המאמר הזה לעדות נאמנה על ישר דרכיו ואמתת דבריו ·
ואני שמעתי שמע ספר זה ונכספה נפשי אליו ואחר יחד ממשכילי ארצנו ה
ההולך לאלכסנדריא שיבקשהו שם ואם ימצאהו שיחלה [illegible] פני הנגיד
הגדול בן הרב המחבר לצוות אחד מסופרי ארצו לכתבו ולשלחו אלי · והנגיד ה
הנכבד לפי עוצם חסדו ומעוצם האהבה הקדומה [illegible] העתיקו ושלחו
[illegible] אליו כי אלו היה אצלו זולתו מדויק היה שולח לי אותו [illegible] ובהגיע המאמר
אלי שמחתי שמחה גדולה ואקראהו ויהי בפי כדבש למתוק · ואלך בו קצת [illegible]
ואחר כן להעתיקו עם דעתי קוצר ידי בידיעת הלשונות [illegible] ומיעוט ב
בחינות לשוני ומצאתי עד אין ראוי לקראו [illegible] וחסרון שמעתי בו כונת
התלמוד · ואחרי אשר העתקתיו קודם שהשלמתי לבדוק אותו ולהבין אחריו
והמשיג מדבר כי העתיקו הנשיא הנכבד [illegible] לשונות ב
בקי ובקי בהם [illegible] השר הגדול ר׳ אברהם הלוי בן חסדאי נ״ע א
אמרתי בלבי להעביר העתקתי מפני רעותה הטובה ממנה ואין טוב מהיות כל
איש מכיר ערכו ומעלתו בחכמה ודעת [illegible]
והאדם מתקנא בחברו לא בידוע ומפורסם במעלה גדולה · עניו וגדול מוכי
בחכמות ובינה · ואחר הימים הוגה אלי ההעתקה הנזכרת ועברתי עליה
[illegible] לטובה וכמעט מליצתה על טוב עצתי בהעלימי העתקתי [illegible]
כי הולכתי לעשותה · עוד עיינתי בדברי המאמר ואבינה בו כי העתק את
מעותה ראשון היו בו [illegible]

PAGE OF THE FIRST EDITION OF MOSES IBN TIBBON'S TRANSLATION OF MAIMONIDES' "SEFER HA-MIẒWOT," CONSTANTINOPLE, 1516-18.
(In the Columbia University Library, New York.)

Ḥunain: "Mabo el Meleket ha-Refu'ah" ("Introduction to Medical Science"; *l.c.* p. 711).

Razi: "Ha-Ḥilluḳ weha-Ḥilluf" ("Book of the Divisions [of Maladies]"; *l.c.* p. 730); "Al Iḳrabadhin" ("Antidotarium"; *l.c.* p. 730).

For his other translations see Steinschneider, *l.c.* pp. 177, 231, 362, 363, 416, 542, 544, 553; *idem*, "Cat. Bodl." cols. 1998 *et seq.*

True to the traditions of his family, Moses ibn Tibbon translated those of Maimonides' Arabic writings which his father had not translated:

Translations from Maimonides.

"Miktab" or "Ma'amar be-Hanhagat ha-Beri'ut," a treatise on hygiene in the form of a letter to the sultan, printed in "Kerem Ḥemed" (iii. 9 *et seq.*), in Jacob ben Moses Ẓebi's "Dibre Mosheh" (Warsaw, 1886), and by Jacob Saphir ha-Levi (Jerusalem, 1885, from his own manuscript, under the title "Sefer Hanhagat ha-Beri'ut"). This translation (1244) was one of his first, if not the first (Steinschneider, "Hebr. Uebers." pp. 770 *et seq.*).

Commentary on the Mishnah. A fragment of his translation of Pe'ah, which was published by A. Geiger 1847, makes it at least possible that he translated the whole Seder Mo'ed (*l.c.* p. 925).

"Sefer ha-Miẓwot," another of his earliest translations (Constantinople, c. 1516–18, also printed in various editions of Maimonides' "Yad," but without Moses ibn Tibbon's preface); in it he excuses himself for continuing his own translation, though having known of that of Abraham Ḥasdai, on the ground that the latter had obviously used the first edition of the Arabic original, while he himself used a later revision (*l.c.* p. 927).

"Millot ha-Higgayon," a treatise on logic (Venice, 1552, with two anonymous commentaries). No complete manuscript of the Arabic original is known. The terminology here used by Moses ibn Tibbon has been adopted throughout Hebrew philosophical literature (*l.c.* p. 434).

"Ha-Ma'amar ha-Nikbad," a treatise on poisons, also called "Ha-Ma'amar be-Ṭeri'aḳ" (extant in several manuscripts; see Steinschneider, "Cat. Bodl." col. 1919, iv.; *idem*, "Hebr. Uebers." p. 764).

Commentary on Hippocrates' "Aphorisms" (1257 or 1267: *l.c.* p. 769, comp. p. 659).

Bibliography: Steinschneider, *Jewish Literature*, pp. 96, 104, 125, 167, 184, 197; Renan-Neubauer, *Les Rabbins Français*, xxvii. 593 *et seq.*, 750 *et seq.*; idem, *Les Ecrivains Juifs Français*, pp. 356, 432, 686, 759; Grätz, *Gesch.* vii. 103; Winter and Wünsche, *Die Jüdische Litteratur*, iii. 661; Gross, *Gallia Judaica*, pp. 59, 327, 356, 373, 534.

Moses ben Isaac ibn Tibbon appears as a copyist on the island of Candia in the early part of the fifteenth century (Steinschneider, "Mose Antologia Israelitica," 1879, ii. 457; 1880, iii. 283).

Samuel ibn Tibbon: Son of Moses ibn Tibbon; first mentioned in a responsum of Solomon ben Adret (Neubauer, in "R. E. J." xii. 82 *et seq.*), which narrates a suit brought by Samuel against his rich young cousin Bionguda (ביונגודא). Bionguda was the youngest of three daughters born to Bella, the daughter of Moses ibn Tibbon. After the death of her husband, Jacob ha-Kohen (1254), Bella went to Marseilles, where Bionguda became engaged to Isaac ben Isaac. Samuel ibn Tibbon, who at that time was probably living at Marseilles, contested the legality of the marriage to Isaac ben Isaac, saying that he had made Bionguda his legal wife while she was still living at Naples. Bionguda denied this. The lawsuit connected with this dispute has been reviewed by Isidore Loeb ("Un Procès dans la Famille des Ibn Tibbon," Paris, 1886) and by Grätz ("Monatsschrift," xxxvi. 49).

Bibliography: Geiger, *Wiss. Zeit. Jüd. Theol.* v. 98; Gross, in *R. E. J.* iv. 198 *et seq.*; idem, *Gallia Judaica*, p. 373; Steinschneider, *Hebr. Uebers.* p. 539.

Samuel ben Judah ibn Tibbon: Physician and philosophical writer; born about 1150 in Lunel; died about 1230 in Marseilles. He received from his father and other able teachers in Lunel a thorough education in medicine, in Arabic, in Jewish literature, and in all the secular knowledge of his age. Later he lived in several cities of southern France (1199 in Béziers, 1204 in Arles) and traveled to Barcelona, Toledo, and even to Alexandria (1210–1213). Finally he settled in Marseilles. That he was buried in Tiberias (see Brüll in Kobak's "Jeschurun," vi. 211, Hebr. text, note) is very improbable. His father's will (see Judah ben Saul ibn Tibbon) gives a good insight into Samuel's character.

Original Works.

In comparison with his translations, the original works of Samuel are not numerous. He composed in 1213, on shipboard, when returning from Alexandria, "Bi'ur meha-Millot ha-Zarot," an explanation of the philosophical terms of Maimonides' "Moreh Nebukim," printed, together with his Hebrew translation of the "Moreh," at Venice, 1551, and often afterward (see Geiger, "Wiss. Zeit. Jüd. Theol." iii. 427; Goldenthal, "Grundzüge und Beiträge zu einem Sprachvergleichenden Rabbinisch-Philosophischen Wörterb." in "Denkschriften der Kaiserlichen Akademie der Wissenschaften," i. 424 *et seq.*, Vienna). When finishing his translation of the "Moreh" he felt the necessity of giving an alphabetical glossary of the foreign words that he had used in his translation. In the introduction to the glossary he divides these words into five classes: (1) words taken mainly from the Arabic; (2) rare words occurring in the Mishnah and in the Gemara; (3) Hebrew verbs and adjectives derived from substantives by analogy with the Arabic; (4) homonyms, used with special meanings; and (5) words to which new meanings were given by analogy with the Arabic. He gives also a list of corrections which he desired to be made in the copies of his translation of the "Moreh." The glossary gives not only a short explanation of each word and its origin, but also in many cases a scientific definition with examples (Steinschneider, "Hebr. Uebers." pp. 420 *et seq.*). According to Isaac Lattes (Renan-Neubauer, "Les Ecrivains Juifs Français," p. 686), Samuel wrote a commentary on the whole Bible, but only the following portions are known:

"Ma'amar Yiḳḳawu ha-Mayim," a philosophical treatise in twenty-two chapters on Gen. i. 9, published by M. Bisliches, Presburg, 1837 (Geiger, *l.c.* iv. 413 *et seq.*). It deals with physical and metaphysical subjects, interpreting in an allegoric-philosophical manner the Bible verses cited by the author. At the end of the treatise (p. 175) the author says that he was led to write it through the propagation of philosophy among Gentiles and the ignorance of his coreligionists in philosophical matters. The many manuscripts of the "Ma'amar" are enumerated in Steinschneider, "Hebr. Uebers." p. 199, note 671. The year of its composition is not known.

A philosophical commentary on Ecclesiastes, quoted by Samuel in the foregoing work (p. 175), and of which several manuscripts are extant (Steinschneider, "Cat. Bodl." col. 2488). It is described by Perreau in "Bollettino Italiano degli Stud. Orient." new series, 1878.

A commentary on the Song of Solomon. Quotations from this work are found in his commentary on Ecclesiastes; in Neubauer, "Cat. Bodl. Hebr. MSS." No. 1649, 2, fol. 21; and in his son's commentary on the Song of Solomon. These make it perfectly evident that he really composed this work; but its contents are entirely unknown (see Salfeld, "Das Hohelied bei den Jüdischen Erklärern des Mittelalters," in Berliner's "Magazin," vi. 24 *et seq.*).

"Ner ha-Ḥofes," a commentary on those parts of the Pentateuch which, he contends, are to be taken allegorically. The book is only quoted by himself (in his "Ma'amar Yiḳḳawu ha-Mayim," pp. 9, 13, 17, 132), and no manuscript of it has yet been found.

Samuel ibn Tibbon was an enthusiastic adherent of Maimonides and his allegorical interpretation of the Bible, and he is said to have even gone so far as to declare that the Bible narratives are to be considered simply as parables ("meshalim") and the religious laws merely as guides ("hanhagot") to a higher, spiritual life (Brüll's "Jahrb." iv. 9, x. 89). Such statements, not peculiar in his age, aroused the wrath of the adherents of the literal interpretation of the Bible, the anti-Maimonidean party.

Translations.

The "Moreh Nebukim."

Samuel's reputation is based not on his original writings, however, but on his translations, especially on that of Maimonides' "Dalalat al-Ḥa'irin" (finished about 1190) into Hebrew under the title "Moreh Nebukim." This title, by which the book has always since been quoted, and which signifies "Guide of the Perplexed," his opponents satirically changed into "Nebukat ha-Morim" = "Perplexity of the Guides." Before finishing this difficult work, Samuel consulted Maimonides several times by letter regarding some difficult passages. Maimonides' answers, some of which were written in Arabic and were later on translated into Hebrew, perhaps by Samuel himself, praise the translator's ability and acknowledge his thorough command of Arabic, an acquirement very surprising in a country like France. After having given some general rules for translation from the Arabic into Hebrew, he explains the doubtful passages, which he renders into the latter language. (For some interesting remarks by Samuel on Arabic philosophical writers see Steinschneider, "Hebr. Uebers." pp. 40 *et seq.*) Some fragments of this correspondence have been printed in "Ḳobeẓ Teshubot ha-Rambam," ii. 26 *et seq.*; and in Ottensoser, "Briefe über den Moreh des Maimonides," Nos. 1 and 2; others have been discovered in a manuscript in the Bodleian Library, Oxford, by Steinschneider ("Hebr. Uebers." pp. 415 *et seq.*).

Samuel ibn Tibbon's translation is preceded by an introduction. As the motive for his undertaking he mentions that the scholars of Lunel asked him for a translation of the "Moreh." As aids in his work he indicates the Hebrew translation by his father (whom he calls "the Father of the Translators"), works on the Arabic language, and the Arabic writings in his own library. Samuel also wrote an index to the Biblical verses quoted in the "Moreh" (see Renan-Neubauer, "Les Ecrivains Juifs Français," p. 684).

Characteristics.

The distinction of Samuel's translation is its accuracy and faithfulness to the original. Whether one approves or disapproves his introduction of a number of Arabic words into Hebrew, and the fact that, by analogy with the Arabic, he gives to certain Hebrew words meanings different from the accepted ones, the magnitude of his work can not be questioned. Especially admirable is the skill with which he reproduces in Hebrew the abstract ideas of Maimonides, which is essentially a language of a people expressing concrete ideas. Soon after Samuel (that is, after 1230) the poet Judah al-Ḥarizi also translated the "Moreh" (part i., ed. Schlossberg, London, 1857; part ii., *ib.* 1876; part iii., *ib.* 1879). He adopted Ibn Tibbon's Hebrew title, "Moreh Nebukim" (see Kaufmann, "Die Attributenlehre," p. 363), and though he said of Samuel, not without some personal animus, that the latter had intentionally obscured the meaning of the original, he was not successful in his attempt to have his own translation supersede that of Ibn Tibbon (Pococke, cited by Wolf, "Bibl. Hebr." i. 856),

That keen critic Shem-Ṭob ibn Palquera passes judgment upon both translations in an anonymous letter. "In Ibn Tibbon's translation," he writes, "are only a few errors; and if the learned translator had had time he would certainly have corrected these: but in Al-Ḥarizi's translation mistakes are numerous, and words are often given a wrong meaning" (Steinschneider, "Hebr. Uebers." pp. 428 *et seq.*).

When the struggle between the Maimonists and anti-Maimonists arose, Samuel did not escape reproach for having spread the ideas of Maimonides, his chief accuser being Judah al-Fakhkhar (Kaufmann, *l.c.* p. 493).

Samuel also translated the following works of Maimonides:

Other Translations.

(1) A treatise on Resurrection under the Hebrew title "Iggeret" or "Ma'amar Teḥiyyat ha-Metim," Constantinople, 1569, and often afterward (see Steinschneider, "Cat. Bodl." col. 1914).

(2) Mishnah commentary on Pirḳe Abot, including the psychological introduction, entitled "Shemonah Peraḳim" (Soncino, 1484 *et seq.*, and often afterward in the Mishnah and Talmud editions). The preface to his translations exists in two different versions (Steinschneider, *l.c.* col. 1890; *idem*, "Hebr. Uebers." pp. 437, 926; see also Brann in Berliner's "Magazin," v. 41 *et seq.*; Baneth, *ib.* vi. 171 *et seq.*, 237 *et seq.*; Geiger, "Moses ben Maimon," in "Nachgelassene Schriften," iii. 60, 88). (3) "The thirteen articles" under the title "Shelosh 'Esreh 'Iḳ-ḳarim" or "Yesodot" (1505; see Steinschneider, "Hebr. Uebers." p. 925; *idem*, "Cat. Bodl." col. 1887). (4) A letter to his pupil Joseph ibn 'Aḳnin, a part of which is printed in "Ḳobeẓ Teshubot ha-RaMBaM," ii. 30 *et seq.* (see Steinschneider, "Hebr. Uebers." p. 931d; *idem*, "Cat. Bodl." col. 1901).

Samuel also translated the following writings of other Arabic authors: (1) 'Ali ibn Riḍwan's commentary on the "Ars Parva" of Galen (according to Paris MS. 1114), finished in 1199 in Béziers (Steinschneider, "Hebr. Uebers." p. 734). (2) Three smaller treatises of Averroes, under the title "Sheloshah Ma'amarim" (edited by J. Hercz, with German transl.: "Drei Abhandlungen über die Conjunction des Separaten Intellects mit den Menschen von Averroes, aus dem Arabischen Uebersetzt von Samuel ibn Tibbon," Berlin, 1869). Samuel translated these three treatises both as an appendix to his commentary on Ecclesiastes (see above) and separately (Steinschneider, *l.c.* p. 199).

(3) Yaḥya ibn Baṭriḳ's Arabic translation of Aristotle's "Meteora," under the title "Otot ha-Shamayim" (also quoted under the title "Otot 'Elyonot"), translated on a voyage from Alexandria, between the two islands Lampedosa and Pantellaria. It is extant in several manuscripts. The preface and the beginning of the text have been printed by Filipowski (*c.* 1860) as a specimen. Samuel made this translation, at the request of Joseph ben Israel of Toledo, from a single and bad Arabic translation of Baṭriḳ (Steinschneider, *l.c.* p. 132).

Some works are wrongly ascribed to Samuel by late copyists, *e.g.*, the translation of a "Biography of Alexander the Great," under the title "Sefer Aleksandros Maḳedon we-Ḳorotaw" (see "Ḳobeẓ 'al Yad," ii. 12 *et seq.*, Berlin, 1886; I. Lévi, in "R. E. J." iii. 248 *et seq.*; for the contrary view see Steinschneider, *l.c.* p. 899); a commentary on Avicenna's "Ḳanon" (Steinschneider, *l.c.* pp. 686, 692);

Shem-Ṭob ibn Palquera's "De'ot ha-Pilusufim" (the error in this case is due to a mistake in the introduction, where "Samuel" occurs instead of "Shem-Ṭob"; see Steinschneider, *l.c.* pp. 5, 285; *idem*, "Cat. Bodl." cols. 2483 *et seq.*).

Bibliography: Renan-Neubauer, *Les Rabbins Français*, pp. 573 *et seq.*; idem, *Les Ecrivains Juifs Français*, Index; Steinschneider, *Jewish Literature*, pp. 86 *et passim*; Grätz, *Gesch.* vi. 204; Winter and Wünsche, *Die Jüdische Litteratur*, ii. 330, 385.

G. M. Sc.

IBN VERGA, JOSEPH: Turkish rabbi and historian; lived at Adrianople at the beginning of the sixteenth century; son of Solomon ibn Verga, author of "Shebeṭ Yehudah," who emigrated from Spain to Turkey as a Marano. Joseph was a pupil of Joseph Fasi, a contemporary of Tam ibn Yaḥya and of the physician Moses Hamon, and belonged to the college of rabbis of Adrianople. He completed his father's work by adding a record of some of the events of his own time and of the age immediately preceding. He knew Latin, and incorporated in the "Shebeṭ Yehudah" some narratives which he translated from what he calls the "Christian language." He also added a supplication ("teḥinnah") written by himself.

Joseph was the author of "She'erit Yosef" (Adrianople, 1554), a methodology of the Talmud, giving the rules that are wanting in the "Halikot 'Olam" of Joshua ha-Levi and in the "Sefer Keritut" of Samson of Chinon. Wolf ("Bibl. Hebr." i., No. 880) attributes this book to another Joseph ibn Verga, who lived at Avlona.

Bibliography: Conforte, *Ḳore ha-Dorot*, p. 34a; Azulai, *Shem ha-Gedolim*, i. 39; Grätz, *Gesch.* 3d ed., ix. 321, 323, 324; Steinschneider, *Cat. Bodl.* col. 1538; Fürst, *Bibl. Jud.* iii. 473.

G. M. Sel.

IBN VERGA, JUDAH: Spanish historian, cabalist, perhaps also mathematician, and astronomer, of the fifteenth century; born at Seville; martyred at Lisbon. He is supposed to have been the grandfather (by Carmoly, "Revue Orientale," ii. 98, the father) of Solomon ibn Verga, author of the "Shebeṭ Yehudah," and it is this work which furnishes some details of Ibn Verga's life. He was held in high esteem by the governor of Andalusia. Once the Jews of a little town, near Seville, called "Xerez de la Frontera," were accused of transferring the body of a converted Jew to their cemetery; they applied to Ibn Verga for help, who, admitted to the presence of the governor, proved by means of a cabalistic writing that the real criminals were the priests ("Shebeṭ Yehudah," § 38). He was very active in maintaining an understanding between the Maranos and the Jews; and the Inquisition, on its introduction into Spain, desired him to betray the former. He succeeded, however, in escaping to Lisbon, where possibly he lived several years, until he was taken by the Inquisition; he died under torture (*ib.* § 62). Ibn Verga wrote a history of the persecutions of the Jews, largely taken from Profiat Duran's "Zikron ha-Shemadot" (comp. the synopsis in Grätz, "Gesch." viii., note 1); his work, in turn, was the basis of the "Shebeṭ Yehudah" (see preface to the latter).

The Bibliothèque Nationale, Paris (MS. No. 1005, Hebr.), contains a series of scientific treatises written by a certain Judah ibn Verga, who is generally identified with the Judah ibn Verga of the "Shebeṭ Yehudah." These treatises are: (1) "Ḳiẓẓur ha-Mispar," a short manual of arithmetic (*ib.* folios 100–110a); (2) "Keli ha-Ofeḳi," a description of the astronomical instrument which he invented to determine the sun's meridian, written at Lisbon toward 1457 (folios 110b–118a); (3) a method for determining heights (folios 118b–119b); (4) a short treatise on astronomy, the result of his own observations, completed at Lisbon in 1457 (folios 120–127). Ibn Verga also wrote a commentary on Al-Farghani's compendium of the "Almagest," about 1480 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2013, 4).

There is, however, some reason for the statement that this identification is doubtful (comp. "Shebeṭ Yehudah," § 62). Another Judah ibn Verga lived in the sixteenth century and corresponded with Joseph Caro ("Abḳat Rokel," Nos. 99, 100).

Bibliography: Grätz, *Gesch.* 3d ed., viii. 322; Steinschneider, *Hebr. Uebers.* p. 557; Wiener's introduction to the *Shebeṭ Yehudah*.

G. M. Sel.

IBN VERGA, SOLOMON: Spanish historian and physician; lived in the fifteenth and sixteenth centuries. His relationship to Judah ibn Verga can not be determined; it is certain, however, that he was not the son of the latter, for he never refers to Judah as his father (see Ibn Verga, Judah). Schudt ("Jüdische Merkwürdigkeiten," i. 131) was apparently misled by the title of the "Shebeṭ Yehudah" when he called its author "Solomon b. Schefet." Ibn Verga himself says ("Shebeṭ Yehudah," § 64) that he was sent by the Spanish communities to collect money for the ransom of the prisoners of Malaga; but he lived also at Lisbon as a Marano, and was an eye-witness of the massacre there (*ib.* § 60). Later he escaped to Turkey, probably to Adrianople, where he wrote the "Shebeṭ Yehudah," an account of the persecutions of the Jews in different countries and epochs. In a short preface he says that he found an account of some persecutions at the end of a work of Judah ibn Verga, which he copied; to this he added a narration of the persecutions of his own time, the compilation being afterward completed and edited by his son, Joseph ibn Verga. The title "Shebeṭ Yehudah," which is an allusion to Judah ibn Verga ("Shebeṭ" in Hebrew being the equivalent of the Spanish "Verga"), refers to Gen. xlix. 10. The work contains an account of 64 persecutions, besides narratives of many disputations and an account of Jewish customs in different countries. Ibn Verga endeavored to solve the problem why the Jews, particularly the Spanish Jews, suffered from persecutions more than any other people. He gives various reasons, among them being the superiority of the Jews ("whom the Lord loveth He chasteneth": Prov. iii. 12, Hebr.), and chiefly their separation from the Christians in matters of food; their troubles were also a punishment for their sins. In general, Ibn Verga does not endeavor to conceal the faults of the Jews; he sometimes even exaggerates them.

As this work is the compilation of three authors, it is not arranged in chronological order. There is no connection between the narratives, but the Hebrew style is clear and attractive. Ibn Verga knew Latin, and derived many narratives from Latin sources. This work contains also a treatise on the form of the Temple of Solomon. Zunz ("Notes on the Itinerary of Benjamin of Tudela," ed. Asher, ii. 268) points out the importance of the work from the geographical point of view, as it contains a considerable number of names of places, as well as a description of customs.

The "Shebeṭ Yehudah" was first printed in Turkey *c.* 1550; since then it has been reprinted several times. It has been four times translated into Judæo-German, first at Cracow, 1591. It has been translated into Spanish by Meïr de Leon, Amsterdam, 1640; into Latin by Gentius, *ib.* 1651; into German by M. Wiener, Hanover, 1856. Fragments of it have been translated by Eisenmenger ("Das Entdecte Judenthum," ii.), Schudt ("Jüdische Merkwürdigkeiten," i.), Menahem Man ha-Levi ("She'erit Yisrael"), and Zedner ("Auswahl," pp. 96 *et seq.*). At the end of paragraph 64 Ibn Verga says that he wrote a work entitled "Shebeṭ 'Ebrato," containing persecution narratives and some rabbinical treatises, now lost.

[The historical value of the data contained in the "Shebeṭ Yehudah" has been seriously questioned by Isidore Loeb ("R. E. J." xxiv. 1 *et seq.*). Loeb holds that, though an original writer, Ibn Verga is not always trustworthy, and that some of his material belongs really in the domain of legend. Ibn Verga was especially interested in the religious controversies held between Jews and Christians; and the fullest account of these controversies is given in his work. But even these seem to be fictitious—with the exception, perhaps, of that of the one at Tortosa (§ 40). The "Shebeṭ Yehudah" is valuable, however, for the Jewish folk-lore and the popular traditions which it contains. The only one of Verga's contemporaries that made use of his work seems to be Samuel Usque, in his "Consolação" ("R. E. J." xvii. 270). The Latin translation of Gentius contains two peculiar mistakes on the title-page: the word שבט is written שבת, and is translated "tribe" instead of "rod." A Yiddish translation, with additions ("Shebeṭ Yehudah ha-Shalem"), was published in Wilna, 1900. Corrections to the text of Wiener are given by Loeb in "R. E. J." xvii. 87. —G.]

G. M. Sel.

IBN VIVES (VIVAS), ḤAYYIM: Spanish translator; translated from Arabic into Hebrew for David ibn Bilia the farewell letter of Ibn al-Ṣa'igh to 'Ali ben 'Abd al-'Aziz ibn al-Imam of Granada. 'Ali was Ibn al-Ṣa'igh's pupil and the collector of his works (Steinschneider, "Hebr. Uebers." p. 357).

Another Ḥayyim ibn Vives (Vivas) lived at the period when Judah b. Asher was in Toledo. He was then an old man, and occupied himself with rabbinical science. He lived at Xativa, at which place Isaac ben Sheshet addressed a letter to him (Responsa, No. 297).

G. M. K.

IBN VIVES, JUAN: Grandson of one of the richest Jews of Valencia, and one of the most influential and respected of the citizens of that city. In 1510, at an auto da fé held in Valencia, he was condemned for Judaizing, and his houses, which were located in the district which had formerly been the Juderia, were torn down. **Luis Vives,** the many-sided scholar, was one of his relatives, and in order to avoid all suspicion of unbelief, wrote his "De Veritate Fidei Christianæ," attacking Judaism (Rios, "Hist." i. 14).

G. M. K.

IBN VIVES AL-LORQUI (OF LORCA), JOSEPH BEN JOSHUA: Spanish physician; died before 1372; father of Joshua ben Joseph ibn Vives al-Lorqui. He revised Tibbon's translation of Moses Maimonides' "Millot Higgayon" and dedicated the revision to his pupil Ezra ben Solomon ibn Gatigno. He wrote also the "Sefer Yesodot."

G. M. K.

IBN VIVES AL-LORQUI (OF LORCA), JOSEPH BEN JOSHUA: Spanish physician; died before 1408; son of Joshua ibn Vives al-Lorqui. He translated from Arabic into Hebrew various books of the short canon of Avicenna, and added to the translation a commentary which was used by Shem-Ṭob Shaprut.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1505; *idem*, *Hebr. Bibl.* xviii. 68; idem, *Hebr. Uebers.* pp. 436, 681, 921; Carmoly, *Les Médecins Juifs*, p. 117.

G. M. K.

IBN VIVES AL-LORQUI (OF LORCA), JOSHUA BEN JOSEPH: Spanish physician; lived about 1400 in Alcañiz. In 1408, at the command of the rich and influential Benveniste ben Solomon b. Labi, he wrote a work in Arabic on the value and effects of various foodstuffs and of simple and composite medicaments. It was translated into Hebrew, under the title "Gerem ha-Ma'alot," by Benveniste's son, Joseph Vidal.

This Joshua al-Lorqui is perhaps, as Philoxene Luzzatto points out, identical with the Joshua al-Lorqui who wrote an anti-Christian letter to his friend Solomon ha-Levi (Paul de Burgos), and who was also a physician in Alcañiz and was on friendly terms with Benveniste ben Labi, being present at Moses Benveniste's wedding. In the letter the writer expresses his astonishment at the fact that Paul de Burgos should have resolved to change his faith; he investigates the motives which could have led him to take such a step—ambition, mania for wealth and power, satisfaction of sensual desires, doubt of the truths of Judaism. He then gives eight arguments against the truth of Christianity, and in conclusion asks Paul if one who professes a certain religion is obliged to inquire into the truth of its doctrines.

This letter was addressed to Paul de Burgos at a time when the latter occupied a high position, was surrounded by luxury and a band of servants, and, as is supposed, had already been appointed tutor to the young king Juan II.

Bibliography: Steinschneider, *Hebr. Uebers.* p. 762; Carmoly, *Les Médecins Juifs*, p. 118; *Dibre Ḥakamim*, p. 41, where the letter of Joshua al-Lorqui is reproduced; *Oẓar*

Neḥmad, ii. 5, which gives the answer of Paul de Burgos; Grätz, *Gesch.* viii. 90 *et seq.*, 424 *et seq.*; see also Hieronymus de Santa Fé in Brüll's *Jahrb.* iv. 50 *et seq.*

G. M. K.

IBN VIVES AL-LORQUI (OF LORCA), JOSHUA BEN JOSEPH (Hieronymus [Geronimo] **de Santa Fé):** Spanish physician, anti-Semitic writer, and propagandist. As a Jew his name was Joshua ha-Lorki (from the name of his birthplace, Lorca, near Murcia), although it is hardly correct to identify him with the author of the same name who wrote an anti-Christian letter to Solomon ha-Levi (Paul de Burgos). The only proof offered for such an identification is a note appended to the manuscript of the letter to the effect that "the author afterward became a Christian." This note, not in another manuscript ("Cat. Leyden," pp. 276, 354), was probably added by a later copyist who was misled by the similarity of the names (see IBN VIVES AL-LORQUI, JOSHUA BEN JOSEPH, above). Joshua ha-Lorki was baptized before Vicente Ferrer delivered his proselytizing sermons in Lorca. Although not a rabbi, as Spanish chroniclers claim, he was well versed in the Talmud and in rabbinical literature. In order to show his zeal for the new faith he tried to win over to Christianity his former cobelievers, and to throw suspicion on them and on their religion. For that reason he was called "megaddef" (= "the slanderer"), from the initial letters of his name, Maestro Geronimo de Santa Fé. He offered to prove from the Talmud that the Messiah had already come in the person of Jesus. For this purpose he induced Pope Benedict XIII., whose physician he was, to arrange a public disputation with learned Jews, which event was celebrated as a great triumph for Hieronymus. Either before or after the debate Hieronymus, at the request of Pope Benedict XIII., wrote two articles in which he heaped up accusations against the Jews and repeated the old slanderous charges.

His Works.

One of these articles, was entitled "Tractatus Contra Perfidiam Judæorum"; the other, "De Judæis Erroribus ex Talmuth"; they were published together as "Hebræomastix" (Zurich, 1552; Frankfort-on-the-Main, 1602; Hamburg, n. d.), printed in the "Bibliotheca Magna Veterum Patrum," Lyons, vol. xxvi., and Cologne, 1618; they were also translated into Spanish under the title "Azote de los Hebreos." Articles in response were written by Don Vidal Benveniste, with the title "Ḳodesh ha-Ḳodashim," and by Isaac Nathan ben Kalonymus in his "Tokaḥat Mat'eh."

Hieronymus de Santa Fé had several sons. One of them, Pedro, was in special favor with Queen Maria. Another was assessor for the governor of Aragon and lived in Saragossa; this son of the "apostle of Tortosa," as De los Rios calls him ("Hist." iii. 264), took part in the rebellion against Pedro Arbues, was arrested with other Maranos, and, in order to escape the disgrace of being publicly burned, killed himself in prison. His body was burned publicly on Oct. 21-22, 1486. Other members of the Santa Fé family were burned as Maranos in 1497 and 1499.

G. M. K.

IBN WAḲAR, JOSEPH BEN ABRAHAM: Spanish cabalist and Talmudist; lived at Toledo in the fourteenth century. Moses Narboni, who began his commentary on the "Moreh" at Toledo in 1355, speaks of a discussion he had there with Ibn Waḳar (Commentary on the "Moreh," i. 28); and Solomon Franco, who wrote his supercommentary on Ibn Ezra to the Pentateuch before 1372, speaks, at the end, of Ibn Waḳar as dead and as having been his teacher. Ibn Waḳar must have died between 1355 and 1370. He drew up the statutes of the Jewish community of Toledo (Judah b. Asher, Responsa, No. 51). He is quoted by Samuel Ẓarẓah in his philosophical commentary on the Pentateuch ("Meḳor Ḥayyim," beginning of Bereshit and Beḥuḳḳotai), and by Ezra b. Solomon Gatigno, who gives Ibn Waḳar's opinion that the "standing still" of the sun at the time of Joshua was due to an eclipse, understood only by Joshua.

As a cabalist Ibn Waḳar attempted to reconcile the Cabala with philosophy. Whether he wrote his treatises in Arabic and then translated them into Hebrew, is uncertain. They are: (1) on the principles of Cabala, and especially on the Sefirot (probably Scaliger's "De Fundamentis Artis Cabbalisticæ" [see Wolf, "Bibl. Hebr." i., No. 877] suggested Neubauer's title, "Yesod ha-Ḳabbalah" ["Cat. Bodl. Hebr. MSS." No. 1627], though Johanan ALLEMANNO ["Collectanea," p. 96] mentions it under the title "Ba-Shorashim be-'Inyan ha-Sefirot"); (2) "Ha-Ma'amar ha-Kolel," an effort to reconcile the Cabala with the Torah and with philosophy (see below); (3) "Shir ha-Yiḥud," a cabalistic poem on the Sefirot, to which the author himself wrote a commentary (published in the Venice prayer-book of 1645); (4) "Sefer ha-Yiḥud," a cabalistic treatise on the unity of God (transl. from the Arabic and edited with notes by Manasseh Grossberg, Vienna, n.d.).

In the treatise on the principles of the Cabala Ibn Waḳar shows how the Sefirot emanate from the First Cause, and treats of the relation between the Sefirot and the divine attributes, the various names of God, and the various names used in Biblical and Talmudic literature for the Sefirot. According to him the chief difference of opinion among the cabalists is as to whether the Sefirot are extrinsic to the Primal Being (which seems to be Ibn Waḳar's opinion), or whether they are intrinsic (see CABALA and SEFIROT). His chief authorities are the Talmud, Midrash Rabbah, Sifra, Sifre, Bahir, Pirḳe R. Eliezer, and, among the later cabalists, Naḥmanides, Ṭodros ha-Levi, and Abulafia. He cautions the cabalistic student against the Zohar as full of mistakes. The "Ha-Ma'amar ha-Kolel" is known only through Samuel Motot (who described it in his "Meshobeb Netibot," i., ch. 5), Zunz ("G. V." p. 422), and Steinschneider (Ersch and Gruber, "Encyc." section ii., part 31, pp. 100-106). Steinschneider identified Joseph ibn Waḳar with Joseph b. Yaḳar, and, despite difference in the titles, the latter's "Sefer Haskamat" (Vatican MS. No. 384, 2) with the work described by Motot. But later, Steinschneider attributed the "Sefer Haskamat" to Isaac b. Moses ibn Waḳar ("Hebr. Uebers." p. 598). Jellinek ("Beiträge," ii. 44) attributes the work described by

Motot to Joseph ibn Samnun ("Hebr. Bibl." xiv. 81). Two other works, "Sefer Refuot" (a medical treatise, translated from the Arabic) and "Liḳḳuṭim," or "Collectanea" (Munich MSS. Nos. 221, 320), are ascribed by Lilienthal to Joseph ibn Waḳar. Steinschneider (*l.c.*) thinks it not impossible that it was this Joseph ibn Waḳar who in 1295 translated into Hebrew Zahrawi's "Kitab al-Taṣrif."

G. M. Sel.

IBN WAḲAR (WAḲḲAR, HUACAR, HUCAR, וקאר), JUDAH BEN ISAAC OF CORDOVA: Tax-collector for, and representative and traveling companion (about 1320) of, the infante Don Juan Manuel; the author of "Conde Lucanor." He was a very pious man, an admirer of R. Jehiel b. Asher of Toledo, and punished relentlessly all moral and religious offenses.

Bibliography: Asher b. Jehiel's *Responsa*, xvii. 8, xviii. 13; Grätz, *Gesch.* vii. 291 *et seq.*

G. M. K.

IBN WAḲAR (HUACAR), SAMUEL: Physician to King Alfonso XI. of Castile; astronomer and astrologer; flourished in the fourteenth century. A favorite of the king, he gained influence in the administration of the finances of the country, and received the privilege of minting the coin at a lower standard. He induced the king to forbid the importation of grain, etc., from the kingdom of Granada, thereby arousing the antagonism and envy of Joseph de Ecija. Both of them were accused by Gonzalo Martinez of enriching themselves at the expense of the state. Samuel ibn Waḳar was imprisoned with his two brothers and other members of his family, and died under torture. His body was left unburied for an entire year. It is doubtful whether Samuel ibn Waḳar was the author of the anonymous "Castilian Medicine," still extant in manuscript. If Don Samuel ibn Waḳar is identical, as is here assumed, with the "Hebreo medico del rey y grande astrologo" who treated the queen before the birth of Don Pedro and saved her life, he did not die until late in 1333.

G. M. K.

IBN YAḤYA, DAVID: Grammarian and philosopher; son of the martyr Don Joseph; born at Lisbon 1465; died 1543. He was a pupil of David ben Solomon ibn Yaḥya, a relative, who wrote expressly for him two school-books, entitled respectively "Leshon Limmudim" and "Sheḳel ha-Ḳodesh." In 1496 he and his family were forced to emigrate to Italy. In 1518 he became rabbi of Naples, and remained in that position until the expulsion of the Jews from the kingdom of Naples in 1540. To his care for the interests of his own congregation, Ibn Yaḥya added an active concern for the welfare of his coreligionists elsewhere. In 1533 a number of Jewish prisoners were brought from Tunis to Naples; Ibn Yaḥya was instrumental in effecting their release; his own congregation having already exhausted its means, he sent a general appeal to his brethren in Genoa, Lombardy, Montferrat, and (in 1535) Bologna. In 1534 he engaged in an effort to avert the impending decree of expulsion. When the expulsion of the Jews occurred, six years later, Ibn Yaḥya resumed his wanderings, which ended at Imola, where he died.

David ibn Yaḥya corresponded with Meïr of Padua, the chief rabbinical authority of his time in Italy, and was highly eulogized by him. He wrote various works on grammar and philosophy, which his grandson, the chronicler Gedaliah ibn Yaḥya, possessed in manuscript. David Kaufmann had in his possession a copy of the "Maḳaṣid" of Ghazali, copied by David ibn Yaḥya. The Hebraist Widmannstadt, a pupil of Reuchlin, was also a pupil of Ibn Yaḥya.

Bibliography: Steinschneider, *Cat. Bodl.* col. 864; idem, *Jüdische Litteratur*, in Ersch and Gruber, *Encyc.* section ii., part 27, p. 450; Michael, *Or ha-Ḥayyim*, No. 131; *R. E. J.* xvi. 37, 46.

G. I. E.

IBN YAḤYA, JOSEPH BEN DAVID: Italian exegete and philosopher; born at Florence 1494; died at Imola 1539. His parents were Spanish exiles who had lived for a time in Florence and had then settled in Imola. His son Gedaliah, author of "Shalshelet ha-Ḳabbalah," relates that his father having asked to be buried in the Holy Land, his body was sent to Safed, where Joseph Caro superintended its interment. Ibn Yaḥya was the author of two works: (1) "Perush" (Bologna, 1538), a commentary on the Five Scrolls and Hagiographa, and (2) "Torah Or" (*ib.* 1537–38), a treatise on theology and eschatology.

Bibliography: Steinschneider, *Cat. Bodl.* col. 1476; De Rossi, *Dizionario*, p. 133; Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 101.

G. I. Br.

IBN YA'ISH, BARUCH BEN ISAAC: Philosopher and translator of the fifteenth century; apparently a native of Spain, though he lived in Italy. Ibn Ya'ish, in addition to being a master of Hebrew, had a thorough knowledge of Arabic and Latin. His only original work is a Hebrew commentary, in ten chapters, to Avicenna's "Medicamenta Cordialia," entitled "Bi'ur la-Sammim ha-Libbiyyim," taken from a Latin translation. He analyzes the functions of the heart, quoting Averroes and Aristotle (comp. Parma, De Rossi, MS. No. 1036). MS. (Hebr.) No. 1001 in the Bibliothèque Nationale, Paris, an anonymous commentary on Aristotle's "Ethics," bears the name of Ibn Ya'ish, but it is not clearly indicated whether he was the commentator or only the translator (see Steinschneider, "Hebr. Uebers." p. 218). He also translated from the Latin, at the request of Samuel Ẓarfati, Aristotle's "Metaphysics," under the title "Mah she-Aḥar ha-Ṭeba'" (*c.* 1485?). In the introduction he explains that he gave the preference to the Latin translation because the Arabic translation was very confused. While his Hebrew translation is literal, he divided each of the twelve books into chapters, a division not existing in the original. He prefaced the work with a minute table of contents. Another **Baruch ben Isaac ibn Ya'ish**, of Cordova, was the author of "Meḳor Baruk," a triple commentary on Canticles, Ecclesiastes, Proverbs, and Job (Constantinople, 1576). Carmoly (Jost's "Annalen," i. 302) identifies the two.

IBN ZABARRA or **ZABARA** (זבארה, זאבארה, זברה or זבארו): Judæo-Spanish family-name, found as early as the twelfth century; derived perhaps from a place-name. In Spanish documents a Jafre Avinzabarre is mentioned, in 1258; and, toward the end of the thirteenth century, at Manresa, the brothers Ausch, Juçef, and Astruc Zabarra (or de Zabarra), and Mair Zabarra. A Juçef Zabarra is also mentioned at Besalu. In Jewish literature Joseph Zabara (*c.* 1200), Judah ibn Zabarra, Joseph b. Benveniste Zabarra, and Moses ibn Zabara are known.

BIBLIOGRAPHY: Isidore Loeb, in *R. E. J.* v. 287; Jacobs, *Sources*, Index; Steinschneider, in *J. Q. R.* x. 520.

G.

IBN ZABARRA, JUDAH: Poet and theologian; flourished in the thirteenth and fourteenth centuries; probably a native of Spain, where the surname of "Zabara" was borne by several scholars. He was the pupil of Aaron ha-Levi (d. 1293–94) and of Meïr Abulafia, and seems to have resided a certain time at Montpellier. Judah was the author of "Miktab ha-Teḥiyyah," a treatise on resurrection (Constantinople, 1569). Of his poetical productions only one poem has survived, which celebrates the works of Menahem Meïri of Perpignan (Stern, preface to the introduction of Meïri, ed. Vienna, p. xiv.).

G. I. BR.

IBN ẒARẒAL. See ẒARẒAL, ABRAHAM IBN.

IBRAHIM IBN YA'ḲUB, The Israelite: Jewish merchant-traveler of the tenth century. The little that is known about Ibrahim ibn Ya'ḳub is from his own account of the countries of the Slavs, and this is rather uncertain. He was a merchant and a slave-dealer, and perhaps he traveled besides on a diplomatic mission. His native land was most probably North Africa; it can scarcely have been Spain. In 965 he crossed the Adriatic Sea, went to the countries of the West Slavs, visited Prague and eastern Germany, and later on at Magdeburg met Bulgarian ambassadors at the court of Otto I. He traveled thence along the right bank of the Elbe, through Slavonic countries and farther northward to Schwerin, situated near the Lake of Schwerin. It is extremely difficult to find out which road he took, as the names of towns and places which he mentioned have been corrupted. His short, important, and cleverly written sketch of the Slavs is a most precious source for the history of the Slavs in general and the West Slavs in particular.

It is worthy of note that thirty miles from Neuberg, near Thietmar, Ibrahim found a "Saline of the Jews"—probably Dürrenbergen on the Saale. In speaking of the kingdom of Boleslau of Bohemia, he mentions the Jewish merchants who came, together with Mohammedans, from Hungary. They carried away from Bohemia "flour, tin, and skins." Ibrahim mentions the Chazars, but says nothing about their being Jews; though he probably traveled only to those places where Jews lived and where he was sure of a friendly reception. His account is therefore also of interest for the study of the commercial activity of the Jews in the tenth century.

It may be mentioned that the account of his journeys throws light also on the much-disputed nationality of the Old-Russians.

De Goeje of Leyden discovered the account of Ibrahim's journeys in the second part of the "Kitab al-Masalik wal-Mamalik," by the Spanish-Arabic savant Abu 'Ubaid al-Bakri (1094), which was found by Schefer in 1875 in the library of the Nur i Osmanie mosque at Constantinople. In the "Mémoires de l'Académie Impériale des Sciences" of St. Petersburg (Appendix, vol. xxxii., No. 2) appeared in 1878 the Arabic text of Ibrahim's sketch, with an introduction and a translation by Rosen, and a minute explanation by Kunik, under the title "Records of Al-Bakri and Other Authors About Russia and the Slavs" (in Russian). In 1880 De Goeje edited a Dutch translation of the report, with extracts from Kunik's abundant explanations, published in "Verslagen in Medeelingen der Konigelijke Academie van Wetenschappen, Afdeeling Letterkunde," 2de Reeks, Deel ix., Amsterdam, 1880. These two publications form the foundation for the study of Ibrahim's account.

F. W.—G.

IBZAN (אבצן): Judge of Israel for seven years after Jephthah; a native of Beth-lehem; he had thirty sons and thirty daughters, and was buried in his native town (Judges xii. 8–10). As "Beth-lehem" here is not followed by "Ephratah" or by "Judah," the town may have been one in the tribe of Zebulun (Josh. xix. 15).

Ibzan is identified by the Talmudists with BOAZ. The objection which might be based upon Ruth iv. 17, where it appears that Obed was Boaz's only child, is met by the assertion that all the children of Ibzan died in their father's lifetime because he had not invited Manoah to their weddings (B. B. 91a; Yalḳ., Judges, 601).

E. G. H. M. SEL.

ICHABOD: Son of Phinehas and grandson of Eli. Born after the death in battle of his father and the tragic death of his grandfather, he was named "Ichabod" (אי = particle of negation; כבוד = "glory") by his dying mother, who exclaimed at the same time, "The glory is departed from Israel" (I Sam. iv. 14–22). Thus, his very name embodied a memorial of a great battle which resulted disastrously for Israel.

The Septuagint rendering of "Ichabod"—"wo to the glory of Israel"—points to a similar origin (אי = "wo"; comp. Eccl. x. 16). The name occurs but once besides, in I Sam. xiv. 3, where Ahijah, son of Ahitub, Ichabod's (evidently elder) brother, is mentioned as a priest. The description of Ahitub as "Ichabod's brother" is evidence that Ichabod was a priest of recognized importance in Israel at this period.

E. G. H. I. M. P.

IDDO (עדו): A seer (חזה), or prophet (נביא), whose prophecies were directed against Jeroboam (II Chron. ix. 29). In the Masoretic text his name occurs as יעדי (ketib) and יעדו (ḳeri). He is quoted also (*ib.*) as an authority on the lives of Solomon, Rehoboam (*ib.* xii. 15), and Abijah (*ib.* xiii. 22); his work being entitled the "Midrash of the Prophet Iddo" (*ib.*, Hebr.). Iddo, on account of his prophecies against Jeroboam, has been identified by Josephus ("Ant." viii. 8, § 5) and Jerome ("Quæstiones Hebraicæ," to II Chron. xii. 15) with the prophet who denounced the altar of Jeroboam and who was afterward killed by a lion (I Kings xiii.). Jerome identifies Iddo also with the Oded of II Chron. xv. 8.

E. G. H. M. Sel.

IDENTITY, PROOF OF: In criminal cases the witnesses were required to be certain of the identity both of the accused and of the victim, as well as of the nationality to which the victim belonged (Sanh. 40b). When the accused succeeded in escaping among a crowd of people, where he could not be clearly identified, or even when found with only one other person who was beyond all suspicion of crime, there could be no trial (*ib.* 79a, 80a; Maimonides, "Yad," Roẓeaḥ, iv. 67). The mere testimony of the witnesses was believed; and they did not need to bring any proofs to establish the identity of either the criminal or the victim.

In the case of lost objects, the loser had to describe "convincing signs" ("simanim mubhaḳim") before the object was restored to him. By "convincing signs" the Rabbis understood such marks of identity as referred to the measure or weight of the object, to the number of objects found, or to the place where found. An exception was made in the case of a scholar who was known never to deviate from the exact truth; to him the found object was returned on his simple claim, even though he could not describe the object itself. If the object did not possess any intrinsic marks by which it could be identified, the finder was not obliged to announce his find in public, as was the custom with regard to found objects which did possess such marks (see Finder of Property). In all cases the testimony of witnesses with regard to the ownership of the object superseded any proof of identity advanced by those claiming it (B. M. 24a, 28a; "Yad," Gezelah, xiii. 5, 6; xiv. 13; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 262, 3, 21; 267, 7, 9).

In the case of an 'Agunah the Rabbis manifested great leniency with regard to the kind of evidence required to establish the death of her husband, so that she should not remain in continual suspense and be prevented from marrying again. They were, however, very strict regarding the proofs necessary to identify a corpse. If it was found within three days of death, the identity of the person could be established if convincing peculiarities were found on the body, such as a superfluous or missing limb, or an unusual growth, or if the face and forehead could be recognized. Testimony derived from the garments, however, or from such general characteristics as the color of the hair or the size of the body, was not sufficient to establish identity. If the body had been in water, although for a long time and had been cast up on the land, no special marks were necessary to establish the identity; for water was supposed to preserve the body. The question of identity, in connection with a dead body, through which a woman might become free from the shackles of uncertainty, is, on account of its frequent occurrence, discussed in all its details by rabbinical authorities in their various responsa (Yeb. 120a *et seq.*; "Yad," Gerushin, xiii. 21, 22; Shulḥan 'Aruk, Eben ha-'Ezer, 17, 22-28; "Pitḥe Teshubah," *ad loc.*).

s. s. J. H. G.

IDI: Name of several Babylonian amoraim who flourished from the middle of the second to the middle of the fifth century. In the Talmud "Idi" is sometimes interchanged with "Ada" (אדא = אידי), according to the variation of pronunciation between eastern and western Syriac, as in the case of "Abba" = "Iba," "Ami" = "Imi," "Asi" = "Isi," "Ḥasda" = "Ḥisda."

s. s. J. D. E.

IDI B. ABIN NAGGARA: Babylonian amora of the fourth period (about 350). His father, whose name ("Naggara" = "carpenter") probably indicates his occupation, came from Nerash or Nerus (נרשאה), in Babylonia. The son, Idi (or Ada), gave an explanation in the presence of R. Joseph (Shab. 60a), had discussions with Abaye on various occasions (B. M. 35b), and likewise gave explanations in the presence of Rabbah ('Er. 56b; Ḳid. 40a). He also had occasion to appear in the court of Ḥisda (B. B. 33a). Idi was the brother of Ḥiyya. Passing the door of their father's house one Friday evening, Huna (b. Ḥiyya of Pumbedita) noticed that the house was illuminated with candles; whereupon Huna predicted that two shining lights would issue from that house. The prophecy was verified in the birth of Idi and Ḥiyya (Shab. 23b). Idi married the daughter of a priest, who bore him two sons—Sheshet and Joshua (Pes. 49a). Idi took advantage of his wife's position as a kohen to accept "the shoulder, and the two cheeks, and the maw" as the share due to a priest (Deut. xviii. 3), a custom which prevailed even during the Exile (Ḥul. x. 1). Idi was considered the main authority in Nerash, where he introduced a certain ordinance (Ned. 67b). Idi seems to have moved at a later period to Shekanzib, where he had occasion to receive Papa and Huna, whom he treated in a somewhat slighting manner (Yeb. 85a).

s. s. J. D. E.

IDI OF CÆSAREA. See Idi b. Jacob II.

IDI B. GERSHOM (ADA B. GERSHON): Babylonian amora of the tannaitic period (about 150); father of **Idi b. Idi** (Ḥul. 98a; comp. Yer. Ter. x. 10). There is some connection between Idi b. Gershom and Idi b. Jacob I.; perhaps they were brothers-in-law. Idi quotes Ada b. Ahabah in the name of Simeon (b. Eleazar) (Ker. 9a).

s. s. J. D. E.

IDI OF ḤUTRA. See Idi b. Jacob II.

IDI BEN IDI. See Idi b. Gershom.

IDI B. JACOB II: Babylonian amora of the second period (about 250). Idi was a disciple of Johanan. The journey from Idi's home in Babylonia to the yeshibah of Johanan at Tiberias occupied about three months, and two journeys there and back in the year left him but one day each six months to attend the yeshibah. This caused his comrades to call him "the one-day scholar." Idi answered by quoting Job xii. 4. Johanan, however, begged Idi not to call down the punishment of Heaven, and delivered a lecture in the yeshibah on the text "They seek me daily" (יום יום; Isa. lviii. 2), concluding with the statement that to devote a single day to learning the laws of God is as meritorious as devoting a whole year to study. On the other hand, one day spent in doing evil is equivalent to one year of iniquity; which explains the imposition of forty years of punishment for forty days of evil (Num. xiv. 34; Ḥag. 5b). Idi was likewise known as Idi of Ḥutra (Yer. Shab. v., end; M. Ḳ. v. 2), and is probably identical with Idi of Cæsarea (Idit).

s. s. J. D. E.

IDIOCY: Mental deficiency, depending upon disease or imperfect development of the nervous system, and dating from birth or from early infancy previous to the evolution of the mental faculties.

Though the parents of more than 15 per cent of idiotic children have been alcoholics, and alcoholism is rare among Jews, yet idiocy and imbecility are found comparatively more often among Jews than among non-Jews. Thus in Prussia in 1871 there were among Jews 1,826 idiots per 100,000 of population; among Protestants 1,437, and among Catholics 1,346 ("Preussische Statistik," 1875, xxx. 137). In Silesia there was one idiot among 580 Catholics, one among 408 Protestants, and one among 514 Jews ("Bulletin de la Société d'Anthropologie," iv.). From recent statistics collected by Pilcz it is evident that in Vienna the proportion of Jews affected with mental deficiency is very large. He found that of the cases of idiocy and imbecility treated at the clinic for nervous diseases in that city between Jan. 1, 1898, and Aug., 1901, no less than 17.7 per cent of the males and 15.3 per cent of the females were of Jewish extraction. At the census of 1900 the Jews of Vienna were found to constitute only 8.86 per cent of the general population.

In Württemberg, also, there was one idiot among 3,003 Jews, as against one among 3,207 Protestants, and one among 4,113 Catholics. Mayr reports that in 1880 the proportion of idiots and imbeciles per 10,000 population in Baden, Bavaria, and Prussia was as follows:

State.	Jews.	Non-Jews.
Baden	26.07	15.8
Bavaria	20.73	14.4
Prussia	15.27	13.6

In Hanover it has been calculated that according to the census of 1855–56 there was one idiot to 1,528 Lutherans; 1,473 Reformed Church; 1,143 Catholics; 763 Jews (G. Brandes, "Der Idiotismus und die Idiotie mit Besonderer Berücksichtigung der Verhältnisse im Kgr. Hannover," 1862).

In New York city a large proportion of the inmates of the hospital for feeble-minded children are Jewish; but no definite statistics are obtainable. It must be recalled in this connection that the rigid examination at the port prevents the entrance of such defectives into the United States.

Amaurotic Idiocy.

It is a curious fact that amaurotic family idiocy, a rare and fatal disease of children, occurs mostly among Jews. The largest number of cases have been observed in the United States—over thirty in number. It was at first thought that this was an exclusively Jewish disease, because most of the cases at first reported were among Russian and Polish Jews; but recently there have been reported a few cases occurring in non-Jewish children. The chief characteristics of the disease are progressive mental and physical enfeeblement; weakness and paralysis of all the extremities; and marasmus, associated with symmetrical changes in the macula lutea. On investigation of the reported cases it has been found that neither consanguinity nor syphilitic, alcoholic, or nervous antecedents in the family history are factors in the etiology of the disease. No preventive measures have as yet been discovered, and no treatment has been of any benefit, all the cases having terminated fatally.

The Mongolian type of idiocy is also very frequently observed among Jews. Its chief features are shortness of stature; broad, protruding cheekbones, flattened bridge of the nose, rounded pinna of the ears, enlarged tongue, and the obliquely placed Mongolian eyes. There is a more hopeful prognosis in this type than in amaurotic family idiocy. Many cases improve under treatment.

Marriages of those of near kin, which occur more often among Jews than among Gentiles (see Jew. Encyc. iv. 229, *s.v.* Consanguinity), have been assigned as a cause of the frequent procreation of mentally deficient children; but statistics do not bear out this contention. It appears that the proportion of idiotic children who are the offspring of cousins is not in excess of the ratio of consanguineous marriages to marriages generally; and the sole evil result of such marriages is the intensification in the offspring of some morbid proclivity common to both parents.

In the present state of knowledge of the etiology of idiocy and imbecility in general the only cause of their frequency among Jews that may be considered is the neurotic taint of the race. Children descending from a neurotic ancestry have nervous systems which are very unstable, and they are often incapable of tiding safely over the crises attending growth and development. They are often idiots or imbeciles.

IDIT: Name of an amora who is known only from a passage preserved by Naḥman (Sanh. 38b), the passage being a part of a controversy between Idit and a heretic. The proper reading of the name is "Idi" (אידי), and this amora is identical with the Palestinian Idi (comp. Bacher, "Ag. Pal. Amor." iii. 708).

IGEL, LAZAR ELIAS: Austrian rabbi; born Feb. 28, 1825, at Lemberg, where his father was a second-hand bookseller; died at Czernowitz March 26, 1892. After studying in the gymnasium of Lemberg, he went, at the age of fifteen, to Padua, where he continued his studies in the rabbinical seminary, under S. D. Luzzatto and Della Torre, graduating (D.D.) in 1849. On his return to Lemberg he was appointed religious teacher at the gymnasium and "Realschule," becoming at the same time privatdocent of Semitic languages at Lemberg University. In 1854 he was called as district rabbi ("Kreisrabbiner") to Czernowitz, and became later chief rabbi of Bukowina. He was the author of "Syrischer Wegweiser" (1851), and of a large number of essays in various German and Hebrew periodicals. His "Israelitische Moraltheologie" (1870) is a German translation from the Italian of S. D. Luzzatto.

'IGGUL OF RABBI NAHSHON GAON. See Calendar.

IGLAU: Mining-town in Moravia, Austria. While Jews settled at Brünn at a very early time, regulations concerning the Jews of Iglau are not found in the town records before 1250. Charles IV., while margrave of Moravia, sought to stimulate commerce by importing Jews—at that time called "servi cameræ"—into Iglau. Attracted by the favorable conditions, many Jewish families of Bohemia and Moravia settled in the western part of the town, in the "Judengasse," which still retains that name; and they built a synagogue in 1345. Jews lived in Iglau undisturbed for nearly a century; but in 1426 Margrave Albert expelled them from the town, on the ground that they had been in league with the Taborites. They were obliged to relinquish their immovable property; and the synagogue was transformed into a chapel. The exiles settled in the neighboring localities of Triesch, Pirnitz, etc. Iglau was thus the first of the royal towns of Moravia to expel the Jews. The town records show, however, that many Jews returned to Iglau in 1463.

After the departure of the Swedes, the municipal council complained, in 1643, that the Jews, who since 1576 had not been permitted to engage in any commerce whatever, dared to traffic in public and to enter and leave the city at will. Since their expulsion in 1426 they had been allowed to enter the city one at a time only, and under certain conditions; and they had not been permitted to remain there. The many quarrels that thus arose were adjusted by the general ordinance of May 18, 1709, permitting Jews to enter the city by a certain gate on payment of an entrance-fee of 15 kreuzer. The census of 1846 showed that there were many Jews from Triesch, Trebitsch, etc., in Iglau.

These oppressive conditions remained unchanged till 1848. With the permission of the imperial vicegerency at Brünn the Jews of Iglau founded a religious society April 25, 1861, for the purpose of organizing and maintaining the necessary educational and philanthropic institutions. By a decree of Feb. 17, 1862, there was granted to this society the right to organize itself into a congregation. Its first statutes were drafted in Dec., 1875, and, according to the statutes which were approved by the government or "Statthalterei" June 2, 1878, the congregation included only the town of Iglau. By the law of March 21, 1890, referring to the regulation of the external legal affairs of the Jewish congregations, thirty-one localities within the jurisdiction of Iglau were assigned to the congregation of that town. The statutes of the reorganized congregation were approved by the government Feb. 15, 1895.

The synagogue, in the Moorish style, was begun in 1862 and dedicated in the following year, orations being delivered by Rabbis J. J. Unger of Iglau and A. Jellinek of Vienna. Precisely thirty-three years later (Sept. 3, 1896) dedicatory services were held in the remodeled synagogue. The institutions include a society for the relief of the poor, a ḥebra ḳaddisha and burial society, a women's society for the relief of poor and sick women, and Shir Ẓiyyon, the Temple choral society. In 1900 the Jews of Iglau numbered about 1,450 in a total population of 24,387.

D. S. Sp.

IGNATIEV (IGNATYEV, IGNATIEFF), COUNT NIKOLAI PAVLOVICH: Russian statesman; born 1832. He was one of the prime movers in the reactionary anti-Jewish legislation of the last quarter of the nineteenth century, the alleged instigator of the anti-Jewish riots, and the author of the notorious May Laws. On the assassination of Alexander II. (March 13, 1881), Ignatiev became minister of domains, and in May of the same year minister of the interior, and used his influence to promote anti-Jewish legislation. Gathering about him a group of followers, he through them encouraged anti-Jewish agitation, which soon assumed serious proportions and which led to the organization of the "barefooted brigades" ("bosaya komanda"). These were bands composed of irresponsible characters who preached open violence against the Jews. As a result riots occurred in a number of places, particularly in South Russia (see Alexander III., Alexandrovich).

Fosters Anti-Jewish Agitation.

Ignatiev, it is said, took advantage of the great anxiety which was caused to the Jews of Russia by the riots, and extorted blackmail from the wealthy among them; and he was successfully imitated by the great host of minor officials. It was his purpose to make the Jews appear responsible for the nihilistic movement, and to create the impression that they were a source of danger to the rest of the population. In his circular to the provincial governors (Sept., 1881) he stated: "While protecting the Jews against violence, the government recognizes the need of equally vigorous measures for changing the existing abnormal relations between the Jews and the native population, and for protecting the people from that injurious activity of the Jews which has been the real cause of the agitation."

The anti-Jewish movement continued while an inquiry was being made by a commission appointed by the czar in response to a petition from the Jews of St. Petersburg. Fresh outbreaks occurred; and there is abundant proof that the riots were prearranged. They could not have taken place had an earnest effort been made to prevent them. This is evidenced by the fact that order was maintained without difficulty in the provinces where the governors were not adherents or followers of Ignatiev, *e.g.*, in Wilna.

May Laws of 1882.

On May 15, 1882, with the sanction of the czar, Ignatiev issued what are known as the May Laws, he having availed himself of the state provision applicable to cases of emergency, since the opposition to the enactment of the laws was too great to permit of their passage as permanent measures. It has been stated that Ignatiev offered to exempt the Jews of St. Petersburg from the ukase on the payment of a large sum of money; but while he may have secured large sums from individuals, he was not successful in obtaining any from the community generally. Ignatiev retired from office June 12, 1882, because, it is said, proof was furnished to the czar of his dishonesty and attempted extortions. It is stated by some, however, that Ignatiev's retirement was due partly to his action in connection with his own vast estates; for before the May Laws were brought to the czar for signature, Ignatiev sent his mother to southern Russia to renew his contracts with his Jewish tenants and leaseholders for a further period of twelve years. The czar's uncle, Grand Duke Nicholas, when informed of the proposed laws hurried to renew his own contracts with his Jewish tenants, but the law had become operative before he was able to get the contracts signed. On learning that Ignatiev had renewed his contracts before the laws had been signed, he reported the matter to the czar. According to the official statement, however, Ignatiev was retired because of a resolution of the Senate stating that "he had not taken the necessary steps to prevent the riots."

H. R. J. G. L.

IGNORANCE OF THE LAW ("shogeg"): Through the institution of Hatra'ah, warning by the witnesses before the crime was committed was made by the Rabbis a prerequisite to the infliction of punishment for all criminal acts (Sanh. 8b). The warning once given, the culprit could claim neither ignorance of fact nor ignorance of the Law. But when the warning had not been administered, the claim of ignorance was sufficient to exculpate the accused. In the case of murder, however, where, if the act was committed unwittingly, the manslayer was obliged to flee to a city of refuge, there was a distinction drawn between those who claimed ignorance or mistake in fact, and those who claimed ignorance of the Law. The former could escape the revenge of the Go'el (the avenger of blood) by fleeing to a city of refuge; but the latter could not, and if he was killed by the go'el, the court did not prosecute his slayer (Mak. 7b, 9a; Maimonides, "Yad," Roẓeaḥ, vi. 10). A Noachid who had killed an Israelite could not advance the plea of ignorance of the Law, for "it was his duty to learn, and he did not learn." Nor was the hatra'ah necessary in order to convict a Noachid of murder ("Yad," Melakim, ix. 14).

In Temple times a sacrifice was provided for the transgression, if committed unwittingly or through ignorance of the Law, of any of the negative Biblical commands which carried with it the punishment of excision ("karet") (Lev. iv. 27; Num. xv. 27). Ignorance was thus considered a sin, and had to be expiated by a sin-offering, differing in nature and in the accompanying ritual with the persons who exhibited it—whether the individual, the anointed priest, the ruler ("nasi"), or the highest court (see Horayot). Maimonides ("Yad," Shegagot, i. 4) enumerates forty-three transgressions for which, if committed unwittingly or through ignorance of the Law, a sin-offering ("ḥaṭṭat") was brought. For every one of these transgressions, even if committed a number of times, the transgressor had to bring only one sacrifice. If, however, he was reminded of the Law after having transgressed it, and then forgot again and committed the same sin, he had to bring a sacrifice for each single act of transgression (Ker. 2b, 15a; "Yad," *l.c.* iv.-vi.).

With regard to Sabbath, the following general rule was established: One who did not know that the Israelites were commanded to observe the Sabbath—*e.g.*, one who was brought up from his childhood among non-Jews, or one who became a proselyte when very young and was not taught the principles of Judaism—even though he violated many Sabbaths, had to bring one sacrifice only. The same principle applied to all other laws that he violated through ignorance; and for each transgression, even when repeated a number of times, only one sin-offering had to be brought. If, however, he knew of the institution of Sabbath, but did not know that particular kinds of work were forbidden on that day, he had to bring a sacrifice for every one of the thirty-nine classes of works ("Abot Melakot") forbidden on the Sabbath (see Sabbath) and which he transgressed (Shab. 67b, 68b; "Yad," *l.c.* ii. 6, vii. 2).

Scholars were frequently warned not to insist upon the observance of such laws as were generally disregarded by the people; for, as the Talmud puts it, "it is better that they do it out of ignorance than that they should do it knowingly." This principle applied only to such cases as did not touch on any law expressly stated in the Bible, and to other laws concerning which the scholar was convinced that his words would not be heeded. In other respects the Rabbis were ordered to teach and warn the people against any law of which they may have in the course of time become ignorant (Beẓah 30a; "Yad," Shebitot 'Asor, i. 7; Shulḥan 'Aruk, Oraḥ Ḥayyim, 608, 2, and Isserles' note). It is especially the scholar who can not plead ignorance in case of mistake. An old proverb runs: "Be cautious in study; for mistake may amount to a presumptuous sin" (Ab. R. N. 18). See SACRIFICE; SIN.

IKRIṬI (האיקריטי), SHEMARIAH B. ELIJAH OF NEGROPONT: Italian philosopher and Biblical exegete; contemporary of Dante and Immanuel; born probably at Rome about 1275, the descendant of a long line of Roman Jews. His father, in his youth, went as rabbi to Crete, whence his surname, "Ha-Yewani" (= "the Greek"), or "Ha-Ikriṭi" (= "the Cretan"). Shemariah had a critical mind, and knew Italian, Latin, and Greek. Up to 1305 he studied the Bible exclusively; then he took up Talmudic haggadah and philosophy. His reputation was such that he was called to the court of King Robert of Naples, where he devoted himself chiefly to Biblical studies and wrote commentaries on Scripture. By 1328 he had completed philosophic commentaries on the Pentateuch (especially the story of the Creation), the Book of Job, and Canticles. He aimed at bringing about a union between Karaites and Rabbinites; the Karaites, in fact, recognized and honored him. The death of a son (1330) interrupted his work for a time, but he soon took it up again. In 1346 he wrote his "Sefer ha-Mora," a refutation of the philosophical views on the Creation. Believing that he had placed Rabbinism on a sure foundation, Shemariah undertook, in 1352, a journey to Castile and Andalusia, in order to convert the Karaites. He is said to have pretended to be the Messiah, and was reviled to such an extent that the government arrested him. He died in prison. Like most of his contemporaries, he was scientifically an epigone of the great philosophers and exegetes. He also wrote "Elef ha-Magen" (a commentary on the haggadah in the treatise Megillah), some piyyuṭim, and poems.

IL PROGRESSO LADINO. See PERIODICALS.

ILIOWIZI, HENRY: American rabbi and author; born in Choinick, in the government of Minsk, Russia, Jan. 2, 1850. His father was affiliated with the Ḥasidim. Iliowizi was educated at first in the local ḥeder, afterward at the yeshibah of Vietka, where he studied under Rabbi Bear, and later at Frankfort-on-the-Main, Berlin, Breslau, London, and Paris. At the age of fourteen he was sent to Jassy, Rumania, to escape military conscription; he left Jassy for Frankfort-on-the-Main in 1865.

Iliowizi became a teacher in the schools of the Anglo-Jewish Association and of the Alliance Israélite Universelle. From 1877 to 1880 he taught in the Alliance's school at Tetuan, Morocco. In July, 1880, he emigrated to New York. For a brief time he was minister of a congregation at Harrisonburg, Virginia; from 1880 to 1888, rabbi of the Congregation Sha'aré Tob in Minneapolis; and from 1888 to 1900, of the Congregation Adath Jeshurun in Philadelphia. Since 1900 he has devoted himself exclusively to literature.

Iliowizi's writings include: "Sol," an epic poem (1883); "Herod," a tragedy (1884); "Joseph," a drama (1885); "Through Morocco to Minnesota" (1888); "Six Lectures on Religion" (1889); "Jewish Dreams and Realities" (1890); "The Quest of Columbus" (1892); "Saul" and "A Patriarch's Blessing," tragedies (1894); "In the Pale: Stories and Legends of Russian Jews" (1897); "The Weird Orient" (1901). He has also published many articles in "The Jewish Messenger" and "The Jewish Exponent."

'ILISH: Babylonian scholar of the fourth century (fourth amoraic generation); contemporary of Raba (B. M. 96a). He and the daughters of R. Naḥman were kidnaped. One day while 'Ilish was sitting in the company of a fellow captive who understood the language of birds, the croak of a raven overhead prompted him to ask his companion what the bird said, and he was informed that the raven had said, "'Ilish, escape!" 'Ilish, however, disbelieved the message. Then a dove passed with the same message, which the interpreter again communicated to 'Ilish. This time 'Ilish, remembering that Israel is likened to a dove (see Ber. 53b), accepted the message as providential, and determined to escape. He wished to find a way to save Naḥman's daughters also; but, finding that they were not worthy, he abandoned them and escaped in company with his interpreter. 'Ilish succeeded in evading their pursuers, but his companion was overtaken and killed (Giṭ. 45a).

Once Raba, after hearing a divorce case affecting property, was about to pronounce an erroneous verdict, when 'Ilish corrected him (Giṭ. 77b). Another time Raba had occasion to reciprocate the service thus rendered him. 'Ilish showed some embarrassment, fearing that such errors might have occurred before in his judicial practise, but Raba reassured him (B. B. 133b).

ILIYER MANASSEH. See MANASSEH, ILIYER.

ILLEGITIMACY: The state of being born out of lawful wedlock; in Jewish law, the state of being born of any of the marriages prohibited in the Bible and for which the punishment is excision ("karet"; Yeb. 49a; Maimonides, "Yad," Issure Biah, xv. 1). The exception to this rule is the child born of relations with a woman during her period of uncleanliness, in which case, although the punishment for such a transgression is excision, the child is not considered illegitimate (see BASTARD: ḤALALAH).

Three kinds of illegitimates ("mamzer") are recognized in Jewish law; namely:

(1) The real mamzer ("waddai"), who may not intermarry with Israelites; "even to his tenth generation shall he not enter into the congregation of the Lord" (Deut. xxiii. 2). He may, however, marry a woman who is of the same status or a proselyte.

(2) The doubtful mamzer ("safeḳ"); one born of a woman who had been previously married, but whose marriage was later considered doubtful, or of a woman who had been divorced and whose divorce was doubtful (see Divorce). He may marry neither an Israelitish woman nor an illegitimate nor a proselyte, nor even one who is of the same status as himself (Ḳid. 74a).

(3) A mamzer made so by the decree of the sages ("mi-derabanan"). The offspring of a woman who on hearing that her husband has died marries again, and when the report proves false, goes back to her first husband and lives with him, is declared a mamzer. He may not marry any woman except one of the same status as himself (Yeb. 87b, 89b). But if a woman during her husband's absence has illicit connection with another man, and then lives with her husband, the offspring is not regarded as illegitimate (Mordecai to Yeb. iv. 42).

A child born of an unmarried woman ("penuyah") is considered only a doubtful mamzer, even if the mother admits that she has had relations with a mamzer and the alleged father also admits the fact. If, however, the mother says that she has had intercourse with an Israelite ("kasher"), even though the latter does not admit it, the child is legitimate. He may not, however, marry into the alleged father's family, and he can not claim inheritance in the estate, unless the alleged father admits the paternity. The child of a betrothed woman is legitimate if she claims that the child is by her betrothed husband, and if he does not refute her. In such a case the child is also entitled to a share in the alleged father's estate. If, however, the alleged father denies the paternity, the child is considered a mamzer (Shulḥan 'Aruk, Eben ha-'Ezer, 4, 26, 27).

The children of illegitimates are also considered illegitimates, whether both parents are illegitimates or only one of them is an Israelite. The mother's testimony concerning the illegitimacy of her child is not admitted in evidence, and the father is believed with regard to his child only if that child has not yet any children of his own (Ḳid. 78b). A man's testimony against himself is believed in so far as to disqualify him or his children from marrying an Israelitish woman; but it does not permit him to marry an illegitimate ("mamzeret") until he produces confirmatory testimony. If he has grandchildren, his testimony is admitted in evidence only with regard to himself; he can not place the stigma on his family. See Elijah; Foundling; Messiah.

S. S. J. H. G.

ILLESCOS, JACOB DI: Bible commentator, probably of Italian origin; lived in the fourteenth century. He was the author of "Imre No'am," an allegorical, cabalistic, and grammatical commentary on the Pentateuch, with explanatory notes on the obscure passages of Rashi and Ibn Ezra; it was first published at Constantinople in 1546. The work went through many editions, and was incorporated by Moses Frankfurter in the "Miḳra'ot Gedolot" (Amsterdam, 1724–27). Illescos quotes Rashi, "Leḳaḥ Ṭob," "Bekor Shor," together with Judah ha-Ḥasid, the tosafot, Moses of Coucy, and many other commentators.

ILLIBERIS. See Elvira.

ILLINOIS: One of the Central States of the United States of America; admitted to the Union Dec. 3, 1818. The Jewish pioneer of Illinois prior to its admission as a state was John Hays. He was sheriff of St. Clair county 1798–1818, and was appointed collector of internal revenue for Illinois territory by President Madison in 1814. The earliest Jewish settlement in the state was that in Chicago, to which city the first Jewish settler went in 1838; and up to 1844 he was followed by quite a number of Jews (see Jew. Encyc. iv. 22, *s.v.* Chicago). Some of these early settlers soon left the city, moving to Joliet, Will county; to Troy Grove, La Salle county; and to Grundy county; but they all returned to Chicago a few years later.

Jewish Farmers.

Among these early arrivals in Chicago was Henry Meyer, an agent of a Jewish colonization society established in New York about 1842 by William Renau and others. Meyer was sent by the society to select in the vicinity of Chicago a suitable location for a Jewish colony. He purchased from the government 160 acres of land in the town of Schaumburg, Cook county; and on this land he settled as a farmer. He reported to the society that the land which he had bought was good land, and he recommended that some Jewish families be sent to the neighborhood. In consequence of his favorable report, a number of Jews soon went to Chicago; but only two settled as farmers near Schaumburg, the rest drifting into mercantile pursuits throughout the state.

In the city of Peoria Jews first settled in 1847; in Quincy and Bloomington, in 1850; in Pontiac, in 1856; in Aurora, in 1861; and in Moline, in 1866. The settlements of Cairo, Urbana, Champaign, Frankfort Station, and other places in the state are of more recent date.

First Organization.

Chicago had the earliest Jewish organizations in the state, the first being the Jewish Burial-Ground Society (established 1846), followed by the congregations Anshe Ma'arab (1847), B'nai Sholom (1852), Sinai congregation (1861). Since the establishment of these three congregations seventy-five have been organized in the state of Illinois, sixty-eight in Chicago, and eight in seven other towns. The total membership of these congregations is not less than 5,000; their annual income is fully $250,000; and their property value is about $1,000,000. Religious schools are connected with twenty-five congregations.

In Chicago are located the most prominent Jewish institutions and associations of the state. Of the smaller Jewish communities in the state, the following may be mentioned: Bloomington (congregation organized in 1892); Cairo (congregation organized in 1894); Chicago Heights; Danville; Elgin; Joliet; Peoria (which has two congregations: Anshai Emeth, organized in 1865, and Agudath Achim, organized in 1897, besides a Council of Jewish Women, United Jewish Charities, and other Jewish organizations); Quincy (with a congregation, organized in 1870, and a Hebrew Ladies' Benevolent Society); Springfield (with two congregations, the first Beth Sholem, organized in 1865); and Waukegan.

General Statistics.

They contain 47 benevolent associations; 25 ladies' societies for charity and social purposes; 11 social clubs; 13 loan associations; 5 sections of the Council of Jewish Women; 4 Zionist societies; 20 lodges of the Order B'nai B'rith; 10 of the Free Sons of Israel; 8 of the Order Sons of Benjamin; 33 of the Order B'rith Abraham; and 25 cemeteries. Most of these are in Chicago.

The Jews of Illinois are important factors in the commerce and manufactures of the state; and their financial power and influence manifest themselves in many directions. In the professions Jews are well represented; Jewish lawyers, physicians, architects, engineers, engravers, designers, pharmacists, rabbis, professors, teachers, and journalists being numbered by hundreds.

In public life the Jews of Illinois have been and are honored by their fellow citizens with elections, and by the authorities with appointments, to positions of trust. Samuel ALTSCHULER of Aurora was nominated for the governorship of the state by the Democratic party in the campaign of 1900. A number of Jews have held the office of mayor in several towns of the state.

More than $150,000 is annually collected by the Jews of Illinois for non-sectarian institutions. The Associated Hebrew Charities of Chicago collect $130,000 annually. Within the last twenty years nearly $1,000,000 has been donated by Jews to Jewish charities.

The Jewish inhabitants of Illinois are estimated to exceed 100,000, three-fourths of this number living in Chicago. Peoria and Quincy have the largest Jewish communities outside of Chicago, the former numbering 2,000 and the latter 600 Jews. See also CHICAGO.

A. H. E.

ILLOWY, BERNHARD: American rabbi; born at Kolin, Bohemia, 1814; died near Cincinnati, Ohio, June 22, 1871. He was descended from a family of Talmudists, his great-grandfather, Jacob Illowy, having been rabbi of Kolin. He studied in his native city, later at the school of Moses Sofer in Presburg, and received the degree of Ph.D. from the University of Budapest. Illowy continued his studies at the rabbinical college in Padua under S. D. Luzzatto, and then returned to his native country, where for a time he was engaged in teaching; but political conditions forced him to look for a rabbinical position elsewhere. He was prominently mentioned as a candidate for the position of "Landrabbiner" of Cassel ("Allg. Zeit. des Jud." 1850, p. 326), but, not being elected, he emigrated to the United States, where he was successively rabbi at Syracuse, New Orleans, and Cincinnati.

Illowy was one of the ablest champions of Orthodoxy, being a man of great Talmudic learning and an accomplished linguist. He was one of the promoters of the rabbinical conference held at Cleveland in 1855; but, the general feeling at that gathering being in favor of Reform, he did not exercise the influence to which his scholarship and eloquence entitled him. He wrote numerous articles for the Jewish press. Those published in S. R. Hirsch's "Jeschurun" are a specially valuable source of information concerning the condition of American Judaism. One of his sons, **Henry Illoway** of New York, is a medical writer.

IMBER, NAPHTALI HERZ: Austrian Hebrew poet; born at Zloczow, Galicia, in 1856. After the usual Talmudic training he began his wandering life by journeying to Vienna and Constantinople. At the latter place he met Laurence Oliphant, with whom he spent some time in Palestine, paying a visit to Egypt in the interim. After Oliphant's death (1888) Imber went to England, where he became acquainted with Israel Zangwill and did some work for the "Jewish Standard," then edited by that writer. In 1892 he went to the United States, wandering through the country, and spending some time at Boston (where he edited the journal "Uriel"; 1895), Chicago, San Francisco, and Los Angeles, in each city becoming connected with persons interested in mysticism, on which subject he has written several pamphlets; *e.g.*, "The History of the Golden Calf" and "Keynote to Mystic Science." Besides these he has published a translation of the Targum Sheni under the title "Treasures of Ancient Jerusalem" (1898), and an account of "The Education of the Talmud" supplemented by "The Alphabet of Rabbi Akiba," which appeared in the reports of the United States commissioner of education for 1895–96.

Imber has, however, obtained his reputation by the mastery of Hebrew verse displayed in his two books of collected poems, "Barkai" (1877–99). These show great command of the language. His most famous poem is "Ha-Tikwah," in which the Zionistic hope is expressed with great force, and which has been practically adopted as the national anthem of the Zionists.

IMMA SHALOM: Wife of Eliezer ben Hyrcanus and sister of Gamaliel II. Of her early life but little is known. She was probably brought up under the care of her brother, and is therefore sometimes cited as his daughter (ברתיה דר"ג, Sanh. 39a; see Rabbinovicz, "Diḳduḳe Soferim," *ad loc.* and 90b *et seq.*); and she received an education befitting the sister of a nasi and a daughter of the family of Hillel the Great. That she put her accomplishments to use is seen from the anecdotes preserved in rabbinic lore. On one occasion she heard a skeptic taunting her brother: "Your God is not strictly honest, or He would not have stolen a rib from sleeping Adam" (Gen. ii. 21). "Leave him to me," said Imma Shalom; "I will answer him." Turning to the skeptic, she requested him to summon a constable. The skeptic inquired: "What need hast thou for a constable?" "We were robbed last night," she answered, "of a silver cruet, and the thief left in its place a golden one." "If that is all," exclaimed the skeptic, "I wish that thief would visit me every day!" "And yet," retorted Imma, "thou objectest to the removal of the rib from sleeping Adam! Did he not receive in exchange a woman to wait on him?"

Imma Shalom's marriage with Eliezer ben Hyrcanus was blessed with extraordinarily handsome children (Ned. 20a). In spite of Eliezer's avowed antagonism to the education of women, he thoroughly appreciated his wife's intellectual gifts. He not only passed on to her some traditions ('Er. 63a), but even obeyed her in matters ritualistic. After the rupture between her brother Gamaliel and her husband she feared that the complaints of so great and wronged a man as Eliezer would be answered by Heaven, and that the wrong done him would be visited on her brother; she therefore requested her husband not "to fall on his face," that is, not to offer a prayer (such as Ps. vi. 10 or xxv. 19) for deliverance from enemies (see Taḥanun). Eliezer complied with her request, of which she reminded him at the proper time each day. One morning, however, she did not do so, and found him in the midst of the prayer; she sorrowfully exclaimed, "Cease, thou hast killed my brother!" Not long after Gamaliel's death occurred. Asked by Eliezer what had led her to expect such dire consequences, she stated that there was a tradition in her family that while all other gates of prayer are sometimes closed the gates for the cry of oppression are never closed (B. M. 59b).

Imma Shalom survived both her husband and her brother. She dutifully tended the former in his last moments, although his disposition had become soured (Sanh. 68a). A story is told of a mock suit between Imma Shalom and her brother, in which the pretensions of a certain judge were exposed. The judge (the Talmud calls him "philosophos") appears to have been a Jewish Christian who boasted of his honesty and impartiality. Imma Shalom presented him with a golden lamp, and then brought a suit against her brother for a share in their father's estate. The judge favored her claim. Gamaliel protested on the ground of the provision "in our Law"—"Where there is a son, a daughter inherits nothing" (see Num. xxvii. 8 *et seq.*); but the judge replied, "Since your people have come under foreign government the law of Moses has been superseded by other writings, which rule that son and daughter inherit alike." Gamaliel then presented him with a Libyan ass and renewed his protest. Then the judge reversed his previous decision, saying, "I have read further in those writings, and there it is written, 'I came neither to take away from the law of Moses nor to add to the law of Moses' [comp. Matt. v. 17], and in that law it is written that where there is a son a daughter inherits not." Imma Shalom thereupon exclaimed, "Let thy light shine as a lamp" (comp. Matt. v. 16), in allusion to her gift. But Gamaliel said, "An ass came and upset the lamp" (Shab. 116a *et seq.*).

S. S. M.

IMMANUEL (עמנו אל): This name occurs only thrice in the Bible, in Isa. vii. 14 and viii. 8, 10 (in the last-cited verse the rendering "God is with us" is given in the English versions). According to the Targum Yerushalmi, "Immanuel" in the first two instances is to be taken as a proper name and not as two words; in the last passage, as two words forming an entire sentence (Norzi's "Minḥat Shai," *ad loc.*; Geiger, "Urschrift," p. 282; Müller, "Masseket Soferim," p. 88). In the Talmud and Midrash the name does not occur at all; nor is it among the many names for the Messiah enumerated by Hamburger, "R. B. T." ii. 740 *et seq.* The Greek Baruch Apocalypse (iv.) says (see Kautzsch, "Apokryphen," ii. 451) that Jesus Christ is called "Immanuel," which of course is a Christian interpolation. In the Haggadah "Immanuel" is not mentioned, which seems to indicate that the application of this word to the Messiah was not known in Jewish circles.

IMMANUEL B. JACOB OF TARASCON. See Bonfils, Immanuel ben Jacob.

IMMANUEL BEN JEKUTHIEL OF BENEVENTO: Grammarian and corrector for the press at Mantua; lived in the second half of the sixteenth century. He was connected with the printing establishments of Meïr Sofer ben Ephraim of Padua and Jacob ben Naphtali ha-Kohen of Gazolo, and was the author of "Liwyat Ḥen," on Hebrew grammar and prosody, in eleven chapters (Mantua, 1557). On page 16 he gives an explanation of the riddle of Abraham ibn Ezra on the four letters י, ו', ה, א. Owing to an obscure note by Judah Moscato, Immanuel has been accused of taking this explanation from Profiat Duran without acknowledgment (see Friedländer and Kohn, "Ma'aseh Efod," pp. 11, 46). This accusation, however, has been refuted by Mortara in "Bet Talmud" (ii. 179 *et seq.*). The Mantua

(1557) edition of the "Tiḳḳune Zohar" was annotated by Immanuel.

G. M. Sc.

IMMANUEL, SIEGMUND (SOLOMON JACOB): German philologist; born at Hamburg Sept. 4, 1792; died at Minden Dec. 28, 1847. Educated at the gymnasium of Altona and later at Hamburg, he embraced Christianity in 1809. He then studied theology and philology at the universities of Helmstädt, Göttingen, and Leipsic, graduating in 1813. After being a private teacher for a year he in 1814 became state teacher at Hirschberg in Silesia, and in 1821 was appointed principal of the gymnasium at Minden, which position he held until his death. His work in this school was of great importance. He was the first principal to introduce gymnastics into the school curriculum (1831) and to divide the gymnasium into departments of arts and sciences (1840), which division ("Gymnasium" and "Realschule") for the higher classes was later adopted by the German states.

Among Immanuel's works may be mentioned: "Die Anfänge der Reformation und die Gründung des Gymnasiums in Minden," Minden, 1822; "Declamations-Unterricht auf Schulen," *ib.* 1824; "Historischer Unterricht auf Gymnasien," *ib.* 1827; "Gutachten über Herrn Lorinser's Schrift: Zum Schutze der Gesundheit auf Schulen," Bielefeld, 1836.

Bibliography: *Allgemeine Deutsche Biographie*, xiv. 36, 37; De le Roi, *Juden-Mission*, i. 219.

S. F. T. H.

IMMANUEL B. SOLOMON B. JEKUTHIEL: Italian scholar, satirical poet, and the most interesting figure among the Jews of Italy; born at Rome *c.* 1270; died probably at Fermo *c.* 1330. He was a member of an important and wealthy family, and occupied a very prominent position at Rome. He seems to have been president or secretary of the Roman community, preached on the Day of Atonement, and also delivered discourses on special occasions. In 1325 he had the misfortune to lose his entire wealth, and was obliged to leave his home. All his friends deserted him, and, "bowed by poverty and the double burden of age," he wandered through Italy, until he found refuge in 1328 at Fermo in the march of Ancona, at the house of a patron of the name of Daniel (?), who provided for his old age and enabled him to devote himself to poetry.

The studies of Immanuel comprised not only Biblical and Talmudical literature, but also mathematics, astronomy, medicine, and the philosophical works of Arabians and Christians. He was aided by an excellent memory, and was acquainted with Italian, Arabic, Latin, and perhaps some Greek. He especially devoted himself to writing verse. He was stimulated in this work by his cousin Judah Romano, one of the foremost philosophers of his time. Immanuel, whose poetic gifts appeared at an early age, devoted himself to the study of rime, took lessons in versification, and read the works of the foremost Jewish and Christian poets. He mentions among his teachers Benjamin b. Joab and his cousin Daniel; he may also have been a pupil of Zerahiah b. Shealtiel Ḥen.

Works.

Immanuel's varied scientific activity corresponded with his wide scholarship, although he confined his activity exclusively to Jewish subjects. With the exception of an introductory poem his first work is lost; it dealt with the letter-symbolism popular at that time. A second work, "Eben Boḥan" (Touchstone), concerns Biblical hermeneutics, and deals with the different meanings of the verbs in different constructions, with the omission, addition, and interchange of letters, and with other linguistic questions. More important are his Biblical commentaries, which covered almost all the books of the Bible, and of which a part are lost. Following his Jewish and Christian contemporaries, he interpreted the Bible allegorically, symbolically, and mystically, endeavoring to find therein his own philosophic and religious views, though not disregarding the simple, literal meaning, which he placed above the symbolical. The sole value of his commentaries lies in the fact that his wide range of reading enabled him to make the works of the exegetes and philosophers accessible to his contemporaries and countrymen. The commentary on Proverbs is printed in the edition of the Hagiographa, Naples, 1487; the others are preserved in manuscript at Parma and Munich. Abbé Perreau published the commentaries on the Megillot and the Psalms (i.-lxxv.); on the commentary to Job see Perreau's article in "Mosé," Corfu, 1884.

His Verse.

The originality that Immanuel lacked as a scholar he possessed as a poet. In his verse this is given free play, and his poems assure him a place for all time. The child of his time, in sympathy with the social and intellectual life of Italy of that period, he had acquired the then prevalent pleasing, easy, humorous, harmlessly flippant tone, and the art of treating questionable subjects wittily and elegantly. He composed both in Italian and in Hebrew. Only a few of his Italian poems have been preserved. In a truly national spirit they portray and satirize the political or religious conditions of the time. Immanuel was held in high regard by the contemporaneous Italian poets; two Italian sonnets referring to his death have been preserved, which place him as poet beside Dante. Immanuel in fact knew Dante's works, and drew upon them: in his own Italian as well as in his Hebrew poems there are very clear traces of the "divine poet." See Jew. Encyc. iv. 435.

Hebrew Poems.

Immanuel introduced the form of the sonnet from Italian literature into Hebrew, and in this respect he is justified in saying that he excelled his models, the Spaniards, for he introduced alternate rime instead of single rime. He also excelled all his predecessors in invention and humor. In his old age, during his sojourn at his patron's at Fermo, he collected his Hebrew poems, in the manner of Al-Ḥarizi's "Makamat," in a diwan that he entitled "Meḥabberot" (מחברות). Out of gratitude for his generous friend he put these poems in a setting that made it appear as if they had been composed entirely during his intercourse with him and as if stimulated by him, although they were in reality composed at different periods. These poems deal with all the events and episodes of Jewish life, and are replete with clever witticisms, harmless fun, caustic satire, and at times frivolity. The Hebrew idiom in which Immanuel wrote lends an especial charm to his work. His parodies of Biblical and Talmudic sentences, his clever allusions and puns, his equivocations, are gems of diction on account of which it is almost impossible to translate his poems into another language. These 27 poems—satires and letters, prayers and dirges, intermingled—embrace a great variety of themes, serious or humorous. A vision entitled "Ha-Tofet weha Eden" (Hell and Paradise; poem 28), at the end of the diwan, is a sublime finale, the seriousness of which, however, is tempered by lighter passages, the humorist asserting himself even in dealing with the supernatural world. As an old man of sixty, the poet recounts, he was overcome by the consciousness of his sins and the fear of his fate after death, when a recently deceased young friend, Daniel, appeared to him, offering to lead him through the tortures of hell to the flowering fields of the blessed. There then follows a minute description of hell and heaven. It need hardly be said that Immanuel's poem is patterned in idea as well as in execution on Dante's "Divine Comedy." It has even been asserted that he intended to set a monument to his friend Dante in the person of the highly praised Daniel for whom he found a magnificent throne prepared in paradise. This theory, however, is untenable, and there remains only that positing his imitation of Dante. Though the poem lacks the depth and sublimity, and the significant references to the religious, scientific, and political views of the time, that have made Dante's work immortal, yet it is not without merit. Immanuel's description, free from dogmatism, is true to human nature. Not the least of its merits is the humane point of view and the tolerance toward those of a different belief which one looks for in vain in Dante, who excludes all non-Christians as such from eternal felicity.

Immanuel's "Diwan" was printed at Brescia 1491, Constantinople 1535, Berlin 1796, and Lemberg 1870; the last chapter also separately, Prague 1613, Frankfort-on-the-Oder 1713. Some passages have also been translated into German, *e.g.*, the introduction and ch. 28, and the latter also into Italian. Yet the book is little known or disseminated. His contemporaries even censure Immanuel as a wanton scoffer, as he is occasionally flippant even in religious matters. He fared worse with later critics. Moses Rieti excluded him from the hall of fame that he erected to Jewish sages in his "Miḳdash Me'aṭ" (*c.* 1420). Joseph Caro even forbade the reading of his poems (Shulḥan 'Aruk, Oraḥ Ḥayyim, 307, 16). Immanuel Frances censures his "wanton songs," and warns all poets of love-songs against imitating them ("Meteḳ Sefatayim," pp. 34, 38). This criticism is due to the strong admixture of the lascivious, frivolous, and erotic found in the poems. Never since Immanuel's verse has the Hebrew muse appeared so bold and wanton, notwithstanding that his work contains poems filled with true piety and even with invitations to penitence and asceticism.

IMMIGRATION. See Migration.

IMMORTALITY OF THE SOUL (late Hebrew, "hasharat ha-nefesh"; "ḥayye 'olam"): The belief that the soul continues its existence after the dissolution of the body is a matter of philosophical or theological speculation rather than of simple faith, and is accordingly nowhere expressly taught in Holy Scripture. As long as the soul was conceived to be merely a breath ("nefesh"; "neshamah"; comp. "anima"), and inseparably connected, if not identified, with the life-blood (Gen. ix. 4, comp. iv. 11; Lev. xvii. 11; see Soul), no real substance could be ascribed to it. As soon as the spirit or breath of God ("nishmat" or "ruaḥ ḥayyim"), which was believed to keep body and soul together, both in man and in beast (Gen. ii. 7, vi. 17, vii. 22; Job xxvii. 3), is taken away (Ps. cxlvi. 4) or returns to God (Eccl. xii. 7; Job xxxiv. 14), the soul goes down to Sheol or Hades, there to lead a shadowy existence without life and consciousness (Job xiv. 21; Ps. vi. 6 [A. V. 5], cxv. 17; Isa. xxxviii. 18; Eccl. ix. 5, 10). The belief in a continuous life of the soul, which underlies primitive Ancestor Worship and the rites of necromancy, practised also in ancient Israel (I Sam. xxviii. 13 *et seq.*; Isa. viii. 19; see Necromancy), was discouraged and suppressed by prophet and lawgiver as antagonistic to the belief in Yhwh, the God of life, the Ruler of heaven and earth, whose reign was not extended over Sheol until post-exilic times (Ps. xvi. 10, xlix. 16, cxxxix. 8).

As a matter of fact, eternal life was ascribed exclusively to God and to celestial beings who "eat of the tree of life and live forever" (Gen. iii. 22, Hebr.), whereas man by being driven out of the Garden of Eden was deprived of the opportunity of eating the food of immortality (see Roscher, "Lexikon der Griechischen und Römischen Mythologie," *s.v.* "Ambrosia"). It is the Psalmist's implicit faith in God's omnipotence and omnipresence that leads him to the hope of immortality (Ps. xvi. 11, xvii. 15, xlix. 16, lxxiii. 24 *et seq.*, cxvi. 6-9); whereas Job (xiv. 13 *et seq.*, xix. 26) betrays only a desire for, not a real faith in, a life after death. Ben Sira (xiv. 12, xvii. 27 *et seq.*, xxi. 10, xxviii. 21) still clings to the belief in Sheol as the destination of man. It was only in connection with the Messianic hope that, under the influence of Persian ideas, the belief in resurrection lent to the disembodied soul a continuous existence (Isa. xxv. 6-8; Dan. xii. 2; see Eschatology; Resurrection).

The belief in the immortality of the soul came to the Jews from contact with Greek thought and chiefly through the philosophy of Plato, its principal

Hellenistic View.

exponent, who was led to it through Orphic and Eleusinian mysteries in which Babylonian and Egyptian views were strangely blended, as the Semitic name "Minos" (comp. "Minotaurus"), and the Egyptian "Rhadamanthys" ("Ra of Ament," "Ruler of Hades"; Naville, "La Litanie du Soleil," 1875, p. 13) with others, sufficiently prove. Consult especially E. Rhode, "Psyche: Seelencult und Unsterblichkeitsglaube der Griechen," 1894, pp. 555 *et seq.* A blessed immortality awaiting the spirit while the bones rest in the earth is mentioned in Jubilees xxiii. 31 and Enoch iii. 4. Immortality, the "dwelling near God's throne" "free from the load of the body," is "the fruit of righteousness," says the Book of Wisdom (i. 15; iii. 4; iv. 1; viii. 13, 17; xv. 3). In IV Maccabees, also (ix. 8, 22; x. 15; xiv. 5; xv. 2; xvi. 13; xvii. 5, 18), immortality of the soul is represented as life with God in heaven, and declared to be the reward for righteousness and martyrdom. The souls of the righteous are transplanted into heaven and transformed into holy souls (*ib.* xiii. 17, xviii. 23). According to Philo, the soul exists before it enters the body, a prison-house from which death liberates it; to return to God and live in constant contemplation of Him is man's highest destiny (Philo, "De Opificio Mundi," §§ 46, 47; *idem*, "De Allegoriis Legum," i., §§ 33, 65; iii., §§ 14, 37; *idem*, "Quis Rerum Divinarum Hæres Sit," §§ 38, 57).

It is not quite clear whether the Sadducees, in denying resurrection (Josephus, "Ant." xviii. 1, § 4; *idem*, "B. J." ii. 12; Mark xii. 18; Acts xxiii. 8; comp. Sanh. 90b), denied also the immortality of the soul (see Ab. R. N., recension B, x. [ed. Schechter, 26]). Certain it is that the Pharisaic belief in resurrection had not even a name for the immortality of the soul. For them, man was made for two worlds, the world that now is, and the world to come, where life does not end in death (Gen. R. viii.; Yer. Meg. ii. 73b; M. Ḳ. iii. 83b, where the words על מות, Ps. xlviii. 15, are translated by Aquilas as if they read: אל מות, "no death," ἀθανασία).

Immortality of Martyrs.

The point of view from which the Ḥasidim regarded earthly existence was that man was born for another and a better world than this. Hence Abraham is told by God: "Depart from this vain world; leave the body and go to thy Lord among the good" (Testament of Abraham, i.). The immortality of martyrs was especially dwelt on by the Essenes (Josephus, "B. J." vii. 8, § 7; i. 33, § 2; comp. ii. 8, §§ 10, 14; *idem*, "Ant." xviii. 1, § 5). The souls of the righteous live like birds (see Jew. Encyc. iii. 219, *s.v.* Birds) in cages ("columbaria") guarded by angels (IV Esd. vii. 32, 95; Apoc. Baruch, xxi. 23, xxx. 2; comp. Shab. 152b). According to IV Esdras iv. 41 (comp. Yeb. 62a), they are kept in such cages (גוף) before entering upon earthly existence. The souls of martyrs also have a special place in heaven, according to Enoch (xxii. 12, cii. 4, cviii. 11 *et seq.*); whereas the Slavonic Enoch (xxiii. 5) teaches that "every soul was created for eternity before the foundation of the world." This Platonic doctrine of the preexistence of the soul (comp. Wisdom viii. 20; Philo, "De Gigantibus," §§ 3 *et seq.*; *idem*, "De Somniis," i., § 22) is taught also by the Rabbis, who spoke of a storehouse of the souls in the seventh heaven ("'Arabot"; Sifre, Deut. 344; Ḥag. 12b). In Gen. R. viii. the souls of the righteous are mentioned as counselors of God at the world's creation (comp. the Fravashi in "Farwardin Yast," in "S. B. E." xxiii. 179).

Upon the belief that the soul has a life of its own after death is based the following story: "Said Emperor Antoninus to Judah ha-Nasi, 'Both body and soul could plead guiltless on the day of judgment, as neither sinned without the other.' 'But then,' answered Judah, 'God reunites both for the judgment, holding them both responsible for the sin committed, just as in the fable the blind and the lame are punished in common for aiding each other in stealing the fruit of the orchard'" (Sanh. 91a; Lev. R. iv.). "There is neither eating nor drinking nor any sensual pleasure nor strife in the world to come, but the righteous with their crowns sit around the table of God, feeding upon the splendor of His majesty," said Rab (Ber. 17a), thus insisting that the nature of the soul when freed from the body is purely spiritual, while the common belief loved to dwell upon the banquet prepared for the pious in the world to come (see Eschatology; Leviathan). Hence the saying, "Prepare thyself in the vestibule that thou mayest be admitted into the triclinium"; that is, "Let this world be a preparation for the next" (Ab. iv. 16). The following sayings also indicate a pure conception of the soul's immortality: "The Prophets have spoken only concerning the Messianic future; but concerning the future state of the soul it is said: 'Men have not heard nor perceived by the ear, neither hath the eye seen, O God beside Thee, what He hath prepared for him that waiteth for Him'" (Ber. 34b; comp. I Cor. ii. 9, Greek; Resh, "Agrapha," 1889, p. 154). "When man dies," says R. Meïr, "three sets of angels go forth to welcome him" (Num. R. xii.); this can only refer to the disembodied soul.

Nevertheless, the prevailing rabbinical conception of the future world is that of the world of resurrection, not that of pure immortality. Resurrection became the dogma of Judaism, fixed in the Mishnah (Sanh. x. 1) and in the liturgy ("Elohai Neshamah" and "Shemoneh 'Esreh"), just as the Church knows only of a future based upon the resurrection; whereas immortality remained merely a philosophical assumption. When therefore Maimonides ("Yad," Teshubah, viii. 2) declared, with reference to Ber. 17a, quoted above, that the world to come is entirely spiritual, one in which the body and bodily enjoyments have no share, he met with strong opposition on the part of Abraham of Posquières, who pointed in his critical annotations ("Hassagot RABaD") to a number of Talmudical passages (Shab. 114a; Ket. 111a; Sanh. 91b) which leave no doubt as to the identification of the world to come ("'olam ha-ba") with that of the resurrection of the body.

The medieval Jewish philosophers without exception recognized the dogmatic character of the belief in resurrection, while on the other hand they insisted on the axiomatic character of the belief in immortality of the soul (see Albo, "'Iḳḳarim," iv. 35-41). Saadia made the dogma of the resurrection

In Jewish Philosophy.

part of his speculation ("Emunot we-De'ot," vii. and ix.); Judah ha-Levi ("Cuzari," i. 109) accentuated more the spiritual nature of the future existence, the bliss of which consisted in the contemplation of God; whereas Maimonides, though he accepted the resurrection dogma in his Mishnah commentary (Sanh. xi.; comp. his monograph on the subject, "Ma'amar Teḥiyyat ha-Metim"), ignored it altogether in his code ("Yad," Teshubah, viii.); and in his "Moreh" (iii. 27, 51–52, 54; comp. "Yad," Yesode ha-Torah, iv. 9) he went so far as to assign immortality only to the thinkers, whose acquired intelligence ("sekel ha-niḳneh"), according to the Aristotelians, becomes part of the "active divine intelligence," and thus attains perfection and permanence. This Maimonidean view, which practically denies to the soul of man personality and substance and excludes the simple-minded doer of good from future existence, is strongly combated by Ḥasdai Crescas ("Or Adonai," ii. 5, 5; 6, 1) as contrary to Scripture and to common sense; he claims, instead, immortality for every soul filled with love for God, whose very essence is moral rather than intellectual, and consists in perfection and goodness rather than in knowledge (comp. also Gersonides, "Milḥamot ha-Shem," i. 13; Albo, "'Iḳḳarim," iv. 29). Owing to Crescas, and in opposition to Leibnitz's view that without future retribution there could be no morality and no justice in the world, Spinoza ("Ethics," v. 41) declared, "Virtue is eternal bliss; even if we should not be aware of the soul's immortality we must love virtue above everything."

While medieval philosophy dwelt on the intellectual, moral, or spiritual nature of the soul to prove its immortality, the cabalists endeavored to explain the soul as a light from heaven, after Prov. xx. 27, and immortality as a return to the celestial world of pure light (Baḥya b. Asher to Gen. i. 3; Zohar, Terumah, 127a). But the belief in the preexistence of the soul led the mystics to the adoption, with all its weird notions and superstitions, of the Pythagorean system of the transmigration of the soul (see Transmigration of Souls). Of this mystic view Manasseh ben Israel also was an exponent, as his "Nishmat Ḥayyim" shows.

It was the merit of Moses Mendelssohn, the most prominent philosopher of the deistic school in an era of enlightenment and skepticism, to have revived by his "Phædon" the Platonic doctrine of immortality, and to have asserted the divine nature of man by presenting new arguments in behalf of the spiritual substance of the soul (see Kayserling, "Moses Mendelssohn," 1862, pp. 148–169). Thenceforth Judaism, and especially progressive or Reform Judaism, emphasized the doctrine of immortality, in both its religious instruction and its liturgy (see Catechisms; Conferences, Rabbinical), while the dogma of resurrection was gradually discarded and, in the Reform rituals, eliminated from the prayer-books. Immortality of the soul, instead of resurrection, was found to be "an integral part of the Jewish creed" and "the logical sequel to the God-idea," inasmuch as God's faithfulness "seemed to point, not to the fulfilment of the promise of resurrection" given to those that "sleep in the dust," as the second of the Eighteen Benedictions has it, but to "the realization of those higher expectations which are sown, as part of its very nature, in every human soul" (Morris Joseph, "Judaism as Creed and Life," 1903, pp. 91 *et seq.*). The Biblical statement "God created man in his own image" (Gen. i. 27) and the passage "May the soul . . . be bound in the bundle of life with the Lord thy God" (I Sam. xxv. 29, Hebr.), which, as a divine promise and a human supplication, filled the generations with comfort and hope (Zunz, "Z. G." p. 350), received a new meaning from this view of man's future; and the rabbinical saying, "The righteous rest not, either in this or in the future world, but go from strength to strength until they see God on Zion" (Ber. 64a, after Ps. lxxxiv. 8 [A. V.]), appeared to offer an endless vista to the hope of immortality.

IMPRISONMENT: Imprisonment as a punishment for crime is not known in Mosaic law. The few apparent cases mentioned in the Pentateuch (Lev. xxiv. 12; Num. xv. 34) refer in fact to the temporary detention of the criminal until sentence could be passed on him. Later, however, during the period of the first commonwealth, a few cases of punishment by imprisonment are recorded (I Kings xxii. 27; II Chron. xvi. 10; Jer. xxxvii. 15–16; comp. Ps. cvii. 10). The Hebrew language contains a number of words meaning "prison" or "dungeon," which would imply that imprisonment was customary among the Jews, as it was likewise among many other nations of antiquity. Nevertheless, it seems to have been an arbitrary punishment inflicted by the magistrates or by the kings upon those who were under accusation or in disfavor.

The Rabbis, however, fixed this punishment for the following cases: (1) When the court is convinced of the guilt of one accused of murder, but can not legally convict because some condition has not been complied with (Sanh. 81b; Maimonides, "Yad," Roẓeaḥ, iv. 8). (2) When one commits murder by the hands of a hireling (Ḳid. 43a; Roẓeaḥ, ii. 2–4). (3) When one who has been twice condemned and punished with stripes for the same offense is found guilty for the third time (Sanh. 81b; "Yad," Sanhedrin, xviii. 4). (4) When one can not be convicted by the court for a crime which involves capital punishment because he does not acknowledge that he was conscious of the guilt, even after being warned three times by the witnesses (Sanh. 81b; Tosef., Sanh. xii. 4; "Yad," *l.c.* xviii. 5). In all these cases the period of imprisonment was left to the discretion of the court. In most such cases, especially in the first instance given above, the sentence was for life, the treatment being very severe, aiming at the speedy death of the criminal (Sanh. 81b).

Temporary imprisonment, pending trial, is authorized by the Talmud, as it is in the Bible, in all cases (Sanh. 78b; Roẓeaḥ, iv. 3). See Crime; Punishment.

IMPURITY. See Carcass; Clean and Unclean Animals; Purity.

INCANTATION: The invocation of magical powers. All peoples, civilized as well as savage, have believed and still believe in magical influences and effects. The chief means of harming or of protecting from harm was the utterance of some word or words invested with the highest magical power; and whoever knew the right word had influence over gods and demons; for they could not resist the command, spoken under certain necessary and auspicious conditions. Magic pervaded the religions of the Assyrians, Babylonians, Egyptians, Greeks, and Romans, and in a still higher degree the religions of primitive peoples. According to the Bible the nations which lived in the same country as the ancient Israelites or in that surrounding it practised all sorts of superstitions forbidden to the Israelites (Blau, "Das Altjüdische Zauberwesen," pp. 16-19). The nature of these superstitions can not always be determined. Probably the original meaning of כשף, the root-word by which magic is indicated in Hebrew, is "to murmur" or "to mutter" (Fleischer, in Levy, "Neuhebr. Wörterb." ii. 459). Hence, the magician (מכשף) was a person who muttered magic formulas; but no example of such formulas has been preserved in the Bible.

Talmudic Formulas.

Rabbinical literature, however, contains a large number of these formulas, the majority of which, designated as "heathen" (Amoritic), are forbidden, while a small number are recommended. Thirty-two incantations in Hebrew and Aramaic are enumerated in Blau, *l.c.* pp. 65-86. In some there are unintelligible words, which are the characteristic mark of magic formulas; in others there are Persian words, pointing to a Persian origin of the formula. The exclamations "Jammia and Bizia"; "Dagan and Kedron"; "Healing" (on sneezing; see Asusa); "Abundance and remainder, drink and leave a drop" (*ib.* p. 66) are Amoritic; that is, they originated among the primitive heathen inhabitants of Palestine. When a teacher of the Law had taken an excessive quantity of wine, his palm and knee were rubbed with oil and salt, while these words were pronounced: "As this oil evaporates, so may the wine evaporate from A. son of B." (*ib.* p. 72). Several observances were followed in the case of ague, one of them being as follows: The person took a new earthen jug to a river, turned it around his head seven times, poured out the water backward, and said "River, river, lend a jug full of water for the guest who has come to me" (*ib.* p. 73) If a person is choking with a bone, another bone of the same kind is laid on his head, while some one utters the words: "One, one, it goes down; swallow, swallow, it goes down; one, one" (*ib.* p. 76). This formula consists of four words, which in the second part are repeated in inverse order. The same remedy is also mentioned in Pliny's "Historia Naturalis," xxviii. 49. The following abracadabra is pronounced against the demon of blindness:

SHABRIRI
BRIRI
RIRI
IRI
RI

During the Hellenistic period of Jewish history Hebrew incantations were used among both the Jews and the pagans, as appears from the magic papyri published by Wessely (Vienna, 1888, 1894). The Tetragrammaton and the divine names "Eloe" and "Adonai" were most frequently used (*ib.* pp. 102 *et seq.*). But there are other words, which it is difficult to identify on account of the obscurity in which the formulas were enveloped. The Greco-Roman world was acquainted with the barbaric words of the "Chaldeans" (magicians), and in the famous inscription on the pedestal of a Greek oracle altar several Hebrew words may be recognized. The "Sword of Moses" ("Ḥarba de-Mosheh"), published by Gaster, which also contains incantations, is connected with Judæo-Hellenistic magic.

Medieval Formulas.

The literature of medieval mysticism likewise presents formulas for incantation. These formulas are an essential part of the so-called practical Cabala, which has still its adepts in eastern Europe and in Asia. Jewish folk-lore also furnishes examples of incantation, some of which are noted in "Mittheilungen der Gesellschaft für Jüdische Volkskunde," published by Grunwald (see No. vii., *s.v.* "Beschwörungen, Besprechungen, Feuerbeschwören"). The "Revue des Ecoles de l'Alliance Israélite," published by the Alliance Israélite Universelle, contains valuable material relating to incantations from the folk-lore of all countries of the East.

J. L. B.

INCARNATION. See Logos.

INCENSE: An aromatic substance which exhales perfume during combustion; the odor of spices and gums burned as an act of worship. In ancient times, on account of the extreme heat of the Orient, incense was used, as it is to-day, to a much greater extent in the East than in the West. "Ointment and perfume rejoice the heart," says Prov. xxvii. 9. Garments were perfumed to such an extent that an old marriage song (Ps. xlv. 9 [A. V. 8]) could say of the royal bridegroom, "All thy garments smell of myrrh, and aloes, and cassia." Beds were perfumed with "myrrh, aloes, and cinnamon" (Prov. vii. 17). The bride in Cant. iii. 6 was perfumed with all sorts of incense; and noble guests were honored by being sprinkled with perfume or incense (Luke vii. 46; comp. Lane, "Manners and Customs of the Modern Egyptians," iii. 8). It was customary among noble Jews to pass incense ("mugmar") around on a brazier after meals (comp. Ber. vi. 6).

Sacrifices of Incense.

Under these circumstances the use, with sacrifices, of spices and perfumes that were burned as incense seems a matter of course. It is an open question whether the ancient Hebrews ascribed to this incense any special efficacy in banning demons (comp. Tobit vi. 1-7); but in any case the offering of incense was widely practised in the ancient Oriental religions. That it was a common adjunct of Egyptian worship is evident from the fact that in the representations of worship the king is nearly always pictured with a censer in his hand offering incense. Enormous quantities of spices were used for this purpose every year by the temples. According to one list, King Rameses III. presented during the thirty-one years of his reign 368,461 jars and 1,933,766 pieces of incense, honey, and oil (Erman, "Egypten," p. 407). Incense is mentioned just as frequently in the Babylonian-Assyrian cult. According to Herodotus (i. 183), at the great yearly feast of Bel 1,000 talents (58,944 kg.) of incense were burned on his great altar.

In Israelitish Cult.

It might be inferred from the foregoing, as a matter of course, that incense was also used in the cult of Israel. The offering of incense is not, however, mentioned till a comparatively late date in the Old Testament. Occupying a prominent position in the sacrificial legislation of the middle Pentateuch, this sacrifice is mentioned seldom, if at all, in the historic and prophetic books. This is all the more remarkable since the Israelites must from early times have been acquainted with the ingredients themselves, the fragrant gums, etc. The caravans that carried the spices of Syria to the Egyptian markets went by way of Palestine (Gen. xxxvii. 25); and the spices of southern Arabia were brought by Solomon to Jerusalem (I Kings x. 10 *et seq.*). Nevertheless no trace can be found in Hebrew literature of the offering of incense in the time of the early kingdom; nor is it represented as a regular and especially important part of worship, as it became in later times. Although the noun "ḳeṭoret" and the verb "ḳaṭar" ("ḳiṭṭer," "hiḳṭir") occur, they do not designate incense burnt on the altar and its offering, as in the sacrificial legislation. "Ḳeṭoret" is rather a general term for the burning sacrifice and the sacrificial odor; and in the same way "ḳaṭar" is used as an entirely general term for the burning of any gift on the altar (comp. Amos iv. 5; Hosea iv. 13, xi. 2).

This can not be accidental; for there is likewise no mention of the offering of incense in those passages where it might be expected. The Prophets refer more than once to the vain endeavors of the people to gain Yhwh's favor. They enumerate all the things that the people are doing, and all the gifts they offer, including even their own children; but nowhere is there an allusion to the holy sacrifice of incense (comp. Amos iv. 4 *et seq.*, v. 21 *et seq.*; Isa. i. 11 *et seq.*; Micah vi. 6 *et seq.*). Jeremiah is the first to say, in such an enumeration, "To what purpose cometh there to me incense from Sheba, and the sweet cane from a far country?" (Jer. vi. 20; comp. *ib.* xli. 5). It is clearly evident that the offering of incense is here still considered as something rare and precious, because the material of the incense comes from a far country and is valuable. Similarly, Isaiah says (xliii. 23 *et seq.*), "I have not caused thee to serve with an offering, nor wearied thee with incense." From this time onward, however, the offering of incense is mentioned much more frequently, and especially often in Chronicles. In view of these facts it may be assumed that the incense-offering was not frequent in the time of the Earlier Prophets, becoming more popular only in the time of Jeremiah, and that it did not become important as the most holy of offerings until the post-exilic period.

Legal Ordinances.

In the sacrificial legislation of the Pentateuch the incense-offering is mentioned both as a concomitant of other offerings and by itself. As regards the former, every meat-offering ("minḥah") required the addition of incense, which was burned, under the name of "azkarah," on the great altar with a certain part of the flour. The sacrifice of the twelve loaves of showbread was also combined with an incense-offering; according to later sources (Josephus, "Ant." iii. 10, § 7; Men. xi. 5, 7, 8), two golden bowls were placed upon the table of the showbread. When the stale loaves were taken away on the Sabbath, to be replaced by new ones, the old incense was burned in the fire of the great altar of burnt offering (Lev. xxiv. 7-9). The incense-offering was omitted only in two cases—with the sin-offering of the poor (Lev. v. 11-13) and with the meat-offering of the lepers (Lev. xiv. 10, 20).

The independent incense-offering ("tamid") was brought twice every day, in the morning and in the evening, corresponding to the daily morning and evening sacrifices on the altar of burnt offering. The ordinance regarding the tamid prescribes that when the priest dresses the lamps in the morning he shall burn incense, and also when he lights the lamps at even ("ben ha-'arbayim"; Ex. xxx. 7-9). This reference was considered obscure even in early times; the Samaritan and Karaitic interpretation, that it refers to the time from sunset to complete darkness, *i.e.*, twilight, is most probably the correct one. An independent incense-offering was prescribed also for the Day of Atonement. On this day the high priest himself was required to burn the incense in the censer in the Holy of Holies (see Censer), not, as usually, on the altar of incense (Lev. xvi. 12).

Importance of the Sacrifice.

The importance ascribed to the incense-offering is evident from the special sanctity characterizing the sacrifice. It is the high prerogative of the priesthood to offer it. Uzziah is severely punished for presuming upon this prerogative (II Chron. xxvi. 16); and the Levites who attempt to bring this offering without being entitled to do so suffer death (Num. xvi. 6 *et seq.*, 17 *et seq.*). But the two priests entitled to perform the service, Aaron's sons Nadab and Abihu, also perished when they committed an error in offering this most holy sacrifice by putting profane fire into their censers instead of fire from the altar of burnt offering (Lev. x. 1 *et seq.*). In the Law itself it is denounced as a sin deserving death if any one takes of the holy incense for profane purposes, or even makes incense according to the special receipt for holy incense; and similarly if any one uses for the offering incense other than that prescribed by law (Ex. xxx. 34-38).

Composition of the Holy Incense.

The receipt for making the holy incense, given in Ex. xxx. 34–38, names four ingredients: (1) "naṭaf" (A. V. "stacte"), probably storax-gum, the Rabbis taking it to be balsam; (2) "sheḥelet" (A. V. "onycha"), the fragrant operculum of a species of shell found in the Red Sea, and still used in the East for incense and medicine; (3) "ḥelbenah" (A. V. "galbanum"), a species of gum, according to ancient authorities the product of narthex, and according to the modern view that of the ferula herb; (4) "lebonah" (A. V. "frankincense"), the resin of the olibanum-tree, *i.e.*, one of the various species of *Boswellia* indigenous to Arabia Felix. The same quantity of each is to be taken and, mixed with salt, made into a confection.

In the later tradition (Ker. vi. a, b; comp. Maimonides, "Yad," Kele ha-Miḳdash, ii. 1–5; on the Arabic words used by Maimonides see Bacher, "Aus dem Wörterbuche Tanchum Jeruschalmi's," p. 122) these four spices were not regarded as sufficient, and seven others were added, namely: myrrh ("mor"), cassia ("ḳeẓi'ah"), the flower of nard ("shibbolet nerd"), saffron ("karkom"), kostus ("ḳoshṭ"), cinnamon ("ḳinnamon"), and cinnamon-bark ("kinashah"). Josephus ("B. J." v. 5, § 5) speaks of thirteen ingredients; this agrees with the fact that in other sources Jordan amber ("kippat ha-Yarden") and a herb now unknown, which caused the smoke to rise (hence called "ma'aleh 'ashan"), are mentioned. Salt is omitted in these lists, a very small quantity being added (¼ kab to the incense used for the whole year). But only the salt of Sodom ("melaḥ Sedomit") might be used.

Three hundred and sixty-eight minas of incense were prepared once a year, in the Temple, one for each day and three extra for the sacrifice of the Day of Atonement. Some of the ingredients had to be specially prepared, as, for example, the onycha, which was first soaked in Cyprus wine to take away the tartness. Great care was bestowed upon the comminuting of the ingredients, each of which was pounded by itself; and the man who performed that work incited himself by repeating the words, "hadeḳ heṭeb" = "make it very fine." The incense was pounded in the mortar twice a year, and required care otherwise. On damp days it was piled up; on warm, dry days it was spread out for drying. In Herodian times the preparation of the incense was a kind of privilege retained in the family of Abtinas, which was thought to be in possession of special directions for making it. They were particularly credited with knowing how to cause the smoke of the incense-offering to rise in the form of the stem of a date-tree. I. Be.

When it reached the ceiling it spread out and descended, and covered the whole space. The smoke from incense prepared by other apothecaries spread irregularly as it rose. The family would not divulge the secret of its art, and was consequently driven from office. Apothecaries from Alexandria were sent for who were proficient in incense-making; but they could not secure smoke which rose regularly. The Abtinases were, therefore, recalled, but they demanded double the pay they had previously received (Yoma 38b; Yer. Yoma iii. 9). They gave as a reason for their secrecy that, anticipating the destruction of the Temple, they feared the secret might be used later in idolatrous services (Yer. Sheḳ. v. 1). The Rabbis, however, severely criticized the Abtinases for their selfishness. The Mishnah records their name as infamous (Yoma iii., end). R. Johanan b. Nari tells of meeting an old man of the Abtinas family carrying a scroll containing a list of the ingredients used in the composition of the incense; the old man surrendered the scroll to R. Johanan, "since the Abtinases were no longer trustworthy." When R. Akiba heard of this he shed tears, and said: "From now we must never mention their name with blame" (Yer. Sheḳ. v. 1). J. D. E.

The Ritual of the Offering.

Apparently incense was generally offered in a pan ("maḥtah"), which the priest carried in his hand. In such a pan Aaron carried the incense that he offered for the sins of the people (Num. xvii. 11–12 [A. V. xvi. 46–47]). Each of Aaron's sons had his own pan (Lev. x. 1 *et seq.*); and the rebellious Levites also sacrificed incense on pans, which were subsequently used to cover the altar of burnt offering of the Tabernacle (Num. xvii. 4 [A. V. xvi. 39]). It would thus appear that every priest had his censer (comp. Egyptian illustrations). In the Jewish statutory sacrificial ritual, on the introduction of a special incense-altar this custom was set aside, surviving only in the ritual of the Day of Atonement. On that day the priest entered the Holy of Holies, carrying in his right hand the pan for the incense, filled with live coals, and in his left hand a spoonlike vessel, called "kaf," containing the incense. After placing both of these utensils on the floor, the high priest took the incense from the kaf with the hollow of his hand, not with his fingers, and heaped it upon the pan containing the coals. It was considered especially difficult to take the incense up thus without spilling any (Lev. xvi. 12; comp. Yoma i. 5, 47b).

In later times a special altar for the incense-offering was introduced, and this, more than anything else, shows the great importance that was ascribed to the offering. The assumption that the incense-altar mentioned in the Law is of later origin is supported by the passages quoted above, where it is expressly said that the holy sacrifice of incense was not burned on a special altar, but in the censers of the priests. It must, moreover, be noted that this altar is not mentioned in the account of the building and arrangement of the Tabernacle, being referred to only in Ex. xxx. 1 *et seq.* Reference to it was similarly added later in the account of the building of the Temple. Otherwise these points of criticism need not be discussed here. According to the description in I Kings vi. 20-22, vii. 48, the altar in the Temple consisted of a table of cedar-wood overlaid with gold. It stood in the sanctuary, near the entrance to the Holy of Holies. The fact that in the

Epistle to the Hebrews (Heb. ix. 4) this altar was included in the Holy of Holies shows how sacred it was considered to be.

In the course of time the ritual became increasingly complicated. According to the Talmud (Tamid iii. 6, vi. 1–3), the ceremony was as follows: After completing the preparations for the morning's burnt offering, such as the cleaning of the altar, etc., two priests removed the ashes from the altar of burnt offering and the lamps; then the sacrificial animals were killed; lots were drawn to decide which priest should offer the incense; and then followed the preparations for the sacrifice. A priest took live coals from the altar of burnt offering in a silver brazier ("maḥtah") and placed them on the incense-altar. The officiating priest then entered the sanctuary, carrying the incense in a jar ("bazak"), which he held over a shallow spoon-shaped utensil (kaf) to prevent any grains from dropping on the floor from the heaped jar; and when the command "burn the incense" issued from the chamber of the priests he spread upon the coals the incense in the jar. An assisting priest held the spoon; he was also to pour into the hollow hand of the officiant any grains that might drop into the spoon. Both priests then left the sanctuary. It is expressly stated that none of the other priests was to be present, and that no other person might be in the sanctuary. After the incense had been consumed the pieces of the tamid were placed on the altar of burnt offering.

Significance of the Incense-Offering.

The importance of the incense-offering is evident from what has been said above regarding its origin. Whatever was pleasing to men was offered to the Deity also; and as men were honored with incense, to the Deity was paid similar honor. This explanation is entirely sufficient. It was natural that the rising smoke should be regarded as the symbol or vehicle of prayer (thus, perhaps, may be interpreted Ps. cxli. 2; comp. Rev. v. 8). But all other symbolical interpretations are far-fetched and not supported by the ancient sources, as, for example, the opinion of Josephus ("B. J." v. 5, § 5) that the thirteen ingredients, which come from the sea, the desert, and the fertile country, are meant to signify that all things are God's and are intended for His service; or the view of Philo, that the four ingredients mentioned in the Law symbolize the four elements, water, earth, fire, and air, which combined represent the universe. I. Be.

Maimonides regards the incense-offering as designed originally to counteract the odors arising from the slaughtered animals and to animate the spirit of the priests ("Moreh," iii., ch. 45, p. 69, ed. Schlosberg, London, 1851). The incense was also considered as an antidote against the plague. The reciting of the incense chapter (פטום הקטורת) after Psalm cxlv. prevents death from entering the house (comp. Num. xvii. 12, Hebr.; Zohar, *s.v.* "Pineḥas," p. 224a). This passage of the Talmud is now incorporated in some prayer-books. J. D. E.

INCEST.—Biblical Data: Marriage or carnal commerce between persons of a close degree of consanguinity. Even in modern times the connotation of "incestuous" is not the same in all countries. Among primitive and barbarous races there is a still wider divergence. Nor has the opinion as to which marriages between relatives were incestuous and hence forbidden been constant at all times among the Israelites. The oldest customs were laxer in permitting marriages than was the law of the intermediary books of the Pentateuch. The marriage of the father with his own daughter (and therefore presumably also that of the son with his mother) was forbidden at all times as incestuous. The story of Lot, which might be construed as showing that even this relationship was allowed in Ammon and Moab (Gen. xix. 30 *et seq.*), reflects the antipathy of Israel, which regarded these peoples as born of an incestuous union. But of other marriages forbidden in olden times as incestuous no definite data are obtainable. Endogamic marriages (*i.e.*, within the circle of one's relatives) were preferred by ancient tribes. The chosen suitor for a girl was her cousin; it was actually forbidden for the eldest daughter to marry outside the family. By analogy, then, the conclusion is safe that marriages between very near relatives were permitted among the ancient Hebrews also. In fact, there is no lack of evidence for this. Abraham, whose wife Sarah was also his half-sister, may be mentioned as an example of a marriage between brother and sister (Gen. xx. 12). Even in David's time, although it is represented as unusual for a royal prince to marry his sister (II Sam. xiii. 13), it was still regarded as neither objectionable nor forbidden. It should be noticed that in both these cases the union was with a paternal half-sister; the husband and wife being of one father, but not of one mother. Jacob had to wife two sisters at the same time, and Moses was born of a marriage between nephew and aunt (Num. xxvi. 59). Marriage with a sister-in-law, or the widow of a deceased brother, is in certain cases a religious duty (see Levirate); only from the account of Judah and Tamar (Gen. xxxviii.; comp. especially v. 26) is it to be concluded that in case of a lack of brothers the oldest custom obliged the father to marry his daughter-in-law.

It has been contended that marriage with the father's wife (who was not the son's own mother) seems not to have been objectionable in olden times. As an instance of this the union between Reuben and Bilhah is adduced (Gen. xxxv. 22). But in Gen. xlix. 4 this union is severely condemned. The right explanation of this incident as well as of the similar occurrence reported in the story of Absalom's uprising (II Sam. xvi. 21, 22) is that control of the harem of one's predecessor was regarded as the assertion of one's right to the throne. And when Adonijah asks for Abishag from his father's harem, he appears from this act to claim to be his heir (I Kings ii. 13 *et seq.*). The phrase עלית משכבי אביך (Gen. xlix. 4) may be taken symbolically, and does not necessarily convey the idea of an actual incestuous union. The following, however, are the degrees of consanguinity and relationship within which marriage is forbidden as incestuous in Deuteronomy: the father's wife (xxi. 30, xxvii. 20); a sister or half-sister (xxvii. 22); and a mother-in-law (xxvii. 23). In all three points, however, even in Ezekiel's time, custom by no means upheld the law (Ezek. xxii. 10 *et seq.*).

The so-called Priestly Code goes furthest in forbidding marriages among relatives. According to Lev. xviii. 6–18, a man may under no circumstances marry: (1) mother, (2) stepmother, (3) sister, (4) son's daughter, (5) daughter's daughter, (6) half-sister, father's side [or mother's side], (7) father's sister, (8) mother's sister [aunt], (9) wife of father's brother, (10) daughter-in-law, (11) sister-in-law, (12) wife and her daughter [or wife and (16) her mother], (13) wife's son's daughter, (14) wife's daughter's daughter, or (15) wife and her sister [both living]. In Lev. xx. 11–21 another list is given, which enumerates only Nos. 2, 6, 7, 8, 9, 10, and 12, and omits those that are implied, such as mother's sister, granddaughter, and sister-in-law; explaining also that No. 6 includes a half-sister on the mother's side, and that No. 12 includes wife and her mother. This chapter describes the punishments of the various classes of incest (see PUNISHMENT).

The same unions were in general forbidden by Islam, as also by custom earlier than Islam.

E. G. H. I. BE.

——**In Rabbinical Literature:** The crime of incest is known in the Talmud as "'arayot"; and it is implied that alliances involving its commission are illegitimate and consequently null and void.

A notable omission from the list of those with whom sexual intercourse, according to Lev. xviii., constitutes incest is a daughter, in regard to whom the prohibition is explained by the Talmud as "self-evident" or implied from the expressed proscription against a granddaughter (Yeb. 3a). Deut. xxvii. 20, 22, 23, as was noted above, enumerates only Nos. 2, 6, and 12, namely, father's wife, half-sister, and mother-in-law; this, according to the Rabbis, is because they are more remote [the others being implied], and because, since they usually live together in the same house, if they violate the law they can not be easily detected (Rashbam, Commentary). The intercourse of such relatives is among the "secret sins" to which the Levites' curse on Mt. Ebel was directed (Deut. xxvii. 15). The levirate marriage of the childless wife of a dead brother (יבמה), though commended in the Bible, is discouraged by some rabbis. Abba Saul said that "ḥaliẓah" is preferable to marriage (Yeb. 3a). Later it was prohibited in European countries. See LEVIRATE MARRIAGE.

The soferim or scribes (322–221 B.C.) extended the number of degrees of relationship within which marriage involved incest, and ranked those relations as "seconds" (שניות) or subordinates which are not included in the Bible. Marriage with these was forbidden by the Rabbis (מדרבנן) as a precaution and safeguard against the infringement of the Mosaic degrees (מדאורייתא; Yeb. 21a). The rabbinical "seconds" are as follows: [19] mother's mother; [20] father's mother; [21] wife of father's father; [22] wife of mother's father; [23] wife of father's brother, on the mother's side; [24] wife of mother's brother, on the father's side; [25] son's daughter-in-law; [26] daughter's daughter-in-law (Tosef., Yeb. ii. 3). The prohibition is thus raised one degree on the ascent, and one degree on the descent in the case of the daughter-in-law; while the prohibition of the wife of a father's half-brother is balanced by the prohibition of the wife of a mother's half-brother on the mother's side (being comparative seconds to the Mosaic half-sister prohibition).

R. Ḥiyya, in his list of seconds, or rather "thirds," goes one step further, and adds the third generation on the descent, namely: [27] daughter's granddaughter, and [28] son's granddaughter; likewise a wife's third generation [29] and [30]. On the ascent he includes the fourth generation and prohibits the grandmother of a wife's mother or father [31] and [32] (Yeb. 22a). A like prohibition on the man's side is implied, but not mentioned, the existence of relatives of this degree being an improbability, except on the wife's side, who usually was the husband's junior. It is questionable whether R. Ḥiyya's seconds are infinite, *i.e.*, whether the prohibition is endless, both on the ascent and the descent, or whether it stops at the point described (*ib.*). Rab is of the opinion that the prohibition stops with the wife of a mother's brother [24], and goes no further, even on the father's side; nor above the wife of a father's brother on the mother's side [23]; nor below a daughter's daughter-in-law [26]. Ze'era permits the wife of the father of a mother [22] (*ib.* 21a). Rab denies this permission, as it might be mistaken to refer to the wife of a father's father, whereas she, as well as the wife of any of a father's direct ancestors, to the infinite degree, is prohibited. Ze'era, however, thought there was no chance for an error, as a man is not in the habit of visiting his mother's family in like manner as his father's (*ib.*). Beyond the line of seconds, affinitive incest, according to Rab, stops, but consanguinitive incest is infinite. Accordingly the marriage of any of the direct descendants of Abraham with any of those of Sarah, to the end of humanity, would be prohibited (Yer. Yeb. ii. 4).

Bar Ḳappara adds to the seconds the mother of the father of one's mother [33], and the mother of the father of one's father [34], and thinks that incest stops both above and below the line of seconds. R. Ḥanina, however, is of the opinion that the seconds which are specifically mentioned include merely those with whom the natural length of human life allows marriage to be thought of as a probable contingency; but the prohibition extends to infinity, except in the case of a mother's father's wife (*ib.*).

Rab rules as a second a male whose female prototype is prohibited in the Mosaic law, and thus includes among the seconds the wife of a father's or mother's brother [23] and [24]; also his son's or daughter's daughter-in-law [25] and [26] (*ib.*); but he excepts the wife of a father-in-law (*40*) and the wife of the son of a mother-in-law or father-in-law, or the wife of the son of a stepson; these are permitted, for the reason that in these cases the affinity is not direct, but requires two distinct marriages to

bind the kinship (Yeb. 21b). There is no incest between one's wife and his stepson, nor between his stepson and his daughter, although a stepdaughter is prohibited in the Bible (Tosef., Yeb. ii. 3); nor between two stepchildren, that is, one his own and the other his wife's, who may intermarry, though they both live in the same house. R. Eleazar, however, prohibited their marriage for appearance's sake, and R. Ḥanina would permit it only in a place where the parties are unknown as stepchildren (Yer. Yeb. ii. 4). Amemar permitted the wife of the brother of a father's father (*37*), and the sister of a father's father (*38*); while other authorities prohibit them (Yeb. 21b). The authorities agree on the prohibition of the son's son's daughter-in-law infinitely, on the ground that the inheritance line is continuous on the son's side, and because father and son usually visit each other, whereas on the daughter's side both the inheritance and the visits cease (Tosafot, *s.v.* שניות; Yeb. 22a).

The principal reason for prohibiting the great-grandmother, though she is not on the inheritance line, is because she is likewise called "grandmother" (אימא רבתא). A similar reason is applied to the great-granddaughter. R. Ḥana derives the prohibition against the third generation, both ascending and descending, from the specific proscription against the wife's grandchild in Lev. xviii. 17 (Yer. Yeb. ii. 4). Some authorities prohibit the grandmother's sister (*39*) and also the marriage of a man to the wife of the former husband of his wife (*41*) ("Tif'eret Yisrael" to Yeb. ii. 1).

David took Rizpah, the wife of his father-in-law Saul (II Sam. xii. 8), which is permitted according to the Biblical law, though R. Ḥanina prohibits a wife's stepmother for appearance's sake (Yer. *l.c.*). But the Talmud Babli permits a father-in-law's wife. The Babylonian Talmud is less strict in regard to the degree of relationship which renders a marriage incestuous than the Jerusalem Talmud, a difference which furthermore divides the Sephardim from the Ashkenazim ("Bet Yosef" to Ṭur Eben ha-'Ezer, xv. 39a). The former, led by Maimonides, are guided by the Babylonian Talmud, while the Ashkenazim, headed by Asheri and Caro, concur with the Jerusalem Talmud.

The later authorities in Europe were even more rigid, as the condition of their countries and the development of the time warranted a stricter observance of the law against incest. Thus Rabbenu Tam in France stopped the marriage of a man to the wife of his father-in-law, and spoiled the banquet and all preparations for the wedding (*ib.*). Yet the Sephardim permit such a marriage. In a case presented to Rabbi Nathanson he rules to prohibit it (Responsa, "Sho'el u-Meshib," iii., No. 29), and where the marriage has already taken place would compel the husband to divorce his wife; making an exception, however, if she has borne him children, so as not to reflect on their legitimacy. The responsum is dated 1857.

There is a difference between Maimonides, who is against, and Asheri and Caro, who are for, the infinite extension of the prohibition beyond the line of seconds of the wife's ancestors and descendants to the third generation, also below the third generation on the man's side, except the daughter-in-law from son to son. But all authorities agree that the man's parental line is infinite except in cases indicated.

The majority of the rabbis permit the illegitimate (seduced) wife of a father or of his son. R. Judah prohibits the former (Yeb. 4a). But the decision is against him, though there is no question as to the prohibition of an illegitimate daughter or granddaughter. Cousins german are permitted to marry, and to marry the daughter of a sister (a niece) is even advised as a meritorious act (Yeb. 62a, and Rashi).

The difference between the principal (Biblical) degrees of incest and the rabbinical seconds is that the marriages involving the former are considered illegal, requiring no divorce, and the issue is declared illegitimate, while the marriages involving the latter must be dissolved by a divorce, and the children are legitimate (Shulḥan 'Aruk, Eben ha-'Ezer, 16, 1). Incest by affinity is disregarded when the first marriage is not legal (Yeb. 94b).

Prior to the enactment of the Mosaic law on Sinai, a Noachid was prohibited only the natural degrees of incest, such as were later capitally punished by the Jews (Sanh. 57b). Maimonides enumerates them as follows: marriage with (1) mother, (2) father's wife, (3) married woman, and (4) sister on the mother's side ("Yad," Melakim, ix.). Hence Abraham was permitted to marry his half-sister on the father's side, and Jacob might marry two sisters because these cases were not contrary to the natural law, although they were later prohibited by the laws of Moses. It should be noted that the Noachian law was more rigorous on the mother's side and the Mosaic law stricter on the father's side, as the former was based on nature and the latter on the civil law of inheritance and social connections.

Special rules were made for teaching the laws of incest: "Whoever puts a different interpretation upon 'arayot at the public reading of the Pentateuch shall be stopped" (Meg. vi. 9). The teacher must explain the various grades of incest to each student separately; therefore "'arayot shall not be taught in public" (Ḥag. ii. 1), as one might be inattentive and misinterpret the Law. The chapter on incest (Lev. xviii.) is read on the most solemn day, Yom Kippur, to impress the public with its importance.

[Reference-numbers in parentheses in the article INCEST correspond with names of relatives printed in capitals in table; those in brackets with the names in small letters; those in italics with the names in italics.]

S. S. J. D. E.

——**Karaite View:** Among the points on which Karaites and Rabbinites were divided was the interpretation of the Biblical laws concerning incest. Applying to these laws the hermeneutic rule of analogy ("heḳesh"), Anan, the founder of Karaism, was more strict than the Rabbinites, who laid down the principle that the laws concerning incest were not subject to the hermeneutic rules of interpretation. Anan's immediate successors went still further. Assuming the principle that husband and wife are to be considered legally as one person, the Karaite expounders of the Law, known as "ba'ale ha-rikkub," prohibited the marriage of the husband to the wife's relatives, regarding them as being related to him in the same degree as they are to her. On the same principle, the prohibition was extended to the relatives of the second, third, or fourth husband of a divorced wife. A stepsister, because of the name "sister," was classed by them as a sister, the prohibition being made to apply to her relatives as well as to those of a real sister. The Biblical prohibition of Lev. xviii. 17 applies, according to them, not only to a wife's direct daughter, but also to her stepdaughter, and even to her husband's stepdaughter.

Reforms of Joseph ha-Ro'eh.

In the eleventh century two expounders of the Law, Joseph ha-Ro'eh and his pupil Jeshua, started a reform movement. They refuted the arguments upon which the ba'ale ha-rikkub based their principle that husband and wife are to be considered as one person, and rejected their prohibitions based on "appellation," *e.g.*, the prohibition against marrying a stepsister on account of the name, and the prohibition derived "by inversion," as that of marrying a woman and her stepdaughter. Only the prohibitions enumerated in the Pentateuch and those derived from them by the application of the hermeneutic rule of analogy were recognized by Joseph ha-Ro'eh and Jeshua, whose views were ultimately adopted by all Karaites.

These prohibitions, both expressed and derived, are divided into five categories according to Joseph, into six according to Jeshua. To the first category belong those referring to the six relatives known in legislation as שאר (= "issue of flesh"), namely, mother, stepmother, sister, sister-in-law, daughter, and daughter-in-law. Of these prohibitions, five are expressed and one (that of the daughter) is derived. According to Jeshua, the prohibition in this category is infinite, both in the ascending line (*e.g.*, grandmother, great-grandmother, etc.), and in the descending (*e.g.*, granddaughter, great-granddaughter, etc.). The second category comprises the prohibitions of relatives in the second degree (שאר שארו), namely, aunt (father's side or mother's side, by blood or by alliance), granddaughter (by son or daughter), and son's or daughter's daughter-in-law. The prohibition in this category is infinite in the direct line, but stops at the point described in the collateral line. To the third category belong the prohibitions against marrying two women who are related in the first degree, as mother and daughter, sisters, sisters-in-law, a mother and her daughter-in-law.

By analogy the prohibition is extended to the "rivals" of the prohibited women, as the wife of the mother's, sister's, and sister-in-law's husband. The fourth category prohibits marrying two women who are related in the second degree, namely, grandmother and granddaughter (by the son or by the daughter), aunt and niece (father's side or mother's side), grandmother-in-law and granddaughter-in-law (by the son or by the daughter).

The fifth category prohibits the marriage of parallel related pairs, as of a father and son respectively to a mother and daughter, or to two sisters; of two brothers to mother and daughter, or to two sisters or two sisters-in-law; the prohibition affecting both the ascending and the descending lines, the direct and the collateral lines. Stepbrothers are considered as brothers, and the prohibition contained in this category is applied also to them.

The sixth category prohibits marrying a woman one of whose relatives in the first degree, as, for instance, her mother, or her daughter, has married one's relative in the second degree, as, for instance, a grandfather, grandson, or uncle. Jeshua infers from the omission of the word שאר (= "kinswoman") in Lev. xviii. 14 that "brother" includes the stepbrother, to whom the prohibition contained in the sixth category is extended.

INCUNABULA: Works printed in the fifteenth century. Those of Jewish interest consist of (*a*) works printed in Hebrew and (*b*) works in other types relating to Jewish subjects. Of the former about 101 can be traced as certainly printed before 1500; or exactly 100 if the Isaiah and Jeremiah with Ḳimḥi (22*) is merely the first part of the Guadalajara Later Prophets of 1482 (26). Both have thirty-three lines to the page. The number of incunabula is reduced to 99 if the Brescia Pentateuch of 1493 (91) be regarded as a part of the Bible of 1494. There are, besides these, eight incunabula of which either no copy is known or the time and place of publication can not be definitely determined. A list of ascertained incunabula is given in tabular form on pp. 578 and 579, and to these may be added the last-mentioned eight, which include the Talmud tractates Ketubot, Giṭṭin, and Baba Meẓi'a, each printed separately by Joshua Soncino in 1488–89, and of which no copy is known to exist. The same fate has met all the copies of the Leiria edition of the Early Prophets (1494). There is also a siddur of the Roman rite, probably published by one of the Soncinos, and, from its type, likely to be of the fifteenth century. This was first described by Berliner ("Aus Meiner Bibliothek," p. 58); a copy is possessed by E. N. Adler of London, and an incomplete copy is in the library of Frankfort-on-the-Main. In addition, there are two editions of Maimonides' "Mishneh Torah," one possibly printed in Italy in the fifteenth century, a copy of which is in the library of the Vienna community; the other, parts of which Dr. E. Mittwoch of Berlin possesses, was probably printed in Spain.

Date of First Printing.

The date at which printing in Hebrew began can not be definitely established. There is a whole series of works without date or place (12–21) which experts are inclined to assign to Rome (where Latin printing began in 1467), and any or all of these may be anterior to the first dated work, which is an edition of Rashi's commentary on the Pentateuch, published in Reggio, Calabria, by Abraham Garton, Feb. 5, 1475. It may be assumed that the actual printing of this work took some time, and that it was begun in the latter part of 1474. Even this must have been preceded by the printing of the four parts of the Ṭurim of Jacob b.

---

* Numbers in parentheses refer to the list on pp. 578 and 579.

Asher, finished July 3, 1475, in Piove di Sacco by Meshullam Cusi, which must have taken considerably longer to print than the Rashi. It is exceptional for Hebrew works to be dated at all before 1482, but from that time onward to 1492, during which decade two-thirds of the Hebrew incunabula were produced, most of them are dated. With the expulsion from Spain in 1492 the Hebrew printing-presses in that country were stopped, and those in Italy and Portugal produced only about a dozen works during the remainder of the century.

Places of Printing.

Hebrew books were produced in the fifteenth century only in the Italian and Iberian peninsulas, though several of the printers were of German origin, as Abraham Jedidiah, the Soncinos, Ḥayyim ha-Levi, Joseph and Azriel Gunzenhauser. The period under review was perhaps the nadir of Jewish fortunes in Germany. Expulsions occurred throughout the land, and it is not to be wondered at that no Hebrew presses were started in the land of printing. In all there are known seventeen places where Hebrew printing took place in the fifteenth century—eleven in Italy, three in Spain, and three in Portugal, as may be seen from the following list, which gives in chronological order the places, the names of the printers, and numbers (in parentheses) indicating the works printed by each, the numbers having reference to the table on pp. 578, 579.

ITALY.

1. **Reggio**, Calabria; 1475; Abraham Garton (1).
2. **Piove di Sacco;** 1475; Meshullam Cusi (2).
3. **Mantua;** 1475-80; Abraham Conat (3, 7, 8, 9, 11, 23); Estellina Conat (10); Abraham of Cologne (11).
4. **Ferrara;** 1477; Abraham dei Tintori (4, 5).
5. **Bologna;** 1477-83; Ḥayyim Mordecai (6); Hezekiah de Ventura (6); Abraham dei Tintori (25, 28).
6. **Rome** (?); before 1480; Obadiah (12, 13, 14, 18); Manasseh (12, 13, 14); Benjamin (12, 13, 14); Solomon b. Judah (18); . . . (15, 16, 17, 21, 22, 24).
7. **Soncino;** 1483-95; Joshua Solomon Soncino (29, 30, 31, 32, 33, 34, 36, 37, 38, 40, 41, 47, 48, 50, 51, 52, 56, 57, 58, 60); Gershon b. Moses Soncino (55, 71, 75, 90); Solomon b. Moses Soncino (64, 95, 96, 97).
8. **Casal Maggiore;** 1486; Joshua Solomon Soncino (42).
9. **Naples;** 1486-92; Ḥayyim ha-Levi (39); Joseph b. Jacob of Gunzenhauser (43, 46, 53, 61, 62, 70); Yom-Ṭob b. Perez (61, 62); Solomon b. Perez (61, 62); Isaac ben Judah ibn Katorzi (72, 73, 78); Joshua Solomon Soncino (74, 76, 77, 86); Azriel Gunzenhauser (81, 87); . . . (54, 69, 85, 89).
10. **Brescia;** 1491-94; Gershon Soncino (80, 84, 91, 92, 94).
11. **Barco;** 1497; Gershon Soncino (100, 101).

SPAIN.

1. **Guadalajara;** 1482; Solomon ibn al-Ḳabiẓ (26, 27).
2. **Ixar;** 1485-95; Eliezer Alantansi (35, 45, 68, 99); Solomon Salmati b. Maimon (65).
3. **Zamora;** 1487 (1492); Samuel b. Musa (44); Immanuel (44).

PORTUGAL.

1. **Faro;** 1487; Don Samuel Giacon (49).
2. **Lisbon;** 1489-92; Eliezer Toledano (59, 67, 79, 83); Eliezer Alantansi (63); . . . (66, 82).
3. **Leiria;** 1492-95; Abraham d'Ortas (88, 93, 98).

Printers.

As to the personal history of the printers enumerated in the list above very few details are known. Abraham Conat was a physician whose wife also was interested in printing: she produced the first edition of the "Beḥinat 'Olam." Garton, Cusi, and Giacon appear to have produced their works as a labor of love rather than for profit. Abraham dei Tintori, the Soncinos, and the Gunzenhausers, on the other hand, seem to have regarded their craft as a means of livelihood. The Soncinos, indeed, printed books in other characters than Hebrew (see SONCINO), as did also Abraham d'Ortas. There does not appear to have been much competition, though it is remarkable how invariably the choice of publishers fell within a limited class of works. In one case, however, two printers of the same city opposed each other with an edition of the same work. In Aug., 1490, Joseph Gunzenhauser produced at Naples an edition of Ḳimḥi's "Shorashim"; on Feb. 11, 1491, the same work was produced, as Zedner states, by Isaac b. Judah b. David Katorzi, who, according to Proctor, was also the printer of the Naples Naḥmanides of 1490. It would seem also that the two Pentateuchs of Ixar, 1490, were produced by rival printers.

Typographical Details.

All forms of Hebrew type were used in this period, the square, the Rashi or rabbinic (in which the first dated work was entirely printed), and the so-called "Weiberteutsch" (in which the later Yiddish works were printed); a primitive form of this last had already been used in the Psalms of 1477. Different sizes of type were used as early as the Ṭurim of Piove di Sacco, which uses no less than three. The actual fonts have not yet been determined, and until this is done no adequate scientific treatment of the subject is possible. A beginning, however, has been made by Proctor. Generally speaking, a more rounded form was used in Spain and Portugal (perhaps under the influence of Arabic script) than in the Italian presses, whose types were somewhat Gothic in style. It has been conjectured that the Spanish printers used logotypes in addition to the single letters. The Soncinos and Alantansis used initials; in other presses vacant spaces were left for them to be inserted by hand. Vowel-points were only used for Scripture or for prayer-books, and accents seem to have been inserted for the first time in the Bologna Pentateuch of 1482 (25). Special title-pages were rare; colophons were usually short. Borders were used by the Soncinos, as well as by Toledano at Lisbon and D'Ortas in the Ṭur of 1495 (see BORDERS; COLOPHON; TITLE-PAGE). Illustrations were only used in one book, the "Mashal ha Ḳadmoni" (75). Printers' marks appear to have been used only in Spain and Portugal, each of the works produced in Ixar having a different mark. Of the number of copies printed for an edition the only detail known is that relating to the Psalms with Ḳimḥi in 1477, of which three hundred were printed. If this number applies to many of the incunabula, it is not surprising that they are extremely rare at the present day. Twenty of them exist only in a single copy; most of the rest are imperfect through misuse or have been disfigured by censors.

A majority of the examples still extant exist in seven public libraries (British Museum, London; Columbia University, New York; Bibliothèque Nationale, Paris; Bodleian, Oxford; Frankfort City Library; Biblioteca Palatina, Parma; Asiatic Museum, St. Petersburg) and seven or eight private collections (E. N. Adler, London; Dr. Chwolson, St. Petersburg; A. Freimann, Frankfort; Dr. M. Gas-

Location.

ter, London; Baron Günzburg, St. Petersburg; H. B. Levy, Hamburg; Mayer Sulzberger, Philadelphia). The numbers included in each of these collections are given in the following lists, with the letters by which they are indicated in the table on pp. 578, 579. Each of the following lists has been checked and authenticated by the librarian or owner of the collection, and is here published for the first time. The remaining locations are mentioned in the table only in sporadic instances, and do not profess to exhaust the incunabula contained in such collections as those of Amsterdam, Berlin, Breslau, Carlsruhe, Munich, etc. Dr. N. Porges of Leipsic and Dr. Simonsen of Copenhagen are also understood to have collections.

P.	St. Petersburg (33)	9, 11, 17, 18, 31, 32, 33, 36, 37, 38, 40, 42, 50, 52, 53, 55, 59, 60, 62, 63, 64, 69, 71, 72, 73, 79, 80, 81, 86, 87, 88, 89, 93.
Pr.	Parma (61)	1, 2, 3, 4, 6, 9, 11, 13, 14, 16, 17, 18, 19, 20, 21, 22, 24, 25, 28, 29, 31, 33, 35. 37, 38, 39, 40, 42, 44, 45, 46, 53, 54, 55, 58, 59, 60, 61, 63, 64, 65, 70, 71 72, 73, 74, 76, 77, 78, 79, 80, 81, 82, 83, 84, 88, 89, 93, 94, 99, 100.
S.	Sulzberger (45)	2, 3, 6, 9, 11, 12, 15, 16, 18, 24, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 43, 45, 46, 55, 59, 60, 61, 63, 64, 69, 70, 71, 72, 73, 75, 78, 80, 81, 83, 86, 87, 89, 94, 95.

But few details are known as to the actual prices paid for some of these works. It would appear that Reuchlin paid three Rhine gulden for the Naples Naḥmanides of 1490 and the Former Prophets with Ḳimḥi (Soncino, 1485), and twice as much for the Soncino Bible of 1488. A note at the end of De Rossi's copy of the Guadalajara Ḳimḥi of 1482 states that three carline were paid for it in 1496 by the owner of that date.

Choice of Books.

The subject-matter of the works selected for the honors of print was on the whole what might have been anticipated. First came the Bible text, either a part (19, 30, 49, 68, 74, 77, 84, 91, 92, 93) or the whole (51, 76, 94). A large number of Bible commentaries was printed, including those of Abraham ibn Ezra (53), Baḥya ben Asher (87), David Ḳimḥi (6, 22, 37, 40, 46, 83), David ibn Yaḥya (82), Immanuel of Rome (39), Levi b. Gershon (4, 11, 16), Naḥmanides (14, 59, 72), and Rashi (1, 12, 25, 28, 44, 48): some of the works contained a combination of commentaries (43, 65, 79, 88). Then came the Mishnah (86) and parts of the Talmud (29, 30, 56, 57, 58, 60, 90). As further aids to these were grammars (54, 85), Ḳimḥi's Bible lexicon (21, 73, 78), and the Talmud lexicon of Nathan b. Jehiel (13). Next in popularity to Bible and Talmud came the halakic works, especially the codes of Jacob b. Asher (2, 3, 5, 27, 35, 45, 64, 67, 98)—the most popular single work—Maimonides (18, 71), and Moses de Coucy (15, 55), together with the "Agur" (89) and Kol Bo (69). To these may be added the solitary volume of responsa, that of Solomon ben Adret (17).

After law came prayers, of which a considerable number were printed (36, 41, 42, 47, 63, 95, 96, 97, 100); and to these may be added the tables of day durations (23) and Naḥmanides' "Sha'ar ha-Gemul" (70). Ethical works were moderately frequent (10, 31, 32, 53, 60, 61, 62, 66), which only two philosophical works received permanent form in print, Maimonides' "Moreh" (24), and Albo's "'Iḳḳarim" (38). Very few belletristic works appeared (75, 80); history is represented by Eldad ha-Dani (7) and the "Yosippon" (8); and science by Avicenna (81), in the most bulky Hebrew book printed in the fifteenth century. It is characteristic that the only book known to be printed during its author's lifetime was the "Nofet Ẓufim" of Judah b. Jehiel (9), one of the few Hebrew works showing the influence of the Renaissance. It is doubtful whether Landau's "Agur" was issued during the author's lifetime, though it may have been printed with the aid of his son Abraham, who was a compositor in Naples at the time. Very few works went into a second edition, Maḥzor Romi (36, 42, 95) and the tractate Beẓah (30, 90) being the chief exceptions. The reprinting of Beẓah seems to show that this treatise was the one selected then, as it is now, for initial instruction in the Talmud.

As regards the second class of incunabula of Jewish interest—such as were printed in other languages than Hebrew—these have never before been treated, and only a few specimens can be here referred to. They deal with topics of controversial interest, as the "Contra Perfidos Judeos" of Peter Schwarz (Eslingen, 1475), his "Stella Meschiah" (*ib.* 1477), and the well-known "Epistle" of Samuel of Morocco (Cologne, 1493). Two earlier tractates deal with the

legend of Simon of Trent (Hain, Nos. 7,733, 15,658), while there exists in Munich an illustrated broadside relating to the blood accusation at Passau, printed as early as 1470. Folz's "Die Rechnung Kolpergers von dem Gesuch die Juden" (Nuremberg, 1491; Hain, No. 7,210) may also be referred to. Chief among the incunabula of this kind, however, are those of Latin translations of the medieval Jewish scientists and philosophers, as that of Abraham ibn Ezra, "De Nativitatibus" (1485, Venice), of Bonet de Latis, Astronomy (1493, Rome), of Maimonides, Aphorisms (Bologna; Hain, No. 10,524), and of Israeli, "De Particularibus Diæctis" (Padua, 1487). One of the most interesting of Latin incunabula is the version of Abraham Zacuto's tables published in Leiria by Abraham d'Ortas (1496).

G. J.

INDEMNITY: That by which a surety who has been compelled to pay the debt of his principal is reimbursed, either by the principal or from other sources. The rabbinic law recognizes the surety's right to reimbursement (B. B. 174a, b), and also, in certain cases, his right to take steps, before the maturing of the debt, to secure himself against loss. The surety can not recover in case of dispute, unless he has witnesses to the fact that he has paid a debt on behalf of the principal; the production of the joint bond is not sufficient, unless a receipt by the creditor is attached showing that the bond was satisfied by the surety. Where the fact of debt depends for proof upon oral evidence, there must be also proof, by witnesses or by the debtor's admission, of the fact of suretyship.

The right to recover from the debtor's land, sold or encumbered after the date of the bond (see Deed), does not pass by subrogation to the surety upon payment alone; the bond which carries this right must be formally assigned and delivered to him by the creditor, unless the surety has a separate bond of indemnity from the debtor in which he (the debtor) subjects himself and his estate to the surety upon the surety's payment. Should the surety pay the joint bond, but leave the document in the hands of the creditor, he can not recover from the principal, for he is guilty of gross neglect toward him.

Should the surety pay the debt and the principal debtor die before the surety can recover from him, in order to recover from the principal's heirs the surety must show that the principal has not paid the debt himself. He may show the admission of the debtor shortly before his death; or he may show that the debtor actually died under the ban for nonpayment (see Execution).

Should the surety pay the debt after the principal has paid it, he has no remedy; but if the creditor brings proof that he has not been satisfied, and the surety pays under compulsion, the debtor, as the cause of the loss, must reimburse the surety. The law on this subject is, however, full of exceptions and disputed points, and is of little practical value.

What applies to the surety holds good in the case of the "ḳablan," or "undertaker" (one who in form is the principal contractor, though the consideration moves to another; as when A buys in his own name goods that are delivered to B). It also holds good of joint contractors or joint sureties; for each of them is to the extent of half (or some other share, proportionate to the number of sureties) the surety of the other or others, and has therefore the right to reimbursement for whatever he is compelled to pay beyond his just share.

A surety, or ḳablan, who finds that the debtor is wasting his estate can, even before the maturity of the debt, apply to the court for indemnity against the debtor, so as to be secured against the latter's default. A remedy of this sort (an attachment for a debt not due) is wholly unknown to the Talmud, and, like Foreign Attachment, grew up in the age of the Geonim to meet the necessities of times when the Jews were no longer farmers and land-owners, but acted as money-lenders and traders. Whether the surety can, upon the maturity of the debt, call upon the creditor to collect from the principal, and whether the surety is exempt from liability in the event of the creditor's refusal to bring suit, are matters nowhere discussed in the Talmud, and are subjects of dispute among the later authorities.

INDEPENDENT HEBREW, THE. See Periodicals.

INDIA: An extensive region of southern Asia, comprising many countries, races, and sects. Including about 2,800 in the settlement of Aden, which is administered by the presidency of Bombay, there are at present about 21,000 Jews in the whole of India. This number is an insignificant fraction of a population amounting to more than 280,000,000. According to the census of 1901, the following are the official numbers of Jews residing in the various states of India in that year:

Assam	1
Baluchistan (Districts, etc.)	48
Baroda	8
Bengal	1,939
Bengal States	7
Berar	3
Bombay	12,928
Bombay States	991
Burma	685
Central India	24
Central Provinces	127
Hyderabad	13
Madras	45
Madras States	1,288
Mysore	34
North West Frontier Province	4
Punjab	14
Punjab States	10
Rajputana	5
United Provinces	54

From very early times India has been accessible to the West. The navies of Kings Hiram and Solomon possibly visited India; for it is stated that they brought back gold, silver, ivory, apes, and peacocks (I Kings x. 22). These are all Indian products, especially peacocks; and it is interesting to note that the Hebrew word for "peacock," "tukkiyyim," is of Dravidian origin. Caravans of Indian wares passed over the Palestinian frontier in ancient times. The Midianite merchants who purchased Joseph were importing spices, balm, and myrrh.

The Jews of India comprise both Whites and Blacks: the former being racially pure; the latter, of mixed descent. To the White Jews belong the so-called "Jerusalem Jews" of Cochin, who have been reenforced by coreligionists from Europe, and a part of the Beni-Israel of Bombay. The Black Jews are descended from converts from the Hindu race, or are the offspring of marriages between Jews and natives. Just as the Eurasian descendants of the Portuguese of Goa resemble the natives in the color of their skin, so do the Jewish offspring of mixed unions.

The Cochin Jews claim to have come to Malabar from Jerusalem after its destruction, and to have settled at Cranganore, a few miles north of their present location. There they acquired, about 750, a feudal property, sometimes dignified as a "state" (see, however, COCHIN). In 1523 the Portuguese seized Cranganore and fortified it. According to Zain al-Din al-Ma'bari, the Mohammedans in the following year attacked the Jews near Cranganore, and, after killing many of them and destroying their synagogues, drove them with the Portuguese out of the town. The ruin of the Jewish fief, after its existence for a thousand years, was brought about by strife between the White and the Black Jews. One tradition states that there arose dissensions between the brothers of the ruler's household, and one of them sought the aid of a powerful raja, who drove out the Jews or enslaved them. Neither Zain al-Din nor Moens (the latter was the Dutch governor of Cochin from 1771 to 1782) mentions this fraternal struggle. Whichever story is correct, it seems that Joseph Azar, the seventy-second and last feudal ruler, fled with a few faithful followers to Nabo and thence to Cochin. Their flourishing city, which, according to Alexander Hamilton's account, had contained 80,000 families, was ruined, and the survivors went to Cochin. Even to-day the site of Cranganore is avoided by the Jews. Joan Hugo von Lindschotten, a Dutchman, visited Cochin at the end of the seventeenth century. He says: "In Cochin the Jews have fine stone houses; they are first-rate merchants, and are advisers to the king. They possess a synagogue."

In 1662 the Portuguese killed many of the Cochin Jews on account of the sympathy with the Dutch which they had shown when the Dutch ineffectually attacked the city. The following year Cochin was taken by the Dutch, and the Jews received religious liberty. In 1685 the Dutch Jews sent a commission from Amsterdam to investigate the condition of the Jews of Cochin. The report appeared in 1697 under the title "Notisias dos Judeos de Cochim Mandadas por Mosseh Pereyra de Paiva." In 1795 the English became possessors of Cochin. For further particulars of the Cochin Jews and for an account of the Beni-Israel, see BENI-ISRAEL; COCHIN.

Benjamin of Tudela's itinerary contains one of the earliest descriptions of the Black Jews of India. According to him, about 1,000 families lived "in the land of pepper, cinnamon, and ginger." He describes them as honest people who follow the Ten Commandments and the Mosaic code, who read the Prophets, and are good Talmudists and strict observers. Benjamin made his journey between the years 1160 and 1174. Many merchants, sailors, and travelers must have visited India. The Jew Gaspar de las Indias became admiral to Sabayo, the Moorish ruler of Goa, in the fifteenth century. More than one Jew sailed with the flotillas of the Portuguese. Hucefe was the most intimate friend of Alfonso d'Albuquerque. A recent traveler was Rabbi David di-Bet Hillel of Safed, whose travels were published in English at Madras in 1832. G. O.

The first foreign Jew to settle in India was Jacob Semah of Bagdad. He settled at Surat about 1680, where the first English factory was built, and was followed by several more from the same region. Others came from Persia and southern Arabia. A small synagogue was erected and a cemetery acquired. Seeing Bombay growing in commercial importance, Semah removed the seat of his business thither. The synagogue at Surat is now demolished, but the cemetery remains. The new settlers in Bombay were very hospitably received by the Beni-Israel.

An early settler was David SASSOON of Bagdad. Compelled to flee from his native place on account of persecution, he sought refuge in Bombay under British rule. Beginning with little capital, he built up a world-wide business, and almost held the monopoly of the opium trade with China. About fifty years ago nearly all the Jews of Bombay were dependent upon the Sassoon family for their livelihood; but their position is now considerably improved, and they are a body of great commercial importance. There are a few petty merchants and hawkers among them. There are only two Jews in the employ of the government: one in the customs, the other in the engineering department of the municipality.

In Bombay there is a ḥebra ḳaddisha, of which Jacob Elias David Sassoon is the president. Though its chief object is the assistance of the poor Jews of Palestine and Bombay, it seems to have given rise to much the same condition of affairs as the Palestine ḥaluḳḳah. The Sassoon family and others regularly distribute aid to the Jewish poor of the city, and Jacob Elias David Sassoon has bestowed the sum of 75,000 rupees for the erection of a building, the income of which is to be used exclusively in the aid of poor Jews. The Beni-Israel poor are totally excluded from any share in these charities.

The members of the community have no competent rabbis for their religious guides; there are a few, however, who are acquainted with the Gemara and the Shulḥan 'Aruk. Their views are strictly Orthodox. Most of them are from Bagdad. On account of their poverty the poor are sometimes led to change their faith and to accept Christianity, which they abjure as soon as they find some better means of support. They are careful for the Hebrew education of their children. Toward the end of the year 1855 David Sassoon opened a school in which English, Hebrew, and Arabic were taught. In 1860 it was removed to a spacious building with large classrooms, built by David Sassoon in the compound of the Magen David Synagogue at Byculla.

The vernacular of the Beni-Israel is Mahrati; that of the Cochin Jews, Malayalam. The Jews from Bagdad, Syria, and southern Arabia use Arabic; and there are Jews from Persia who speak Persian.

There are also small communities of German, Austrian, and Rumanian Jews who employ the languages of their respective countries. Most of the Arabic-speaking portion of the community is now adopting the use of English. The European Jews holding high government and mercantile offices do not associate much with the others. See BENI-ISRAEL; CALCUTTA. J. E.

INDIANA: One of the Central States of the American Union; admitted 1816. The earliest Jewish congregation, the Achduth Vesholom congregation, was established at **Fort Wayne** in 1848. Fort Wayne now (1903) has a second congregation, Shearith Israel, founded in 1878, and a social club. Congregation Ahavath Achim was established at **Lafayette** in 1849 (present rabbi, Morris Feuerlicht, his predecessor having been Joseph Leiser). Lafayette has a second congregation and a social club.

In 1853 the Congregation Bnai Israel was established at **Evansville** (Israel Klein, present rabbi). The first Jewish inhabitants were Abraham Oppenheimer and Sigmund Redelsheimer, who took up their residence there in July, 1840. The first birth occurred in 1846, and the first marriage a year later. In 1848 the congregation Acheluth Veshalum was founded, with twelve members, and in the same year the Broadway Cemetery was purchased, though the first burial did not occur for two years. The present cemetery was purchased in 1885. In 1856 the first temple was dedicated, and the corner-stone of the present temple was laid in 1874, the dedication taking place a year later.

Among the communal societies are the Bikkur Cholim and Kevurath Methim; the Hebrew Relief Society, the Emek Berucha Lodge (founded in 1865), and the Standard Club. Evansville has another congregation, B'nai Moshe (founded 1880); a ladies' Hebrew benevolent society (founded 1859), a cemetery, and a social club. The rabbis of Evansville have been: Joseph Solomon, 1848; Rosenthal, Edward Rubin, 1864–81; Duschner, Israel Aaron, 1883–86; Tobias Schanfarber, 1887–88; Adolph Gutmacher, 1889–91; Samuel Hirshberg, 1891–95; Frederick Cohn, 1896. Among the local celebrities have been Charles Nirdlinger, author, and Mrs. Leopold Levy, wife of the ex-state treasurer. The occupations pursued by the community are commerce, manufactures, banking, and medicine.

Indianapolis, the capital of the state, has a Jewish population of about 4,000. Its first Jewish settlers were Moses Woolf, and Alexander and Daniel Franco, who went there from London about 1850. Its principal congregation was organized in 1856; services were held at first, under Rabbi M. Berman, in a rented room; before 1858 a hall was fitted up, in which, until 1861, Rabbi J. Wechsler officiated. In 1863 Isidore Kalish entered upon the rabbinate, which he occupied for one year. The corner-stone of the new temple was laid in 1865; in 1867 Rabbi M. Messing, the present incumbent, was elected. The building was dedicated Oct. 31, 1868. A new building, rendered necessary by the growth of the congregation, was dedicated Nov. 3, 1899. Indianapolis has four other congregations and various charitable societies, among them a ladies' benevolent society (founded 1859).

Of the other towns in the state, **Anderson** has holy day services; **Attica,** a congregation and burial-ground; **Columbia City,** holy day services; **Elwood,** holy day services and a ladies' Hebrew benevolent society; **Goshen** has a congregation, founded in 1878; **Kendallville,** holy day services; **Kokomo,** a small congregation; **Ligonier,** a congregation, founded in 1864 (present rabbi, Henry Englander, whose predecessor was Julius M. Magil; there are several benevolent and social organizations in Ligonier); **Logansport,** a congregation, founded in 1900; **Madison,** a congregation and a burial-ground; **Marion,** a congregation and a club; **Michigan City, Mount Vernon,** and **Muncie,** a congregation each; Muncie has also a ladies' aid society and a literary association; **Peru,** a congregation, founded in 1870; **South Bend,** a congregation and a ladies' benevolent society; **Terre Haute,** two congregations—Temple Israel (founded in 1890; Emil W. Leipziger, rabbi) and B'nai Abraham (Reuben Horwitz, rabbi); **Vincennes** and **Wabash,** a congregation each.

The Jewish population of the state is estimated at 25,000.

INDIANAPOLIS. See INDIANA.

INDICTMENT. See ACCUSATORY AND INQUISITORIAL PROCEDURE.

INFAMY. See EVIDENCE.

INFANCY, LEGAL ASPECT OF: Infants, the deaf, and those of unsound mind are always named together, as not liable for torts, nor punishable for offenses, nor competent as witnesses (see ACCIDENT; ASSAULT AND BATTERY; EVIDENCE). For the difficulties encountered in suing infant heirs see DEBTS OF DECEDENTS. The freedom of infants from punishment for crime seems to be silently admitted. There is therefore no need to discuss anything but the validity of contracts (see ALIENATION). A boy over thirteen, and a girl over twelve, years old are of age, provided signs of puberty exist.

The age of competency to contract differs with the kind of contract. A child having no guardian may buy and sell movable property (Giṭ. v. 7); the very rare word "pe'uṭot" (= "children") used here is explained (Giṭ. 59a) to refer to children between six and ten, according to their capacity for business, and the child is given this power in order that he may obtain food and raiment. But later amoraim add that such a child may also make gifts of movable property either "inter vivos" or "mortis causa"; though such ability can not be for his good. But a child that has a guardian, or, according to ReMA's gloss to Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 235, 2, one that is under the care of a householder, can neither buy nor sell without the guardian's or householder's consent. An infant can in no case dispose of land; but if he buys land, pays for it, and takes possession, he becomes the owner; though it is not clear that he may not rescind the purchase (B. B. 137b). An infant can not appoint an attorney; hence all alienations or acquisitions resting on an agency for the infant fall to the ground.

An infant can not become surety for the debt of another. Before the age of twenty an infant can not dispose of lands that have come to him by descent or by gift "mortis causa" (Giṭ. 65a), because a young person anxious to get money would sell his land too cheaply. In the purchase and sale of movable property, and in disposing of lands that have not come by descent or by gift "mortis causa," persons under twenty, though inexperienced in business, are considered as of age. In regard to an infant that has borrowed money, the opinion of later authorities (the Talmud being silent) is divided; some assert, others deny, his liability; while the best opinion distinguishes: if it can be shown that the money was borrowed for necessaries, the debt is binding; otherwise it is not; and if necessaries have been obtained on credit, the debt so incurred is binding. Suit, however, can be brought only after the infant comes of age.

Where an infant sells land, whether acquired or inherited, by deed attested, and dies, the heirs can not impeach the deed and recover the land (see B. B. 154a). But one who has sold ancestral land while under the age of twenty can reclaim it, either before or after that age (*ib.*).

INGATHERING, FEAST OF. See Tabernacles, Feast of.

INHERITANCE ("yerushah," "naḥalah").—**Biblical Data:** Among the early Hebrews, as well as among many other nations of antiquity, custom decided that the next of kin should enter upon the possession of the estate of a deceased person. The first-born son usually assumed the headship of the family, and succeeded to the control of the family property (see Primogeniture). When there were no sons, the dying man would appoint a trusted friend as his heir, sometimes to the exclusion of a near relative. Thus, Abraham, when he despaired of having children himself, was about to appoint his slave Eliezer as his heir, although his nephew Lot was living (Gen. xv. 3). Even when there were children, it was within the right of the father to prefer one child to another in the disposition of his property. Sarah, not wishing Ishmael to share in the inheritance with her son Isaac, prevailed upon Abraham to drive Hagar and her son out of her house (Gen. xxi. 10); and Abraham later sent away his children by concubines, with presents, so that they should not interfere in the inheritance of Isaac (Gen. xxv. 6). Jacob, however, as it appears, made no distinction between the sons of his wives and those of his concubines (Gen. xlix.), and included his grandsons Ephraim and Manasseh among his heirs (Gen. xlviii. 5, 6). There could have been no question in those days of a widow inheriting from her husband, since she was regarded as part of the property which went over to the heirs, as is shown by the stories of Ruth, Absalom (II Sam. xvi. 21, 22), Adonijah, and Abishag (I Kings ii. 22; see Levirate Marriage). Nor could there have been a question about daughters inheriting from their father, since daughters were given in marriage either by their father, or by their brothers or other relatives after the father's death, thus becoming the property of the family into which they married (see Daughter in Jewish Law). An exceptional case is mentioned: Job gave his daughters a share in his estate equal to that of their brothers (Job xlii. 15).

Case of Zelophehad.

As a result of the question raised by the daughters of Zelophehad, the following general rules of inheritance were laid down by Moses: "If a man die, and have no son, then ye shall cause his inheritance to pass unto his daughter. And if he have no daughter, then ye shall give his inheritance unto his brethren. And if he have no brethren, then ye shall give his inheritance unto his father's brethren. And if his father have no brethren, then ye shall give his inheritance unto his kinsman that is next to him of his family, and he shall possess it" (Num. xxvii. 8-11). Brief though this law is, it allows sufficient latitude for legitimate interpretation by the phrase, "unto his kinsman that is next to him." According to this provision, there are four degrees of hereditary succession—that of the son, the daughter, the brother, and the father's brother. In the case of the daughter, it is stated that when she becomes the heir of her father's estate, she shall marry in her own clan (Num. xxxvi. 6, 7). This restriction was later repealed by the Rabbis (Ta'an. 30b; B. B. 120a). On the right of the first-born to a double share in the inheritance (Deut. xxi. 17) see Primogeniture.

——**In Rabbinic Law:** In accordance with the principles that he who comes first in the order of hereditary succession transmits that right to his descendants, and that the father comes before all his descendants in hereditary succession (B. B. 115a), the Rabbis elaborated the incomplete provisions of the Bible and established the following order of legal heirs: (1) sons and their descendants; (2) daughters and their descendants; (3) the father; (4) brothers and their descendants; (5) sisters and their descendants; (6) the father's father; (7) the father's brothers and their descendants; (8) the father's sisters and their descendants; (9) the father's father's father; and so on (Maimonides, "Yad," Naḥalot, i. 1-3; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 276, 1). To this list, which they regarded as implied in the Biblical passages, the Rabbis added another legal heir, the husband, whose right to the inheritance of his wife's possessions was deduced from the term שאר (= "kinsman"; B. B. 111b).

Each of the sons of the deceased receives an equal share of the estate of his father or of his mother, except the first-born of the father, who receives a double share (see Primogeniture). A son born after the death of his father (Yeb. 67a), or one born of illegitimate connections ("mamzer"; *ib.* 22b), is also a legal heir to his father's estate, but the son born of a slave or of a non-Jewess is excluded (*ib.*; Naḥalot, i. 7, comp. iv. 6; Ḥoshen Mishpaṭ, 276, 6; comp. *ib.* 279, 6, and "Be'er ha-Golah," *ad loc.*). An apostate Jew does not lose his right of inheritance, although the court, if it sees fit, may deprive him of his share (Ḳid. 18a; Naḥalot, vi. 12; Ḥoshen Mishpaṭ, 283, 2).

Exceptions.

Where the laws of a non-Jewish state deprive a proselyte of the right of inheritance, the Jewish court may do likewise with an apostate (comp. responsa "Geone Mizraḥ u-Ma'arab" [ed. Müller, Berlin, 1888], § 11, and Weiss, "Dor," iv. 117, 129, and notes). In the case of the death of a son during his father's life, his children inherit his portion of the estate. If one of the sons dies before his mother, and leaves no children, his brothers of the same father but not of the same mother do not inherit the estate of his mother by reason of his right to it. But if he lives even for one hour after his mother's death, he becomes her heir, and on his death his brothers, as his heirs, inherit his portion of his mother's estate (B. B. 114b; Naḥalot, i. 13; Ḥoshen Mishpaṭ, 276, 5).

Where there are neither sons nor sons' children the daughters and their descendants become the rightful heirs. The Sadducees held that the daughter shared in the inheritance when there was only a daughter of a son living, but Johanan b. Zakkai and the other Pharisees decided that the son and all his descendants, whether male or female, should precede the daughter in the right of inheritance (B. B. 115b; comp. Tosef., Yad. ii. 9; Meg. Ta'an. 5). Among the Karaites the daughters always receive an equal share with their brothers in their father's estate (Fürst, "Gesch. des Karäert." part i., § 9, and note; comp. Shab. 116b). The Rabbis, while denying the daughters a share in the inheritance where there are sons, still make ample provision for their maintenance and support as long as they remain unmarried (see Daughter; Ketubah).

When there are no heirs in the descending line, the property is transmitted to the nearest relative in the ascending line. Although the father is not mentioned in the Bible among the legal heirs, the Rabbis did not hesitate to make him precede the brothers of the deceased, mentioned as the next heirs in the absence of either sons or daughters. Philo ("De Vita Moysis," iii. 32) gave as a reason for this omission that it would be an evil omen for father and mother to receive any gain from the inconsolable affliction of the loss of children dying prematurely, but he indirectly intimated their right to be invited to such an inheritance when he conceded it to the uncles (comp. B. B. 108b; Naḥmanides' commentary to Num. xxvii. 8). The mother of the deceased and his brothers of the same mother are excluded from the line of hereditary succession, on the principle that the family is based on relationship to the father and not that to the mother (B. B. 108b).

Husband and Wife.

The husband inherits from his wife, but the wife does not inherit from her husband. Provision is, however, made for her support as long as she remains unmarried (see Husband and Wife; Ketubah). The husband's right of inheritance extends only to property that actually belonged to his wife at the time of her death (see Dowry), but not to property that would have fallen to her had she lived, as, for instance, an expected inheritance from a relative who, however, survived her, or a debt which was not secured by a pledge or by a mortgage (B. B. 125b; Naḥalot, i. 11, and "Maggid Mishneh," *ad loc.*; Shulḥan 'Aruk, Eben ha-'Ezer, 90, 1). As in the case of her sons who died before her death, the husband who dies before his wife is not regarded as her heir to the extent of transmitting her estate to his relatives (B. B. 114b; see RaShBaM and Tos. *ad loc.*; Naḥalot, i. 12). A man does not inherit from his betrothed ("arusah"; Yeb. 29b). Later authorities also made provision against his inheriting his wife's property in case she died childless soon after marriage (see Dowry). The husband does not inherit from his wife if his marriage with her was illegal and carried the punishment of excision ("karet"), but if the punishment involved was only stripes, as in the case of a priest marrying a divorced woman, he does not lose his right of inheritance to her estate (Tosef., Yeb. ii. 3). The husband is also the heir of his apostate wife (Eben ha-'Ezer, 90, 3, gloss; Ḥoshen Mishpaṭ, 283, 2, gloss).

Levirate Connections.

The "yabam" (see Levirate Marriage) who performed his duty by marrying the widow of a brother who died without children became the sole heir to his brother's estate. But he did not receive his brother's share in their father's estate unless the father died before the brother (Yeb. 40a), for his right of inheritance extended only to such property as actually belonged to his brother at the time of his death, and not to property in expectancy (Bek. 52a). If, however, he did not marry his brother's widow, but followed the alternative of performing the ceremony of Ḥaliẓah, he was not entitled to his brother's inheritance, but took an equal share with his other brothers. Later, by an institution established in various Jewish communities as an inducement to one of the brothers to free the widow from her uncertain state, the property of the deceased brother was divided into two equal parts, one part being given to the widow and the other to the yabam who went through the ceremony of ḥaliẓah. There is much difference of opinion regarding the details connected with this institution, and the court that has to deal with such a case is advised to arbitrate between the contending parties (Eben ha-'Ezer, 165, 5, gloss; Mordecai to Yeb. iv. 23; Responsa of Meïr of Lublin, § 11). Where the widow died before any of her deceased husband's brothers either married her or submitted to the ceremony of ḥaliẓah, the heirs of her deceased husband inherited the amount due to her by her "ketubah" (marriage contract) and one-half of the dowry given (at marriage) to her by her father or his heirs ("nikse ẓon barzel"; see DOWRY), while the rest of her property went to her family (Ket. 80a; Naḥalot, iii. 9; Eben ha-'Ezer, 160, 7; comp. Nissim Gerondi, Responsa, §§ 46, 54).

Mere presumption is sufficient to establish the identity of an heir (see ḤAZAḲAH). If two witnesses testify that a man is known as the son of the deceased, though they can not trace the genealogy of the family, the man so known is regarded as the legal heir (Naḥalot, iv. 7; Ḥoshen Mishpaṭ, 280, 1). If, however, the deceased said before death that the claimant was not his son, the latter, although the presumption is in his favor, can not claim a portion in the inheritance. The testimony of the deceased is valid only when it relates to a son, but not when it relates to a brother or to another relative (B. B. 134a). On the other hand, the identity of the deceased and positive proof of his death by two legal witnesses must be established before the heirs are permitted to enter upon his estate (B. M. 38b, 39a; Naḥalot, vii. 4-10; Ḥoshen Mishpaṭ, 285; see TRUSTS AND TRUSTEES).

Testamentary Disposition.

If one said before his death: "This, my son, shall have no portion in my estate," or if he appointed a stranger as his heir in the place of his legal heirs, his declaration is void, for this is against the prescription of the Bible. It is, however, possible for a man to disinherit legal heirs either by preferring one legal heir to another or by bequeathing his entire estate to a stranger in the form of a gift (B. B. 130a, 133b). But such action on the part of a father was regarded with disfavor by the Rabbis (Ḳid. 53a; Naḥalot, vi. 11; Ḥoshen Mishpaṭ, 282; see BEQUEST; WILL).

The heirs enter upon their possession immediately on the death of the deceased. If all the heirs are of age, the division of the property may be proceeded with at once. If, however, there are minors among the heirs, the court appoints a trustee for the minors before the division takes place. If, after the division, a new heir appears, of whose existence the others were unaware, or if a creditor of the deceased collects a debt from the portion of one of the heirs, a redivision of the whole property has to take place (B. B. 106b; Naḥalot, x. 1; Ḥoshen Mishpaṭ, 175, 3-4). Before the division all the heirs are regarded as partners in the estate, and if they all live together each one may spend on his person according to his needs, except in the case of an extraordinary expense, as an expense incurred by marriage, which is counted against him at the division. When there are majors and minors among the heirs, and the majors have improved the property by their toil, they all share alike in the improvement. But if the majors said before they entered upon the estate, "This is what our father left us," thus taking an inventory of the estate, in the presence of the court, any improvement that came to it through their efforts belongs to them only (B. B. 143b). At the time of the division of the property, when appraisement is made of the estate, the garments that were provided for the heirs from the paternal estate are also estimated, but not the garments worn by their wives and children, although these also may have been supplied from the common treasury. The holiday garments, even of their wives and children, are included in the appraisement (B. Ḳ. 11a; see APPRAISEMENT).

Proof of Title.

Heirs whose title to the inheritance is doubtful are excluded in favor of those who can produce certain testimony to their title (Yeb. 38a). If, however, there are two sets of doubtful heirs and the facts can not be determined, the property is divided (B. B. 159b). For instance, a man and his daughter's son were killed, and it is not known who died first; the direct heirs of the man claim that his grandson died first and therefore did not inherit from his grandfather, but left them the only legal heirs; the heirs of the grandson claim that the grandfather died first and that the grandson inherited from him, leaving them, as the heirs of the grandson, sole legal heirs to the estate of his grandfather: in such a case the property is divided between the claimants. Many similar instances are recorded in the Talmud; in some cases the decision is in favor of the present possessor; in others, as in the case cited, the decision is that the property be divided among the various claimants (Yeb. 37b; B. B. 157-159).

The property of a proselyte who has left no children belongs to the first who takes possession of it (see HEFḲER). The property of a criminal who was executed for his crime is not diverted, but belongs to those who would have inherited it in the regular way (Sanh. 48b). If, however, his crime was that of treason, his property may be confiscated (*ib.*). See also AGNATES; FAMILY AND FAMILY LIFE; PATERNITY.

INITIALS. See ABBREVIATIONS.

INJURIES. See DAMAGE; TORT.

INK (Hebr. "deyo"): The only passage in the Old Testament in which ink is mentioned is Jer. xxxvi. 18. It would evidently, however, be a mistake to conclude that it was unknown in earlier times, for in this passage "deyo" is spoken of as something well known. Perhaps the Hebrew word "katab" presupposes the existence of ink; and ink was certainly known to the ancient Egyptians. It has not been determined how ink was prepared by the ancient Jews; at any rate the Talmudic "deyo" designates no fluid ink, but rather a cake of pigment which had to be made liquid before use. This ink was made chiefly from soot. Oil or balsam-gum was used to change the soot into a tough, pitchy substance (Shab. 23a); and that made with olive-oil was preferred, as it gave the finest pigment.

Gallnuts, first mentioned by Marcianus Capella, are unknown to the Mishnah, but are mentioned in the Gemara. A mineral ink was "ḳalḳantus" (χαλκανθός), which was also used occasionally in Palestine unmixed. As the ancient world had mixed copper sulphate with the ink of gallnuts, R. Meïr (after 100 C. E.), a descendant of Greek proselytes, did the same with deyo, the national ink of the Jews. His object was evidently to make the writing more permanent, since ink with a mineral mixture has the advantage of penetrating the material written upon, although it also gradually destroys it. The writing was probably done with an "'eṭ," which designates not only a metal style, but also a reed pen which corresponds to the Arabic "ḳalam" of to-day. As is still common in the Orient, the scribe used to carry the 'eṭ or stylus together with the "ḳeset ha-sofer," or inkhorn, in his girdle (Ezek. ix. 2–11). He carried also a particular kind of penknife ("ta'ar ha-sofer") wherewith to sharpen his reed pen and to cut the writing-material (Jer. xxxvi. 23).

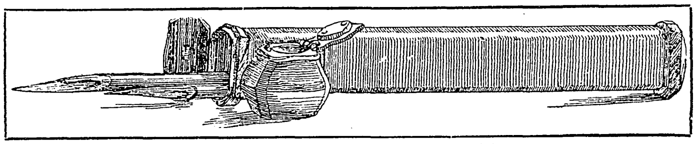
INN: House of entertainment for travelers. In the Bible references are made to lodging-places ("malon") where caravans or parties of travelers stopped for the night (comp. Gen. xlii. 27, xliii. 21; Ex. iv. 24). This does not necessarily imply a separate building; a wall or enclosure to prevent the cattle from straying, with room to pitch tents and with accessibility to a well, would be sufficient to constitute such a lodging-place in early times, when it would scarcely have been to the advantage of any one individual to attempt to make a living out of passing travelers. According to tradition, there was an inn ("gerut"), built by Chimham, near Bethlehem (II Sam. xix. 37–40; but comp. Targum *ad loc.*). By New Testament times the Holy Land had been sufficiently developed to afford opportunity for real inns, which are referred to in the New Testament (Luke x. 34, 35) and in the Talmud under the same word (*πανδοχεῖον*, פונדק). That in both cases the house of entertainment was strictly of the nature of an inn is shown by the fact that there was a special word for "host" or "innkeeper" (*πανδοχεύς*, פנדקי). The good Samaritan left his patient at an inn (Luke x. 34), just as a company of Levites traveling to Zoar left at an inn one of their comrades who had fallen sick (Yeb. xvi. 7). The character of female innkeepers was by no means above suspicion, as in the instance of Rahab, who is credited with being of that calling (Yer. Targ., Josh. ii. 1). Nevertheless, Rabbi Ishmael bar Jose declared that his father used to pray in an inn (Yer. Ber. iv. 7). Cattle as well as men were put up at inns ('Ab. Zarah ii. 1). The ancient inn was probably unfurnished, like the modern khan or caravansary, but probably had arches in the walls in which the travelers could shelter themselves.



Modern Palestinian Inkhorn and Reed Pens.

In the Middle Ages each Jewish community had a communal inn where wandering travelers who had no acquaintances in the town could put up for a night or two without cost. These would usually be connected with the dancing-hall, or "Tanzhaus," where entertainments too large for private houses were given. Jews' inns occur in early Spanish records, and were probably of this kind. In Paris during the eighteenth century there was a special Jews' inn, or "auberge Juive," where all Jewish travelers had to stop, and which often became the subject of blackmail by the police under the charge of being disreputable (L. Kahn, "Les Juifs de Paris," *passim*). These communal inns were maintained out of the communal funds; wandering beggars being entertained on the ground floor, while paying guests could take rooms on the upper story. The use of Christian inns was often forbidden to Jews in medieval regulations (Gudemann, "Gesch." i. 260). An instance occurs where a Jew in England himself kept an inn (Jacobs, "Jews of Angevin England," p. 153).

G. J.

INNOCENT III. (LOTHARIO CONTI): Pope from 1198 to 1216; born at Anagni in 1161; elected June 8, 1198; died July 17, 1216. A Roman writer said of him, "Thy words are the words of God; thy deeds are the deeds of the devil" (Gregorovius, "Gesch. der Stadt Rom," v. 92). This was eminently true of his conduct toward the Jews. He was the first pope who not only did not protect the Jews, but persecuted them with the utmost cruelty. Feeling obliged to show some pity for the victims of the excesses committed by the crusaders, Innocent, on ascending the pontifical throne, issued a bull ("Sicut Judæis") in which he renewed the prohibitions that had been issued by Clement III. (see Popes). "Although," it read, "the faithlessness of the Jews can not be too much disapproved, they ought not to be excessively oppressed by believers, for they are the living witness of the true religion." He did not, however, conform to this maxim himself; and at his instigation the Lateran Council, over which he presided, dictated the humiliating laws which rendered the Jews the pariahs of humanity; and it especially condemned them to wear Badges.

Believing that the spread of the heretical sects, especially of the Albigenses, in southern France, was due to Jewish influence, Innocent endeavored so to humiliate the Jews that the Christians should shrink from associating with them. To the common accusation of ritual murder, Innocent added new ones of his own invention. "The doors of the Jews," writes he, "are open to bandits, and the Christians are mocked for believing in a crucified peasant" ("Epistolæ," vii., No. 186, ed. Bréquigny, in his "Diplomata," ii. 610). He remonstrated with Philip Augustus for allowing the Jews to possess landed property and employ Christian servants and nurses (*ib.*). In 1205 Innocent censured Alfonso the Noble for the protection granted by that monarch to his Jewish subjects. He wrote, also, to the Count of Nevers, whom he threatened with excommunication if he continued to protect the Jews:

> "The Jews, like the fratricide Cain, are doomed to wander through the earth as fugitives and vagabonds, and their faces must be covered with shame. They are under no circumstances to be protected by Christian princes; but are, on the contrary, to be condemned to serfdom. It is, therefore, discreditable for Christian princes to receive Jews into their towns and villages, and to employ them as usurers in order to extort money from Christians. They [the princes] arrest Christians who are indebted to Jews, and allow the Jews to take Christian castles and villages in pledge; and the worst of the matter is that the Church in this manner loses its tithes. It is scandalous that Christians should have their cattle slaughtered and their grapes pressed by Jews, who are thus enabled to take their portion and to impose the leavings, prepared according to Jewish religious precepts, upon Christians. It is a still greater sin that this wine, prepared by Jews, should be used in the Church for the sacrament of the Lord's Supper. While the Christians are excommunicated for favoring the Jews, and their lands laid under the ban, the Jews are laughing in their sleeves because, on their account, the harps of the Church are hung on willows and the priests are deprived of their revenues" (Epistolæ x. 120, ed. Baluz, II., p. 123).

INNOCENT XI. (BENEDETTO ODESCALCHI): Pope from 1676 to 1689; born at Como in 1611; elected Sept. 21, 1676; died Aug. 12, 1689. That the Jews were not excluded from the results of his keen sense of justice is evidenced in his compelling the city of Venice to release the Jewish prisoners that had been taken by General Morosini in 1685. Still he went so far as to forbid (Oct. 30, 1682) the Jews to engage in banking transactions. However, ultimately convinced that such a measure would cause much misery to the Jews, the enforcement of the edict was twice delayed (Feb. 26, 1683; March 21, 1684). Innocent discouraged compulsory baptisms, which accordingly became less frequent under his pontificate. But he could not abolish altogether the old practise, and on Nov. 12, 1678, the Holy Congregation declared the baptism of a Jewish child, performed by its Christian nurse, to be valid.

INNSBRUCK: Capital of Tyrol, Austria. While Jews settled throughout Tyrol, especially in the southern part, as early as the beginning of the fourteenth century, no mention of them at Innsbruck is met with until the end of the sixteenth century. As elsewhere in the country, they were engaged in business, chiefly as dealers in grain and bullion or as money-lenders and brokers. By a special privilege granted by Archduke Ferdinand II. June 11, 1578, Samuel May, descendant of the specially privileged Solomon of Bassano, was permitted to establish himself at the court at Innsbruck, at first for eight years, and then for an additional period; and this privilege was subsequently extended to his children. May and his friends lived in the so-called "Judengasse"; but there never was a ghetto at Innsbruck. In 1748 Maria Theresa expelled from Innsbruck the Jews Uffenheimer and Landauer, although both were prominent purveyors, and the first a court factor. When the Jews were expelled from Hohenems in 1670, the Dannhauser and other families went to Innsbruck. A descendant of the Dannhausers, Wilhelm, was for twenty-four years a member of the municipal council of Innsbruck. Although the Bavarian edict of 1813 (when Tyrol was under Bavarian rule) regulating the condition of the Jews was confirmed by Austria in 1817 (after the latter had again come into possession of Tyrol), the laws against new settlers, the acquisition of real estate, and the holding of public office, remained in force down to the promulgation of the constitution of 1867. The revolt of Hofer in 1809 began at Innsbruck with excesses against the Jews, although Hofer was supplied with funds by the Jew Nathan Elias of Hohenems, and the firm of Arnstein & Eskeles of Vienna.

There is no separate community at Innsbruck, but under the law of 1890 the Jews of the city are included in the community of Hohenems. The Jews of Innsbruck number 40 families, and about 160 individuals, in a total population of 27,056. They have independent schools and religious committees, and have their own synagogue and cemetery.

The neighboring village of Rinn, near Hall, is noted as the place where the child Andreas Oxner was said to have been murdered by Jews July 12, 1462 (see Jew. Encyc. iii. 262, *s.v.* Blood Accusation). The so-called "Judenstein," where the deed was alleged to have occurred, is still a place of pilgrimage. The story, with which many miracles have been connected, has long since been proved to have been a mere invention (Scherer, "Die Rechtsverhältnisse der Juden in den Deutsch-Oesterreichischen Ländern," pp. 594–596, Leipsic, 1901).

INQUISITION (called also **Sanctum Officium** or **Holy Office**): Court for the punishment of heretics and infidels, established as early as the reigns of the emperors Theodosius and Justinian, though not under that name. Little was heard of this institution until the beginning of the thirteenth century, when, in consequence of the spread of the heretical sect of the Albigenses, it was established in various cities of southern France. Its management was then given into the hands of the Dominicans and Franciscans, of the mendicant orders of friars, who, being severed from all worldly ties, were sure to show themselves pitiless in the persecution of heretics and infidels. Having their time fully occupied with the Albigenses, the inquisitors at first left the Jews unmolested, contenting themselves with occasional autos da fé of Jewish books that had been denounced as heretical. But when the dissenters became more rare, the Inquisition began to persecute backsliding converts from Judaism and Jews who attempted to proselytize. The converts were especially the object of the rigor of the Inquisition from the promulgation, in 1268, of the papal bull "Turbato Corde." In 1274 Bertrand de la Roche was appointed inquisitor of Judaizing Christians in Provence, and in 1285 William of Auxerre was nominated inquisitor for

Origin.

heretics and apostatizing Jews. About 1276 several backsliding converts were burned by order of Nicolas III.; thirteen Jews were burned as heretics in 1288 at Troyes; and at the auto da fé held at Paris March 31, 1310, a converted Jew who had returned to Judaism also died at the stake.

About the same time as in southern France the Inquisition was introduced into Aragon. In 1233 Pope Gregory X. commissioned the Archbishop of Tarragona to appoint inquisitors; and by the fourteenth century there was a grand inquisitor in Aragon. In 1359, when some Jews who had returned to Judaism after conversion fled from Provence to Spain, King Pedro IV. of Aragon empowered the inquisitor Bernard du Puy to sentence them wherever found. One of the most prominent personages of the Aragonese Inquisition was the grand inquisitor or inquisitor-general Nicolas Eymeric. He sentenced the Jew Astruc da Piera, accused of sorcery, to imprisonment for life; and Ramon de Tarrega, a Jew who accepted baptism and became a Dominican, and whose philosophic works Eymeric stigmatized as heretical, he kept imprisoned for two years, until compelled by Pope Gregory XI. to liberate him.

The New Inquisition.

The New or Spanish Inquisition, introduced into the united kingdoms of Castile, Aragon, and Navarre by Ferdinand V. and Isabella the Catholic, was directed chiefly against converted Jews and against Jews and Moors. During the cruel persecutions of 1391 many thousands of Jewish families accepted baptism in order to save their lives. These converts, called "Conversos," "Neo-Christians" ("Christaõs Novos"). or "Maranos," preserved their love for Judaism, and secretly observed the Jewish law and Jewish customs. Many of these families by their high positions at court and by alliances with the nobility excited the envy and hatred of the fanatics, especially of the clergy. After several unavailing attempts to introduce the Inquisition made successively, from the reign of Juan II., by the Bishop of Osma, Alfonso de Espina, and by Niccolo Franco, nuncio of Sixtus IV. at the Spanish court, the Dominicans applied to the young queen Isabella. Alfonso de Hojeda and the papal nuncio exerted all their energies, and succeeded in 1478 in obtaining from Sixtus IV. a bull authorizing Ferdinand and Isabella to choose sundry archbishops, bishops, and other persons, both clericals and laymen, for the purpose of conducting investigations in matters of faith. The king readily gave his consent to a scheme which promised to satisfy his cupidity, while the queen hesitated to sanction its establishment in Castile. It was early in Sept., 1480, that Isabella, urged by Alfonso de Hojeda, Diego de Marlo, Pedro de Solis, and other ecclesiastical dignitaries, finally affixed her signature to the document which established the Inquisition in her dominions. On Sept. 27, 1480, two Dominicans, Juan de San Martin and Miguel de Morillo, were appointed the first inquisitors.

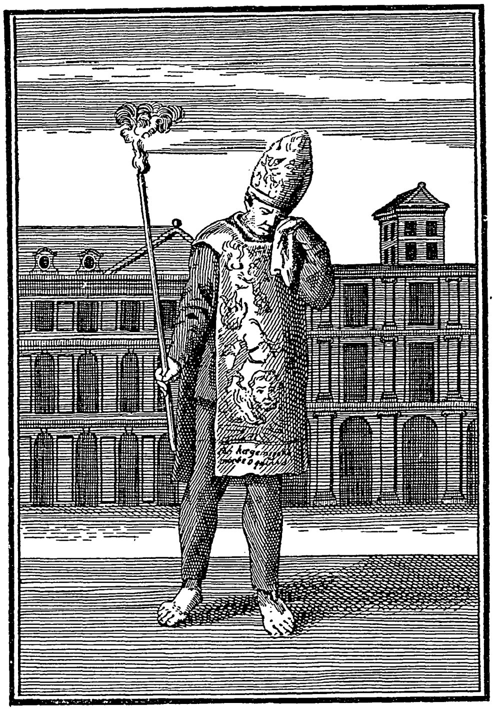
The newly appointed inquisitors together with their assistant, Dr. Juan Ruiz de Medina, and with Diego Merlo, went first to Seville, where the feeling aroused was divided. The "good" Christians and the populace gave the visitors a ceremonious reception; but many nobles, several of whom had intermarried with the Maranos, were terrified at the new arrivals. A number of prominent and wealthy Maranos of Seville, Utrera, Carmona, Lorca, and other places, including Diego de Susán, father of the beautiful Susanna; Benadeva, father of the canon of the same name; Abolafia "el Perfumado," farmer of the royal taxes; Pedro Fernandez Cansino; Alfonso Fernandez de Lorca, Juan del Monte, Juan de Xerez, and his father Alvaro de Sepulveda the Elder, and many others, convened and agreed to oppose the inquisitors. They intended to distribute arms and to win over the people by bribes. An old Jew of their number encouraged them. The conspiracy, however, was betrayed and suppressed in its inception (details of this "Conjurados de Sevilla" are given in Fita, "La España Hebræa," I. 71–77, 184–196).

First Seizure of Maranos.

Many Maranos, on receiving news of the introduction of the Inquisition, went with all their possessions to Cadiz, in the hope of finding protection there; but the inquisitors addressed (Jan. 2, 1481) an edict to Rodrigo Ponce de Leon, Marquis of Cadiz, and to all dukes, counts, grand masters of orders, and knights, as well as to the alcaldes of the cities of Seville, Cordova, Jerez de la Frontera, Toledo, and others in Castile, ordering them to seize and give up all Maranos hidden among them, and to confiscate their property. All persons who refused to obey this edict were to be punished by excommunication and by forfeiture of their property, offices, and dignities (Fita, *l.c.* p. 77). The bands of fugitive Maranos were very numerous; in the territory of the Marquis of Cadiz alone there were 8,000, who were transported to Seville and delivered to the Inquisition. Even during the early days of 1481 many of the wealthiest, most prominent, and learned Maranos, municipal councilors, physicians, etc., had been apprehended, and it had been deemed necessary to transfer the tribunal to the castle of Triana near Seville.

This tribunal, the object of fear and terror for nearly 300 years, began its work; and on Feb. 6, 1481, the first auto da fé at Seville was held with a solemn procession on the Tablada. Six men and women were burned at the stake, probably the same persons whom Alfonso de Hojeda had accused of desecrating an image of Jesus. This zealous Dominican preached at this first auto da fé; but he did not live to see a second one, as he was one of the first victims of the plague which was then raging in Andalusia. A few days later three of the wealthiest and most prominent men of Seville, Diego de Susán (a "gran rabi," with a fortune of 10,000,000 maravedis), Manuel Sauli, and Bartolome de Torralba, mounted the "quemadero," as the stake was called. Many other members of the conspiracy mentioned above were burned soon after: Pedro Fernandez Benadeva; Pedro Fernandez Cansino and Gabriel de Zamora, the two last-named being municipal councilors of Seville; Abolafia "el Perfumado," reputed to be a scholar; Medina el Barbudo, meat commissary at Seville; the municipal councilor Pedro de Jaen and his son Juan del Monte; Aleman Poca Sangre, progenitor of the Alemanes; the wealthy brothers Aldafes, who had been living in the castle of Triana; Alvaro de Sepulveda the Elder and his son Juan de Xerez; and others from Utrera and Carmona. The immense wealth of all the condemned was seized by the royal treasury. At Seville there was at least one auto da fé every month; 17 Maranos were burned on March 26, 1481; many more, a few weeks later; and by the following November nearly 300 had perished at the stake, while 79 were condemned to imprisonment for life. The Inquisition held office also at Cordova and in the archbishopric of Cadiz, where many Jewish heretics, mostly wealthy persons, were burned during the same year.

The Inquisition, in order to set a trap for the unhappy victims, issued a dispensation and called upon all Maranos guilty of observing Jewish customs to appear voluntarily before the court, promising the repentants absolution and enjoyment of their life and property. Many appeared, but they did not obtain absolution, until, under the seal of secrecy and under oath, they had betrayed the name, occupation, dwelling, and mode of life of each of the persons they knew to be Judaizers, or had heard described as such. A large number of unfortunates were thus entrapped by the Inquisition. On the lapse of this decree all those who had been betrayed were summoned to appear before the tribunal within three days. Those that did not attend voluntarily were dragged from their houses to the prisons of the Inquisition. Then a law was issued, indicating in thirty-seven articles the signs by which backsliding Maranos might be recognized. These signs were enumerated as follows:



A Sanbenito.
(After Picart.)

Signs of Judaism.

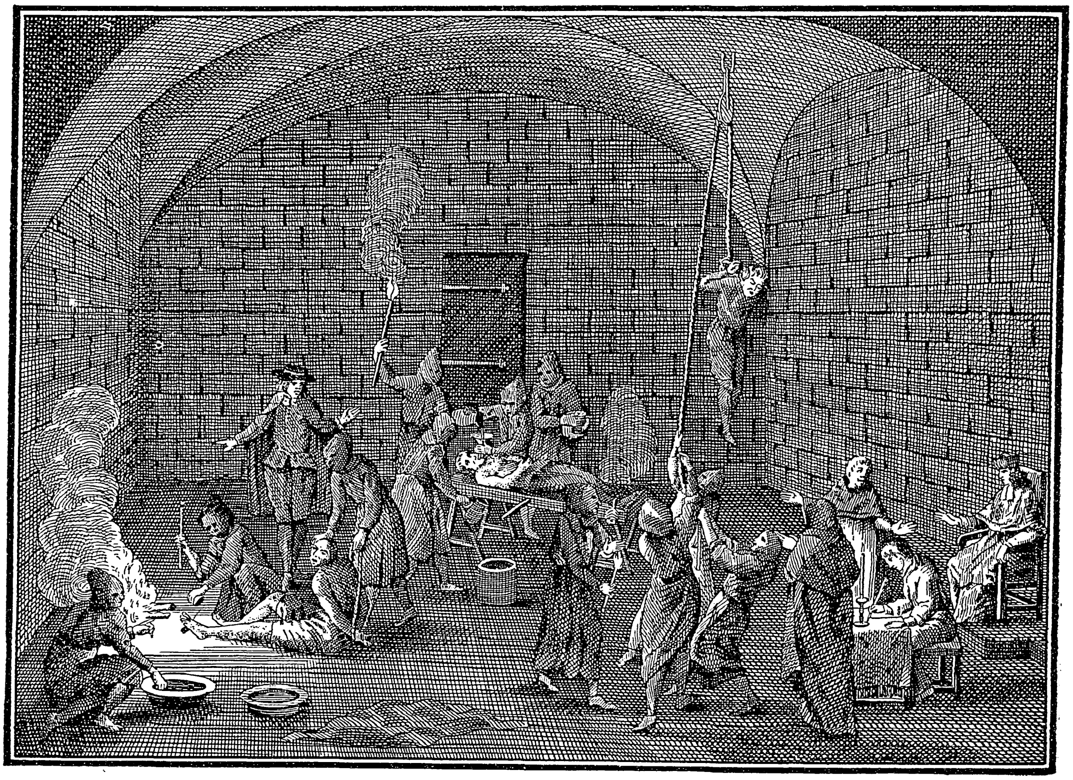
> If they celebrate the Sabbath, wear a clean shirt or better garments, spread a clean tablecloth, light no fire, eat the food ["ani"] which has been cooked overnight in the oven, or perform no work on that day; if they eat meat during Lent; if they take neither meat nor drink on the Day of Atonement, go barefoot, or ask forgiveness of another on that day; if they celebrate the Passover with unleavened bread, or eat bitter herbs; if on the Feast of Tabernacles they use green branches or send fruit as gifts to friends; if they marry according to Jewish customs or take Jewish names; if they circumcise their boys or observe the "hadas" [a Babylonian superstition], that is, celebrate the seventh night after the birth of a child by filling a vessel with water, throwing in gold, silver, pearls, and grain, and then bathing the child while certain prayers are recited; if they throw a piece of dough in the stove before baking; if they wash their hands before praying, bless a cup of wine before meals and pass it round among the people at table; if they pronounce blessings while slaughtering poultry, cover the blood with earth, separate the veins from meat, soak the flesh in water before cooking, and cleanse it from blood; if they eat no pork, hare, rabbits, or eels; if, soon after baptizing a child, they wash with water the spot touched by the oil: give Old Testament names to their children, or bless the children by the laying on of hands: if the women do not attend church within forty days after confinement; if the dying turn toward the wall; if they wash a corpse with warm water; if they recite the Psalms without adding at the end: "Glory be to the Father, the Son, and the Holy Ghost," etc. (see Llorente, "Histoire de l'Inquisition," i. 153, iv. Supplement, 6; "Boletin Acad. Hist." xxii. 181 *et seq.*; "R. E. J." xi. 96 *et seq.*, xxxvii. 266 *et seq.*).

It was easy for the Inquisition, with this mode of procedure, to entrap more and more Maranos. From Seville, the only permanent tribunal, it sent its officers to Cordova, Jerez de la Frontera, and Ecija, in order to track the fugitives and especially to confiscate their property. The two inquisitors at Seville were so cruel that complaints were made to Sixtus IV., who addressed a brief (Jan. 29, 1482) to the royal couple, amending the bull of Nov. 1, 1478, and expressing his dissatisfaction. He declared that but for consideration for their majesties he would depose Miguel de Morillo and Juan de San Martin. He refused a request to appoint inquisitors for the other countries of the united kingdom; nevertheless, hardly two weeks later (Feb. 11, 1482) he appointed Vicar-General Alfonso de San Capriani inquisitor-general for the kingdoms of Castile and Leon, and seven other clericals, including Thomas de Torquemada (Turrecremata) as inquisitors.

Ferdinand and Isabella gave no heed to the pope's urgent recommendation to treat the Maranos more humanely; and they still more strongly disapproved his giving absolution to heretics condemned by the tribunal. Upon this subject Queen Isabella addressed an autograph letter to Sixtus IV., which he answered at length (Feb. 23, 1483). While recognizing her piety, he hinted that the queen was urged to proceed so rigorously against the Maranos "by ambition and greed for earthly possessions, rather than by zeal for the faith and true fear of God." Still, he made many concessions. Although, as he expressly says in the bull of May 25, 1483, he was the only power to whom final appeal could be made in matters of faith, yet, at the request of the Spanish sovereigns, he appointed the Archbishop of Seville, Inigo Manrique, judge of appeals for Spain. This, however, did not prevent the vacillating pope from issuing a few months later (Aug. 2) the bull "Ad Futuram Rei Memoriam," in which he commanded that all Maranos who had repented at Rome and had done penance should no longer be persecuted by the Inquisition. The fact that he had permitted as many copies as possible to be made of this bull did not prevent him from repealing it eleven days later (Aug. 13). By way of further concession to the royal couple the pope appointed as officials of the Inquisition only clericals of pure Christian descent and orthodox Catholics in no degree related to Maranos.

On Oct. 17, 1483, Thomas de Torquemada, then sixty-three years of age and prior of a monastery at Segovia, his native city, was appointed inquisitor-general. His chief endeavor was to make the Inquisition more effective. Tribunals were established in quick succession at Cordova, Jaen, and Ciudad Real. At Cordova, seat of the oldest tribunal next to Seville, the first inquisitors were Pedro Martinez de Barrio and Alvar Gonzalez; and one of the first to be condemned was Pedro Fernandez de Alcaudete, treasurer of a church (Ad. de Castro, "Judios en España," p. 118; "Boletin Acad. Hist." v. 401 *et seq.*). The first inquisitors at Jaen were Juan Garcia de Canas, chaplain to their majesties, and Juan de Yarca, prior of a monastery at Toledo. The tribunal at Ciudad Real, whose first inquisitors were Pedro Diaz de Costana and Francisco Sanchez de la Fuente, existed only two years. From Feb. 6, 1484, to May 6, 1485, ten autos da fé were held in that city, the largest being celebrated Feb. 23-24, 1484, and March 15, 1485. On Feb. 23 about 26 Maranos of either sex suffered at the stake, among them Alvaro de Belmonte, Pero Çarça, Maestre Fernando (known as "el Licenciado de Cordova"), and Maria Gonsales la Pampana. Juan Gonsales Pampana, husband of the last-named, was burned in effigy on the following day together with 41 others, some of whom, like him, had fled, and some of whom had died. On March 15, 1485, not less than 8 were burned alive and 54 in effigy. One of the former was Juan Gonsales Escogido, who was reputed to be a rabbi and "Confesor de los Confesos" (Process of Maria Gonsales la Pampana and of Juan G. Escogido, published, after the acts of the Inquisition, in "Boletin Acad. Hist." xx. 485 *et seq.*, xxii. 189 *et seq.*). In May, 1485, the tribunal of Ciudad Real was transferred to Toledo.

Thomas de Torquemada.



Various Manners of Torturing During the Inquisition.
(After Picart.)

In order to give more uniformity and stability to the tribunal, Torquemada drafted an inquisitorial constitution, "Compilacion de las Instrucciones," containing twenty-eight articles, to which several additions were subsequently made. It provided for a respite of thirty or forty days for those accused of Judaizing, and that all who voluntarily confessed within that time should, on payment of a small fine and on making presents to the state treasury, remain in possession of their property. They had to make their confession in writing before the inquisitors and several witnesses, conscientiously answering all questions ad-

Conditions of Confession.

dressed to them concerning the time and duration of their Judaizing. Thereupon followed the public recantation, which could be made in secret only in rare cases. Those that confessed only after the expiration of the respite were punished by having their property confiscated or by imprisonment for life ("carcel perpetuo") according to the gravity of the offense. Maranos under twenty years of age who admitted that they were obliged by their parents, relations, or other persons to observe Jewish ceremonies were not subject to confiscation of their property, but were compelled to wear for a certain length of time the sanbenito (see AUTO DA FÉ). Those that confessed after the publication of the testimony, but before sentence was pronounced, were admitted to "reconciliation," but were sentenced to imprisonment for life, while those that concealed part of their guilt were condemned to the stake. If a suspected Marano could not be convicted of apostasy he was to be tortured; if he confessed on the rack, he was condemned to death as a Judaizer; but if he recanted his confession or resorted to untruths, he was again subjected to torture.

The prisons of the Inquisition—which, with the instruments of torture, still exist in some cities in Spain, as in Saragossa—were small, dark, damp apartments, often underground. The food of the captives, furnished at their own cost, was both meager and poor; and their only beverage was water. Complaining aloud, crying, or whimpering was rigorously repressed. The punishment inflicted by the Inquisition was imprisonment, either for a stated time or for life, or death by fire. If impenitent the condemned was tied to the stake and burned alive; if penitent he was strangled before being placed on the pile. Flight was considered equivalent to a confession or to a relapse ("relapso") to Judaism. The property of the fugitive was confiscated, and he himself was burned in effigy ("Compilacion de las Instrucciones del Oficio de la S. Inquisicion," Madrid, 1667; Llorente, *l.c.* i. 175 *et seq.*; "R. E. J." xi. 91 *et seq.*).

In Aragon, Catalonia, and Valencia.

With Torquemada the Inquisition was introduced into Catalonia (Oct. 17, 1483); as to Valencia, it had existed there since 1420, the inquisitor being the Dominican Juan Cristobal de Gualbes (Galves). In Aragon the Inquisition could be instituted only with the consent of the Cortes; and its introduction according to the new organization was determined (April, 1484) only after violent debates. Gaspar Juglar, and Pedro Arbues, canon of the metropolitan church of Saragossa, were appointed inquisitors for Aragon, and Pedro d'Epila and Martin Iñigo for Valencia. On May 10, 1484, the first auto da fé at Saragossa was held under the presidency of Maestre Julian, who, according to Lea, is identical with Gaspar Juglar. He was soon after poisoned by the Conversos or Maranos.

Death of Pedro Arbues.

There was violent opposition to the Inquisition throughout Aragon as well as in Catalonia; not only the Conversos and persons descended from Conversos or connected with them by marriage, but Christians also considered the Inquisition as destructive of their liberties. There was so much opposition that the assembled Cortes determined to send a deputation to protest to the king, who remained inflexible, even refusing the enormous sum which the Maranos offered to induce him to revoke the decree confiscating their property. The Maranos in despair then assassinated the inquisitor ARBUES. When the murder became known, the populace proceeded to the ghetto in order to kill the Jews and Maranos, and a fearful massacre would have followed had not the young Archbishop Alfonso de Aragon appeared in time to pacify the people.

This conspiracy incited the Inquisition to horrible activity. Between Dec. 15, 1485, and the beginning of the sixteenth century one or two autos da fé were held nearly every month at Saragossa. Especial severity was exercised toward the instigators of and participants in the conspiracy. Juan de Esperanden first had his hands chopped off, and was then dragged with Vidal de Urango to the market-place, and beheaded. Both were quartered and finally burned June 30, 1486. On Dec. 15 a similar fate befell the scholarly Francisco de S. Fé (a descendant of Jerome de S. Fé), who was held in high esteem by the governor of Aragon. Juan de la Abadia, who had attempted suicide, was dragged through the streets, quartered, and burned Jan. 21, 1487. Four weeks later the Jesuit Juan Martinez de Rueden, in whose possession anti-Christian books in Hebrew were found, was burned; and on April 10, 1492, his relative, the widow of Antonio de Rueda of Catalayud, who had kept the Sabbath and had regularly eaten "ḥamyn" ("potagium vocatum ḥamyn" = חמין or "shalet"), met a similar fate. Gaspar de S. Cruce and Juan Pedro Sanchez, who had escaped to Toulouse, were burned in effigy. During the last fifteen years of the fifteenth century more than fifty autos da fé were held at Saragossa, and during the year in which the Jews were expelled from Spain not less than nine were celebrated there; hundreds of members of the most wealthy and prominent families—those of Sanchez, Caballeria, Santangel, Paternoy, Monfort, Ram, Almaçan, and Clemente—were either burned or sentenced to imprisonment for life (Henry C. Lea, "The Martyrdom of S. Pedro Arbues," New York, 1889; Rios, "Hist." iii. 615–634; "R. E. J." xi. 84 *et seq.*).

The Maranos of Toledo likewise resisted the introduction of the Inquisition; and several of them conspired to kill the inquisitor. In May, 1485, the inquisitors Pero Diaz de la Costana and Vasco Ramirez de Ribera entered Toledo. On June 2 an attack was made on one of them; but he was protected by the populace, who, falling upon the conspirators, De la Torre and his four companions, strangled and hanged them. The inquisitors granted a respite of forty days to the Maranos, which was extended to seventy, in order to afford them the opportunity to give themselves up voluntarily to the Inquisition. At the same time they called together the rabbis, and demanded from them, under oath and on pain of dire punishment, that they pronounce the great excommunication upon all the Jews, and that they recall it only after the Jews had denounced all Maranos following Jewish customs. Some frightened

Jews are said to have betrayed their coreligionists; others, poor, degraded, and filled with hatred against the apostates, denounced them as Judaizers, giving false testimony. Eight or more of these false witnesses were tortured with hot irons at the command of Queen Isabella (Pulgar, "Cron. de los Reyes Catolicos," iii., li. 100; "Boletin Acad. Hist." xi. 297, xxiii. 407).

In Toledo.

There was no lack of victims. On Feb. 12, 1486, occurred the first auto da fé in Toledo in the presence of a large concourse of the people of the city and of the surrounding country. On this day 750 persons were received into the Church; on April 2, 900; on June 11, 750. On Aug. 16 of the same year, 25 persons, including Alfonso Cota and other prominent men, were burned alive; on the following day the pastor of Talavera and a cleric, both of whom were adherents of Judaism, were burned; and on Oct. 15 several hundred deceased persons, whose property had been confiscated by the state, were burned in effigy. At an auto da fé held Dec. 10 following, 950 persons received absolution. On Jan. 15 and March 10, 1487, 1,900 Judaizers were readmitted to the Church. On May 7, 23 persons, including a canon, were burned alive; on July 25, 1488, 37 persons, and two days later 6 Judaizing clericals, shared the same fate. On May 24, 1490, 21 persons suffered at the stake, and 11 were sentenced to imprisonment for life. At a great auto da fé on the following day the bones of 400 Judaizers and many Hebrew books formed the pile for a woman who wished to die as a Jewess, and who expired with the word "Adonai" on her lips. On July 25, 1492, eight days before the expulsion, 5 Maranos were led to the stake, and many others were condemned to imprisonment for life. At an especially large auto da fé held July 30, 1494, 16 persons from Guadalajara, Alcalá de Henares, and Toledo were burned, and 30 were condemned to life imprisonment. In 1496 three autos da fé were held, and in the following year two. All the condemned persons were of course deprived of their property (on Toledo see "Boletin Acad. Hist." xi. 285 *et seq.*, xx. 462).

Before the end of the fifteenth century there were nearly a dozen tribunals in Spain. The one at Guadalupe, province of Estremadura, was established as early as that at Toledo; many Maranos were living there; and the inquisitor, Nuno de Arevato, proceeded rigorously against them. The tribunal existed there for a few years only; but during that time, beginning with 1485, seven autos da fé were held, at which 52 Judaizers were burned alive, 25 were burned in effigy together with the bones of 46 deceased persons, 16 were condemned to imprisonment for life, and many were sentenced to wear the sanbenito, and were deprived of their property.

Opposition in Catalonia.

The Catalonian cities, too, stubbornly opposed the newly organized Inquisition; and in 1486 there were riots at Teruel, Lerida, Barcelona, and Valencia, during which the tribunals were destroyed. It was not until 1487 that the inquisitor-general Torquemada was able to appoint Alfonso de Espina of Huesca inquisitor of Barcelona. De Espina began his activity on Jan. 25, 1488, with a solemn auto da fé, the first victim being the royal official Santa Fé, a descendant of a well-known Jew-hater, Jerome de Santa Fé. On May 2, 1489, the wife of Jacob Monfort, the former Catalonian treasurer, was burned in effigy; and on March 5 and 23, 1490, Louis Ribelles, a surgeon of Falces, together with his children and his daughter-in-law, was condemned to imprisonment for life; his wife Constancia was burned on March 12 at Tarracona, where a large auto da fé was held on July 18, 1489; and on March 24, 1490, Gabriel Miro (magister in artibus et medicina), his wife Blanquina, the wealthy Gaspar de la Cavalleria, and his wife were burned in effigy. Simon de Santangel and his wife, whom their own son denounced to the Inquisition at Huesca as Judaizers, were burned on July 30, 1490, at Lerida.

Conforming Jews Involved.

In Catalonia the activity of the Inquisition was restricted to a few autos da fé held at Barcelona and some other cities; and the number of victims was limited. The Inquisition was all the more active in Old Castile, where Ferdinand and Isabella, with Torquemada, did their utmost, not to confirm the Maranos in their new faith, but to destroy them and to deprive them of their property. On June 19, 1488, the tribunal of Valladolid held its first auto da fé, at which 18 persons who had openly confessed Judaism were burned alive. The first inquisitors at Segovia were Dr. de Mora and the licentiate De Cañas; and the first victim to be publicly burned was Gonzalo de Cuellar, whose property to the amount of 393,000 maravedis was confiscated by the state treasury. Involved in the process against him were his Jewish relatives, Don Moses de Cuellar, the latter's son Rabbi Abraham and his brother, of Buytrago, as well as Juan (Chalfon) Conbiador (= "changer") and Isaac Herrera, both of Segovia ("Boletin Acad. Hist." xxiii. 323 *et seq.*). At Avila the first victims were the Francos, who were accused of having murdered the child La Guardia. Between 1490 and the end of the century more than 100 persons were burned at Avila as "Judios" or Judaizers, the majority being natives of Avila, with a few from Arevalo, Oropesa, and Almeda; 70 were punished otherwise (see lists of the condemned in Fita, *l.c.* i. 51 *et seq.*).

Torquemada accused even bishops who were of Jewish descent, as Juan Arias Davila, Bishop of Segovia, and Pedro de Aranda, Bishop of Calahorra. During his term of fifteen years he condemned more than 8,000 Jews and Maranos to be burned alive, and more than 6,000 in effigy. His successor, the scholarly Dominican Diego Deza, the friend and patron of Columbus, was equally cruel, condemning many Maranos. On Feb. 22, 1501, a great auto da fé was held at Toledo, at which 38 persons were burned, all of them from Herrera. On the following day 67 women of Herrera and Alcocen were burned at Toledo; a few days previously about 90 Maranos of Chillon were burned at Cordova; and on March 30, 1501, 9 persons were burned at Toledo, while 56 young men and 87 young women were condemned to life imprisonment. In July of the same year 45 persons were burned at Seville, among them a young woman 25 years of age, who was considered a scholar and who read the Bible with her fellow sufferers ("Boletin Acad. Hist." xl. 307 *et seq.*; "R. E. J." xxxvii. 268, xxxviii. 275). Diego Deza, of Jewish descent on his mother's side, despite his cruelty to the Jews, was himself accused of Judaizing. As he was continually ill, Juan, Bishop of Vigue, was appointed grand inquisitor of Aragon, and Francisco de Ximenes, Archbishop of Toledo, was appointed grand inquisitor of Castile, even during Deza's lifetime.

Diego Rodriguez Lucero.

Deza's most pliable tool was Diego Rodriguez Lucero, the inquisitor of Cordova, who enjoyed the special favor of Ferdinand and Isabella. For his espionage and confiscations he received from them "ayudas de Costa" to the value of 20,000 and 25,000 maravedis. He was a monster of cruelty and committed so many atrocities that Gonzalo de Avora wrote to the royal secretary Almazan on July 16, 1507: "Deza, Lucero, and Juan de la Fuente have dishonored all provinces; they have no regard either for God or for justice; they kill, steal, and dishonor girls and women to the disgrace of the Christian religion." In order to curry favor with King Ferdinand, Lucero brought accusations against all persons suspected of being of Jewish blood, regardless of their station in life, and extorted confession on the rack. One of these victims was the young Archdeacon de Castro, whose mother was of an old Christian family, while his father was a Marano; his revenues, amounting to 300,000 maravedis, were divided among Lucero, Cardinal Carvajal, the royal treasurer, and the king's secretary. A bachelor of divinity, Membreque by name, was accused of having publicly preached on the doctrines of Judaism, whereupon Lucero procured a list of the persons who had listened to his sermon, and all of them, 107 in number, were burned alive.

Attempts to Check Lucero.

No one was sure of his life. The prisons were crowded, and large numbers of prisoners were taken to Toro, the seat of the supreme council of the Inquisition. Lucero's principal object was the confiscation of property, as the Bishop of Cordova and many dignitaries of the city stated in a complaint against him which they sent to the pope. The most prominent persons of Cordova requested the inquisitor-general Deza to depose Lucero; and an appeal was made to Queen Juana and her husband, Philip of Austria, who then lived in Flanders. On Sept. 30, 1505, Philip and Juana addressed a cedula to Deza, in which they sharply criticized Lucero's proceedings and suspended the Inquisition until their arrival in Spain. Though this missive was disregarded, Philip's coming filled the Maranos with new hope. At Rome they had bought the Curia; and they had offered 100,000 ducats to King Ferdinand during his sojourn at Valladolid if he would suspend the Inquisition until the arrival of the young couple. At first matters looked very bright for their attempts, and Lucero's conduct was the object of an investigation. Unfortunately, Philip died suddenly, and Lucero, now emboldened, asserted that most of the knights and nobles of Cordova and other cities were Judaizers, and had synagogues in their houses. The highest dignitaries were treated by him like "Jewish dogs." He accused the pious Hernando de Talavera, Archbishop of Granada, who had Jewish blood in his veins, and his whole family, of Judaizing. His relatives were imprisoned, and he himself, who once had been the confessor of Queen Isabella, was compelled with many other converts to go barefoot and bareheaded in procession through the streets of Granada. The exposure brought on an attack of fever, and he died five days later.

Ferdinand, who reascended the throne after Philip's death, was obliged to dismiss Deza, in order to stem the movement against the Inquisition at Cordova; and Ximenes, Archbishop of Toledo, was appointed inquisitor-general in his place (June, 1507). The supreme council of the Inquisition, headed by Ximenes, decided in May, 1508, to imprison Lucero; and he was taken in chains to Burgos and confined in the castle there. The "Congregacion Catolica," consisting of the most pious and learned bishops and other high ecclesiastics of the whole country, was commissioned to investigate the charges against Lucero, and at a solemn session held at Valladolid Aug. 1, 1508, it gave orders for the liberation of all those imprisoned on the charge of Judaizing (Henry C. Lea, "Lucero, the Inquisitor," in "Am. Hist. Review," ii. 611-626; Rios, "Hist." iii. 483 *et seq.*).

Attitude of Charles V.

The grand inquisitor Cardinal Ximenes de Cisneros was not more tolerant toward the Maranos than his predecessor had been; he caused many to be burned and many thousands to be punished by forcing them to perform various acts as penance. A few years after his death the victims of incessant persecution, profiting by the opposition of Castile to the young Charles I. (afterward Emperor Charles V.), sent a deputation, consisting of the most prominent Maranos, to King Charles in Flanders, requesting him to restrict the powers of the Inquisition and to have testimony heard in public. As an inducement to the king they offered him a very large sum, said to have amounted to 800,000 gold thalers. In order to win over the Curia, Gutierrez sent his nephew, Luis Gutierrez, to Rome, where other converts, among them Diego de las Casas and Bernaldino Diez, were working for them. The tolerant Pope Leo X. granted them a bull such as they desired, and which some persons claim to have seen in a Spanish translation. As soon as Charles heard of the intended bull, he made every effort to prevent its publication. He sent word to Leo X. by his envoy Lope Hurtado de Mendoza that the complaints of the converts as well as the expostulations of a few Spanish prelates and of misinformed or interested persons deserved no credit, and that the inquisitor-general for Castile, Adrian, formerly Bishop of Tortosa, who had been appointed May 4, 1518, was much more inclined to moderation than to severity. Furthermore, he stated that the converts had sent a complaint to him against the servants of the Inquisition, and had offered to him, as formerly to his grandfather, a large sum to restrain the tribunal. Moreover, Charles affirmed that under no conditions would he allow a bull restraining the Inquisition to be published in his kingdom. The pope acceded to Charles's demand, issuing the brief of Oct. 12, 1519; and the Inquisition pursued its course unchecked ("Boletin Acad. Hist." xxxiii. 307 *et seq.*; "R. E. J." xxxvii. 269 *et seq.*). Nevertheless, Charles would have restrained the Inquisition in his dominions had not his chancellor Selvagio, who advocated the plan, died. After his death Charles became an ardent protector of the Inquisition. Down to 1538 there were tribunals at Seville, Cordova, Jaen, Toledo, Valladolid, Calahorra, Llerena, Saragossa, Valencia, Barcelona, Cuenca, Granada, Tudela, and at Palma in the Balearic Isles, where the first auto da fé was held in 1506, and 22 Judaizers were burned in effigy. Several Jews were burned alive in 1509 and 1510, and 62 Judaizers were burned in effigy in the following year.

Under the Philips.

The cruel Philip II. favored the Inquisition. One of his grand inquisitors was Fernando de Valdes, formerly Archbishop of Seville, who was unsurpassed for his cruelty. The Cortes in vain repeatedly remonstrated against the terrible abuses of the tribunals and demanded that they be restricted. Philip III. was very weak, and during his reign the Inquisition proceeded still more shamelessly after the unsuccessful attempt of the Duke de Olivares to check it. Under this king as well as under his successor, Philip IV., Jews were burned throughout the realm; every tribunal held at least one great auto da fé each year. The largest number occurred in Andalusia, at Seville, Granada, and Cordova. The fanatical populace gathered in greater multitudes at the autos than at theaters and bull-fights. Every auto was like a great popular festival, to which the knights and representatives of neighboring cities were solemnly invited, the windows of the houses nearest to the quemadero being reserved for them. Great autos were held at Cordova on Dec. 3, 1625; May 3, 1655; and June 29, 1665. Among the large number burned at the first of these was Manuel Lopez, who obstinately resisted all attempts at conversion. At the last-mentioned auto the city spent, according to the bills preserved in the municipal archives, not less than 392,616 maravedis for food served to the inquisitors and their servants, the dignitaries, knights, and invited guests. The auto lasted from seven in the morning till nine at night; and 55 Judaizers were burned, 3 of them alive. In addition 16 were burned in effigy. Under Philip IV. a tribunal was instituted at Madrid, the new capital, and on July 4, 1632, the first auto was held for Judaizers in celebration of the delivery of Elizabeth of Bourbon. One of the largest autos at Madrid took place on June 30, 1680, in the presence of King Charles II. and his young wife. In the previous year, between May 6 and May 28, five autos had been held at Palma, at which 210 "Chuetas" (or Maranos) were condemned to imprisonment for life; and on May 6, 1691, 25 Chuetas were burned there.

Philip V. took the Inquisition under his especial care. During the forty-six years of his reign it celebrated its greatest triumphs. Every tribunal held one and sometimes two or three autos a year for Judaizers. In 1722 three autos were held at Seville, and two each at Murcia and Cuenca; in 1723 three were held at Granada, and two each at Valladolid, Toledo, and Cuenca. During the reign of Philip V. 1,564 persons were burned alive and 782 in effigy, and 11,730 were sentenced to various punishments, ranging from imprisonment for six months to imprisonment for life. Nine-tenths of this number were accused of Judaizing.

Under Ferdinand VI. and Charles III. the power of the Inquisition was more and more restricted. Judaizers were no longer burned; and the terrible auto da fé became less frequent. King Joseph Bonaparte abrogated the Inquisition in 1808, and the Cortes condemned it in 1813; but, to the astonishment of both nations and rulers, Ferdinand VII. reinstituted it. Not until 1834 did the tribunals of the Inquisition disappear completely from Spain; in 1835 its property was devoted to the payment of the public debt. Through the Inquisition Spain was depopulated and impoverished.

In America.

After the discovery of the New World, Spain introduced the Inquisition into her American colonies, and proceeded against the Maranos and Jews who had sought refuge there. One of the first to be condemned by the Inquisition at New Española was Diego Caballero, the son of Neo-Christians from Barrameda. The Inquisition was introduced into Mexico in 1571; and three years later the first auto da fé was held. Between 1574 and 1593 nine autos were held there. At one held Dec. 8, 1596, 60 persons appeared in the sanbenito, and more than 100 at the auto of March 25, 1602. In 1608 Jorge de Almeida was excommunicated "in contumaciam," and in 1645 the young Gabriel de Granada was sentenced (Cyrus Adler, in "Publications Am. Jew. Hist. Soc." iv. 29 *et seq.*; "Trial of Gabriel de Granada," ed. C. Adler, *ib.* No. vii.). In 1646 and the following years autos continued to be held in Mexico; at the first two of these, 71 persons, mostly Judaizers, appeared; at the auto of March 13, 1648, 48 persons, among them Anna Xuarez; and in 1649 many Judaizers were either readmitted to the Church or burned in effigy. In 1659 Diego Diaz and Francisco Botello suffered at the stake as faithful Jews (A. de Castro, "Historia de los Judios en España," p. 214; Puigblanch, "Inquisition Unveiled," p. 106).

There were also tribunals at Lima and Carthagena. One of the first victims at Lima, about 1581, was the physician Juan Alvarez of Zafra, who, together with his wife, children, and father, was burned as a confessor of Judaism. A few years later a similar fate befell Manuel Lopez, also called "Luis Coronado." A great auto da fé was held at Lima Jan. 23, 1639. Of the 63 Judaizers who then appeared 11 (and these were the wealthiest) were burned. Among the martyrs for Judaism on that day were the physician Francisco Meldonado de Silva, also called "Eli Nazareno," and Diego Lopez de Fonseca. At the same time the physician Thomas (Isaac) Tremiño (Trebiño) de Sobremonte was burned at Lima, or, according to another source, at Mexico. In all, 129 autos da fé were held in America; and in the period between 1581 and 1776, 59 persons were burned alive, and 18 in effigy.

The Inquisition was not introduced into Portugal until after many struggles. John III. (1521-57), possessed of the most intense hatred for the Neo-

TITLE-PAGE OF PROCESS OF INQUISITION OF MEXICO AGAINST SIMON LOPEZ, 1642.

(In the possession of E. Nott Anable, New York.)

Introduction into Portugal.

Christians, began to intrigue for its establishment in his dominions. He was supported in his schemes by Queen Catherine, a granddaughter of Isabella the Catholic, and especially by a converted Jew named Henrique Nunes, who represented to the king that the greater part of the Neo-Christians were still Jews at heart, and who strongly urged the institution of the tribunal.

A further stimulus to the introduction of the Inquisition was the appearance of the adventurer David Reubeni, who, after circumcision, called himself Solomon Molko (Malcho) and the young Portuguese visionary Diogo Pires, who was so powerfully influenced by Molko. The Maranos, trusting in the Messianic redemption proclaimed by Molko, ventured in their enthusiasm to rescue a few women from the clutches of the Spanish Inquisition. Enraged at this, Selayo, the inquisitor of Badajoz, wrôte to the king (March 30, 1528), beseeching him to follow the example of the neighboring country and to extirpate the Neo-Christian heretics, root and branch. At the same time, the Maranos in Gouvea were falsely accused of having desecrated an image of the Virgin and were subjected to other groundless charges. The king, influenced by these facts as well as by the continued urging of the young queen and of "other powerful lords," as stated in a memorial of the Neo-Christians to the pope, was finally induced to adopt the plan for the introduction of the Inquisition. But Jews were burned in Portugal even before the introduction of the Inquisition. To the great delight of the populace, who arranged for a bull-fight to celebrate the event, the Bishop of Ceuta, a former Franciscan, caused five Maranos who had observed the Mosaic law to be publicly burned in Olivença, which town belonged to his diocese.

John III. Seeks to Introduce It.

The king, in spite of the dissuasion of the noble Bishop Fernando Coutinho of Silves and of Diogo Pinheiro of Funchal, applied to the pope for permission to introduce the Holy Office. In the spring of 1531 the king commissioned Bras Neto, his ambassador at the Curia, to obtain from Pope Clement VII. as quickly and secretly as possible a bull to this effect. At first Bras Neto encountered great opposition; for Cardinal Lorenço Pucci openly declared that King John's chief aim was, as had been that of Ferdinand and Isabella, to get possession of the Maranos' property. Pucci, however, died shortly after, and the bull "Cum ad Nihil Magis," which gratified King John's wishes, was obtained (Dec. 17, 1531). At the suggestion of Affonso, the Franciscan Diogo da Silva, confessor of King John, was appointed grand inquisitor.

Restraining the Neo-Christians.

But it was a far cry from the papal decree to the actual establishment of the Inquisition. Da Silva, who had been appointed grand inquisitor, refused to accept the position, which he detested. In the meanwhile the Neo-Christians, who were kept informed of the progress of affairs by friends in Rome, made preparations to emigrate, although a law issued by John on June 14, 1532, sought to make it impossible for them to leave the country. Every one who should aid or abet the Maranos in their attempt to escape was to be punished with confiscation of property, and any owner of a vessel and any captain who should transport them were to be sentenced to death.

"Bulle de Perdon" of 1533.

As it seemed to the Neo-Christians that they were destined to be killed, they determined to adopt the most extreme measures and to turn to Rome for protection. They sent to that city the talented Marano Duarte de Paz, who obtained first the suspension of the bull, then (Oct. 17, 1532) its abrogation, and finally (April 7, 1533) the bull of pardon ("Bulle de Perdon"). In this the pope pointed out that those who had been baptized by force were not to be regarded as members of the Church, and hence not as heretics; but that, on the other hand, those who had been voluntarily brought into the Church by their parents were to be regarded as Christians, and even if they had nevertheless been educated as Jews were to be treated with consideration and won over to Christianity through kindness and love.

According to this bull all Neo-Christians shared in the edict of pardon and were to be enabled to leave the country with their property. Disregarding the threats of ban and excommunication, John prevented the publication of the bull; and he employed every means to have it repealed. He sent D. Henriquez de Menezes as ambassador extraordinary to Rome. With the aid of Cardinal Santiquatro, Menezes finally succeeded in having the matter investigated by a new commission, consisting of Cardinals Campeggio and De Cesis, in whose knowledge and integrity the pope had full confidence, of Santiquatro and of the Portuguese ambassador. As a result of their report Clement issued a new and much more energetic brief (April 2, 1534), and a few months later (July 26) another brief to the nuncio in Lisbon, ordering him to publish the bull of April 7, 1533, without delay and to effect the liberation of all imprisoned Maranos.

Continued Struggles.

Under Clement's successor, Paul III., a friend to the Jews, the struggle concerning the Inquisition in Portugal was continued. King John, in whose interest the Spanish ambassador at Rome, Count de Cifuentas, and Cardinal Santiquatro were active, left no means untried to induce the pope to repeal the bull of his predecessor. At the same time the representatives of the Neo-Christians, Duarte de Paz and Diogo Rodriguez Pinto (who joined De Paz later), were not idle. Paul decided in Nov. (3 or 26), 1534, that for the present the "Bulle de Perdon" should not be published. He then submitted the matter for further careful investigation to a commission consisting of theologians and jurists, among whom were Cardinals Hieronymo Ghenucci, author of a work in defense of the Neo-Christians, and Jacobo Simonetta, one of the most learned men in the Curia. The majority of this commission expressed itself in favor of the Neo-Christians. At the same time the papal nuncio in Lisbon informed the Curia that the "Bulle de Perdon" had been published throughout the land, but that the king not only refused to liberate those imprisoned for their religious belief, but had made new arrests and had renewed

(June 14, 1535) for three years the law of July 14, 1532, prohibiting emigration.

With John, as with his father Manuel, the chief concern was the property of the Maranos; and for this reason neither father nor son wished them to leave the country. The former desired to baptize them; the latter, to burn them. Knowing this, the pope issued the humane brief of July 20, 1535, in which every one, on pain of excommunication, was forbidden to hinder the emigration of the Maranos. Soon after the issue of this brief the pope made a proposition to King John—it is said on the advice of Diogo Rodriguez Pinto—to grant pardon to all Neo-Christians, even to those imprisoned, and to permit them to leave the country within a year. In case he did this, the pope would permit the king to introduce the Inquisition in the way he desired. John, however, would listen to no concessions of this sort.

Bull of Oct. 12, 1535.

Tired of these endless negotiations, Paul issued (Oct. 12, 1535) a new and decisive bull, similar to the "Bulle de Perdon" of April 7, 1533, in which he suppressed all suits brought against the Neo-Christians, canceled every confiscation of their property, and annulled all sentences against them without regard to place of residence or to any avowals made by them. In short, he declared all Neo-Christians of Portugal to be free. This bull was published in all parts of the country, the king being unable to prevent it. The whole Christian population of Portugal feared the anger of Rome. John, and still more eagerly the Infante Affonso, hastened to liberate the imprisoned Maranos, especially those who had a recommendation from Rome ("Bullar. Roman." ed. Cherubim, i. 712 *et seq.*: Herculano, "Da Origem . . . da Inquisição," ii. 143 *et seq.*).

It was said that the pope was willing to sanction the institution of a tribunal for matters of faith on the following conditions: namely, that the Inquisition should not be an independent institution; that the evidence of servants, low persons, or convicts should not be received; that the testimony of witnesses should not be kept secret; that the prisons should be kept open; that suits should not be brought against deceased persons; that the property of heretics should not fall to the state treasury, but to the heirs of the condemned; and that appeal to the Curia should be permitted (Sousa, "Annæs," p. 459; Herculano, *l.c.* ii. 107 *et seq.*). The hatred of the king toward the Maranos and his greed were too great to permit him to assent to any such conditions. In order to attain his end he turned to his brother-in-law, Emperor Charles V., to secure his intervention with the pope. Accordingly, when Charles entered Rome (April, 1536) as victor over the Turks, he asked the pope as a special favor to grant John's demand. Paul, however, refused, saying that the Maranos of Portugal, who had been forcibly baptized, could not be regarded as Christians.

Bull of May 23, 1536.

Meanwhile Duarte de Paz had been disposed of—not without the knowledge or the connivance of King John—and unfortunately the enormous sums which he had promised the Roman Curia could not be raised by the Neo-Christians. In vain did the nuncio Della Ruvere negotiate with the rich Maranos in Evora; he also put himself in communication with the wealthy Diogo Mendes, who had already made so many pecuniary sacrifices for the sake of his fellow sufferers. Paul could not long withstand the violent demands of the emperor. The Portuguese ambassador at Rome, Alvare Mendes de Vasconcellos, pressed for a settlement of the affair; and on May 23, 1536, the pope issued a bull in which the establishment of the Inquisition in Portugal was definitely announced and by which the bulls of April 7, 1533, and Oct. 12, 1535, were wholly repealed (Aboab, "Nomologia o Discursos Legales," p. 293, the text of which is followed by Manasseh b. Israel, "Humble Addresses," p. 15, in Lucien Wolf, "Menasseh ben Israel's Mission to Oliver Cromwell," p. 95; Sousa, *l.c.* p. 397; *idem*, "Provas," ii. 713 *et seq.*). Paul III., however, imposed, for the first three years, the conditions that the procedure customary in civil courts should be observed; that the names of the accusers and witnesses should not be concealed from the unfortunate Neo-Christians; and that during the first ten years the property of the condemned should be secured to their nearest relatives. John ostensibly acceded to these conditions.

Before the Inquisition began its activity, the humane inquisitor-general Diogo da Silva, who had been recommended by Paul, promulgated a manifesto in which all Maranos were required within thirty days to make a complete confession of faith, under promise of full pardon. Before the thirty days had expired two of the most influential Neo-Christians of Lisbon, Jorge Leaõ and Nuño Henriquez, entered into negotiations with the Infante Louis, the king's brother, for an extension of this period to one year. All the representations, however, of the Infante and the advice of the most important statesmen were disregarded by the king. Thereupon, the "representatives of the Jewish nation," as they are called in documents of the time, appealed from the pope "ignorant of the true state of affairs," as they put it, to the pope whom they would acquaint with the real facts; and they tried to get from him a repeal of the bull of May 23. They declared openly:

> "If your Holiness should disregard the petitions and the tears of the Jewish nation, which we do not indeed expect, we hereby swear before God and before your Holiness with loud lamentations, and we solemnly declare before the whole world, that, since no place has been found where we have been admitted among Christians and since we, our honor, our children, our flesh and blood, have been persecuted, though we have tried to abstain from Judaism, if hereafter tyranny does not cease, we will do that which not one of us would otherwise have thought of; namely, we will return to our Mosaic religion and will abandon Christianity, through the teachings of which we have been forced to take this step.
>
> "We solemnly declare this, in the face of the cruelty to which we are sacrificed; we will make use of the right assured to us by your Holiness, by the cardinal protector, and by the ambassadors of Portugal, and we will all leave our old homes to seek safety and protection among less cruel peoples" (see the memorial in Herculano, ii. 182).

The Maranos were aided considerably in their struggle against the Inquisition by the nuncio Della Ruvere, who pictured the cruel procedure of King John in the darkest colors, and succeeded in persuading the pope to entrust the bull of May 23, 1536,

Further Negotiations.

to a commission for investigation. This commission consisted of Cardinal Ghinucci, Jacobacio, and Cardinal Simoneta. A new nuncio, Hieronymo Ricenati Capodiferro, was sent to Portugal with directions to protect the Neo-Christians and to see that the king punctiliously fulfilled his agreement. In consequence of complaints from Maranos concerning the inhuman treatment to which they were subjected, a brief was issued (Feb., 1537), in which the pope called upon the king, under pain of excommunication, no longer to oppose the emigration of Neo-Christians. It also authorized every one to give the accused help and support. Capodiferro, who was not proof against gifts of money, liberated the Maranos from the dungeons of the Inquisition and helped them to escape to Turkey and to Barbary. In spite of a grand inquisitor and all the machinery for persecution, the efforts of the nuncio practically put a check upon the Inquisition, and the Neo-Christians for a short time enjoyed repose, from which they were aroused by a remarkable incident.

The Lisbon Placard.

In Feb., 1539, placards were found on the doors of the cathedrals and churches of Lisbon, with the words: "The Messiah has not come. Jesus was not the true Messiah." The king and Capodiferro offered rewards of 10,000 (or 5,000) crusados for the discovery of the author of this proclamation. The Maranos, in order to divert suspicion from themselves and to escape the popular fury, posted the following proclamation on the cathedral door: "I, the author, am neither Spaniard nor Portuguese, but an Englishman; and if instead of 10,000 you should offer 20,000 escudos, you would not discover my name." Nevertheless the author was detected in the person of a Marano by the name of Manuel da Costa. Stretched on the rack he confessed everything; and after both his hands had been cut off he was publicly burned in Lisbon. The mild treatment of the Neo-Christians again ceased. The weak and lenient Diogo da Silva was removed; the Cardinal-Infante Henrique, a brother of the king, was appointed grand inquisitor; and the fanatical John of Mello and the immoral John Soares were made inquisitors. In order to win over the Curia, King John sent as ambassador to Rome the unprincipled Pedro Mascarenhas, who, by means of money gifts and promises, enlisted the cardinals on his side. Only the pope remained immovable. He insisted on the recall of the newly appointed inquisitor-general, and, influenced by reports concerning the cruelty of the tribunal, he issued a new bull Oct. 12, 1539, ordaining that the names of the accuser and of the witnesses be told to the accused; that false witnesses be punished; that no one be arraigned on the ground of statements made on the rack; that a commutation of punishment to a loss of property be not allowed without the consent of the condemned; and that appeal to Rome be always permitted.

Bull of Oct. 12, 1539.

This bull remained a dead letter, and John carried on his work with the greatest energy. In a communication to his ambassador, Mascarenhas, he offered to renounce all claim to the property of the condemned for ten full years, if the pope would grant the Portuguese Inquisition the same independence which that of Spain possessed. Scarcely had the ambassador given this letter to the pope, when Hector Antonio, brother of Diogo Antonio, who had come directly from Portugal, brought a complaint concerning the inhuman procedure of the Cardinal-Infante.

First Portuguese Auto da Fé.

The bull of Oct. 12, 1539, was never published. D. Henrique, who was hated by the pope, remained grand inquisitor; and the Holy Office developed an ever greater activity. The first tribunals were established in Lisbon, Evora, and Coimbra. The tribunal in Lisbon, the first inquisitor of which was John of Mello, celebrated its first public auto da fé Oct. 23, 1541. Among those burned was Gonçalo Bandara, a shoemaker who had proclaimed himself a prophet. A few months later the tribunal in Evora, the authority of which extended over Alemtejo and Algave, held its first auto da fé. There the first to suffer death at the stake were David Reubeni and Luis Dias, who had called himself the Messiah and who had imposed upon many Neo-Christians, among them the body-physician of D. Affonso, brother of the Cardinal-Infante.

The prisons of the Inquisition filled rapidly, and pyres burned in many places. The Maranos, bitterly disappointed in their expectations, tried only to limit the power of the tribunal and to have another nuncio sent to Portugal for their protection. To these ends they placed large sums at the disposal of their representative in Rome, Diogo Fernandez Neto. Neto had gained a powerful supporter in Cardinal Parisio, who during his residence in Bologna in the second and third sessions of the "Consil pro Christianis Noviter Conversis" had demonstrated "by reason and law, that considering they [the Jews] were forced to accept baptism and were not converted willingly, they had not fallen, nor do they fall, under any censure" (Aboab, *l.c.* p. 93; Manasseh ben Israel, *l.c.* p. 96). Although Neto had offered to make the pope a present of 10,000 crusados and to give the nuncio 250 crusados every month, and although the pope was strongly urged to take the step by Cardinals Parisio and Carpi, it was only after a stormy debate between the pontiff and the Portuguese minister De Sousa that the pope resolved to appoint a new nuncio. He chose Luis Lippomano, Bishop of Bergamo. Lippomano had not yet reached Lisbon when a remarkable incident occurred, which was exploited by King John to his own advantage. Letters were seized which seriously compromised the agents of the Maranos, the new nuncio, and even the pope himself.

The situation of the Maranos was now hopeless. The hands of the nuncio were tied: he could do nothing for them. Their agent, Neto, languished in prison; the majority of the cardinals, with P. Caraffa (the future Pope Paul IV.) at their head, sided with the king. The Neo-Christians, who had nothing more to lose, then sent to Rome new agents who by large gifts succeeded in winning back many cardinals to their cause. In order to refute the false reports of the Portuguese court and its agents, they in 1544 caused a comprehensive memorial to be prepared at Rome and given to the vice-chancellor, Alexander Farnese, who was friendly to the Jews and was at that time the most influential personage in the Curia.

This memorial, provided with forty-four supplements and containing an enumeration of all the trials and persecutions that the Maranos had suffered from their enforced baptism in 1493 up to the time of the memorial, exists in manuscript ("Symmicta Lusitania," xxxi., xxxii.), in the Bibliotheca da Ajuda and in the Borghesi library at Rome. Herculano, *l.c.* iii. 109 *et seq.*, gives several extracts from it.

Cruelties Perpetrated at Lisbon.

The tribunals proceeded with the greatest cruelty even before the Inquisition was sanctioned. The court at Lisbon, to which all the other courts of the country were subordinate, was presided over by the inquisitor-general John of Mello, the most implacable enemy of the Neo-Christians. The unfortunates, who languished in underground dungeons, had their limbs wrenched off; they were bastinadoed; the soles of their feet were cut open, the cuts were smeared with butter; and their bodies were then held over the flames. The inquisitor in Coimbra was the former bishop of S. Thomas, a Dominican who hated the Neo-Christians with inhuman hatred; and his nephew, a lad of sixteen who could not even write, was his secretary. A rich Marano from Porto, Simon Alvares, who had settled in Coimbra with his wife and children, was imprisoned by the Inquisition after nine years' residence in the city. His little daughter, scarcely ten years old, was placed in front of a brazier of glowing coals and was told that if she did not at once confess that her parents had struck a crucifix in Porto, her hands would be burned off immediately. In her utter fright the innocent child confessed. Alvares and his wife were burned.

The activity of the Inquisition in Coimbra quickly spread over the province of Beira. It sent its agents to Trancoso, of which the richest inhabitants were Neo-Christians, most of whom fled to the mountains. Thirty-five persons, the old and sick, who had been unable to escape, were arrested and thrown into the prisons of the Inquisition. The first inquisitor in Evora was Pedro Alvares de Paredes, a Castilian who had been inquisitor in Llerena, but had been dismissed on account of various irregularities. He possessed a rare faculty for extorting avowals from the accused. He forged letters and read forged decisions to the prisoners, and by this means forced his victims to admit what he demanded of them. In Lamego, the home of many Maranos, the Inquisition was introduced toward the end of 1542, to the indescribable joy of the populace. At the sight of the officers of the Inquisition the Neo-Christians were filled with such terror that most of them fled to Tras-os-Montes, but they were brought back to Lamego. A little later Porto also received a tribunal. The bishop of the diocese, Balthasar Limpo, a Carmelite, was the inquisitor, and he waged a war of complete extermination against the Neo-Christians. Criminals and prostitutes were hired to testify against them. A veritable monster was a certain Francisco Gil, who went about his business of capturing Maranos very craftily. The number of imprisoned Neo-Christians became so large that the jails of the Inquisition could not hold them. In Lisbon the Estaõs, situated on the Rocio place, and several public buildings were utilized as prisons. Seven or eight girls and women were often stretched on the rack in one day. The description which the above-mentioned memorial of the Neo-Christians gives of the cruel procedure of the Portuguese Inquisition in the early years of its unnatural existence wholly agrees with the account of S. Usque in his "Consolaçam," p. 202a. But the efforts of the Neo-Christians finally proved effective. Paul III. once more opposed the deeds of violence and excesses of the Portuguese Inquisition. In place of the weak Lippomano he appointed a new nuncio, Cardinal Ricci de Monte Policiano. King John, however, allowed the new nuncio to enter Lisbon only after a long interchange of communications between the Portuguese court and the Curia (Sept., 1545). The decisiveness of Ricci, who sternly rebuked the Cardinal-Infante, the king, and the prelates for the inhuman procedure of the inquisitors, caused the fight between John and the Curia to be renewed, and fresh cause for strife was furnished by the bull of Aug. 22, 1546, which prolonged that of May 23, 1536, for a twelvemonth and prohibited the confiscation of the property of Neo-Christians for ten more years. The king, although at first not a little angered over this bull, became in the end more submissive. Four of the most prominent Maranos were entrusted by him with a commission to define the conditions under which their fellow believers and sufferers would submit to a religious tribunal. They prepared a document, presented to the king in Jan., 1547, in which they demanded that the long-decreed pardon should be put into effect; that the severe procedure of the Inquisition should be mitigated; and that the names of accusers and witnesses should be communicated to the accused.

Bull of Aug. 22, 1546.

Memorial of the Neo-Christians, Jan., 1547.

"If we should be granted peace," it says, "all Neo-Christians who are now in the country would stay here and those also who are wandering in Galicia and Castile, and many of those who have already settled in Flanders, Italy, and other lands would return; they would establish business houses and resuscitate the commerce, which is now prostrate. . . . The severity of the Spanish Inquisition ought not to be taken as a model. The Portuguese resolve to leave home more quickly; it would be in vain to forbid them to emigrate. Experience has shown how readily they abandon property and everything else and with what fearlessness they defy every danger in order to escape from their birthplace. Without moderation and tolerance few of us will remain in the country. Even in Castile we are not ill treated until we have been found guilty of some crime. . . . To this extent our fellow believers exposed themselves to the dangers of the Inquisition and nevertheless how many escaped from Spain? At present those who flee from Portugal are hospitably received in the different Christian states and are protected with especial privileges, which we formerly did not dare to expect. This, Sire, is our attitude."

This plan proposed by the Neo-Christians was laid before the inquisitors for approval; but they would hear of no concessions. In order to bring the question to a final settlement the Curia resolved to proclaim a general pardon for all Maranos who should publicly confess their adherence to Judaism, and at the same time to order the king to grant them

Submission of the Curia.

a year in which to take their free departure from the kingdom. But to these proposals John would not agree on any conditions. The pope, unable to hold out any longer, finally submitted, although with a heavy heart. Ugolino, a nephew of Cardinal Santiquatro, was sent as commissioner extraordinary to transmit three bulls—(1) for the institution of the Inquisition, (2) the one of pardon (May 15, 1547), and (3) that suspending the privileges granted—to the king and, according to his instructions, to the "chefes da nação," the representatives of the Neo-Christians. (All of these bulls—dated before July, 1547—are preserved in manuscript in the national archives at Lisbon.) This ended the twenty years' struggle. The Inquisition in Portugal had been held in check by the expenditure of enormous sums by the Neo-Christians; and the king finally bought it from Rome by means of still greater sums. As a reward for the cardinals' efforts, several of them received rich preferments and considerable pensions. Cardinal Farnese, the last to be won over by the king, received the bishopric of Visen, which was taken away from Miguel da Silva; and Santiquatro was given an annual pension of 1,500 crusados.

Recantation of Neo-Christians, 1548.

On July 10, 1548, the pardon was published in the Cathedral of Lisbon, and soon afterward the general recantation of the Neo-Christians took place in front of the Church of the Hospitalers. The prisons of the tribunals in Lisbon, Evora, and Coimbra were emptied for a time; and the activity of the tribunals of Porto, Lamego, and Thomar came to an end forever. About 1,800 persons were set free (Herculano, "Da Origem," iii. 304 *et seq.*; "Historia da Inquisição," p. 5; Aboab, *l.c.* p. 293; "Münchener Gelehr. Anzeiger," 1847, No. 79).

After a few years the Inquisition resumed its operations. The Neo-Christians were remorselessly arrested and stretched upon the rack. They enjoyed a short respite during the reign of Sebastian, who allowed them, in return for the enormous sum of 225,000 ducats, to leave the country, and released them for ten years from confiscation of their property. Much more cruel was the procedure of the Cardinal-Infante Henrique, who caused many Maranos to be burned to death. Under his rule they were so sorely oppressed that they complained to the pope, although in vain.

General Pardon of 1604.

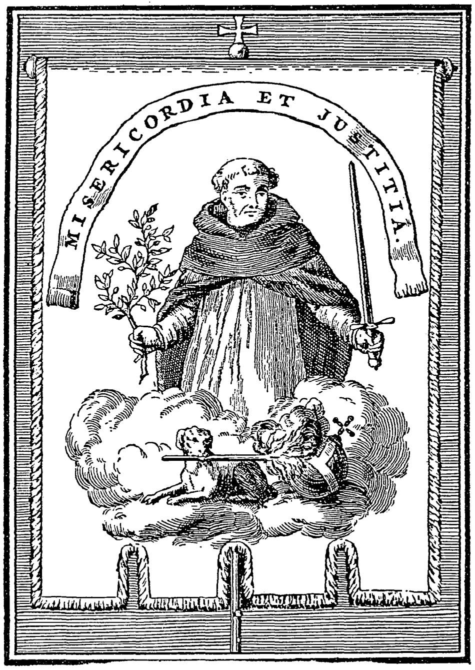
After the death of D. Henrique, Portugal fell under Spanish rule, and the Inquisition celebrated its greatest triumphs. On Aug. 3, 1603, a grand auto da fé was held on the Praça Ribeiro in Lisbon, in presence of the viceroy. The Franciscan Diego de la Assencion, who had been convinced of the truths of Judaism by reading the Bible, was burned, together with Thomar Barocas and other persons who sacrificed themselves for their faith. A year later Philip III., in return for the payment of a large sum, interceded with Pope Clement VIII. in behalf of the Maranos; and in a bull dated Aug. 23, 1604, the pope granted a general pardon. As soon as the bull reached Lisbon an auto da fé of 155 persons was arranged; but the accused acknowledged their fault, and were set free (Jan. 16, 1605). Under Philip IV., Lisbon, Evora, and Coimbra had at least one auto da fé every year. At one which was celebrated in Lisbon May 5, 1624, the deacon ("diaconus") Antonio Homom, who had led divine service and preached in a synagogue in Lisbon, was burned. After an auto da fé had been held in Evora on April 1, and one in Lisbon on Sept. 2, 1629, a law was passed (Nov. 17 of that year) permitting Neo-Christians to emigrate without hindrance.

Renewed Activity Under John IV.

King John IV., of the house of Braganza, after the liberation of Portugal from Spanish rule, had, it was claimed, the earnest intention of granting liberty to the Maranos and of stopping the Inquisition (1640); but he was prevented from so doing by the grand inquisitor Francisco da Costa. According to another opinion, the Neo-Christians offered the king a large sum of money if he would suspend the tribunal; but he decided in the negative. However this may have been, the Maranos continued to be tortured, garroted, or burned. On April 2, 1642, two very rich Neo-Christians accused of professing Judaism were burned in the presence of the queen; and on Dec. 15 (22), 1647, Isaac de Castro Tartas, a philosopher, was also burned with five other Neo-Christians, while 60 were condemned to lifelong imprisonment or other punishments. On Dec. 1, 1652, the Portuguese consul-general and author Manuel Fernandes de Villa-Real suffered death by fire in Lisbon, and on Dec. 15, 1658, 90 Neo-Christians appeared at an auto da fé, of whom 6 were burned because they kept the Jewish festivals and would not eat swine's flesh. But, as the English consul Maynard wrote to Thurloe, the secretary of state in London, "their greatest crime was the possession of wealth" ("Collection of State Papers," vii. 567). Two years later (Oct. 17, 1660), at an auto da fé in Lisbon, many Neo-Christians were burned at the stake; and on Oct. 26, 1664, no less than 237 persons appeared at an auto in Coimbra. An attempt to break the power of the tribunal was made at this time by the learned Jesuit Antonio Vieira, who was employed in the state service under John IV., and who exercised great influence over King Pedro, whose tutor he was. For some unknown reason Vieira was degraded by the Inquisition in Coimbra and condemned to prison. Set free after six months' imprisonment, he went to Rome (1669) with the intention of revenging himself on the tribunal. The Jesuit provincial of Malabar, Balthasar da Costa, during his stay in Lisbon undertook to pave the way for Vieira. In a conference with the prince regent Da Costa suggested the means by which Portugal might reconquer India. He advised the prince regent to obtain a general pardon for the Neo-Christians, who would then gladly give him the sums necessary for carrying on the war. The Neo-Christians also were not idle. They put themselves in communication with Manuel Fernandes, the father confessor of Pedro, and came to an agreement with

Attempt to Restrain the Tribunal.

him, of which the chief point was that the Inquisition should no longer keep them in prison nor condemn them. On the advice of Manuel Fernandes, in order to give the matter more authority, the opinions of theologians and of the Jesuits at the University of Coimbra and other colleges were obtained (1673). All spoke in favor of the Neo-Christians. Thereupon, Manuel Fernandes, at the desire of the prince regent, placed the matter before the pope in a document composed by himself; and the Neo-Christians, in accordance with the pontiff's wish, sent a representative to Rome, where Vieira was displaying great activity in their behalf. Their representative was Francisco de Azevedo, who placed abundant means at the disposal of the Jesuits and truthfully described the inhuman procedure of the Inquisition. In the light of these events, Pope Clement X. issued a bull Oct. 3, 1674, which suspended the activity of the Portuguese Inquisition and strictly prohibited every condemnation or confiscation of property.



MISERICORDIA ET JUSTITIA.

The Banner of the Inquisition at Goa.
(After Picart.)

Scarcely had this bull become known through the papal nuncio in Lisbon, when the inquisitors and a considerable portion of the Cortes, which had just assembled, urged Pedro to repress the pretensions of the Neo-Christians; and the regent insisted that everything should be restored to "its former state." To this, however, the nuncio could not and would not agree. Dissensions again arose between the Portuguese court and the Curia. The new inquisitor-general Verissimo de Alemcastro, appointed by Innocent XI., Clement's successor, refused to obey the papal command. Thereupon, the pope ordered the nuncio to proclaim again the bull of Oct. 3, 1674, and commanded the inquisitor-general to hand over to the nuncio within ten days all the documents of the tribunals. After long negotiations the Inquisition resumed its activity on the strength of the bull of Aug. 22, 1681; and on May 10, 1682, an auto da fé was held in Lisbon, the first of the new series, and the largest and most horrible in the whole history of the Portuguese Inquisition. The cruelty of the Inquisition is shown by a law of Aug. 5, 1683, according to which children of seven years and upward were to be taken away from all those who had once been placed before a tribunal (Manuel Thomaz, "Leis Extravagantes do Reino de Portugal," p. 188; Kayserling, "Gesch. der Juden in Portugal," pp. 355 *et seq.*).

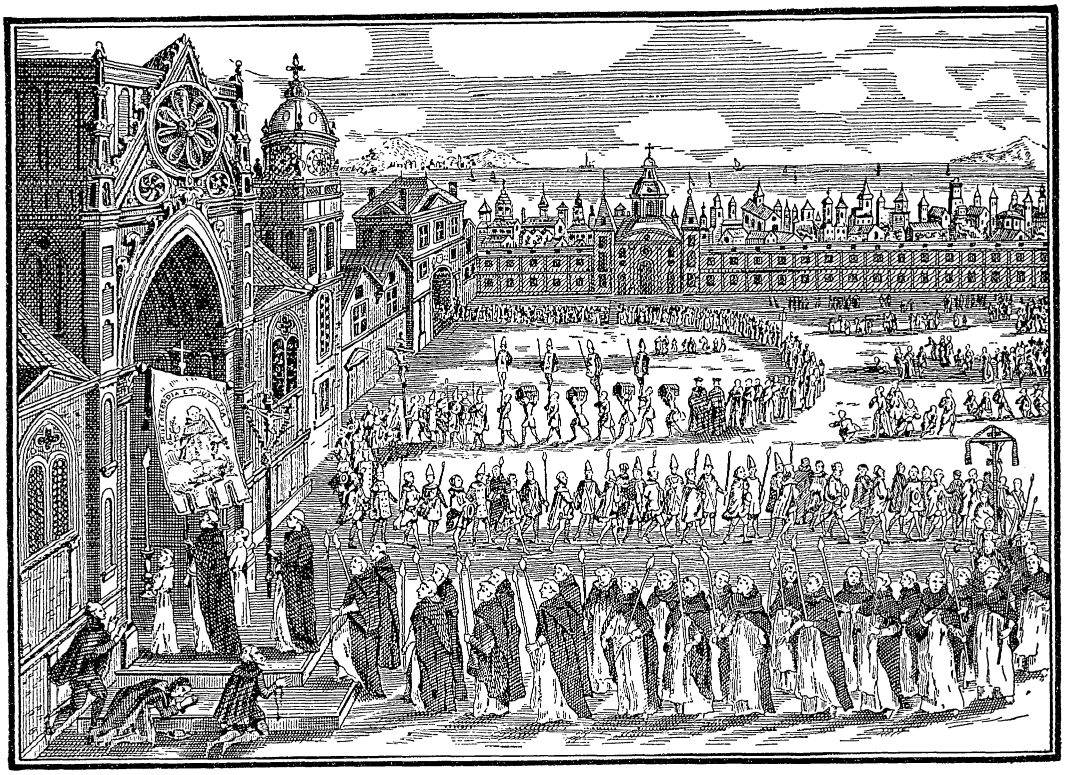
In the Eighteenth Century.

Even in the eighteenth century backsliding Neo-Christians were burned at the stake in Portugal. In Lisbon, Evora, and Coimbra there were autos in 1701, 1704, and in the following years. At one held in Lisbon Sept. 6, 1705, 60 persons appeared as professors of Judaism, and the Bishop of Cranganor made a speech in which he shamefully attacked Judaism. His accusations were refuted by David Nieto, haham of London. On June 30, 1706, six Judaizers were burned in Lisbon; and on July 9, 1713, an auto da fé was celebrated in that city, at which the inquisitor Francisco Pedroso, in a speech which appeared in print, launched forth into a dogmatic admonition against Jewish faithlessness. At the same time the condemnation of a nun who was accused of being a secret Jewess was the occasion of a veritable revolt among the nuns. The tribunal in Coimbra organized an auto da fé June 17, 1718, at which more than 60 Maranos, all of them from Braganza, were condemned, and some of them, *e.g.*, Manuel Rodriguez de Carvalho and Isabella Mendes, accused of desecrating the host, were strangled and then burned (Ross, "Dissertatio Philos. Qua Inquisitionis Iniquitas Evincitur," Marburg, 1737). An apothecary from Braganza, Francisco Diaz, met a like fate in Coimbra March 14, 1723. On Sept. 1, 1739, 4 men and 8 women were condemned to death by burning, and 35 Judaizers were condemned to imprisonment for life.

The power of the Inquisition was broken by King Joseph. In 1751 he issued a decree to the effect that before trial the prosecutors of the tribunal must inform the accused of the charge against him, and of the names of the witnesses, that the accused should be free to choose his own counsel, that no verdict should be rendered without the approval of the government, and that no further auto should be held. During the great earthquake which destroyed Lisbon (Nov. 1, 1755), the building in which the proceedings of the Inquisition took place fell to the ground. A theater now occupies the site. The Inquisition was completely abolished on March 31, 1821.

In the Portuguese Colonies.

The Portuguese carried the Inquisition to their transoceanic possessions. The wealth acquired by the many Maranos who sought protection there opened up a new field for its activity, and as early as 1555 the Jesuit Belchior Carneiro tried to crush such colonists. Its chief seat was at Goa, in South India, and its first grand inquisitor, the archbishop Gaspar de Leaõ, who issued a proclamation "to the people of Israel" Sept. 29, 1565. In Brazil the Inquisition raged more fiercely than the famine or the plague. A trace of Jewish blood was considered the greatest crime. All Maranos who were found in the Portuguese colonies or on ships bound thither had to be sent back to Portugal; and if no ship was returning at the time, they were taken to Goa and held captive there until a vessel set sail for Portugal. At the auto da fé held at Lisbon on Dec. 15, 1649, 5 Judaizers of Pernambuco were burned. At Rio de Janeiro the Inquisition began its persecution of the Maranos in 1702, when Bishop Francisco da S. Jeronimo of Evora was made governor. From Rio shiploads of Maranos were sent every year to Lisbon and handed over to the Inquisition, or the reverse was the case, and Maranos in Portugal were sentenced to several years' exile in Brazil. Among those who suffered death at the stake were Therese Paes de Jesus (1720), seventy-five years old, wife of Francisco Mendes Simoẽs; Manuel Lopez de Carvalho of Bahia (1726); John Thomas de Castro (1729); and the wife of Francisco Pereira (1731). Many Maranos born at Rio de Janeiro and living there, among them Joseph Gomez de Paredes, an "estudiante de gramatica," twenty-four years of age, together with his elder brother and his sister, twenty years old, were sentenced to imprisonment for life at the auto da fé held at Lisbon Oct. 10, 1723.



Procession of the Inquisition at Goa.
(After Picart.)

At Rome.

At Rome the Inquisition was first invested with the power which became so fateful to the Roman Jews by the bull "Turbato Corde," issued by Pope Clement IV. July 26, 1267, and confirmed by Gregory X., Nicolas III., and Nicolas IV. It was directed chiefly against the neophytes who returned to Judaism, and also against those Jews who had seduced the neophytes and confirmed them in their purpose. In 1299 the Jews of Rome complained to Pope Boniface VIII. that the inquisitors concealed from them the names of their accusers and of the witnesses; and the pope thereupon protected the Jews, being unwilling that they should be subjected to injustice and oppression.

The later Inquisition began under Pope Paul III., who at the beginning of his reign had protected the Spanish and Portuguese Maranos and had permitted them free sojourn in Rome. In April, 1542, he instituted the "Congregatio Sancti Officii," consisting of six cardinals; and on Sept. 4 of the same year the Franciscan Cornelio of Montalcino, who had embraced Judaism, was burned at Rome by the pontiff's order. The inflexible Pietro Caraffa, Pope Paul IV., who lived only for the Holy Office, made the Italian Inquisition the peer of the Spanish in cruelty. On April 30, 1556, he decreed that all Jews or Maranos arriving from Portugal should be immediately burned; and in the following May, 24 persons, among them seven old men—Simon ibn Menahem, Joseph Oheb, Joseph Papo, Abraham Cohen, Samuel Guascon, Abraham Falcon, and Abraham d'España — together with Solomon Yaḥya Jacob Mozo, Moses Pazo, Solomon Pinto, Solomon Aguades, Abraham Lobo, David Reuben, and the pious Donna Majora were publicly burned at Ancona (Joseph ha-Kohen, "'Emek ha-Bakah," pp. 116 *et seq.*; "R. E. J." xxxi. 222 *et seq.*). After the death of Paul IV. there was a riot in Rome, during which the tribunal of the Inquisition was stormed, the officials maltreated, the documents burned, and the prisons forcibly opened. Pius V. strengthened the tribunal; and Gregory XIII. gave to it new powers over the Jews. On Feb. 9, 1583, Rome witnessed the burning of a Jew, the Marano Joseph Saralbo, born in Portugal, who openly confessed Judaism at Ferrara. The Inquisition likewise had unlimited power under Paul V., Gregory XV., and Clement XI., although the Jews did not suffer from it then.

In France, the Inquisition, which had been abolished, was again instituted by Pius VII. (Aug., 1814), though against Jewish books and not against Jews.

In Sicily.

In Sicily the Inquisition at an early date directed its activity chiefly against the Jews. Emperor Frederick II., who was not friendly to them, although he gathered Jewish scholars at his court, granted the Inquisition in Sicily in 1224 one-third of the property confiscated from the Jews. Pope Clement VI. gave orders in 1344 to his legate in Naples to punish all Jewish apostates severely; and in 1355 Innocent VI. exhorted Francisco da Messina to perform his duties rigorously. The Jews, persecuted by the Inquisition and deprived of their property, appealed in 1375 to the king, who thereupon commanded the inquisitors to keep the captives in the royal prisons only, to require civil judges to take part in the prosecution, and to grant to the condemned the right to appeal. In 1449 Pope Nicolas V. appointed Matteo da Reggio inquisitor, directing him to put to death Jews guilty of apostasy after baptism —then of very frequent occurrence. In 1451 Curio Lugardi, inquisitor of Palermo, compelled the Jews, by virtue of the decree promulgated by Frederick II. in 1224, to provide once a year for the service of the inquisitor and for his official traveling expenses. Even before the introduction of the Inquisition into Spain the above-mentioned law of 1224 was confirmed, at the request of the Sicilian inquisitor, Philip de Barbieri, by Isabella the Catholic at Seville (Sept. 2, 1477) and by Ferdinand of Aragon at Jerez de la Frontera (Oct. 18, 1477). The Inquisition in Sicily, having its chief seat at Palermo, was under the jurisdiction of the inquisitor-general of Spain, and was modeled after the Holy Office in that country. During its existence more than 200 persons were burned alive, and 279 in effigy, while more than 300 individuals were subjected to various lesser punishments. On March 30, 1782, Ferdinand IV., amid the great rejoicing of the Jewish population, abolished the institution.

BIBLIOGRAPHY: There is as yet no history of the Inquisition having especial reference to Judaizers; such a work, which would be highly desirable, could be prepared only after a thorough examination of the records of the Inquisition. These are to be found at Madrid, Simancas, Seville, and Cordova, at Lisbon, Coimbra, and Evora. In addition to the sources mentioned in the text and in the article AUTO DA FÉ, see Javier G. Rodrigo, *Historia Verdadera de la Inquisicion*, Madrid, 1876 *et seq.*; *R. E. J.* xv. 263, xviii. 231 *et seq.*, xliii. 126 *et seq.*; E. N. Adler, in *J. Q. G. M. K.

INSANITY: Mental disease. Among the Jews the proportion of insane has been observed to be very large. From statistics collected by Buschan he concludes that they are four to six times more liable to mental disease than are non-Jews. Lombroso quotes Servi ("Gli Israeliti di Europa," 1872) to the effect that in Italy there is one insane among 391 Jews, nearly four times as many as among the Catholic population of that country. Verga ("Archivio di Statistico," 1880) shows that in 1870 there was one insane among 1,775 Catholics in Italy, while with the Jews it reached the alarming proportion of one insane in 384 of population. A similar phenomenon has been observed in other countries. In the various provinces of Germany and also in Denmark the percentage of Jewish insane is very large, as is seen from the figures in the appended table:

Country.	Year.	Insane to 10,000.		Authority.
		Christians.	Jews.	
Prussia	1871	Catholics ... 8.84 Protestants. 8.47	16.79	"Preussische Statistik," QI 1883, xxx. 137.
"	1880	Catholics .. 12.37 Protestants. 24.2	38.9	*ib.* 1883, p. xlii.
Berlin	1880	Catholics ... 14.0 Protestants. 18.1	13.9	
Posen	1880	Catholics ... 13.8 Protestants. 17.5	19.3	
Silesia	1880	Catholics ... 19.3 Protestants. 22.1	32.1	
Hanover	1880	Catholics ... 30.8 Protestants. 29.2	62.9	
"	1863	17.1	29.7	Buschan, "Allg. Med. Centralzeitung," 1897, Nos. 9 *et seq.*
Württemberg ..	1863	4.8	6.4	
Bavaria	1863	10.6	19.2	
"	1871	9.8	25.2	
"	1881	9.0	28.6	
"	1883	16.9	31.5	
"	1884	17.0	37.3	
"	1885	16.4	27.19	
Denmark	1863	5.8	33.4	
Italy	1880	5.8	39.0	

In this table the proportion of Jewish insane is in nearly all places very large, in some cases more than double that of the non-Jewish population.

Maximoff and Sikorsky have shown that similar conditions prevail in Russia. Among the troops in Kiev they found the following proportions of insane:

Russians	0.91 per cent insane.
Poles	0.92 " "
Mohammedans	1.06 " "
Jews	2.19 " "

("Proceedings of the Twelfth International Medical Congress," vol. iv., part i., p. 661.)

There are similar statistics for other parts of Russia (see M. A. Ryazanski, "Vrachebnaia Gazeta," 1902, ix. 438-442).

In Vienna.

In Vienna A. Pilcz has recently shown that the Jews have a proportionally larger number of insane than the Gentiles. The figures taken from the records of the First Psychiatric Clinic in that city show that from Jan. 1, 1898, to Aug., 1901, 1,219 patients (723 men and 496 women) were treated for insanity at that institution. Of these 134 (10.99 per cent) were Jews. As to sex, 81 (64.9 per cent) were men and

53 (35.1 per cent) women. The population of Vienna, according to the census of 1900, was 1,648,335, of which 146,113 (8.86 per cent) were Jews. Among the 723 non-Jewish male insane 173 were found to be affected with alcoholic insanity; among the 496 female patients, 22. As not one Jew or Jewess was affected with alcoholism, Pilcz remarks that when the cases of alcoholism are deducted the relative percentage of Jewish insanity is perceptibly increased.

In New York city Frank G. Hyde has collected the statistics of the admission of Jewish insane to the asylums during the period extending from Dec. 13, 1871, to Nov. 30, 1900. He found that of 17,135 males, the total number of cases recorded, 1,722 (10.05 per cent) were Jews. While the percentage of Jews in Greater New York is at the present time (1903) estimated to be about 18 per cent, it must be recalled that up to 1882 there were comparatively fewer Jews there, and that this indicates a higher proportion than 10.05 per cent for the 29 years. Indeed, an analysis of the figures given by Hyde for the five years ending Nov. 30, 1900, shows that the proportion of Jewish insane in New York city is perceptibly larger. During these five years 3,710 insane were admitted to the asylums of the city; 573 (15.44 per cent) of these were Jews.

C. F. Beadles, who has investigated the subject in the Colney Hatch Asylum in London, shows that there appears to be a great preponderance of general paralysis among Jewish males, over 21 per cent of all the male Jews admitted being subjects of that disease, while the proportion of cases of general paralysis among all the males admitted to the hospitals for the insane in England and Wales is only 13 per cent. "It is evident," says Mr. Beadles, "that among the Jewish males, admissions for general paralysis are 60 per cent more frequent than among the non-Jewish English and Welsh." No such disparity has been observed in the case of Jewesses.

General Paralysis.

The frequency of general paralysis in Jews observed by Beadles is confirmed by Hirschl, who found among 200 of his paretic patients 40 Jews, *i.e.*, 20 per cent (Hirschl, "Zur Aetiologie der Progr. Paralysis," in "Jahrbuch für Psychiatrie," xiv. 449). Pilcz also found a large proportion of paretics among the Jews in Vienna: 18.75 per cent of all cases, though this is about the same proportion as among his non-Jewish patients—18.07 per cent. He adds that the Jews' acute struggle for existence, and their peculiar occupations as merchants, speculators, stockbrokers, etc., are etiological factors.

On the other hand, Minor of Moscow has found that general paralysis has been six times more frequent among his Gentile patients than among his Jewish patients. He also cites statistics from the practise of Kajewnikoff and Korsakoff to the effect that among the 2,403 cases of nervous diseases, including 347 Jews, noted by the former he found 48 affected with general paralysis. Only three of the 347 Jewish patients were affected with this disease. He explains this by the fact that 65 per cent of the paretics gave a history of previous syphilis, while among the Jews syphilis was very rare. Among the 2,610 of Korsakoff's patients were 89 Jews. Of these patients 69 were affected with general paralysis, including one Jew. This observer also attributes the infrequency of paresis among Jews to the rarity of syphilis among them, and he shows that in 72 per cent of his paretics could be discerned syphilitic antecedents. Minor summarizes as follows:

In 4,700 Christian patients 124 cases of general paralysis = 2.6 per cent.

In 696 Jewish patients 6 cases of general paralysis = 0.8 per cent.

It thus appears that the whole question resolves itself into the relative infrequency of syphilis among Jews. "In my experience," says George H. Savage of London, "there has been very little general paralysis either among the [Jewish] men or women. Just as other races are affected, general paralytics among Jews have nearly all some history of syphilitic degeneration" ("Jour. of Mental Science," 1900, xlvi. 735).

The infrequency of syphilis among Jewish insane, as among the Jews generally, has been observed repeatedly. In the insane asylums of New York city, as Hyde reports, among the 1,722 Jewish insane only 72 (4.18 per cent) had syphilitic antecedents, which proportion is very low.

In parallel lines it may be mentioned here that alcoholic insanity is only rarely found among Jews. Among 205 patients suffering from alcoholic insanity at the insane asylum in Vienna, Pilcz did not find a single Jew. In the New York city insane asylum Hyde records only 5.51 per cent of alcoholics among the Jewish patients. A similar low proportion is reported by Minor, Korsakoff, Kajewnikoff, and others to be the case in Russia.

According to the observations of Pilcz, Jews are more liable to the acute psychoses of early age than are Gentiles, and moral insanity is rare among them. In London, Beadles observed that insanity following childbirth is more common among Jewish women than among women of other races, being found in 15 per cent of all the Jewish women admitted to the Colney Hatch Asylum, as compared with 6.18 per cent among non-Jewish patients. It was also found by Beadles that insanity appears earlier in Jews of both sexes than in non-Jews: at thirty-seven years of age in Jews as compared with forty-three years in Christians. Relapses occur twice as frequently in Jewish patients discharged from insane asylums as in other patients. Melancholia is said to occur in Jewish patients more often than mania.

Suggested Causes.

The causes of the great frequency of insanity among Jews are differently interpreted by different authorities. Some, like Buschan, see in it a racial characteristic. They show that there is evidence in the Bible that the ancient Hebrews were already great sufferers from mental alienation. They point out that many passages in the Bible indicate that mental alienation was not unknown in Biblical times (see particularly Wilhelm Ebstein, "Die Medizin im Alten Testament," pp. 114-117; also the references to persons "possessed with devils," "lunatics," "men of unclean spirits," etc., in Matt. viii. 16, ix. 32, xii. 22, xvii. 15; Mark v. 2; Luke viii. 27,

xii. 11, and in many other places in the New Testament).

As is the case with all the physical, mental, and intellectual traits of the Jews, consanguineous marriages have been considered a cause of a great part of the insanity among them. The Jews, it is well known, are very neurotic, as is manifested by the frequency of various nervous affections among them (see Nervous Diseases); and the marriage of relatives who are affected by a neurotic taint has been positively proved to be detrimental to the succeeding generation. In one generation the neuropathy may manifest itself as hysteria; in another, as some organic or functional nervous affection, then as insanity, etc. The chances of thus perpetuating the nervous strain in families by consanguineous marriages are therefore greater among Jews than among peoples in whom nervous diseases are less frequent.

——**Legal Status:** The deaf-mute ("ḥeresh"), the insane ("shoṭeh"), and the minor ("ḳaṭan") are usually classed together in the Talmud as far as their legal standing is concerned. From the rabbinical legal standpoint, not only the confirmed maniac is regarded as insane, but also the idiot or imbecile that shows signs of derangement, as one who persists in unnecessarily exposing himself to danger, or one who destroys his garments for no reason whatsoever. When the derangement is temporary or periodic, the person so stricken is not regarded as totally irresponsible, but is accountable for actions committed in lucid intervals (Ḥag. 3b). A person intoxicated to the degree of unconsciousness is also classed with the insane as regards legal responsibility ('Er. 65a).

Insane Not Responsible.

The insane person is not capable of "willing"; as the Rabbis express it, he "has action, but no thought" (Maksh. iii. 8), and therefore can enter into no transaction which requires consent (Yeb. 31a). He is not responsible for his actions; he can bear no testimony, and the court can pay no attention to claims instituted by him or against him. In all civil and ritual matters he is placed in the same category as the deaf-mute (see Deaf and Dumb in Jewish Law). The court must act as trustee, or appoint a trustee, for the insane, as it does in the case of minors (Ket. 48a).

The marriage of insane persons is not valid, since the consent of both parties is absolutely necessary. A man who becomes insane after marriage can not give a bill of divorce to his wife, nor can he order others to do so (Yeb. 112b). A woman who becomes insane after marriage can, according to the Mosaic law, be divorced, for no consent is necessary on her part (see Divorce). But the Rabbis forbade divorce in such a case, because, if left without a protector, she might become the victim of the lust of wicked people (*ib.* 113b). Her husband, however, is permitted to marry again, even since polygamy has been prohibited. At a later period the Rabbis endeavored to put all possible obstacles in the way of his remarriage, and even demanded the signatures of one hundred rabbis of three different countries before granting him permission to marry again. Rabbis are warned to investigate very carefully before signing such a permission (Shulḥan 'Aruk, Eben ha-'Ezer, 1, 10, Isserles' gloss; "Pitḥe Teshubah," *ad loc.*).

INSCRIPTIONS, GREEK, HEBREW, and **LATIN.** See Paleography.

INSECTS: Under this head are treated the species not described in separate articles under their individual names, as Ant; Bee; Beetle; Fly; Locust; etc.

Centiped: The words "marbeh raglayim" (Lev. xi. 42), rendered by the Revised Version "whatsoever hath many feet," are taken in Ḥul. 67b as the designation of an insect called "nadal," on which Rashi comments: "It is called the hundred-foot" ("me'ah raglayim"). In 'Er. 8b Rashi explains the same phrase as "a creeping thing that has many feet" (L. Lewysohn, "Z. T." p. 322).

Flea ("par'osh"): This insect is mentioned in I Sam. xxiv. 15 and xxvi. 20 in a comparison referring to its insignificance. The meaning of the Hebrew word is not only assured by the authority of the old versions—LXX. ψύλλος; Vulgate, "pulex"—but is also confirmed by the dialects: Arabic, "burghuth"; Syriac, "purta'ana" (transposed from "pur'atana"). R. V. margin to Ex. viii. 12 (A. V. 16) suggests "fleas" as rendering of the Hebrew "kinnim," which is more correctly translated "lice."

In the Talmud the par'osh is counted among the animals that propagate by copulation and are therefore not to be killed on the Sabbath-day (Shab. 107b). Tosef., Shab. 12a describes it as a "hopping louse" ("kinnah ḳofeẓet"), in contrast to the "creeping louse" ("kinnah roḥeshet"). Al-Ḥarizi's humorous "maḳamah" on the flea need only be mentioned here (Tristram, "Nat. Hist." p. 305; L. Lewysohn, *l.c.* p. 327).

Gnat: This word, in the plural form, is suggested by the R. V. margin to Isa. li. 6, reading "kinnim" for "ken" of the Masoretic text; but in this case "lice" would be the more nearly correct rendering.

In the Talmud the "yattush," which is the most common term for the gnat, is called a "tiny creature" ("biryah ḳallah") having a mouth wherewith to take in food, but no opening for evacuation (Giṭ. 56b). It is enumerated among the weak that cast terror on the strong, its victim being the elephant, whose trunk it enters (Shab. 77b). From Sanh. 77a it appears that gnats in mass could torture a fettered and therefore defenseless man to death; and at times they would become such a plague, entering the eyes and nose of man, that public prayers were instituted for their extermination (Ta'an. 14a). Insignificant as the gnat is, it admonishes man to humility, having preceded him in being created (Sanh. 38a). For the legend of the gnat as tormentor of Titus see Giṭ. 56a (L. Lewysohn, *l.c.* p. 315).

Grasshopper. See LOCUST.

Hornet: Rendering in the English version of the Hebrew "ẓir'ah." The hornet is mentioned as an instrument in God's hand for the punishment and expulsion of the Canaanites (Ex. xxiii. 29; Deut. vii. 20; Josh. xxiv. 12). Some assume that the hornet in these passages is used, like the "æstrus," or gadfly, in Greek and Latin, figuratively for panic or terror. There are at present four species of hornet in Palestine, the most common being *Vespa orientalis.* The frequency of hornets in Palestine in former times is perhaps indicated by the local name "Zoreah" (Josh. xv. 33; R. V. "Zorah").

In the Talmud the hornet ("ẓir'ah," "zibura," "'ar'ita") is usually referred to as a dangerous animal, with the scorpion, serpent, etc. The dread of its sting gave rise to the proverb: "Neither thy sting nor thy honey!" (Tan., Balaḳ, 6). Public prayers for its destruction were sometimes ordered (Ta'an. 14a). Its sting brings death to an infant of one year, unless moss of a palm-tree pounded in water is administered (Ket. 50a); and even an adult has been known to die from a hornet's sting in the forehead (Shab. 80b). As the most atrocious act of cruelty perpetrated by the inhabitants of Sodom is related the treatment to which they subjected a girl who had given bread to a poor man; she was besmeared with honey and exposed to the stings of hornets (Sanh. 109b). To cure the sting of the hornet bruised flies were laid on the wound (Shab. 77b); or the urine of a forty-day-old infant was applied (*ib.* 109b). The patient must be guarded against cold ('Ab. Zarah 28b). The swallowing of a hornet results in certain death; and the drinking of very strong vinegar will keep the patient alive only long enough for him to make his will (*ib.* 12b). The hornet of Nineveh was considered particularly dangerous (Shab. 121b, alluding to Isa. vii. 18; Tristram, *l.c.* p. 322; Lewysohn, *l.c.* p. 303).

Horse-Leech (A. V. "horseleach"): The English translation of the Hebrew "'aluḳah" in Prov. xxx. 15, where it is symbolically used for insatiable greed. This traditional rendering of the word is not only supported by the old versions—LXX. *βδέλλη*; Vulgate, "sanguisuga"—but also by the Arabic "'alaḳ" (comp. Targ. to Ps. xii. 8). The bloodthirstiness of the leech and the tenacity of its hold are proverbial in all languages. Both the horse-leech, *Hæmopsis sanguisuga*, and the medicinal leech, *Hirudo medicinalis*, are common in Palestine. Some take "'aluḳah" to be intended for some vampire-like demon, comparing the Arabic "'aluḳ," which is explained in "Ḳamus" by "ghul," a female blood-sucking monster.

The Talmud, besides "'aluḳah," "'alḳa," or "'arḳa" (Bek. 44b), has "beni de-maya" (= "caterpillar of the water"; Giṭ. 69b) and "nima shel mayim" (= "thread of the water"; 'Ab. Zarah 12b) for "leech." The swallowing of a leech is very dangerous, and it is therefore permitted in such a case to prepare a warm potion on the Sabbath-day (*ib.* 12b). Yer. Ber. 13c mentions the bedbug as a cure; *i.e.*, the inhaling by the patient of the smell of burned bedbugs causes the swallowed leech to come out through the mouth (comp. Harduin, Not. et Emendat. to Pliny, "Hist. Nat." xxix. 17). On the other hand, roasted leeches taken in wine are a cure for enlargement of the spleen (Giṭ. 69b). In 'Ab. Zarah 17a "'aluḳah" in the passage from Prov. xxx. 15 is interpreted to mean "Gehenna"; its "two daughters," the secular government ("reshut") and heresy ("minut"). In this sense also "'alaḳ" is used in the piyyuṭ אין צור of the Ḥanukkah Sabbath. Rabbenu Tam considers it as the name of one of the wise men, like "Ithiel," etc. (comp. Tosef., 'Ab. Zarah, 17a, and 'Er. 19a; Tristram, *l.c.* p. 299; Lewysohn, *l.c.* p. 336).

Lice (Hebr. "kinnim"): Lice are mentioned as the third plague inflicted on the Egyptians (Ex. viii. 12 [A. V. 16]; Ps. cv. 31 [R. V. margin suggests "flea" or "sand-fly"; and to Isa. li. 6, "gnats"]). The Greek equivalent for "lice" is also found in Josephus ("Ant." ii. 14, § 3).

The Talmud distinguishes between lice of the head and those of the body, *i.e.*, of the garments: the former have red blood; the latter, white (Niddah 19b). Both are produced not by copulation, but by uncleanliness; and cleanliness is therefore the best means of getting rid of them (Shab. 107b; Ber. 51b; comp. Beẓah 32b). The Medes were especially afflicted with them (Ḳid. 49b). It is sinful to kill a louse in the presence of other people on account of the disgust thus caused (Ḥag. 5a). For the medicinal use of lice see Giṭ. 69b (Tristram, *l.c.* p. 314; Lewysohn, *l.c.* p. 324).

Moth (Hebr. "sas" and "'ash"): The moth is mentioned in the Old Testament as being destructive to clothes and as illustrating in its own great frailty the perishableness of earthly things (Isa. li. 8; Job iv. 19, xiii. 28, xxvii. 18; the passages evidently refer to some species of the *Tineidæ*, or clothes-moths).

The Talmud distinguishes, according to the material attacked by the insect, silk-, fur-, clothes-, and tapestry-moths (Shab. 75a, 90a; Ber. 56a; B. M. 78b; Ḥul. 28a, 85b). They are driven away by sprinkling the blood of animals or birds on the material (Ḥul. 28a; Tristram, *l.c.* p. 326; Lewysohn, *l.c.* p. 321).

Spider (Hebr. "'akkabish"): The spider's web ("threads," or "house of the spider") is twice referred to in the Old Testament as an emblem of useless doings and vain hopes (Isa. lix. 5; Job viii. 14). "Semamit" (Prov. xxx. 28) is more correctly rendered by "gecko" (see LIZARD). The species of spiders in Palestine number hundreds.

The Talmud likewise uses the cobweb in a comparison: "Passion is at first like the web ["thread"] of the spider ["kubya"], but afterward it grows as strong as the ropes of a wagon" (Suk. 52a and parallels). Baḥya ibn Paḳuda, in his "Ḥobot ha-Lebabot" (ed. Fürstenthal, p. 240, 2), gives this comparison another turn: "As the cobweb obstructs the light of the sun, so does passion the light of reason."

The spider is the creature most hated of man (Yalḳut Shim'oni, ii. 140c; Tristram, *l.c.* p. 303; Lewysohn, *l.c.* p. 299).

E. G. H. I. M. C.

INSPIRATION: The state of being prompted by or filled with the spirit of God. Bezaleel was "filled with the spirit of God" (Ex. xxxi. 3, xxxv. 31); that is, he planned the work of the Tabernacle by inspiration. Inspiration is essential to all prophetic utterances; "the Spirit of God came upon Balaam" to make him prophesy (Num. xxiv. 2); upon the seventy men selected by Moses (Num. xi. 17, 25, 26); upon Saul and Saul's messengers (I Sam. x. 6, 10; xi. 6; xix. 20, 23); upon Elisha as heir and successor to Elijah (II Kings ii. 15); upon Amasai (I Chron. xii. 18); upon Jahaziel the Levite (II Chron. xx. 14). Inspiration empowered Micah to "tell Jacob his transgression" (Micah iii. 8). The prophet, therefore, is called "the man of the spirit," that is, the inspired one (Hosea ix. 7 [A. V., incorrectly, "spiritual man"]). All true prophets have their visions by divine inspiration (Isa. xxix. 10, xxx. 1; Zech. vii. 12; Neh. ix. 30).

Of Persons.

Ezekiel very frequently describes the working of the power of inspiration (Ezek. ii. 2; iii. 12, 24; viii. 3; xi. 1, 24; xxxvi. 1). Therefore he is compared to a man from the country who is demonstrative in his description of the king; whereas Isaiah is compared to a man of the city who is accustomed to seeing the king (Ḥag. 13b). The seer of the Exile also describes the mode of his inspiration (Isa. xlviii. 16, lxi. 1).

In the future all men will come under the influence of inspiration and prophecy, says Joel (ii. 28 *et seq.*, iii. 1 *et seq.*; comp. Isa. xliv. 3, lix. 19). Daniel also was inspired; "the holy spirit of God was in him" (Dan. iv. 6, 8, 15; v. 11 [A. V. and R. V., incorrectly, "the spirit of the holy gods"]) and enabled him to interpret the dream correctly, as it did Joseph also (Gen. xli. 38). David, too, sang under the power of inspiration (I Sam. xvi. 13; comp. II Sam. xxiii. 2); and the Psalmist prays for inspiration (Ps. li. 12–14 [A. V. 11–13]). Othniel, Gideon, Jephthah, and Samson judged and led Israel under the power of inspiration (Judges iii. 10, vi. 34, xi. 29, xiii. 23 *et seq.*). Inspiration was occasionally brought upon the prophet by the power of music (II Kings iv. 15). According to the Book of Jubilees the Patriarchs were inspired when they blessed their children or grandchildren (xxv. 14, xxxi. 12). Ben Sira says of Isaiah that his visions of the future were inspired (Ecclus. xlviii. 24; regarding Daniel, see Susanna 45 [Theodotion] and Ascensio Isaiæ, v. 14). The great festivity of the drawing of water on Sukkot ("Simḥat bet ha-Sho'ebah") brought about the inspiration of the saints and miracle-workers ("ḥasidim we-anshe ma'aseh," Suk. v. 4), and occasioned a pouring out of songs and of other manifestations of spiritual rejoicing (Yer. Suk. v. 55a; Suk. 50–51, "the pouring out of the Holy Spirit," with reference to Isa. xii. 3). Similarly the people of Israel at the Red Sea were inspired when they sang their song, faith having caused the Holy Spirit to rest upon them (Mek., Beshallaḥ; comp. Ps. R. iv. 6).

Inspiration, in rabbinical theology, is the influence of the Holy Spirit which prompted the Patriarchs, the Prophets, and the sacred writers (Sifre, Deut. 176; Tosef., Soṭah, xii. 5, xiii. 2; Seder 'Olam xx.–xxi.), the Holy Spirit and the spirit of prophecy being considered as identical (Yer. Meg. i. 70a; Targ. to Ps. li. 13, Isa. xl. 13, and I Sam. xxiii. 3). Eber was regarded as having been inspired (Gen. x. 25; Gen. R. xxxv.; Seder 'Olam R. i.); so also were Sarah (Meg. 14a; Gen. R. lxxii.), Isaac and Rebekah (Gen. R. lxxv.), Jacob (Gen. R. xcviii.), Joseph (Gen. R. xciii.; Pirḳe R. El. xxxix.), King Solomon (Tan., Ḥuḳḳat, ed. Buber, p. 11), Balaam (Tan., Balaḳ, ed. Buber, pp. 11, 17), and Job and his four friends (B. B. 15b; Lev. R. i.; Seder 'Olam R. xxi.). Often (not always in the later Haggadah, as Zunz contends in "G. V." pp. 2, 188, 191, 255, 260, 266, 275, 277 *et seq.*, 326, 365) the prophetical and hagiographal passages are quoted as having been uttered by the Holy Spirit through Solomon, David, Amos, Ezekiel, Elisha, the sons of Korah, etc. (Pesiḳ. R. vi., vii., x., xi., xx.; Gen. R. xlv., lxxv., cxiii.; Pes. 87b; *et al.*). The high priest, too, when giving the answer of the Urim and Thummim, was believed to be inspired (Yoma 73b; comp. Josephus, "Ant." iv. 8, § 14, who speaks of the prophet together with the high priest). See HOLY SPIRIT.

Whatever book has been included in the Bible canon must necessarily have been inspired or written by the Holy Spirit (Meg. 7a; Tosef., Yad. ii. 14). Often the words of Scripture are taken to be exclamations of the Holy Spirit intercepting the speaker, and, therefore, also the work of inspiration (Soṭah ix. 7; Tosef., Soṭah, ix. 2–9; Ab. R. N. 14; Pes. 117a; Gen. R. lxiii., lxxxv.; Num. R. xvii.; Deut. R. xi.). According to IV Esd. xiv. 38, Ezra and his coworkers reproduced from memory the lost twenty-four holy books, as well as the seventy apocryphal books, by the power of the Holy Spirit. The prevailing opinion is that with the last of the Prophets, Haggai, Zechariah, and Malachi, inspiration ceased (Tosef., Soṭah, xiii. 2; Seder 'Olam R. xx.; Sanh. 11a; I Macc. iv. 46).

Of the Holy Scriptures.

The Targum, as the recognized traditional interpretation of the Prophets, was regarded as having been written by Jonathan ben Uzziel under the inspiration of the last prophets (Meg. 3a). Similarly the Septuagint translation of the Pentateuch was regarded as the work of the Holy Spirit, or as having been inspired (Philo, "Vita Moysis," ii. 7; comp. Masseket Soferim i. 8; Aristeas Letter, §§ 305–317). Necessarily, inspiration was claimed for the translation of Holy Scripture as well as for the original text; while the Essenes made the same claim for their apocryphal writings (Wisdom vii. 27; IV. Esd. xiv. 38; see ESCHATOLOGY; ESSENES). It appears from Tosef., Shab. xiii. 1; Shab. 115a; and Masseket Soferim i. 7 that the earlier view regarding the inspired character of the Targum and the Septuagint was later discarded by the Rabbis, though it was maintained in Alexandria, where the apocryphal writings ranked with the canonical literature.

The traditional view is that the Pentateuch in its entirety emanated from God, every verse and letter being consequently inspired; hence the tannaitic

Traditional View.

statement that "he who says the Torah is not from Heaven is a heretic, a despiser of the Word of God, one who has no share in the world to come" (Sanh. xi. 1; *ib.* Gemara, 99a) is expressly explained to include any one that says the whole Torah emanates from God with the exception of one verse, which Moses added on his own responsibility, or any one that finds verses like Gen. xxxvi. 12 and 22 too trivial to assign to them a divine origin (Shab. 99a, b). The Pentateuch passages are quoted in the schools as the sayings of God ("amar Raḥmana" = "the Merciful One has said," B. M. 3b, and often). Moses wrote the whole Pentateuch at God's dictation, even, according to R. Simeon, the last eight verses, relating to his own death (B. B. 14b). On the other hand, some held that the curses in Lev. xxvi. were pronounced by "the mouth of the Divine Power," whereas those in Deut. xxviii., by Moses, were of his own prompting (Meg. 31b; but see Tosafot, "this does not exclude divine inspiration"). Every letter of the Torah was fixed by the Masorah and counted by the Soferim (Ḳid. 30a), and on each particle, such as "et," "we," "gam," "af" ("and" or "also"), were based important laws (Pes. 22b; Sanh. 70a); even the Masoretic signs formed the basis for halakic or haggadic interpretations in Akiba's system (see Akiba). The division of the Pentateuch into verses was ascribed to Moses (Meg. 22a). The final letters, also (מנצפך), were fixed by the Prophets, and were therefore inspired (Shab. 104a; Yer. Meg. i. 71d; Gen. R. i.). R. Ishmael said to R. Meïr while the latter was occupied with the professional work of a scribe, "Be on thy guard concerning thy sacred task, for if thou omittest or addest one single letter to the Law thou destroyest the whole world" ('Er. 12b). This whole view of plenary inspiration was in the main (though the passage regarding the counting of the letters by the Soferim, Ḳid. 30a, includes the Prophets and Hagiographa) strictly held only in regard to the five books of Moses—the Torah. Upon the absolute completeness of the Torah rested the fundamental rabbinical principle, "No prophet after Moses was allowed to change anything in the Law" (Shab. 104a; Yoma 80a; Meg. 2b; based upon Lev. xxvii. 34 or Num. xxxvi. 13). Whatever is written in the other holy writings must therefore, somewhere or somehow, have been alluded to in the Torah (Ta'an. 9a). To the Pentateuch or Torah a higher degree of divine inspiration is accordingly ascribed than to the Prophets and Hagiographa, which are often called "dibre ḳabbalah" = "words of tradition" (see Zunz, "G. V." p. 44), or simply "sefarim" = "books" (Meg. i. 8, iii. 1), or "ketubim" (see Bible Canon). All the canonical books are "kitbe ḳodesh" = "holy writings" (Shab. xvi. 1), and were read at divine service as the divinely inspired Word ("Miḳra" = "the recited Word of God"). The prophetical and hagiographic books are implicitly included in the Torah (Tan., Re'eh, ed. Buber, p. 1), but the Torah is the standard by which their value or holiness is judged and gaged (see Shab. 13b, 30b; Meg. 7a; Ab. R. N. i.; Tos. Meg. iv. 19; Yer. Meg. iv. 73d). The final composition as well as the writing of the Hagiographa was ascribed to the "men of the Great Synagogue," who also were regarded as working under the influence of the Holy, or prophetic, Spirit, having among them the last of the Prophets (B. B. 15a; see Synagogue, Great).

Degrees of Inspiration.

As to the distinction between the plenary inspiration of the Pentateuch and the more general inspiration of the other sacred writings, a definite statement is nowhere to be found in Talmudic literature. Judah ha-Levi, in the "Cuzari" (iii. 32-39), distinguishes the books of Moses and of the other prophets from those that were only influenced by the divine power, claiming divine origin for every vowel or sign of the Pentateuch as having been given to Moses on Sinai; on the other hand, he places the inspired man, whether prophet, "nazir" like Samson, high priest, or king, above the category of common men, seeing in him one lifted to the rank of angels (iv. 15). The latter view is shared by Maimonides ("Yad," Yesode ha-Torah, vii. 1-6; "Moreh," ii. 32-35; see Prophecy). How far the view that certain passages in the Pentateuch are emendations of the scribes ("tiḳḳune soferim," Mek., Beshallaḥ, Shirah, 6; comp. with Tan., Yelammedenu, Beshallaḥ; Gen. R. xlix.; Lev. R. xi.; Num. R. iii.) is compatible with the idea of plenary inspiration is discussed by Albo ("'Iḳḳarim," iii. 22). In fact, the expression in Mek. *l.c.*, "kinnah ha-katub" (Holy Writ has used a euphemistic form), is such as does not impugn the divine character of any part of the book (see I. H. Weiss in note i. 47 of his Mekilta edition, and Geiger, "Urschrift," pp. 308 *et seq.*).

According to Philo, whose idea of inspiration was more or less influenced by the Platonic conception of the ecstatic or God-intoxicated seer, the prophet spoke and wrote in an ecstatic state ("Quis Rerum Divinarum Heres Sit," §§ 51-52). Josephus ("Contra Ap." i., § 7) writes: "The Prophets have written the original and earliest accounts of things as they learned them of God Himself by inspiration." This view regarding the inspiration of the Bible as a whole is expressed also in II Tim. iii. 16: "All Scripture is given by inspiration of God" (*θεόπνευστος*, "given by the spirit of God," the same as the Hebrew "be-ruaḥ ha-ḳodesh"). Maimonides ("Moreh," ii. 45), enumerating the various degrees of prophecy, ascribes different degrees of inspiration to the Pentateuch, to the Prophets, and to the writers of the third class of Scripture—the Hagiographa. The view regarding the plenary inspiration of the Pentateuch maintained by the Rabbis and the philosophers of the Middle Ages, such as Saadia, Maimonides, and others, did not prevent them from resorting to allegorical interpretation when the literal meaning seemed opposed to human reason (Saadia, "Emunot we-De'ot," ii. 44, ix. 133; Maimonides, "Moreh," ii. 29, 47).

Modern Views.

Modern Jewish theology of the Reform school, after making full allowance for the human origin of the Holy Scriptures, and recognizing that the matter recorded is sometimes in contradiction to the proved results of modern historical, physical, and psychological research, arrives at the following conclusion: While the ancient view of a literal dictation by God must be surrendered, and while the seers and writers of Judea must be regarded as men with human failings, each with his own peculiarity of style and sentiment, the Spirit of God was nevertheless manifested in them. The Holy Scriptures still have the power of inspiration for each devout soul that reads or hears them. They speak to each generation with a divine authority such as no other book or literature possesses. The inspiration of the Bible is different from the inspiration under which the great literary and artistic masterworks of later eras were produced. The religious enthusiasm of the Jewish genius leavens the whole, and the truth uttered therein, whatever be the form it is clothed in, seizes men now as it did when prophet, psalmist, or lawgiver first uttered it, themselves carried away by the power of the Divine Spirit. This view of modern theology, compatible with Biblical science and modern research, which analyzes the thoughts and the forms of Scripture and traces them to their various sources, finds that prophet and sacred writer were under the influence of the Divine Spirit while revealing, by word or pen, new religious ideas. But the human element in them was not extinguished, and consequently, in regard to their statements, their knowledge, and the form of their communication, they could only have acted as children of their age.

INSTALLATION. See ORDINATION.

INSTITUT ZUR FÖRDERUNG DER ISRAELITISCHEN LITERATUR: Society, founded by Ludwig PHILIPPSON, for the promotion of Jewish literature. The books published by the society were issued from Leipsic. On Feb. 12, 1855, an article by Philippson appeared in the "Allg. Zeit. des Jud.," proposing the creation of a Jewish publication society. On May 1 following, the society began its active existence with a membership of twelve hundred subscribers, which increased to two thousand during the year. The annual subscription of two thalers entitled each member to the works published within the year. A committee of three, Ludwig Philippson of Magdeburg, Adolph Jellinek of Leipsic, and Isaac Markus Jost of Frankfort-on-the-Main, selected the works for publication and awarded honoraria to the authors. In 1856, when Jellinek was called to Vienna, he was succeeded by M. A. Goldschmidt. On the death of Jost (1860) L. Herzfeld of Brunswick became a member of the committee. In 1855 the Austrian government issued a prohibition against joining the society (Frankl-Grün, "Gesch. der Juden in Kremsier," ii. 28), and Philippson was expelled from Austrian territory when he was on a tour in Milan, 1858 ("Allg. Zeit. des Jud." 1868, p. 428). The society existed for eighteen years, chiefly through the untiring efforts of its founder; and its membership reached a total of about three thousand. It published, in German, about eighty works of Jewish history, science, poetry, fiction, and biography, including the following:

Grace Aguilar: "Henriquez Morales."
"Amerikanische Skizzen" (anonymous).
Bernhard Beer: "Das Leben Abraham's und das Leben Moses' nach Jüdischen Legenden."
"Bibliothek der Griechischen und Römischen Schriftsteller über Judenthum und Juden."
Boxberger: "Bar Cochba."
David Cassel: "Gesch. der Jüdischen Literatur."
Erckmann-Chatrian: "Die Blokade von Pfalzburg."
Benjamin Disraeli: "Alroy."
L. A. Frankl: "Reise nach Jerusalem"; "Der Primator"; "Die Ahnenbilder."
Frankolm (pseudonym, "Rispart"): "Die Juden und die Kreuzfahrer Unter Richard."
Frey: "Erzählungen."
Julius Fürst: "Gesch. des Karäerthums."
A. Geiger: "Divan Gabirol's"; "Parschandatha"; "Jüdische Dichtungen."
H. Grätz; "Gesch. der Juden" (vols. iii., v.-x.).
J. Hamburger: "Geist der Hagada."
L. Herzfeld: "Gesch. des Volkes Israel" (2 vols.); "Metrologische Untersuchungen" and "Ueber die Kunst bei den Hebräern."
Honigmann: "Das Grab zu Sabioneta."
"Jahrbuch für Gesch. des Judenthums und der Juden."
Josephus: "Kleinere Schriften."
I. M. Jost: "Gesch. des Judenthums und Seiner Sekten."
M. Kayserling: "Gesch. der Juden in Portugal"; "Moses Mendelssohn."
Julius Kossarski: "Titus."
E. Kulke: "Jüdische Geschichten."
Antoïne Levy: "Die Exegese bei den Franzosen."
M. A. Levy: "Gesch. der Jüdischen Münzen."
L. M. Lewysohn: "Das Jüdische Kalenderwesen."
Leopold Löw: "Zur Jüdischen Alterthumskunde."
S. Munk: "Palästina" (translated by M. A. Levy).
A. Neubauer: "Aus der Petersburger Bibliothek."
Oelsner: "Sabbathai Bassista."
Ludwig Philippson: "Saron"; "Sepphoris und Rom"; "Jacob Tirado"; "An den Strömen"; "Die Entthronten"; "Ausführliche Darstellung der Israelitischen Religionslehre"; "Weltbewegende Fragen"; "Reden Wider den Unglauben"; "Die Entwickelung der Religiösen Idee im Judenthume, Christenthume, und Islam"; "Die Religion der Gesellschaft"; "Israelitisches Gebetbuch."
Phöbus Philippson: "Biographische Skizzen"; "Der Unbekannte Rabbi"; "Die Marannen"; "Veilchen Jacob"; "Rachel"; "In Banden Frei."
Philo: Part of his writings in vol. iv. of "Bibliothek der Griechischen und Römischen Schriftsteller."
L. Seligmann: "Giuseppe Levi's Parabeln aus Talmud und Midrasch."
M. Wassermann: "Judah Touro."
M. Wiener: "Emech Habacha."
I. Wiesner: "Der Bann bei den Juden."
B. Willstädter: "Ueber Jüdische Stiftungen."
A. A. Wolff: "Piutim."

The society also contributed financially to the publication of a number of works, among them being: "Likkuṭe Ḳadmoniyyot" (S. Pinsker); "Zoologie des Talmuds" (L. Lewysohn); "Kerem Ḥemed," vol. ix.; "Vorlesungen über Offenbarungslehre" (Steinheim); "Die Religiöse Poesie der Juden in Spanien" (Michael Sachs); "Der Gerichtliche Beweis nach Mosaisch-Talmudischem Rechte" (Z. Frankel); "Beiträge zur Literaturgesch." (Zunz).

INSTITUTIONS. See TAḲḲANOT.

INSTITUTUM JUDAICUM: A special academic course for Protestant theologians who desire to prepare themselves for missionary work among Jews. The first of its kind was founded at the University of Halle by Professor Callenberg in 1724. The great interest which Franz Delitzsch took in the conversion of the Jews to Christianity prompted him to establish a similar course at the University of Leipsic in 1886, and another was founded by Prof. H. L.

Strack in Berlin the same year. The institutes of Leipsic and Berlin have courses in New Testament theology with reference to the Messianic passages in the Old Testament, and they also give instruction in rabbinic literature; they further publish works helpful to their cause, as biographies of famous converts, controversial pamphlets, autobiographies of converted Jews, and occasionally scientific tracts. The Berlin institute has published Strack's "Introduction to the Talmud," his editions of some tractates of the Mishnah, and a monograph on the blood accusation. A special feature of its publications is the New Testament in Hebrew and Yiddish translations. The present head of the Leipsic Institutum Judaicum is Professor Dalman, who is assisted in his literary work by a Jew, J. J. Kahan (see MISSION).

INTELLIGENCERS: Persons who supply intelligence or secret information; Stuart English for "spies." A number of crypto-Jews in London supplied Cromwell with "intelligence" in connection with foreign and colonial affairs. In 1655, during the discussion of Manasseh ben Israel's plea for the readmission of the Jews, a writer to the "Mercurius Politicus" living in Amsterdam suggested that the government could make good use of the Jews for obtaining political information, and that for this reason they should be propitiated. The suggestion was seized upon by Thurloe, the secretary of state, and by Dr. Dorislaus, a secret agent of the foreign office. This is seen from a remark in Gilbert Burnet's "History of His Own Times," and in the Parliamentary Diary of Thomas Burton (1658), who speaks of the Protector's having used the Jews, "those able and general intelligencers" (see CARVAJAL).

Chief among these intelligencers were agents of Antonio Fernandez Carvajal, fourteen of whose despatches (now in the Clarendon Collection) are supposed by Wolf to have been obtained for Thurloe. They are said to have enabled Cromwell "to take measures for the defeat of the projected invasion of England concerted at Brussels early in 1656 between Charles II. and the Spanish government." Of a similar kind were the services of Manuel Martinez Dormido (*i.e.*, David Abravanel), who submitted to Thurloe extracts of letters from his Marano correspondents in Amsterdam. These services are supposed to have been rewarded by Cromwell in 1656 by his giving permission for the resettlement of Jews in England.

J. G.

INTENTION: An intelligent purpose to do a certain act. In criminal cases wrongful intent must accompany the wrongful act in order to make the culprit punishable by law. While in the common law, when any wrongful act has been committed, it is inferred conclusively that the act was intentionally committed, in Talmudic law the intention must be clearly established, as well as the act itself. An innocent intention will excuse a wrongful act (see IGNORANCE OF THE LAW), and a wrongful intention that failed of consummation, even though another crime was accidentally committed at the same time, is not punishable. For instance, one who intended to kill a certain man, and by mistake killed another, could not be criminally prosecuted (Sanh. 79a; Maimonides, "Yad," Roẓeaḥ, iv. 12). Similarly, if one, with the intention of killing a certain man, aimed a stone at a part of his body where a mortal wound could not be inflicted, and the stone struck a more delicate part, and caused death, the one that threw the stone was free from punishment (*ib.*). The right of ASYLUM, however, was afforded only to one who had had no intention of killing; in the cases mentioned above the homicide was not admitted to the cities of refuge, and the avenger of blood ("go'el") could kill him without being liable to punishment.

In civil cases, the law disregards the intention, and considers only the injury done by the act. One who injures another's person or property, even without intention, must make full restitution for the damage (B. Ḳ. 26a, b; "Yad," Ḥobel, i. 11–14, vi. 1); one need not, however, compensate him for the pain suffered ("ẓa'ar"), or for the services of a physician ("rippui"), or for the time lost ("shebet"), or for incident indignities ("boshet"). See DAMAGE. An ox that gored a man unintentionally, and caused his death, was not killed; but if the ox was known to have gored others ("mu'ad"), its owner was compelled to make compensation ("kofer") to the victim's heirs. For unintentional, non-fatal injuries committed by an animal upon any person or property, its master must make compensation equal to half the damage done (B. Ḳ. 43a, 44b; "Yad," Nizḳe Mamon, x. 9, 13; xi. 6). See BEQUEST; CONSENT; DEVOTION; GORING OX; HATRA'AH; KAWWANAH.

INTEREST. See USURY.

INTERMARRIAGE: Marriage between persons of different races or tribes. A prohibition to intermarry with the Canaanites is found in Deut. vii. 3, where it is said: "Neither shalt thou make marriages with them [any of the seven nations of the land of Canaan]; thy daughter thou shalt not give unto his son, nor his daughter shalt thou take unto thy son." The reason stated for this prohibition is: "For they will turn away thy son from following me, that they may serve other gods" (*ib.* vii. 4); and, inasmuch as this reason holds good as regards intermarriage with any idolatrous nation, all Gentiles are included in the prohibition (R. Simeon, in 'Ab. Zarah 36b; comp. Ḳid. 68b; the other rabbis regard the prohibition as rabbinic only). At any rate, from Ezra onward this prohibition was extended to all Gentiles (Ezra ix. 1–2, x. 10–11; Neh. x. 31), and accordingly the Law was thus interpreted and codified by Maimonides ("Yad," Issure Biah, xii. 1; comp. Shulḥan 'Aruk, Eben ha-'Ezer, 16, 1; Aaron ha-Levi, "Sefer ha-Ḥinnuk," cxxvii.). Older, however, than the Deuteronomic law is the patriarchal law forbidding the descendants of Abraham to intermarry with the Canaanites (Gen. xxiv. 3, xxvi. 34, xxvii. 46, xxviii. 8, xxxiv. 14). Nevertheless the Israelites during the pre-exilic period did intermarry with the Gentiles, and the consequence was that they were led to adopt idolatrous practises (Judges iii. 6; comp. I Kings xi. 1 *et seq.*). It is singular that Moses was the first to be censured, and that by his own sister and brother, for having married an Ethiopian woman (Num. xii. 1), though this expression is referred to Zipporah by the commentaries *ad loc.* Intermarriage with Ammonites and Moabites was especially forbidden, whereas the offspring of intermarriages with the Idumeans and Egyptians were to be admitted to the congregation of the Lord in their third generation (Deut. xxiii. 4–7, 8–9). An exception to the prohibition against intermarriage was the case of a captive woman during time of war (Deut. xxi. 10–13); but this seems to have referred to warfare with nations other than the Canaanites (see the commentaries of Dillmann and Driver *ad loc.*).

Biblical Prohibition.

But, however strong was the tendency to intermarry in pre-exilic Israel, during the Babylonian captivity the Jews realized that they were to be "a holy people unto the Lord their God" and were therefore forbidden to intermarry with the Gentiles, wherefore the princes of the new Judean colony came to Ezra saying: "The people of Israel and the priests and Levites have not separated themselves from the people of the lands, doing according to their abominations, even of the Canaanites, the Hittites, the Perizzites, the Jebusites, the Ammonites, the Moabites, the Egyptians, and the Idumeans [LXX. and I Esd. viii. 68; Masoretic text incorrectly "Amorites"]; for they have taken of their daughters for themselves and for their sons so that the holy seed have mingled with the people of those lands" (Ezra ix. 1–2). The prophet Malachi also complains (Mal. ii. 11): "Judah hath profaned the holiness of the Lord which he loved, and hath married the daughter of a strange god." It was the fear of seduction to idolatry which induced Ezra and the other leaders of the new colony to exclude from the commonwealth foreign wives and such as insisted upon keeping them (Ezra ix.–x.; Neh. x. 31, xiii. 23).

One important factor, however, was introduced afterward which essentially modified the prohibition of intermarriage, and that was the conversion of Gentiles to Judaism. This was believed to be typified in Ruth when she says to Naomi, "Thy people shall be my people, and thy God my God" (Ruth i. 16; comp. Isa. xiv. 1; and see Proselyte). All the Biblical passages referring to permitted intermarriages, as that of a captive woman in war-time (Sifre, Deut. 213: "She shall bewail her father and mother" being explained by R. Akiba to mean "She shall bewail her ancestral religion"; Yeb. 48b), or of the Ammonites and Moabites (Sifre, Deut. 249, 253), or of Joseph (see Asenath), were therefore interpreted by the Rabbis as having been concluded after due conversion to Judaism; whereas Esau's intermarriage was found blameworthy on account of the idolatrous practises of his wives (Gen. R. lxv.; comp. Jubilees, xxv. 1). In regard to King Solomon see Yeb. 76a and Maimonides, "Yad," Issure Biah, xiii. 14–16.

Influence of Conversion.

In the Book of Jubilees intermarriage with all Gentiles is prohibited, no allowance being made for proselytes (Jubilees, xx. 4, xxii. 20, xxx. 11; comp. Targ. Yer. to Lev. xviii. 21, "Thou shalt not give any of thy seed to make them pass through the fire of Moloch," which is translated: "Thou shalt not give a child in marriage to a Gentile by which the offspring is turned over to idolatry"—a translation refuted in Meg. iv. 9, but comp. Sanh. ix. 6, 82a). This hostility to all pagan nations seems to have been the fruit of the reaction against the Hellenistic excesses (comp. I Macc. i. 15: "they joined themselves to the heathen"; that is, "they intermarried"; 'Ab. Zarah 36b; Sanh. 82b). Hence also the Rabbis would not allow intermarriage with the Canaanites even after conversion ('Ab. Zarah 34b; Yeb. 76a; comp. "Yad," Issure Biah, xii. 22). In regard to the Ammonites and Moabites, the Rabbis discriminated between the men descended from them, who were forbidden to marry Jewesses, and the women, whom—at least from the third generation onward—Jews were permitted to marry (Yeb. viii. 3; "Yad," *l.c.* xii. 18). Altogether, however, the view prevailed that the nations of Palestine not having remained in the ancient state, the exclusion of Gentiles after they had once embraced Judaism ought no longer to be insisted upon (Yad. iv. 4; Tosef., Ḳid. v. 4; Ber. 28a; "Yad," *l.c.* xii. 25). Hence, marriage with converted Gentiles was no longer regarded as intermarriage (see Shulḥan 'Aruk, *l.c.* iv. 10, where slight differences of opinion are stated).

Intermarriages between Jews and Christians—who are not identified with Gentiles, but regarded as "proselytes of the gates" (Isaac b. Sheshet, Responsa, No. 119)—were first prohibited by the Christian emperor Constantius in 339, under penalty of death ("Codex Theodosianus," xvi. 8, 6; comp. "Codex Justinianus," i. 9, 7), then by the councils of Agdes in 506, of Rheims in Gaul in 630, of Elvira (Grätz, "Gesch." iv. 363), of Toledo (*l.c.* v. 359); and in Hungary by King Ladislaus I. 1077, and Andrew in 1233 (Grätz, *l.c.* 3d ed., iv. 363; v. 45, 52, 59; vii. 27; L. Löw, "Gesammelte Werke," ii. 176).

Between Jews and Christians.

The removal of the disabilities of the Jews did away with these state interdictions. Moses of Coucy in 1236 induced those Jews who had contracted marriages with Christian or Mohammedan women to dissolve them ("Sefer Mizwot ha-Gadol," cxii.). The Great Sanhedrin, convened by Napoleon in 1807, declared that "marriages between Israelites and Christians when concluded in accordance with the civil code are valid, and though they can not be solemnized by the religious rites of Judaism, they should not be subject to the ḥerem" (rabbinical anathema). With reference to this declaration of the Sanhedrin, which was, however, incorrectly presented, the Rabbinical Conference of Brunswick, in 1844, declared: "The marriage of a Jew with a Christian woman or with any adherent of a monotheistic religion is not prohibited if the children of such issue are permitted by the state to be brought up in the Israelitish religion." Holdheim, in his "Autonomie der Rabbinen," 1843, tries to prove that the Biblical prohibition of intermarriage does not include monotheists; but his statements are not always correct (see Frankel, "Zeitschrift," 1844, p. 287). Both Geiger and Aub, as members of the committee appointed by the first Jewish Synod, held at Leipsic in 1869, declared themselves against intermarriage as being injurious to the peace of the home and to the preservation of the Jewish faith, the faith of the minority ("Referate über die der Ersten Synode Gestellten Anträge," p. 193). Ludwig Philippson, a member of the Brunswick Conference, changed his view afterward and in his "Israelitische Religionslehre," 1865, iii. 350, declared himself against intermarriage. D. Einhorn, in "The Jewish Times," 1870, No. 45, p. 11, declares marriages between Jews and non-Jews to be prohibited from the standpoint of Reform Judaism. On the other hand, in contradiction to Einhorn's view, Samuel Hirsch, emphasizing the monotheistic faith of the Christians and the monotheistic mission of Judaism, in Nos. 26-37 of "The Jewish Times" and *ib.* No. 47, defended his opinion as former member of the Brunswick Conference, that intermarriages are permitted by Reform Judaism.

Regarding intermarriages with Karaites, see KARAITES; with Shabbethaians, see SHABBETHAI ẒEBI.

K.

It is very difficult to obtain any statistical information as to the number of Jews who marry outside their faith; but some of the Continental governments have made inquiries on this point with a view to testing the tendency to assimilation in this regard.

Statistics.

During 1900 in Prussia there were 4,799 Jews who married Jewesses, and 474 Jews and Jewesses who married outside their faith ("Zeitschrift für Preussische Statistik," 1902, p. 216). In Bavaria during the year 1899, while 416 Jews married Jewesses, 31 Jews and Jewesses married outside the faith ("Zeitschrift des Königl. Bayer. Statistischen Bureaus," 1900, p. 259). Information of the same kind is obtainable for some of the chief towns, as for Berlin, where in 1899 there were 621 Jewish marriages as against 229 intermarriages ("Statistisches Jahrbuch," 1902, p. 61). Similarly in Budapest for 1898 there were 1,238 Jewish marriages as against 146 intermarriages ("Statistikai Evkönyve," 1901, p. 82). In Vienna in 1898 there were 110 mixed marriages as against 847 purely Jewish marriages; while in Prague there were only 6 as against 354 ("Oesterreichisches Städtebuch," viii. 283, Vienna, 1900). Perhaps the most remarkable case of all is that of New South Wales, which, according to the latest census, gives the number of persons living in the married state, and not merely of marriages in a year. Of these there were 781 who had married Jews or Jewesses, as against 686 who had married outside the faith ("Census of New South Wales 1901, Bulletin No. 14").

In all of these cases it is necessary to double the number of purely Jewish marriages in order to determine the proportion of persons married within or without the faith; for it is obvious that if any of those who married outside had married another who also married outside, this would form only one Jewish marriage, whereas, under the present circumstances, they constitute two mixed marriages. With this taken into consideration, all the figures given above will work out as 9.3 per cent of mixed marriages. But this would be very misleading if applied to all Jews, as those mentioned above are the chief communities in which intermarriages occur. In Russia and Austria mixed marriages are still very rare, as, for instance, in Prague (see above).

In countries still under medieval conditions, intermarriages are still rarer. In Algeria between 1830 and 1837, in an average population of 25,000, there were only 30 such marriages in all (Ricoux, "Démographie de l'Algérie," p. 71, Paris, 1860).

Statistical inquiry has proved that the number of children resulting from intermarriages is considerably smaller than that from purely Jewish marriages, averaging only about one child to a marriage compared with an average of three or four from purely Jewish marriages. Reasons have been given by Rüppin, in Conrad's "Jahrbücher" for 1902, to show that the comparison is somewhat deceptive, as the birth-rate is determined by dividing marriages by births; and as mixed marriages are on the increase there are fewer earlier marriages to raise the quotient. This, however, does not explain the very great contrast, which is probably due to the fact that persons marry without the faith at more advanced ages than they marry within, and are of a somewhat higher social standing, among which classes children are generally fewer. See BIRTHS.

INTERMEDIATE DAYS. See HOLY DAYS.

INTESTACY. See AGNATES; INHERITANCE.

INVOCATION: A form of praise or blessing greatly in vogue in medieval Hebrew literature. In ancient times the invocation was an essential part of the various forms of salutation, many instances of which are found in Biblical, and especially in post-Biblical, literature. They recognize the divine presence, invoke the divine benediction, and express the wish that the object of the salutation may enjoy a long and happy life and general prosperity. To them belong also the special blessings invoked upon arriving and departing travelers and upon the sick, and those recited upon extraordinary occasions, joyful or otherwise—upon drinking wine, upon sneezing, and upon the completion of a written communication. See ASUSA.

With the exception of a few formulas used when mentioning the name of the Lord (יתברך שמו, יתברך, ית' ש' של מלך מלכי המלכים הקב"ה, שמו של הקב"ה, הקב"ה יתברך שמו ויתרומם זכרו), invocations, as a rule,

Invocations for the Living.

refer to persons, and fall into two main groups, those upon the living, and those upon the dead. In the first group the oldest formula occurs frequently in the Mishnah (זכור לטוב = "may he be remembered for good!"). This formula, however, afterward came to be invoked mainly upon the dead. From geonic times are derived expressions like ברכינון רחמנא and נטריה רחמנא [ופרוקיה], abbreviated נר"ו, נ"ר; the latter abbreviation, having gained the signification of the term נרו ("his light"), evolved into נרו יאיר. Later were added שמרהו צורו, ישמרהו צורו also with the addition ונואלו (י"ץ, יצ"ו, ש"ץ, שצ"ו, יש"ץ ישצ"ו).

The wish that the one saluted may enjoy a long and happy life was conveyed in the formula יחיה, יחיה לעד; then, more fully, in שיחיה לארך ימים (שלי"ו, שילי"ו, with אמן=שילי"א), or שיחיה לארך ימים ושנים טובים (שלי"ט, with אמן = שליט"א; with the further addition סלה=שליטא"ס). The Spanish or Oriental Jews write סופו טוב (ס"ט). In the case of prominent men, particularly those that wielded worldly power, non-Jewish rulers included, the formula ירום הודו was, and still is, used (יר"ה; הוד מלכות is a Biblical expression; see Dan. xi. 21; I Chron. xvi. 27, xxix. 25). Besides these special phrases, several Bible verses, generally in abbreviated and altered form, were employed, such as, for instance, those from Ex. xviii. 4: אלהי אבי בעזרי (see Ps. cxlvi. 5: שאל יעקב בעזרו); Deut. xxxiii. 24: יהי רצוי אחיו (יר"א); Isa. liii. 10: יראה זרע יאריך ימים (יזי"י) with the appended אמן=יזיי"א); Ps. xxii. 27: יחי לעד; xxiv. 5: ישא ברכה מאת י"י (יבמ"י); xli. 3: י"י ישמרהו ויחיהו; lxxii. 17: יהי שמו לעולם לפני שמש ינון שמו; Prov. iii. 2: ארך ימים ושנות חיים ושלום יוסיפו לך (from which came: אי"ש = אך ימי שנות חיים יוסיפו לו חי"ל; or perhaps, in order to obtain this ingenious abbreviation, the letter ו of ושנות and the word ושלום have been omitted, and the eulogy runs: ארך ימים שנות חיים יוסיפו לו); Ezra i. 3: יהי אלהיו עמו, etc. In the case of women, from Judges v. 24 is recited: תברך מנשים and מנשים באהל תברך (מב"ת, ת"מ) transposed תמ"ב) were customary. On occasion of mentioning localities use was made of the eulogy formed after Num. xxi. 27: תבנה ותכונן במהרה בימינו (תוב"ב ת"ו, with אמן=תובב"א); so, likewise, the adaptations from Ps. xlviii. 9 and lxxxvii. 5: יכוננה עליון (with אמן = יע"א) and יכוננה עד עולם סלה, were employed.

Invocations for the Dead.

Eulogies upon the dead contain an expression of the desire that the life of the departed may prove to have been a blessing, that their earthly remains may have peace, and that their souls have entered the realms of bliss, are partaking there of heavenly blessings and of the raptures of Eden, and are face to face with the glory of God. The utterance of some of these eulogies, such as the phrase זכרונו לברכה לחיי העולם הבא (briefly: זכרונו לברכה) was early enjoined upon children when naming their deceased father, and upon pupils when naming their deceased teacher. The following forms of eulogy, each with its variations, have gradually developed: זכור לטוב (ז"ל), זכר צדיק לברכה (Prov. x. 7, compare Ps. cxii. 6; abbreviated זצ"ל), זכר קדוש לברכה (זק"ל); in combination these eulogies upon the dead occur in numerous variations, among which זכר צדיק וקדוש לברכה לחיי העולם הבא (זצוקללה"ה and זצוללה"ה) is the most complete formula; עליו השלום (ע"ה); נוחו עדן (נ"ע); נוחו נפש (נ"נ); נפשיה לשלמא; נפשו בגן עדן תנוח (נב"ע); [נפשו, נשמתו] בגן עדן (נבע"ת; in transpositions נתב"ע, תנב"ע; with אמן = תנבע"א); גן עדן תהי מנוחתו (געת"ם), etc.

Besides these freely selected formulas, as in the case of eulogies upon the living, verses from the Bible, more or less modified in form, have been employed. These were largely taken from Ex. xvi. 14: ותעל שכבת הטל (the resurrection is notably associated with the dew, טל של תחיה); I Sam. xxv. 29: והיתה נפש אדוני צרורה בצרור החיים (from among the many variations the most customary is: תהי נפשו צרורה בצרור החיים = תנצ"בה); Isa. xi. 10: [והיתה] מנוחתו כבוד (מ"כ, תמ"ך = תהי מנוחתו כבוד); *ib.* xxvii. 11: ירחמנו עשהו; *ib.* lvii. 2: יבוא שלום ינוחו על משכבותם הלך נכחו; lxiii. 14: רוח ד' תניחנו (compare also Genesis ii. 15: וינחהו בגן עדן; from the two verses developed the formula רוח ד' תניחנו בגן עדן = ריתב"ע); Hab. ii. 4: צדיק [ו]באמונתו יחיה (צב"י): Ps. xvii. 14: חלקם בחיים; *ib.* xxv. 13: נפשו בטוב תלין וזרעו יירש ארץ (נבתוי"א; often only the first half, נב"ת); *ib.* xci. 1: בצל שדי יתלונן (בש"י); *ib.* cxvi. 9: אתהלך לפני י"י בארצות החיים (in the third person יתהלך, etc. = יליב"ה); Dan. xii. 13: ותעמד לגורלך לקץ הימין; and many others. The merits of the deceased who led a pious life were recited to the surviving in expressions such as זכותו יגן עלינו (זי"ע), זכותו תעמד לנו (זת"ל), זכותו לעד יגן בעדנו (זלי"ב), etc.

It may naturally be assumed that the eulogies found upon tombstones represent the eulogies in current use at the time of inscription. Nor have the poets in their acrostics neglected them (חזק, חזק ואמץ, ז"ל, נ"ע; יגדל בתורה ובמעשים טובים, יגדל בתורה, יחיה ר"ת). The contractions of eulogy, as abbreviations in general, have greatly influenced the formation of family-names: compare, for example, names such as Shalit (שלי"ט), Jare (יר"א), and others.

IONIA. See JAVAN.

IOWA: One of the north-central states of the American Union. A part of the Louisiana Purchase (1803), it was incorporated successively in the territories of Louisiana, Missouri, Michigan, and Wisconsin. In 1838 it was organized as the Iowa Territory, and in 1846 admitted to the Union. There are no records of Jewish organizations, charitable or congregational, prior to 1855. There were, however, Jews living in the river towns as early as 1847–48, especially at Dubuque and McGregor, the main shipping and crossing points for the West, and small unorganized Jewish communities existed at Davenport, Burlington, and Keokuk. From 1849 to 1879 the population shifted steadily toward the interior of the state and the Missouri River.

Des Moines is the capital and the largest city of Iowa; it was settled in 1846, incorporated in 1851, and chartered as a city and made the capital of the state in 1857. Its population (1903) is about 70,000, of which, perhaps, 1,800 are Jews. The first congregation in Des Moines was the B'nai Yeshurun, organized in 1873, with conservative tendencies; its temple was dedicated in 1887, and ministered to by Rabbis Davidson, Freudenthal, Müller, Bottigheimer, and Sonneschein. It is now a Reform congregation. Three other congregations, the youngest of which was established in 1903, use the Orthodox ritual.

Davenport, on the Mississippi, has (1903) a population of 40,000, including about 300 Jews. Its one congregation, B'nai Israel (Reform), was organized in 1861. The synagogue Temple Emanuel was dedicated in 1884. The pastorate has been held by Rabbis Freuder, Thorner, and Fineshriber. The community has a ladies' aid society, a burial-ground association, a B'nai B'rith lodge, and a branch of the Jewish Woman's Council.

Keokuk, on the Mississippi, and at the southeastern extremity of the state, organized, in 1856, a benevolent society, which, in 1863, was reorganized into the Congregation B'nai Israel. A temple was built, and the congregation flourished until 1898, when the removal of many members compelled the resignation of their minister. Since that time services have been held only occasionally, and on holy days. The total population is 15,000, of which not more than 50 are Jews (1903).

Sioux City had its earliest Jewish organization, the Hebrew Ladies' Aid Society, in 1884; Mt. Sinai congregation was organized in 1898. It has the usual number of philanthropic societies. Rabbis Ellinger, Leiser, and Mannheimer have successively officiated since the organization of the congregation. It has a total population of 35,000, of which 400 are Jews (1903).

Burlington has one congregation, Anshe Yitzchak (Orthodox), founded in 1902. In the early seventies a congregation existed under Rev. S. Hecht, but it lived only one year. B'nai B'rith Lodge No. 251 was organized in 1875. There are about 150 Jews, in a total population of 25,000.

Small congregations exist in **Centerville, Council Bluffs, Dubuque,** and **Waterloo. Cedar Rapids, Clinton, Lake City, Ottumwa,** and **Rock Island** have very small communities without organized congregations, though holding services on holy days.

Moses Bloom of Iowa City was elected twice to the state legislature, and in 1883 was chosen senator of Johnson county.

The name of A. F. Slimmer of Waverly is connected with many bequests to Jewish, Christian, and non-sectarian institutions.

The entire Jewish population of Iowa does not exceed 5,000.

IRELAND: An island west of Great Britain, forming part of the United Kingdom of Great Britain and Ireland. The earliest mention of Jews in Ireland appears toward the end of the eleventh century, although, curiously enough, quite a number of books have been written to identify the Irish with the Lost Ten Tribes.

The first authentic mention of Jews in Ireland is a record, dating from 1079, that "five Jews came over the sea bearing gifts to Fairdelbach [Hua Brian], and were sent back over the sea." No further reference is found until nearly a century later, in the reign of Henry II. of England. That monarch, fearful lest an independent kingdom should be established in Ireland, prohibited a proposed expedition thither. Strongbow, however, went in defiance of the king's orders; and, as a result, his estates were confiscated. In his venture Strongbow seems to have been assisted financially by a Jew; for under date of 1170 the following record occurs: "Josce Jew of Gloucester owes 100 shillings for an amerciament for the moneys which he lent to those who against the king's prohibition went over to Ireland" (Jacobs, "Jews of Angevin England," p. 51).

Jewish names appear in the "Calendar of Documents Relating to Ireland," between 1171, when Joseph the Doctor is referred to, down to 1179. It is unlikely, however, that Jews settled in the island in appreciable numbers at that period; for no further record is found concerning them until several years later. An entry dated 1225 shows that Roger Bacon had borrowed considerable sums from English Jews in connection with his mission on the king's service in Ireland.

Branch of the Irish Exchequer.

By that date, however, there was probably a Jewish community in Ireland; for under date of July 28, 1232, appears a grant by King Henry III. to Peter de Rivall, granting him the office of treasurer and chancellor of the Irish Exchequer, the king's ports and coast, and also "the custody of the King's Judaism in Ireland." This grant contains the additional instruction that "all Jews in Ireland shall be intentive and respondent to Peter as their keeper in all things touching the king." The Jews at this period probably resided in or near Dublin. In the Dublin White Book, under date of 1241, appears a grant of land containing various prohibitions against its sale or disposition by the grantee. Part of the prohibition reads "vel in Judaismo ponere." Both this and the preceding reference were common form.

The last mention of Jews in the "Calendar of Documents Relating to Ireland" appears about 1286. When the expulsion from England took place (1290), the Irish Jews had doubtless to go as well. At any rate, there is no further mention of them until the period of the Commonwealth, when the resettlement of the Jews in England under Cromwell led to resettlement in Ireland also. From investigations made by Lucien Wolf, it would appear, however, that as early as 1620 one David Sollom, a Jewish merchant, purchased some property in Meath which is still in the possession of his descendants.

Jews are first heard of again in Dublin; and there is reason to believe that they were among the Dissenters who came after Cromwell's conquests. It is even stated that some Portuguese Jews settled in Dublin on Cromwell's invitation, and that they soon became opulent merchants. They established a synagogue in Crane lane.

Settlement in Dublin.

The Dublin congregation prospered, and seems to have been in existence in the reigns of King William III. and Queen Anne. In a work published in the latter's reign mention is made of a visit to London by a Rabbi Aaron Sophair of Dublin. No record, however, is found of any Jewish settlement outside of Dublin. As late as 1737 Cork seems to have had no Jewish community, though toward the middle of the century mention is made of Jews residing there.

In 1728, or thereabout, Michael Phillips presented the Dublin Jews with a piece of freehold ground at Ballybough Bridge for a cemetery; and about the middle of the eighteenth century the Bevis Marks Congregation of London assisted them financially in erecting a wall round the burial-ground. It should be mentioned that the Dublin congregation at one time proposed to affiliate itself with the Spanish and Portuguese congregation of London. Dublin in 1745 contained about forty Jewish families, comprising about 200 persons. Their synagogue was at Marlborough Green, and their cemetery in the center of the village of Ballybough.

In 1746 a bill was introduced in the Irish House of Commons "for naturalizing persons professing the Jewish religion in Ireland." Another was introduced in the following year, agreed to without amendment, and presented to the lord lieutenant to be transmitted to England; but it never received the royal assent. These Irish bills, however, had one very important result; namely, the formation of the Committee of Diligence, which was organized by British Jews at this time to watch the progress of the measure. This ultimately led to the organization of the Board of Deputies, which important body has continued in existence to the present time.

Jews were expressly excepted from the benefit of the Irish Naturalization Act of 1783.

The Dublin congregation declined steadily toward the end of the eighteenth century; and by the beginning of the nineteenth the synagogue was discontinued, and the borrowed scrolls were returned to the Bevis Marks Congregation. About 1822, however, the congregation was reorganized, and it has prospered ever since. Its meeting-place was for several years at 40 Stafford street; a new synagogue was built in Mary's Abbey in 1835; and the present place of worship is in Adelaide road.

The exceptions in the Naturalization Act of 1783, referred to above, were abolished in 1846. In the same year the obsolete statute "De Judaismo," which prescribed a special dress for Jews, was also formally repealed. The Irish Marriage Act of 1844 expressly made provision for marriages according to Jewish rites.

When the Irish famine was at its height in 1847, the Jews of America took an active interest in relieving the distress; and a notable meeting was organized by the Spanish and Portuguese congregation of New York, at which a fund was raised in aid of the sufferers.

Toward the middle of the nineteenth century several families of German Jews settled in Ireland. Conspicuous among these was the JAFFE family of Belfast, which established the famous linen-house bearing its name.

Jews have repeatedly held office in Ireland. A Benjamin d'Israeli, or Disraeli, a public notary in Dublin from 1788 to 1796, and later a prominent member of the Dublin Stock Exchange, held the office of sheriff for County Carlow in 1810. In all likelihood, however, he was a Jew by origin only.

Ralph Bernal-Osborne, of Jewish extraction, was a prominent land-owner in Ireland, and represented Waterford in Parliament in 1870.

The first professing Israelite, however, to hold office was Lewis Harris, alderman of the city of Dublin. His son, Alfred Wormser Harris, succeeded him as senior alderman, and in 1880 contested the county of Kildare in the Liberal interest. Alfred now (1903) holds commissions of the peace for the city and county of Dublin.

Prominent Irish Jews.

The most prominent position ever held in Ireland by a Jew was that of Lord Mayor of Belfast, held by Sir Otto JAFFE 1899–1900; he also became high sheriff in 1901. At present Sir Otto is justice of the peace for Belfast and also consul at that city for the German government. Maurice E. Solomons, justice of the peace for the city and county of Dublin, is acting consul in that city for the Austro-Hungarian empire.

Among the Jews graduated from Trinity College, Dublin, may be mentioned N. L. Benmohel, the first professing Jew to enter the institution since its foundation by Queen Elizabeth; John D. Rosenthal, LL.D; Barrow Emanuel, J.P.; and Ernest W. Harris, LL.D. The Rev. Alfred Philip Bender, J.P., a native Irish Jew, has been government member of the council of the University of the Cape of Good Hope.

Ireland is the only portion of the British Isles that has a religious census; and, consequently, figures are more nearly correct there than elsewhere. The Jewish population in 1871 was 258. By the census of 1881 it did not exceed 453, mostly of English and German extraction. Since that date, however, it has increased considerably, doubtless owing to Russian immigration. In 1891 it was given as 1,779; in 1901 as 3,771. The bulk of this population resides in Dublin, which contains about 2,200 Jews. Besides the synagogue on Adelaide road, there are five minor congregations, a board of guardians, and a number of charitable and educational institutions.

Belfast has a Jewish population of about 450, and contains several charitable organizations and two synagogues, of one of which Sir Otto Jaffe is president. The Jewish population of **Cork** is about 400. **Limerick, Londonderry,** and **Waterford** have each a synagogue and charitable organizations. Zionist societies also have been established in Ireland.

The Jewish population is distributed in the provinces as follows: Connaught, 4; Leinster, 2,246; Munster, 670; and Ulster, 851.

IRON: The invention of the art of working in brass and iron is ascribed to Tubal-cain (Gen. iv. 22), and thus placed in prehistoric times. The Israelites, therefore, derived their knowledge of the art from others. Further proof of this fact is furnished by the undoubtedly trustworthy report that Solomon brought Hiram, an artificer, from Tyre to make the brazen implements used in the Temple; from this it is apparent that at that time the Jews had not acquired the art. Indeed, as industrial pursuits in general among the Jews arose only after the time of Solomon, it may be assumed that the same was the case with the art of working in brass and iron. Outside of the cities the peasant continued for a long time to make (as he still makes at the present day, in some places) his own clothes and his own simple tools, and to be his own carpenter. As soon, however, as the Israelites began to settle in larger towns, and especially as the Canaanitish cities were opened to them, a division of labor took place; then, for the first time, such occupations as working in brass and iron began to develop among them. Without doubt the use of brass preceded that of iron: the kitchen utensils were of brass ("neḥoshet"), as also were parts of the armor—helmet, shield, cuirass, greaves, bow, and, perhaps, sword (I Sam. xvii. 5 *et seq.*; II Sam. xxii. 35).

Iron does not seem to have taken the place of brass until a rather late date. Although the art of working in iron is mentioned in the Hexateuch (Num. xxxi. 22, xxxv. 16; Deut. iii. 11, xix. 5; Josh. xxii. 8), these are generally considered comparatively late passages, and would therefore only indicate something for the time in which they were written, but nothing for the period to which they refer. The same is claimed for I Sam. xvii. 7 and II Kings vi. 5; these passages are said to belong to a considerably later period. The oldest passage from this point of view which presupposes the use of iron is II Sam. xii. 31, in which "ḥarize ha-barzel" are mentioned. In Amos "ḥaruẓot ha-barzel," used by the Arameans, are spoken of. It may be inferred from II Sam. xii. 31 that the Israelites of that time were also familiar with the metal.

Period of Introduction.

Iron was used in a great many ways: for manufacturing axes and hatchets (Deut. xix. 5; II Kings vi. 5); sickles, knives, swords, and spears (I Sam. xvii. 7); bolts, chains, and fetters (Ps. cv. 18; cvii. 10, 16; Isa. xlv. 2); nails, hooks, and hilts (Jer. xvii. 1; Job xix. 24). It was also used in making plows, thrashing-carts, and thrashing-boards (Amos i. 3; I Sam. xiii. 20; II Sam. xii. 31), as well as for sheathing war-chariots. The Israelites found such "iron chariots" already in use among the Canaanites, and were compelled to avoid encountering the enemy in the open plain, where the latter could use their chariots.

Iron lends itself readily to figurative usage. Thus Egypt is called "kur ha-barzel" (the iron furnace; Deut. iv. 20); those who are sunk in misery are described as "asire 'oni u-barzel" (bound in affliction and iron; Ps. cvii. 10). A tyrannical ruler is characterized as "shebeṭ barzel" (Ps. ii. 9), or "'ol barzel" (Deut. xxviii. 48); an unbending neck is "gid barzel" (Isa. xlviii. 4). The teeth of the fourth great beast which Daniel saw in his vision are of iron (Dan. vii. 7; comp. II Macc. xi. 19; Ecclus. [Sirach] xxii. 15).

IR-SHEMESH (עיר שמש, "city of the sun"): A city of Dan, mentioned with Shaalabbin and Ajalon (Josh. xix. 41-42). Its parallel name in Judges (i 35, Hebr.) is "Har-Ḥeres" (the mountain of the sun). Some modern critics identify Ir-shemesh with Beth-shemesh, in Judah. See Heres.

E. G. H. M. Sel.

ISAAC.—Biblical Data: Second patriarch; son of Abraham and Sarah. He was the child of a miracle, for at the time of his birth his mother, hitherto childless, was ninety years old, and his father a hundred. By the command of God the child was named "Isaac" (יצחק; in poetical language ישחק = "laughter"), because Abraham had, covertly, laughed in incredulity when, a year previously, he had received the promise of God that a son would be born to him by Sarah (Gen. xvii. 17); so also did Sarah as, standing at the door of the tent, she heard the promise reiterated by the angel (Gen. xviii. 12). Isaac was circumcised when he was eight days old, and at his weaning the parents manifested their joy by giving a great feast. As a solicitous mother Sarah urged Abraham to send away Ishmael, his son by the servant-maid Hagar, whom she had seen mocking Isaac. At first Abraham hesitated, but at the command of God he complied with the wish of his wife; Isaac was thus declared the sole heir of his father.

Birth of Jacob and Esau.

A critical event in Isaac's life occurred when God's command came that he should be offered as a sacrifice on a mountain in the land of Moriah (Gen. xxii. 2). Isaac showed himself in this trial to be worthy of his father. Without murmuring he suffered himself to be bound and laid upon the altar. But Abraham was prevented by God from consummating the sacrifice, and a ram that happened to be near was offered instead. At the age of thirty-six Isaac lost his mother. Abraham then charged Eliezer, his steward, with the mission of selecting a wife for Isaac from among his (Abraham's) own people. After a series of providential coincidences, Eliezer returned with Rebekah, whom Isaac, then forty, married (Gen. xxv. 20). For twenty years they were childless; at last Isaac's prayers were heard, and Rebekah gave birth to the twins Esau and Jacob. As the children grew the gentle and good-natured Isaac came to prefer the boisterous and adventurous Esau, who gratified his father with the choicest spoils of the chase, while the quiet and less adventurous Jacob was an object of special regard to Rebekah: a division of feeling which became later a source of jealousy and hatred between the two brothers.

A famine compelled Isaac to leave his abode "by the well of Lahai-roi." On this occasion he had his first vision. God appeared to him in a dream and warned him not to go down to Egypt, but to remain within the boundaries of Palestine, promising him great prosperity and numerous descendants. Isaac therefore settled among the Philistines at Gerar, where, fearing lest Rebekah's beauty should tempt the Philistines to kill him, he had recourse to a stratagem that had been used in similar circumstances by his father; he pretended that she was his sister. The Philistine king, however, was not long in finding out the truth, and, after rebuking Isaac for his deceit, adopted stringent measures for the protection of husband and wife.

Persecuted by Philistines.

In his new home Isaac devoted himself to husbandry, and succeeded so well that he incurred the envy of the Philistines. They commenced a petty persecution against him, stopping up the wells which his father had dug, and which Isaac's servants had reopened. The peace-loving Isaac submitted patiently to these persecutions until Abimelech enjoined him to remove from Gerar. Isaac then pitched his tent in the valley of Gerar, shortly afterward settling at Beer-sheba, where God appeared to him for the second time and blessed him. An altar was built by Isaac on the spot where he had had the vision, and his servants dug a well. While living there Isaac received a visit from Abimelech, king of the Philistines, and Phichol, the chief captain of his army, who came to court his alliance.

Isaac's old age was not a happy one. He was assailed by infirmities, and became totally blind. To this was added the enmity between his two sons. With prevision of his death, Isaac recommended his son Esau to bring him some venison and receive his blessing. At the instigation of Rebekah, Jacob, profiting by the blindness of his father, presented himself in Esau's stead, and received the blessing intended for the latter. This infuriated Esau to such an extent that Jacob had to seek safety in flight. Isaac died at Hebron, at the age of 180, shortly after the return of Jacob and his family from Mesopotamia, and was buried by his two sons in the cave of Machpelah, beside Abraham and Sarah.

——**In Rabbinical Literature:** According to the Rabbis, Isaac was born in the month of Nisan, at noon, when the spring sun was shining in all its glory (Rosh ha-Shanah 10b; Gen. R. liii.). At that hour the sick were restored to health, the blind recovered their sight, and the deaf their hearing; the brightness of the sun and of the moon was intensified (Tan., Gen. 37); a spirit of justice began to prevail in the world: hence the name יצחק, a compound of יצא and חוק (= "Law was issued"). In the numerical value of each letter of the name there is an allusion: thus, the י (= 10) alludes to the Decalogue; the צ (= 90), and the ק (= 100), to the respective ages of Sarah and Abraham at the birth of Isaac; the ח (= 8) refers to the day of circumcision (Gen. R. liii.). Notwithstanding, there were slanderers who maintained that Abraham and Sarah had picked up a foundling, or, according to another haggadah, had taken a son of Hagar and pretended that he was their son. To silence these slanderers Abraham prepared a great feast on the occasion of the weaning of Isaac, whereat, by a miracle, Sarah was enabled to nurse all the sucklings that had been brought by the women invited to the feast. As there was no longer any doubt as to Sarah's maternity, the slanderers questioned Abraham's paternity. Then God imprinted on the face of Isaac the features of Abraham, and the likeness between father and son became so great that one was often mistaken for the other (B. M. 87a; Yalḳ., Gen. 93). According to some Ishmael committed the crime of attracting Isaac to the fields and there casting at him arrows and balls under the pretext of play (מצחק), but in reality to get rid of him (Gen. R. liii.): for this reason Sarah insisted on Ishmael and his mother being dismissed.

The Sacrifice of Isaac.

A fertile subject in the Haggadah is the attempted sacrifice of Isaac, known as the "'aḳedah." According to Jose ben Zimra, the idea of tempting Abraham was suggested by Satan, who said: "Lord of the Universe! Here is a man whom thou hast blessed with a son at the age of one hundred years, and yet, amidst all his feasts, he did not offer thee a single dove or young pigeon for a sacrifice" (Sanh. 87b; Gen. R. lv.). In Jose ben Zimra's opinion, the 'aḳedah took place immediately after Isaac's weaning. This, however, is not the general opinion. According to the Rabbis, the 'aḳedah not only coincided with, but was the cause of, the death of Sarah, who was informed of Abraham's intention while he and Isaac were on the way to Mount Moriah. Therefore Isaac must then have been thirty-seven years old (Seder 'Olam Rabbah, ed. Ratner, p. 6; Pirḳe R. El. xxxi.; Tanna debe Eliyahu R. xxvii.). Not only did he consent to the sacrifice, but he himself suggested it in the course of a discussion that arose between him and Ishmael concerning their respective merits. Ishmael asserted his superiority to Isaac on account of his having suffered himself to be circumcised at an age when he could have objected to it, while Isaac underwent the operation on the eighth day after his birth "Thou pridest thyself," replied Isaac, "on having given to God three drops of thy blood. I am now thirty-seven years old, and would gladly give my life if God wished it" (Sanh. 89b; Gen. R. lvi. 8).

While he was on the way to Mount Moriah Isaac was addressed by Satan in the following terms: "Unfortunate son of an unfortunate mother! How many days did thy mother pass in fasting and praying for thy birth! and now thy father, who has lost his mind, is going to kill thee." Isaac then endeavored to awaken the pity of his father (Gen. R. lv.). According to another haggadah Isaac rebuked Satan and told him that he was not willing to oppose the wish of his Creator and the command of his father (Tan., Gen. xlvi.). While Abraham was building the altar Isaac hid himself, fearing lest Satan should throw stones at him and render him unfit for a sacrifice. The same fear caused him to ask to be bound on the altar; "for," said he, "I am young and may tremble at the sight of the knife" (Gen. R. lvi. 8).

The 'Akedah in Jewish Liturgy.

The 'akedah is especially prominent in the Jewish liturgy. The remembrance of the incident by God is believed to be a sure guaranty of His forgiveness of the sins of Israel; hence the numerous 'akedah prayers, a specimen of which is found in the Mishnah. See 'Akedah. Isaac is presented in rabbinical literature as being the prototype of martyrs (Esth. R. i.). The great tractability of his character is shown by his conduct in the affair of the wells, which he abandoned without complaining of the injustice done him (Sanh. 111a). More than other patriarchs he pleads for Israel. When Abraham and Jacob, says the Talmud, were told that their children had sinned, they answered, "Let them be blotted out for the sanctification of Thy name"; but when God said to Isaac, "Thy children have sinned," Isaac answered, "Why are they my children more than Thine? When they answered, 'We will do [all that God shall command] and we will listen,' Thou calledst them 'My first-born'; yet now they are mine and not Thine! Moreover, how long can they have sinned? The duration of man's life is seventy years. In the first twenty years he is not punished [being irresponsible]; half of the remaining fifty is passed in sleeping. Half of the remainder is spent in praying, eating, etc. There remain only twelve and a half years. If thou art willing to bear the whole, it is for the better; if not, let half be borne by me and the other half by Thee. But if Thou insist upon my bearing the whole, I have already sacrificed myself for Thee" (Shab. 89b).

To Isaac is attributed the institution of the "Minḥah" prayer (Ber. 26b). Like Abraham, he observed all the commandments, and made proselytes. He was one of the three over whom the Angel of Death had no power; one of the seven whose buried bodies were not devoured by worms; one of the three upon whom the "yeẓer ha-ra'" (the seducer) had no influence (B. B. 17b). He caused the Shekinah to descend from the sixth to the fifth heaven (Gen. R. xix.).

s. I. Br.

ISAAC: Member of the embassy sent in 797 by Charlemagne to Harun al-Rashid, calif at Bagdad, probably as interpreter for the ambassadors, who were the noblemen Sigismund and Landfried. Both died on their way back, and Isaac became the sole bearer of the calif's answer and presents, among which latter was a magnificent elephant. When the emperor was informed of Isaac's return to France, he sent the notary Erchenbald to Liguria in order to prepare for the transportation of the elephant and the other presents. Isaac arrived at the port of Vendres in Oct., 801; but, as the Alps were covered with snow, he was obliged to pass the winter at Verceil. He reached Aix-la-Chapelle in the summer of 802, and the emperor received him in audience there.

Zunz ("G. S." i. 157) supposes that Isaac was the means of establishing relations between the French rabbis and the Geonim, as France is not mentioned in the decisions of the latter before 850 ("Sha'are Ẓedeḳ," p. 12).

Bibliography: Eginhard, *Annales*, pp. 51, 52, in Guizot's *Collection des Mémoires*, vol. iii., Paris, 1824; Grätz, *Gesch.* 3d ed., v. 184-185; Steinschneider, *Jewish Literature*, p. 81; Aronius, *Regesten*, No. 68.

G. M. Sel.

ISAAC B. ABBA MARI: French codifier; born in Provence about 1122; died after 1193 (in Marseilles ?). Isaac's father, a great rabbinical authority, who wrote commentaries on the Talmud ("'Iṭṭur," i. 17, ed. Warsaw, section "Kinyan"), and responsa (*l.c.* p. 49, section "Shemat Ba'alim"), was his teacher. In his "'Iṭṭur" Isaac often mentions as another of his teachers his uncle, who, according to a manuscript note (see Neubauer, "Cat. Bodl. Hebr. MSS." No. 2356), was a pupil of Alfasi. Isaac carried on a friendly correspondence with Jacob Tam, whom he was in the habit of consulting on doubtful questions, though not as a pupil consults a teacher. Abraham b. Nathan of Lunel and Abraham b. Isaac (RABaD II.) were related to him, while the son-in-law of the latter, Abraham b. David of Posquières, frequently consulted him on scientific questions. Isaac began his literary activity at the age of seventeen, when, at his father's suggestion, he wrote "Sheḥiṭah u-Ṭerefot," rules for the slaughtering of animals and the eating of their flesh. At about the same time he wrote a small work on the precepts concerning ẓiẓit, at the request of Sheshet Benveniste "ha-Nasi" of Barcelona. Both works form a part of the legal codex "'Iṭṭur," or "'Iṭṭur Soferim," which occupied Isaac about twenty-three years (from 1170 to 1193). Until modern times only the first part of this work was known (Venice, 1608); the whole codex was published first by Schönblum (Lemberg, 1860), and included Isaac's "'Aseret ha-Dibrot," which is really only a special name for a part of the "'Iṭṭur." The "'Iṭṭur" contains, in three parts, almost a complete code of laws, and is divided as follows: part i., jurisprudence, including the laws of marriage and divorce; part ii., rules concerning the slaughter of cattle, and concerning meat which it is permissible to eat; concerning circumcision, ẓiẓit, tefillin, marriage ceremonies; part iii., "'Aseret ha-Dibrot," embracing a consideration of the rules governing the following ten subjects: (1) the Feast of Tabernacles; (2) lulab; (3) hallel; (4) shofar; (5) Yom Kippur; (6) megillah; (7) Ḥanukkah; (8) prohibition of leavened bread on the Passover; (9) the commandment concerning maẓẓah and mara; (10) general laws for feast-days.

The book belongs to the classic productions of rabbinical literature in France. Isaac shows in this work a knowledge of the two Talmuds such as almost no other person of his time possessed. With works on the Geonim, among them many responsa and treatises which are otherwise unknown to-day, he shows the same familiarity as with the productions of the northern French Talmudists. At the same time he proceeds independently in his criticism, without regard to the age or reputation of former authorities, and spares not even the Geonim and Alfasi, though he admired them greatly.

While Spanish and German Talmudists, up to the time of the "Ṭur," often mentioned the "'Iṭṭur," and authorities like Solomon ibn Adret, Asher b.

Jehiel, Mordecai b. Hillel, and several others refer to this work, after the appearance and wide circulation of the "Ṭur" it soon shared the fate of many other codices (as, for example, Abraham b. Isaac's "Eshkol"), and fell into disuse. Joseph Caro was the first who, after a long interval, made use of the "'Iṭṭur" (for his "Bet Yosef"; see the introduction), but even he does not appear to have had the whole work before him (comp. "Bet Yosef," Oraḥ Ḥayyim, 671).

Spread of the "'Iṭṭur."

At the end of the seventeenth century Jacob b. Israel Sason wrote a commentary to a part of the "'Iṭṭur," under the title "Bene Ya'aḳob" (Constantinople, 1704). In the eighteenth century the following authors wrote commentaries to the work: Eliezer b. Jacob ("Naḥum"; not published); Abraham Giron ("Tiḳḳun Soferim u-Mikra Soferim" (Constantinople, 1756, with text); Jacob b. Abraham de Boton gives fragments of his commentary to the "'Iṭṭur" in his collection of responsa, "'Edut be-Ya'aḳob" (Salonica, 1720); while a similar work by Solomon al-Gazi was lost during its author's lifetime. Samuel Schönblum published an edition of the "'Iṭṭur" annotated by himself. Meïr Jonah b. Samuel wrote a very exhaustive and learned commentary (with text; parts ii. and iii., Wilna, 1874; part i., in two sections, Warsaw, 1883 and 1885). Isaac wrote also marginal notes to Alfasi's "Halakot," with the title "Me'ah She'arim," which appeared for the first time in a Wilna edition of Alfasi (1881–97). No trace has been preserved of his commentary to Ketubot, which he quotes ("'Iṭṭur," i. 15, section "Zeman").

ISAAC ABENDANA. See Abendana, Isaac.

ISAAC BEN ABRAHAM ANCONA AL-ḲUSṬANṬINI: Italian Talmudist; lived at Ancona in the first half of the eighteenth century. He carried on a scientific correspondence with Isaac Lampronti, who frequently mentions him in his "Paḥad Yiẓḥaḳ."

Bibliography: Mortara, *Indice*, p. 2.

K. I. Br.

ISAAC BEN ABRAHAM HA-GORNI: Provençal poet; lived at Luc in the second half of the thirteenth century. He is known in Hebrew literature under the surname of "Gorni," which, as Steinschneider first pointed out, is the Hebrew equivalent of "Aire" (= גרן). Isaac is represented by Abraham Bedersi in his diwan as a venal itinerant poet, selling his praises to the highest bidder. However, judging from some fragments in the library of Munich (Steinschneider, "Cat. Munich," No. 128), extracts from which were published in "Monatsschrift" (1882, p. 510), Isaac possessed a poetical talent far above that of his antagonist Bedersi. In addition to the fragments mentioned, a diwan of which Isaac was the author is still extant in manuscript (St. Petersburg).

Bibliography: Steinschneider, in *Ḥotam Toknit*, pp. 1–13; Neubauer, in *Arch. des Missions Scientifiques*, 3d series, i. 571; Renan-Neubauer, *Les Rabbins Français*, pp. 719 *et seq.*; *Monatsschrift*, 1882, pp. 510–523; Gross, *Gallia Judaica*, p. 49.

G. I. Br.

ISAAC BEN ABRAHAM OF NEUSTADT: Dutch cabalist; lived at Amsterdam in the seventeenth and eighteenth centuries. He was an assistant rabbi at Amsterdam, where he devoted himself to the editing of cabalistic works. In 1701 he published, from a manuscript he had in his possession, the "Sefer Raziel ha-Gadol" of Eleazar of Worms, in the preface to which Isaac expresses his firm belief that the book possesses the virtue of protecting from fire the house in which it, or a copy of it, is kept. He reedited the cabalistic treatises "Sefer ha-Malbush," "Sefer Noaḥ," "Sefer ha-Mazzalot," "Shi'ur Ḳomah," "Tefillot," and "Ma'aseh Bereshit." In the same year he edited and published "Zohar he-Ḥadash," "Midrash ha-Ne'elam," "Sitre Torah," "Tiḳḳunim," "Liḳḳuṭim," and the Zohar on the Five Scrolls. His son Löb added to the "Zohar he-Ḥadash" a vocabulary to the two Zohars, extracted from the "Imre Binah" of Issachar Bär.

Bibliography: Wolf, *Bibl. Hebr.* i., No. 1147; Jellinek, in *Orient*, *Lit.* vii. 254; Steinschneider, *Cat. Bodl.* col. 1074.

K. I. Br.

ISAAC BEN ABRAHAM OF POSEN: Polish rabbi and author; died in Posen 1685. He was the pupil of R. Jonah Teomim, author of "Ḳiḳayon de-Yonah," and colleague of R. Moses Zacuto; later he became rabbi of Lutzk, Volhynia, whence he went to Grodno. In 1664 he was called to Wilna to succeed R. Moses, author of "Ḥelkat Meḥoḳeḳ"; thence he went (1667) to the rabbinate of Posen. He was called "Rabbi Isaac the Great" because of his extensive knowledge in Talmud and Cabala. He gave his approbation to many books at the meetings of the Polish rabbis. He is mentioned in "Magen Abraham," on Oraḥ Ḥayyim, Nos. 1, 32; and his responsa are found in "Ge'on Ẓebi," "Bet Ya'aḳob," and "Eben ha-Shoham."

Bibliography: Eisenstadt-Wiener, *Da'at Ḳedoshim*, pp. 41, 43; Dembitzer, *Kelilat Yofi*, 70b, 122a; Perles, *Gesch. der Juden in Posen*, in *Monatsschrift*, 1865, No. 14.

ISAAC OF ACCO. See Isaac ben Samuel of Acre.

ISAAC BEN ASHER II.: Tosafist, apparently of the beginning of the thirteenth century. He is quoted by Mordecai b. Hillel (M. Ḳ No. 504), who adds that Isaac b. Asher died a martyr The same passage is also found in "Haggahot Maimuniyyot" ("Semaḥot," No. 78), where it is simply said that he was killed. He is also quoted in "Da'at Zeḳenim" (to Ex. vii. 25), where it is said that he was born on the same day that the tosafist Isaac b. Asher ha-Levi died. This statement makes Zunz suppose ("Z. G." p. 32) that Isaac b. Asher II. was the latter's grandson. Zunz also says that Isaac b. Asher II. was killed at Würzburg, which is against probability.

Bibliography: Fuenn, *Keneset Yisrael*, p. 595; Kohn, *Mordochai b. Hillel*, p. 120.

S. M. Sel.

ISAAC BEN ASHER HA-LEVI (RIBA): Tosafist; lived at Speyer in the eleventh century; son-in-law of Eliakim ben Meshullam and pupil of Rashi. His are the earliest known tosafot, and are mentioned, under the name of "Tosafot Riba," in the "Temim De'im," in the printed tosafot (Soṭah 17b), and in the "Tosafot Yeshanin" (Yoma 15a). They are frequently quoted without the name of their author. Isaac ben Asher also wrote a commentary on the Pentateuch, which is no longer in existence. It is cited in the "Minḥat Yehudah," and Jacob Tam made use of it in his "Sefer ha-Yashar" (p. 282).

Bibliography: Azulai, *Shem ha-Gedolim*; Zunz, *Z. G.* p. 31; Michael, *Or ha-Ḥayyim*, p. 501, No. 1074.

S. S. I. Br.

ISAAC (ABU JACOB) BAR BAHLUL: Karaite scholar; lived at the end of the eleventh, or at the beginning of the twelfth, century. Two decisions of his have been preserved by Hadassi. The first of these ("Eshkol ha-Kofer," alphabet 197) refers to the eating of quail in the wilderness, which, according to his calculation, began on the 24th of Iyyar in the second year after the Exodus, and ended on the 24th of Siwan (Num. x. 11, 33; xi. 18, 19). The second decision ("Eshkol ha-Kofer," alphabet 236) refers to the conditions under which it was allowable to sacrifice outside the sanctuary. Isaac is also quoted by Jacob Tamani and the author of "Ḥilluḳ." Nothing is known of his literary activity.

Bibliography: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 166 (where his name is erroneously given as "Gahlul"; comp. also pp. 82, 86, 106, 193); Fürst, *Gesch. des Karäert.* ii. 48; Steinschneider, *Hebr. Bibl.* v. 50; *J. Q. R.* x. 134.

K. S. P.

ISAAC IBN BARUN, ABU IBRAHIM. See Ibn Barun, Abu Ibrahim Isḥaḳ.

ISAAC THE BLIND (סגיא נהור; ISAAC BEN ABRAHAM OF POSQUIÈRES): French cabalist; flourished in the twelfth and thirteenth centuries. Isaac is considered the founder of the Cabala; or, rather, he transmuted the mysticism of the Geonim into the present form of the Cabala. He is therefore called by Baḥya b. Asher "Father of the Cabala" (Commentary on the Pentateuch, section Wayishlaḥ). Joseph Gikatilla (Commentary to the Pesaḥ Haggadah), speaking of the "Ma'aseh Merkabah," says that cabalistic science was handed down from Mount Sinai from person to person until it reached Isaac the Blind. Other cabalists, like Shem-Ṭob ibn Gaon, Isaac of Acre, and Recanati, expressed themselves similarly. Among Isaac's pupils was Azriel (Ezra) ben Menahem of Gerona. It was Isaac who gave names to the ten Sefirot, and who first adopted the idea of metempsychosis. Recanati (Commentary on the Pentateuch, section Wayesheb) declares that Isaac the Blind could tell whether a man's soul was new or old. He is generally supposed to have been the author of a commentary on the "Sefer Yeẓirah" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2456, 12). Later scholars attribute to him the authorship of the Bahir.

Bibliography: Grätz, *Gesch.* 3d ed., vii. 60 and note 3; Jellinek, *Auswahl Kabbalistischer Mystik*, i. 14; Landauer, in *Orient, Lit.* vi. 215; Gross, *Gallia Judaica*, p. 450.

ISAAC DE CASTRO. See Castro.

ISAAC BEN ELEAZAR HA-LEVI (surnamed Segan Lewiyah): German Talmudist and liturgical poet; flourished at Worms; died, according to Abraham Zacuto ("Yuḥasin ha-Shalem," p. 217), in 1070. Zunz says ("Literaturgesch." p. 155) that he died between 1070 and 1096. He was a pupil of R. Gershom "Me'or ha-Golah" and one of the teachers of Rashi; the latter mentions him often in his commentary on the Talmud (*e.g.*, to Yoma 39a; Suk. 35b; Meg. 26a), and twice in his commentary on the Bible (to I Sam. i. 24 and Prov. xix. 24). Conforte ("Ḳore ha-Dorot," p. 8a) confounds Isaac b. Eleazar ha-Levi with another teacher of Rashi, Isaac b. Judah, while Abraham Zacuto (*l.c.*) calls him "Isaac b. Asher ha-Levi." He was one of the "scholars of Lorraine" ("Ha-Pardes," p. 35a; "Asufot," p. 150a, Halberstam MSS.); Isaac b. Moses relates ("Or Zarua'," ii. 75b) that Meïr of Ramerupt sent a responsum, signed by his father-in-law and teacher Rashi, to Isaac ha-Levi of Lorraine. The occurrence of "Vitry" as the birthplace of Isaac ha-Levi in Asheri to Ḥul. iv. is, according to Gross ("Gallia Judaica," p. 197), a mistake for "Lotar" (Lorraine). It is stated in the Maḥzor Vitry (quoted by Zunz, "Literaturgesch." p. 626) that Jacob b. Yaḳar, Isaac ha-Levi, and Isaac b. Judah, all three teachers of Rashi, directed the yeshibah of Paris.

Isaac ha-Levi had four sons, all great Talmudic scholars: Asher, the father of the tosafist Isaac b. Asher ("Ha-Pardes," p. 19a); Eliezer; Jacob, known under the name of "Ya'beẓ" (Mordecai to Meg. 3); and Samuel ("Ha-Pardes," pp. 16b, 18b, 45c). He was the author of four wedding piyyuṭim: "Yoẓer," in a double alphabet and signed "Isaac ben R. Eleazar Ḥazaḳ"; "Ofan," alphabetically arranged; "Zulat," in tashraḳ order; "Reshut," in four parts, the first riming in מה, and the other three in ים, the whole giving the acrostic "Isaac ben R. Eleazar ha-Levi."

Bibliography: Conforte, *Ḳore ha-Dorot*, pp. 8a, 17a; Abraham Zacuto, *Yuḥasin*, p. 217, London, 1857; Azulai, *Shem ha-Gedolim*, i.; Michael, *Or ha-Ḥayyim*, No. 507; Zunz, *Literaturgesch.* pp. 155–157, 626; idem, *Z. ISAAC BEN ELIAKIM OF POSEN: German moralist and author; lived in the sixteenth and seventeenth centuries. He was the author of "Leb Ṭob" (Prague, 1620), an ethical work in Judæo-German in twenty chapters. Its popularity may be judged from the fact that it was reprinted many times. Criticisms on it are to be found in the anonymous "Hassagot," Amsterdam (?), *c.* 1707.

Bibliography: Steinschneider, *Cat. Bodl.* Nos. 3473, 5344; Fürst, *Bibl. Jud.* ii. 110; extracts are given in Winter and Wünsche, *Die Jüdische Litteratur*, iii. 541.

G. M. Sel.

ISAAC BEN ELIEZER: Ethical writer at Worms; flourished from 1460 to 1480. He attended the lectures of Moses ben Eliezer ha-Darshan (Zunz, "Z. G." p. 105), whom he praises in high terms. Isaac wrote in German an ethical and ascetic treatise under the title "Sefer ha-Gan" (Cracow, about 1580). It is divided into seven parts, one for each day in the week. Translated into Hebrew by Moses

Saertels, it was subsequently printed, together with Johanan Luria's "Sefer ha-Derakah," in Prague (1597, 1612) and Amsterdam (1663, 1713). The Hebrew translation has been twice rendered into German ("Das Hochgelobte Sefer ha-Gan," Hanau, about 1620; "Das Ist der Teutsch Sefer ha-Gan," Fürth, 1692).

S. M. Sc.

ISAAC BEN ELIEZER HA-LEVI: Spanish grammarian of the fourteenth century. He was the author of "Sefer ha-Riḳmah," a grammatical treatise still extant in manuscript (Paris, Bibliothèque Nationale, Hebr. MSS., Ancien Fonds, No. 510). As stated in the introduction to this work, it was composed for a Babylonian scholar named Aaron ben Abraham, for whom Isaac had previously written a grammar entitled "Sefat Yeter."

BIBLIOGRAPHY: *Revue Orientale*, i. 275; Benjacob, *Ozar ha-Sefarim*, p. 551.

G. I. Br.

ISAAC BEN ELIJAH SHENI (SHANI): Turkish rabbi; lived at Constantinople in the first half of the sixteenth century. The name "Sheni" is followed by the letters נצכה, which Steinschneider ("Cat. Bodl." col. 1155) suggests should be read as נצבה, the initials of the eulogy "Nafsho Ẓerurah bi-Ẓeror ha-Ḥayyim." Isaac wrote a work called "Me'ah She'arim," a double commentary, simple and cabalistic, on one hundred of the six hundred and thirteen commandments (Salonica, 1543). He also revised and edited Menahem Recanati's "Ṭa'ame ha-Miẓwot" (Salonica, 1544). He is, perhaps, identical with Isaac ibn Farḥi (Steinschneider, *l.c.*).

BIBLIOGRAPHY: Wolf, *Bibl. Hebr.* i., No. 1162; iii., No. 1162; Azulai, *Shem ha-Gedolim*, ii. 74; Zunz, *Z. G.* p. 453; Steinschneider, *Cat. Bodl.* col. 1155; Fürst, *Bibl. Jud.* i. 276.

S. S. M. Sel.

ISAAC OF EVREUX: French rabbinical scholar and Biblical commentator; flourished in the thirteenth century. His authority was invoked by Mordecai (Giṭ. iv., No. 384; Ber. vi.), and by R. Perez in his glosses on the "Semaḳ" (No. 293). He is mentioned as a Biblical commentator in "Da'at Zeḳenim" (p. 33b), and as an author of responsa in "Sha'are Dura" (12a, 25b, 46a). He is also mentioned in "Kol Bo" (No. 114) as having corresponded with R. Nathanael. Gross ("Gallia Judaica," p. 41) identifies Isaac of Evreux with the tosafist Isaac ben Sheneor (Tem. 18a), who was the master of Isaac of Corbeil ("Semaḳ," No. 153; "Orḥot Ḥayyim," i. 55a).

S. S. M. Sel.

ISAAC IBN GABBAI. See Gabbai.

ISAAC IBN ḤALFON, ABU IBRAHIM: Spanish poet of the eleventh century. According to Moses ibn Ezra's treatise on poetry (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1974, fol. 316), his father had emigrated from Africa to Andalusia. Isaac was acquainted with Jacob ibn Jaso, at whose house in Cordova he was a frequent guest (see Abu al-Walid, "Ha-Riḳmah," ed. Goldberg, p. 122; Derenbourg, "Opuscules et Traités d'Aboû l-Walîd," p. vii.). Abu al-Walid (*l.c.* p. 186) complains that one of the very few poems that he had written in his early youth had been copied by certain jealous persons and circulated among some people of Toledo with the name of Isaac ibn Ḥalfon as its author; and that when some of his pupils noticed this and asserted Abu al-Walid's authorship, they were disbelieved. Isaac ibn Ḥalfon is quoted as "the poet" ("ha-meshorer") by Moses ibn Ezra in several passages in his above-cited treatise (see Schreiner, "Le Kitab al-Mouhadara," etc., in "R. E. J." xxii. 244). According to Al-Ḥarizi ("Taḥkemoni," xviii., ed. "Aḥiasaf," p. 181, Warsaw, 1899), it seems that Isaac introduced new (perhaps Arabic) meters into Hebrew poetry, which were used by succeeding poets.

Though he doubtless wrote a number of poems, only two may be ascribed to him with any degree of certainty. These are one beginning חולת אהבה, metrically translated and published by Michael Sachs, in "Die Religiöse Poesie der Juden in Spanien" (Hebrew part, p. 39; German part, p. 107; comp. also p. 216); and one beginning חום ורחם (see Steinschneider, "Die Handschriften-Verzeichnisse der Königlichen Bibliothek zu Berlin," i. 126, No. 142). If the first-mentioned poem, which has the acrostic חלפון, is really genuine, it is probable that חלפון is a more correct form of Isaac's name than כלפון, though both of them seem to be the Hebrew transliteration of the Arabic "khalfun" (= "banker," "money-changer"). According to Sachs (*l.c.* p. 289), Isaac ibn Ḥalfon is to be identified with Ḥalfon ha-Levi Abu Sa'id, who lived in Damietta.

That acute critic Al-Ḥarizi (*l.c.*), in passing judgment upon the value of Isaac's poetry, said that only a few of his poems were beautiful like the fruit of goodly trees (comp. Lev. xxiii. 40), most of them being thorns and thistles. However, among the numerous poets of his age he was "anointed king" (comp. "Taḥkemoni," iii. 39).

ISAAC BEN ḤAYYIM OF VOLOZHIN: Russian Talmudist; born at Volozhin, government of Wilna; died at Ivenitz, government of Minsk, June 16, 1849. Isaac was a distinguished Talmudist, owing to which fact he succeeded his father as head of the yeshibah of Volozhin. In 1844 he was called to St. Petersburg as a member of the rabbinical commission appointed by the emperor to consider a proposal to found rabbinical seminaries and schools for Jewish children. Isaac was the author of a work entitled "Mille de-Abot" (n.p.; n.d.), consisting of novellæ on Pirḳe Abot.

ISAAC BEN ISAAC: French tosafist of the second half of the thirteenth century; mentioned in Tos. Naz. 16b; identical, according to Gross and Zunz, with **Isaac of Chinon,** whose glosses are found in Shiṭṭah Meḳubbeẓet to Naz. 63a. He is also referred to in Solomon ben Adret's responsa, where he is described as "chief of the French yeshibot." According to these responsa Isaac corresponded with Isaac ben Joseph of Marseilles, exhorting him to moderation in his dispute with a certain Nathan, one of Isaac of Chinon's own relatives. Isaac corresponded also with the above-mentioned Nathan, as well as with David ben Levi, author of the ritual work "Miktam," and with Mordecai ben Isaac Ḳimḥi.

ISAAC ISRAELI. See ISRAELI, ISAAC BEN SOLOMON.

ISAAC (ISACHOK), JACOB: Court physician to King Sigismund I. of Poland; son of Abraham of Jerusalem; died at Kazimierz, a suburb of Cracow, about 1510. He was recommended in 1504 to King Alexander Jagellons by Archbishop Andreas of Gnesen, whose court physician he had been. On the archbishop's recommendation, the king permitted Isaac to purchase from the heirs of Frederick of Olmütz, formerly surgeon to King John Albert, the right to the taxes of the Jews of Cracow, which amounted to one hundred Hungarian florins per annum. For this privilege Isaac paid the heirs the sum of three hundred florins. In order to disprove the taunts of the Jews of Kazimierz, who had ascribed to him a humble origin, Isaac persuaded two Polish noblemen, Jacob Wagorzowski and Thomas Czarnycki, who were setting out to visit the Holy Sepulcher at Jerusalem, to secure his pedigree ("yiḥus") from his sister Sarah, resident in that city, as written evidence of his descent from a family of undoubted antiquity. His friends accordingly returned to Isaac with the required documents. King Sigismund evinced great interest in the matter, as appears from a decree dated Cracow, May 12, 1507, embodying the facts in regard to Isaac's lineage. Isaac's difficulties with the Jewish community continued nevertheless, as is evidenced by a second decree, dated June 14, 1509, affirming the fact that the taxes of the Jews of Cracow had been made payable to the "king's physician, the Spanish Jew Dr. Isaac, during his life."

Isaac must have died before June, 1510, as by a decree dated June 18 in that year it appears that, as a reward for Isaac's services, the king granted the Jewess Barsaba (Isaac's widow), together with her children, all the privileges which had been enjoyed by her husband. Whether Isaac was a Sephardic Jew from Palestine or a Spanish exile is difficult to determine. The Russian historian Bershadski, referring to the Polish sobriquet "Jerosolimska Schlachta" (noblemen of Jerusalem), declares it as his belief that the term arose out of Isaac's efforts to establish his noble birth.

H. R.

ISAAC (EISAK) BEN JACOB ḤABER: Rabbi at Tikotzyn and Suwalki, Poland; lived in the first half of the nineteenth century. He wrote: "Bet Yiẓḥaḳ," a ritualistic work, the first part of which bore the title "Sha'ar ha-Ḳabua'," the second, "Sha'ar ha-Sefeḳut" (Sudzilkow, 1836); "Seder Zemanim," on the precepts to be observed on certain dates (Warsaw, 1844); "Yad Ḥazaḳah," a commentary on the haggadah of Passover, with annotations by his son Joseph, under the general title "Yad Miẓrayim" (*ib.* 1844); "Magen we-Ẓinnah," a defense of the Cabala against the attacks of Judah de Modena in "Ari Nohem" (n.p., n.d.).

S. S. I. BR.

ISAAC BEN JACOB HA-LABAN: Tosafist and liturgical poet; flourished at Prague in the twelfth century; the brother of the traveler Pethahiah of Regensburg. He was among the earliest of the tosafists ("ba'ale tosafot yeshanim"), a contemporary of R. Eleazar of Metz, and a pupil of R. Tam ("Sefer ha-Yashar," § 704; Solomon Luria, Responsa, No. 29). According to Recanati (Responsa, No. 168), Isaac directed the yeshibah of Ratisbon. He also lived at Worms for a time ("Agur," 71b). Isaac is mentioned in the Tosafot (Yeb. 5a, 71a; Ket. 38b; Zeb. 73b; and frequently elsewhere), and Isaac ben Moses, in his "Or Zarua'," No. 739, quotes Isaac ben Jacob's commentary on Ketubot, a manuscript of which exists in the Munich Library (No. 317). He is also mentioned in a commentary to the Pentateuch written in the first half of the thirteenth century (Zunz, "Z. G." p. 80). There is a piyyuṭ signed "Isaac b. Jacob," whom Zunz ("Literaturgesch." p. 313) supposes to be Isaac ben Jacob ha-Laban.

S. S. M. SEL.

ISAAC BEN JACOB THE LEVITE (מן הלויים; abbreviated ימ"ה): Rabbi and cantor at Venice; born in 1621. He was the son of a cabalist and a grandson of Judah de Modena, whose "Bet Yehudah" (on haggadic Talmudical passages) Isaac set up in type when only fourteen years old. Isaac had many persistent personal enemies in Venice, whose persecutions he described in his autobiography, a manuscript copy of which was known to Ghirondi. According to Ghirondi, Isaac wrote: (1) a short compendium of Moses Cordovero's "Pardes Rimmonim"; (2) several poems, some of which are printed in Yom-Ṭob Valvason's "Hed Urim" (Venice, 1661); (3) "Ma'ase Ḥakamim" (Venice, 1647), a summary of occurrences in the lives of the teachers of the Talmud, taken from Jacob ibn Ḥabib's "'En Ya'aḳob" (which Isaac cites as "'En Yisrael") and from Judah de Modena's "Bet Yehudah." The narratives follow the order of the Talmudical treatises, and each is closed with a moral sentence. Isaac was both author and printer of this book. He also supplied notes to several of the works of other authors.

S. M. Sc.

ISAAC IBN JASOS IBN SAKṬAR (more correctly **Abu Ibrahim Isaac ibn Yashush** [ישוש]; also called **Yiẓḥaḳi**): Spanish grammarian; born 982; died at Toledo about 1057–58. He is identified by Steinschneider with the physician Isḥaḳ ibn Ḳasṭar or, as Moses ibn Ezra calls him, Isḥaḳ ibn Saḳṭar ("Z. D. M. G." viii. 551, ix. 838). According to Ibn Abi Uṣaibi'a ("'Uyun al-Anba'," ii. 50), he was the physician in ordinary of Muwaffaḳ Mujahid al-'Amiri and of his son Iḳbal al-Daulah, kings of Denia. He was well trained in logic, Hebrew grammar, and Jewish law, and was conversant with the opinions of the philosophers. Moses ibn Ezra (*l.c.*) called him and Abu al-Walid the two sheiks of Hebrew grammar.

He wrote in Arabic "Sefer ha-Ẓerufim" (the Arabic title of which was, probably, "Kitab al-Taṣarif"; Neubauer, in "Journal Asiatique," 1862, ii. 249), on inflection. It is known only from references to it by Abraham ibn Ezra, who, in his commentary on the Bible, often condemns Isaac's exegesis because of its too bold historical criticism. Thus, Isaac ibn Jasos holds that Gen. xxxvi., in which the genealogy of the kings of Edom is given, was not written earlier than the time of King Jehoshaphat. He also identified the "Hadad" of Gen. xxxvi. 35 with "Hadad the Edomite" of I Kings xi. 14; the "Mehetabel" of Gen. xxxvi. 39 with the "sister of Tahpenes" of I Kings xi. 19; Jobab ben Zerah with Job; the prophet Hosea ben Beeri with Hosea ben Elah, the last king of Israel (see Ibn Ezra on Hosea i. 1, and comp. Isa. xv. 8, where both seem to be mentioned in the word "Beer-elim").

Such opinions, seemingly drawn from Moses ibn Gikatilla, caused Ibn Ezra to declare that Isaac ibn Jasos' book deserved to be burned as the work of a "prattler ["mahbil"] of vain things" (see Ibn Ezra on Job xlii. 16 and Gen. xxxvi. 32). Isaac may likewise be the "mahbil" whom Ibn Ezra opposes because he desired to alter words or expressions in more than 200 passages in the Bible ("Safah Berurah," ed. Lippmann, p. 9b, Fürth, 1839; "Ẓaḥḥut," ed. Lippmann, p. 72a, *ib.* 1834). This system of substitution had been used for the first time by Abu al-Walid.

G. M. Sc.

ISAAC, JOHANN LEVITA: German professor of Hebrew; born 1515; died at Cologne 1577. At first a rabbi at Wetzlar, he was baptized as a Protestant in 1546, but embraced the Roman Catholic faith when called to Cologne as professor of Hebrew, in which office he remained until his death. In 1556 he wrote a popular Hebrew grammar, the last of the five editions of which was published at Antwerp in 1570. He also edited Maimonides' work on astrology (Cologne, 1555) and Moses ibn Tibbon's commentary on Aristotle's "Physics" (*ib.* 1555; Bartolocci, "Bibliotheca Magna Rabbinica," iii. 912).

Isaac's son, **Stephan** (b. 1542), was at first educated as a physician, but was called as an assistant to his father in 1565, when he became a priest of the Roman Catholic Church. He created great excitement by openly denouncing Catholicism as idolatry from his pulpit (Oct. 5, 1583). In 1586 he wrote an "Apologia," and went over to Calvinism. He was, however, accused of having reverted to Judaism, and reports were current that he had been seen acting as a Levite in the priestly benediction at Deutz.

T. J.

ISAAC BEN JOSEPH OF CORBEIL (also known as בעל החוטם = "the man with the nose"): French ritualist; flourished in the second half of the thirteenth century. He was the son-in-law of R. Jehiel ben Joseph of Paris, whose school he attended, and the pupil of the "Great Men of Evreux," notably of Samuel, whom he calls "the Prince" (שר) of Evreux. Isaac's conspicuous piety drew toward him many disciples, the best known of whom were Perez ben Elijah of Corbeil, Baruch Ḥayyim ben Menahem of Niort, and his fellow citizen Joseph ben Abraham. He was induced by his pupils to publish in 1277 an abridgment of Moses ben Jacob of Coucy's "Sefer Miẓwot Gadol" (called "Semag" from its initials סמ"ג), under the title "'Ammude ha-Golah" or "Sefer Miẓwot Ḳaṭan" (generally called "Semaḳ" from the initials סמ"ק). This work was most favorably received by the communities of France and Germany, and has often been edited and annotated. Isaac also published "Liḳḳuṭim" (collectanea), and several small compilations containing his ritual decisions. The "Kol Bo" (No. 128) contains a long fragment of a Talmudic work of R. Isaac, with this superscription: קצת דינים מה"ר יצחק ז"ל.

BIBLIOGRAPHY: Carmoly, *Biographies des Israélites de France*, p. 45; *Rev. Ét. Juives*, iv. 213, vi. 168; Gross, *Gallia Judaica*, pp. 563–565.

L. G. S. K.

ISAAC (EISAK) BEN JOSHUA BEN ABRAHAM OF PRAGUE: Physician and parnas of Prague in the sixteenth century. He was the author of "'Olat Yiẓḥaḳ," a collection of ritual laws arranged after the Arba' Ṭurim of Jacob ben Asher. They are in the form of 843 problems or riddles, in one hundred chapters (Prague, 1606).

S. S. M. Sc.

ISAAC JOSHUA BEN IMMANUEL DE LATTES: Italian Talmudist and publisher; born at Rome at the end of the fifteenth century; died at Ferrara about 1570. He was the grandson of the well-known physician and astronomer Immanuel Boneto. Isaac occupied, about 1530, the position of rabbi at Avignon (Neubauer, in "R. E. J." x. 80 *et seq.*). In 1536 he was at Mantua, where he published the Zohar. Thence, for some unexplained reason, he had to flee to Bologna, leaving his books behind him. In 1546 he was manager of the Hebrew printing-office in Rome, and in this capacity rendered many services to Hebrew literature. Family affairs called him again to Avignon in 1558. On his return to Bologna he found himself in very straitened circumstances. In a letter addressed to one of his friends he complains of his poverty, which prevented him from going to Piedmont or to Lombardy, where Hebrew books were not liable to confiscation, and where he might have founded a Talmudical school and thus secured a livelihood. His chief regret was that he did not possess the 300 scudi he had promised as dowry to his daughter Dolcetta, who was engaged to Laudadio di Sienna. Later, Isaac lived at Ancona and afterward at Cesena, whence he was called to Ferrara by Isaac Abravanel as tutor to his sons.

Isaac wrote a collection of responsa, published by Friedländer (Vienna, 1860), and a commentary on the "Beḥinat 'Olam" of Jedaiah Bedersi, still extant in manuscript (Vienna MS. No. 84).

S. S. I. Br.

ISAAC BEN JUDAH: Talmudist of the twelfth century; teacher of Solomon ben Isaac (Rashi). He was a native of Lorraine ("Ha-Pardes," 35a), but settled early in life in Germany, where he studied under Eleazar ha-Gadol. Isaac occupied successively the positions of head of the rabbinical schools of Mayence and Worms; it was in the latter place that he became the teacher of Rashi. Isaac was one of the greatest Talmudic authorities of his time, and his name is frequently mentioned in rabbinical literature. He was the author of commentaries on the Talmud, some of which are cited by Rashi (Ber. 39a, 57a; R. H. 28a); and his responsa are scattered in the "Pardes ha-Gadol," the "Liḳḳuṭe Pardes," the "Or Zarua'," the "Shibbole ha-Leḳeṭ," the "Mordekai," and the responsa of Meïr of Rothenberg. In a French Maḥzor manuscript quoted by Zunz ("Z. G." p. 622), Isaac is mentioned as having been at one time head of the rabbinical school of Paris; this, however, is highly improbable.

S. S. I. Br.

ISAAC BEN JUDAH HA-LEVI: French exegete and tosafist; lived at Sens, probably, in the second half of the thirteenth century. He was the pupil of Ḥayyim of Falaise, whom Gross identifies with Ḥayyim Paltiel. Isaac compiled, under the title "Pa'aneaḥ Raza," a commentary on the Pentateuch, in which literal interpretations ("peshaṭ") are frequently intermingled with "notariḳon" and "gemaṭriot." The authorities quoted by Isaac are Joseph Ḳara, Joseph Bekor Shor, Judah he-Ḥasid, Eleazar of Worms, Ḥayyim of Falaise, and many other tosafists. The "Pa'aneaḥ Raza" was first published at Prague in 1607, from an incomplete manuscript, by Isaac Cohen, the son-in-law of Jacob Mölin. Complete copies of the work, with a postscript, and a poem containing the name of the compiler in acrostic, are extant in manuscript in the Bodleian and other European libraries. Isaac wrote tosafot to the Talmud, and is called "Ba'al Tosafot mi-Shanẓ" (= "The Tosafist of Sens").

BIBLIOGRAPHY: Zunz, *Z. G.* p. 92; Steinschneider, *Cat. Bodl.* col. 1127; Neubauer, in *Ha-Maggid*, 1870, Nos. 28, 29; Renan-Neubauer, *Les Rabbins Français*, p. 437; Gross, *Gallia Judaica*, p. 481.

S. I. Br.

ISAAC BEN JUDAH LÖB: Rabbi at Offenbach in the first half of the eighteenth century. He wrote "Be'er Yiẓḥaḳ," a commentary on the Hafṭarot, with the text (1729); "Me'irat 'Enayim," on the 613 Biblical precepts according to Maimonides (Fürth, 1730). In the preface to the latter work he mentions his "Be'er Yiẓḥaḳ," which is otherwise unknown.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1127.

D. S. Man.

ISAAC BEN JUDAH BEN NATHANAEL OF BEAUCAIRE (surnamed **Ha-Sheniri**): Liturgic poet of the early part of the thirteenth century. Zunz credits him with thirty-eight synagogal hymns, most of them to be found in the rituals of Carpentras, Avignon, and Tripoli. They are dated between 1205 and 1220. The author asserts that he was officiating as minister, and that he lived in מגדל השניר or מגדל מלנצה, הר שניר. Cassel believes that שניר designates Montauban, while Gross thinks it refers to Mont-Ventoux, at the foot of which Malauçene (מלנצה) is situated. Al-Ḥarizi ("Taḥkemoni," ch. xlvi.) speaks in praise of this poet, "whose songs make the stars turn pale."

BIBLIOGRAPHY: Zunz, *Literaturgesch.* p. 472; idem, *S. P.* pp. 110-290; idem, *Z. G.* pp. 316, 466, 469, 475; Landshuth, *'Ammude ha-'Abodah*, p. 118; Renan-Neubauer, *Les Rabbins Français*, p. 715; Gross, *Gallia Judaica*, p. 360.

S. S. I. L.

ISAAC HA-KOHEN OF MANOSQUE: French Talmudist of the first half of the fourteenth century; rabbi at Manosque, in the department of Basses-Alpes. He is praised as a great Talmudist by his contemporaries, although he does not seem to have written anything. He had a controversy with one of his pupils by the name of Baruch, which terminated in the excommunication of the latter. Baruch, supported by many rabbis, protested vehemently; Solomon ben Adret, however, confirmed the excommunication. Beyond this, nothing is known of Isaac. Gross identifies him with Isaac b. Judah ha-Kohen, who addressed a responsum to Isaac ben Mordecai called "Moshe Petit de Nîmes."

BIBLIOGRAPHY: Gross, in *Monatsschrift*, xxviii. 423; idem, *Gallia Judaica*, p. 362.

S. S. A. Pe.

ISAAC HA-KOHEN OF NARBONNE: French Talmudist; lived in the twelfth and thirteenth centuries; a disciple of Abraham ben David of Posquières. He was the author of a commentary, no longer extant, on various treatises of the Jerusalem Talmud. This commentary is mentioned by Isaac de Lattes and Menahem Me'iri. Gross identifies him with the Isaac ha-Kohen whose authority on ritual matters is frequently invoked by Aaron ha-Kohen in his "Orḥot Ḥayyim."

BIBLIOGRAPHY: Gross, *Gallia Judaica*, p. 420.
S. S. I. BR.

ISAAC HA-KOHEN OF OSTROG: Russian rabbi; lived in the sixteenth and seventeenth centuries. He was the author of a work entitled "Mattenot 'Ani," or "Ḳiẓẓur Mizraḥi," a compendium of Elijah Mizraḥi's commentary on Rashi, with notes (Prague, 1604–09).

ISAAC DE LEON: One of the last rabbis of Castile; lived at Toledo. He was a native of Leon, and a pupil of Isaac Campanton, and, like Moses de Leon, a cabalist and a believer in miracles. Joseph Caro and others honored him with the title of "the great teacher." He was more than seventy years of age at his death, which occurred some years before the expulsion of the Jews from Spain; he was mourned by many pupils. The work ascribed to him, "Megillat Ester," an answer to Naḥmanides' criticism of Maimonides' "Sefer ha-Miẓwot," has been proved by Azulai to belong to Isaac Leon ibn Ẓur, a later writer.

G. M. K.

ISAAC LEON BEN ELIEZER IBN ẒUR SEFARDI: Rabbi at Ancona in the first half of the sixteenth century. He belonged to a Spanish family which settled in Italy after the expulsion of the Jews from Spain. Isaac was the author of "Megillat Ester," in which he defends the "Sefer ha-Miẓwot" of Maimonides against the criticisms of Naḥmanides (Venice, 1592; Amsterdam, 1660; Berlin, 1733). Isaac's name occurs in connection with a halakic decision which he rendered in 1546 conjointly with Jacob Israel Finzi, rabbi of Recanati, the occasion being a lawsuit between Asher ben Solomon of Monte de Lulo and Jacob Catelano. This decision was reversed by the bet din of Rome. Both the decision and the reversal were published at Rome in 1546, under the title "Pesaḳ."

ISAAC BEN LEVI OF PROVENCE: French liturgical poet; flourished in the twelfth century. Among the piyyutim for New-Year's Day contained in the Maḥzor of Provence are some which indicate Isaac b. Levi as their author. Zunz ("Z. G." p. 466) supposes that Isaac is identical with the Ben Levi quoted by Abraham Bedersi in his "Ḥereb ha-Mithappeket."

BIBLIOGRAPHY: Steinschneider, *Jewish Literature*, p. 164.
G. M. SEL.

ISAAC BEN LEVI BEN SAUL OF LUCENA: Spanish grammarian and liturgical poet; flourished in the first half of the eleventh century; a contemporary of Isaac Gikatilla and Isaac ibn Halfon. Isaac is quoted under the name of "Isaac b. Saul" by Ibn Janaḥ in "Ha-Riḳmah" (p. 122), where some of his verses are given; in "Sefer ha-Shorashim" (*s.v.* עיר); in "Sefer ha-Ḳerub weha-Yesher"; by Moses ibn Ezra (see Wolf, "Bibl. Hebr." iii. 4); and by Abraham ibn Ezra in his commentary to the Bible (Deut. xxxii. 17; Isa. xxvii. 5) and in his "Sefat Yeter" (No. 68). The metrical poem beginning "Elohai al-tedineni" is attributed to Isaac b. Levi, while the one beginning "Ha-kol yifḥadu" gives the acrostic "Yiẓḥaḳ bar Lewi ben Mar Sha'ul Alisani." There also exist a seliḥah for the seventeenth of Tammuz and a poem for the seventh day of Passover, which both give the acrostic "Yiẓḥaḳ bar Lewi"; this, according to Zunz ("Literaturgesch." p. 217), may designate Isaac ben Levi b. Saul.

ISAAC HA-LEVI OF WORMS. See ISAAC B. ELEAZAR HA-LEVI.

ISAAC, MARC JACOB: French educationist and writer; born March 10, 1828, at Niederhomburg, near Saargemünd, Lorraine. After attending the teachers' seminary at Colmar (1844–47), he taught in several Jewish schools in Alsace, and later in Paris. He is the author of "Le Crime du Déicide et les Juifs" (1894), "De Dieu et l'Âme" (1894), and "La Foi Aveugle et les Curés" (1902), and is a contributor to the "Archives Israélites."
S. S. MAN.

ISAAC B. MEÏR OF DUEREN. See DUEREN, ISAAC B. MEÏR.

ISAAC BEN MEÏR OF NARBONNE: French liturgical poet of the first half of the twelfth century. He is mentioned as a liturgical poet by Joseph Ḳara in his commentary to Job. He was probably the author of the following five poems: "Yomam 'Enenu," pizmon, in which the poet bewails the condition of the Jews in his time, and expresses a longing for the "holy places"; "Yosheb Ḳedem Ebḥarenu," a pizmon in nine verses; "Omnam 'Awinu u-Pasha'nu," a prayer in twelve verses, with a refrain; "Ye'teru Ḥaberim," a prayer in nine verses; "Tafḳidam Mebaḳḳeshim," a prayer for the Festival of Gedaliah. It is not certain, however, that Isaac wrote the third and fifth. All these poems are distinguished by vivid coloring and facility of expression.

S. S. A. PE.

ISAAC BEN MELCHIZEDEK OF SIPONTO: Italian rabbi and Talmudist; lived about 1110–70; born in Siponto, a seaport of Apulia and an ancient seat of Jewish learning. His father was known there as an erudite Talmudist and was connected with the bet ha-midrash; Isaac has sometimes been confounded with him (see Neubauer in "Ha-Maggid," 1874, No. 5; Zunz, "Literaturgesch." p. 163). For unknown reasons Isaac removed to Salerno, where he met the traveler Benjamin of Tudela, who subsequently referred to him as "the great rabbi" (הרב הגדול; "Itinerary" of Benjamin of Tudela, ed. Asher, i. 13 [Hebr. part, ii. 29]). Isaac addressed a legal question to his contemporary R. Tam, which the latter answered in a responsum (see "Or Zarua‘," ii., § 52). He wrote also a letter to the rabbis of Rome to get an explanation of an obscure mishnah (R. Tam, "Sefer ha-Yashar," §§ 548–549; comp. Berliner, "Peleṭat Soferim," pp. 8, 46). It is improbable that the Greek Talmudist whom Abraham ibn Ezra derided on account of his deficient knowledge of Hebrew was identical with Isaac ben Melchizedek of Siponto, as Grätz suggests ("Gesch." vi. 372). His son **Shiloh** is mentioned in "Sefer ha-'Iṭṭur" (ed. Lemberg, i. 14b).

Isaac, one of the earliest Talmudists of lower Italy, wrote a commentary on the Mishnah, probably on the whole of the Mishnah, though only the part on Seder Zera‘im has been preserved (Neubauer, "Cat. Bodl. Hebr. MSS." No. 392); this part has been printed in the new (1890) Wilna edition of the Talmud; Bik. ii. 4 to the end was printed long before as an addition to Simson of Sens's commentary. Isaac's commentary on Seder Ṭohorot is often quoted (see Azulai, "Shem ha-Gedolim," i. 106), especially by Simson of Sens. Fragments of it are to be found in R. Tam's "Sefer ha-Yashar" (*l.c.*) and in a Rashi and RaSHbaM manuscript described by A. Berliner ("Monatsschrift," xiii. 217, 223). His methods of explanation are concise and clear and similar to Rashi's. Most of his explanations are original, and some of them are based upon Greek, Arabic, and Italian linguistic analogies; fantastic explanations, of course, are not wanting. He quotes the two Talmudim, the Sifre and the lost Sifre Zuṭa, the Targum, the Seder 'Olam, the "'Aruk" of Nathan ben Jehiel of Rome, Hai's commentary on Zera‘im and Ṭohorot, and R. Nissim's "Mafteaḥ."

Isaac's merit consists in having paved the way for the study of the Talmud in Italy. He did for that country what Rashi had done for Germany and northern France, though to a slighter extent, being a man of less authority. His commentary soon became well known not only in Italy, but also in Spain, France, Germany, and Austria; great halakists like Isaac ben Moses of Vienna, Meïr Rothenburg, and Jacob ben Asher referred to him, as did the tosafists and others; but in the end their commentaries displaced his.

S. M. Sc.

ISAAC B. MENAHEM THE GREAT: French Talmudist; flourished in the second half of the eleventh century. Isaac, who lived at Orléans, was a pupil of Eliezer the Great of Mayence, and the teacher of Eliezer ben Judah of Châlons (Gross, "Gallia Judaica," p. 591), as well as of Rashi, who quotes him five times (B. M. 7b, 23b; Shab. 67a; Suk. 40a; Tem. 4a). He is twice quoted in the Tosafot (Giṭ. 21b; Men. 5a) under the name of "Isaac of Orléans." Gross also identifies him, contrary to Zunz, with the Isaac of Orléans mentioned in Nathan ben Jehiel's "'Aruk." According to a quotation in Mordecai to Baba Meẓi‘a iv., Isaac ben Joseph was personally acquainted with Ṭob Elem, though Gross thinks the passage is corrupt.

ISAAC BEN MERWAN HA-LEVI: French Talmudist; flourished in the first third of the twelfth century; elder son of Merwan of Narbonne. As highly respected in the community as his father, he was elected rabbi of Narbonne. He is often quoted, his Talmudic decisions being regarded as decisive. He directed the yeshibah, and several of his pupils achieved distinction, among them being his nephew Moses ben Joseph, Moses ben Jacob ha-Nasi, and Abraham ben Isaac, "ab bet din" of Narbonne.

BIBLIOGRAPHY: Gross, *Gallia Judaica*, p. 413.

ISAAC BEN MORDECAI GERSHON: Talmudist of the fifteenth century. He was the author of "Shelom Ester," a commentary on the scroll of Esther (Constantinople, 15th cent.). Steinschneider, in Benjacob's "Oẓar ha-Sefarim" (p. 583, No. 679), attributes to the same author the following three works: "Ketem Paz," a commentary on Canticles; "Mebaḳḳesh Adonai," a commentary on the Pentateuch; "Mor Deror," a commentary on Esther. But the first two of these three works belong to Isaac Gershon, the press-corrector of Venice. Fuenn ("Keneset Yisrael," p. 612) erroneously considers these two authors to be identical.

S. S. M. Sel.

ISAAC BEN MORDECAI HA-LEVI: Rabbi of Lemberg; died in Cracow 1799. His father was chief of the yeshibah at Lemberg, and Isaac himself officiated as rabbi first in Leshnow, Galicia, afterward in Chelm, Poland. In 1776 he left the last-named place for the rabbinate of Cracow, where he remained until his death. Of his writings, only two responsa are known, and these are incorporated in the "Bet Ya‘aḳob" and the "Peri Tebu'ah." In "Keter Kehunnah" allusion is made to a responsum which he wrote for the author of that work. He is also known from his approbations to various works of his time.

ISAAC BEN MOSES ELI (Ha-Sefardi): Spanish mathematician of the fifteenth century; born at Oriola, Aragon. According to Steinschneider, he may have been one of the Spanish exiles of 1492; he probably went to Constantinople. His brother was possibly the Judah ben Moses Eli of Lisbon mentioned in the Paris manuscript No. 292. He wrote a mathematical work entitled (according to Steinschneider) "Meleket ha-Mispar," probably the first two words of the book (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1297, 2, 2065, 11; Paris MSS. Nos. 1029, 4, 1095; Leyden MS. No. 66, 3; on the MS. at the Sofia Rabbinical Seminary see Grünwald in

Rahmer's "Jüd. Litt.-Blatt." 1894, p. 176). The book is divided into three parts: (1) a theory of numbers, dealing with the first four rules and the extraction of square roots; (2) proportion, etc.; (3) elementary geometry. The book is an introduction to Euclid, and begins with a definition of the science of figures. The Sofia manuscript was copied for Mordecai Kumtiano (about 1460).

ISAAC BEN MOSES OF VIENNA (also called **Isaac Or Zarua'**): German halakist, a descendant of a learned family; probably born in Bohemia; lived about 1200-70. He mentions as his teachers two Bohemian scholars, Jacob ha-Laban and Isaac ben Jacob ha-Laban (author of "'Arugat ha-Bosem"). Led by a thirst for Talmudical knowledge, he undertook in his youth extensive journeys to the prominent yeshibot of Germany and France. According to Gross he went to Ratisbon first; but S. N. Bernstein conjectures that previously he stopped for a long time at Vienna, and became closely identified with the city, as he is usually quoted as "Isaac of Vienna." From among the many scholars at Ratisbon he selected for his guide the mystic Judah ben Samuel he-Ḥasid (d. 1217). About 1217 he went to Paris, where the great Talmudist Judah ben Isaac Sir Leon (d. 1244) became his chief teacher. He also visited for a short time the yeshibah of Jacob ben Meïr in Provins (see Gross, "Gallia Judaica," p. 495). Then he returned to Germany, and studied under the mystic Eleazar ben Judah at Worms, and, at Speyer, under Simḥah ben Samuel, his intimate friend, and Eliezer ben Joel ha-Levi, author of "Abi ha-'Ezri" and "Abi'asaf" (see Zunz, "Z. G." p. 36). At Würzburg, where Meïr Rothenburg was his pupil (*c.* 1230), he became "rosh yeshibah." Later on Isaac returned to Ratisbon, and then settled for some time in Vienna, where he held the position of "ab bet din" and rosh yeshibah. Finally, he went to Saxony and Bohemia.

Isaac lived a long but unsteady and troubled life, the facts of which are gathered from his "Or Zarua'," the only source of information. He saw the law compelling Jews to wear the yellow badge put into force in France, and he deplored the massacres of the Jews in Frankfort-on-the-Main (1241) and the extortions practised upon them by the nobles of Austria. His son-in-law was Samuel ben Shabbethai of Leipsic; his son **Ḥayyim Eliezer,** called "Or Zarua'," like him a scholar, carried on a comprehensive halakic correspondence, a part of which (251 responsa) was printed under the title "Sefer She'elot u-Teshubot" (Leipsic, 1860).

His "Or Zarua'."

Toward the end of his life, about 1260, Isaac composed his ritual work "Or Zarua'." He is usually quoted as "Isaac Or Zarua'." It was printed from the Amsterdam manuscript (incomplete) by Lipa and Höschel in Jitomir, 1862 (parts i. and ii.); other manuscripts are at Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 650) and in the Jewish Theological Seminary of America, New York (MS. Halberstam No. 454). In the edition of Lipa and Höschel Seder Neziḳin is wanting; most of the rest of the work was afterward printed at Jerusalem by J. M. Hirschensohn (part iii., 1887; part iv., 1890) (Harkavy, "Ḥadashim gam Yeshanim," No. 10; Grätz, "Gesch." v. 20, Hebr. ed.).

The "Or Zarua'" comprises the whole ritual, and is arranged according to the Talmudical treatises, while at the same time the halakot are kept together. The author, unlike Maimonides in his "Yad," does not confine himself to giving the halakic decisions, but gives also the passage of the Talmud, explains the subject-matter, and develops the "din" from it. Thus the "Or Zarua'" is at the same time a ritual code and a Talmudic commentary. As it contains, in addition, explanations of some passages in the Bible, the author is also quoted as a Bible commentator. Moreover, the book contains a part of the halakic correspondence which the author carried on with Talmudical scholars of Italy, France, and Austria. Older collections of halakic decisions (לקוטים) which the author had gathered together during his lifetime seem also to be embodied in the work. Isaac explains unknown words in Bohemian (לשון כנען), his mother tongue (see Harkavy, "Die Juden und die Slavischen Sprachen," pp. 53 *et seq.*), and cites the Talmud of Jerusalem, to which he ascribes great authority in halakic decisions. The work is introduced by a treatise couched in words to whose meanings mystical significance is attached. It is an imitation of the Alphabet of Akiba ben Joseph, and was composed at the order of Isaac's teacher Eleazar ben Judah of Worms. Isaac's son Ḥayyim Eliezer arranged a compendium of this work which exists in several manuscripts.

The "Or Zarua'" succeeded in displacing all the older ritual works. It is very important also for the "Culturgeschichte" of the German Jews in the Middle Ages (see, for instance, Berliner, "Aus dem Leben der Juden im Mittelalter," on almost every page).

According to Gross, Isaac's chief importance rests upon the fact that he introduced among the Slavs the study of the Talmud from France and the west of Germany.

Isaac was of a mild and peace-loving character, and it was for this reason, perhaps, that he did not participate in the struggle against the study of secular sciences, though an incorrect ritual decision would rouse him to indignant energy. He carried on a controversy with several rabbis concerning the legal status of a betrothed girl who had been forced by circumstances to adopt Christianity and had afterward returned to Judaism. His anxiety for correct observance led him to counsel the more difficult rather than the easier ritual practise. His mystical studies account for his belief in miracles. He was held in high regard by his pupils, and, like other teachers of the time, was given the title "Ha-Ḳadosh" (the holy; Asheri, Ta'an. iv.). His contemporary Isaiah di Trani described him as "the wonder of the age" ("Or Zarua'," i. 226).

S. M. Sc.

ISAAC NATHAN BEN KALONYMUS: French philosopher and controversialist; lived at Arles, perhaps at Avignon also, and in other places, in the fourteenth and fifteenth centuries. He belonged to the well-known Nathan family, which claimed its descent from David; he was probably the grandson of the translator Maestro Bongodas Judah Nathan. According to the statement of Isaac himself, in the introduction to his concordance (see below), he was completely ignorant of the Bible until his fifteenth year, his studies having been restricted to the Talmud and to religious philosophy. Later he took up other branches of learning, and owing to his frequent association with Christians and to the numerous anti-Jewish writings of Jewish apostates that appeared at that time, he turned his attention to religious controversy. Isaac was the author of the following works (some are still extant, and some are known only through citations): a refutation of the arguments contained in the epistle of the fictitious Samuel of Morocco, who endeavored to demonstrate from the Bible the Messiahship of Jesus (introduction to Nathan's concordance); "Tokaḥat Mat'eh," against Joshua Lorki (Geronimo de Santa Fé after baptism; De Rossi, "Bibliotheca Antichristiana," pp. 76–77); "Mibẓar Yiẓḥak," anti-Christian polemics (De Rossi, *l.c.*); "Me'ah Debarim," for the instruction of youth, twenty-one essays on various topics, the Biblical names of God forming one, another being on the Masorah (collection of I. S. Reggio and Schorr); "Me'ammeẓ Koaḥ," on virtue and vice, in three parts (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2232); "Meïr Netib," a Biblical concordance upon which the author worked from 1437 to 1447, with a philosophico-exegetical introduction ("Petiḥat Meïr Netib").

The "Meïr Netib" was the first Bible concordance in Hebrew, and was distinguished from the similar Latin work of Arlotus of Prato in that its vocabulary was arranged in the order of the roots. In the introduction the author says that his work aimed to facilitate the study of Biblical exegesis and to prevent Jewish converts to Christianity from making, in their religious controversies, incorrect quotations from the Bible, as was often the case with Geronimo de Santa Fé. The "Meïr Netib," with its complete introduction, was first published at Venice (erroneously under the name of Mordecai Nathan) in 1523; in 1556 it was published at Basel by Buxtorf, but with only a part of the introduction.

S. I. Br.

ISAAC BEN NOAH COHEN SHAPIRA: Polish rabbi; lived in the sixteenth and seventeenth centuries; grandson of Hirsh and teacher of Joel Sirkes. He received his Talmudical training in the yeshibah of Ḥayyim ben Samuel of Kremenetz, and after filling the position of rabbi at Gorodnitza and at Beresnitza was called to Meseritz (Mezhirechye). Isaac was the author of "Sefer Zikkaron," containing all the paragraphs of the Shulḥan 'Aruk arranged in alphabetical order and rimed as an aid to memory. It was published at Cracow or at Prague, in the seventeenth century. To this was appended "Petiḥat ha-Leb," an abridgment of a more extensive work of his entitled "Harhabat ha-Leb," containing sermons arranged in the order of the Sabbatical sections.

Bibliography: Zunz, *Z. G.* p. 299; Steinschneider, *Cat. Bodl.* col. 1144; Benjacob, *Oẓar ha-Sefarim*, p. 157, No. 127; Carmoly, in *Ha-Karmel*, vi. 301; Fuenn, *Keneset Yisrael*, p. 666.

Isaac of Norwich Depicted in a Contemporary Caricature.
(In the Record Office, London.)

ISAAC OF NORWICH (Isaac b. Eliab): English financier of the twelfth and thirteenth centuries. He was among the Jews imprisoned by King John in 1210 ("Select Pleas of the Jewish Exchequer," ed. Riggs, p. 3). It is possible that at this time a house of his in London fell into the hands of the king and was afterward (1214) transferred to the Earl of Derby ("Rotuli Cartarum," p. 3, London, 1837). He was by far the most important Jewish money-lender at Norwich in the early years of Henry III., the majority of the items of a day-book of that place now preserved at Westminster Abbey referring to his transactions (Jacobs and Wolf, "Bibl. Anglo-Jud." p. xviii.). In the "Shetarot" Isaac is referred to as "Nadib" or "Mæcenas" (Davis, "Shetarot," Nos. 1-2); he appears to have died before 1247 (*ib.* No. 11). A caricature of him appears in an issue of the Exchequer, 17, Hen. III. (1233), which represents him as being tortured by a demon and expresses the contemporary Christian view of his rapaciousness (F. Devon, "Issues of the Exchequer," frontispiece, and p. 506, London, 1837).

The accompanying caricature represents Isaac as three-faced, probably in allusion to the wide extent of his dealings. He is crowned with a coronet, and surveys a scene in which another Jew, Mosse Mok, and a Jewess named Abigail, are being tortured by demons, seemingly under his direction. The scene appears to be taken from a miracle-play, the drapery representing the stage, and the architectural adornment the cloister of a church, such plays generally being performed in churches.
J.

ISAAC PULGAR. See Ibn Pulgar (Polgar, Polkar), Isaac ben Joseph.

ISAAC B. REUBEN ALBARGELONI (ALBARCELONI): Spanish Talmudist and liturgical poet; born at Barcelona in 1043. He was a judge in the important community of Denia, where he became connected, probably as son-in-law, with Ibn Alḥatosh. Among his later descendants was Moses b. Naḥman (Naḥmanides); Judah Albargeloni is said to have been Isaac's pupil. He was one of five prominent contemporaneous scholars of the name of "Isaac," and the regard in which he was held by his own and succeeding generations is indicated by the fact that he is simply designated "Ha-Rab Albargeloni." He wrote commentaries on various sections of the treatise Ketubot, and at the age of thirty-five (1078) translated, from the Arabic into Hebrew, Hai Gaon's "Ha-Miḳḳaḥ weha-Mimkar," on buying and selling (Venice, 1602, and frequently afterward with commentaries). Noteworthy among his liturgical poems are his Azharot, included in the rituals of Constantine, Tlemçen, Tunis, Morocco, Algeria, and Oran (see Jew. Encyc. ii. 371).

Of the 145 strophes in the poem each consists of three verses, ending with a Biblical quotation. Isaac's use of Biblical verses indicates great skill. Al-Ḥarizi remarked: "He has put the religious laws into rime, and has fitted them so well to Biblical passages that it almost seems as if the work had been inspired by a higher power." Isaac copies faithfully the division of the laws and interdictions of the "Halakot Gedolot"; at times even following its wording, while he also takes into account the regulations of traditional literature referring to Biblical prescriptions. The following poems of Isaac are also included in the "Azharot": "'Alah Mosheh le-Rosh Har Sinai" (introduction); "Yom Zeh Horid" (pizmon preceding the commands); "Yaḥid Nora 'Alilah" (pizmon between the commands and interdictions). Isaac also wrote: "Paḥadti mi-Yoẓeri" and "Yom Zeh Mekapper le-Shabim," both in three-line strophes, the latter with signature and alphabet. Rapoport further assigns to Isaac "Ayumati Yonah," "ahabah" for the Sabbath before the Feast of Weeks; and "Yakush be-'Onyo," "ge'ullah" for the fifth Sabbath after Pesaḥ; but other scholars do not agree with Rapoport on this point.

G. H. B.

ISAAC BEN SAMSON HA-KOHEN: Bohemian Talmudist; died May 30, 1624, in Prague. He was assistant rabbi and magistrate of the community, and was son-in-law of the chief rabbi of Prague, Lewa ben Bezaleel, and the father of Ḥayyim ha-Kohen (rabbi at Frankfort-on-the-Main and at Posen) and Naphtali ha-Kohen (rabbi at Lublin). Isaac was in the habit of writing acrostic introductions to his own and other works. He wrote: a supplement to "Ḥatan Damim," a commentary on the Pentateuch by Samuel Runkel (Prague, 1605); glosses to "Pa'neaḥ Raza," a small cabalistic work by Isaac ben Judah ha-Levi (*ib.* 1602); a commentary on the Pentateuch, in German (*ib.* 1608); notes on Midrash Tehillim (*ib.* 1613); "Ḳiẓẓur Mizraḥi," a commentary on Rashi to Genesis. Isaac, according to a statement in one of his glosses, was occupied for some time in the composition of a cabalistic work entitled "Sidre Bereshit."

Bibliography: *Gal 'Ed*, No. 84; Zunz, *Z. G.* pp. 285, 402, 882.

ISAAC, SAMUEL: Promoter of the Mersey Tunnel, near Liverpool, England: born at Chatham, England, 1812; died in London Nov. 22, 1886. He went to London as a young man, and carried on a large business as an army contractor in Jermyn street, under the firm name of Isaac, Campbell & Co. During the Civil war in America this firm was the largest European supporter of the Southern States, and its ships, laden with military stores and freighted home with cotton, were the most enterprising of blockade-runners; it ultimately failed on the fall of the Confederacy.

After a time Isaac acquired the rights of the promoters of the Mersey Railway, a project which had obtained the sanction of Parliament, but had remained in abeyance owing to the disinclination of capitalists to venture on the task of tunneling the bed of the Mersey. Isaac pushed the scheme into practical development. He himself undertook to build the tunnel, and enlisted the aid of an influential directorate. Fresh powers were obtained from Parliament, money was raised in bonds and shares, and the tunnel was duly opened under the auspices of the Prince of Wales. Isaac's brother **Saul Isaac** (born at Chatham 1823; died at London Oct. 6. 1903) was connected with him in his commissariat business, and became M.P. for Nottingham from 1874 to 1880.

J. G. L.

ISAAC BEN SAMUEL OF ACRE: Palestinian cabalist: flourished in the thirteenth and fourteenth centuries. According to Azulai ("Shem ha-

Gedolim," *s.v.*), he was a pupil of Naḥmanides. He was at Acre when that town was taken by Al-Malik al-Ashraf, and was thrown into prison with many of his coreligionists; but he escaped the massacre, and in 1305 went to Spain. Abraham Zacuto states, in his "Yuḥasin," that Moses of Leon discovered the Zohar in the time of Isaac of Acre. But Isaac doubted the authenticity of the Zohar, not having heard of it in the Holy Land, and made inquiries about it of Naḥmanides' pupils, without, however, any satisfactory result. When he met Moses of Leon at Valladolid, the latter took an oath that he had in his house at Avila a copy of the Zohar, written by Simeon b. Yoḥai himself. But Moses of Leon died before he could return to Avila, and Isaac, more than ever desirous of obtaining the truth, consulted at Avila a certain David Rafan. The last-named told Isaac that Moses of Leon's wife and daughter had revealed to the wife of a certain R. Joseph the fact that Moses of Leon had written the book himself. Grätz ("Gesch." vii. 211) takes this story as historical, but Landauer (in "Orient, Lit." vi. 710-713) shows it to be apocryphal, and demonstrates that the Zohar was discovered much later.

Isaac of Acre is frequently quoted by Elijah de Vidas in his "Reshit Ḥokmah," and by R. Ḥayyim Vital in his "Megillat Setarim." He was an expert in composing the sacred names ("ẓerufim"), by the power of which angels were forced to reveal to him the great mysteries (Azulai, *l.c.*). According to Azulai he wrote many cabalistic works. Those that are known are: "Me'irat 'Enayim," a cabalistic commentary on Naḥmanides' commentary to the Pentateuch; "Sefer ha-Sodot," mentioned in the "Nobelot Ḥokmah" of Joseph Solomon Delmedigo; "Ketem Paz," a cabalistic work mentioned by Moses Botarel in his commentary to the "Sefer Yeẓirah," and the author of which he calls "Isaac ben Samuel," identified by Michael ("Or ha-Ḥayyim," No. 1088) with Isaac b. Samuel of Acre; "Liḳḳuṭe Shoshanim," possibly a compendium of the "Sefer ha-Sodot." It appears from the "Reshit Ḥokmah" that Isaac of Acre wrote also a book on ethics. A specimen of the "Me'irat 'Enayim" was published by Jellinek in his "Beiträge"; the remainder of Isaac's works are still in manuscript.

Bibliography: *Me'irat 'Enayim*; Grätz, *Gesch.* 3d ed., vii. 186, 211, 427–428; Abraham Zacuto, *Yuḥasin*, ed. K. M. Sel.

ISAAC BEN SAMUEL HA-LEVI: Polish rabbi; born at Vladimir, government of Volhynia, Russia, about 1580; died before 1646. He was the elder brother and teacher of David b. Samuel ha-Levi, author of the "Ṭure Zahab." As a young man he became rabbi of Chelm, Russian Poland; later he lived at Lemberg. He was the author of an important work in two parts; the first part, consisting of responsa, is entitled "She'elot u-Teshubot R. Yiẓḥaḳ ha-Lewi"; the second, consisting of novellæ, is entitled "Ḥiddushe Halakot." The work was published at Neuwied in 1736. Other responsa by him are found in his brother's "Ṭure Zahab" (ch. xxv., on Oraḥ Ḥayyim; ch. xxvii., on Yoreh De'ah), and in the "She'elot u-Teshubot Geone Batra'e" (No. 20).

David b. Samuel ha-Levi's grandson Isaiah b. Abraham, in the preface to his "Be'er Heṭeb Yashan," said that Isaac had written a work entitled "Paḥad Yiẓḥaḳ," a commentary on the Yoreh De'ah, and another entitled "Ḳorban Yiẓḥaḳ." Isaac is identified by Fuenn ("Keneset Yisrael," p. 628) and by Buber ("Anshe Shem," p. 114) with the Isaac b. Samuel ha-Levi of Posen who wrote a work entitled "Siaḥ Yiẓḥaḳ," a Hebrew grammar based on phonetic laws (Prague, 1628). Both Fuenn and Buber assert that Isaac b. Samuel ha-Levi went from Lemberg to Posen, where he became the head of the yeshibah. They attribute to him the authorship of the "Shir Ge'ulah," a piyyuṭ written in 1609 on the occasion of the reacquisition by the Jews of Lemberg of the synagogue which the Jesuits had seized five years previously. This piyyuṭ, found at the end of the Maḥzor (ed. Prague), is recited by the Jews of Lemberg on the Sabbath after Purim. The author of the "Siaḥ Yiẓḥaḳ" says in his preface that he also wrote a commentary on the compound words of the Bible, entitled "Berit ha-Lewi." This work is also mentioned in the text of the "Siaḥ Yiẓḥaḳ," with another work, by the same author, entitled "Eleh Toledot Yiẓḥaḳ," a commentary on Rashi.

ISAAC BEN SAMUEL OF NARBONNE: French scholar; flourished in the first half of the twelfth century. He is quoted in an anonymous commentary to Chronicles, written at Narbonne before 1140, as having given the author verbal explanations of various verses—I Chron. ix. 39; xviii. 3, 5; II Chron. xxiv. 14 (see Zunz, "Z. G." p. 73). Zunz ("Literaturgesch." p. 168) identifies Isaac b. Samuel of Narbonne with the liturgical poet who composed a number of piyyuṭim and seliḥot with the acrostic "Isaac b. Samuel." Zunz (*l.c.*) supposes him to have been also the author of the fourteen calendar tables known under the same name.

G. M. Sel.

ISAAC BEN SAMUEL HA-SEFARDI: Spanish Biblical exegete; flourished in the eleventh and twelfth centuries. From his commentary, which is written in Arabic, it seems that Isaac b. Samuel lived in Palestine; Steinschneider ("Hebr. Bibl." vi. 114) concluded that he lived at Aleppo. Isaac b. Samuel is regarded as the successor in Biblical exegesis of Judah ibn Balaam and Moses ibn Gikatilla. The authorities he quotes are the geonim Saadia, Sherira, and Hai, and Judah ibn Ḳuraish, Judah ibn Balaam, Nathan ben Jehiel, and Moses ibn Gikatilla. In turn, Isaac's commentary is frequently quoted by the exegete Abraham b. Solomon (Steinschneider, "Hebr. Bibl." xx. 10). His commentary to the second book of Samuel is found in the British Museum (Or. 2388).

s. s. M. Sel.

ISAAC BEN SAMUEL HA-ZAḲEN: French tosafist and Biblical commentator; flourished at Ramerupt and Dampierre in the twelfth century. He died, according to Grätz ("Gesch." vi. 210), about 1200; according to Gross ("Gallia Judaica," p. 161, and "R. E. J." vii. 76), between 1185 and 1195; and as he is known to have reached an advanced age, Gross supposes that he was not born later than 1115. On the other hand, Michael ("Or ha-Ḥayyim," p. 512) says that as Isaac b. Samuel was spoken of as "the sainted master" ("Sefer ha-Terumah," §§ 131, 161; Tos., Zeb. 12b, 59b), a term generally given to martyrs, he may have been killed at the same time as his son Elhanan (1184). On his father's side Isaac was a grandson of R. Simḥah of Vitry, author of the Maḥzor Vitry; on his mother's side he was a nephew of R. Tam, of Rashbam, and of Isaac b. Meïr (RiBaM), a great-grandson of Rashi, and a relative of R. Eleazar of Worms. He was surnamed "ha-Zaḳen" (the elder) to distinguish him from another tosafist of the same name, Isaac b. Abraham, surnamed "ha-Baḥur" (the younger). He is often quoted as R. Isaac of Dampierre ("Maimuniyyot," Ma'akalot Asurot, No. 5; "Shibbole ha-Leḳeṭ," ii., No. 40), but it seems that he lived first at Ramerupt, where his maternal grandfather resided ("Sefer ha-Nayyar," p. 162; "Maimuniyyot," *l.c.*). It was also at Ramerupt that he studied under his uncle R. Tam (Luria, Responsa, No. 29); after the latter had gone to Troyes, Isaac b. Samuel directed his school. Isaac settled at Dampierre later, and founded there a flourishing and well-attended school ("Or Zarua'," i. 126). It is said that he had sixty pupils, each of whom, besides being generally well grounded in Talmud, knew an entire treatise by heart, so that the whole Talmud was stored in the memories of his pupils (Menahem, "Ẓedah la-Derek," Introduction). As he lived under Philip Augustus, at whose hands the Jews suffered much, Isaac prohibited the buying of confiscated Jewish property, and ordered that any so bought be restored to its original owner. A particular interest attaches to one of his responsa, in which he relies on the oral testimony of his aunt, the wife of R. Isaac b. Meïr, and on that of the wife of R. Eleazar of Worms, a great-granddaughter of Rashi ("Sefer ha-Nayyar," p. 167a).

Isaac's tosafot completed the commentary of Rashi on the Talmud (Romm of Wilna included in his edition of the Talmud Isaac ben Samuel's tosafot on Ḳiddushin). He also compiled and edited with great erudition all the preceding explanations to Rashi's commentary. His first collection was entitled "Tosefot Yeshanim," which, however, was afterward revised and developed. He is quoted on almost every page of the Tosafot, and in various works, especially in the "Sefer ha-Terumah" of his pupil Baruch b. Isaac of Worms, and in the "Or Zarua'" of Isaac b. Moses.

Isaac is mentioned as a Biblical commentator by Judah b. Eliezer ("MinḥatYehudah," p. 8b), who quotes also a work of Isaac's entitled "Yalḳuṭe Midrash" (*ib.* p. 22a); by Isaac ha-Levi; by Hezekiah b. Manoah in his "Ḥazzeḳuni"; and in two other commentaries (see "Kerem Ḥemed," vii. 68). Isaac b. Samuel is supposed to be the author also of several liturgical poems, of a piyyuṭ to the Hafṭarah (Landshuth, "'Ammude ha-'Abodah," p. 108), and of a piyyuṭ for Purim (Maḥzor Vitry, No. 255; comp. Luzzatto in Berliner's "Magazin," v. 27, Hebr. part). The authorship of these piyyuṭim may, however, belong to the liturgical writer Isaac b. Samuel of Narbonne.

s. s. M. Sel.

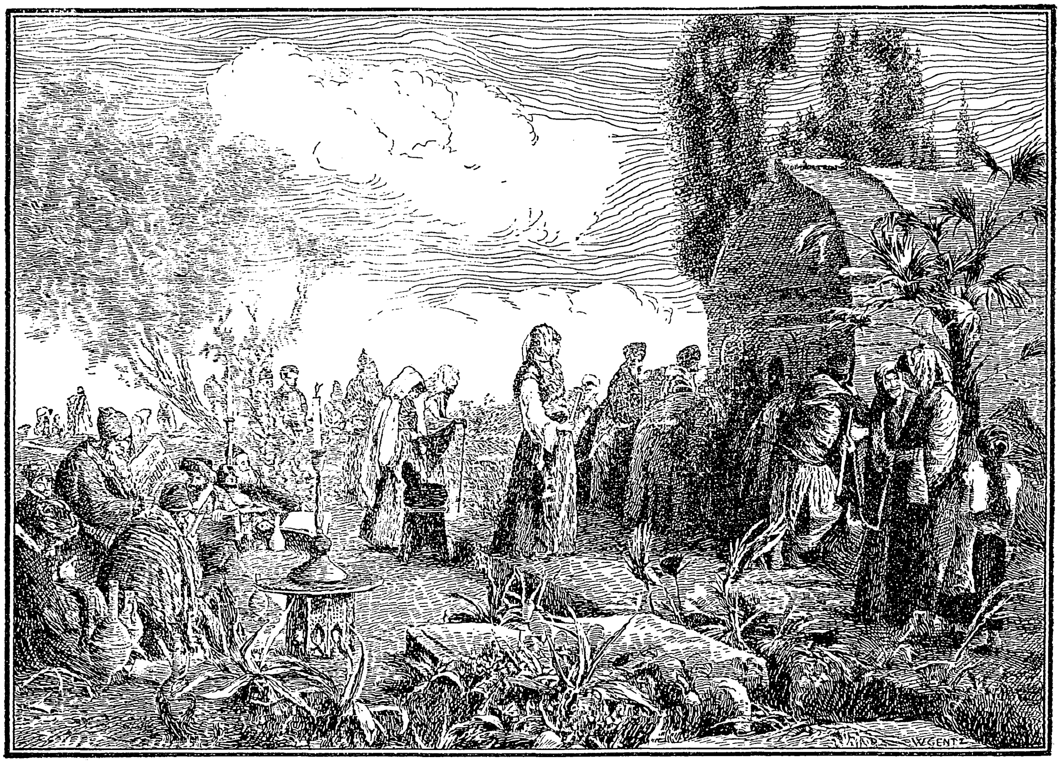
ISAAC BEN SHESHET BARFAT (RiBaSH): Spanish Talmudic authority; born at Valencia in 1326; died at Algiers in 1408. He settled early in life at Barcelona, where he studied under Perez ha-Kohen, under Ḥasdai ben Judah, and especially under R. Nissim ben Reuben (RaN), for whom he professed throughout his life the greatest veneration. Although Isaac acquired while still young a world-wide reputation as a Talmudic authority, and halakic inquiries were addressed to him from all quarters, he led a private life, earning his livelihood in commerce until he was about fifty years old, when he was compelled to accept a position as rabbi. Together with six other prominent men of Barcelona, among whom was his younger brother Judah ben Sheshet and his teacher Nissim ben Reuben, he was thrown into prison on a false accusation. After his acquittal he accepted the rabbinate of Saragossa; but troubles still awaited him. To the grief caused by the death of his brother Judah and of his son-in-law was added that due to dissensions in the community, stirred up by the dayyan Joseph ben David. Isaac in consequence accepted the less important rabbinate of Calatayud; but when he was on the point of leaving Saragossa the leaders of that community induced him to stay. The peace, however, did not remain long undisturbed, and Isaac settled at Valencia, where he directed a Talmudical school.

Becomes Rabbi.

In 1391 occurred the great persecutions of the Jews of Spain in consequence of the preaching of Fernandes Martinez. Isaac saved himself by flight. After sojourning a certain time at Milianah he settled at Algiers, where he was received with great honor. Fate, however, had decided that he should not find peace. A certain Spanish refugee who had settled at Algiers before him aspired to become the leader of the community, and, seeing in Isaac a rival, began to persecute him. To give to Isaac the power necessary to act against this man, Saul ha-Kohen Astruc persuaded the government to appoint Isaac rabbi of Algiers. But this won for him a still more powerful enemy in the person of Simon ben Ẓemaḥ Duran, who disapproved of any intervention on the part of the government in the affairs of the rabbinate.

Notwithstanding these events, Isaac ben Sheshet was greatly venerated by the Algerian Jews, and pilgrimages to his tomb are still made on the anniversary of his death. His tombstone was restored by the community of Algiers in 1862. It bears a Hebrew elegy, composed by Abba Mari ibn Caspi, and the following French inscription: "Ce monument a été restauré par la communauté Israélite d'Alger en l'honneur du Rabbin Isaac bar Chichat, né en Espagne, décédé à Alger en 1408, dans sa 82 année. Alger le 11 août, 1862." The accuracy of the date of his death given in this epitaph is, however, questioned by some scholars, who claim with some authority that Isaac died at least one year later.

Isaac was the author of 417 responsa, to which great halakic value is attached by men like Joseph Caro, Berab, and many others. They are also of great historical importance as reflecting the conditions of Jewish life in the fourteenth century. In some of them are to be found details of the author's life; but unfortunately it is impossible to trace these chronologically, the original order of the responsa having been altered by the editors.



TOMB OF RABBI ISAAC BEN SHESHET AT ALGIERS.
(After the painting by Wilhelm Gentz.)

His Works.

Although Isaac was very strict in his halakic decisions, he was far from being narrow-minded. He has nothing to say against secular knowledge; he disapproves the study of Aristotle only because the latter professed belief in the eternity of matter and denied God's providence. Isaac's responsa evidence a profound knowledge of the philosophical writings of his time. In one of them (No. 118) he explains the difference between the opinion of Levi ben Gershon and that of Abraham ben David of Posquières (RABaD) on free will, and gives his own views on that complicated subject. He shows himself a decided adversary of the Cabala. His teacher says Isaac never spoke of the Sefirot, and Isaac cites the words of a certain philosopher who reproaches the cabalists with believing in the "Ten" (Sefirot) as the Christians believe in the Trinity (No. 159).

Isaac's responsa were first published, under the title "She'elot u-Teshubot," at Constantinople in 1546–47. A new collection of the responsa was published recently under the title "She'elot u-Teshubot ha-Ribash ha-Ḥadashot" by David Frenkl at Muncas. In addition to these, he wrote novellæ on the Talmud which are no longer in existence. They are mentioned by him in his responsa (No. 106), and some of them, on the treatise Ketubot, are cited by Bezaleel Ashkenazi in the "Shiṭṭah Meḳubbeẓet." Azulai says that he has seen a manuscript containing a commentary on the Pentateuch by Isaac ben Sheshet.

S. S. I. BR.

ISAAC IBN SID (ZAG; ÇAG): Spanish astronomer; flourished at Toledo in the second half of the thirteenth century. From the surname "ha-Ḥazzan," given him by Isaac Israeli ("Yesod

'Olam," iv. 30), it may be inferred that he was precentor at the synagogue. Isaac ibn Sid took a leading part in the compilation of the ALFONSINE TABLES. Isaac Israeli (*ib.*) states that he saw recorded in Isaac ibn Sid's own handwriting three observations of moon-eclipses made by him at the order of Alfonso. In official documents (De Castro, "Bibliotheca," i. 184b) Isaac ibn Sid is termed by Alfonso "our learned Rabbi Çag." In 1277 Isaac translated from the Arabic a work on the quadrant. His name is also connected with the invention of various instruments (De Castro, *l.c.* i. 144a, 156a, 157).

G. I. BR.

ISAAC BEN SOLOMON: Liturgical poet; lived in Germany in the first half of the fourteenth century; author of the seliḥah "Ani hu ha-Geber," on the martyrs of the persecutions of 1337, which Isaac had witnessed. The signature to this seliḥah includes the words "Yifraḥ Samak," which, according to Zunz, form a part of the poet's name.

G. I. BR.

ISAAC BEN SOLOMON HA-KOHEN: Biblical commentator; lived at Constantinople in the middle of the sixteenth century. He was the author of a commentary on Job, published, with the text, at Constantinople in 1545. He wrote also a commentary on Pirḳe Abot, still extant in manuscript.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 426; Steinschneider, *Jewish Literature*, p. 232; idem, *Cat. Bodl.* col. 1153; Fürst, *Bibl. Jud.* ii. 141.
G. I. BR.

ISAAC BEN TODROS: Spanish rabbi and Talmudist toward the end of the thirteenth century. He was the teacher of Shem-Ṭob ibn Gaon and Nathan b. Judah, and the friend of Baḥya ben Asher, who mentions him in his Pentateuch commentary (§ Beshallaḥ). He is mentioned also by Mordecai ben Hillel (d. 1310); and was still living in 1305, on July 26 of which year he subscribed, with others, the excommunication launched by Solomon ben Adret against the study of metaphysics by any one before attaining the age of thirty. He was probably one of the rabbis of Barcelona. He wrote a commentary on the Maḥzor (Lonsano, "Shete Yadot," 62a), and a halakic commentary to the "Azharot" of Gabirol (Paris, Bibliothèque Nationale, No. 273, 2). It is not probable that he is to be identified with the Ṭodros ben Isaac of Gerona (Brüll) who is praised by Kalonymus (1323) at the end of his "Eben Boḥan," and who wrote novellæ on Nazir (Neubauer, "Cat. Bodl. Hebr. MSS." No. 448, 1).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 2522; Conforte, *Kore ha-Dorot*, p. 18b; Solomon ben Adret, *Responsa*, No. 415; Dukes, in *Orient. Lit.* 1847, p. 405; Brüll's *Jahrb.* viii. 87.
G.

ISAAC B. TODROS: French physician at Avignon during the second half of the fourteenth century. In 1373 he was the pupil of the astronomer Immanuel b. Jacob of Tarascon and Orange, the author of the "Shesh Kenafayim." Isaac was well read in rabbinical literature and philosophy as well as in medicine and medical literature. A plague had devastated southern France, the Jews being the first to be attacked. On this account he wrote in 1377 a short treatise, "Be'er Leḥai," on the origin of plagues and the methods to be used in combating them. He was an eye-witness of the cures performed by John of Tornamira, the body-physician of Pope Gregory XI., of whom he speaks well, perhaps influenced by that ecclesiast's favorable attitude toward Jewish physicians. Isaac cites Hippocrates, Ibn Sina, Ibn Roshd, Razi, Ibn Zuhr (although Isaac does not seem to have known Arabic), Galen, John Giacomo, chancellor of Montpellier, and the following Jews: R. Judah Nathan, Isaac Israeli, Moses Narboni, and Immanuel b. Jacob. His data in regard to the effect of the plague upon the Jews in Avignon are substantiated by Chalin de Vinarios (Höniger, "Der Schwartze Tod," p. 172). The treatise has been published from his unique manuscript by David Günzburg in the "Zunz Jubelschrift" (Hebrew part, pp. 91 *et seq.*). Among the Oxford manuscripts (No. 2142, folio 258b; Neubauer, "Cat. Bodl. Hebr. MSS.") there is another medical treatise by Isaac, on עוות הפנים.

BIBLIOGRAPHY: D. Kaufmann, in *Göttingische Gelehrte Anzeigen*, June, 1885, No. 11, p. 451; Brüll's *Jahrb.* viii. 87. Kaufmann and Brüll offer many emendations of the text as published by Günzburg.
G.

ISAAC TYRNAU: Hungarian rabbi and ritualist; flourished in the fourteenth and fifteenth centuries. He was a pupil of Abraham Klausner of Vienna and of R. Shalom of Neustadt; one of his schoolfellows was Jacob Mölin (MaHaRiL). Grätz concluded that Isaac Tyrnau died before 1427, but David Gans's "Ẓemaḥ Dawid" (p. 65) cites him as living in 1460. Like his teachers and his schoolfellow Mölin, Isaac Tyrnau described (in his "Minhagim le-Kol ha-Shanah," Venice, 1616) the customs of different communities using the Ashkenazic rite. The book was translated into German by Simon L. Ginzburg (ed. princeps, Mantua, 1590, and often reprinted). The author has attached to it his treatise on morals entitled "Orḥot Ḥayyim," in 132 sections. Isaac Tyrnau is quoted by Mordecai Jaffa at the end of his "Lebush" on Oraḥ Ḥayyim. Gabriel Polak and Israel Böhmer published (Königsberg, 1857) an anonymous story entitled "Eẓba' Elohim," the heroes of which are Isaac Tyrnau and his beautiful daughter.

G. M. SEL.

ISAACS, ABRAM SAMUEL: American rabbi, professor, and editor; born in New York city Aug. 30, 1852. He was educated at New York University (B.A. 1871, M.A. 1873, Ph.D. 1878) and at the University of Breslau. Isaacs held professorships of Hebrew and of German language and literature at New York University from 1886 to 1895, and has been professor of German literature in New York University Graduate Seminary since 1895. He was preacher to the East 86th Street Synagogue, New York, in 1886–87, and since 1896 has been rabbi of the B'nai Jeshurun congregation of Paterson, N. J. From 1878 to 1903 Isaacs edited the "Jewish Messenger," published in New York city. He has contributed articles on educational, literary, and Jewish subjects to leading periodicals for over a quarter of a century, and is the author of "Moses Chaim Luzzatto" (1878) and "Stories from the Rabbis" (1894).

A.

ISAACS, SIR HENRY AARON: Former Lord Mayor of London; born in that city Aug. 15, 1830. For a quarter of a century he labored in the best interests of the city of London. He agitated for improving the dwellings of the poor, and was mainly instrumental in bringing about much-needed reforms in the finance committee of the corporation. In 1859 he was appointed to the chairmanship of the City Lands Committee. Some years later, as head of the Markets Committee, he gave valuable evidence before the House of Commons; and the Tower Bridge owed its existence, in a great measure, to his persistence. Upon the oral system of teaching deaf-mutes, his brochure "Sounds Versus Signs" is a recognized authority.

In 1887 Isaacs became sheriff of London and Middlesex, and was knighted in the same year. In 1889 he was elected Lord Mayor of London. He has published "Memoirs of My Mayoralty."

Bibliography: *Jewish Chronicle*, Sept., 1889.

J. G. L.

ISAACS, ISAAC A.: Australian statesman and jurist; born at Melbourne, Victoria, Aug. 6, 1855; educated at Melbourne University, and admitted to the Victorian bar in 1880. From 1892 to 1901 he was a member of the Legislative Assembly, after which period he became a member of the Federal House of Representatives. He became solicitor-general in 1893 and attorney-general in 1894, and was reappointed to the latter office in 1900. He retired in 1901, on ceasing to represent his state in Parliament.

He was a member of the Australian Federal Convention which framed the Commonwealth Constitution in 1897, and became a Q.C. in 1899.

Bibliography: *Who's Who*, 1903.

J. V. E.

ISAACS, JACOB: American inventor of the colonial and revolutionary period; died 1798. He was resident in Newport in 1755 ("Publications Am. Jew. Hist. Soc." v. 199), and on Feb. 17, 1758, he carried a law-case before the king in council, securing a favorable judgment. His family is mentioned as including five souls in 1760 (*ib.* x. 8); in 1762 he is mentioned by Ezra Stiles as being the owner of a brig (*ib.* viii. 124). In 1790 he presented to Washington, on the occasion of the president's visit to Newport, a bottle of water "extracted from ocean water, so free from saline matter as to answer for all the common and culinary purposes of fountain or river water"; and "the president was pleased to express himself highly satisfied therewith" (Max J. Kohler, in *ib.* vi. 78). A detailed account of his attempts to extract fresh from salt water is furnished by H. Friedenwald (*ib.* ii. 111 *et seq.*); it shows that Isaacs presented a petition to the House of Representatives in 1791, offering to convey the rights in his discovery to the United States for proper remuneration. The matter was referred to Thomas Jefferson, who communicated on the subject with well-known men of science. Jefferson's memorandum was favorable to Isaacs, but Congress took no action in the matter.

A.

ISAACS, MYER SAMUEL: American lawyer; born in New York city May 8, 1841; educated at the University of New York. He was admitted to the bar of New York in 1862, and in 1880 became a judge of the Marine Court of New York. Isaacs has always been identified with municipal affairs. He was a member of the Committee on Reform Legislation for New York in 1884, and of the Republican Club committee which, in 1894, proposed amendments to the state constitution. As a member of the Outdoor Recreation League he assisted in establishing Seward Park, on the East Side of New York city, and the Roof-Playground of the Hebrew Institute. He has been active in the movement for improved dwellings for the poor and in behalf of other civic improvements. He assisted in the organization of the Citizens' Union in 1897. During the years 1886 to 1890 he was a director and vice-president of the Real Estate Exchange.

Isaacs has been equally prominent in Jewish affairs. One of the founders of the Board of Delegates of the American Israelites (1859), of the Hebrew Free School Association (1864), and of the Educational Alliance (1889), he took the initiative in organizing the United Hebrew Charities (1873). He was one of the founders of the Montefiore Home; a member of the executive committee of the Alliance Israélite Universelle (1881); president of the Baron de Hirsch Fund (1890). In December, 1881, he called a meeting to consider the action to be taken for the relief of the Russian exiles. Isaacs has also taken an active part in the establishment of the agricultural school at Woodbine, N. J.

Isaacs was connected with the "Jewish Messenger" from 1859 to 1884.

A.

ISAACS, NATHANIEL: African traveler; born in England 1808; died after 1840. He left England in 1822 for St. Helena, where his uncle was consul for France and Holland. In 1825 he accompanied Lieut. King, R.N., to the Cape of Good Hope and thence to the east coast of Africa on an expedition to Natal. For seven years he traveled through the Zulu and Fumos countries, besides paying a short visit to the Comoro Islands. The expedition was undertaken for the relief, if necessary, of Farwell and his party and also for commercial and industrial purposes. King and Isaacs found Farwell; had interviews with Chaka, the Zulu king; took the coast natives under their protection; and established fertile farms, which the Zulus afterward laid waste. King died of disease in Natal, and Isaacs was wounded in fighting for King Chaka with his European weapons, which terrified the hostile blacks. In return for his services he was created Chief of Natal and was granted a tract of country from the River Umslutee to the River Umlass, embracing twenty-five miles of seacoast and one hundred miles of inland territory, with the exclusive right of trading with the people settled there.

Isaacs afterward traded on the West Coast, and in 1835 petitioned the government against French interference with his commerce at Portendie. He complained of the conduct of two French brigs-of-war toward the English brig "Eliza," trading from Sierra Leone and belonging to G. C. Redman of London, for whom Isaacs was acting as agent and together with whom he was part owner of two merchant vessels.

Isaacs published in 1836 his "Travels and Adventures in Eastern Africa," descriptive of the Zulus, with a sketch of Natal. In this work is given for the first time a topographical view of the interior of the colonies through which he passed, and an account of the manners and customs of the natives.

ISAACS, REBECCA: English actress and singer; born in London June 26, 1828; died there April 21, 1877. Her father, John Isaacs, an actor and singer of Covent Garden Theater, trained her for the stage, on which she first appeared March 17, 1835. She took the chief rôles in the English opera season at Drury Lane Theater in 1846, and often appeared in concerts and operas with Sims Reeves. She produced a series of operas at the Strand Theater in 1852–55, and created the rôle of *Leila* in the opera "Satanella," at Covent Garden Theater, in 1858. Her voice was a soprano of great compass and sweetness.

J.

ISAACS, SAMUEL HILLEL: American calendarer; born 1825 at Raczek, Poland; educated under Judah Bacharach, Moses Leib of Kutna, and others; emigrated to New York on June 30, 1847. During 1886 and 1887 he was principal of the Talmud Torah in New York. Isaacs has contributed articles to the American Jewish press, and also a number of articles of a Talmudical nature to the "Torah me-Ẓiyyon," a monthly periodical published at Jerusalem, two of which articles, "Ḥadshe ha-Shanah" and "Petaḥ 'Inim," have been reprinted in pamphlet form (1901–02).

Isaacs is the compiler of an "Artificial Perpetual Calendar" and of a "Civil and Ecclesiastical Perpetual Calendar" (New York, 1891).

BIBLIOGRAPHY: For a description of Isaacs' perpetual calendars see *Seminary*, March, 1894, pp. 77, 91; *The Sun* (New York), Sept. 14, 1893; *The Scientific American*, May 7, 1892.

A. I. G. D.

ISAACS, SAMUEL MYER: Rabbi and journalist; born at Leeuwarden, Holland, Jan. 4, 1804; died in New York city May 19, 1878. His father, on the approach of the French army of occupation, removed with his family to London. For a time Isaacs was principal of the old Neweh Ẓedeḳ, now the Jews' Hospital and Orphan Asylum, West Norwood, London, but he left England to accept the ministry of the Congregation B'nai Jeshurun, then in Elm street, New York city (1839). Regular sermons in English in the synagogue, such as he delivered, were a novelty, Isaac Leeser of Philadelphia being the only other rabbi in the country preaching in English. In 1847 he was chosen minister of the Congregation Shaaray Tefilla, whose members had withdrawn from the Elm Street Synagogue; with that congregation he remained until his death.

Isaacs contributed to the "Asmonean" and the "Occident"; in 1857 he founded the "Jewish Messenger" as an organ of conservative Judaism, which he edited until the close of his life. To him was largely due the institution of the Board of Delegates of American Israelites, the Hebrew Free School Association, and the United Hebrew Charities, while he was one of the founders and first vice-president of the Jews' (now Mt. Sinai) Hospital. Isaacs took a leading part in the establishment of Maimonides College, Philadelphia, and, while identified with the cause of Conservatism, he was courageous enough to issue, in 1875, a call for ritual reform on the lines suggested by Sabato Morais; his views, however, met with no support.

ISABELLA I. See FERDINAND AND ISABELLA.

ISAIAH.—Biblical Data: The greatest of the Hebrew prophets of whom literary monuments remain. He resided at Jerusalem, and so contrasts with Micah, the prophet of the country districts. He was married (Isa. viii. 3), and had children (vii. 3, viii. 3). His bearing indicates that he could maintain his dignity in the highest society, as is shown by his freedom toward Ahaz (vii.) and his acquaintance with Uriah, the chief priest (viii. 2). The heading in Isa. i. 1 refers to Uzziah, Jotham, Ahaz, and Hezekiah as the kings under whom he prophesied. This and similar headings, however, have no historical authority, being the work of later writers whose statements had no documentary basis and were purely inferential. It is true, moreover, that no prophecy can be shown to be as early as Uzziah's time, except indeed the kernel of ch. vi. "In the year that King Uzziah died I saw the Lord," etc. (vi. 1, R. V.), seems to come from a cycle of prophetic narratives, some of which (comp. viii. 1-3, 5; ii. 16), rightly or wrongly, claimed the authorship of Isaiah. Certainly the whole man is reflected in the grand vision of ch. vi. No personal consideration holds him back (contrast Jeremiah) from offering himself as the Lord's spokesman, and though assured that no exhortation will affect the callous consciences of his hearers, he still goes in and out among his people as if hope existed; and perhaps (human nature is inconsistent) hope still persisted even when reason altogether denied its right.

The story of him who "by vileness made the great refusal" (to apply Dante's well-known words), who might have led his people to social and personal reformation, by the wise counsel of the prophet, is recorded in ch. vii. Isaiah was no statesman, and yet the advice which he gave the king was as good from a political as from a religious point of view. For why should Ahaz pay Assyria for doing work which an enlightened regard for its own interest would certainly impel it to perform? Why should he take the silver and gold in the Temple and in the palace, and send it as tribute to the Assyrian king?

It is to be noted that in ch. viii. Isaiah's wife is called "the prophetess." By her solidarity with her husband she is detached from the unholy people among whom she dwells, and made, as it were, sacrosanct. His children, too, are "signs and omens" of divine appointment; and one may conjecture that if Isaiah ever pictured the worst disaster coming to Jerusalem, he saw himself and his family, like Lot of old, departing in safety (for some work reserved for them by God) from the doomed city. Ch. xx. describes the strange procedure by which Isaiah, as it were, "gave an acted prediction" of the fate in store for Mizraim and Cush (Egypt and Ethiopia), or, as others think, for Mizrim and Cush (North Arabia), on which the peoples of Palestine had counted so much as allies. From ch. xxxvi.-xxxix., perhaps, much assistance can not be expected in the biography of Isaiah, for in their present form they are certainly rather late. No more can be said of Isaiah from direct documentary information. His words are his true biography. In them is seen the stern, unbending nature of the man, who loved his people much, but his God more.

Isaiah has all the characteristics of a classic writer—terseness, picturesqueness, and originality. But was he also a poet? It is hard to think so. Could such a man condescend to the arts necessary to the very existence of poetry? Isa. xxxvii. 22-29 is assigned to him. But the narration in which it is placed is thought by many critics to be late, and the phraseology of the poem itself seems to point away from Isaiah. On the late tradition of the martyrdom of Isaiah in the reign of Manasseh see Isaiah, Ascension of.

E. G. H. T. K. C.

——**In Rabbinical Literature:** According to the Rabbis Isaiah was a descendant of Judah and Tamar (Soṭah 10b). His father was a prophet and the brother of King Amaziah (Meg. 15a). While Isaiah, says the Midrash, was walking up and down in his study he heard God saying, "Whom shall I send?" Then Isaiah said, "Here am I; send me!" Thereupon God said to him, "My children are troublesome and sensitive; if thou art ready to be insulted and even beaten by them, thou mayest accept My message; if not, thou wouldst better renounce it" (Lev. R. x.). Isaiah accepted the mission, and was the most forbearing, as well as the most ardent patriot, among the Prophets, always defending Israel and imploring forgiveness for its sins. He was therefore distinguished from all other prophets in that he received his communications directly from God and not through an intermediary (*ib.*). When Isaiah said, "I dwell in the midst of a people of unclean lips" (vi. 5) he was rebuked by God for speaking in such terms of His people (Cant. R. i. 6).

In the order of greatness Isaiah is placed immediately after Moses by the Rabbis; in some respects Isaiah surpasses even Moses, for he reduced the commandments to six: honesty in dealing; sincerity in speech; refusal of illicit gain; absence of corruption; aversion for bloody deeds; contempt for evil (Mak. 24a). Later he reduced the six to two—justice and charity (*ib.*). The chief merit of Isaiah's prophecies is their consoling character, for while Moses said, "Thou shalt perish in the midst of the nation," Isaiah announced deliverance. Ezekiel's consoling addresses compared with Isaiah's are as the utterances of a villager to the speech of a courtier (Ḥag. 14a). Therefore consolation is awaiting him who sees Isaiah in a dream (Ber. 57b).

It is related in the Talmud that Rabbi Simeon ben 'Azzai found in Jerusalem an account wherein it was written that Manasseh killed Isaiah. Manasseh said to Isaiah, "Moses, thy master, said, 'There shall no man see God and live' [Ex. xxxiii. 20, Hebr.]; but thou hast said, 'I saw the Lord seated upon his throne'" (Isa. vi. 1, Hebr.); and went on to point out other contradictions—as between Deut. iv. 7 and Isa. lv. 6; between Ex. xxxiii. 26 and II Kings xx. 6. Isaiah thought: "I know that he will not accept my explanations; why should I increase his guilt?" He then uttered the Unpronounceable Name, a cedar-tree opened, and Isaiah disappeared within it. Then Manasseh ordered the cedar to be sawn asunder, and when the saw reached his mouth Isaiah died; thus was he punished for having said, "I dwell in the midst of a people of unclean lips" (Yeb. 49b). A somewhat different version of this legend is given in the Yerushalmi (Sanhedrin x.). According to that version Isaiah, fearing Manasseh, hid himself in a cedar-tree, but his presence was betrayed by the fringes of his garment, and Manasseh caused the tree to be sawn in half. A passage of the Targum to Isaiah quoted by Jolowicz ("Die Himmelfahrt und Vision des Prophets Jesajas," p. 8) states that when Isaiah fled from his pursuers and took refuge in the tree, and the tree was sawn in half, the prophet's blood spurted forth. From Talmudical circles the legend of Isaiah's martyrdom was transmitted to the Arabs ("Ta'rikh," ed. De Goeje, i. 644).

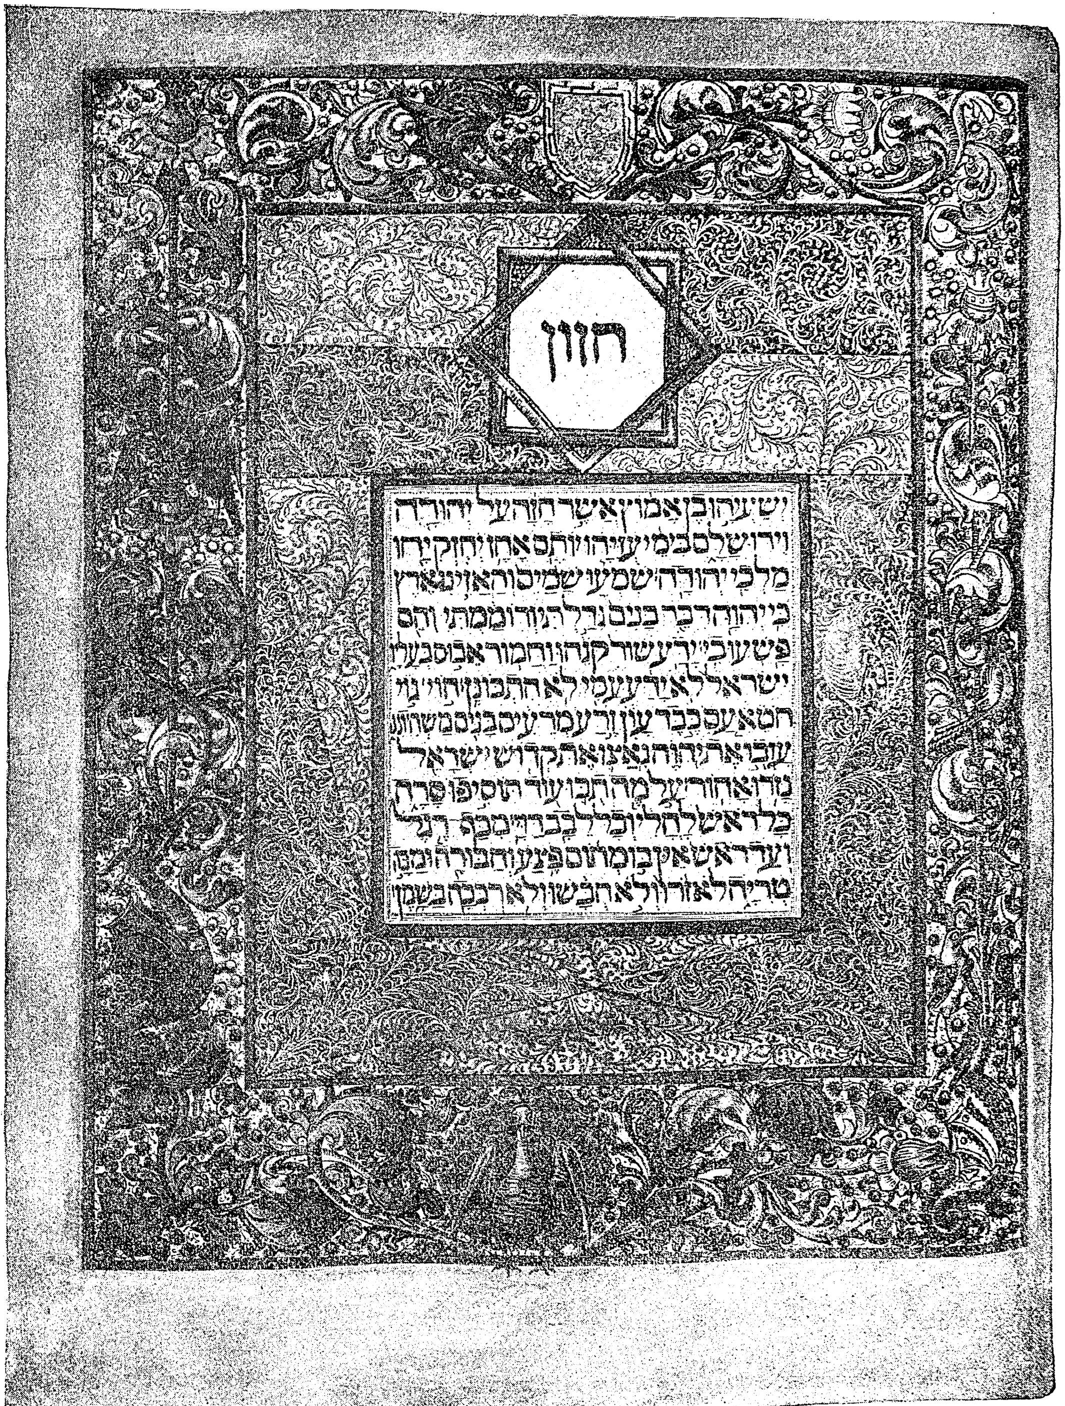
ISAIAH, BOOK OF: The chief note of the Book of Isaiah is variety—variety of tone, of style, of thought, and of historical background. The first step in the study of Isaiah is to realize this variety by taking a survey of the contents. The heading (i. 1) prepares the reader to expect a collection of closely related prophecies (hence called a "vision," in the singular) concerning Judah and its capital. It is plain, therefore, that ch. xiii.-xxiii. were only inserted as an afterthought; for, with the exception of ch. xxii., they all relate to foreign nations; ch. xiv. 24-27, xvii. 12-14, xxii. 1-14, and 15-25 (which relate to Judah or Jerusalem) may be regarded as fragments which would have perished if an editor had not thought of inserting them in this group. Ch. xxiv.-xxvii., also, can only have been admitted through an extension of the original plan, for they speak primarily of a judgment upon the earth at large, and when they do digress to Israel it is in obscure language, which the men of "Judah and Jerusalem" could not generally have understood. Similarly, ch. xxxiv.-xxxv. can have formed no part of the original vision, for the larger part (xxxiv.) is concerned, not with Judah, but with Edom. Ch. xxxvi.-xxxix. speak of Isaiah in the third person, and largely co-



חזון

ישעיהו בן אמוץ אשר חזה על יהודה
וירושלם בימי עזיהו יותם אחז יחזקיהו
מלכי יהודה שמעו שמים והאזיני ארץ
כי יהוה דבר בנים גדלתי ורוממתי והם
פשעו בי ידע שור קנהו וחמור אבוס בעליו
ישראל לא ידע עמי לא התבונן הוי גוי
חטא עם כבד עון זרע מרעים בנים משחיתים
עזבו את יהוה נאצו את קדוש ישראל
נזרו אחור על מה תכו עוד תוסיפו סרה
כל ראש לחלי וכל לבב דוי מכף רגל
ועד ראש אין בו מתם פצע וחבורה ומכה
טריה לא זרו ולא חבשו ולא רככה בשמן

ILLUMINATED PAGE OF ISAIAH FROM A MANUSCRIPT BIBLE, SAID TO BE OF THE TWELFTH CENTURY.

(Lately in the possession of Henriques de Castro, Amsterdam.)

incide with II Kings xviii. 13-xx. 19. Ch. xl.-lxvi. have for their background, at any rate to a considerable extent, Jerusalem in ruins and her people in captivity. In following, therefore, that instinct of order, which is, of course, not the same thing as criticism, but is at least one element in it, the first impressions of Isaiah must be obtained from ch. i.-xii. and xxviii.-xxxiii.

Ch. i.: One of the finest specimens of prophetic rhetoric known. It is in its present form a general prophecy, full of edification for all periods of Israel's history, though the prominence given in verses 29, 30 to the heathen worship practised in the recesses of gardens would not have seemed perfectly natural in the later period of strict religious purity. There are four leading ideas: Israel's ingratitude to its God: the false repentance of oblations; the true repentance of a changed life; purification from without, failing purification from within.

Ch. ii.-iv.: A series of denunciations of the national corruption enclosed between two pictures of the ideal age. Here Isaiah goes into greater detail, both as to the nature of Judah's sin and as to the inevitable punishment. Like a thunder-storm the wrath of God will overthrow the proud, and sweep away the heathenish luxury of the grandees of the land; all classes will be disturbed from their pleasant security; the ablest citizens will go into captivity, for theirs is the greatest guilt; nor shall the women of Jerusalem escape (comp. Amos iv. 1-3).

Ch. v.: A briefer utterance with similar scope. It begins with a bright parable on the vineyard of God, the moral of which is the danger of Judah's ingratitude; then follows a series of "wos" on the chief national sins, and a weird, mysterious announcement of terrible invaders.

The Call of the Prophet.

Ch. vi.: This chapter might well have stood at the head of the whole book. It describes the call of the prophet. A vision, such as all prophets may expect to have (though abundance of visions is no proof of the goodness of a "man of God"), came to Isaiah, and in this vision—the sum of which was the glorified and idealized Temple—God and Isaiah interchanged these words: "Whom shall I send?" "Send me." No passage is so important as is this one for the true biography of Isaiah.

Ch. vii.-ix. 7: Partly historical, partly prophetical. It is unfortunate that this precedent is not followed more frequently. It is now known that Isaiah sought to influence Ahaz, but was repelled by the king. Judah was in sore peril from the invaders Pekah and Rezin (not the invaders to whom he pointed so mysteriously in v. 26 *et seq.*), and there was a conflict between the two principles—reliance on outside human help and implicit trust in Israel's God. Ahaz stood for the first, Isaiah for the second. One result there was which Ahaz could never have anticipated: the sign of Immanuel has supplied material for controversy to the present hour. It might be thought that it was a promise of safety. But Isaiah could not "speak peace when there was no peace." It is desolation, and not deliverance, which the unbelief of Ahaz will ultimately bring on his unhappy country (vii. 17-25). In ch. viii. 1-4 Isaiah reaffirms his declaration (vii. 7-9) of a judgment swiftly coming to Damascus and Samaria. But will Judah escape? No, but the kernel of the nation will escape. Judgment will bring about purification. A deliverer already exists in the counsels of God, and he will restore the kingdom of David in an idealized form (ix. 1-7).

Ch. ix. 8-x. 4: A highly poetical picture of the approaching ruin of the Northern Kingdom, though there are also glances at Judah. The rivalry of factions in the state and the fall of the incompetent rulers on the field of battle are graphically described.

Reliance on Assyria.

Ch. x. 5-xii. 6: There is more religious thought, however, in the discourses contained in these chapters. The variety of imagery, too, is highly remarkable. Assyria (that is, its king; comp. the use of "France" and "England" in Shakespeare) is the staff or the ax in God's hand. Its army is like a forest. Assyria's lust of conquest is like the sport of bird-nesting. See the astonishingly rapid march of the armed hosts! Some with their leader "shake their hands" at the sacred mountain. The Davidic kingdom will, as it seems, be cut down. But so, too, Assyria will be cut down; and while a "shoot" (R. V.) will "come forth out of the stock of Jesse," no such prospect is held out for Assyria. Not to Babylon, but to Jerusalem, will the nations repair. Not in Assyria, but in the land of Israel, will the peace of paradise be exemplified. Thither will all Israel's exiles be brought back, singing psalms of devout and grateful joy.

Ch. xxviii.-xxxiii.: These chapters also are full of variety. From the first the prophet alternates between judgment and salvation. The proud crown of the drunkards (princely drunkards!) of Ephraim is trodden down; for the residue there is a crown of glory (Samaria fell 722 B.C.). But there are drunkards (priestly drunkards!) in Judah too, trusting in a "refuge of lies" instead of in the "sure foundation" stone (xxviii. 15-17). At another time the teacher seems to have adopted a different tone. A few, perhaps, became dejected by Isaiah's frequent reference to destruction. Would this plowing and thrashing go on forever? No; an earthly husbandman is too wise for that; and the heavenly husbandman knows best of all that destruction is justified only by the object of sowing some useful plant when the soil has been prepared (xxviii. 23-29).

It is true, as ch. xxix. shows, the great majority were quite otherwise impressed by Isaiah's preaching. A deep lethargy clouded the senses of the rulers (verses 10-12). But the crash of thunder will awaken them. Within a year Jerusalem will be besieged, and in the midst of the siege God Himself will fall upon Jerusalem and punish her (1-4, 6). But fear not; the foe will suffer most; God will not permit the nations to destroy Mount Zion (5, 7, 8). Wo to the formalists and to the unbelieving politicians of Judah! (13-15). But all the best blessings are to the poor and the meek.

The cause of Isaiah's wrath against the politicians was an alliance with Egypt which was being planned in secret. This is shown by ch. xxx. Isaiah predicts the disappointment which awaits the ambassadors, and the terrible results which will

Alliance with Egypt.

follow from this short-sighted statecraft. But here again the usual contrast is introduced. Storm and sunshine compete with each other. The Golden Age will yet come; Nature will participate in the happiness of regenerate Judah. Assyria will be crushed, and meantime the Jews will sing, as in the night of the feast-day (the vigil of the Passover; comp. Ex. xii. 42). In ch. xxxi.-xxxii. 8 the prophet still hovers about the same theme, while in xxxii. 9-20 the careless security of the women is chastised (comp. iii. 16 *et seq.*), the desolation soon to be wrought by the invader is described, and, as a cheering contrast, the future transformation of the national character and of the physical conditions of life are once more confidently announced. Ch. xxxiii. is one of the most singular of the extant specimens of prophetic writing. There is no apparent arrangement, and some of the verses seem to be quite isolated. It is a kind of vision which is described. The land is being laid waste. O Lord, help! But see! the hostile hordes suddenly disappear; Zion's God is her security. Alas! not yet. The highways still lie waste. The whole country from Lebanon to Sharon mourns. Yes, it is God's time to arise. He has, in fact, arisen, and the "godless" (the converted Jews) tremble, while the righteous are assured of salvation. How happy will the retrospect of their past troubles make them! (verse 18). Then, too, it will be plain that Zion's load of guilt has been removed.

Book of Judgments.

The idea which pervades the first of the five lesser books (ch. xiii.-xxiii., xxiv.-xxvii., xxxiv.-xxxv., xxxvi.-xxxix., and xl.-lxvi.) which still await consideration may be expressed in Isaiah's own words (they are taken here provisionally to be Isaiah's): "This is the purpose that is purposed upon the whole earth: and this is the hand that is stretched out upon all the nations" (xiv. 26). It is, in fact, a Book of Judgments on the nations, except that four passages have found admission into it which relate, not to the world outside, but to the little people which, as Isaiah may have thought, outweighed in the eyes of God all the other nations put together. These four passages are as follows:

Ch. xiv. 24-27 is a short prophecy declaring the purpose of Israel's God to tread Assyria under foot upon the "mountains" of Judah, to which is appended a solemn declaration, part of which is quoted above (verses 26, 27). In ch. xvii. 12-14 there is a graphic prophecy of the destruction of the "many nations" which attack Jerusalem (comp. viii. 9, 10; xxix. 7, 8); no special nation is singled out. In ch. xxii. 1-14 there is an indignant rebuke of the people of Jerusalem, who are in no degree sobered by the danger, just now removed, from the Assyrians; instead of examining into their ways, ceasing to do evil, and learning to do well, they indulge in wild revelry. In ch. xxii. 15-25 an invective against the vizier of the day (Shebna) is followed by a promise of his office to a worthier man (Eliakim), to which an appendix is attached announcing this second vizier's fall.

Of the judgments upon definite nations, other than the Jewish, the first (ch. xiii.) declares the doom of Babylon, and to it is appended a fine, artistic ode of triumph on the King of Babylon (xiv. 4b-21). Observe that the prophet distinctly speaks as if the Medes were already mustering for the march on Babylon. Is it to be supposed that Isaiah was at the time in an ecstasy? Ch. xiv. 22-23 is a prophecy, summing up Babylon's doom in more prosaic style.

Ch. xiv. 28-32 contains the doom of the Philistines, who are in premature exultation at the "breaking" of some terrible "rod." Ch. xv.-xvi. 12 are highly dramatic; they begin with a picture of the consternation of the Moabites at the havoc wrought by an invader, describe the flight of the people in much detail, mention how an appeal to Mount Zion for help was rejected, make sympathetic references to the lamentations of the Moabites over their ruined vines, and then, without any apparent connection, assert that no appeal to Chemosh for aid will be effectual. To this is added (verses 13, 14) a solemn declaration that the prophecy which had been delivered at some previous period shall be fulfilled within three years.

Ch. xvii. 1-11 is directed against Damascus (that is, Syria) and Ephraim (that is, Israel). These two powers have set themselves against the true God, and must suffer the same doom. However, the few who are left in Israel will turn to the holy God, and give up lower forms of worship.

Ch. xviii. was apparently intended to be an address to Ethiopia. But already (verse 3) the prophet turns to the world at large, and bids men take heed of the signs of the divine approach. When the power hostile to God is ripe for destruction, it will be cut off. Then will the Ethiopians send presents to Jerusalem. The doom, therefore, is really confined to verses 4-6.

Ch. xix. describes the utter collapse of Egypt, owing to its conquest by a "cruel lord" (verse 4). The main interest, however, lies in verses 18-24, which apparently contain circumstantial predictions of the establishment of Jewish colonies in five cities of Egypt, including the "city of the sun"; of the erection of a sanctuary in Egypt to Israel's God; of the deliverance of the Jews (?) in Egypt in their sore distress; of the conversion of the Egyptians; and of the providential discipline of Egypt, which henceforth will be a member of a sacred triad of closely connected nations—Egypt, Assyria, and Israel.

The prophecy in ch. xx. gives a second judgment upon Egypt, and a perfectly new judgment on Ethiopia. It stands in marked contrast both to ch. xviii. and to ch. xix. Its possession of a historical introduction would have led to its being grouped with ch. vii.-ix. 7 and ch. xxxvi.-xxxix.; but doubtless it was too short to stand alone.

Ch. xxi. contains three "burdens" (or oracles)—that of the "wilderness of the sea" (R. V.), relative to the destruction of Babylon by Elam and Media (contingents in the assailing army?), that of Dumah (that is, Edom), and that of the "Dedanites" (R. V.), entitled by the early editors of the Hebrew text "in Arabia," words apparently derived from the opening words "in the forest in Arabia." The oracles in ch. xxi contain great textual difficulties.

The only remaining prophecy in this section is that on Tyre. It has a strongly elegiac character, and its reference is much disputed. Here, again, textual problems have to be settled before any attempts at exegesis. But it is clear that the standpoint of verses 15–18 is not that of verses 1–14. It is an epilogue, and expresses a much more hopeful spirit than the original prophecy. Tyre will one day be of importance to the people of Jerusalem; its prosperity is therefore to be desired. Here, then, the note of variety or contrast is as strongly marked as in any part of Isaiah.

Still more remarkable is the variety in the contents of the second of the lesser books (ch. xxiv.–xxvii.). It is observed by R. G. Moulton that, dramatic as this fine passage is, one looks in vain for temporal succession, and finds instead "the pendulum movement dear to Hebrew imagination, alternating between judgment and salvation." However, the parts of this "rhapsody" can not safely be distributed among the dramatis personæ, for it is no literary whole, but a "rhapsody" in a sense not intended by Moulton, a collection of fragments, large or small, stitched, as it were, together. It might also be called a "mosaic," and, since very little, if any, attempt has been made to fuse the different elements, one might, with much advantage, read this composite work in the following order:

(1) xxiv. 1-23: The Last Judgment.
(2) xxv. 6-8: The Feast of Initiation into communion with God, spread not only for Israel, but for all peoples.
(3) xxvi. 20, 21: Summons to the Jews to shut themselves up, while God carries out the awful doom of the wicked (comp. Ex. xii. 22b, 23).
(4) xxvii. 1, 12: Mystic prophecy of the Leviathan's doom, and the restoration of the entire body of dispersed Jews.
(5) xxvii. 7-11: Conditions of salvation for the Jews.
(6) xxvi. 1-19: Song of praise for the deliverance of the Righteous, which passes into a meditative retrospect of recent events, and closes with a prophecy of the resurrection of those who have been faithful unto death.
(7) xxv. 1-5: Song of praise for the destruction of an insolent city.
(8) xxv. 9-12: Praise for deliverance, and anticipations of the downfall of Moab.
(9) xxvii. 2-5: Song concerning God's vineyard, Israel.

Ch. xxxiv.–xxxv. show the same oscillation between judgment and salvation which has been previously noted. The judgment upon all nations (especially Edom) is depicted in lurid tints; upon this, with no link of transition, follows a picture of salvation and of the restoration of the Jewish exiles.

Ch. xxxvi.–xxxix. are a mixture of narrative, prophecy, and poetry. The great deliverance from Assyria under Hezekiah, in which Isaiah plays an important part, is related. An ode on the fall of the King of Assyria (recalling xiv. 4b–21) shows Isaiah (if it be Isaiah) to be a highly gifted poet (xxxvii. 21b–29); and a kind of psalm (see xxxviii. 20), ascribed to Hezekiah, tells how the speaker had recovered from a severe illness, and recognized in his recovery a proof of the complete forgiveness of his sins. A historical preface elucidates this. Both the ode in ch. xxxvii. and the psalm in ch. xxxviii. are accompanied with circumstantial prophecies, not in a poetic style, addressed to Hezekiah. Ch. xxxix. contains a prediction of a Babylonian captivity, also addressed to Hezekiah, and a historical preface.

The Question of Ch. xl.–lxvi.

There still remain ch. xl.-lxvi., which follow abruptly on ch. xxxvi.-xxxix., though a keen eye may detect a preparation for "Comfort ye, comfort ye," in the announcement of the spoiling of Jerusalem and the carrying away of Hezekiah's sons to Babylon in ch. xxxix. Ch. xl.-lxvi. are often called "The Prophecy of Restoration," and yet it requires no great cleverness to see that these twenty-seven chapters are full of variety in tone and style and historical background. A suggestion of this variety may be presented by giving a table of the contents. Alike from a historical and from a religious point of view, these chapters will reward the most careful study, all the more so because controversy is rendered less acute respecting these prophecies than respecting the prophecies in ch. i.-xxxix. The word "prophecies," however, has associations which may mislead; they are better described as "unspoken prophetic and poetical orations."

(1) Good news for the Exiles (xl. 1-11).
(2) Reasoning with the mental difficulties of Israel (xl. 12-31).
(3) The Lord, the only true God, proved to be so by the prophecy concerning Cyrus (xli. 20).
(4) Dispute between the true God and the false deities (xli. 21-29).
(5) Contrast between the ideal and the actual Israel, with lofty promises (xlii. 1-xliii. 7).
(6) How Israel, blind as it is, must bear witness for the true God, who is the God of prophecy: the argument from prophecy is repeatedly referred to (xliii. 8-13).
(7) The fall of Babylon and the second Exodus (xliii. 14-21).
(8) The Lord pleads with careless Israel (xliii. 22-xliv. 5).
(9) Once more, the argument for the true God from prophecy, together with a sarcastic description of the fabrication of idols (xliv. 6-23).
(10) The true object of the victories of Cyrus—Israel's deliverance (xliv. 24-xlv. 25).
(11) The deities of Babylon contrasted with the God of Israel (xlvi. 1-13).
(12) A song of derision concerning Babylon (xlvii. 1-15).
(13) The old prophecies (those on Cyrus' victories) were great; the new ones (those on Israel's restoration) are greater (xlviii.).
(14) Israel and Zion, now that they are (virtually) restored, are the central figures in the divine work (xlix. 1-13).
(15) Consolations for Zion and her children (xlix. 14-l. 3).
(16) The true servant of the Lord, at once confessor and martyr, soliloquizes (l. 4-11).
(17) Exhortation and comfort, with a fervid ejaculatory prayer (li. 1-16).
(18) Words of cheer to prostrate Zion (li. 17-lii. 12).
(19) The martyrdom of the true servant of the Lord, and his subsequent exaltation (lii. 13-liii. 12).
(20) Further consolations for Zion, who is once more the Lord's bride, under a new and everlasting covenant (liv.).
(21) An invitation to the Jews of the Dispersion to appropriate the blessings of the new covenant, followed by more prophecies of deliverance (lv.).
(22) Promises to proselytes and to believing eunuchs (lvi. 1-8).
(23) An invective against the bad rulers of Jerusalem and against the evil courses of heretical or misbelieving persons, with promises to humble-minded penitents (lvi. 9-lvii. 21).
(24) Practical discourse on fasting and Sabbath-observance (lviii.).
(25) Partly denunciation of immorality, partly confession of sins (lix. 1-15a).
(26) A vision of deliverance, with a promise of the permanence of regenerate Israel's mission (lix. 15b-21).
(27) A poetic description of glorified Zion (lx.).
(28) The true servant of the Lord, or, perhaps, the prophetic writer, soliloquizes concerning the gracious message entrusted to him, and the Lord confirms his word (lxi. 1-12).
(29) Vision of the divine warrior returning from Edom (lxiii. 1-6).
(30) Exhausted and almost despairing, Israel complains to the Lord (lxiii. 7-lxiv. 12).
(31) Threatenings to the heretical and misbelieving faction, and promises to the faithful (lxv.).
(32) Polemic against those who would erect a rival temple to that of Jerusalem (lxvi. 1-4).
(33) The fates of Jerusalem and all her opponents contrasted (lxvi. 5-24).

The Critical Problem.

The reader who has not shrunk from the trouble of the orderly perusal of Isaiah which is here recommended will be in a position to judge to some extent between the two parties into which, as it may strike one who is not an expert, the theological world is divided. The study of criticism, as it is commonly called, apart from exegesis, is valueless; he is the best critic of Isaiah who knows the exegetical problems best, and to come into touch with the best critics the student must give his days and nights to the study of the text of this book. An attempt will now be made to give some idea of the main critical problem. Many persons think that the question at issue is whether ch. i.-xxxix. were (apart from slight editorial insertions) written by Isaiah, and ch. xl.-lxvi. by some other writer of a much later age. This is a mistake. A series of prophetic announcements of deliverances from exile is interspersed at intervals throughout the first half of Isaiah, and the date of these announcements has in each case to be investigated by the same methods as those applied to the different parts of Isa. xl.-lxvi. The "parts" of Isa. xl.-lxvi. are referred to because here again there exists a widely prevalent error. That the second part of Isaiah has no literary unity will be obvious to any reader of the preceding synopsis. To argue the question whether the so-called Book of Isaiah has one or two authors is to beat the air. If there was more than one Isaiah, there must have been more than two, for the same variety of idea, phraseology, and background which is by so many scholars taken to prove that "Comfort ye, comfort ye my people, saith your God" (xl. 1) was not written by Isaiah can be taken to prove that "Cry aloud, spare not, lift up thy voice like a trumpet, and declare unto my people their transgressions" (lviii. 1, R. V.) was not written by the author of "Comfort ye, comfort ye my people."

The "Variety" of Isaiah.

By "variety" is not, of course, meant total, absolute difference. It stands to reason that a great prophet like Isaiah would exert considerable influence on subsequent prophetic writers. There is no justification, therefore, for arguing that because the phrases "the Holy One of Israel" and "the Mighty One of Israel" occur in both halves of Isaiah (the second phrase, however, is varied in Isa. xl. *et seq.* by the substitution of "Jacob" for "Israel"), the same prophet must have written both portions. A correspondence of isolated phrases which is not even uniformly exact is of little value as an argument, and may be counterbalanced by many phrases peculiar to the disputed prophecies. Still more unwise would it be to argue, from a certain general likeness between the idea of God in the prophecies of the two parts of Isaiah, that the two parts had the same prophetic author, especially now that the extent of Isaiah's contributions to the first half of the book is being so keenly debated. Most unwise of all would it be to attach any weight to a tradition of Isaiah's authorship of the whole book which goes back only to Ecclesiasticus (Sirach) xlviii. 24, 25: "By a spirit of might he saw the end, and comforted the mourners of Zion, forever he declared things that should be, and hidden things before they came" (Hebr.).

Two eminent Jewish rabbis, Abraham ibn Ezra and Isaac Abravanel, were the first who showed a tendency to disintegrate the Book of Isaiah, but their subtle suggestion had no consequences. Practically, the analytic criticism of Isaiah goes back to Koppe, the author of the notes to the German edition of Bishop Lowth's "Isaiah" (1779-81). The chief names connected with this criticism in its first phase are those of Hitzig, Ewald, and Dillmann; a new phase, however, has for some time appeared, the opening of which may perhaps be dated from the article "Isaiah" in "Encyc. Brit." (1881) and two articles in "J. Q. R." (July and Oct., 1891), all by T. K. Cheyne; to which may be added the fruitful hints of Stade in his "Gesch. des Volkes Israel" (1889, vol. i.), and the condensed discussions of Kuenen in the second edition of his "Investigations into the Origin and Collection of the Books of the Old Testament" (part ii., 2d ed., 1889). To these add Duhm's and Marti's recent commentaries, and the "Introduction" (1895) by T. K. Cheyne. Prof. G. A. Smith's two volumes on Isaiah reflect the variations of opinion in a candid mind, influenced at first, somewhat to excess, by the commentary of Dillmann. For a convenient summary of the present state of criticism the reader may consult Kautzsch's "Outline of the History of the Literature of the Old Testament" (1898), translated by John Taylor, and "Isaiah," in Cheyne-Black, "Encyc. Bibl." (1901). The former work shows how much light is thrown on the different parts of the Book of Isaiah by reading them as monuments of definite historical periods. For a much less advanced position Driver's "Life and Times of Isaiah" (1st ed., 1888) may be consulted; for an impartial sketch of different theories consult the sixth edition of the same writer's "Introduction to the Literature of the Old Testament."

Periods of the Prophecy.

It must suffice here to give a few hints as to the probable periods of the chief prophecies. Three great national crises called forth the most certainly genuine prophecies of Isaiah—the Syro-Israelitish invasion (734), the siege and fall of Samaria (722), and the campaign of Sennacherib (701). Among the non-Isaian prophecies, there are two exilic prophecies of the fall of Babylon (xiii. 1-xiv. 23, and, as most suppose, xxi. 1-10); a probably post-exilic prophecy, or elegy, on the ruin of Moab (xv.-xvi.); prophecies on Egypt and on Tyre, both post-exilic, and the former furnished with a late appendix belonging to the Greek period. The strange and difficult work here called a "rhapsody" or a "mosaic" (ch. xxiv.-xxvii.) belongs at earliest to the fall of the Persian and the rise of the Greco-Macedonian empire. Ch. xxxiv.-xxxv. are so weak that it is not worth while to dogmatize on their date, which is certainly very late. The Prophecy of Restoration is, of course, a late exilic work; it is disputed whether it closes properly at ch. xlviii. or at ch. lv. The subsequent prophecies are additions, belonging presumably to the times of Nehemiah and Ezra. The latest editor of ch. xl.-lxvi. seems to have given a semblance of unity to the various prophecies by dividing the entire mass into three nearly equal books, the two former of which close with nearly the same words (xlviii. 22, lvii. 21).

E. G. H. T. K. C.

ISAIAH, ASCENSION OF: Apocryphal book, consisting of three different parts, which seem originally to have existed separately; one is of Jewish, two are of Christian, origin. The common name of the book, "Ascension of Isaiah," properly covers only ch. vi.-xi., where Isaiah's journey through the seven heavens is described; Epiphanius calls this part Τὸ 'Αναβατικὸν 'Ησαίου; Jerome calls it "Ascensio Isaiæ"; elsewhere it is named Ὅρασις 'Ησαίου ("Visio Isaiæ"). In ch. i.-v. two parts are to be distinguished: (1) the Martyrdom of Isaiah (Jewish), referred to by Origen under the name 'Απόκρυφον 'Ησαίου; (2) a Christian apocalypse, probably the same as the Διαθήκη 'Εζεκίου mentioned by Cedrenus. In the Ethiopic version the whole work bears the title "'Ergata Īsāyĕyās" (The Ascension of Isaiah), and in modern times this name has been generally used; whereas the single constituents are: (1) Martyrdom of Isaiah; (2) Testament of Hezekiah (?); (3) Vision of Isaiah.

Name.

It is generally supposed that the various parts of this book were originally written in Greek. This theory is undoubtedly correct as to the two Christian parts, and it seems to hold true in the case of the Martyrdom also; though the latter may have had a Hebrew or Aramaic prototype. Now there are different parts or fragments of the Ascension in Greek, Latin, and Slavonic, and an Ethiopic version of the entire work. The relations among these fragments and parts are very complicated, though the problems involved seem to have been solved by Charles in his introduction to his edition and translation of the Ascension. According to him the history of the text may be constructed as follows:

The Vision of Isaiah (ch. vi.-xi.) was edited in two different Greek recensions, G^1 and G^2. From G^2 a Latin (L^2) and a Slavonic (S) translation were made. G^1 was united with the independent Greek (G) texts of the Martyrdom and of the Testament, and the whole of this composite work was done into Ethiopic (E); parts of it are extant in a Latin version (L^1). The Greek original of G^1 is lost; a considerable portion of it, however, may be restored from a Greek "Legend of Isaiah," based on this recension. Finally, there is another Greek fragment, containing parts of the Martyrdom and of the Testament. Charles terms it G^2, with the understanding that it is no deliberate and separate recension like the G^2 of the Vision (ch. vi.-xi.), but that the differences between EL^1 and this Greek fragment are "due to the errors and variations incidental to the process of transmission." Following is an outline of the contents of the entire work:

Ch. i. 1-iii. 12.—Introduction and First Part of the Martyrdom of Isaiah: Isaiah predicts, in the presence of Hezekiah, his own death through Manasseh; after Hezekiah's death Isaiah, on account of Manasseh's evil doings, flees into the desert with several other prophets; then, accused by Balkira, a Samaritan, he is seized by Manasseh, in whose heart Beliar (Belial) reigns.

Ch. iii. 13-v. 1a.—The So-Called Testament of Hezekiah: A Christian apocalypse, introduced here by the Christian redactor of the whole work in order to explain Beliar's anger against Isaiah, caused by the last-named's prediction of the destruction of Sammael (Satan), the redemption of the world by Jesus, the persecution of the Church by Nero, and the final judgment.

Ch. v. 1b-14.—Conclusion of the Martyrdom of Isaiah: In the presence of Balkira and of other false prophets, Isaiah, refusing to recant, is sawn asunder by means of a wooden saw.

Ch. vi.-xi.—Vision of Isaiah: In the twentieth year of Hezekiah Isaiah has a vision, which he tells before the king and his assembly. Isaiah is taken by an angel through the seven heavens; in the seventh he beholds the departed righteous, among them Abel and Enoch, and finally God Himself. Then he sees the whole history of Jesus. In ch. xi. 41-43, an editorial addition, he is told that "on account of these visions and prophecies Sammael (Satan) sawed in sunder Isaiah the son of Amos, the prophet, by the hand of Manasseh."

Composition and Date.

The most important critical inquiries into the structure of this book are those of Dillmann and Charles. Dillmann's conclusions, accepted by many leading scholars, are as follows: (1) The Martyrdom is contained in ch. ii. 1-iii. 12, v. 2-14. (2) The Vision (Christian) is contained in ch. vi. 1-xi. 1, 23-40. (3) They were united by a Christian redactor, who added ch. i. (except verses 3 and 4a) and xi. 42-43. (4) Later additions are: ch. i. 3-4a; iii. 13-v. 1; v. 15-16; xi. 2-22, 41. These results were somewhat modified by Charles, who gives the following analysis: (1) The Martyrdom consists of: i. 1-2a, 6b-13a; ii. 1-iii. 12; v. 1b-14. (2) Ch. iii. 13b-iv. 18 are to be counted as a separate work, added by the first editor of the entire work, probably before the "Greek Legend" and the Latin translation were written. (3) The Vision comprises ch. vi. 1-xi. 40, ch. xi. 2-22 being thus an integral part of this section. (4) Editorial additions are: ch. i. 2b-6a, 13b; ii. 9; iii. 13a; iv. 1a, 19-22; v. 1a, 15-16; xi. 41-43. With regard to ch. i. Dillmann's view seems preferable, while Charles's arguments concerning the Testament of Hezekiah are very convincing.

From internal evidence, as well as from quotations in writings of the second and following centuries, it is safe to conclude that the three parts of the book were written during the first century C. E.

There are three main features in this book which are paralleled in the Jewish literature: the legend of Isaiah, the Beliar myth, and the idea of the seven heavens. (1) The legend of Isaiah's death under Manasseh, based on II Kings xxi. 16, is attested twice in the Babylonian Talmud and also in the Jerusalem Talmud (in a targum of Isaiah). In the Babylonian Talmud it is further reported that Isaiah took refuge in a cedar-tree and that Manasseh had the cedar sawn in two; this form of the legend may explain why in the Ethiopic Ascension Isaiah is sawn in sunder by means of a "wooden" saw. (2) Beliar is, in post-Biblical times, identified with Satan. He occurs several times in apocryphal books; for example, the Book of Jubilees, the Ethiopic Book of Enoch, the Testaments of the Twelve Patriarchs, and the Sibylline Books. In Sibyllines iii. 63 he is said to have come from Samaria, which recalls Beliar's association with Balkira the "Samaritan" in causing Isaiah's death. The Beliar myth shows unmistakable traces of the old Babylonian dragon saga, and is probably a Jewish transformation of the latter (see Charles, "The Ascension of Isaiah," pp. lv. *et seq.*). (3) The story of Isaiah's journey through the seven heavens was doubtlessly influenced by the Enoch legend, and its appearance in the Slavonic Book of Enoch tends to confirm this view. The idea of the seven heavens is well known in Jewish theology; Charles has discussed it at length in his edition of the "Secrets of Enoch." Even in the third century, it is told of the Rabbi Joshua b. Levi that he traveled through heaven and hell (Ab. vi. 2b, ed. Strack). In the "Etudes Evangeliques," pp. 65-96 (Paris, 1903) J. Halévy has treated of the parellels between the martyrdom of Isaiah and temptation of Jesus.

EDITIONS: Laurence, *Ascensio Isaiæ Vatis . . . cum Versione Latina Anglicanaque*, Oxford, 1819; Dillmann, *Ascensio Isaiæ Aethiopice et Latine*, Leipsic, 1877; Charles, *The Ascension of Isaiah*, London, 1900 (in which all the Greek and Latin fragments are published, together with a Latin translation by Bonwetsch of the Slavonic version of ch. vi.-xi.).

TRANSLATIONS: Laurence and Dillmann, in works cited above; Laurence's Latin translation was reprinted by Gfrörer in *Prophetæ Veteres Pseudepigraphi* (1840), and given in German by Jolowicz, *Die Himmelfahrt und Vision des Propheten Jesaja* (1854). Basset translated Dillmann's Ethiopic text into French in *Les Apocryphes Ethiopiens* (iii. 1894). Beer published a German translation of ch. ii. 1-iii. 12, v. 2-14. Charles gives an English translation with a copious commentary in his *Ascension* (see above).

T. E. LI.

ISAIAH BEN ABBA MARI (also called **Astruc de Savoie**): French rabbi of the second half of the fourteenth century; famous for his controversies and for the divisions he caused among the communities of France. Armed with an order from R. Meïr ha-Levi of Vienna, conferring upon him supreme rabbinical authority, he endeavored to bring all the Jews in France within his jurisdiction, and threatened with excommunication those who did not submit to his authority. He compelled a certain R. Simeon to give him his niece in marriage by threatening him with the loss of his position; and he even attacked Johanan ben Mattithiah, grand rabbi of France, the son of the preceding grand rabbi. Relying upon Meïr ha-Levi's order, he attempted to eject Johanan from his office. Johanan, however, although he had been officially recognized by the crown, instead of appealing to the secular authorities, preferred to carry his case before the rabbis of Catalonia, and applied to Ḥasdai Crescas, and to Sheshet and Moses Halawa. All three justified him completely and severely censured Isaiah and the illegal action of Meïr ha-Levi. The result of the dispute is not known, but the expulsion of the Jews from France, which followed soon after, probably put an end to these rivalries.

ISAIAH BEN ABRAHAM: Polish rabbi of the seventeenth century; author of "Be'er Heṭeb," a commentary on Shulḥan 'Aruk, Oraḥ Ḥayyim, based upon the later casuists (Amsterdam, 1708). In the preface Isaiah asserts that he wrote a similar commentary to Shulḥan 'Aruk, Yoreh De'ah. Steinschneider ("Cat. Bodl." col. 1384) and Fürst ("Bibl. Jud." ii. 57) say that Isaiah was the grandson of DAVID B. SAMUEL HA-LEVI (ṬaZ). Fürst further says that Isaiah and his family were burned to death, probably accidentally, in 1723, while they were on their way to Palestine.

ISAIAH BERLIN. See Berlin, Isaiah b. (Judah) Loeb.

ISAIAH MENAHEM BEN ISAAC (also known as **Rabbi Mendel, Rabbi Abigdors**): Rabbi of Cracow; died Aug. 16, 1599. At first chief of the yeshibah of Szczebrscyn, government of Lublin, Poland, he was later called to the rabbinate of Vladimir, Volhynia. There he was one of the rabbis who signed the protest against the shameful selling of the rabbinate, a protest afterward renewed by Yom-Ṭob Lipmann Heller. From Vladimir he was invited to the rabbinate of Cracow, where he died. He was the first "ab bet din" or chief rabbi of Cracow; previously the affairs of the community had been decided by three dayyanim. Isaiah was the author of: (1) "Sefer 'Ammude Golah," notes on the "Sefer Miẓwot Ḳaṭon" of Isaac of Corbeil (Cracow, 1596); (2) a commentary on Rashi to the Pentateuch, entitled "Ba-Urim Kabbedu Adonai" (comp. Isa. xxiv. 15), the title being a play on "bi'urim" = "commentaries" (Cracow, 1604); (3) "Tiḳḳun Sheṭarot," on contracts (*ib.* n.d.).

ISAIAH (BEN ELIJAH) DI TRANI (the Younger): Italian Talmudist and commentator; lived in the thirteenth and fourteenth centuries. He was the grandson, on his mother's side, of Isaiah (ben Mali) di Trani the Elder. He is usually quoted as ריא"ז (= "R. Isaiah Aḥaron, ז"ל"), or ריב"א (= "R. Isaiah ben Elijah"). He wrote commentaries on the books of Joshua (Leipsic, 1712), Judges and Samuel (printed in the rabbinical Bible), Kings (I Kings iv. 4, 5, 19, and v. 17 only being included in the principal editions of the rabbinical Bible), and Job (printed in J. Schwarz, "Tiḳwat Enosh," pp. 39 *et seq.*, Hebr. Supplement; see Geiger, "Jüd. Zeit." vii. 142). MSS. Nos. 217–218, in the Bibliothèque Nationale, Paris, contain commentaries by him on the prophetical books and on Psalms; the Rome MSS. contain a commentary on the five Megillot (Steinschneider, "Hebr. Bibl." ix. 137). The last-named are sometimes ascribed to his grandfather; but Güdemann advances several reasons in support of Isaiah ben Elijah's authorship, the principal being their identity of style with Isaiah's acknowledged commentaries (Berliner's "Magazin," i. 45 *et seq.*).

Isaiah's commentaries are confined to simple, concise, and rational exegesis. Their importance lies in the fact that they were the first to be issued in Italy that were free from allegorical interpretations. In them he quotes the Spanish grammarians Ibn Janaḥ, Ibn Ḥayyuj, and Abraham ibn Ezra.

More important, however, is his "Pirḳe Halakot," a ritual code, the first produced in Italy (Halberstam MSS. and other incomplete MSS.; Paris MSS. Nos. 395, 396; Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 643–650; Parma, De Rossi, MSS. Nos. 793, 934). Extracts from it are printed in Joshua Boas's "Shilṭe ha-Gibborim," Sabbionetta, 1554, and in the editions of Isaac Alfasi's "Halakot." On the basis of the Talmudical treatises and following their sequence the "Halakot" are derived from the Mishnah rather than from the Gemara, and are clearly arranged in a precise way. The author ascribes great authority to the Jerusalem Talmud. He is independent in his criticisms of older authorities, his grandfather not excepted, whom he often quotes (with the abbreviation מו"ה = "Mori Zeḳeni ha-Rab"). As a sort of preliminary work to the "Halakot" he wrote a book, "Ḳontres ha-Re'ayot," which contained and discussed the proofs for his halakic decisions.

Isaiah also wrote a "Taḥanun" prayer (Zunz, "Literaturgesch." p. 363). Two other prayers, signed merely "Isaiah" (*ib.*), may be ascribed to him or to his grandfather, who also was a liturgical poet (see Landshuth, "'Ammude ha-'Abodah," p. 134). Unlike his grandfather, Isaiah was an opponent of Aristotle and of the rest of the Greek philosophers who "denied the Torah." Religious conceptions are, according to him, a matter of tradition more than of individual meditation. He advised against religious disputations with the Gentiles and against teaching them the Torah. He endeavored to shield the grotesque midrashim from derision on the part of Christian theologians and baptized Jews by interpreting them as symbolic or hyperbolic.

ISAIAH (BEN MALI) DI TRANI (the Elder; RID): Prominent Italian Talmudist; born about 1180. He originated in Trani (Conforte, "Ḳore ha-Dorot," p. 15a), an ancient settlement of Jewish scholarship, and lived probably in Venice. He died about 1250. He carried on a correspondence with Simḥah of Speyer and with Simḥah's two pupils, Isaac ben Moses of Vienna ("Or Zarua'," i. 88, 218, 220) and Abigdor Cohen of the same city. Isaiah himself probably lived for some time in the Orient. He left a learned son, **David,** and a daughter, with whose son, Isaiah ben Elijah di Trani, he has often been confounded.

Isaiah was a very prolific writer. He wrote: "Nimmuḳim" or "Nimmuḳe Ḥomesh," a commentary on the Pentateuch, consisting mainly of glosses on Rashi which show him to have been, as Güdemann says, an acute critic rather than a dispassionate exegete. The work has been printed as an appendix to Azulai's "Pene Dawid" (Leghorn, 1792); extracts from it have been published in Stern's edition of the Pentateuch (Vienna, 1851) under the title "Peṭure Ẓiẓẓim" (see also Berliner, "Rashi," p. xii.); and Zedekiah ben Abraham, author of "Shibbole ha-Leḳeṭ" and a pupil of Isaiah, composed glosses on it in 1297 (Leipsic MS. No. 15, p. 318). As regards other Bible commentaries ascribed to him, see Isaiah (ben Elijah) di Trani, the Younger. Isaiah also wrote an introduction ("petiḥah") to a "seliḥah" beginning with איכה שפתי (Maḥzor Rome, ed. Luzzatto, p. 32, Introduction), which has been metrically translated into German by Zunz ("S. P." p. 299; see *idem*, "Literaturgesch." p. 336).

Isaiah's chief importance, however, rests upon the fact that he was the most prominent representative of Talmudic scholarship in Italy. He wrote commentaries on almost the whole Talmud, in the form of "tosafot," "ḥiddushim" (novellæ), or "pesaḳim" (decisions). Of his tosafot the following have been printed: those to Ḳiddushin, in the Sabbionetta (1553) edition of that treatise (see Steinschneider, "Cat. Bodl." No. 1718); on Ta'anit and Ḳiddushin, in Eleazar ben Aryeh Löw's "'Ene ha-'Edah" (Prague, 1809); on Baba Batra, Baba Ḳamma, Baba Meẓi'a, 'Abodah Zarah, Ḥagigah, Shabbat, Niddah, 'Erubin, Rosh ha-Shanah, Yoma, Sukkah, Megillah, Mo'ed Ḳaṭan, Pesaḥim, Beẓah, Nedarim, and Nazir, in the two collections "Tosafot R. Yesha'yahu" (Lemberg, 1861, 1869). Some extracts are also contained in Bezaleel Ashkenazi's "Shiṭṭah Meḳubbeẓet."

Of his pesaḳim there have been printed those on Rosh ha-Shanah, Ḥagigah, and Ta'anit, in "Ohole Yiẓḥaḳ" (Leghorn, 1819); on Berakot in N. Coronel's "Bet Natan" (Vienna, 1854); on sukkah, tefillin, ẓiẓit, mezuzah, in "Sam Ḥayyim" (Leghorn, 1803); and some others exist in manuscript only (MS. Vienna, No. xli., MS. Paris, Nos. 364, 365, 976, 2; Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 334–336; Steinschneider, "Hebr. Bibl." iv. 54).

The author sometimes quotes the pesaḳim in his tosafot, from which it would seem that he composed the former earlier than the latter. As in many instances the pesaḳim appear to have been inserted in the tosafot by the copyists, they can not always be distinguished. Of some of the tosafot Isaiah made two or more versions.

Isaiah also wrote, under the title "Ha-Makria'," halakic discussions and decisions on ninety-two halakic topics. The first edition of this work (Leghorn, 1779) contains also his tosafot (or ḥiddushim) on Ta'anit. Isaiah mentions other works of his; *e.g.*, a second commentary on the Sifra, "Ḳontres ha-Zikronot," "Sefer ha-Leḳeṭ," and some responsa, a volume of which Azulai claims to have seen in manuscript and which exist in the collection of MSS. in Cambridge University.

Isaiah possessed a remarkable clarity of expression, which enabled him to expound the most difficult topics with ease and lucidity. The same severe criticism that he passed upon such respected authorities as Rashi, Alfasi, Jacob Tam, Samuel ben Meïr, Jacob ben Samuel (RIJ), and others he applied toward his own halakic decisions whenever he changed his view. He was in favor of a more moderate interpretation of the Law, and he condemned the ritualistic rigor of the teachers of France and Germany. According to Güdemann, Isaiah as a halakic authority had for Italy the same importance that Maimonides had for the Orient and Jacob Tam for the Jews of France and Germany. He was held in very high esteem both by his contemporaries and by the teachers of the following centuries; even one so important as Isaac ben Moses of Vienna called him and Eleazar ben Samuel of Verona "the two kings of Israel" ("Or Zarua'," i. 755).

ISCARIOT. See Judas Iscariot.

ISCOVESCU, BARBU (JUDAH): Rumanian painter; born 1816 at Bucharest; died Oct. 24, 1854, at Constantinople. The son of a house-painter, he served his apprenticeship in that calling under his father, afterward going to Vienna and Paris, where he devoted himself to drawing and painting. Returning to Bucharest, he was, together with Rosenthal, one of the first painters to disseminate in Rumania the plastic arts.

Iscovescu became involved in the revolutionary movement. During his sojourn at Paris he had become acquainted with several young Wallachians who subsequently initiated the Rumanian revolution of 1848; on his return to Bucharest he became associated with them and undertook several missions for the revolutionary committee. When the Russians entered Wallachia and suppressed the revolution, Iscovescu, with others, was banished to Constantinople. He died in exile, and, wishing to be united in death with his companions in arms, was buried in the Greek Orthodox cemetery, in the same grave with Negulici and the preacher Atanasie Luzin, who were exiled with him. Heliade Radulescu, kaimakam and a member of the revolutionary government, and D. Balintineanu, one of the great poets of Wallachia, composed his epitaph, in verse.

ISE (ISI, JOSE) BEN JUDAH: Palestinian tanna of the second century; contemporary of Simeon ben Yoḥai and of R. Meïr. Bacher thinks it probable that Ise ben Judah is identical with both Jose the Babylonian and Jose of the "Babylonian village," of whom the following maxim is quoted in the "Sayings of the Fathers": "He who learns from the young, what is he like? Like one that eats unripe grapes, and drinks wine from his vat. He who learns from the old, what is he like? Like one that eats ripe grapes, and drinks old wine" (iv. 28). Ise ben Judah was distinguished by the high esteem in which he held his colleagues, whose learning and ability he characterized in the most flattering terms (Giṭ. 67a). Want of mutual respect is, according to him, the sin which brings premature death to scholars (Ab. R. N. xxix., end). Contrary to the opinion of Jose ha-Gelili, Ise ben Judah held that the commandment "Thou shalt rise up before the hoary head" (Lev. xix. 32) is applicable to any old man, and not only restricted to scholars (Ḳid. 32b). He valued the respect of parents so highly that, according to him, the personal fulfilment of any precept that can be committed to another must be abandoned, if that is necessary to carry out a father's order (*ib.*). Of Ise ben Judah's activity in Biblical exegesis evidence is given by his remark that there are five passages in the Bible each of which contains a word that can not be positively connected with either the preceding or the following words. This remark was afterward incorporated in the Masorah, where it is noted that "there are five passages in the Bible, each of which contains a word that has no balance" (Mek., Ex. xvii. 9, and parallels). Ise ben Judah is often confounded with Ise ben Judah bar 'Ilai.

ISḤAḲ IBN 'ALI IBN ISḤAḲ: Karaite scholar of the eleventh century. The "Chronicle" of Ibn al-Hiti contains a warm eulogy of the scholarly attainments of Isḥaḳ ibn 'Ali, and cites two works of his, one a polemic against Saadia in the style of the "Sefer ha-Ma'or" by the Karaite Yusuf al-Basir (a mistake for Yusuf al-Ḳirḳisani); the other, to judge from its title, "I'tidal" (Moderation), an ethical work.

ISḤAḲ BEN YA'ḲUB OBADIAH ABU 'ISA AL-ISFAHANI (*i.e.*, "from Ispahan"; surnamed **'Obed Elohim**): Persian founder of a Jewish sect and "herald of the Messiah"; lived at the time of the Ommiad calif 'Abd al-Malik ibn Marwan (684–705). He was of low origin, "a plain tailor"; and his adherents relate that "though he could neither read nor write, yet he wrote books without any assistance" ("J. Q. R." vii. 705).

Abu 'Isa asserted that the coming of the Messiah was to be preceded by five messengers, of whom he himself was the last—the Messiah's herald ("rasul"), summoner ("da'i"), and prophet, whom the Lord had sanctified. In a colloquy with the Lord, the mission was entrusted to Abu 'Isa (so he claimed) of delivering the Jews from the rule of the Gentiles, and of making them politically independent. According to one source, he did not confine himself to being the herald, but declared that he himself was the Messiah. Probably he took this further step only after he had gained followers in his position of herald; and it is even possible that the claim to Messiahship was not made by Abu 'Isa, but was only ascribed to him by later adherents.

In any case he found many followers among the Jews of Persia, and raised a revolt against the calif; so that the latter sent an army against him. The decisive battle was fought at Rai (the ancient Rhagæ), and resulted in the death of Abu 'Isa and in the complete defeat of his adherents. The surname "Al-Ra'i," which Al-Biruni gives him, probably had its origin in this event. One of Abu 'Isa's disciples narrates that when the battle resulted so disastrously Abu 'Isa hid in a cave, and that his ultimate fate was never known. An account of the battle which other followers give ascribes a miraculous victory to Abu 'Isa. It is said that he surrounded his camp with a rope and assured his men that they would be safe from the enemy's swords so long as they did not leave the enclosed space. The hostile army fled from the rope, and Abu 'Isa's followers pursued and completely destroyed the enemy. The prophet himself then wandered into the desert, to announce to the "bene Mosheh" the word of the Lord and his prophetic mission.

Abu 'Isa's adherents laid particular stress upon the fact that, in spite of his illiteracy, he wrote books, and they claimed that this furnished the strongest evidence of his divine inspiration. But history has no record of any literary activity on his part.

Abu 'Isa became the founder of the first Jewish sect in the geonic period, the members of which were called, after him, 'Isawites, "'Iswanites," or "'Isuyites." Their divergences from rabbinic Judaism as regards dogma and ritual are known only through quotations in several Arabic sources and in one Hebrew source. They abstained from wine and animal food. According to Harkavy, Abu 'Isa, in imposing these restrictions, was influenced less by the custom of the Rechabites (comp. Jer. xxxv. 2–10) than by the Pharisaic view (B. B. 60b) that meat and wine ought not to be indulged in by the Jews so long as they live in exile ("galut"). Divorce was not allowed even in case of adultery—a prohibition which was also observed by the Sadducees and by the early Christians. Alluding to the passage in Ps. cxix. 164, "Seven times a day do I praise thee," Abu 'Isa instituted seven daily prayers in place of the three rabbinical ones. In accordance with the rabbinical opinion, he declared the "Shemoneh 'Esreh," the "Shema'," and the two benedictions before and one after the "Shema'" to be obligatory by divine order. Jesus and Mohammed, whom, according to Maḳrizi, Abu 'Isa had seen in heaven, were recognized by the sect as prophets, each of whom had been sent as a missionary to his nation. Al-Ḳirḳisani, the Karaite, held that Abu 'Isa took this attitude merely for diplomatic reasons; for had he not recognized the post-Biblical prophets, his own claim to prophetic inspiration would not have been so readily accepted.

Tenets of the 'Isawites.

The 'Isawites used the Rabbinite calendar, which at that time was a very essential point; for upon the strength of this the Rabbinites did not hesitate to associate and even intermarry with the followers of Abu 'Isa. So Jacob ben Ephraim al-Shami answered Al-Ḳirḳisani, who objected to the friendly attitude of the Rabbinites toward the 'Isawites. Altogether, therefore, Shahrastani's judgment that the customs of the 'Isawites differed greatly in many essential points from the laws of the Torah does not seem to be well founded. At the time of Al-Ḳirḳisani (about 930) the sect survived in Damascus only, and numbered not more than twenty persons.

Abu 'Isa and his disciple Yudghan greatly influenced the founder of the Karaites, Anan, who lived about seventy years later; for instance, Anan took from Abu 'Isa the rule of abstinence from meat and wine.

ISH-BOSHETH (lit. "man of shame"): Fourth and youngest son of Saul, and, as the sole male survivor in direct line of descent, his legitimate successor to the throne (II Sam. ii. 8 *et seq.*). His original name was "Esh-baal (= "man of ba'al" [then, Yhwh]; see I Chron. viii. 33, ix. 39). But when the developed religious consciousness of the Prophets took exception to the identification of "Ba'al" with "Yhwh" (comp. Hosea ii. 18, 19; ix. 10; Jer. iii. 24, xi. 13), names containing "ba'al" were changed (though not consistently), as in this case, by substituting for the objectionable element the significant and contemptuous word "boshet" (comp. "Jerub-boshet" for "Jerubba'al" [see Gideon, Critical View]; "Mephi-boshet" for "Meribba'al"), or, as in I Sam. xiv. 49, by making some other substitution ("Ishui" [Hebr. "Yishwi" = "Ishyo"] for "Ish-ba'al"). Under the protection of his uncle Abner, Ish-bosheth became king in opposition to David, and resided in fortified Mahanaim, east of the Jordan, that place being secure against the Philistines, whose power it was necessary to break before he could think of taking up his residence west of the Jordan. The skill and fidelity of Abner succeeded in securing for Ish-bosheth the allegiance of all the tribes west of the Jordan with the exception of that of Judah. He is credited with having reigned two years (II Sam. ii. 8–10); but they probably must be reckoned to cover only the period after the subjection of the West Jordanic tribes, and not the preceding longer term during which he was recognized as ruler by the eastern section alone. Abner attempted to reduce Judah, but failed (II Sam. ii. 12–32).

Thereafter David gradually but surely extended his authority as against that of the "house of Saul" (II Sam. iii. 1). Finally, Ish-bosheth lost the support of Abner by accusing him of having intrigued with Rizpah, one of Saul's concubines (II Sam. iii. 8 *et seq.*), and of having thereby tacitly asserted a claim to the succession. When Abner left him Ish-bosheth lost all hope, and dared not refuse David's demand for the return of Michal, a demand which emphasized David's claim to the throne of Saul (I Sam. xxv. 44; II Sam. iii. 14 *et seq.*). The assassination of Abner prompted two of his captains, Baanah and Rechab, to slay Ish-bosheth. Entering the palace under the pretext of getting wheat (according to the Greek text they entered while the woman at the gate was sleeping over her task of cleansing the wheat), they slew him while he was on his bed. But David, to whom they carried the head of the unfortunate king, far from rewarding them for their dastardly deed, put them to an ignominious death (II Sam. iv.).

ISHMAEL (ישמעאל).—**Biblical Data:** Eldest son of Abraham by his concubine Hagar; born when Abraham was eighty-six years of age (Gen. xvi. 15, 16). God promised Abraham that His blessing should be upon Ishmael, who, He foretold, would beget twelve princes and would become a great nation (Gen. xvii. 18, 20). Ishmael was circumcised at the age of thirteen (Gen. xvii. 23–26). When Sarah saw Ishmael mocking her son Isaac, his brother, younger by fourteen years, she insisted that Abraham cast out Ishmael and his slave-mother. Abraham reluctantly yielded, having provided them with bread and a bottle of water. Ishmael was about to die of thirst when an angel showed his mother a well, repeating to her at the same time that Ishmael would become a great nation. Ishmael dwelt in the wilderness, apparently, of Beer-sheba, where he became a skilful archer; later he settled in the wilderness of Paran, where his mother took him a wife from Egypt (Gen. xxi. 8–21). Both Ishmael and Isaac were present at the burial of their father, Abraham. Ishmael died at the age of 137. He had twelve sons, ancestors of twelve tribes that dwelt "from Havilah unto Shur, that is before Egypt, as thou goest to Assyria" (Gen. xxv. 9–18).

——**In Rabbinical Literature:** The name of Ishmael is an allusion to God's promise to hear (ישמעאל) the complaints of Israel whenever it suffered at the hands of Ishmael (Gen. R. xlv. 11). Abraham endeavored to bring up Ishmael in righteousness; to train him in the laws of hospitality Abraham gave him the calf to prepare (Gen. R. xlviii. 14; comp. Gen. xviii. 7). But according to divine prediction Ishmael remained a savage. The ambiguous expression מצחק in Gen. xxi. 9 (see Hagar) is interpreted by some rabbis as meaning that Ishmael had been idolatrous; by others, that he had turned his bow against Isaac. According to the interpretation of Simeon b. Yoḥai, Ishmael mocked those who maintained that Isaac would be Abraham's chief heir, and said that as he (Ishmael) was the first-born son he would receive two-thirds of the inheritance (Tosef., Soṭah, v. 12, vi. 6; Pirḳe R. El. xxx.; Gen. R. liii. 15). Upon seeing the danger to Isaac, Sarah, who had till then been attached to Ishmael (Josephus, "Ant." i. 12, § 3), insisted that Abraham cast out Ishmael. Abraham was obliged to put him on Hagar's shoulders, because he fell sick under the spell of the evil eye cast upon him by Sarah (Gen. R. liii. 17).

Ishmael, left under a shrub by his despairing mother, prayed to God to take his soul and not permit him to suffer the torments of a slow death (comp. Targ. pseudo-Jonathan to Gen. xxi. 15). God then commanded the angel to show Hagar the well which was created on Friday in the week of Creation, in the twilight (comp. Ab. v. 6), and which afterward accompanied the Israelites in the wilderness (Pirḳe R. El. xxx.). But this was protested against by the angels, who said: "Why should Ishmael have water, since his descendants will destroy the Israelites by thirst?" (comp. Yer. Ta'an. iv. 8; Lam. R. ii. 2). God replied: "But now he is innocent, and I judge him according to what he is now" (Pirḳe R. El. *l.c.*; Gen. R. *l.c.*; *et al.*). Ishmael married a Moabitess named 'Adishah or 'Aishah (variants "'Ashiyah" and "'Aifah," Arabic names; Targ. pseudo-Jonathan to Gen. xxi. 21; Pirḳe R. El. *l.c.*); or, according to "Sefer ha-Yashar" (Wayera), an Egyptian named Meribah or Merisah. He had four sons and one daughter. Ishmael meanwhile grew so skilful in archery that he became the master of all the bowmen (Targ. pseudo-Jonathan to Gen. xxi. 20; Gen. R. liii. 20). Afterward Abraham went to see Ishmael, and, according to his promise to Sarah, stopped at his son's tent without alighting from his camel. Ishmael was not within; his wife refused Abraham food, and beat her children and cursed her husband within Abraham's hearing. Abraham thereupon asked her to tell Ishmael when he returned that an old man had asked that he change the peg of the tent. Ishmael understood that it was his father, took the hint, and drove away his wife. He then married another woman, named Faṭimah (Peṭimah; Targ. pseudo-

Jonathan *l.c.*), who, when three years later Abraham came again to see his son, received him kindly; therefore Abraham asked her to tell Ishmael that the peg was good.

Ishmael then went to Canaan and settled with his father (Pirḳe R. El. *l.c.*; "Sefer ha-Yashar," *l.c.*). This statement agrees with that of Baba Batra (16a)—that Ishmael became a penitent during the lifetime of Abraham. He who sees Ishmael in a dream will have his prayer answered by God (Ber. 56a).

S. M. Sel.

——**In Arabic Literature:** For the history of Ishmael, according to Mohammedan legend, see Jew. Encyc. i. 87, *s.v.* Abraham in Mohammedan Legend; and Hagar. It may be added here that Ishmael is designated a prophet by Mohammed: "Remember Ishmael in the Book, for he was true to his promise, and was a messenger and a prophet" (Koran, xix. 55). Ishmael is, therefore, in Mohammedan tradition a prototype of faithfulness. He was an arrow-maker, and a good hunter. As a prophet, he had the gift of performing miracles. He converted many heathen to the worship of the One God. He left twelve sons. His son Kedar is said to have been an ancestor of Mohammed. Ishmael is reputed to have lived one hundred and thirty years; he was buried near the Kaaba. His posterity, however, became pagan, and remained so until they were brought back to Islam by Mohammed.

G. H. Hir.

ISHMAEL B. ABRAHAM HA-KOHEN: Talmudic scholar and author; chief rabbi of Modena; born 5484 (= 1724); died 5571 (= 1811). He was recognized as a profound dialectician, and many casuistic questions were submitted to him. His responsa and novellæ were collected under the title "Zera' Emet," two volumes of which appeared in his lifetime (vol. i., Leghorn, 1786; vol. ii., *ib.* 1796), comprising responsa in Oraḥ Ḥayyim and Yoreh De'ah.

Bibliography: Fuenn, *Keneset Yisrael*; Walden, *Shem ha-Gedolim he-Ḥadash*, 3d ed., p. 36a, Warsaw, 1882.

S. S. M.

ISHMAEL OF AKBARA: Founder of the Jewish sect of Akbarites; flourished in the time of the calif Al-Mu'taṣim (833–841). He was a native of Akbara, in Irak, ten parasangs from Bagdad. He is reputed to have been very vain, and is said to have directed that the words "The chariot of Israel and the horsemen thereof" (II Kings ii. 12) should be inscribed on his tombstone. Nothing is known of the principles of his sect; and of his opinions that differed from the traditional doctrine only a few have been preserved. It is an interesting fact that he essayed Biblical criticism; he held, for instance, that in Gen. iv. 8 the words "Arise, let us go to the field" (קום נצא השדה) should be added after "and Cain said to Abel his brother"; that *ib.* xlvi. 15 the copyists wrote "thirty-three" (שלשים ושלוש) in place of the original reading "thirty-two"; that in Ex. xvi. 35 "and the children of Israel ate manna" was originally "and the children of Israel shall eat manna" (reading יאכלו instead of אכלו, probably on the ground that otherwise the verse could not have been written by Moses); that *ib.* xx. 18 "and the people saw [ראים] the thunderings" should be "and the people heard [שמעים] the thunderings." The first and last of these emendations are also found in slightly different forms among the Samaritans, from whom Ḳirḳisani thought that Ishmael had borrowed them. This assumption also explains the fact that Hadassi, who got his information concerning Jewish sects chiefly from Ḳirḳisani, erroneously ascribed ("Ha-Eshkol," alphabet 97) Ishmael's opinions to the Samaritans, but did not quote the emendations correctly. However, it is not yet certain that Samaritans were at that time in Irak (see Büchler in "R. E. J." xliii. 67), or that Ishmael had access to Samaritan texts, especially as two of his readings do not appear in the Samaritan at all, while the other two, as mentioned above, appear in a different form (נלכה instead of נצא in Gen. iv. 8 and שמע instead of שמעים in Ex. xx. 18).

It must be assumed that Ishmael did not hesitate, in order to remove difficulties from the Bible, to attack the Masoretic text; he furthermore preferred the "ketib" to the "ḳeri" in all cases, for which he was attacked by Ḳirḳisani in the second section of his "Kitab al-Anwar." Ishmael, like most sectarians, did not recognize the existing calendar, insisting that the new month begins with the conjunction of the sun and moon (or rather an hour later, when the moon begins to move away from the sun), and that then prayers and sacrifices for New Moon should begin, even if the sun is about to set. He relaxed the laws for the Sabbath (in contrast, for instance, to the Karaites), and permitted on that day the eating of food prepared by non-Jews. The owner of a bath-house or a ship in continual use is enjoined to divide with the poor the profits of the seventh and the fiftieth days, just as was done with the fruits of the earth in the seventh and the fiftieth years; Ishmael relaxed the law on this point also. However, he added an onerous restriction by forbidding in the Diaspora the use of meat. He bases this restriction on Deut. xii. 20–27, where the permission to eat meat is, as it were, conditioned upon the bringing of sacrifices; these having ceased, meat may no longer be eaten. Ishmael also attacked Anan, whose opinions he characterized as "stupid" and "foolish"; his own opinions, in turn, being attacked by Ḳirḳisani as "injurious" and "ignorant." Hence it is wrong to class Ishmael among the Karaites, as does Harkavy. As to the sect of the Akbarites, nothing is known of its numbers or as to the precise period in which it flourished. By the time of Ḳirḳisani, in the first half of the tenth century, it had ceased to exist. The sectary Musa of Tiflis was a pupil of Ishmael.

A Vegetarian.

K. S. P.

ISHMAEL B. ELISHA: Tanna of the first and second centuries (third tannaitic generation). He was a descendant of a wealthy priestly family in Upper Galilee (Tosef., Hal. i. 10; B. Ḳ. 80a;

comp. Rabbinovicz, "Diḳduḳe Soferim," *ad loc.*; Ḥul. 49a), and presumably the grandson of the high priest of the same name. As a youth he was carried away by the Romans, but Joshua b. Hananiah, succeeding in purchasing his liberty, restored him to Palestine, where he rapidly developed into an accomplished scholar (Tosef., Hor. ii. 5; Giṭ. 58a). Of his teachers, only Neḥunya ben ha-Ḳanah is expressly mentioned (Sheb. 26a), but he doubtless learned much from his benefactor, between whom and himself grew up a close friendship; Joshua called him "brother" ('Ab. Zarah ii. 5; Tosef., Parah, x. [ix.] 3), a term by which he was afterward known to his colleagues (Yad. iv. 3; Sanh. 51b).

Ishmael's teachings were calculated to promote peace and good-will among all. "Be indulgent with the hoary head," he would say, "and be kind to the black-haired [the young]; and meet every man with a friendly mien" (Ab. iii. 12). What he taught he practised. Even toward strangers he acted considerately. When a heathen greeted him, he answered kindly, "Thy reward has been predicted"; when another abused him, he repeated coolly, "Thy reward has been predicted." This apparent inconsistency he explained to his puzzled disciples by quoting Gen. xxvii. 29: "Cursed be every one that curseth thee, and blessed be he that blesseth thee" (Yer. Ber. viii. 12a; Gen. R. lxvi. 6).

His Kindly Disposition.

He was fatherly to the indigent, particularly to poor and plain maidens, whom he clothed attractively and provided with means, so that they might obtain husbands (Ned. ix. 10; 66a). One Friday night, while absorbed in the study of the Bible, he inadvertently turned the wick of a lamp; and he vowed that when the Temple was rebuilt he would offer there an expiatory sacrifice (Shab. 12b).

Views on Marriage.

He manifested the same spirit of hope in declining to countenance the refusal of the ultra-patriotic to beget children under the Roman sway (Tosef., Soṭah, xv. 10 [comp. ed. Zuckermandel]; B. B. 60b). Even under the conditions then existing he recommended early marriage. He said, "The Scripture tells us, 'Thou shalt teach them [the things thou hast seen at Horeb] to thy sons and to thy sons' sons; and how may one live to teach his sons' sons unless one marries early?" (Deut. iv. 9, Hebr.; Yer. Ḳid. i. 29b; Ḳid. 61a; see Samuel Edels *ad loc.*).

Ishmael was one of the prominent members of the Sanhedrin at Jabneh ('Eduy. ii. 4), and when that august body was forced by circumstances to move to Usha, Ishmael attended its sessions there (B. B. 28b), though his residence was at Kefar 'Aziz, on the borders of Idumæa, where Joshua b. Hananiah once visited him (Kil. vi. 4; Ket. v. 8). He gradually developed a system of halakic exegesis which, while running parallel with that of Akiba, is admitted to be the more logical. Indeed, he established the principles of the logical method by which laws may be deduced from laws and important decisions founded on the plain phraseology of the Scriptures. Like Akiba, he opened up a wide field for halakic induction, but, unlike Akiba, he required more than a mere jot or a letter as a basis for making important rulings (comp. Sanh. 51b). He was of opinion that the Torah was conveyed in the language of man (see Yer. Yeb. viii. 8d; Yer. Ned. i. 36c), and that therefore a seemingly pleonastic word or syllable can not be taken as a basis for new deductions. In discussing a supposititious case with Akiba, he once exclaimed, "Wilt thou indeed decree death by fire on the strength of a single letter?" (Sanh. 51b). The plain sense of the Scriptural text, irrespective of its verbal figures, was by him considered the only safe guide.

Hermeneutic Rules.

To consistently carry out his views in this direction Ishmael drew up a set of thirteen hermeneutic rules by which he interpreted Scripture. As a basis for these rules he took the seven rules of Hillel, and on them built up his own system, which he elaborated and strengthened by illustrating them with examples taken from the Scriptures (see Baraita of R. Ishmael; Talmud; comp. Gen. R. xcii. 7). Even these rules he would not permit to apply to important questions, such as capital cases in which no express Scriptural warrant for punishment existed; he would not consent to attach a sentence of death, or even a fine, to a crime or misdemeanor on the strength of a mere inference, however logical, where no such punishment is clearly stated in Scripture (Yer. 'Ab. Zarah v. 45b), or to draw a rule from a law itself based on an inference (Yer. Ḳid. i. 59a). His rules were universally adopted by his successors, tannaim as well as amoraim, although occasionally he himself was forced to deviate from them (see Sifre, Num. 32).

Thus his name became permanently associated with the Halakah; but in the province of the Haggadah also it occupies a prominent place (M. Ḳ. 28b). In answer to the question whether future punishment will be limited to the spirit or to the body, or whether in equity any punishment at all should be inflicted on either, seeing that neither can sin when separated from the other, Ishmael draws this parallel: A king owning a beautiful orchard of luscious fruit, and not knowing whom to trust in it, appointed two invalids—one lame and the other blind. The lame one, however, tempted by the precious fruit, suggested to his blind companion that he ascend a tree and pluck some; but the latter pointed to his sightless eyes. At last the blind man raised his lame companion on his shoulders, and thus enabled him to pluck some of the fruit. When the king came, noticing that some fruit had disappeared, he inquired of them which was the thief. Vehemently asserting his innocence, each pointed to the defect which made it impossible for him to have committed the theft. But the king guessed the truth, and, placing the lame man on the shoulders of the other, punished them together as if the two formed one complete body. Thus, added Ishmael, will it be hereafter: soul and body will be reunited and punished together (Lev. R. iv. 5; comp. Sanh. 91a *et seq.*).

Ishmael laid the foundation for the halakic midrash on Exodus, the Mekilta; and a considerable portion of the similar midrash, the Sifre on Numbers, appears also to have originated with him or in his school, known as "Debe R. Ishmael." Some suppose that he was among the martyrs of Bethar (comp. Ab. R. N. xxxviii. [ed. Schechter, p. 56b]); the more generally received opinion, however, is that one of the martyrs, a high priest, was a namesake (Ned. ix. 10).

ISHMAEL B. JOHANAN B. BAROḲA: Tanna of the second century (fourth tannaitic generation); contemporary of Simon b. Gamaliel II. These two rabbis are often quoted together, either as opposing, or as agreeing with, each other (Tosef., 'Er. iv. [v.] 2; *ib.* Yeb. xiii. 5). Joshua b. Ḳarḥah also appears to have been of their circle, and the trio joined in opinions on marital questions (Tosef., Yeb. *l.c.*; Tosef., Ket. ix. 2; comp. Yeb. 42b, 75a; see Sanhedrin). Once Ishmael is cited as opposing his father, Johanan b. Baroḳa, on a question of civil law (B. Ḳ. x. 2; *ib.* p. 114b; comp. Alfasi and Rosh *ad loc.*). While his name is connected with about forty halakot, on dietary laws, sacrifices, and Levitical cleanness, as well as on civil law, he is but little known in the province of the Haggadah. He says, "Whoso learns in order to teach is aided by Heaven to learn and to teach; but whoso learns in order the more fully to discharge his duties, him Heaven enables to learn and teach and practise" (Ab. iv. 5). Elsewhere he points out that the pious man must not live in the neighborhood of the wicked, for when punishment providentially falls upon the latter the former suffers also (Ab. R. N. ix. [ed. Schechter, p. 20a; comp. p. 34b]).

s. S. M.

ISHMAEL B. JOSE B. ḤALAFTA: Tanna of the beginning of the third century. Ishmael served as a Roman official together with Eliezer b. Simon, and was instrumental in suppressing the hordes of Jewish freebooters that had collected during the war between Severus and Rescennius Niger (193). His activity in this direction was greatly resented by the Jews, who never forgave him for handing over fellow Jews to the Roman authorities for execution (Meg. 84a). In halakic literature he is known by his citations of his father's sayings which he transmitted to Judah I., with whom he read Lamentations and the Psalms (Lam. Rab. ii. 420; Midr. Teh. iii. 1). He had a wide knowledge of the Scriptures, and could write down from memory the whole of the Bible (Yer. Meg. 74d).

Ishmael b. Jose was not on good terms with the Samaritans. On one occasion, when he was passing through Neopolis on a pilgrimage to Jerusalem, the Samaritans jeeringly invited him to pray on Mount Gerizim instead of on "those ruins [Jerusalem]"; Ishmael retorted that the object of their veneration was the idols hidden there by Jacob (Gen. R. lxxxi.; comp. Gen. xxxv. 4). Sanh. 38b would indicate that he also had occasional passages with Christians.

As a judge, Ishmael was noted for absolute integrity (Mak. 24a). His modest bearing called forth high praise from his master. The treasures of Tyre shall be "for them that dwell before the Lord" (Isa. xxiii. 18) refers, said R. Judah, to Ishmael b. Jose and to others who, like him, consider themselves as of little account, but for whom some day a greater glory waits (Eccl. R. i. 7). The following gives an instance of his timely wit: Compelled to say something agreeable about a very ugly woman, he in vain sought ground for a compliment, until he learned that her name was "Liḥluḥit" (the dirty one). "Ah!" said he, "there is something beautiful about her—her name, which suits her uncommonly well." His haggadic interpretation of למנצח מזמור (Ps. iii.) may be given as an example of his method of exegesis. He explains it to mean "a psalm to Him who causes man to conquer himself." "Sing a psalm to Him who feels a great joy in being conquered. Come and behold! God's way is not man's way. One who is defeated is depressed, but God rejoices in being conquered, as seen in Psalm cvi. 23, where the joy of the Lord is expressed at the fact that Moses, His chosen one, was victorious in his mediation for Israel" (Pes. 119a; see Rashi *ad loc.*).

ISHMAEL BEN ḲIMḤIT (ḲAMḤIT [קמחית]): High priest under Agrippa I.; probably identical with Simon, son of Κάμιθος (or Κάμη), mentioned by Josephus ("Ant." xx. 1, §§ 3 *et seq.*). He is known as having had a hand so large that it could contain four cabs of flour (Yoma 47a). Once, while talking with an Arab (or with the Arabian king), the latter's saliva fell on Ishmael's garment and made him unclean, so that his brother officiated in his stead (*ib.*; Tosef., Yoma, iv. [iii.] 20). In Yer. Yoma i. 1, Lev. R. xx. 7, and Tan., Aḥare Mot, 9, this story is related of Simeon ben Ḳimḥit. According to the Talmudic sources mentioned above, "Ḳimḥit" was the name of the mother of Ishmael, or Simeon; she had seven sons, all of whom became high priests.

ISHMAEL, SON OF NETHANIAH. See Gedaliah.

ISHMAEL BEN PHABI (FIABI) II.: High priest under Agrippa II.; not to be identified (as by Grätz and Schürer) with the high priest of the same name who was appointed by Valerius Gratus and who officiated during 15-16 of the common era. Ishmael was a worthy successor of the high priest Phinehas. He was appointed to the office by Agrippa in the year 59, and enjoyed the sympathy of the people. He was very rich; his mother made him, for the Day of Atonement, a priestly robe which cost 100 minæ. Ishmael at first followed the Sadducean method of burning the sacrificial red heifer, but finally authorized the procedure according to the Pharisaic teaching. Being one of the foremost ten citizens of Jerusalem sent on an embassy to Emperor Nero, he was detained by the empress at Rome as a hostage. He was beheaded in Cyrene after the destruction of Jerusalem, and is glorified by the Mishnah teachers (Parah iii. 5; Soṭah ix. 15; Pes. 57a; Yoma 35b).

G. M. K.

ISIDOR, LAZARD: Chief rabbi of France; grandson, on his mother's side, of Hirsch Katzenellenbogen, chief rabbi of Upper Alsace; born at Lixheim, Lorraine, July 13, 1813; died at Montmorency 1888. At the age of fourteen he entered the rabbinical school at Metz, which two years later became the Ecole Centrale Rabbinique of France, under government control. Isidor became rabbi of Pfalzburg, Lorraine, in 1838, where he attracted general attention by questioning the validity of the oath "more Judaico," which he refused to take, considering it an insult to his coreligionists. As an incumbent of a government office he was arraigned before the court though, defended by Crémieux, he obtained a favorable verdict. In 1844 Isidor went to Paris, where he was received with acclamation, and in 1847, at the early age of thirty-three, became chief rabbi of Paris, a position which he filled for twenty years. As chief rabbi Isidor achieved a great success, to which his personal popularity contributed, and he united the heterogeneous elements of the community into one harmonious body. In 1867 he became chief rabbi of France.

Isidor was conservative, and his enthusiasm for unity led him to oppose the Reform party. He was the creator of the rabbinical missions, and especially devoted himself to the task of assimilating Algerian Judaism with that of France. As an orator Isidor was distinguished. His literary efforts include only pastoral letters, funeral orations, sermons, etc. One of the finest of his funeral orations is entitled "Paroles Prononcées sur la Tombe du Commandant Franchetti."

S. J. L.

ISIDORUS HISPALENSIS: Archbishop of Seville; flourished in the sixth and seventh centuries. He presided over the fourth Council of Toledo, called together by the Visigothic king Sisenand (633), and gave expression to the principle that Jews ought not to be forced into the Christian Church. To convert the Jews he wrote a book in two volumes, "Contra Judæos," in which he takes care to maintain the claims of Christianity from the Old Testament. Whether the Spanish Jews entered into controversy with Isidorus, and, as Grätz believes, carried it on in Latin, is an open question.

Bibliography: Grätz, *Gesch. der Juden*, v. 77 *et seq.*

J. M. K.

ISIS: Egyptian deity, at whose instigation, it was alleged, the Jews were forced to leave Egypt. Cheremon, the enemy of the Jews, asserted that the goddess Isis had appeared to the Egyptian king Amenophis, and had censured him because her sanctuary had been destroyed; whereupon the priest Phritibantes told the king that the terrible vision would not recur if he would purge Egypt of the "foul people." Then the departure of the Jews from Egypt took place (Josephus, "Contra Ap." i. 32). Tacitus has a different version, according to which the Jews were natives of Egypt, and had emigrated during the reign of Isis ("Hist." v. 2–5). In the Epistle of Jeremiah (30–40) either the cult of Isis or that of Cybele is described. The violation of the chaste Paulina in the Temple of Isis at Rome was one of the reasons for the expulsion of the Jews from that city by Tiberius (Josephus, "Ant." xviii. 3, § 4; Hegisippus, "De Excidio Hieros." ii. 4).

After the destruction of Jerusalem, Vespasian and Titus celebrated their triumph in the Temple of Isis at Rome (Josephus, "B. J." vii. 5, § 4). Tiberius Julius Alexander, a descendant of the apostate and procurator (of Judea) of the same name, erected a statue to Isis at Alexandria, in the 21st year of Antoninus Pius (Schürer, "Gesch." 3d ed., i. 568, note 9). The Greeks that lived in Palestine worshiped, among other gods, the goddess Isis (*ib.* ii. 35). Hence it is not surprising that the Rabbis also speak of the worship of Isis; they do not mention her name, but refer to her as the "suckling" ("meniḳah"; 'Ab. Zarah 43a; Tosef., 'Ab. Zarah, v. 1); she is often represented with the suckling Horus. This specific application of "the suckling" has not been recognized in the Talmudic dictionaries of Levy, Kohut, and Jastrow.

G. S. Kr.

ISLAM: Arabic word denoting "submission to God"; the name given to the religion of Mohammed and to the practises connected therewith. This religion was preached first to Mohammed's fellow citizens in Mecca, then to all Arabia; and soon after his death it was spread to distant lands by the might of the sword. Its followers are called "Moslems" (Arabic, "Muslimin"). The word "Islam" represents the infinitive, the noun of action, of the factitive stem of the Arabic root "salam," and is rightly compared (Zunz, "Literaturgesch." p. 641; comp. Steinschneider, "Polemische und Apologetische Literatur," p. 266, note 56) with the use of the "hif'il" of "shalam" in later Hebrew; *e.g.*, Pesiḳ. 125a ("mushlam"); Tan., ed. Buber, Gen. p. 46 *ib.* (where "hishlim" is used of proselytes).

Motive Principles.

The preaching of Mohammed as the messenger of God ("rasul Allah"; see Mohammed) owed its origin to the prophet's firm conviction of the approach of the Day of Judgment ("Yaum al-Din") and to his thorough belief in monotheism. The former was primarily a reaction against the conduct of the Meccan aristocracy of his time, which in his eyes was sensual, avaricious, proud, oppressive, and wholly indifferent to things spiritual; the latter was a protest against the polytheistic traditions of the Arabs. Mohammed was led to both through Jewish and Christian influences, to which he was subjected in his immediate surroundings as well as during the commercial journeys undertaken by him in his youth. Only in the second period of his activity, after the Hegira—the departure of himself and his most faithful followers to Medina (formerly Yathrib) in 622—did he undertake a practical organization of his prophetic work, and, by making concrete laws, give a definite form to the general religious feeling which had been aroused by his preaching. These laws dealt both with social relations and with religious worship. It was only then that the religious tendency which had arisen out of a reaction against the heathenism of Arabia took on the form of a real, positive institution.

Mohammed's conception of his own calling and the fate which his efforts had to endure at the hands of the infidels ("kafir" = "kofer") appeared to his mind as a reflection of the prophets of the Bible, whose number he increased by a few characters (*e.g.*, Hud and Ṣaliḥ) borrowed from an old tradition (see JUBILEES, BOOK OF). The persecutions which were suffered at the hands of their fellow citizens by those whose work he had now taken up were repeated in his own career. There was the same obstinate refusal, the same appeal to ancestral traditions, the resigning of which for the sake of a God-sent message heathen nations had ever opposed. In the conduct of the Meccans toward Mohammed were repeated the actions of earlier peoples toward the messengers and prophets sent from time to time by Allah to mankind. Mohammed himself was the last link in the prophetic chain; the conclusion, the "seal of the prophets" ("khatam al-anbiya'"; comp. parallels in "J. Q. R." xiv. 725, note 5).

Relation to Predecessors.

In reality this confession or practise which he sought to establish was nothing new: it was only a restoration of the ancient religion of Ibrahim, to which God had called him (Mohammed) through the medium of Gabriel, the angel of revelation, whom he identified with the Holy Ghost. He claimed that he was to continue the mission of the earlier prophets from Adam to Jesus, and demanded for all of them faith and recognition; he would have their revealed books recognized as Holy Scriptures, viz., the Torah ("Taurat"), the Psalms ("Zabur"), and the Gospel ("Injil"). In addition, certain other prophets had written the will of God on rolls. As to his personal valuation, he made the most modest demands: he did not wish to be regarded as being above the sphere of humanity; he was only a man, of the same flesh and blood as those to whom his speech was directed; and he even declined with consistent firmness the suggestion to perform miracles, the one and only miracle being God's inimitable, unsurpassable word ("ḳur'an"), as the instrument of which he was called by God. Hence he emphatically denied the claims which Christianity made in regard to the character of its founder—a character which he held to be in contradiction not only to that of a prophet sent by God, but also to that of the transcendental monotheism which he (Mohammed) preached: "He is Allah, one alone; he begets not, and is not born; and no one equals him in power" (sura cxii.).

Since he claimed to be a restorer of the ancient, pure religion revealed to Abraham, he connected his teaching with that of the Holy Scriptures of the Jews and Christians, of whose contents, however, he had in many particulars only a very imperfect knowledge—his teachers having been monks or half-educated Jews—and this knowledge he often repeated in a confused and perverted fashion. What he received from the Jews was mixed with haggadic elements current orally among Arabian Jews or existing in written form [—probably preserved in Ethiopic translations of Hebrew pseudepigraphic writings.—K.]; and his conception of Christian teachings was sometimes that of the heretical sects (Collyridians, Docetæ) scattered throughout the Orient, and not recognized in the canonical doctrines of Christianity. As has recently been shown, Mohammed himself not only borrowed from Jews and Christians, but was influenced also by Parseeism, with the professors of which ("majus," "magian") he came into direct contact (I. Goldziher, "Islamisme et Parsisme," in "Actes du 1er Congrès Internat. d'Histoire des Religions," i. 119–147, Paris, 1901).

The Koran.

The first and most ancient document of Islam is naturally the KORAN ("Proclamation"), which, containing God's revelations to Mohammed, forms the foundation of his religion. The doctrine of faith and practise preached by Mohammed is unfolded gradually with the succession of stages in the growth of the Koran. In the first period of his activity (at Mecca) he was occupied chiefly with his inspirations in regard to the truths of the faith, the monotheistic idea, the divine judgment, and his prophetic calling. The monotheistic conception of God, which he opposes to Arabian heathendom, agrees in substance with that of the Old Testament; he emphasizes, however, as Nöldeke has pointed out, "more the universal power and the unhindered free will of God than His holiness." Mohammed connects the idea of omnipotence with the attribute of mercy, which forms an essential element in the exercise of God's omnipotence and which is expressed in the name for God taken from the mother religion, "al-Raḥman" ("Raḥmana"), usually joined with "al-Raḥim" (= "the Compassionate"). The formulation of the social and ritualistic laws was revealed to him principally after the Hegira, during his sojourn in Medina; while the most essential elements of the ritual ordinances had been evolved during the Meccan period. In Medina he had counted much on the support of the influential Jews, by whom he expected to be regarded as the final messenger of God promised in the Scriptures. He accordingly at first made them various concessions. He pointed to Jerusalem as the direction ("ḳiblah") toward which they should turn when praying, and he established the tenth day of the first lunar month ('ASHURA) as the great annual fast-day. The prohibition against eating swine's flesh was also taken from Judaism, and, like that against drinking wine, was accepted, since it was difficult in those days for Arabs to procure that beverage; whereas the adoption of the Biblical prohibition against camel's flesh would have encountered great opposition, because such meat formed an integral part of the national food (Fränkel, "Aramäische Fremdwörter im Arabischen," iii.). CIRCUMCISION, a custom preserved from old Arabian heathendom, does not possess in Islam the fundamental character peculiar to it among the Jews.

In view, however, of the obstinate opposition maintained by the Jews, Mohammed soon annulled some of these concessions. The ḳiblah was directed

Opposition to Judaism.

toward Mecca (sura ii. 136); the month Ramaḍan became the great period of fasting, in place of the tenth day of the first month; and in other cases also he opposed some of the principal details of Jewish practise. He set aside the restrictions of the dietary laws (retaining only those in regard to swine's flesh and animals which die a natural death or are offered as heathen sacrifices); and he protested against the Jewish conception and observation of the Sabbath. Instead of the day of rest in commemoration of God's resting, he appointed Friday ("Jumʿah") as a day of assembly for divine worship ("Die Sabbath-Institution in Islam," in "Kaufmann Gedenkbuch," pp. 86–101). In the abolition of such Biblical ordinances he laid down the principle of Abrogation which forms the basis of Islamic theology.

Institutions of Islam.

The fundamental obligations of Islam, called "pillars of religion," in their most complete systematic form are five in number: (1) The "shahadah," the confession of faith: "There is no God but Allah; and Mohammed is his apostle." This twofold confession ("kalimata al-shahadah") is amplified into the following creed: "I believe in Allah, in his angels, in his [revealed] Scriptures, in his Prophets, in the future life, in the divine decree [in respect to] the good as well as [to] the bad, and in the resurrection of the dead." (2) "Ṣalat" (divine worship), to be performed five times a day; viz., at noon ("ẓuhr"), in the afternoon ("ʿaṣr"), in the evening ("maghrib"), at the approach of night ("ʿishaʾ"), and in the morning between dawn and sunrise ("ṣubḥ"). The institution of these five times of prayer developed gradually; to the three daily prayers which Mohammed himself appointed after the Jewish pattern were soon added the other two, in imitation of the five "gah" of the Parsees. (3) "Zakat," the levying of an annual property-tax on all property, the sum coming into the state treasury from this source to be used for the public and humanitarian objects enumerated in the Koran (sura ix. 60). (4) "Al-ṣiyam" (= Hebr. "ẓom"), fasting from morning till evening every day during the month Ramaḍan (the severity of this law was lightened by certain indulgences). (5) "Al-ḥajj" (the pilgrimage) to Mecca, imposed on every one for whom the performance of this duty is possible. The ceremonies incident to this pilgrimage Mohammed preserved from the traditional practises followed during the period of heathendom, although he reformed and reinterpreted them in a monotheistic sense (C. Snouck Hurgronje, "Het Mekkaansche Feest," Leyden, 1880). Dozy's theory, based on I Chron. iv. 39–43 (see his "De Israelieten te Mekka," Haarlem, 1864; German transl., Leipsic, 1864), that the pilgrimage ceremonies of olden times in Mecca were instituted by Israelites, more particularly by Simeonites who had been scattered thither, and that even the nomenclature of the rites may be etymologically explained from the Hebrew, has found little favor (comp. Geiger, "Jüd. Zeit." iv. 281; "Z. D. M. G." xix. 330).

In addition to the religious duties imposed upon each individual professing Islam, the collective duty of the "jihad" (= "fighting against infidels") is imposed on the community, as represented by the commander of the faithful. Mohammed claimed for his religion that it was to be the common property of all mankind, just as he himself, who at first appeared as a prophet of the Arabs, ended by proclaiming himself the prophet of a universal religion, the messenger of God to all humanity, or, as tradition has it, "ila al-aḥmar wal-aṣwad" (to the red and the black). For this reason unbelief must be fought with the force of weapons, in order that "God's word may be raised to the highest place." Through the refusal to accept Islam, idolaters have forfeited their lives. Those "who possess Scriptures" ("ahl al-kitab"), in which category are included Jews, Christians, Magians, and Sabians, may be tolerated on their paying tribute ("jizyah") and recognizing the political supremacy of Islam (sura ix. 29). The state law of Islam has accordingly divided the world into two categories: the territory of Islam ("dar al-Islam") and the territory of war ("dar al-ḥarb"), *i.e.*, territory against which it is the duty of the commander of the faithful ("amir al-muʾminin") to lead the community in the jihad.

For the exercise of the ritual duties certain ceremonies are appointed (*e.g.*, the preliminary ablutions and the definite number of bows and prostrations in the case of the ṣalat), the forms of which were, however, still variable during the first century of Islam. The early dispersion of the Moslems into distant lands, in which they conducted wars of conquest, made it difficult to establish a fixed practise. The most varying opinions arose concerning the regulations which the prophet had ordained in regard to these forms and the manner in which he had himself performed the ceremonies—in a word, concerning what was the "sunna" (traditional custom) in these matters. The claim as to the validity of each opinion was based on some alleged report ("ḥadith") either of a decree or of a practise of the prophet or of his companions ("aṣḥab"). In regard to these questions of detail, as indeed in regard to questions of law in general—which latter embraces both jurisprudence and matters of ritual—it was only in the second century after the establishment of Islam that fixed rules were adopted. These were founded partly on what was recognized as tradition, partly on speculative conclusions, and partly on the generally acknowledged and authenticated consensus of opinion in the community ("ijmaʿ"). These legal regulations were worked up systematically, and furnished material for the activity of those theological schools in which was developed the Mohammedan law that to-day is still recognized as authoritative.

The study of law is one of the most important of Mohammedan sciences, "fiḳh" (lit. "reasonableness" = "juris prudentia"; Hebr. "ḥokmah"). Its students are the "fuḳaha" (sing. "faḳih"; *i.e.*, "prudentes" = "ḥakamim"). On the development of this science Roman and Talmudic law, especially the former, has exercised a great influence. The studies of the oldest law schools have led to different results in the regulation of many details of the law according to the varying application of the data and of the fundamental principles. Hence arose the differences in the ritualistic practises and in the verdicts of the various legal sects ("madhahib") of Islam. Many of these sects have since disappeared; but the Hanafites, the Shafiites, the Malikites, and the Hanfalites have survived to the present day, and are distributed over large tracts of the extensive Islamic world.

Sects.

By far the largest sect is that of the Hanafites, founded in the school of the Imam Abu Ḥanifah (d. 150 A.H. = 767 C.E.); it predominates in Turkey, in middle Asia, and in India. The Shafiites, named after the Imam Al-Shafi'i (d. 204 = 819), prevail in Egypt, southern Arabia, the Dutch colonies, and in German East-African territory. The Malikites, named after Malik ibn Anas, the great Imam of Medina (d. 179 = 795), include those who profess Islam in northern Africa and some in Upper Egypt. The Hanbalites, distinguished for their rigor and intolerance, and for a strict adherence to tradition, are named after the Imam Aḥmad ibn Ḥanbal (d. 241 = 855). This sect suffered a serious decline after the fifteenth century; but it revived in the eighteenth century in the Wahabite movement of central Arabia, where the general adoption of its point of view led to the foundation of the Wahabitic dynasty. These four sects stand on the common basis of the sunna.

The Mohammedan schismatic movement was in origin not religious, but political. Its central point is the question as to the rightful successor to the prophet in the government of the Islamic community. While the Sunnites recognize the right of election to the califate, the Shiites refuse to accept the historical facts, and recognize as legitimate rulers and successors ("khalifah") to the prophet only his direct blood relations and descendants in the line of his daughter Fatima, the wife of Ali. But they are again divided among themselves according to which branch of the prophet's descendants they recognize. The Shiitic High Church, represented by the sect of the Ithna-'ashariyyah (= "Twelvers"), also called "Imamites," derive the legitimate succession in the califate (they prefer the term "Imam" to "Khalifah") from Ali, and transmit it from father to son until the twelfth Imam, Mohammed b. Ḥasan al-'Askari. This Mohammed is said to have disappeared mysteriously in the year 266 A.H. (= 879 C.E.), when he was but eight years old; and the "Twelvers" hold that since then he has lived in concealment, and will appear again at the last day as Imam Mahdi. Another branch of the Shiites, the so-called "Isma'iliyyah," known in history as "the Fatimites," founded a dynasty which was powerful for some time in North Africa and in Egypt (909–1171 C.E.). As a result of the veneration paid by the Shiites to the family of Ali and Fatima (belief in the infallibility of the Imams is obligatory on all Shiites), doctrines of incarnation have sprung up within these sects, which join to the theory of the legitimate imamate the belief that the possessor of this dignity becomes superhuman; and this belief is even carried to the point of recognizing the existence of "God-men."

The Gnostic teachings that have developed in Islam have exercised an influence on its cosmogonic and emanational theories, plainly evidencing the effect of Babylonian and Parsee ideas. To this day the stunted remains of these old tendencies survive in the Druses, Noṣairians, and the other sects scattered through Persia and Syria; and the history of Islam as well as a not inconsiderable literature bears testimony to the extent of their influence (comp. Dussaud, "Histoire et Religion des Noṣairis," Paris, 1900; Seybold, "Die Drusenschrift 'Das Buch der Punkte und Kreise,'" Tübingen, 1902). An acquaintance with the dogmatic movement in Islam and with the sects that have proceeded from it is of great importance for the study of the history of religious philosophy in Judaism, and of its expression in the Jewish literature of the Middle Ages. As early as the second century of Islam, through the influence of Greek philosophy a rationalistic reaction took place in Syria and Mesopotamia against a literal acceptance of several conceptions of orthodox belief.

Liberal Movement in Islam.

This reaction touched especially upon the definition of the attributes of God, the doctrine of revelation, and the conceptions of free will and fatalism. While the strictly orthodox party, represented for the greater part by the followers of Ibn Ḥanbal (see above), clung in all questions to a literal interpretation of the Koran and tradition, the Motazilites introduced a more reasonable religious view, one more in keeping with the essence of monotheism (see Arabic Philosophy).

Its Spread.

Wholly without parallel in the history of the world was the rapid and victorious spread of Islam, within scarcely a century after the death of its founder, beyond the boundaries of Arabia, over Asia Minor, Syria, Persia, middle Asia to the borders of China, the whole coast of North Africa (ancient Mauritania and Numidia), and Europe as far as Spain. It subdued the Sudan as well as India; it flooded the Malayan islands; and it has not yet finished its propaganda among the negroes of Africa, where it is steadily gaining ground. Starting from Zanzibar, it has spread to Mozambique, to the Portuguese colonies on the coast, to the negro tribes of South Africa, and it has even penetrated Madagascar. Islam is represented in America also, in some of the negroes who have immigrated to the western hemisphere. The slight Islamic propaganda of modern times among the Christians of North America is a peculiar one. It finds its expression in an English-Mohammedan service, in an Islamic literature, as well as in a newspaper ("The Moslem World"). In England, also, a Mohammedan community has recently been founded (Quilliam; comp. "Islam in America," New York, 1893).

The total number of professors of the Mohammedan faith in the world has been variously estimated. Two computations of modern times should especially be mentioned: that of the Mohammedan scholar Rouhi al-Khalidi, who gives the total number as 282,225,420 ("Revue de l'Islam," 1897, No. 21), and that of Hubert Jansen ("Verbreitung des Islams," etc., Friedrichshagen, 1897), whose estimate, in round numbers, is 260,000,000.

Relation to Judaism: In connection with the general sketch given above it is of especial importance from the Jewish standpoint to note the relations between Jews and Mohammedans.

In the Koran many a harsh word is spoken against the Jews, probably as the immediate effect of the difficulties which people in Arabia offered to the fulfilment of Mohammed's hopes and of the obstinate refusal with which they met his appeal to them. They are characterized as those upon whom "God's anger rests" (suras v. 65, lviii. 15, and, according to the traditional exegesis of Mohammedans, i. 7). They are taxed with having a special hatred for the faithful (v. 85); hence friendships with them should not be formed (v. 56). This sentiment is presupposed to a still greater degree in the old ḥadith. It was a general conviction that the Jew who seems to salute a Moslem with the usual salaam greeting, instead of saying the word "salam" (health) says "sam" (death), which has a similar sound. One instance of this is related as having taken place even as early as the time of the prophet (Bukhari, "Isti'dhan," No. 22; *idem*, "Da'awat," No. 56). "Never is a Jew alone with a Moslem without planning how he may kill him" (Jaḥiẓ, "Bayan," i. 165). In this way a fanatical rage against the Jews was infused into the minds of the Mohammedans. On the last day the faithful will battle with the Jews, whereupon the stones will say to the believers: "Behind me lurks a Jew, oh Moslem! Strike him dead!" (Musnad Aḥmad, ii. 122, 131, 149; Bukhari, "Jihad," No. 93).

Treatment of Jews.

But, in spite of the continuance of this malevolent disposition in single cases, one gathers from the old literature of Islam the general impression that after the foundation of the Mohammedan community a milder sentiment in respect to the Jews was introduced. Even Mohammed had already proclaimed toleration of the "Ahl al-Kitab" in consideration of their paying a certain tax ("jizyah") into the state treasury; although, to be sure, a certain humiliation for the unbelievers attached to the collection of this tax (sura ix. 29). In the following generation, under the calif Omar, the details were fixed for the execution of this general law. One might say that side by side with the harshness shown by Mohammed and Omar toward the Jews settled in Arabia itself (they were, in fact, all driven out), there existed a more tolerant disposition toward those who were brought under the Mohammedan yoke through the extensive conquests of Islam. This disposition is expressed in many old ḥadiths, of which the following may serve as an illustration: "Whoever wrongs a Christian or a Jew, against him shall I myself appear as accuser on the Judgment Day." A number of current decrees emphasize the duties toward the "mu'ahad" (those with whom a compact has been made to protect them), or the "dhimmi" (those recommended to protection)—such are the names given to the professors of other faiths who are granted protection—and whenever mention is made of protection of the "persecuted," the commentators never omit to add that this is obligatory in regard to Moslems and also in regard to the "ahl al-dimmah." It is probable that the influence of the old Arabic conception of the duty of caring for whomsoever the tribe had taken under its protection is to be seen here; according to that conception, difference in religion was not sufficient ground for making an exception (an example of this may be found in "Kitab al-'Aghani," xi. 91). In the instructions which Omar gave to the generals as they set forth to spread the supremacy of Islam by the power of the sword, and to the officials to whom he entrusted the administration of the conquered lands, the injunction to respect and guard the religious institutions of the inhabitants of such lands who profess other faiths often occurs; *e.g.*, in the directions given to Mu'adh ibn Jabal for Yemen, that no Jew be disturbed in the exercise of his faith ("Baladhuri," ed. De Goeje, p. 71). Omar likewise directed that some of the money and food due to the poor from public revenues be given to non-Moslems (*ib.* p. 129). Characteristic of this attitude toward the Jew is a story—somewhat fabulous, it is true—told of a house in Busrah. When Omar's governor in this conquered city desired to build a mosque, the site of a Jew's house appeared to him to be suitable for the purpose. In spite of the objections of the owner, he had the dwelling torn down, and built the mosque in its place. The outraged Jew went to Medina to tell his grievance to Omar, whom he found wandering among the graves, poorly clad and lost in pious meditation. When the calif had heard his complaint, anxious to avoid delay and having no parchment with him, he picked up the jaw-bone of an ass and wrote on it an urgent command to the governor to tear down his mosque and rebuild the house of the Jew. This spot was still called "the house of the Jew" up to modern times (Porter, "Five Years in Damascus," 2d ed., p. 235, London, 1870). To Omar, however, is likewise ascribed the origin of a pact ("'ahd 'Omar"; see OMAR) whose provisions were very severe.

Pact of Omar.

Whatever may be true as to the genuineness of these "pacts" (see in this connection De Goeje, "Mémoire sur la Conquête de la Syrie," p. 142, Leyden, 1900; T. W. Arnold, "The Preaching of Islam," p. 52), it is certain that not until the science of Mohammedan law had reached its full development in the Fiḳh school and the canonical law had been definitely codified after the second century of the Hegira, was the interconfessional law definitely established. A chapter dealing with the social and legal position of those "possessing Scriptures" may be found in every Mohammedan legal code. There is a regular gradation in respect to the degree of tolerance granted by the various legal sects ("madhahib"). On the whole, the attempt was made in these codes to adhere in theory to the original fundamental laws. The adherence was modified, however, by a certain amount of increased rigor, corresponding to the public feeling of the age in which the codes came into existence—that of the Abbassids. The most intolerant were the followers of Aḥmad ibn Ḥanbal. The codification of the laws in question has been given in detail by Goldziher in "Monatsschrift," 1880, pp. 302-308.

The different tendencies in the codifications are shown in divergences in the decrees attributed to the prophet. While one reads, "Whoever does violence to a dhimmi who has paid his jizyah and evidenced his submission—his enemy I am" ("Usd al-Ghaba," iii. 133), people with fanatical views have put into the mouth of the prophet such words as these: "Whoever shows a friendly face to a dhimmi is like one who deals me a blow in the side" (Ibn Ḥajar al-Haitami, "Fatawi Ḥadithiyyah," p. 118, Cairo, 1307). Or: "The angel Gabriel met the prophet on one occasion, whereupon the latter wished to take his hand. Gabriel, however, drew back, saying: 'Thou hast but just now touched the hand of a Jew.' The prophet was required to make his ablutions before he was allowed to take the angel's hand" (Dhahabi, "Mizan al-I'tidal," ii. 232, 275). These and similar sayings, however, were repudiated by the Mohammedan ḥadith-critics themselves as false and spurious. They betray the fanatical spirit of the circle in which they originated. Official Islam has even tried to turn away from Jews and Christians the point of whatever malicious maxims have been handed down from ancient times. An old saying in regard to infidels reads: "If ye meet them in the way, speak not to them and crowd them to the wall." When Suhail, who relates this saying of the prophet, was asked whether Jews and Christians were intended, he answered that this command referred to the heathen ("mushrikin"; "Musnad Aḥmad," ii. 262).

Anti-Jewish Traditions.

Under the dominion of the Ommiads the followers of other religious faiths were little disturbed, since it was not in keeping with the worldly policy of those rulers to favor the tendencies of fanatical zealots. Omar II. (717-720) was the only one of this worldly-wise dynasty who trenched upon the equal privileges of unbelievers; and he was under the pietistic influence. Intolerance of infidels and a limitation of their freedom were first made a part of the law during the rule of the Abbassids (see Abbassid Califs), who, to bring about the ruin of their predecessors, had supported theocratic views and granted great influence to the representatives of intolerant creeds (comp. "Z. D. M. G." xxxviii. 679; "R. E. J." xxx. 6). Under them also the law was introduced compelling Jews to be distinguished by their clothing ("ghiyar"; Abu Yusuf, "Kitab al-Kharaj," pp. 72-73, Bulak, 1302). At a later period such distinguishing marks became frequent in the Mohammedan kingdoms, especially in North Africa, where the badge was known as "shaklah" (Fagnan, "Chroniques des Almohades et des Hafçides Attribué à Zerkechi," p. 19, Constantine, 1895).

Influence of Judaism on Islam.

The debt of Islam to Judaism is not limited to the laws, institutions, doctrines, and traditions which Mohammed himself borrowed from the Jews and incorporated in his revelations (see Koran). For its later development, also, Islam made use of much material presented to its teachers through direct association with Jews, through the influence of converted Jews, and through contact with the surrounding Jewish life. Many a Jewish tradition has thus crept into Islam and taken an important place there. It is related that 'Ayisha, the wife of the prophet, owned to having received the idea of the torments of the grave ("'adhab al-ḳabr" = Hebr. "ḥibbuṭ ha-ḳeber") from Jewish women, and that Mohammed incorporated it in his teaching. Other eschatological details of Judaism served to embellish the original material, much of which goes back to Parsee sources (*e.g.*, the leviathan and "shor ha-bar" as food = preserved wine as a drink in paradise; the "luz" = "'ujb" out of which men's bodies will be reconstructed at the resurrection, etc.; see Eschatology). From the very beginning Jews versed in the Scriptures ("ḥabr" [plural, "aḥbar"] = Hebr. "ḥaber") became of great importance in providing such details; and it was from the information thus supplied that the meager skeleton of the teachings of the Koran was built up and clothed.

These aḥbar hold an important position also as sources for information concerning Islam. It will be sufficient here to refer to the many teachings in the first two centuries of Islam which are recorded under the names Ka'b al-Aḥbar (d. 654) and Wahb ibn Munabbih (d. *circa* 731). In the first place, Islam owes to this source its elaborations of Biblical legends; many of these elaborations are incorporated in the canonical ḥadith works, and still more in the historical books (*e.g.*, Ṭabari, vol. i.); and they early developed into an important special literature, a compilation of which is found in a work by Tha'labi (d. 1036) dealing exhaustively with these subjects and entitled "'Ara'is al-Majalis" (frequently printed in Cairo). Here belong the many tales current in Islamic legendary literature under the name "Isra-'iliyyat" (= "Jewish narratives"; comp. "R. E. J." xliv. 63 *et seq.*). According to the researches of F. Perles and Victor Chauvin, a large number of the tales in the "Thousand and One Nights" go back to such Jewish sources (see Arabian Nights).

The system of genealogy, so important among the Arabs, connecting early Arabian history with that of the Biblical patriarchs, also goes back to Jewish sources. In particular a Jewish scholar of Palmyra is mentioned who adapted the genealogical tables of the Bible to the demands of Arabic genealogy (comp. references in Goldziher, "Muhammedanische Studien," i. 178, note 2). It was likewise such Jewish converts who offered the material for certain theories hostile to Judaism; for example, the view, not generally accepted by Mohammedans (*ib.* i. 145), but which is nevertheless very widely spread, that it was Ishmael, not Isaac, who was consecrated as a sacrifice ("dhabiḥ") to God, originates from the teaching of a crafty convert who wished to ingratiate himself with his new associates (Ṭabari, i. 299).

Influence of Jewish on Mohammedan Law.

Islam in the course of its development borrowed also a large number of legal precepts from the Jewish Halakah. The importance attached to the "niyyah" (= "intentio") in the practise of law is at first glance reminiscent of the rabbinical teaching concerning "kawwanah," even though all the details do not coincide. The Mohammedan regulations appertaining to slaughtering, those relating to the personal qualifications of the "shoḥeṭ" (Arabic, "dhabiḥ") as well as those in regard to the details of slaughtering, show plainly the influence of the Jewish Halakah, as a glance into the codes themselves will prove. These are easily accessible, in the original as well as in European translations (Nawawi, "Minhag al-Ṭalibin," ed. Van den Berg, iii. 297, Batavia, 1882–84; "Fatḥ al-Ḳarib," edited by the same, pp. 631 *et seq.*, Leyden, 1894; Tornaw, "Das Muslimische Recht," p. 228, Leipsic, 1855). For example, the Mohammedan law in regard to slaughtering ordains expressly that the "ḥulḳum" (Hebr. "ḳaneh") and the "mari'" (Hebr. "weshet") must be severed, and forbids killing in any other manner. On the other hand, the law, peculiar to Islam, that the slaughterer in the performance of his duty must turn the animal toward the "ḳiblah," has given material for halakic reflections on the part of Jews (Solomon ben Adret, Responsa, No. 345; "Bet Yosef," on Ṭur Yoreh De'ah iv., end). The rule that God's name be mentioned before slaughtering is probably a reflection of the Jewish benediction, as are also in general the eulogies ordained by Islamic tradition at the appearance of certain natural phenomena (Nawawi, "Adhkar," p. 79, Cairo, 1312), which may be traced back to the influence of Jewish customs. Mohammedan law has adopted literally the provision "ka-makḥol ba-shepoperet" in the case of the precept concerning adultery, and it betrays its source through this characteristic form of speech ("R. E. J." xxviii. 79), which is not the only one that teachers of Islam have taken over from rabbinical linguistic usage (*ib.* xliii. 5).

The attempt has been made by Alfred von Kremer ("Culturgesch. des Orients Unter den Chalifen," i. 525, 535) to show by many examples that the codifiers of Mohammedan civil law were influenced by Talmudic-rabbinical law. There is, however, legitimate doubt in the case of many of such coincidences whether Roman law, the influence of which on the development of Mohammedan law is beyond question, should not be considered as the direct source from which Islamic teachers borrowed. Such a question must arise from a consideration of the legal principle of the "istiṣḥab" (= "præsumptio"), the meaning and application of which coincide fully with that of the rabbinical principle of the חזקה קמייתא ("Wiener Zeitschrift für die Kunde des Morgenlandes," i. 239). Likewise the rules אין לו לדיין אלא מה שעיניו רואות and אין ספק מוציא מידי ודאי, and the fundamental principle of the תקון העולם ("istiṣlaḥ") are found literally among the cardinal juridical principles of Islamic law (*ib.* p. 229; "Muhammedanische Studien," ii. 82, No. 6). In spite of the fact that it is a principle of Islamic tradition to avoid all imitation of the usages and customs of the ahl al-Kitab and that the disapproval of many usages of religious as well as of secular life is specifically ascribed to such a cause ("R. E. J." xxviii. 77), still many religious practises of Judaism have been incorporated into Islam; for example, many details in the ceremony of burying the dead, as "ṭaharah" (washing the dead), holy texts being recited during the washing of the various parts of the body (Al-'Abdari, "Madkhal," iii. 12, Alexandria, 1293). Such intrusive customs are not seldom censured by the purists of Islam as being "bid'a" (unorthodox innovations), in opposition to the "Sunnah" (old orthodox usage). Those elements of Mohammedan religious literature which correspond to the Jewish Haggadah offer a large field for derivation; in this connection see Hadith.

Islam is regarded by Mohammedans, as may be easily conceived, not only as the final stage of the divine revelation, but also as being quantitatively richer than either Judaism or Christianity. More ethical demands are made by it than by the older religions. This idea found expression in an old ḥadith which even at a very early period was misinterpreted to read: "Judaism has 71, Christianity 72, and Islam 73 sects." The word which was taken to mean "sects" denotes literally "branches," and should be interpreted "religious demands," "the highest of which is the acknowledgment of God and Mohammed, and the lowest the removal of offense from the way" (on the original meaning of this saying see Goldziher, "Le Dénombrement des Sectes Mohametanes," in "Revue de l'Histoire des Religions," xxvi. 129–137).

Polemics.

The theological relation of Islam to Judaism is presented in an extensive polemical literature on the part of Mohammedan scholars. The subject-matter of this literature is closely related to the attacks and accusations already directed against Judaism by the Koran and the ḥadith. In the Koran (ix. 30) the Jews are charged with worshiping Ezra ("'Uzair") as the son of God—a malevolent metaphor for the great respect which was paid by the Jews to the memory of Ezra as the restorer of the Law, and from which the Ezra legends of apocryphal literature (II Esd. xxxiv. 37–49) originated (as to how they developed in Mohammedan legends see Damiri, "Ḥayat al-Ḥayawan," i. 304–305). It is hard to bring into harmony with this the fact, related by Jacob Saphir ("Eben Sappir," i. 99), that the Jews of South Arabia have a pronounced aversion for the memory of Ezra, and even exclude his name from their category of proper names.

More clearly still does this literature bring forward an accusation, founded on suras ii. 70, v. 15, that the Jews had falsified certain portions of the Holy Scriptures and concealed others (iii. 64, vi. 91). Even in Mohammed's time the rabbis were said to have misrepresented to the prophet the law in regard to adulterers ("R. E. J." xxviii. 79). In later times the details as to these falsifications were continually augmented. It was said, for example, that in order to rob the Arabs of an honor done to their ancestors the Jews wrongly inserted in the Pentateuch the choice of Isaac as the child whose sacrifice God demanded of Abraham and which the patriarch was willing to make, whereas in reality it was Ishmael (comp. "Muhammedanische Studien," i. 145, note 5). But the accusation of misrepresentation and concealment is most emphatic in connection with those passages of the Pentateuch, the Prophets, and the Psalms in which the adherents of Islam claim that Mohammed's name and attributes, his future appearance as "seal of the prophets," and his mission to all mankind were predicted.

Mohammedan theologians divide these charges into two classes: they hold (1) that in some cases the original text itself has been falsified, while (2) in others it is the interpretation of a genuine text that has been wilfully perverted. Whereas in the earlier period of the controversy these accusations were made against the "aḥbar" as a class, who were represented as leading the Jewish people astray, later on the personal nature of the charge was accentuated, and the fault ascribed to Ezra "the writer" ("al-warraḳ"), who in his restoration of the forgotten writings was said to have falsified them ("Z. D. M. G." xxxii. 370). Abraham ibn Daud ("Emunah Ramah," p. 79) combats this accusation. According to tradition, Ibn Ḳutaiba (d. 276 A.H. = 889 C.E.) was the first to bring together the Biblical passages supposed to refer to the sending of Mohammed. His enumeration of them has been preserved in a work by Ibn al-Jauzi (12th cent.), from which it has been published in the Arabic text by Brockelmann ("Beiträge für Semitische Wortforschung," iii. 46–55; comp. Stade's "Zeitschrift," 1894, pp. 138–142). These passages recur with more or less completeness in the works of all Moslem apologists and controversialists (comp. the enumeration of the Biblical names of the prophet and the Biblical verses relating to him in "Z. D. M. G." xxxii. 374–379), and are usually combined with similar New Testament prophecies supposed to refer to him (Παράκλητος, confused with Περικλυτός, is taken to mean Mohammed). Of the Biblical names supposed to allude to Mohammed, Jewish apologists have been compelled most often to refute the identification of מאד מאד with the name of the prophet of Islam.

With this portion of the polemic directed against the Bible is often connected an exposition of the contradictions and incongruities in the Biblical narrative. The first to enter this field was the Spaniard Abu Mohammed ibn Ḥazm, a contemporary of Samuel ha-Nagid, with whom he was personally acquainted (see Bibliography below). He was the first important systematizer of this literature; and his attacks upon Judaism and its Scriptures are discussed by Solomon ben Adret in his "Ma'amar 'al Yishmael" (Schreiner, in "Z. D. M. G." xlviii. 39).

Restriction of Recognition of Islam.

One of the earliest points of controversy was the contention of the Jews that, although Mohammed was to be regarded as a national prophet, his mission was to the Arabs only or in general to peoples who had had as yet no revealed Scriptures ("ummiyin"; Kobak's "Jeschurun," ix. 24). In opposition to this, Mohammedan theologians and controversialists declared that Mohammed's divine mission was universal, hence intended for the Jews also. Abu 'Isa Obadiah al-Iṣfahani, founder of the 'Isawites (middle of the 8th cent.), admitted that Mohammedanism as well as Christianity was entitled to recognize its founder as a prophet, whose mission was intended for "its people"; he thus recognized the relative truth of Islam in so far as its followers were concerned (Ḳirḳisani, ed. Harkavy, § 11).

The turning-point in this controversy was the question of abrogation of the divine laws, inasmuch as a general acceptance of Islam presupposed the abolition of the earlier divine revelations. Otherwise the abolition of the Sabbath law (see "Kaufmann Gedenkbuch," p. 100), of the dietary laws, and of other Biblical precepts and regulations given by God would lose all claim to validity. Consequently the Mohammedans, while maintaining the authority of the ancient prophets, had to demonstrate the provisional and temporary nature of such of the earlier divine laws abrogated by Mohammed as they did not claim to be out-and-out inventions. So much the more vigorously, therefore, did the Jewish dogmatists (Saadia, "Emunot we-De'ot," book iii.; Abraham ibn Daud, "Emunah Ramah," pp. 75 *et seq.*) oppose from a philosophical standpoint this view, which attacked the essential principles of the Jewish religion.

The anti-Jewish controversialists of Islam assumed as an established fact that the Jews were required to hold an anthropomorphic, corporeal conception of God ("tajsim," "tashbih"). Judaism is even held responsible for the anthropomorphic conceptions found in other confessions (see "Kaufmann Gedenkbuch," p. 100, note 1). The Biblical passages brought forward as proof (among the earliest of them is Gen. i. 26–27) are counted with those which it is claimed were falsified by the Jews. Besides the Biblical passages, references from the Talmud in which extremely anthropomorphic statements are made concerning God ("God prays, mourns," etc.) are also brought forward to support these charges. The material for the last-named class of attacks was probably furnished by the Karaites, who are treated respectfully by the Mohammedan controversialists, are characterized as standing closer to Islam, and in general are exalted at the expense of the Rabbinites.

Ibn Ḥazm extends the attack against the Jews to the rabbinical amplifications of the laws, to the "bonds and chains" with which the Jews have, with unjustifiable arbitrariness on the part of the Rabbis, been bound. Since the time of the Jewish apostate Samuel b. Yaḥya, the polemic has taken the form of satire, directed most often against the minutiæ of the precepts on slaughtering and on the order of procedure in connection with the "bedikat ha-re'ah." The same controversialist also began to criticize the text of certain prayers (which he cites in Hebrew) and to hold up the conduct of the Rabbis to ridicule. Later Islamic controversialists have copied extensively from this convert from Judaism.

ISLAMI, 'ABD AL-ḤAḲḲ AḲ-: Jewish convert to Islam; lived at Ceuta, Morocco, in the first half of the fourteenth century. He wrote an Arabic work against the Jews in which the passages that he quotes from the Bible are given in Hebrew, transliterated in Arabic characters. Manuscripts of it are in the British Museum.

Bibliography: Steinschneider, *Polemische Literatur*, p. 125; idem, *Die Arabische Literatur der Juden*, § 126.

ISLER, MEYER: German philologist; born Dec. 14, 1807, at Hamburg; died there Aug. 19, 1888; studied philology at the universities of Bonn and Berlin (Ph.D. 1830). Appointed registrar of the city library of Hamburg in 1832, he thenceforward remained identified with that institution, being appointed secretary in 1851, superintendent in 1873, and director in 1878. The last-named post he held until his retirement in 1883. He was actively interested in Jewish matters, and was one of the first to advocate (in the "Allg. Zeit. des Jud.") the establishment of rabbinical seminaries.

Isler was the author of "Quæstionum Hesiodiarum Specimen," Berlin, 1830; and he edited the following works: B. G. Niebuhr's "Vorträge über Römische Gesch." *ib.* 1846–48; the same author's "Vorträge über Alte Länder- und Völkerkunde," *ib.* 1851; "Excerpta ex P. Ovidii Nasonis Carminibus," Edinburgh, 1851; "Eclogæ Ovidianæ," Hamburg, 1853; "Verhandlungen der Fünfzehnten Versammlung Deutscher Philologen, Schulmänner, und Orientalisten zu Hamburg, 1–4 Oct., 1855," Hamburg, 1856; Gabriel Riesser's "Gesammelte Schriften," 4 vols., Frankfort-on-the-Main and Leipsic, 1867–68.

Bibliography: H. Schröder, *Lexikon der Hamburgischen Schriftsteller*, iii., Hamburg, 1857; *Hamburgischer Correspondent*, Aug. 21, 1888; Pökel, *Philologisches Schriftsteller-Lexikon*, 1882.

ISPAHAN: City in the district of Jabal, Persia, situated on the Zendarud. The Jews pretend to have founded Ispahan, saying that it was built by the captives whom Nebuchadnezzar transported thither after he had taken Jerusalem. This tradition is related not only by Moses of Chorene (iii., ch. xxxv.), but also by the Arabic geographers Ibn al-Faḳih (p. 261), Al-Iṣṭakhri (p. 198), Ibn Ḥauḳal (p. 261), Al-Muḳaddasi (p. 388), Yaḳut (i. 295, iv. 1045), and Abu al-Fida (p. 411), and by historians, *e.g.*, Ibn Khaldun (ed. Bulak, ii. 114). It is related that the Jews took with them earth and water from Jerusalem; that wherever they went they weighed the earth and the water of the place. Arrived at Ispahan, they encamped at a place which in Hebrew means "Encamp!" and there they found that the earth and the water weighed the same as those they had brought with them from Jerusalem.

Traditional Founding.

This colony was founded a mile or two east of Jayy, and was called "Al-Yahudiyyah"; the name "Jayy" being changed to "Shahristan" (= "the city"). Al-Yahudiyyah grew in importance and became the modern Ispahan; being twice as large as Shahristan (Al-Iṣṭakhri). Al-Muḳaddasi speaks in high terms of its merchants; and Manṣur ibn Badhan is reported to have said that the origin of all the rich merchant families of Ispahan would be found to be some idolater or Jew. The founding of the Jewish colony may have occurred in the third century under Sapor II.

Under Perozes (457–484) the Jewish community of Ispahan was accused of having killed and flayed two magi, and that monarch put to death half of the Jews of that city. He also had the Jewish children brought up in the temple of Horwom as fire-worshipers. About the middle of the tenth century the Buyyid king Rukn al-Daulah united the two towns of Jayy and Al-Yahudiyyah and resumed the ancient name of Ispahan.

During the first centuries after their establishment at Ispahan the Jews prospered greatly. Benjamin of Tudela (12th cent.) found in Ispahan about 15,000 Jews. Sar Shalom, rabbi of that city and of all other towns of the Persian empire, was promoted to that dignity by the prince of the captivity, who resided at Bagdad. Afterward the Jews suffered great violence at the hands of the viziers, especially under the Sufi dynasty, whose kings made Ispahan their residence. The Jews were the first upon whom the Moslems vented their ire. They were in constant terror, as the slightest incident served the vizier as a pretext to compel them either to embrace Islam or to leave the country. Chardin, who resided for some time at the court of Shah Abbas II., describes the misery in which the Jews of Ispahan lived. They were obliged to wear a special mark on their dress, to distinguish them from the believers. Their caps had to be of a different color from the Moslems'; and they were not allowed to wear cloth stockings. The Jews had at Ispahan one principal synagogue and several small ones. Chardin says that Shah

Persecution.

Abbas I. gave 400 francs to every Jewish male convert to Islam and 300 francs to every female convert. Shah Abbas II. repeated these offers. Babai (see Hamadan) describes at great length the persecutions which the Jews of Ispahan suffered under Shah Abbas I. and his successors; while Arakel of Tabriz, the Armenian historian, devotes a whole chapter to the persecutions under Shah Abbas II. Both Babai and Arakel narrate the tortures which the grand vizier Mohammed Bey inflicted upon the Jews.

Babai ascribes these persecutions to the theft of a costly poniard belonging to Shah Abbas II., which was stolen by his gardener and sold to two Jews. The thief was caught, and he identified the two Jews who had bought the jewels that had been removed from the weapon. The Jews strenuously denied their guilt; but Shah Abbas, being certain that they lied, ordered a general massacre of the Jews of the city. His vizier advised Shah Abbas to force the Jews to embrace Islam instead of killing them; the suggestion was adopted, and the vizier was authorized to use all possible means to secure this result.

Not succeeding by force, the vizier had recourse to stratagem: he endeavored to secure converts from Judaism by presents of money and other valuables. The first convert was Obadiah, the chief of the community, who was followed by several of the elders and by a great number of the poor, who were thus helped out of their pecuniary difficulties. During the civil wars at the beginning of the eighteenth century, the Jews of Ispahan were the first to suffer at the hands of the conquerors. But no persecution equaled that which they suffered under Fatḥ Ali Shah (1798–1834). The Illiats (the Persian nomads) made constant irruptions into the Jewish quarter, violated the women, massacred the men, pillaged the houses, and broke to pieces what they could not carry away. After Fatḥ Ali Shah's death new riots broke out, in which about thirty Jews were killed and many more were wounded. Among the victims were Abba Nasi, the richest Jew in the community; Mulley Agha Baba, chief rabbi of Ispahan; and a Jewess named Kiskia. Further persecutions occurred under Naṣr al-Din Shah.

Benjamin II. found at Ispahan in 1850 about four hundred Jewish families, three synagogues, and eight rabbis or ḥakamim. He also made there the acquaintance of the vizier Ishmael, a Jewish convert to Islam, whose Hebrew name was Jekuthiel, and who, a poor workman's son, rose to high rank.

Babai records that the principal synagogue of Ispahan was called "Serah bat Asher." When the other synagogues of Ispahan were set on fire by Mirza Mas'udi under Shah Abbas II., Serah bat Asher escaped. This synagogue is still held in great veneration. The Jews make pilgrimages to it from all parts of the Persian empire; for there is a tradition that Serah, the daughter of Asher, was buried there. According to Confino, there are now in Ispahan about 6,500 Jews.

It was here that the false prophet Abu 'Isa or Mohammed ibn 'Isa al-Ispahani was born, from whom arose the Judæo-Persian sect Al-Ispahaniyyah, who are also called "Al-'Isawiyyah" or "'Isawites" (Biruni, p. 15; Shahrastani, transl. Haarbrucker, i. 254; Schreiner, in "Monatsschrift," xxxiv. 140; *idem*, in "R. E. J." xii. 259). It is curious to note that the Mohammedans believed that Antichrist would arise in this city, probably because of its large Jewish population (Ibn al-Faḳih, p. 268; Al-Muḳaddasi, p. 399; "Z. D. M. G." xlii. 596).

ISRAEL. See Jacob.

ISRAEL, KINGDOM OF: In the article People of Israel the history of the Northern Kingdom in its wider relations is briefly set forth; here the details will be more fully sketched. The history may be divided into four periods. The first was a period of confusion and semianarchy; the second, a time of national consolidation and heroic self-defense; the third, a period marked by extremes of misfortune and success; and the fourth, a term of humiliation by the Assyrians, ending in national extinction.

First Period.—Jeroboam I. to Omri (934-886 B.C.): The kingdom during this period was in the formative stage: it was, in fact, continuing the political experiences of the time of Saul. The territory of Israel outside of Judah and southern Benjamin had not been organized by David and Solomon except for purposes of taxation and statute labor. It was not a federation of tribes, but virtually a combination of districts, the region north of Esdraelon being especially loose in its attachment. The inhabitants of the territory called "Israel" had not before acted together except in rebellion against the house of David. The genius of David had placed Judah half a century ahead of the rest of the land, in both political and military affairs.

Dynastic Changes.

Accordingly in the inevitable wars with Judah, Israel was at first at a disadvantage. Its reverses increased the original confusion and discontent. The rule of Ephraim became unpopular; and Jeroboam's son Nadab (913) was slain by a usurper, Baasha of Issachar (911). The northern districts needed especial protection; for the Arameans of Damascus were beginning their fateful border attacks.

Baasha fixed his capital at Tirzah, nearer his own home, and made a treaty with Damascus. His measures of concentration enabled him to assert the natural superiority of northern Israel and to establish himself firmly on the border of Judah. With costly gifts King Asa of Judah induced the Arameans to break with Baasha, and to invade the territory of Israel. The result was the loss to Israel of fertile lands northwest and west of the Sea of Galilee, and the abandonment by Baasha of his southern vantage-ground. The dynasty of Baasha was soon overthrown. His son Elah (888) was slain in a military conspiracy; and after the downfall of two pretenders, Omri, the general of the army, was made king by his soldiers.

Policy and Success of Omri.

Second Period.—Omri to Jehu (886-842): Omri chose a new capital, Samaria, the strongest site for defense in central Palestine. Under him the fratricidal war with Judah was changed to friendship based on common interest; and Judah became a stanch ally, almost a vassal, of Israel. Alliance with Tyre was cemented by a marriage between Omri's son Ahab and Jezebel, the daughter of the Tyrian king. Gilead was held with a firm hand against Damascus on the north and against the Moabites on the south. But west of the Jordan the Arameans were still predominant; and Omri was forced to concede an open market to them in Samaria (I Kings xx. 34). Israel, now narrowing to Ephraim, Jezreel, and Gilead, was being consolidated.

Ahab (875) carried out strenuously his father's policy. His association with Tyre was of material but not of religious advantage to Israel. The cult of the Phenician Baal and Astarte could not be reconciled with the worship of Yhwh; besides, it ministered to lust and luxury. Ahab and Jezebel thus provoked the wrath of the prophet Elijah, whose crusade against the house of Omri was further inspired by Ahab's spoliation and murder of a freeholder of Jezreel. Yet Ahab was a valiant defender of Israel against the growing power of Damascus, with which he was almost constantly at war. On the whole, he was successful; and by the peace of Aphek (855) he revoked the concessions of his father (I Kings xx.). Next year he was actually to be found with Benhadad II. of Damascus as one of many allies fighting against the Assyrians, who under Shalmaneser II. were threatening Palestine as well as Syria. But in 853 war with Damascus broke out afresh. Ahab, who had Jehoshaphat of Judah as an ally, was slain in battle at Ramoth in Gilead.

Fall of the House of Omri.

Ahab's son Ahaziah sickened and died soon after his accession; and his place was taken by his brother Joram (853). The war with Damascus was prosecuted vigorously. Ahab's policy was continued, and Jezebel still promoted the worship of her Baal. The prophet Elisha, at the head of the partizans of Yhwh, now decided upon a coup d'état; and at his instigation Jehu, an officer of the army, rose against the royal house, put Joram and Jezebel to death, and carried out on his own account a murderous proscription against all their relatives as well as against the priests of the Baal.

Third Period.—Jehu to Menahem (842-741): Jehu, having cleared the way to the throne, found himself at once face to face with Hazael of Damascus, who a short while before had also made himself king by the assassination of his master. To secure himself Jehu sent many rich presents to Shalmaneser of Assyria. This, however, availed him nothing. The Assyrians had made frequent expeditions against Damascus, and thereby had greatly helped Israel—perhaps, indeed, had saved it from utter destruction; but after 839 Shalmaneser appeared no more in Syria, and Hazael had his way in Israel and Judah. Jehu's reign was thus made utterly inglorious; and his son Jehoahaz (815) was, if possible, still further reduced by the power of Damascus, so that the vassal state was allowed to maintain only a nominal guard of chariots and horsemen.

But deliverance was granted when most sorely needed. The Assyrians again came against Damascus after the death of Hazael (803); and under Joash (799), son of Jehoahaz, Israel gradually revived. In 797 Damascus was captured by the Assyrians, and for two generations remained innocuous. The Assyrians soon retired; and, freed from the double danger, Israel still further revived, till Jeroboam II. (783), son of Joash, brought it to a height of power and prosperity never before known. Indeed, for a time, the old ideal boundaries both east and west of the Jordan were maintained. But the glory was external and short-lived. The moral causes of decay are shown in the prophecies of Amos and Hosea. Jeroboam's son Zachariah (742) had scarcely begun to reign when a usurper, Shallum, put him to death, he in his turn being summarily disposed of by an army officer, Menahem.

Vassalage, Revolt, and Ruin.

Fourth Period.—Menahem to Hoshea (741-722): In the time of Menahem, Israel had at last to deal directly with the Assyrians, who under Tiglath-pileser III. were now beginning their final era of conquest. In 738 he bought them off for a thousand talents of silver. His reign was brief, and his son Pekahiah, after ruling little more than a year, was slain by his general Pekah (735). In 734 the Assyrians returned. To cope with them Pekah made an alliance with Damascus. The Assyrians annexed Galilee and Damascus, dethroned Pekah, and put an intriguer, Hoshea, in his place. Over the central remnant Hoshea reigned as an Assyrian vassal till in 724 he was incited to revolt by Egypt under the Ethiopian dynasty. Samaria was soon placed under siege, and at the end of 722 was taken. Of the little kingdom 27,290 people were deported, and it was made an Assyrian province.

Bibliography: See Israel.

E. G. H. J. F. McC.

ISRAEL, PEOPLE OF: In the Bible "Israel" is the national name of the people who are known racially as "Hebrews." In the tribal condition no comprehensive name was historically applied to the whole people. The story (Gen. xxxii. 24 *et seq.*) of the change of name from "Jacob" to "Israel" is in part a reflex of the historical fact of the union of the tribes and of their final triumph over the Canaanites.

Ultimate Babylonian Origin.

I. Origin of the People: Whether regarded politically or ethnologically, Israel must be considered a composite people. This appears both from the genealogical statements of the Bible and from recorded instances of racial amalgamation. It is not, however, easy to determine exactly all the racial elements of Israel; and the beginnings are involved in greatest obscurity. A primary Babylonian contribution is at least probable. The tradition that Abram as the founder of the race came from Ur of the Chaldees is meaningless if it is a mere geographical reference; and the fact that the Hebrews shared with the Babylonians their oldest literary reminiscences, such as characteristic forms of the Creation and the Flood stories, is apparently a confirmation of the tradition.

The more immediate Biblical tradition is to the effect that Israel was fundamentally Aramean; and this belief is not incompatible with partial Babylonian descent. The course of the earliest history was perhaps somewhat as follows: During the Babylonian domination of the west country—not later than about 1600 B.C.—a party of emigrants from the lower Euphrates came to the region about Charran, the seat of an old Babylonian colony. After a time certain families of them went farther to the west and south, settling in scattered bands both east and west of the Jordan. From these the Hebraic peoples, including the Hebrews proper, the Moabites, Ammonites, and Edomites, claimed descent. By the ancestors of the Hebrews proper the old affiliations were maintained for a time by Aramean accessions, so that later it could be said of Israel, "an Aramean nomad was thy father" (Deut. xxvi. 5, Hebr.).

II. Tribal History: There are thus given a few sturdy clans, the most prominent being marked off by their Aramean affiliations, forming settlements for themselves in Palestine and never wholly abandoning them, till by superior moral and physical energy they make good their claim to the possession of most of the country. By putting in most probable chronological order the substance of the patriarchal and tribal traditions and genealogical tables, and utilizing the scanty notices from outside sources, the following tentative outline history may be constructed:

Early Existence of the Tribes.

1. The Tribes Before the Exodus: Most, if not all, of the tribes of Israel had some kind of organic existence before 1200 B.C., the approximate date of the Exodus from Egypt, though they may not in all cases have then borne the names which have become historical. The scheme of the Twelve Tribes is a later construction, based in part upon genealogical data and in part upon geographical boundaries; yet this scheme is still the chief guide for determining the tribal distribution in the period preceding the invasion.

Division and Distribution of the Tribes.

The traditional classification of the tribes (Gen. xxx.) into the sons of Leah, the sons of Rachel, and the sons of their two maids is of essential historical value. The eldest four were the first to make an independent settlement in Canaan. Reuben was the first leader; but he early lost his preeminence, and made his permanent home across the Jordan. Simeon and Levi were almost destroyed in a feud with Canaanites of the region of Shechem, with whom they had made an alliance. The scattered remnants of Simeon were later absorbed by Judah. Whether Levi at length became rehabilitated in Israel as the priestly tribe is not quite certain (see Levites). Judah in these early days allied himself with Canaanites of the districts of Adullam and Timnath, and maintained his tribal existence in spite of many disasters (Gen. xxxviii.). Early and late Judah derived strength from the absorption of outsiders.

Some sort of settlement was also probably made by Issachar and Zebulun in the plain of Jezreel and northward before the return from Egypt, which would account for the prominence of these tribes so soon after that era (Judges v.) in those fertile and much-coveted regions. Joseph and Benjamin are of more relative consequence in Palestine after than before the sojourn in Egypt. In the earlier time the ambition and progress of the tribe of Joseph excited the jealousy of the other tribes, and it was compelled to migrate into Egypt, as was the fashion with many Asiatics during the eighteenth and nineteenth dynasties. Benjamin as a tribe in Canaan was perhaps non-existent till after the Egyptian era. The historical location of Gad, Asher, Dan, and Naphtali is suggestive of their predominantly foreign origin, which explains their being accounted as the sons of the maids of Leah and Rachel. As connected with Israel they were not prominent till the time of the general settlement. But in the Egyptian records of about 1300 B.C. a people called "Aseru" then occupied the territory later ascribed to Asher.

The question of a federation of any of the tribes is obscure. But there seems to have been an "Israel" in some sense in Canaan before the Exodus, for Me(r)neptah, son of Rameses II., refers to having devastated Israel in Canaan. No other supposed monumental allusion to Jacob or Joseph or the Hebrews can be used as yet for historical purposes.

2. The Egyptian Era and the Exodus: Meanwhile the people of Joseph prospered so greatly in Egypt that many families from kindred tribes migrated thither. But a change of policy under the kings of the nineteenth dynasty brought about a sore oppression of the Hebrews, so that their life there became intolerable. The great design of restoring them to Canaan was cherished by Moses, a Hebrew of Egyptian education, but at this time a fugitive in the peninsula of Sinai in consequence of active partizanship in the cause of his oppressed brethren. There he adopted the religion of his hosts, the Kenites, who were worshipers of Yhwh. He then returned to Egypt, induced his people to migrate with him, and effected a passage of an arm of the Red Sea when hard pressed by the pursuing Egyptians. After this deliverance it became easier for the fugitives to make the worship of Yhwh their own; and the new religious bond was strengthened by a prolonged visit to the seat of Yhwh, Mount Sinai. Of this religion Moses was the first priest, though the ministry was subsequently transferred to other hands. As civil leader and priest in one he was the supreme judge; and as the interpreter of the will of Yhwh he was the first and in a sense the greatest of the prophets. Law and justice, the rudiments of which were imparted by Moses to his people, were also of the essence of revelation.

Moses and Jahvism.

3. The Occupation of Palestine: The tribesmen of Joseph, now divided into two great clans, were naturally the head and front of the movement upon Palestine. Their main endeavor was to effect an

Settlement East of the Jordan.

entrance into "the hill country of Ephraim," where their kinsmen were most numerous. Attempts to reach this goal by the west and south were found to be hopeless; and after many long delays a détour was made around the land of Edom, a union being effected with the Israelitish population already east of the Jordan and their allies. The chief foes of all the Hebraic peoples of this time were the Amorites, who by the invasion of the newcomers were driven out of Gilead and the northern border of Moab, with the result that new Israelitish settlements were made in the region north and south of the Jabbok.

Settlement in Canaan Proper.

With these achievements the life and work of Moses were finished. His place was taken by Joshua, the representative of the dominant tribe of Ephraim. Under the new leadership the Jordan was crossed near Jericho (*c.* 1160 B.C.); and with the entrance into the central highlands, the old Israel already in Palestine and the new immigrants, endowed with the spirit of a world-conquering religion, made common cause in the gradual occupation of the land of promise and the realization of a national ideal. It is doubtful, however, whether there was any complete federation of the tribes before the era of the kingdom. For more than a century the settlement extended itself, partly through conquest, but chiefly through peaceful assimilation of the Canaanitish communities. Mainly because the Canaanites could maintain themselves in fortified cities a complete and speedy conquest of the whole country was out of the question (comp. Judges i.). Against the more numerous and wealthy but divided Canaanites the main advantage possessed by the Hebrews was common action over an extended area, inspired by land-hunger and by religious enthusiasm.

Fortunes of the Tribes.

At first aggression was naturally the chief factor. The occupation of the central hill country laid the foundation of the great settlement of the people of Joseph with Ephraim itself in the center, Manasseh (Machir) in the north, and the new tribe of Benjamin in the south. This territory was firmly held and long remained the kernel and defense of Israel. The other tribes adjusted themselves gradually to this primary condition. Those to the north, Issachar, Zebulun, and Naphtali, strengthened their hold upon the plain of Jezreel and beyond, and in an early stage of the general occupation (*c.* 1130 B.C.), by the help of Machir (Manasseh), Ephraim, and Benjamin (Judges v.), made good their claim against a desperate combination of northern Canaanites. The southern tribes, Judah, Simeon, and Dan, took little part in the distinctive work of securing Canaan for Israel. Yet Judah, virile and enterprising, continually enlarged itself from well-chosen centers, absorbing whole clans of outsiders, such as the Kenites and the Kenizzites, as well as the remnant of Simeon. Dan held a part of the Shephela by precarious tenure, first against the Canaanites, and later against the Philistines, till it was forced to migrate to the foot of Hermon, where it thenceforth remained inactive in the common affairs of Israel. In the northwest Asher was claimed for the people of YHWH (*ib.* v. 17), but was never assimilated. Gilead and Bashan became a home for emigrants, especially from the overcrowded territory of Manasseh; and Gilead actually became synonymous with Gad (*ib.*).

4. Period of the Judges: After centuries of military control Canaan had been relinquished by the Egyptians (*c.* 1170 B.C.) to become in large measure the possession of the Israelites. But the title of the new occupants was not to be undisputed. Successful raids, sometimes amounting to prolonged occupations, were made by Arameans (who came in large numbers over the Euphrates to replace the now almost extinct Hittite communities), by Moabites, by Midianites, and east of the Jordan by Ammonites. Only a portion of the country was attacked and despoiled by each of the invading hosts; and on each occasion a leader was raised up to deliver his people. The most serious incursion was that made by the Midianites, who (*c.* 1090 B.C.) struck into the center of Israel's territory by way of the possessions of Manasseh. After the repulse Gideon, the leader or "judge," was almost made a king by his tribesmen; and the lack of a common leadership was henceforth so strongly felt that it became only a question of time when a kingdom of Israel should be established.

The National Spirit.

The last and greatest of the judges was Samuel (*c.* 1030 B.C.). He was the first legitimate successor of Moses, as being an epoch-making priest, prophet, and judge in one. Moses had been the founder of Israel, in that he had imbued his people with the national spirit along with the religion of YHWH. But the idea of nationality was being rapidly obliterated by the disintegrating effect of agriculture upon a people primarily nomadic, by the establishment of individual families and septs in their own several holdings and districts, and by the inevitable adoption almost everywhere of Canaanitish customs, with separate city government and the worship of local deities (see BA'AL).

External influences seemed still more destructive. Most pressing of all immediate dangers was the growing power of the Philistines. They had (*c.* 1040 B.C.) repeatedly defeated the armies of Israel; they had destroyed the sacred city of Shiloh with its shrine; they had seized the chief strongholds of Ephraim and Benjamin; and they were now holding central Israel in vassalage.

III. The Kingdom.—**1. The United Kingdom:** Samuel now perceived that only a king could reclaim and unite Israel; and by him Saul, a wealthy landholder of Gibeah in Benjamin, was consecrated to the kingly office (*c.* 1030 B.C.). Saul's first achievement was of happy omen. The town of Jabesh in Gilead was under siege by the Ammonites, and claimed the protection of the western tribes. Saul fired the heart of Israel by proclaiming a holy war in behalf of this town. The rescue which followed gave heart to the despondent tributaries of the Philistines; and a series of brilliant victories, in which the crown prince, the noble Jonathan, took the lead, served to make Israel strong and united. Saul gathered about him men of force and promise, and gave them the command of chosen bodies of militia. Abner, the captain of the host, was a brave and skilful leader; and among the officers was a youth of genius, David, the son of Jesse of Beth-lehem in Judah, the first of that tribe to take an active part in the affairs of Israel. Jonathan and David became fast friends; and their alliance promised well for the redemption of their country.

Battle of Gilboa.

All went happily for a time. The Philistines, driven out from central Palestine, were kept at bay; and if Saul had been a statesman as well as a soldier the state might have been saved under his régime. But he lacked the gift of administration so essential to the building up of the nation. He also became moody and melancholy, and suspected a plot against him on the part of both David and Jonathan. David was compelled to flee from the court. He made himself the leader of a daring band of outlaws. Though often pursued by Saul, he would not retaliate. He became a nominal vassal of the King of Gath, but helped the Philistines as little, and his own men of Judah as much, as possible. The Philistines, unable to penetrate the western passes of Benjamin and Ephraim, marched northward, and struck at Israel from the plain of Jezreel. On a slope of Mount Gilboa the fateful battle was fought, in which Saul and three of his sons, Jonathan, Abinadab, and Melchishua, laid down their lives; and the Israelites once more became tributary to their terrible foes (*c.* 1000 B.C.).

David had laid for himself the foundation of a kingdom in his own separate tribe; and when Ishbaal (Ishbosheth), a surviving son of Saul, was proclaimed King of Israel by Abner, he (David) took up a royal residence in Hebron, where he reigned as King of Judah for some years, probably on good terms with his old allies the Philistines. The reign of Ishbaal was very brief; and he never possessed real authority west of the Jordan, his capital being at Mahanaim in Gilead. He was dethroned by his general after a quarrel; and Abner, when a few years of anarchy had passed, handed the kingdom over to David, who then received the allegiance of the elders of Israel (*c.* 995 B.C.).

King David.

David was the political creator of Israel. Before him there had been national aspirations, but never a united nation. He was the most commanding public figure in the history of Israel. Surpassed in the art of war by his general and near relative, Joab, to whom he owed most of his military success, he was unrivaled in his genius for statesmanship. His eventual comparative failure as a ruler was due to moral weaknesses and an overwrought emotional temperament.

His early achievements as King of Israel were the final expulsion of the Philistines from their garrisons in the central region; the capture of Jerusalem from the Canaanitish Jebusites, which he made his capital and the sacred city of YHWH, thus securing the alliance of the powerful and warlike Benjamin and the religious allegiance of all Israel; his establishment of an organized administration with permanent state officials; and the formation of a regular body-guard of trained soldiers as the nucleus of a standing army.

There soon began a period of foreign wars, which ended in the subjugation of the Moabites, Edomites, and Ammonites, besides the Arameans of southern and central Syria. Israel's suzerainty over all of these except the Arameans lasted till well into the reign of David's successor.

The kingdom proper was, however, not fully organized internally; and David's own crimes and follies came nearly rending it into fragments. Adultery with Bath-sheba, the wife of a faithful officer, and the murder of the husband were followed in the latter half of his reign by fatal dissensions among the children of his many wives, and finally by the open rebellion of Absalom, the heir to the throne. Through the fidelity of a few devoted friends David's safety was secured, and through the strategy of Joab, Absalom was defeated and slain. Local dissensions were once more outwardly healed, and the closing years of the great king's reign were passed in comparative tranquillity. A court intrigue at the close of David's days put an end to the pretensions and the life of the next heir, Adonijah, and thereby Solomon, son of Bath-sheba, succeeded to the throne (*c.* 965 B.C.).

Solomon.

Solomon's merits were fewer and his demerits more numerous than those of his father. He cultivated peace and friendship with his neighbors, developed trade and production, and organized the kingdom into administrative districts; and by the aid of workmen and materials brought from Phenicia, he erected the great Temple on Moriah along with a gorgeous palace for himself. On the other hand, he was sensual in his habits, and without religious depth or steadfastness. He impoverished the rest of the kingdom to build up Judah and Jerusalem, to repay his debts to the Phenicians, to maintain a splendid court, and to gratify his own luxurious and extravagant tastes. Before his reign was ended he had lost the allegiance of all the vassal states, and provoked an ominous discontent throughout northern Israel. His reign was the first epoch of Hebrew literary history; for then was made the oldest collection of epic ballads and of the traditions of tribal heroes.

2. The Divided Kingdom: At the death of Solomon (934 B.C.) his son Rehoboam claimed kingship over all Israel. But the discontent in the northern tribes showed itself at once in a great "folkmote" at Shechem. There they chose as their king Jeroboam, an Ephraimite who had been a fugitive in Egypt on account of an attempt at rebellion in the reign of Solomon. Benjamin, in whose territory were Jerusalem and the Temple, remained with Judah. Thus the ideal of a united Israel was shattered forever. Thenceforth for a time there were enmity and strife between north (Israel) and south (Judah); and though there came at length a longer period of almost unbroken peace, yet the hope of reunion was never again cherished.

Despite the popularity of Jeroboam's election, northern Israel was kept in a state of partial or total anarchy for half a century. To compete with the Temple at Jerusalem shrines were erected at Dan and at Beth-el, and strong fortresses were built up

The Northern Kingdom.

on both sides of the Jordan. But at first Israel was at a disadvantage as compared with Judah. The latter was small numerically, but it had a well-disciplined force of warriors along with the legitimate seat of government and worship. The real founder of the Northern Kingdom was Omri (886 B.C.), who built the strong fortress Samaria and made it his capital. Under his dynasty friendship was cultivated with both Judahites and Phenicians, and east of the Jordan strenuous war was waged with the rising power of Damascus. His successor, Ahab (875), continued his policy, but Joram, the son of Ahab, was overthrown and slain by the usurper Jehu.

The new dynasty suffered terribly at the hands of Damascus, but after that powerful state had been crushed by the Assyrians (797) Israel revived, and under Jeroboam II. (783–742) attained to the height of its power. Jeroboam's successors, however, had brief and unfortunate reigns until in 733 both Damascus and Samaria were captured by the Assyrians, who annexed the whole of Israel north of Jezreel. Hoshea, the vassal king in Samaria, rebelled in 724 at the instigation of the intriguing Ethiopian dynasty in Egypt, and his capital was taken after a siege lasting till the end of 722. Many of the people of the kingdom were exiled, and their places were taken by heathen colonists deported thither from Babylonia. Of internal matters the most important were the rise and influence of the preaching prophet Elijah (*c.* 870) and his school, and of the first great literary prophets, Amos (*c.* 760) and Hosea (*c.* 740).

The Southern Kingdom.

The kingdom of Judah, after its early successes against Israel, played a subordinate rôle for over a century. Its fiercest struggles—of varying success—were waged with the Edomites; and it continued to grow by the naturalization of outsiders to the south. Under Uzziah (783–738) it reached the height of its prosperity, having much of Philistine and Edomite territory under tribute. But in 734, under Ahaz (735–719), it became tributary to the Assyrians, who were then ravaging northern Palestine. Ahaz's son, Hezekiah (719–690), joined in an important revolt against Assyria in 701. The kingdom was laid waste; many inhabitants were deported; and Jerusalem was saved from capture only through the breaking out of a plague in the Assyrian army near the border of Egypt. Thenceforth almost till the fall of Nineveh (607) Judah continued an Assyrian vassal.

In 608 Palestine was traversed by an Egyptian force under Pharaoh-Necho; and the young king, Josiah (639–608), having marched out to give him battle, was defeated and slain. A brief Egyptian régime was terminated in 604 by the great Nebuchadnezzar of Babylon, who had succeeded to the fallen empire of Assyria. The Egyptians, expelled from Palestine, still kept intriguing, and Judah under Jehoiakim (608–597) was induced to rebel in 598. The next year the newly ascended king Jehoiachin was taken with his city and deported to Babylonia with many of his subjects, including the prophet Ezekiel. In 588 Judah again rebelled under Zedekiah (598–586). In 586 Jerusalem was taken, the king and many more of his people were deported, and the kingdom was finally abolished.

The Remnant in Palestine.

IV. The Babylonian Régime: Over the Judahites left in Palestine a governor of their own race, Gedaliah, was appointed. In a few years he was assassinated by an apostate named Ishmael. As a punishment for the murder a third deportation was made to Babylonia, while a band of fugitives, taking the aged prophet Jeremiah with them, made their way to Egypt and were heard of no more. A considerable number still remained in Palestine.

The exiles, as a whole, fared well in Babylonia. The bulk of the first or principal deportation was placed beside the Canal Chebar, not far from Nippur in central Babylonia. Here and elsewhere most of the captives were employed on public works, and many of all classes of the exiles eventually gained their freedom and rose to influential positions. Hence Babylonia furnished a strong moral and financial support to Judaism for many centuries. Here, also, the faith and religious devotion of Israel were renewed; the literature of the kingdom was studied, reedited, and adapted to the needs of the reviving community; and the hope of restoration to Palestine was preached and cherished. About 545 this aspiration took more definite form. Cyrus, King of Persia, had by that time attained to dominion over the whole uplands of Asia as far as the shores of the Ægean Sea, and it seemed to the seers of Israel (the second Isaiah and others) that the Semitic lowlands would soon fall to him also. As a matter of fact, the Babylonian empire became his possession when the city of Babylon surrendered to his army without resistance in July, 539.

The Restoration.

V. The Persian Dominion: Soon thereafter Cyrus issued a proclamation giving the Judahite and other exiles permission to return to their own lands. The Jews gladly seized the opportunity. A "prince" of the Davidic line, Sheshbazzar, with a large following, set out for Jerusalem in 538. The difficulties of resettlement were enormous, largely due to jealousy and intrigue on the part of the Samaritans and other peoples of Palestine. The foundation of a temple was laid; but it was not till 521, when Darius Hystaspes, the great patron of subject religions, gave further encouragement, that a decisive impulse was given by the exertions of Zerubbabel, a prince of the same royal line, supported by a contingent of new colonists. Through his agency along with that of Joshua the high priest, and the inspiring words of the prophets Haggai and Zechariah, the Temple was completed and dedicated in 516.

The Hebrew settlement was still little more than a struggling colony; and during the next two generations it showed a marked decline in religious earnestness and therefore in social and political weal. Separation from the heathen and semi-heathen peoples of the whole region was indispensable. But intermarriages with them were frequent; and with these alliances the practises of forbidden cults went hand in hand. A great reformation was now

Reforms of Ezra and Nehemiah.

brought about by Ezra, a priest and a scribe in Babylonia, who came to Jerusalem (458?), with authority from King Artaxerxes I., to reform the Jewish community. His efforts would have been of little avail if they had not been backed up by the powerful influence of Nehemiah, a Jewish cupbearer of Artaxerxes, who came with a royal escort and with a governor's commission to set right the affairs of his compatriots in Palestine.

Nehemiah, whose genius was eminently practical, rebuilt the walls of Jerusalem; forced the richer Jews to release the property mortgaged to them by their poorer brethren; forbade the taking of usury, the contracting of mixed marriages, and the profanation of the Sabbath. Ezra's greatest work was the more lasting, being nothing less than a new edition of the Law, which soon became the strongest pillar of Judaism. It was read before a great congregation in 444. A second visit of Nehemiah in 432 resulted in the vigorous carrying out of some of the most sorely needed reforms.

During the century that followed till 330 little is accurately known of the fortunes of the Jewish state. The people were homogeneous; and the result of the labors of Nehemiah and Ezra was seen in the fact that the religious purity of the community was maintained.

VI. The Hellenistic Era: The conquests of Alexander the Great brought Syria under Hellenistic influence, at first chiefly exercised by the Ptolemies of Egypt from Alexandria as a center (323–203), and later by Antiochus III. of Syria and his two successors, reigning in Antioch (203–165).

Rule of the Ptolemies.

What the Egypt of the Pharaohs had failed to do in Palestine, the Egypt of the Ptolemies in large measure accomplished. Not only was a political control established there, but a strong intellectual influence was exercised. Ptolemy Logi, who occupied Jerusalem in 320, took large numbers of Jews to Egypt as colonists and prospective citizens. Other Jews followed, strong in their loyalty to the Judaism established by Ezra: forerunners and types of faithful Jews ever since scattered throughout the world. The Jews prospered in Egypt; and Alexandria reacted upon Jerusalem in matters intellectual. The Egyptian capital became a center of Jewish learning; and the devoted Jews who resorted for worship to their Holy City familiarized the people of the home land with the enlarged outlook and knowledge of the world acquired in Egypt. Moreover, the first Greek translation of the Old Testament was made and used by Hellenistic Jews. On the whole, the Ptolemaic régime was a benefit to Judaism.

Seleucid Dominion.

In 203 Antiochus III. wrested Judea from Egypt. Under his second successor, Antiochus Epiphanes, the fatal epoch of worldliness and compromise with heathenism began with the success of his endeavor to corrupt the priesthood. His next step was to seize the Temple and profane it.

VII. The Maccabees: At this juncture a heroism worthy of the best days of Israel was displayed by the noble priest Mattathias of the Hasmonean family, who in 167 raised the standard of rebellion. Under his son and successor, Judas Maccabeus, Jerusalem was recovered, the Temple purified, and its worship restored (165). The rule of the Maccabees was finally established in Judea, and was maintained for a full century, till Syria became a Roman province.

ISRAEL: First "Hochmeister" (chief rabbi) of Germany; lived at the beginning of the fifteenth century. He was called to this office by a special edict of Rupert III., issued May 3, 1407. In this edict the emperor says that, in consequence of complaints made before him of maladministration of communal affairs by certain German rabbis, he has decided to create the office of "Hochmeister" to control all the German rabbinates; he named Israel as the first "Hochmeister" on account of his vast knowledge of Jewish lore, his oratorical talent, and his scrupulous honesty. The seat of the new chief rabbi seems to have been Nuremberg. Israel's authority, however, was contested, and in the same year (Nov. 23) Rupert issued a new edict, by which he imposed a fine of twenty gold marks upon any Jew or Jewess who should disobey the orders of the chief rabbi. Notwithstanding this, the German rabbis continued to maintain their opposition to Israel, whom they accused of having solicited his post from the emperor, and thereby given the government occasion to meddle in Jewish communal affairs; they also accused him of having been exacting in the levying of taxes in order to win the good graces of the emperor. See ISRAEL OF KREMS; HOCHMEISTER.

ISRAEL: An Eastern family of rabbis and authors whose members dwelt in Alexandria, Jerusalem, and Rhodes, where they held important positions. It included:

Abraham Israel: Rabbinical author; lived at Alexandria in the eighteenth century (see ISRAEL, ḤAYYIM ABRAHAM). His son was **Moses ben Abraham Israel,** who held the office of chief rabbi of Alexandria from 1784 to 1802.

Elijah Israel: Chief rabbi of Alexandria from 1773 to 1784. He wrote: "'Ugat Eliyahu" and "Ḳol Eliyahu," responsa; "Kisse Eliyahu," on the four Ṭurim; "Shene Eliyahu," sermons; "Aderet Eliyahu," commentary on Elijah Mizraḥi. He left two sons, Moses ben Elijah Israel and Jedidiah ISRAEL.

Judah Israel: Son of Moses ben Elijah Israel; chief rabbi of Rhodes; lived at the beginning of the nineteenth century. He was the author of "Ḳol Yehudah" and "Shebeṭ Yehudah."

Moses Israel: Rabbi at Jerusalem, and, from 1714 to 1727, chief rabbi of Rhodes. He was sent to Morocco as a collector by the city of Safed, before he removed to Rhodes; and he was sent to Italy in the same capacity by Jerusalem (1731). He was the author of "Mas'at Mosheh," responsa, Constantinople, 1735.

D. M. FR.

ISRAEL OF BAMBERG: Tosafist; flourished about the middle of the thirteenth century. He was a pupil of Samuel of Bamberg, to whose rabbinate he succeeded. Zunz ("Z. G." p. 40) supposes that Israel of Bamberg was the father of Jedidiah of Nuremberg, who flourished about 1270-80, and whose son Israel was killed at Bamberg in 1298, a time of persecution (Salfeld, "Martyrologium," p. 49). It is likely that Israel of Bamberg was also the father of Anna, killed at the same time (*ib.*). The tosafot of Israel of Bamberg are quoted by Mordecai (Shab. No. 296; 'Ab. Zarah Nos. 817, 833, 855). Benjacob ("Oẓar ha-Sefarim," p. 624) concluded that these tosafot are only to Alfasi and not to the text of the Talmud. Eckstein ("Gesch. der Juden im Ehemaligen Fürstenthum Bamberg," pp. 144-145) identifies Israel of Bamberg with Israel b. Uri Shraga, whose tosafot are also mentioned by Mordecai (Shab. No. 656); but Kohen (in "Monatsschrift," xxvii. 82) thinks they were two different persons.

S. S. M. SEL.

ISRAEL BRUNA BEN ḤAYYIM: German rabbi of the fifteenth century. He was at first rabbi of Brünn, and after the expulsion of the Jews from that city (1454) he settled at Ratisbon, where he opened a yeshibah against the wishes of Rabbi Anshel, who considered this an encroachment upon his rights. Israel Bruna was upheld by the leading rabbis of his time, *e.g.*, Jacob Weil and Israel Isserlein of Wiener-Neustadt, who spoke very highly of him. In 1474 he was thrown into prison on some charge—possibly one of ritual murder—brought against him by his enemies, and was held, most likely for blackmail. After having spent thirteen days in prison Israel was liberated. There is some confusion in regard to details, and some think that he was twice in prison. Israel Bruna wrote a volume of responsa (Salonica, 1798; Stettin, 1860).

D.

ISRAEL, EDWARD: American arctic explorer; born July 1, 1859, at Kalamazoo, Mich.; died May 27, 1884; educated at the University of Ann Arbor, Mich. He joined the Signal Corps of the United States Army and became a sergeant. In 1881 Israel volunteered for the Lady Franklin Bay Expedition, under the command of Gen. A. W. Greely, accompanying the expedition as astronomer (1881-84); in this expedition he made many valuable scientific observations. At times he commanded special sleigh parties. Although not physically robust, he often volunteered for geographical work; in 1882 he rendered especially important service in determining the practicability of an overland route to Hazen Land in Greenland through "The Bellows" valley. The amiability of his disposition endeared him to his comrades, and, being the youngest in the party, he was familiarly denominated "Benjamin." When ill and starving, he refused to accept more than an equal ration. Israel died before the return of the expedition. In reading the burial service, General Greely, remembering that Israel was of the Jewish faith, omitted such portions as were inappropriate.

ISRAEL, ḤAYYIM ABRAHAM: Italian rabbi of the eighteenth century; lived at Candia and Ancona. He wrote: (1) "Bet Abraham" (Leghorn, 1786), a casuistical commentary on the Ṭur Ḥoshen Mishpaṭ and on the "Bet Yosef" thereto (at the end of the volume is a treatise entitled "Ma'amar ha-Melek," on the laws of government); (2) "Amarot Ṭehorot" (*ib.* 1787), a similar commentary on the Ṭur Eben ha-'Ezer. Israel is quoted by Mattithiah Terni in his "Sefat Emet" (p. 73b, ed. Leghorn).

ISRAEL ISSERLEIN. See ISSERLEIN ISRAEL BEN PETHAHIAH ASHKENAZI.

ISRAEL, JACOB: Russian rabbi and author; flourished 1623-78. He is said to have been born in Temesvar, and to have been rabbi in Belzyce and Lublin; Fürst says in Slutsk also. He was a contemporary of Samuel (Aaron) Keidanover, and perished during the Chmielnicki persecutions (1648). The Bodleian manuscript No. 889 (Neubauer, "Cat. Bodl. Hebr. MSS." p. 212) contains some of his homilies on the Pentateuch, entitled "Tif'eret Yisrael." His more important work was the "Yalḳut Ḥadash," first printed at Lublin in 1648, then at Prague, 1657, Amsterdam, 1659, and with appendix "Tosafot Shikḥat Leḳeṭ" at Wilmersdorf, 1673. In later editions it is sometimes called "Yalḳut Yisraeli," after its author. The book was printed as an anonymous work. It contains a collection of midrashim arranged in alphabetical order, drawn not only from early midrashic works, but also from such cabalistic works as the Zohar, "Tiḳḳune Zohar," "Yonat Elem," "Galya Razaya," etc.

S. G.

ISRAEL, JAMES: German physician; born at Berlin Feb., 1848; M.D. Berlin, 1870. Settling in the German capital, he became in 1875 assistant surgeon at the Israelitish Hospital, and in 1880 chief surgeon. In 1894 he received the honorary title of professor.

Israel is a prolific writer, his essays and works numbering more than 100. Among these may be mentioned: "Klinische Beiträge zur Aktinomykose des Menschen," 1885; "Erfahrungen über Nervenchirurgie," Berlin, 1894; and "Statistische Uebersicht über 191 Nierenoperationen," in "Verhandlungen des Internationalen Kongress zu Moskau," 1897.

ISRAEL, JEDIDIAH: Rabbi at Alexandria, Egypt, from 1802 to 1827; died 1827; son of Israel Israel, who had held the rabbinate from 1773 to 1784. He was a disciple of Jonathan Galante, and presided over an academy at Alexandria which bore the name "Midrash Rab Yedidyah." He wrote several responsa, some of which have been published in the works of Rabbi Abbahu; also annotations to "Kisse Eliyahu" on the Shulḥan 'Aruk. His treatise "Mazkeret ha-Giṭṭin," on divorce, is still in manuscript.

ISRAEL BEN JEHIEL ASHKENAZI: Italian rabbi; lived at the end of the fifteenth and in the early part of the sixteenth century. He was corrector of the edition of the Talmud published in Pesaro 1511-13; and in 1518 he approved the first edition of Elijah Levita's "Ha-Baḥur" in Rome. Israel belonged to the board of Roman rabbis, and, it seems, excelled his two colleagues in Talmudical knowledge. Israel was highly respected in Rome, and in 1519 gave a decision on a legal question concerning Donina, the daughter of Samuel Ẓarfati. This decision still exists in manuscript ("Il Mose," v. 191, No. 40; 193, Nos. 102, 119). At an advanced age he emigrated to Palestine.

ISRAEL JOSHUA OF KUTNO: Russian-Polish rabbi; died at Kutno, in the government of Warsaw, July 11, 1893, at an advanced age. He studied in the yeshibah which was founded in the village of Kukhari by R. Solomon Posner about 1835. Israel Joshua and R. Ḥayyim Wasserzug (Filipower) were the most famous graduates from that institution, which was an adjunct to the agricultural colonies Posner had established on his estates. Israel Joshua occupied various small rabbinates up to 1860, when he became rabbi of Kutno, which he consistently refused to leave for larger rabbinates to which he was invited from time to time. By many he was considered the greatest Talmudical authority of Russian Poland. He was the author of "Yeshu'ot Yisrael," on Shulḥan 'Aruk, Ḥoshen Mishpaṭ (Warsaw, 1870), published by his son R. Moses of Viskitke, his successor in the rabbinate.

ISRAEL OF KREMS (according to Azulai, "Shem ha-Gedolim," ii., *s.v.* הגהות אשרי, and Michael, "Or ha-Ḥayyim," No. 1092, **Israel of Kremsier**): Austrian rabbi; flourished in the fourteenth and fifteenth centuries. He was the great-grandfather of Israel ben Pethahiah Isserlein, who quotes him in his commentary on Rashi to the Pentateuch, section "Wayeḥi." Israel was the author of "Haggahot Asheri," notes on R. Asher's Talmudic compendium, printed with the text. Grätz identifies Israel of Krems with the Israel whom Emperor Rupert appointed, by a decree of May 3, 1407, chief rabbi of all the German communities ("Hochmeister über alle Rabbinen"), giving him a certificate declaring him to be a great Talmudic scholar and a good man. But as Israel's functions included the civil control of the Jews, and especially the collection of the taxes, the German rabbis opposed his appointment. Some of them even threatened him with excommunication in case he did not resign. The emperor, upon hearing of this, confirmed Israel's appointment as chief rabbi by a second decree (Nov. 23, 1407), imposing a fine of twenty gold marks on any one refusing to submit to him. But the edicts had little effect, and the office of the chief rabbi became obsolete soon after its creation. No further mention of Israel occurs until 1415, when he is mentioned in a document of Emperor Sigismund, appointing him to superintend the collection of the Jewish taxes, in which office he was the subordinate of the hereditary chamberlain Conrad of Weinsberg.

ISRAEL BEN MEÏR: Printer and author; lived at Prague in the seventeenth and eighteenth centuries. He was the author of a work entitled "Hanhagot Yisrael," a treatise on the education of children, the first edition of which is anonymous (Frankfort-on-the-Oder, 1712). In the same year Israel established, or helped to establish, a printing business at Wilmersdorf; but his name, followed by the letters יר"ל, appears only on two works of 1712: the "Bet Abot" of Moses Heilburg and the Talmudic treatise Beẓah.

ISRAEL B. MOSES: Polish cabalist; lived at the end of the sixteenth century. He is known only through his book "Tamim Yaḥdaw," in which all verses of the Psalms and the Proverbs found in the Zohar are collected, with the explanations there given. The collection is preceded by a cabalistic treatise on the soul and a "baḳḳashah" by the compiler.

Bibliography: Benjacob, *Oẓar ha-Sefarim*; Zunz, *Literaturgesch.* p. 420.
k. P. B.

ISRAEL BEN MOSES HA-LEVI OF ZAMOSC: Galician scholar; born at Boberka at the beginning of the eighteenth century; died at Brody April, 1772. His father instructed him in Talmud and Hebrew literature; but Israel was more interested in philosophy and mathematics, which he eagerly studied from Hebrew sources. This love for science caused him to leave his native country for Germany in the hope of being able there to devote himself to his favorite studies. After having sojourned in many places, barely earning a livelihood by teaching, he settled in Berlin, becoming teacher of Talmud in the Talmud Torah of Veitel-Heine Ephraim. Among his disciples was Moses Mendelssohn, whom he instructed in mathematics and to whom he imparted his love for philosophy. Israel's sojourn in Berlin, however, was not a long one. Persecutions by the Orthodox rabbis forced him to seek another home, and he returned to Galicia, where he lived in great poverty. The last years of his life were spent at Brody.

Israel was the author of the following works: (1) "Neẓaḥ Yisrael," on the astronomical and geometrical passages in both Talmuds (Frankfort-on-the-Oder, 1741); (2) "Eben Yisrael," responsa; (3) "Arubbot ha-Shamayim," on ancient and modern astronomy (mentioned in his commentary on "Ḥobot ha-Lebabot"); (4) "Ṭob ha-Lebanon," commentary on "Ḥobot ha-Lebabot" (Vienna, 1809); (5) "Nezed ha-Dema'," moral tale in rimed prose (anon., Dyhernfurth, 1773); (6) "Perush," commentary on the "Ruaḥ Ḥen" of Jacob Anatoli (*ib.* 1744); (7) Commentary on the "Cuzari" (Vienna, 1797).

BIBLIOGRAPHY: Zunz, in Liebermann's *Volkskalender*, 1853, p. 69; Steinschneider, *Cat. Bodl.* col. 1169; Carmoly, in *Revue Orientale*, ii. 333.

D. I. BR.

ISRAEL, OSKAR: German physician; born at Stralsund Sept. 6, 1854; educated at the universities of Leipsic, Kiel, and Berlin (M.D. 1877). In 1878 he entered the pathological institute of his alma mater as assistant; in 1885 became first assistant; was admitted to the medical faculty in the same year as privat-docent; and in 1893 was appointed assistant professor.

Israel has written many essays in the medical journals, especially on pathology. He is the author of: "Practicum der Pathologischen Histologie," Berlin, 1888 (2d ed., 1898; translated into French by Letulle and Critzman); "Internationaler Beitrag zur Wissenschaftlichen Medizin," *ib.* 1891; "Elemente der Pathologischen Diagnose," *ib.* 1898.

ISRAEL SALANTE. See LIPKIN, ISRAEL.

ISRAEL BEN SAMUEL ASHKENAZI OF SHKLOV: Talmudic casuist; born at Shklov about 1770; died at Tiberias May 13, 1839. One of a group of Talmudical scholars of Shklov who were attracted to Wilna by Elijah Gaon (see ELIJAH BEN SOLOMON) (1720-97), Ashkenazi was one of "the last arrivals," and attended upon the gaon as a disciple for less than a year. He gained Elijah's confidence, and was chosen to arrange for publication the gaon's commentary to the first two parts of the Shulḥan 'Aruk. That on the Oraḥ Ḥayyim was published in Shklov in 1803. Ashkenazi also published his master's notes to the tractate Sheḳalim of the Jerusalem Talmud, with a commentary of his own, under the title "Tiḳlin Ḥadtin" (Minsk, 1812). Later he emigrated to Palestine and became the head of the German and Polish congregations of Safed and then of Jerusalem. He was there surnamed "Ashkenazi" (the German), a name applied to all Jews of German extraction, in contradistinction to the Sephardim, who came originally from Spain or Portugal.

After a residence of several years in the Holy Land, Ashkenazi went to Europe as a "sheliaḥ" (emissary of the rabbis), to collect alms for the poor Palestinian Jews; and in that capacity he traveled through Lithuania and other parts of Russia. On his return to Palestine he wrote his chief work, "Pe'at ha-Shulḥan," which is intended as a sort of supplement to the Shulḥan 'Aruk, supplying all the agricultural laws obligatory only in the Holy Land, omitted by Caro in his code. Israel also incorporated in this book the notes of Elijah Wilna to the tractate Zera'im, the first order of the Mishnah, and gave in addition a voluminous commentary of his own which he called "Bet Yisrael." The work was published in Safed in 1836 by the printing-house of Israel ben Abraham Back.

Ashkenazi is also the author of "Naḥalah u-Menuḥah," a collection of responsa mentioned in the work above. An account of his rabbinate of Jerusalem is given in Mendel ben Aaron's "Ḳore ha-'Ittim" (Wilna, 1840).

ISRAEL SAMUEL BEN SOLOMON: Polish Talmudic and halakic author of קלפארא. About 1620 he lived in Cracow. His father, a physician, was of Spanish origin. Israel wrote, about 1624: (1) A compendium of the "dinim" contained in the four parts of the Shulḥan 'Aruk, arranged in alphabetical order, under the title "Yismaḥ Yisrael" (Cracow, 1626; Hamburg, 1686). It contains likewise a mystical "teḥinnah." The work was also published in parts, with Jekuthiel Kaufmann ben Abigdor's commentaries, collectively entitled "Ḥuḳḳat ha-Torah," on Oraḥ Ḥayyim and Yoreh De'ah, Berlin, 1699-1700; on Eben ha-'Ezer, Dyhernfurth, 1693 (according to Benjacob); on Ḥoshen Mishpaṭ, *ib.* 1691 (according to Benjacob); and the four parts with the above-mentioned commentaries were printed as an entire work in Sudilkov, 1834. (2) "Tiḳḳun Shemirat Shabbat" (Frankfort-on-the-Oder, 1698; Offenbach, 1719), laws on Sabbath observance. (3) A large halakic work based upon the Talmud, the Tosafot, and the Poseḳim, in four parts, following the Shulḥan 'Aruk, under the respective titles "Ẓeror ha-Ḥayyim," "Orḥot Mishpaṭ," "'Eẓ ha-Da'at," "Magen 'Ezreka." (4) "Megalleh 'Amuḳot," a mystical commentary on the Pentateuch. (5) "Kerem Shelomoh," a commentary on Pirḳe Abot. (6) A treatise on difficult haggadic passages and midrashim. (7) Some other works which are cited in the introduction to his "Yismaḥ Yisrael," but have not been printed.

S. M. SC.

ISRAEL BEN SHABBETHAI OF KOZIENICE (also known as the **Maggid of Kozienice**): Ḥasidic rabbi, cabalist, and thaumaturge; born at Kozienice, government of Radom, Russian Poland, about 1745; died in 1815. Israel was successively a pupil of BAER OF MESERITZ, Samuel Shmelka Hurwitz, and Elimelech of Lezaysk. He was a great Talmudic scholar, and had many discussions on rabbinical matters with Phinehas ha-Levi Hurwitz, who inserted in his "Gib'at Pineḥas" some of Israel's responsa. The "Keter Kehunnah" of Isaac Abraham b. Dob Berush also contains one of his responsa (No. 76). After the death of Baer of Meseritz (1772), Israel became the leader of the Ḥasidim, and won numbers over to Ḥasidism. His renown as a wonder-worker was so great that even Christians believed in his supernatural powers and resorted to him for aid; while Jews were attracted to him from far and near. He left a large number of works, mostly cabalistic; the following have been published: notes to the "Sefer Raziel," printed with the text, Warsaw, 1812; "'Abodat Yisrael" (Jozefow, 1842), containing sermons, novellæ on Ḥullin, and notes on the Pentateuch, the Hafṭarot, the Pesaḥ Haggadah, and Pirḳe Abot; "Tehillot Yisrael," commentary on Psalms (1861?); "Or Yisrael," commentary on the "Tiḳḳune Zohar," Czernowitz, 1862; "Nezer Yisrael," commentary on the Zohar, *ib.* 1869; "Ner Yisrael," commentary on the "'Eser Sefirot," on Hai Gaon's "Liḳḳuṭim," and on Joseph Gikatilla's "Sha'ar ha-Shamayim"; "Bet Yisrael" and "Geburat Yisrael."

K. M. SEL.

ISRAEL BEN URI SHRAGA: German tosafist of the thirteenth century; died before 1298. Little is known of his life or of his family. He was a pupil of the tosafist Samuel of Bamberg, and, about 1250, was called to succeed his teacher as rabbi of Bamberg. His family perished during the persecution at the end of the century, after his death. His tosafot are often quoted as "Tosafot ha-Rab R. Israel."

S. S. A. PE.

ISRAEL OF VALABRÈGUE: French Talmudist of the first half of the fourteenth century. He lived apparently at Tarascon, and was among the small number of Jews that remained in France after the expulsion in 1306. Israel was a pupil of Immanuel of Tarascon, and is said to have written several works. Gross assumes that Rotelus of Olobrega, who lived at Tarascon in 1299, and is mentioned in a Latin document (Camille Arnaud, "Essai sur la Condition des Juifs en Provence," p. 22, Forcalquier, 1879), is identical with Israel, the name being a diminutive.

S. S. A. PE.

ISRAELI, ISAAC BEN JOSEPH (the Younger): Spanish astronomer; flourished at Toledo in the first half of the fourteenth century. He was a pupil of Asher ben Jehiel, at whose request (in 1310) he wrote the astronomical work "Yesod 'Olam," the best contribution on that subject to Hebrew literature. It treats of geometry and trigonometry as introductory to the subject-matter; of the structure and position of the globe; of the number and movements of the celestial spheres; of the time-differences in days and nights in the various parts of the earth; of the movements of sun and moon; of the solstices, the neomeniæ, the eclipses, and the leap-years; it contains as well astronomical tables and a perpetual calendar. It also deals (iv., § 17) with the chronological systems of other nations, especially Christian; and gives (iv., § 18) in chronological order the noted personages of the Biblical, Talmudic, and geonic periods, following the "Sefer ha-Ḳabbalah" of Abraham ibn Daud. This last was included by Zacuto in his "Sefer ha-Yuḥasin."

The "Yesod 'Olam" was first published at Berlin, in 1777, by Jacob Shklower. A more complete edition, with a preface by David Cassel, was published by B. Goldberg and L. Rosenkranz (*ib.* 1848). Israeli's work was much studied in the Middle Ages. Isaac al-Ḥadib, Judah Bassan, and Elijah Mizraḥi annotated it, and an anonymous author wrote a commentary to it (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 2044, 746, 5). An abridgment was made in Arabic by the author's son Joseph Israeli ben Isaac, of which the Hebrew translation, "Ḳiẓẓur Yesod 'Olam," is still extant (*ib.* No. 1319, 6).

Israeli was also the author of two other astronomical works, "Sha'ar ha-Shamayim" and "Sha'ar ha-Milu'im," both extant in manuscript (*ib.* No. 2046).

G. I. BR.

ISRAELI, ISAAC BEN SOLOMON (ABU YA'ḲUB ISḤAḲ IBN SULAIMAN AL-ISRA'ILI; generally known as **Isaac Israeli** and sometimes as **Isaac Israeli the Elder)**: African physician and philosopher; born in Egypt before 832; died at Kairwan, Tunis, in 932. These dates are given by most of the Arabic authorities; but Abraham b. Ḥasdai, quoting the biographer Sanaḥ ibn Sa'id al-Ḳurṭubi ("Orient, Lit." iv., col. 230), says that Isaac Israeli died in 942. Grätz ("Gesch." v. 236), while stating that Isaac Israeli lived more than one hundred years, gives the dates 845-940; and Steinschneider ("Hebr. Uebers." pp. 388, 755) places his death in 950. Israeli studied natural history, medicine, mathematics, astronomy, etc.; so that he was reputed to be one who knew all the seven sciences. He was a contemporary of Saadia Gaon, whose works probably inspired Israeli with a love for the study of the Bible.

Israeli first gained a reputation as a skilful oculist; but after he went to Kairwan he studied general medicine under Isḥaḳ ibn 'Amran al-Baghdadi, with whom he is sometimes confounded ("Sefer ha-Yashar," p. 10a). At Kairwan his fame became widely extended, the works which he wrote in Arabic being considered by the Mohammedan physician as "more valuable than gems." His lectures attracted a large number of pupils, of whom the two most prominent were Abu Ya'far ibn al-Yazzar, a Mohammedan, and Dunash ibn Tamim.

As Court Physician.

About 904 Israeli was nominated court physician to the last Aghlabite prince, Ziyadat Allah. Five years later, when the Fatimite calif 'Ubaid Allah al-Mahdi became master of northern Africa, of which Kairwan was the capital, Israeli entered his service. The calif enjoyed the company of his Jewish physician on account of the latter's wit and of the repartees in which he succeeded in confounding the Greek Al-Ḥubaish when pitted against him. At the request of Al-Mahdi, Israeli composed in Arabic several medical works, which were translated in 1087 into Latin by the monk Constantine of Carthage, who claimed their authorship for himself. It was only after more than four centuries (Lyons, 1515) that the editor of those works discovered the plagiarism and published them under the title "Opera Omnia Isaci," though in that collection works of other physicians were erroneously attributed to Israeli. His works were also translated into Hebrew, and a part of his medical works into Spanish.

On medicine Israeli wrote the following:

"Kitab al-Ḥummayat," in Hebrew, "Sefer ha-Ḳadaḥot," a complete treatise, in five books, on the kinds of fever, according to the ancient physicians, especially Hippocrates.

"Kitab al-Adwiyah al-Mufradah wa'l-Aghdhiyah," a work in four sections on remedies and aliments. The first section, consisting of twenty chapters, was translated into Latin by Constantine under the title "Diætæ Universales," and into Hebrew by an anonymous translator under the title "Ṭib'e ha-Mezonot." The other three parts of the work are entitled in the Latin translation "Diætæ Particulares"; and it seems that a Hebrew translation, entitled "Sefer ha-Mis'adim" or "Sefer ha-Ma'akalim," was made from the Latin.

"Kitab al-Baul," or in Hebrew, "Sefer ha-Shetan," a treatise on urine, of which the author himself made an abridgment.

Medical Works.

"Kitab al-Istiḳṣat," in Hebrew, "Sefer ha-Yesodot," a medical and philosophical work on the elements, which the author treats according to the ideas of Aristotle, Hippocrates, and Galen. The Hebrew translation was made by Abraham b. Ḥasdai at the request of the grammarian David Ḳimḥi.

"Manhig ha-Rofe'im," or "Musar ha-Rofe'im," a treatise, in fifty paragraphs, for physicians, translated into Hebrew (the Arabic original is not extant), and into German by David Kaufmann under the title "Propädeutik für Aerzte" (Berliner's "Magazin," xi. 97-112).

"Kitab fi al-Tiryaḳ," a work on antidotes. Some writers attribute to Isaac Israeli two other works which figure among Constantine's translations, namely, the "Liber Pantegni" and the "Viaticum," of which there are three Hebrew translations. But the former belongs to Mohammed al-Razi and the latter to 'Ali ibn 'Abbas or, according to other authorities, to Israeli's pupil Abu Jaf'ar ibn al-Jazzar.

Israeli was reputed to be a philosopher of note, and his philosophical works were praised by both Moslem and Jewish authors. They include:

Philosophical Works.

"Kitab al-Ḥudud wal-Rusum," translated into Hebrew by Nissim b. Solomon (14th cent.) under the title "Sefer ha-Gebulim weha-Reshumim," a philosophical work of which a Latin translation is quoted in the beginning of the "Opera Omnia." This work and the "Kitab al-Istiḳṣat" were severely criticized by Maimonides in a letter to Samuel ibn Tibbon ("Iggerot ha-Rambam," p. 28, Leipsic, 1859), in which he declared that they had no value, inasmuch as Isaac ben Solomon Israeli was nothing more than a physician.

"Kitab Bustan al-Ḥikmah," on metaphysics.

"Kitab al-Ḥikmah," a treatise on philosophy.

"Kitab al-Madkhal fi al-Mantiḳ," on logic. The last three works are mentioned by Ibn Abi Uṣaibi'a, but no Hebrew translations of them are known.

"Sefer ha-Ruaḥ weha-Nefesh," a philosophical treatise, in a Hebrew translation, on the difference between the spirit and the soul, published by Steinschneider in "Ha-Karmel" (1871, pp. 400–405). The editor is of opinion that this little work is a fragment of a larger one.

A philosophical commentary on Genesis, in two books, one of which deals with Gen. i. 20.

Carmoly ("Ẓiyyon," i. 46) concludes that the Isaac who was so violently attacked by Abraham ibn Ezra in the introduction to his commentary on the Pentateuch, and whom he calls in other places "Isaac the Prattler" and "Ha-Yiẓḥaḳi," was no other than Isaac Israeli. But if Israeli was attacked by Ibn Ezra he was praised by other Biblical commentators, such as Jacob b. Ruben, a contemporary of Maimonides, and by Ḥasdai.

Another work which has been ascribed to Israeli, and which more than any other has given rise to controversy among later scholars, is a commentary on the "Sefer Yeẓirah." Steinschneider (in his "Al-Farabi," p. 248) and Carmoly (in Jost's "Annalen," ii. 321) attribute the authorship to Israeli, because Abraham ibn Ḥasdai (see above), and Jedaiah Bedersi in his apologetical letter to Solomon ben Adret ("Orient, Lit." xi., cols. 166–169) speak of a commentary by Israeli on the "Sefer Yeẓirah," though by some scholars the words "Sefer Yeẓirah" are believed to denote simply the "Book of Genesis." But David Kaufmann ("R. E. J." viii. 126), Sachs ("Orient, Lit." *l.c.*), and especially Grätz ("Gesch." v. 237, note 2) are inclined to attribute its authorship to Israeli's pupil Dunash ibn Tamim.

Bibliography: Ibn Abi Uṣaibi'a, *'Uyun al-Anba'*, ii. 36, 37, Bulak, 1882; 'Abd al-Laṭif, *Relation de l'Egypte* (translated by De Sacy), pp. 43, 44, Paris, 1810; Hammer-Purgstall, *Literaturgesch. der Araber*, iv. 376 (attributing to Israeli the authorship of a treatise on the pulse); Wüstenfeld, *Gesch. der Arabischen Aerzte*, p. 51; Sprenger, *Gesch. der Arzneikunde*, ii. 270; Leclerc, *Histoire de la Médecine Arabe*, i. 412; Carmoly, in *Revue Orientale*, i. 350–352; Grätz, *Gesch.*

G. M. Sel.

ISRAELI, ISRAEL (or **IBN ISRAEL**): Spanish scholar; died at Toledo 1326; probably identical with Israel ben Joseph of Toledo, brother of the astronomer Isaac Israeli. He was a pupil of Asheri, for whom he translated from the Arabic the ordinances ("taḳḳanot") of Toledo and probably also parts of Maimonides' commentary on the Mishnah. A specimen of the translation of the latter is found in Asheri's commentary on Kilayim (iii. 5). According to Geiger ("Moses ben Maimon," p. 63) all the quotations from Maimonides in Asheri that vary from the current text are extracts from Israeli's translations.

Israeli wrote an Arabic work on the ritual, translated into Hebrew, under the title "Miẓwot Zemaniyyot," by Shem-Ṭob ben Isaac Ardotial, and extant in the Bodleian (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 904, 1081) and other libraries; also a commentary in Arabic on Pirḳe Abot (*ib.* No. 2354; another copy in the Biblioteca Ambrosiana, Milan). This commentary was used by Isaac ben Solomon in his commentary on the first six "peraḳim." Israeli gives many illustrations from the ancient Jewish literature; and allusions are made by him to medieval works on Abot and on other subjects. His interpretations are mostly of a philosophical character, and discussions of ethical points are fully entered into. On v. 19 he makes a long excursion on the principles of almsgiving. He cites Saadia, Hai Gaon, Samuel ha-Maggid, Isaac ibn Ghayat, and others.

Zunz supposes Israeli to have been the author of the six liturgical poems for the Day of Atonement and the New-Year bearing the signature "Israel." Israeli's epitaph figures in Luzzatto's "Abne Zikkaron," No. 48.

ISRAELIK. See Periodicals.

ISRAELIT, DER: Biweekly periodical published in Galicia since 1868. It is the organ of the Shomer Yisrael Association of Lemberg, of which its editorial staff are members; and it represents the liberal and progressive element of the Galician Jews. It has an excellent belletristic department.

G. A. M. F.

ISRAELIT, DER: Formerly a weekly, now a semiweekly journal published at Mayence, Germany. It was founded in 1860 by M. Lehmann and edited by him up to his decease. Since that time Oskar Lehmann has been the editor. Valuable literary supplements accompany each number. In the feuilleton some excellent stories have appeared. The magazine represents Orthodox Judaism, to conserve the interests of which it was founded.

G. A. M. F.

ISRAELIT DES NEUNZEHNTEN JAHRHUNDERTS, DER: Periodical published in Germany in the first half of the nineteeth century. It first appeared, from Oct., 1839, up to Oct., 1841, as a monthly in Meiningen. It was then enlarged and issued weekly in Herzfeld from 1842 to June, 1848; and at Frankfort in 1845 as the organ of the Frankfort Reformverein. A literary supplement was issued in 1846. Mendel Hess, a rabbi active in the Reform movement, was the editor, and S. Holdheim joined him during the last months of the paper's existence, January to June, 1848. This periodical was noted for its advanced theological standpoint and for its polemical attacks on Orthodoxy.

G. A. M. F.

ISRAELITE-CHRISTIANS (Izrailskiye Christiyanye): To encourage the conversion of Jews to Christianity, the Committee of Guardians for Israelite-Christians was established in Russia under Alexander I. It came into existence by an imperial decree of March 25, 1817, which describes the condition of converted Jews as full of hardship in consequence of the animosity of their former coreligionists. The government ordered all administrative officers to help and protect all such converts, and to form the Association of Israelite-Christians, to which should be given land in one of the northern or southern governments. The members of the association were to be empowered to found settlements on the land granted, to admit strangers into such settlements at discretion, to engage in agriculture, trades, commerce, and manufactures, and were to be exempted from the obligation to join a gild. Moreover, converts, including foreigners, were to be freed from all compulsory government service. The association was also to be permitted to regulate its own local affairs and to elect delegates for that purpose. In 1818 the Committee of Guardians commissioned a certain Misko to select suitable lands for the settlement of the Israelite-Christians. Misko spent much time inspecting various lands in New Russia, and decided on a tract near the cities of Taganrog and Mariampol. A correspondence which lasted six years ensued, but with no result.

When M. S. Vorontzov became governor-general of New Russia (1822), the matter was referred to him by Count A. N. Golitzyn. Vorontzov regarded the project favorably, and on making inquiries (1823) found that the settlement had not yet been established, and that necessary information was still being collected. The formalities involved delayed the settlement year after year, until, in 1833, the committee itself ceased to exist. An inquiry, begun in the office of the governor-general of New Russia Sept. 9, 1823, at the instance of thirty-eight families of Israelite-Christians, who petitioned that they be settled on the lands granted to the association, showed the committee to be moribund. Excepting two families, one resident in Odessa, the other in Tiraspol, these petitioners bore the names of "Dobrovolski" and "Kryzhanovski." Investigation showed that their conversion to Christianity was not proved, and their petition was therefore not granted.

ISRAÉLITE FRANÇAISE. See PERIODICALS.

ISRAELITISCH-THEOLOGISCHE LEHRANSTALT: Rabbinical and teachers' seminary in Vienna, founded 1893 at the suggestion of Wilhelm and David von Guttmann and with the assistance of Albert von Rothschild and Freiherr von Königswarter, and opened Oct. 15 of that year. It is subventioned by the Austrian government, by the "Cultusgemeinden" of Vienna, Prague, and Lemberg, and by the "Landesjudenschaft" of Bohemia, and is governed by fifteen curators. The first president was Baron von Königswarter, who, at his death, was succeeded by Moritz Karpeles; the latter was followed by Moritz Edler von Kuffner.

Since 1893 the faculty has consisted of Dr. Adolf Schwarz, professor of Talmud, halakic literature, and homiletics, rector, and the following professors: M. Friedmann (lector in the Vienna bet ha-midrash), in the Midrash; Dr. D. H. Müller, in Bible exegesis, grammar, and religious philosophy; Dr. A. Büchler, in history; Dr. Jerusalem, in pedagogics and German; Dr. Monat, in Polish; and Dr. E. Fuhrmann, in Bohemian. The institution publishes every year an annual report together with an important scientific treatise. In 1902 the number of students preparing for the rabbinate was 26, and the number preparing to be teachers of religion, 11.

J. S.

ISRAELITISCHE ALLIANZ ZU WIEN: Society for the promotion of Jewish interests, founded at Vienna in 1872 by Joseph Ritter von Wertheimer, and modeled on the Alliance Israélite Universelle of Paris. Its establishment was directly due to the oppression of the Jews in Rumania and the excesses committed against the Jews in Asiatic Turkey. The organizers, among whom were the publicist Ignatz Kuranda and the poet Leopold Kompert, proposed as an important part of their program, to improve Jewish education in Austria and more especially in Galicia by organizing and supporting schools, and by other suitable means. The other object of the society, "to afford efficient relief to Jews where they still suffer by reason of their race," claimed subsequently the larger part of its attention, in consequence of the many persecutions in the countries on the eastern border. On account of the geographical situation of Vienna, it was the task of the Israelitische Allianz to render first assistance to refugees from eastern Europe. Thus the society expended about 862,000 crowns for the relief of the persecuted Russian Jews in 1881-83, and about 367,000 crowns for that of the Rumanian emigrants in 1900-02.

In a conference held at Vienna in Aug., 1882, and attended by all the relief committees of western Europe, the Israelitische Allianz was entrusted with the management of the relief-work in behalf of the Russian Jews, and it was represented at all of the succeeding international conferences of similar character. The Allianz raised about 220,000 crowns for the victims of the massacre of Kishinef. The board of directors frequently had occasion to intervene personally with Count Goluchowski, foreign minister of Austria, in behalf of the Rumanian Jews; and a memorandum laid before him by the society is reprinted in its report for 1902.

Educational Work.

The educational work of the Israelitische Allianz in Galicia has been carried on since 1892 through the Baron de Hirsch Fund for Galicia and Bukowina. The society was confronted with new tasks at home by the growth of anti-Semitism in Austria; it was called upon to aid the sufferers from the anti-Jewish excesses at Prague and Nachod, at Holleschau and Neusandec, and the victims of mob prejudice in the Hilsner trial at Polna. It also offers subsidies to poor provincial communities, in order that they may maintain religious instruction, and to numerous educational and charitable societies.

According to the report for 1902 there were 3,000 regular members (including many societies as corporate bodies), each paying a minimum contribution of 6 crowns; 1,185 of these were in Vienna. Income in 1902: annual contributions, 25,794 crowns; donations, 9,016 crowns; interest, 10,403 crowns; and gifts for special relief. President (1903), David Ritter von Gutmann; first vice-president, Dr. Alfred Stern; secretaries, 1874-76, Dr. P. Frankl (subsequently rabbi at Berlin); 1880-90, Dr. M. Friedländer; and since 1901 Rabbi A. Kaminka.

ISRAELITISCHE ANNALEN: Weekly journal; published in Frankfort-on-the-Main. The first number appeared Jan. 4, 1839; it discontinued publication Dec. 24, 1841. The well-known historian Isaac Marcus Jost was its editor. The journal printed Jewish news from all points and articles on Jewish literature and history. Its theological position was neutral, and its chief value lay in its historical work.

ISRAELS, ABRAHAM HARTOG: Dutch medical historian; born at Groningen March 27, 1822; died at Amsterdam Jan. 16, 1883; educated at the university of his native town (M.D. 1845). He established himself as a physician in Amsterdam, where, in 1867, he became lecturer on the history of medicine and hygiene at the Athenæum. In 1877 he was appointed assistant professor at the University of Amsterdam.

Among Israels' works may be mentioned the following, all of which were published in Amsterdam: "Twee Epidemien in Nederland," 1853; "De Salernitaansche School," 1856; "Bydragen tot de Geschiedenis der Lepra in de Noordelyke Nederlanden," 1857; "De Geschiedenis der Diphtheritis Beknopt Medegedeelt," 1861; "Bydragen tot de Geschiedenis der Geneeskunde in Nederland," 1873; "De Keizersnede by Levenden, Volgens den Babylonischen Talmud," 1882. He also translated into Dutch Ideler's "Allgemeine Diätetik für Gebildete" (Amsterdam, 1851) and Häser's "Lehrbuch der Geschichte der Medizin" (*ib.* 1855–59).

From 1874 to 1876 Israels was editor of "Hygieia, Weekblad voor de Gezondheidsleer."

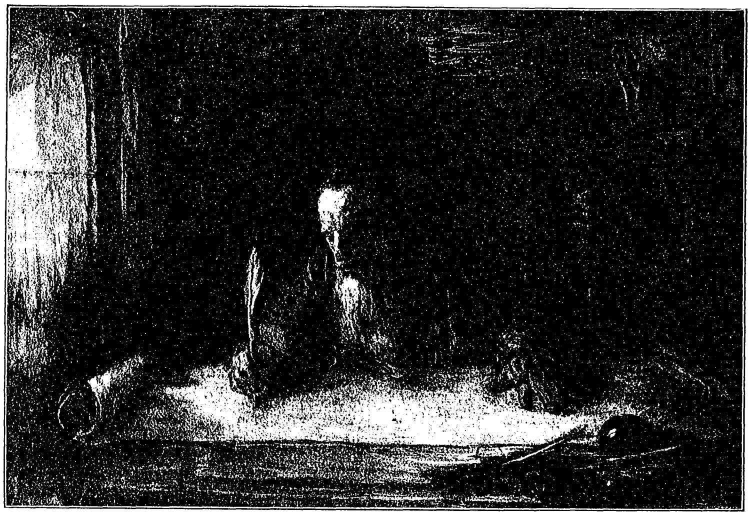
ISRAEL'S HEROLD. See Periodicals.

ISRAELS, JOSEPH: Dutch genre painter; born at Groningen, Holland, June 27, 1824. It was his mother's desire that he should enter the rabbinate, but other influences prevailed, and at an early age he adopted a commercial career, which his father, a banker, had mapped out for him in his own counting-room. This career, however, he soon abandoned, but not until the elder Israels had become fully convinced of the bent of his son's mind, mainly through his insistent desire to make sketches upon the borders of the huge ledgers which it was his duty to keep in order. At last permission was given him to take up art as a profession.

Upon leaving his office-desk Israels immediately began his studies in art at Groningen under local masters. At the age of twenty-two, having in a measure exhausted the opportunities offered by his native town, he went to Amsterdam. There he entered the studio of Cornelis Kruseman, and quickly responded to the classical influences then predominating, not only at the Amsterdam Academy of Fine Arts, over which his master presided, but to an even greater extent in Paris, where Israels ultimately went. While in Paris he studied under Picot, Horace Vernet, and Paul Delaroche, living meanwhile economically upon a small allowance made him by his father. While in Paris he felt to the full the positive influence of the romantic school, of which his masters were the foremost exponents and from which he became one of the first seceders.

In 1848 Millet exhibited for the first time in Paris, and, judging from Israels' later work, there is little doubt that he was one of the first painters to appreciate the significance of Millet's revolt against the ultra-classical tendencies of the period. From Paris Israels returned to Amsterdam, and there commenced painting historic scenes, of which the first was "William the Silent of Orangè Bidding Defiance to King Philip II. of Spain" (1855). Meeting with little success in this field, he turned for subjects to the peasantry that flocked into the city on market-days from the surrounding country, and began to paint the homely scenes which have since made him famous. Later he drew for material upon the life of the fisherfolk of the seaside villages near Amsterdam. Those of his pictures that interpret the life of the Dutch fishermen, the arduous and frequently tragic element of which Israels portrayed with deep feeling and with a masterly application of chiaroscuro, soon became popular. In developing his tendencies he finally attained the extreme of realism and depicted the sober side of life—its toils, its sorrows, and its sacrifices.



THE SCRIBE.
(From the painting by Joseph Israels.)

Several medals have been conferred upon Israels in recognition of the merit of his work. He received a medal (third class) at the Paris Exposition of 1867, and another (first class) at the Exposition of 1878. He was decorated with the cross of the Legion of Honor in 1867, and created an officer of that order in 1878. The Order of Leopold has also been conferred upon him by the king of the Belgians. In 1883 the Munich *International* Exposition awarded him a gold medal (second class), and he received a gold medal (first class) from the Paris Exposition of 1889. At the Paris Exposition of 1900 he exhibited two paintings: "The Merchant of Bric-à-brac" and "Returning from the Fields."

Of Israels' pictures, "Passing Mother's Grave" (1856) was purchased in 1861 by the Amsterdam Academy of Fine Arts, "Alone in the World" (1878) by the Amsterdam Museum. His "Frugal Meal" was bought by W. K. Vanderbilt of New York. Among his other works may be mentioned: "Village Scene," "Preparing for the Future" (1855): "Children of the Sea," "Peaceful House," "Fishermen Shipwrecked off Scheveningen" (1862); "The Sick Mother," "The Mother in Health," "The Orphan Asylum at Katwyk," "The Last Breath," "True Support," "Madonna in Hut," "Age and Infancy" (1872); "First Sail," "Village Poor" (1873); "Expectation," "An Anxious Family" (1874); "Waiting for the Fishing-Boats" (1875); "Returning from the Fields," "Breakfast Time," "Cobblers at Dinner" (1878); "Nothing More!" "The Sewing-School at Katwyk" (1881); "A Silent Interview" (1882); "Fair Weather," "A Sleeping Child" (1883); "The Return" (1884); "When One

Becomes Old" (1886); "The Little Sick Nurse," "The Sewer" (1888). Some of his works deal with Jewish subjects, as "David Before Saul," "The Scribe," "A Son of the Ancient People," and "Old Jewish Sage" (etching).

Israels is an aquarellist and etcher of great talent. Through his efforts painting has received a new impetus in Holland, where a modern Dutch school of painting has arisen. He now resides at The Hague, and recently has become corresponding member of the Institut de France.

ISSA. See Jose.

ISSACHAR (יששכר).—**1. Biblical Data:** Ninth son of Jacob and fifth of Leah, born a considerable length of time after her other children (Gen. xxx. 17, 18; comp. xxix. 35). This name belongs to that class of words which, according to Masoretic printing, are not read as they are written, the second ש being ignored. The meaning of the name is either "there is a reward" ("yesh sakar") or, according to Wellhausen ("Text der Bücher Samuels," p. 95), "a man of hire" ("ish sakar"). In Gen. xxx. 18 (Hebr.) the former explanation is plainly indicated: "God has given me my reward, because I have given my maiden to my husband." Still there is in verse 16 an allusion to the latter explanation: "For I have surely hired thee with my son's mandrakes." Ball ("S. B. O. T.," "Genesis," on Gen. xxx. 18) interprets the name as "Sokar's man," that is, "man of the Egyptian god Sokar." Issachar had four sons, who founded the four chief families of the tribe (Gen. xlvi. 13; Num. xxvi. 23, 24; I Chron. vii. 1). Jacob in blessing his children before his death compared Issachar to a strong or bony ass (Gen. xlix. 14). This expression is a prophecy referring to the tribe of Issachar.

E. G. H. M. Sel.

——**In Rabbinical Literature:** Issachar was one of the five brothers whom Joseph presented to Pharaoh (Gen. xlvii. 2; Gen. R. xcv. 3). In the wars between Jacob's sons and the Canaanites, in which, according to the legend, the other sons achieved astonishing exploits, Issachar took but a feeble part. He is mentioned as having remained beneath the walls of Sarṭa and Gaash, two strongly fortified cities, and at a given opportunity as having opened their gates ("Sefer ha-Yashar," section "Wayishlaḥ," ed. Leghorn, 1870, pp. 60b, 63a). He married Aridah, the younger daughter of Jobab, the son of Joktan (*ib.* section "Wayesheb," p. 75a). At Jacob's funeral Issachar was one of the three who were placed to the east in carrying the bier (*ib.* section "Wayeḥi"; comp. Gen. R. c. 2). Issachar's name was engraved in the sapphire of the high priest's breastplate (Ex. R. xxxviii. 11). Issachar was born on the fourth day of the fifth month (Ab) and died at the age of 122 (Midrash Tadshe, in Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," p. xxiii.).

2. A Levite, seventh son of Obed-edom (I Chron. xxvi. 5).

S. S. M. Sel.

ISSACHAR, TRIBE OF.—Biblical Data: A tribe of Israel, descended from Issachar. The numbers accredited to Issachar are: 54,400 in Num. i. 29; 64,300 in Num. xxvi. 25; and 145,600 in I Chron. vii. 1–5. The territory occupied by the tribe was the fourth lot specified in Josh. xix. 17–23, immediately north of the half-tribe of Manasseh, west of the Jordan, and south of Zebulun and Naphtali; and it probably extended from the Jordan on the east to the Mediterranean Sea (comp. Deut. xxxiii. 18) on the west. It embraced sixteen cities and the fertile plain of Esdraelon.

The first important event in which Issachar figures is the battle of Deborah and Barak with Sisera in the plain of Esdraelon. In Judges v. 15 (R. V.) it is said: "And the princes of Issachar were with Deborah; as was Issachar, so was Barak." It may be, though it is by no means certain, that both Deborah and Barak belonged to this tribe, in whose territory the battle was fought and won.

The judge Tola, son of Puah, son of Dodo, was also a man of Issachar (Judges x. 1). Jehoshaphat, son of Paruah, was one of Solomon's commissary officials (I Kings iv. 17). The second dynasty of the Northern Kingdom belonged to Issachar: "And Baasha, the son of Ahijah, of the house of Issachar," slew Nadab, son of Jeroboam I., and reigned in his stead (I Kings xv. 27–28). There are no other specific references to descendants of Issachar who occupied prominent places in Israel's history; but, according to the genealogical tables of the chronicler, some further importance is attached to the tribe.

E. G. H. I. M. P.

——**In Rabbinical Literature:** The tribe of Issachar is particularly represented as one which consisted mostly of scholars, to which there is said to be an allusion in I Chron. xii. 32. According to Raba, there was not to be found a Jewish student that was not a descendant either of Levi or of Issachar (Yoma 26a). The passage of Jacob's blessing referring to Issachar (Gen. xlix. 14–15) is interpreted as an allusion to the study of the Law, with which the people of that tribe occupied themselves (Gen. R. xcviii. 17; comp. also pseudo-Jonathan and Rashi *ad loc.*). The tribe of Issachar is also said to have been most influential in making proselytes (Gen. R. xcviii. 12; comp. Sifre, Deut. 364).

Although Issachar was the ninth son of Jacob, yet the prince of his tribe was the second to bring the offering for the dedication of the altar (Num. vii. 18–23), because the tribe was well versed in the Law (Gen. R. lxxii. 4). The Midrash finds in the details of the offering various allusions to the Torah (Num. R. xiii. 15). The tribe of Issachar advised the others to bring six covered wagons and twelve oxen (Num. vii. 3) on which to load the parts of the Tabernacle (Num. R. xii. 19). The 200 chiefs of Issachar (I Chron. xii. 32) were leaders of the Sanhedrin, whose decisions were implicitly accepted by their brethren (Gen. R. lxxii. 5, xcviii. 17). The wise men consulted by Ahasuerus (Esth. i. 13) were people of Issachar (Esth. R. iv.). The tribe is also represented as having been rich (comp. Targ. Onḳ. to Gen. xlix. 14); and its members figure as persons who united wealth and learning (B. Ḳ. 17a). It was because they studied the Torah under favorable conditions that they produced only 200 chiefs of the Sanhedrin, while the people of Naphtali, who studied it under difficulties, produced 1,000 (Cant. R. viii. 14).

S. S. M. SEL.

ISSACHAR BÄR B. TANḤUM: Russian rabbi; born (in Grodno ?) 1779; died at Wilna July 31, 1855. He became one of the "more ẓedeḳ" ("dayyanim") of Wilna in 1819, and held that position till his death. He made a special study of the religious usages of Elijah Wilna not practised by others, and incorporated the results in his work "Ma'aseh Rab" (Zolkiev, 1808), of which a second edition, with notes and additions by his son **Mordecai,** was published at Wilna and Grodno in 1832. Another of his sons, **Elijah Perez,** who was also a moreh ẓedeḳ in Wilna, republished that work with additions and an appendix entitled "Minḥat 'Ereb" (Wilna, 1832). Later editions (Warsaw, 1858, and Wilna, 1889) contain various additions and extracts from other books on subjects similar to those treated in the body of the work.

S. S. P. WI.

ISSACHAR DOB BEN JACOB JOSHUA: Rabbi of Podhajce, Galicia; born at Lisko, Galicia, 1712; died in Berlin Oct. 28, 1744. His father was the author of "Pene Yehoshua'," novellæ on the Talmud, and Issachar Dob himself was a pupil of Hirsch, rabbi of Halberstadt. In 1741 he gave his approbation to the printing of Ḥoshen Mishpaṭ with its three commentaries. Three years later he was called to be "rosh yeshibah" of Metz, but while on his way thither he fell sick and died.

Issachar Dob, though comparatively young at the time of his death, was known as an eminent Talmudic scholar. He wrote many responsa, some of which were published in the responsa collection "Ḳiryat Ḥannah" (§§ 41-44) and some in that of Ḥayyim Cohen Rapoport. His son Ẓebi Rosanes inserted others in his "Tesha' Shiṭṭot." Issachar Dob is perhaps identical with the Issachar Dob ben Jacob who wrote annotations to Ezekiel Landau's "Dagul me-Rebabah."

ISSACHAR BEN ISSACHAR COHEN GERSONI: Bohemian printer and author; lived in Prague in the seventeenth and eighteenth centuries. In 1691 he was employed at Fürth on the "Sefer Me'irat 'Enayim." He afterward went to Prague, where he worked for different printers. Issachar wrote "'Ippush Lid fun Prag" (Prague, 1714), a description in Judæo-German verse of the plague which ravaged Prague in 1713-14.

ISSERLEIN (ISSERLIN), ISRAEL BEN PETHAHIAH ASHKENAZI: The foremost Talmudic authority of Germany in the first half of the fifteenth century; born in the last decade of the fourteenth century, probably at Ratisbon; died at Neustadt, near Vienna, 1460. Isserlein belonged to an old family of scholars: his great-grandfather on his father's side was Israel of Krems, author of the "Haggahot Asheri"; and his maternal uncle was the martyr Aaron Blumlein. The latter was Isserlein's principal teacher, Isserlein, after his father's death at Ratisbon, having accompanied his mother to Neustadt, where Aaron Blumlein conducted a yeshibah. Isserlein also studied with a certain Nathan, who is likewise known as an eminent Talmudist. In consequence of the persecution of the Jews at Neustadt, of which his mother and uncle were victims (March 12, 1421), Isserlein seems to have left Austria and gone to Italy; later he settled at Marburg, Styria, wherefore he is often called "Israel of Marburg." After a lengthy sojourn in that city he returned (before 1445) to Neustadt, where he remained until his death.

His Activity at Neustadt.

Neustadt owed its reputation of being the foremost seat of Jewish scholarship in Austria in no small degree to Isserlein's activity. Hundreds of eager students went there in order to sit at the feet of the great rabbi; and his opinions on difficult or doubtful questions of religious or civil law were sought far and wide. His chief service as a teacher of the Talmud and of rabbinical literature was his endeavor to revive the study of the original sources. In the century preceding him Talmudic lore in Germany had declined to such an extent that even the so-called scholars gave their attention almost exclusively to the codices of the Law, neglecting the study of the Talmud and of the old authorities. Isserlein's efforts brought him into frequent conflict with the older rabbis. Thus he took the part of two young Talmudists who desired to open a school in Neustadt but were opposed by Meisterlein, the representative of the old school, because he did not favor the study of the RISHONIM, whose teachings, he said, had only a theoretic value.

Isserlein cared little for the opinions of the later codifiers, or even for the authority of the Ṭurim, as against the decisions of the Geonim. He was exceedingly modest, however, and, although recognized as a great Talmudist, would not allow himself to be addressed as "Morenu" when called to the reading of the Torah. He was also remarkably obliging: although subject to the gout and troubled with an affection of the eyes, he insisted, even when sick, on dictating responsa to the many questions addressed to him.

His Works.

The following two works by Isserlein have been printed: (1) "Terumat ha-Deshen" (Venice, 1519), consisting of 354 (a number corresponding to the numerical value of דשן and to the days of the lunar year) decisions in the form of responsa on synagogal, ritual, and legal subjects; and (2) "Pesaḳim u-Ketabim," containing 267 responsa, of which nearly one-third deal with the various rules regarding the marriage laws. The first work was edited by Isserlein himself; the material for the second was collected and edited after his death by one of his pupils. Many of his responsa are found also in the responsa collections of MaHaRiSh, Israel Bruna, and Jacob Weil; and others are still in manuscript. The manuscript of his supercommentary to Rashi's commentary on the Pentateuch is still extant, while his "She'arim," on things permitted and those prohibited, which Moses Isserles used, has been preserved in fragments only; extracts from it are included in the Basel edition of the "Sha'are Dura" (1547). A "Seder ha-Geṭ" by Isserlein, which is mentioned by some authorities, is perhaps the basis of the form of divorce given in Moses Minz's responsum No. 123. Three of Isserlein's liturgic pieces show him to have been a man of much talent, but not a poet.

Isserlein's responsa were highly important for the religious life of the German-Polish Jews. What Joseph Caro neglected in the Shulḥan 'Aruk, Moses Isserles supplied in his notes; and Isserles often cites opinions of Isserlein's to which Caro had paid little attention. Even Solomon Luria, who as a rule was very independent in his views, considered Isserlein's opinions as authoritative. He said: "Do not deviate from his words; for he was great and eminent" ("Yam shel Shelomoh" to Giṭ. iv. 24).

As a Legal Authority.

It is difficult to characterize Isserlein's standpoint in his many decisions, which cover almost the entire religious and social life. He was, on the whole, inclined to a rigorous interpretation of the Law, excepting in the case of an 'Agunah; he always endeavored to facilitate the woman's remarriage. His severe views were due chiefly to his own asceticism; for, being himself accustomed to self-denial, he saw no special hardship in a decision that curtailed any of the joys of life. He spoke very bitterly, however, against those who out of mere professional envy, and in order that the views of others might not prevail, placed a stricter interpretation on the laws. Isserlein was opposed to severe punishments, and decided that the way ought to be made easy for the return of a penitent to Judaism, and that he should not be discouraged by the necessity of a too rigorous atonement; for he maintained that a return to Judaism involved a denial of three kinds of pleasure, and entailed a large amount of suffering which should be counted to the credit of the penitent.

In many cases Isserlein's decisions are true reflections of German Talmudism in the fifteenth century, with all its strong and its weak points. Thus he could hardly make up his mind to observe the comet in 1456, because, according to the opinion of an old codifier, star-gazing was one of the practises of magic forbidden in the Bible. Nevertheless he permitted a sick person to consult a magician, if the latter did not belong in the category of the magicians forbidden in the Pentateuch.

Isserlein's works are most valuable for the study of Jewish history in the Middle Ages on account of the rich material they contain regarding the civilization of that period.

Isserlein is a pet name for Israel.

S. S. L. G.

ISSERLES, MOSES BEN ISRAEL (ReMA): Polish rabbi, code annotator, and philosopher; born at Cracow about 1520; died there May 1, 1572. His father was a rich and prominent Talmudist, and it may be concluded from the terms "ha-ḳaẓin" and "ha-parnes," which his son applies to him (preface to "Meḥir Yayin"), that he was the chief of the community. Isserles studied in his native city, and then under Shalom Shekna, rabbi of Lublin, whose son-in-law he became. Among his fellow pupils were his relative Solomon Luria (MaHaRShaL), and Ḥayyim b. Bezaleel, who later was his opponent. Isserles returned to Cracow about 1550, when he established a large yeshibah and, being a wealthy man, supported his pupils at his own cost. Three years later he was ordained rabbi and was named one of the three dayyanim to form the rabbinate of Cracow, which community had as yet no chief rabbi ("ab bet din"). In 1556, when the plague ravaged Cracow, Isserles went to Szydlowiec, where he wrote his "Meḥir Yayin."

While still young Isserles was recognized as an authority in rabbinical matters. As early as 1550 his relative Meïr Katzenellenbogen of Padua, a man of eighty years, had applied to him to use his influence in forbidding the unlawful printing in Poland of the "Mishneh Torah," which was causing Katzenellenbogen heavy loss. Isserles in ten responsa defended the interests of the aged rabbi of Padua. He also corresponded with many other rabbis, among them Joseph Caro, who answered him in a very considerate manner.

Relations with Solomon Luria.

A close friendship existed between Isserles and his relative Luria, though, as will be seen, they differed later on various matters (Isserles, Responsa, No. 6). In many respects their aims were similar: both aimed at the truth in their decisions, both worked for the furtherance of Talmudic literature, and both ascribed great importance to customs ("minhagim"). In certain other matters, however, there was great opposition between the two friends, especially in their attitude toward philosophy. Luria was the adversary of philosophy; Isserles, its warm defender, declaring openly that the aim of man is to search for the cause and the meaning of things ("Torat ha-'Olah," III., ch. vii.). Isserles accordingly devoted a part of his time to philosophy. When Luria reproached him for having based his decisions on Aristotle's teachings, he replied that he followed Maimonides, and that he studied Greek philosophy only from the "Moreh"; further, that he pursued his philosophical studies on Sabbaths and holy days only, when people generally took walks, and that it was better to occupy oneself with philosophy than to err through Cabala (Isserles, Responsa, No. 7). The fact that Isserles studied the "Moreh" on Sabbaths and holy days—on which days the reading of profane literature was particularly forbidden—shows how much he appreciated philosophy in general and Maimonides in particular.

Isserles also occupied himself with the secular sciences; and whereas Caro says that a man must devote all his time to the study of the Torah and the Talmud, Isserles decides that one may now and then occupy himself with the secular sciences provided he is not led into heresy through studying them (Shulḥan 'Aruk, Yoreh De'ah, 246, 4). He himself had an extensive knowledge of astronomy and a great liking for history. It was Isserles who induced his pupil David Gans to write the historical work "Ẓemaḥ Dawid." Isserles was opposed to "pilpul" (Responsa, No. 78); and he taught his pupils how to interpret the Talmud in a simple way (*ib.* No. 38).

Connection with Council of Four Lands.

Some of his responsa are written in an elevated style of versified prose, as are his prefaces, though, as he himself declared, he had never studied Hebrew grammar (*ib.* No. 7). Isserles was also an excellent scribe, and in the scroll of the Pentateuch which he wrote and which is preserved in the synagogue—originally his house, which he gave to the community for a place of worship—there are fourteen readings different from those in other scrolls (see "Ha-Maggid," i. 54, ii. 16). Isserles was prominent in the Council of Four Lands, which was established in his time. A quarrel having broken out among the rabbis, he launched an anathema against those who were desirous of continuing the agitation and would not await the decision of the rabbinical congress at the fair of Lublin (Responsa, Nos. 63, 64).

Owing to the fact that he was one of the founders of rabbinic learning in Poland and Germany, and was recognized as the authority not only in rabbinic law but also in Cabala, philosophy, and the secular sciences, legends attached themselves to him. Many curious stories are told of the number of years he lived, of the number of works he wrote, etc. (comp. Azulai, "Shem ha-Gedolim," i., *s.v.* "Mosheh Isserles"). Even at the present day the Polish Jews consider him a saint, and on the anniversary of his death large numbers make a pilgrimage to his tomb at Cracow ("Ha-Maggid," 1903, No. 18). In the epitaph on Isserles' tombstone occurs the following: "From Moses [Maimonides] to Moses [Isserles] there was none like Moses" (comp. Deut. xxxiv. 10). This is an exaggeration, but there is a resemblance between the two, as both were halakists, and both devoted a large part of their time to philosophy.

Isserles and Caro.

Isserles' writings may be divided into two classes of works: (1) halakic, and (2) philosophical, cabalistic, exegetical, and scientific. It is on the former that his great reputation rests. His zeal for the Law and his vindication of Ashkenazic customs spread his fame far and wide. Indeed, he may with justice be called the Ashkenazic codifier; for he was to the Ashkenazim what Caro was to the Sephardim. Like Caro, he wrote a commentary to the Arba' Ṭurim, entitled "Darke Mosheh," of which two parts were printed (i., Fürth, 1760; ii., Sulzbach, 1692). An abridgment of this work, entitled "Ḳiẓẓur Darke Mosheh," was published with the text in Venice, 1593. This commentary contains a severe criticism of the "Bet Yosef." It is also the source of Isserles' other work, "Mappah," which is both a criticism of and a supplement to Caro's Shulḥan 'Aruk. Isserles saw that Caro's "table" was not sufficiently "prepared"; for Caro as a Sephardi had neglected the Ashkenazic minhagim. He therefore provided the Shulḥan 'Aruk (= "Prepared Table") with a "Mappah" (= "Table-Cloth"), consisting of notes ("haggahot") inserted in Caro's text. These notes first appeared in the Cracow edition of the Shulḥan 'Aruk (1571), in Rashi type to distinguish them from the text of Caro.

The authorities receiving special attention in the "Darke Mosheh" and "Mappah" are the Aḥaronim and, more particularly, the minhagim, to which Isserles attached great importance. The importance of the minhag had already been pointed out by Solomon Luria, who declared that the minhag outweighed the Law ("Yam shel Shelomoh" to B. Ḳ. x. 42). Isserles went still further: he established the minhag in several cases as the standard authority. "The minhag is the Law," he said ("Darke Mosheh" on Ṭur Yoreh De'ah, 116). "One must not act contrary to the minhag" (Shulḥan 'Aruk, Oraḥ Ḥayyim, 619, 1). Still, even in establishing the minhag as an authority, he did not do so indiscriminately, because he made a distinction among minhagim. Where the minhag seemed to him absurd, he declared it to be unacceptable (Shulḥan 'Aruk, Yoreh De'ah, 160, 18). It must be added that when Ashkenazim now speak of the Shulḥan 'Aruk they understand by it both Caro's text and Isserles' notes, and that when there is a conflict between the two, Isserles is taken as the authority.

Liberal Tendencies.

As to Isserles' system, it may be said that he was more inclined toward restrictive decisions ("maḥmir"), especially in his rulings concerning kasher food (see, for instance, Shulḥan 'Aruk, Yoreh De'ah, 35, 5; 107, 2 *et passim*). But he has been judged too severely by modern Maskilim, who have accused him of making arbitrary restrictions, of inventing customs, and of causing heavy pecuniary losses by his reliance on the minhagim (P. Smolenskin, "'Am 'Olam," ch. xiii.). These accusations are unjustified, because Isserles was consistent in principle, inasmuch as he regarded the minhag as the norm for the practise on both the liberal and the restrictive sides. Throughout his "Darke Mosheh," "Mappah," and responsa occur many liberal decisions of his which are based on the minhag, but are contrary to the decisions of other casuists ("posekim"), including Solomon Luria. In general he adapted his decisions to the spirit of the time in which he lived; and he gave a liberal decision when he saw that a restrictive one would prove burdensome ("She'elot u-Teshubot ReMA," No. 50).

Isserles touches also, in his halakic decisions, on the question of the superiority of the Hebrew language and the sacred characters. He allows one to read on Saturdays non-religious works if written in Hebrew (Shulḥan 'Aruk, Oraḥ Ḥayyim, 307, 16). The Targumim have the same sacred character as the Hebrew ("Darke Mosheh" on Ṭur Eben ha-'Ezer, 126). The square characters are sacred because the scroll of the Law is written in them; and he forbade the writing of non-religious works in such characters (Shulḥan 'Aruk, Yoreh De'ah, 284, 2).

His other halakic works are:

"Torat Ḥaṭṭat," also called "Issur we-Hetter" (Cracow, n.d.), a treatise on what is lawful and unlawful, arranged according to the "Sha'are Dura" of Isaac of Düren, and written before the "Mappah." Later Isserles added notes to this work (*ib.* 159 1). Eliezer ben Joshua of Shebrszyn and Jacob Rzeszower (Reischer) wrote commentaries on the "Torat Ḥaṭṭat": that of the former was entitled "Dammeseḳ Eli'ezer"; that of the latter, "Minḥat Ya'aḳob." The work was severely criticized by Ḥayyim b. Bezaleel in his "Wikkuaḥ Mayim Ḥayyim" and by Yom-Ṭob Lipmann Heller in his "Torat ha-Asham."

"She'elot u-Teshubot ReMA" (*ib.* 1640), a collection of 132 responsa, many of which were addressed to him by other rabbis. In these responsa Isserles sometimes criticizes Solomon Luria, Shalom Shekna (his own master; see Responsa, No. 30), Mordecai b. Hillel (*ib.* No. 100), and others.

"Haggahot" (Prague, 1604), notes to Jacob Weil's "Sheḥiṭot u-Bediḳot."

Notes on Mordecai b. Hillel (Isserles, Responsa, No. 38).

Philosophical Works.

His works of a philosophical character are "Meḥir Yayin" (Cremona, 1559) and "Torat ha-'Olah" (3 vols., Prague, 1659). The former is a philosophical work in which he treats the Book of Esther as an allegory of human life. The "Torat ha-'Olah" is a philosophical explanation of the Temple, its equipment, and its sacrifices. In the description of the Temple, Isserles follows Maimonides' "Yad," Bet ha-Beḥirah, even in those cases where Maimonides is in conflict with the Talmud ("Torat ha-'Olah," I., ch. ii.). According to Isserles, the entire Temple and its appurtenances—their forms, dimensions, and the number of their parts—correspond to things either in divine or in human philosophy. For instance, the seven parts of the Temple (*ib.*) correspond to the so-called seven climates. The women's courtyard and its four chambers correspond to the active intelligence and the four kingdoms, mineral, vegetable, animal, and rational, which receive their form from the active intelligence ("Torat ha-'Olah," I., iv., vi., viii.). He also follows Maimonides in many philosophical points, as, for example, in a belief in the active intelligence, and regards the angels not as concrete bodies, but as creative; every power of God being called "angel" (messenger) because it is an intermediary between the First Cause and the thing caused or created (*ib.* II., xxiv.; III., xvii.; comp. "Moreh," ii. 6).

In many other points, however, he differs widely from Maimonides. He follows Albo in fixing the number of the articles of faith or fundamental principles ("'iḳḳarim") at three; viz., belief (1) in the existence of God, (2) in revelation, and (3) in divine retribution. To Albo's six derived principles Isserles adds three: free will, tradition, and the worship of God alone ("Torat ha-'Olah," I., xvi.). Belief in the creation of the world is in his eyes the most important of the derived principles; and he refutes the seven arguments of the philosophers against it (*ib.* III., xliv., xlv., lxi.). He does not, however, consider it necessary to believe in the end of the world (*ib.* ii. 2)—another point on which he differs from Maimonides (comp. "Moreh," ii. 27).

As Isserles lived at a time when the Cabala predominated, and as he was a contemporary of Isaac Luria, Ḥayyim Vital, and other cabalists, it was natural that he should be influenced by mystical views. Although, as has been already said, he was opposed to the Cabala, he devoted a part of his time to its study. His "Torat ha-'Olah" is full of cabalistic opinions. He appreciated the Zohar, believing it to have been revealed from Mount Sinai; and he rejoiced when he found that his philosophical views were confirmed by it ("Torat ha-'Olah," I., xiii.; II., i.). He occupied himself, too, with the study of Gematria (*ib.* I., xiii.), and believed that a man might perform wonders by means of combinations ("ẓerufim") of holy names (*ib.* III., lxxvii.). But he refutes the cabalists when their opinions do not agree with philosophy. In general, Isserles endeavored to prove that the teaching of true cabalists is the same as that of the philosophers, the only difference being in the language employed (*ib.* III., iv.). Still in halakic matters he decided against the Zohar ("Darke Mosheh" on Ṭur Oraḥ Ḥayyim, 207; *ib.* on Ṭur Yoreh De'ah, 65).

The other works of Isserles are:

Commentary on the Zohar (unpublished).

"Yesode Sifre ha-Ḳabbalah," a treatise on the Cabala, mentioned in "Darke Mosheh" on Ṭur Oraḥ Ḥayyim, 61.

Notes and additions to Zacuto's "Yuḥasin." Cracow, 1580.

Notes to Elijah Mizraḥi's supercommentary on Rashi, a part of which has been published by Joseph Kohen-Ẓedeḳ in "Meged Yeraḥim," ii. Lemberg, 1856.

Notes on the "Moreh Nebukim" and on the commentaries on that work by Shem-Ṭob and Efodi. Published by Kohen-Ẓedeḳ in "Oẓar Ḥokmah," No. 2.

Commentary on the Haggadah of the Talmud, mentioned in "Torat ha-'Olah," I., ch. lxxxiii.

Commentary on Sanhedrin ("Darke Mosheh" on Ṭur Oraḥ Ḥayyim, 486), on Shabbat ("Torat ha-'Olah," I., ch. xix.), and on Sukkot, entitled "Megillat Setarim" (*ib.* I., ch. viii.).

Commentary on the Song of Solomon (*ib.* I., ch. xv.).

Commentary on Peuerbach's "Theorica" (Michael, "Oẓerot Ḥayyim," No. 189; Oppenheim, "Ḳehillat Dawid," No. 1673).

ISSI (ISI, ISSA). See Ise and Jose.

ISTRIA: A small peninsula at the northern end of the Adriatic Sea, having about 320,000 inhabitants, of whom 285 are Jews. Ethnographically it is Italian, although politically it is under Austrian rule. At times it has included the city of Triest, which now forms a province by itself and has a very important Jewish community. In Istria, as in almost the whole of Europe, the Jews conducted banks for lending money, the first of them being opened in 1380 at Capo d'Istria; others were subsequently founded at Isola, Pirano, Rovigno, Pola, and Veglia. The street in which the Jewish bankers and their associates were located was called "Ghetto"; and this name was preserved even after their departure.

The "Capitoli."

The most important of these banks seems to have been that in Pirano, of which the "capitoli" ("capitula Judæorum Pirani"), *i.e.*, agreements between the city of Pirano and the said bankers, approved by the republic of Venice in 1484, are still extant. Under these "capitoli" the city of Pirano was obliged to provide the Jews with sound animals for slaughter according to Hebrew rites, and with a field for a cemetery, and to permit them to invite other "Zudei," including teachers for their sons, to settle in the city. Jews above thirteen years of age were obliged to wear an "O" on their clothing, but not within Venetian domains. Jewesses were exempt from this rule. The Jews did not possess a synagogue, but their religious services were held in a house under the protection of the city. At Isola the bank was conducted by a certain Meïr, who in 1478 left it to his wife Richa.

Family Names Derived from Istria.

In 1634 a "monte di pietà," in opposition to the bank of the Jews, was established at Pirano by the city, and later others were opened elsewhere in Istria. In consequence the Jews disappeared toward the end of the seventeenth century. Most of them then went to Italy, where there still exist Jewish family names derived from Istrian towns, as "Muggia," "Parenzo," "Coen Pirani," etc. Others settled at Triest, where their gifts to the synagogue are still remembered in the Yom Kippur service. At Muggia, a little Istrian town on the gulf of the same name, opposite Triest, there is an inscription on the town hall recording the expulsion of the Jews in 1532.

Asher Lämmlein.

Istria was the field of operations of the pseudo-Messiah Asher Lämmlein about 1502.

Most of the 285 Jews in Istria in 1900 were engaged in commerce. There were 20 at Rovigno, 14 at Parenzo, 10 at Capo d'Istria, and 112 at Pola, where a new congregation is now (1903) being organized. The remainder were scattered here and there. The Jews of Pola, for the most part German, are without a synagogue, but since there is a large garrison at the place and many Jews serve in the army or in the navy, the government supports a minister, who is sent from Triest on the high festivals to hold religious services in a room in the navy building, to which all Jews are admitted. There has been recently assigned to them ground for a cemetery.

In accordance with the law of March 4, 1890, the Jews of Istria form part of the Jewish community of Triest.

Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

IMMANUEL LÖW, Ph.D.,
Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,
Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,
Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,
Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,
Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Israelitischer Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,
Rabbi in Warsaw, Russia.

E. SCHWARZFELD, LL.D.,
Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,
Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,
Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,
Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. The spellings of names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are generally retained; cross-references are given when topics are treated under forms transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise ' or by dieresis; e.g., pe'er or Meïr.*

ב *b*	ז *z*	ל *l*	פּ (*with dagesh*), *p*	שׁ *sh*
ג *g*	ח *ḥ*	מ *m*	פ (*without dagesh*), *f*	שׂ *s*
ד *d*	ט *ṭ*	נ *n*	צ *ẓ*	ת *t*
ה *h*	י *y*	ס *s*	ק *ḳ*	
ו *w*	כ *k*	ע '	ר *r*	

NOTE: The presence of dagesh lene is not noted except in the case of פּ. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ (ḳameẓ) *a*	◌ֻ *u*	◌ַ *a*	◌ֱ *e*	וֹ *o*
◌ָ (ḳameẓ ḥatuf) *o*				
◌ֵ *e*	◌ֶ *e*	◌ֳ *o*	◌ִי *i*	
◌ִ *i*	◌ְ *e*	◌ֲ *a*	וּ *u*	

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words, except such as have become familiar to English readers in other forms, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ *See* א *above*	خ *kh*	ش *sh*	غ *gh*	ن *n*
ب *b*	د *d*	ص *ṣ*	ف *f*	ه *h*
ت *t*	ذ *dh*	ض *ḍ*	ق *ḳ*	و *w*
ث *th*	ر *r*	ط *ṭ*	ك *k*	ي *y*
ج *j*	ز *z*	ظ *ẓ*	ل *l*	
ح *ḥ*	س *s*	ع '	م *m*	

2. Only the three vowels—a, i, u—are represented:

◌َ *a*	◌ِ *i*	◌ُ *u*

No account has been taken of the *imalah; i* has not been written *e*, nor *u* written *o*.

---

* In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al,* no account being taken of the assimilation of the *l* to the following letter; *e.g., Abu al-Salt,* not *Abu-l-Salt; Nafis al-Daulah,* not *Nafis ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but when followed by a genitive, *at; e.g., Risalah dhat al-Kursiyy,* but *Hi'at al-Aflak.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g., 'Amr,* not *'Amru* or *'Amrun; Ya'ḳub,* not *Ya'ḳubun;* or in a title, *Kitab al-Amanat wal-I'tiḳadat.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in other forms, as *Czar, Alexander, deciatine, Moscow,* are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h, v,* or *g*	Р р	*r*	Ь ь	half mute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и І і	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.,* Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto;* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.,* to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meïri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini* from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g., Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* he-Ḥasid; *Gershom* of Metz; *Isaac* of Corbeil.

3. Names containing the words *d', de, da, di, van, von, y, of, ben, ha-, ibn** are arranged under the letter of the name following this word; *e.g.,* de Pomis under *Pomis,* de Barrios under *Barrios,* Jacob d'Illescas under *Illescas.* The order of topics is illustrated by the following examples:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Zeeb
Abraham Benveniste

---

* When IBN has come to be a specific part of a name, as IBN EZRA, such name is treated in its alphabetical place under "I."

NOTE TO THE READER.

Subjects on which further information is afforded elsewhere in this work are indicated by the use of capitals and small capitals in the text; as, ABBA ARIKA; PUMBEDITA; VOCALIZATION.

LIST OF ABBREVIATIONS

THE

JEWISH ENCYCLOPEDIA

ITALY: Kingdom of southern Europe, with a total population of about 32,000,000, in which there are about 34,653 Jews (1901). This country, which the Israelites, punning upon the name, called "I Ṭal Yah" = "the land of the dew of the Lord" (comp. Gen. xxvii. 39), has been prominent in the history of the Jews. This prominence has not been due to the number of Jews in Italy, which has never been particularly large, but rather to the fact that they were not subjected to those continued and cruel persecutions to which they were exposed in other countries; and they may be said to have enjoyed, especially at certain periods, a fair degree of liberty.

Under the Empire.

The first definite appearance of Jews in the history of Italy was that of the embassy sent by Simon Maccabeus to Rome to strengthen the alliance with the Romans against the Syrians. The ambassadors received a cordial welcome from their coreligionists who were already established there, and whose number at the time of the emperor Claudius was comparatively so great that when, for some unknown reason, he was desirous of expelling them, he did not dare to do so. Moreover, when, toward the end of his reign, by reason of trouble provoked by a Christian propagandist, he actually expelled a portion of the Jews, there remained in Rome a fully organized community, presided over by heads called *ἄρχοντες* or *γερουσιάρχοι*. The Jews maintained in Rome several synagogues, whose spiritual head was called *ἀρχισυνάγωγος*; in their cemetery the tombstones bore the symbolic seven-branched candlestick. Even in the time of Tiberius—who pretended to be friendly to the Jews, but really was as hostile to them as Augustus had been—many converts to Judaism were made in Rome. It was when the wife of his friend, the senator Saturninus, became a convert to Judaism, that Tiberius showed his enmity toward the adherents of this faith by publishing, on the advice of his minister Sejanus, an edict commanding all Jews and proselytes who should not have abjured their faith before a fixed date to leave Rome under penalty of perpetual bondage. A large number of young Jews was ordered to fight against the brigands in Sardinia, where the greater part of them lost their lives. This was the first persecution of the Jews in the West. There were other Jewish colonies at that time in southern Italy, in Sicily, and in Sardinia, but they were neither large nor important.

From Rome, where Judaism had many adherents and enjoyed a certain influence even at court, the Jews spread into other parts of Italy; but the greater number of those who came to such parts somewhat later immigrated from other countries. Thus in Sicily there came from Africa to Palermo about 1,500 families, and to Messina about 200 families. To Tuscany Jews came from Spain; to Lombardy, to Piedmont, and to the territory of Genoa, from central Italy. But they were never numerous; only in Milan, Turin, and Genoa were there communities of some importance; and even from these provinces they were frequently expelled and after an interval allowed to reenter. From the Orient, where the Venetian republic had important colonies, many went to Venice, and also to Ancona and Pesaro. From these cities, too, as from Ferrara, they were at times expelled; and, as elsewhere, they were readmitted. There were some Jews in almost every village of the Venetian possessions; at Padua, Verona, Mantua, and Modena there were long-established and important communities. In the Neapolitan realm the greater number of the Jews were settled in Naples, in Capua, and in other large towns along the Adriatic coast, such as Bari, Otranto, Brindisi, Taranto, Benevento, Sulmona, Salerno, and Trani. In the interior there were scarcely any Jews.

After Judea had been declared a Roman province, the procurators sent thither by the Senate became more and more cruel in their treatment of the Jews, and finally incited them to a rebellion which ended in the ruin of the Jewish state under the emperor Titus (70 C.E.). A large number of prisoners and soldiers were transferred to Italy; but naturally the vanquished did not feel disposed to emigrate to the land of their conquerors and oppressors. Titus had a reign of short duration; and his successor, Domitian, treated the Jews cruelly. To him is attributed the intention to execute a decree which he had forced the Senate to approve, and under which, within thirty days after its promulgation, all the Jewish subjects of Rome were to be massacred. The patriarch, with three of the most illustrious tannaim, repaired to Rome in order to prevent the carrying out of this infamous project; soon afterward Domitian died, and his successor, Nerva, showed himself favorable to his Jewish subjects. He remained on the throne but a short time and was succeeded by Trajan, a persistent opponent of the Jews, and in whose wars many thousands of them lost their lives in Babylon, in Egypt, and in Cyprus. Hadrian, in turn, was at first inclined to favor the Jews, and he even granted them permission to rebuild the Temple at Jerusalem (118). This concession he later withdrew, and, indeed, he became one of their most bitter enemies, issuing an edict forbidding them to continue their religious practises.

Influence of Christianity.

A few years later this hostile legislation, which for the most part had never been enforced, was repealed, and the condition of the Jews was for a short time improved. Through the growth and diffusion of Christianity, however, it soon became worse and worse. As the Christians detached themselves from the Jews, the former became the fiercest enemies of the latter. When Constantine, who at the beginning of his reign had advocated liberty of conscience, became a convert to Christianity, he established oppressive laws for the Jews; but these were in turn abolished by Julian the Apostate, who showed his favor toward the Jews to the extent of permitting them to resume their scheme for the reconstruction of the Temple at Jerusalem. This concession was withdrawn under his successor, who, again, was a Christian; and then the oppression grew considerably. Thus periods of persecution were followed by periods of quiescence, until the fall of the Roman empire.

At the time of the foundation of the Ostrogothic rule under Theodoric, there were flourishing communities of Jews in Rome, Milan, Genoa, Palermo, Messina, Agrigentum, and in Sardinia. The popes of the period were not seriously opposed to the Jews; and this accounts for the ardor with which the latter took up arms for the Ostrogoths as against the forces of Justinian—particularly at Naples, where the remarkable defense of the city was maintained almost entirely by Jews. After the failure of the various attempts to make Italy a province of the Byzantine empire, the Jews had to suffer much oppression from the Exarch of Ravenna; but it was not long until the greater part of Italy came into the possession of the Lombards, under whom they lived in peace. Indeed, the Lombards passed no exceptional laws relative to the Jews. Even after the Lombards embraced Catholicism the condition of the Jews was always favorable, because the popes of that time not only did not persecute them, but guaranteed them more or less protection. Pope Gregory the Great treated them with much consideration. Under succeeding popes the condition of the Jews did not grow worse; and the same was the case in the several smaller states into which Italy was divided. Both popes and states were so absorbed in continual external and internal dissensions that the Jews were left in peace. In every individual state of Italy a certain amount of protection was granted to them in order to secure the advantages of their commercial enterprise. The fact that the historians of this period scarcely make mention of the Jews, proves that their condition was tolerable.

There was an expulsion of Jews from Bologna, it is true, in 1172; but they were soon allowed to return. A nephew of Rabbi Nathan ben Jehiel acted as administrator of the property of Alexander III., who showed his amicable feelings toward the Jews at the Lateran Council of 1179, where he defeated the designs of hostile prelates who advocated restrictive and odious anti-Jewish laws. Under Norman rule the Jews of southern Italy and of Sicily enjoyed even greater freedom; they were considered the equals of the Christians, and were permitted to follow any career; they even had jurisdiction over their own affairs. Indeed, in no country were the canonical laws against the Jews so frequently disregarded as in Italy. A later pope—either Nicholas IV. (1288-92) or Boniface VIII. (1294-1303)—had for his physician a Jew, Isaac ben Mordecai, surnamed Maestro Gajo.

Early Literature.

Among the early Jews of Italy who left behind them traces of their literary activity was Shabbethai Donnolo (died 982). Two centuries later (1150) there became known as poets Shabbethai ben Moses of Rome; his son Jehiel Kalonymus, once regarded as a Talmudic authority even beyond Italy; and Rabbi Jehiel of the Mansi (Anaw) family, also of Rome. Their compositions are full of thought, but their diction is rather crude. Nathan, son of the above-mentioned Rabbi Jehiel, was the author of a Talmudic lexicon ("'Aruk") which became the key to the study of the Talmud.

Solomon Parḥon compiled during his residence at Salerno a Hebrew dictionary which fostered the study of Biblical exegesis among the Italian Jews. On the whole, however, Hebrew culture was not in a flourishing condition. The only liturgical author of merit was Joab ben Solomon, some of whose compositions are extant.

Toward the second half of the thirteenth century signs appeared of a better Hebrew culture and of a more profound study of the Talmud. Isaiah di Trani the Elder (1232-79), a high Talmudic authority, was the author of many celebrated responsa. David, his son, and Isaiah di Trani the Younger, his nephew, followed in his footsteps, as did their descendants until the end of the seventeenth century. Meïr ben Moses presided over an important Talmudic school in Rome, and Abraham ben Joseph over one in Pesaro. In Rome two famous physicians, Abraham and Jehiel, descendants of Nathan ben Jehiel, taught the Talmud. One of the women of this gifted family, Paola dei Mansi, also attained distinction; her Biblical and Talmudic knowledge was considerable, and she transcribed Biblical commentaries in a notably beautiful handwriting (see Jew. Encyc. i. 567, *s.v.* Paola Anaw).

About this period Frederick II., the last of the Hohenstaufen, employed Jews to translate from the Arabic philosophical and astronomical treatises; among these writers were Judah Kohen of Toledo, later of Tuscany, and Jacob Anatolio of Provence. This encouragement naturally led to the study of the works of Maimonides—particularly of the "Moreh Nebukim"—the favorite writer of Hillel of Verona (1220-95). This last-named litterateur and philosopher practised medicine at Rome and in other Italian cities, and translated into Hebrew several medical works. The liberal spirit of the writings of Maimonides had other votaries in Italy; *e.g.*, Shabbethai ben Solomon of Rome and Zerahiah Ḥen of Barcelona, who migrated to Rome and contributed much to spread the knowledge of his works. The effect of this on the Italian Jews was apparent in their love of freedom of thought and their esteem for literature, as well as in their adherence to the literal rendering of the Biblical texts and their opposition to fanatical cabalists and mystic theories. Among other devotees of these theories was IMMANUEL B. SOLOMON of Rome, the celebrated friend of Dante. The discord between the followers of Maimonides and his opponents wrought most serious damage to the interests of Judaism.

Innocent III.

The political and social status of the Jews was also destined to suffer because of the advent to the papal throne of Innocent III. (1198–1216), the chief originator of the many persecutions suffered in later times by the Jews in all Christian lands. This retrogressive pope, the most bitter enemy of freedom of thought, set into operation against the Jews most illegitimate measures; especially did he threaten with excommunication those who placed or maintained Jews in public positions, and he insisted that every Jew holding office should be dismissed. The deepest insult was the order that every Jew must always wear, conspicuously displayed, a special badge.

In 1235 Pope Gregory IX. published the first bull against the ritual sacrifice עלילת הדם. Other popes followed his example, particularly Innocent IV. in 1247, Gregory X. in 1272, Clement VI. in 1348, Gregory XI. in 1371, Martin V. in 1422, Nicholas V. in 1447, Sixtus V. in 1475, Paul III. in 1540, and later Alexander VII., Clement XIII., and Clement XIV.

The rise of poetry in Italy at the time of Dante influenced the Jews also. The rich and the powerful, partly by reason of sincere interest, partly in obedience to the spirit of the times, became patrons of Jewish writers, thus inducing the greatest activity on their part. This activity was particularly noticeable at Rome, where a new Jewish poetry arose, mainly through the works of Leo Romano. translator of the writings of Thomas Aquinas and author of exegetical works of merit; of Judah Siciliano, a writer in rimed prose; of Kalonymus ben Kalonymus, a famous satirical poet; and especially of the above-mentioned Immanuel. On the initiative of the Roman community, a Hebrew translation of Maimonides' Arabic commentary on the Mishnah was made. At this time Pope John XXII. was on the point of pronouncing a ban against the Jews of Rome. The Jews instituted a day of public fasting and of prayer to appeal for divine assistance. King Robert of Sicily, who favored the Jews, sent an envoy to the pope at Avignon, who succeeded in averting this great peril. Immanuel himself described this envoy as a person of high merit and of great culture. This period of Jewish literature in Italy is indeed one of great splendor. After Immanuel there were no other Jewish writers of importance until Moses da Rieti (1388), a writer of Hebrew as elegant as his Italian; but despite this, his wearisome and unnatural style could not compare with the pleasing and spirited works of Immanuel.

Benedict XIII.

The Jews suffered much from the relentless persecutions of the antipope Benedict XIII.; and the accession of his successor, Martin V., was hailed with delight by the Jews. The synod convoked by the Jews at Bologna, and continued at Forli, sent a deputation with costly gifts to the new pope, praying him to abolish the oppressive laws promulgated by Benedict and to grant the Jews those privileges which had been accorded them under previous popes. The deputation succeeded in its mission, but the period of grace was short; for Martin's successor, Eugenius IV., at first favorably disposed toward the Jews, ultimately reenacted all the restrictive laws issued by Benedict. In Italy, however, his bull was generally disregarded. The great centers, such as Venice, Florence, Genoa, and Pisa, realized that their commercial interests were of more importance than the affairs of the spiritual leaders of the Church; and accordingly the Jews, many of whom were bankers and leading merchants, found their condition better than ever before. It thus became easy for Jewish bankers to obtain permission to establish banks and to engage in monetary transactions. Indeed, in one instance even the Bishop of Mantua, in the name of the pope, accorded permission to the Jews to lend money at interest. All the banking negotiations of Tuscany were in the hands of a Jew, Jehiel of Pisa. The influential position of this successful financier was of the greatest advantage to his coreligionists at the time of the exile from Spain.

The Jews were also successful as medical practitioners. William of Portaleone, physician to Ferdinand, King of Naples, and to the ducal houses of Sforza and Gonzaga, was one of the ablest of that time. He was the first of the long line of illustrious physicians in his family.

Influence of the Renascence; Printing.

The revival of interest in the studies of ancient Greece and Rome stimulated the study of Biblical literature; and such men as Pico di Mirandola and Cardinals Ægidius da Viterbo and Domenico Grimani devoted themselves to the study of Hebrew and Hebrew literature. This produced amicable relations between Jews and Christians. At the time of the Medicis Jews frequented the universities and were active in the renascence of letters and of the sciences; but they remained strangers to the fine arts, especially painting and sculpture. The printing establishments of Reggio, Pieve di Sacco, Mantua, Ferrara, Bologna, and Naples were founded at this period. Obadiah of Bertinoro, eloquent preacher and famous commentator of the Mishnah; Messer Leon (Judah ben Jehiel) of Naples, rabbi and physician at Mantua; and Elijah Delmedigo, the philosopher, flourished at this period. Pico di Mirandola was a disciple of the last-named, as were many others, who learned from him the Hebrew language or studied philosophy under his guidance. Driven from Germany and Poland by persecutions, many learned rabbis and Talmudists went to Italy; among these were Judah Minz, who became rabbi at Padua, and Joseph Colon, of French extraction, rabbi successively at Bologna and Mantua. Both were opposed to the liberal ideas then dominant in Italy; and soon strife and controversy arose between Colon and Messer Leon, between Minz and Elijah Delmedigo.

Toward the end of the fifteenth century the monks disturbed the relatively peaceful condition of the Jews. The most bitter enemy was Bernardinus of Feltre. Not succeeding in inflaming the Italians with his calumnies, he instigated a bloody persecution of the Jews of Trent, then under German rule. The murder of the infant Simon was attributed to them. In their favor appeared the Doge of Venice, Peter Mocenigo, and Pope Sixtus IV., who at first refused to proclaim as a saint the child found dead, firmly declaring the story of the ritual murder to be an invention.

A great number of the exiles from Spain (1492) betook themselves to Italy, where they were given protection by King Ferdinand I. of Naples. Don Isaac Abravanel even received a position at the Neapolitan court, which he retained under the succeeding king, Alfonso II. The Spanish Jews were well received also in Ferrara by Duke Hercules I., and in Tuscany through the mediation of Jehiel of Pisa and his sons. But at Rome and Genoa they experienced all the vexations and torments that hunger, plague, and poverty bring with them, and were forced to accept baptism in order to escape starvation. In some few cases the immigrants exceeded in number the Jews already domiciled, and gave the determining vote in matters of communal interest and in the direction of studies.

Refugees from Spain.

From Alexander VI. to Clement VII. the popes were indulgent toward the Jews, having more urgent matters to occupy them. Indeed, the popes themselves and many of the most influential cardinals openly violated one of the most severe enactments of the Council of Basel, namely, that prohibiting Christians from employing Jewish physicians; and they even gave the latter positions at the papal court. The Jewish communities of Naples and of Rome received the greatest number of accessions; but many Jews passed on from these cities to Ancona and Venice, and thence to Padua. Venice, imitating the odious measures of the German cities, assigned to the Jews a special quarter ("ghetto").

Isaac Abravanel with his sons exercised a beneficent influence alike upon the native Jews and the newcomers. Among the sons the most influential was Samuel; he and his wife, Benvenida, were on terms of intimacy with the court of Naples. The daughter of the governor, Don Pedro de Toledo, was attached to Benvenida, whom she called mother, and continued her love and respect after her marriage to Cosimo II., Duke of Tuscany. These relations with powerful and illustrious families made Abravanel the pride and shield of the Italian Israelites.

The Talmudic school at Padua, presided over by Judah Minz, enjoyed great repute. Not only young men but those advanced in life came to him from Italy, from Germany, and even from Turkey, to attend his lectures. He died at an advanced age; and his son Abraham continued the school, though with diminished success. At Bologna during the first half of the sixteenth century flourished Obadiah Sforno, who, while practising as a physician, applied himself with much earnestness to Biblical exegesis and to philosophy. He dedicated some of his works, written in Hebrew but furnished with a Latin translation, to King Henry III. of France. At Ferrara Abraham ben Mordecai Farissol, philosopher and exegete, enjoyed the protection of Hercules I. of Este, a patron of literature, science, and art. It became common in the Italian cities for learned Jews to enter into discussions of theological questions with the monks, and in several of these Farissol took part. By order of the duke his dissertations, originally written in Hebrew, were translated into Italian, so that his opponents could prepare a defense. Among those who assisted Reuchlin in aid of the Jews was Ægidius da Viterbo, head of the Augustinians, disciple and patron of Elijah Levita, and student of Hebrew literature and poetry. "Fighting with you," he wrote to Reuchlin, "we fight for light against darkness, aiming to save not the Talmud, but the Church." The watchword which went forth from Italy and passed on everywhere was "For the salvation of the Talmud."

In Italy Elijah Levita numbered many Christians among his disciples. Just as many illustrious Italians, among them princes of the Church, devoted themselves with zeal to Hebrew studies, so the Jews with equal ardor devoted their energies to Italian, which they spoke with ease and elegance and which they sometimes employed in their writings. A famous writer was Leo Hebræus (Judah Abravanel), known through his "Dialoghi di Amore." His language was fluent and correct, and his work was everywhere enthusiastically received.

Spread of the Cabala.

In the sixteenth century cabalistic doctrines were introduced into Italy by Spanish exiles, Abraham Levita, Baruch of Benevento, and Judah Ḥayyaṭ, among others. These awakened much interest, and their mystical ideas appealed to many. Moreover, the fact that prominent Christians, such as Ægidius da Viterbo and Reuchlin, were devoted to the Cabala, exercised a great influence upon the Jews. The wide-spread dispersion of the Jews had weakened in many minds faith in a final redemption; so that the new Messianic interpretations of the cabalists appealed to them. The indefatigable Abravanel wrote three works in which he attempted to show the truth of the Messianic doctrines; but, carried away by the dominant error of the times, he unwisely fixed a date for the advent of the Messiah. In Istria—a country which had been under Venetian dominion—appeared Asher Lämmlein, a German, who pretended to be a prophet, and who announced with much solemnity the coming of the Messiah in the year 1502. In this "year of penitence" there were much fasting, much prayer, and a generous distribution of alms. The movement was so general that even Christians believed Lämmlein to be possessed of the true prophetic spirit. The year came to an end, and the prophecy remained unfulfilled. Discouraged, many embraced Christianity. The cabalists, however, were not disheartened, and, supported by reports of miraculous happenings, they began to revive the courage of their coreligionists

Pseudo-Messiahs.

and to preach again faith in the coming of the Messiah. They were disposed to place credence in the most improbable assertions; and accordingly, when David Reubeni made his appearance in Italy, he found ready a large body of supporters. His mission was to gain support, especially from the pope, to fight the Turks. David went to Venice and to Rome, where he presented himself before Pope Clement VII., by whom he was received with all the honors accorded to an ambassador. The idea of a crusade of Jews against Turks was a most pleasing one to the pope. After a year's sojourn in Rome David was called to Portugal. Here he found a champion in a Marano in service at the court, who, undergoing circumcision and changing his name to Solomon Molko, announced his fealty to Judaism. The Maranos and cabalists maintained generally that the sack of Rome in 1527 was a sign of the coming of the Messiah. But David lost favor, and was expelled from Portugal. Thereupon the Maranos were condemned to the stake by thousands. Many succeeded in escaping to Italy; and the pope, together with the college of cardinals, wishing to restore prosperity to Ancona, assigned to the exiles an asylum in that city. Molko also went to Ancona, where, as a professed Jew, he delivered public Messianic sermons, and held theological disputations with illustrious Christians. In some of his sermons he prophesied a great flood. At Rome, where, after thirty days of fasting, he presented himself to the pope, he was favorably received, and was given a safe-conduct through all the papal dominions. The flood which he had prophesied really came to pass (Oct., 1530); and on his return to Rome he was greeted as a prophet. Accompanied by a faithful servant, he escaped the Inquisition and reached Ancona, where he again began his preaching. The fierce persecutions suffered by the Spanish and Portuguese Maranos induced Molko and Reubeni to repair to Ratisbon and appear before the emperors Charles V. and Ferdinand of Austria to solicit their aid. Josel of Rosheim gave them his support; nevertheless both enthusiasts were made prisoners. Molko was burned on the pyre at Mantua, and Reubeni was imprisoned in Spain, where he died three years later.

Expulsion from Naples.

The ultra-Catholic party tried with all the means at its disposal to introduce the Inquisition into the Neapolitan realm, then under Spanish rule. Charles V., upon his return from his victories in Africa, was on the point of exiling the Jews from Naples, but deferred doing so owing to the influence of Benvenida, wife of Samuel Abravanel. A few years later, however (1533), such a decree was proclaimed, but upon this occasion also Samuel Abravanel and others were able through their influence to avert for several years the execution of the edict. Many Jews repaired to Turkey, some to Ancona, and still others to Ferrara, where they were received graciously by Duke Hercules II.

After the death of Pope Paul III., who had showed favor to the Jews, a period of strife, of persecutions, and of despondency set in. A few years later the Jews were exiled from Genoa, among the refugees being Joseph ha-Kohen, physician to the doge Andrea Dorea and eminent historian. The Maranos, driven from Spain and Portugal, were allowed by Duke Hercules to enter his dominions and to profess Judaism without molestation. Thus, Samuel Usque, also a historian, who had fled from the Inquisition in Portugal, settled in Ferrara; and Abraham Usque founded a large printing establishment there. A third Usque, Solomon, merchant of Venice and Ancona and poet of some note, translated the sonnets of Petrarch into excellent Spanish verse, which was much admired by his contemporaries.

While the return to Judaism of the Marano Usques caused much rejoicing among the Italian Jews, this was counterbalanced by the deep grief into which they were plunged by the conversion to Christianity of two grandsons of Elijah Levita, Leone Romano and Vittorio Eliano. One became a canon of the Church; the other, a Jesuit. They violently slandered the Talmud to Pope Julius III. and the Inquisition; and as a consequence the pope pronounced the sentence of destruction against this work, to the printing of which one of his predecessors, Leo X., had given his sanction. On the Jewish New-Year's Day (Sept. 9), 1553, all the copies of the Talmud in the principal cities of Italy, in the printing establishments of Venice, and even in the distant island of Candia (Crete), were burned. Still more cruel was the fate of the Jews under Pope Marcellus III., who wished to exile them from Rome because of a charge of ritual murder. He was restrained from the execution of this cruel and unjust project by Cardinal Alexander Farnese, who, animated by a true love for his fellow creatures, succeeded in bringing to light the infamous author of the murder.

Paul IV.

But the most serious misfortune for the Jews was the election of Paul IV. as Marcellus' successor. This cruel pontiff, not content with confirming all the more severe of the bulls against the Jews issued up to that time, added others still more oppressive and containing all manner of prohibitions, which condemned the Jews to the most abject misery, deprived them of the means of sustenance, and denied to them the exercise of all professions. They were finally forced to labor at the restoration of the walls of Rome without any compensation whatever. Indeed, upon one occasion the pope had secretly given orders to one of his nephews to burn at night the quarter inhabited by the Jews; but Alexander Farnese, hearing of the infamous proposal, succeeded in frustrating it. Many Jews now abandoned Rome and Ancona and went to Ferrara and Pesaro. Here the Duke of Urbino welcomed them graciously in the hope of directing to the new port of Pesaro the extensive commerce of the Levant, which was at that time exclusively in the hands of the Jews of Ancona. Among the many who were forced to leave Rome was the illustrious Marano, Amato Lusitano, a distinguished physician, who had often attended Pope Julius III. He had even been invited to become physician to the King of Poland, but had declined the offer in order to remain in Italy. He fled from the Inquisition to Pesaro, where he openly professed Judaism.

The persecutions at Ancona now became barbarous. Three Jews and a Jewess, Donna Maiora, were

Persecution at Ancona.

burned alive at the stake, preferring death to apostasy. The glories of their martyrdom were sung by three Jewish poets in elegies which are still recited in the synagogue at Ancona on the anniversary of the destruction of the Temple. Another interesting personality was Donna Gracia Mendesia Nasi. Charles V. and other potentates had frequently had recourse to the bank founded by her husband in Portugal. At her husband's death Donna Gracia moved with her children to Antwerp, and thence, after protracted wanderings with varying fortunes, to Venice, Ferrara, Rome, Sicily, and finally to Turkey, where she succeeded in persuading Sulaiman to force the pope to set at liberty all the Turkish Jews imprisoned at Ancona. These tragic events, and in general the unprecedented cruelty and violence of Paul IV., induced the Jews to unite and to form a plan of retaliation by allying themselves with the Jews of the Levant to boycott the port of Ancona, to stop all commercial relations with that papal state, and thereby to cripple its activity. This plan was partially carried out, and the city of Ancona began rapidly to decline. Special circumstances, however, interfered with the complete execution of the scheme, especially the supreme authority of the pope throughout Europe, which enabled him to prejudice popular feeling against the Jews in countries other than Italy and to intensify the antagonism toward them in his own land. At the end of a year the condition of Ancona was so desperate that the magistrates of the city complained to the pope, urging that if steps were not soon taken the city would be entirely ruined. As the league against the pope waned in influence, the Duke of Urbino, who, as stated above, had hoped to attract to Pesaro all the Eastern Jewish trade and had been disappointed in his expectation, withdrew his protection from the Jews. A very large number of them emigrated, including Lusitano, who settled at Ragusa. Even the Duke of Ferrara showed himself less favorable to the Jews at this time, so that Abraham Usque, being deprived of the duke's protection, was forced to close his printing-office at Ferrara.

The School of Cremona.

But it was about this time that there was founded in the city of Cremona and under the protection of the Spanish governor of Milan, a famous school, directed by Joseph of Ettlingen (Ottolenghi). This eminent Talmudist knew where to gather a goodly number of hidden copies of the Talmud and of other Jewish works; and he had other copies printed at Riva di Trento, which were sent to Germany, Poland, etc. Thus the study of the Talmud was resumed, and learning flourished in northern Italy. But peace was concluded between the pope and the Spaniards; and some fanatics, aided by certain baptized Jews, persuaded the governor of Milan to destroy all the Hebrew books in Cremona. Twelve thousand volumes were burned in public in May, 1559, including all Jewish books except the Zohar, which, according to the opinion of most of the cardinals and princes of the Church, contained the mysteries of Christianity, and the introduction to which had been printed (Mantua, 1558) by Emanuel Benevento under Paul IV. with the sanction of the Inquisition. Somewhat later a complete edition of the Zohar was printed at a Christian establishment in Cremona, with an introduction by the baptized grandson of Elijah Levita, Vittorio Eliano, who had already contributed so much to the destruction of the Talmud. This predilection of the Church and the clergy for the Zohar lasted but a short time; for a few years later this book was likewise placed upon the Index.

Pius IV., the successor of Paul IV., was in every respect a better man than his predecessors; but, being sickly and weak, he submitted to the influence of the Jesuits. Mordecai Soncino appeared before him to obtain for the emperor Ferdinand absolution from an oath made by him to expel the Jews from Prague. The absolution was granted; and the Jews were favored, particularly during the succeeding reign of Maximilian. The Soncinos had established printing-presses in various cities of Lombardy, also at Constantinople and at Prague. They printed not only Jewish works, but also Latin ones, among them the poems of Petrarch. Permission to reprint the Talmud, but under another name and with the omission of all that might be considered contrary to Christianity, was granted to a deputation which waited on Pius IV. with a large gift of money. The Talmud was immediately reprinted at Basel.

Expulsion from Papal States.

But this tolerant pope was succeeded by Pius V., even more cruel than Paul IV., and excelling him in wickedness. He brought into force all the anti-Jewish bulls of his predecessors—not only in his own immediate domains, but throughout the Christian world. In Lombardy the expulsion of the Jews was threatened, and, although this extreme measure was not put into execution, they were tyrannized in countless ways. At Cremona and at Lodi their books were confiscated; and Carlo Borromeo, who was afterward canonized, persecuted them mercilessly. In Genoa, from which city the Jews were at this time expelled, an exception was made in favor of Joseph ha-Kohen. In his "'Emeḳ ha-Bakah" he narrates the history of these persecutions. He had no desire to take advantage of the sad privilege accorded to him, and went to Casale Monferrato, where he was graciously received even by the Christians. In this same year the pope directed his persecutions against the Jews of Bologna, who formed a rich community well worth despoiling. Many of the wealthiest Jews were imprisoned and placed under torture in order to force them to make false confessions. When Rabbi Ishmael Ḥanina was being racked, he declared that should the pains of torture elicit from him any words that might be construed as casting reflection on Judaism, they would be false and null. It was forbidden to the Jews to absent themselves from the city; but many succeeded in escaping by bribing the watchmen at the gates of the ghetto and of the city. The fugitives, together with their wives and children, repaired to the neighboring city of Ferrara. Then Pius V. decided to banish the Jews from all his dominions, and, despite the enormous loss which was likely to result from this measure, and the remonstrances of influential and well-meaning cardinals, the Jews (in all about 1,000 families) were actually expelled from all the papal states excepting Rome and Ancona. A few became Christians; but the large majority migrated to Turkey. A great sensation was caused in Italy by the choice of a prominent Jew, Solomon of Udine, as Turkish ambassador to Venice to negotiate peace with that republic, which was accomplished in July, 1574. As there was pending a decree of expulsion of the Jews from the Venetian domains, the Senate was at first in doubt whether it could treat with this Jew; but later, through the influence of the Venetian diplomats themselves, and particularly of the consul, Marc Antonio Barbaro, who esteemed Udine highly, he was received with great honors at the palace of the doges. In virtue of this exalted position he was able to render great service to his coreligionists, and through his influence Jacob Soranzo, agent of the republic at Constantinople, came to Venice. Solomon was successful also in having the decree of expulsion revoked, and he furthermore obtained a promise that it should never be reissued and that those Jews who had left Venice should be allowed to return and settle in peace. Laden with honors and gifts, Solomon returned to Constantinople, leaving his son Nathan in Venice to be educated. The success of this mission cheered the Jews in Turkey, particularly in Constantinople, where they had attained great prosperity.

Azariah dei Rossi.

At that time there lived in Italy a man of the highest intellectual attainments, one who could have done much for Judaism had he been possessed of greater courage or had the times been more propitious—Azariah dei Rossi (Min ha-Adummim), a native of Mantua and the author of "Me'or 'Enayim." He went from Mantua to Ferrara, and thence to Bologna; and everywhere he was regarded as a marvel of learning. Rossi was conversant with all Jewish literature, Biblical as well as Talmudical; he was likewise familiar with Latin and Christian literature, with the works of the Fathers of the Church as well as with those of Philo and of Flavius. The orthodox rabbis opposed the "Me'or 'Enayim," the rabbi of Mantua prohibiting its study by young men under twenty-five years of age; but it found favor in the world at large and was translated into Latin. A contrast to Rossi was Gedaliah ibn Yahya of northern Italy, who traveled about as a preacher in that part of the country. His short history of the Jews, entitled "Shalshelet ha-Ḳabbalah," is a mixture of fables and fantastical tales; but it was more generally appreciated than the careful work of Dei Rossi. At this epoch there became famous in the field of the new Cabala Vital Calabrese and Isaac Luria, both of whom were well received at Safed, the center of the adherents of the new occult doctrine which was to bring such great loss to Judaism.

Persecutions and Confiscations.

The position of the Jews of Italy at this time was pitiable; the bulls of Paul IV. and Pius V. had reduced them to the utmost humiliation and had materially diminished their numbers. In southern Italy there were almost none left; in each of the important communities of Rome, Venice, and Mantua there were about 2,000 Jews; while in all Lombardy there were hardly 1,000. Gregory XIII. was not less fanatical than his predecessors; he noticed that, despite papal prohibition, Christians employed Jewish physicians; he therefore strictly prohibited the Jews from attending Christian patients, and threatened with the most severe punishment alike Christians who should have recourse to Hebrew practitioners, and Jewish physicians who should respond to the calls of Christians. Furthermore, the slightest assistance given to the Maranos of Portugal and Spain, in violation of the canonical laws, was sufficient to deliver the guilty one into the power of the Inquisition, which did not hesitate to condemn the accused to death. Gregory also induced the Inquisition to consign to the flames a large number of copies of the Talmud and of other Hebrew books. Special sermons, designed to convert the Jews, were instituted; and at these at least one-third of the Jewish community, men, women, and youths above the age of twelve, was forced to be present. The sermons were usually delivered by baptized Jews who had become friars or priests; and not infrequently the Jews, without any chance of protest, were forced to listen to such sermons in their own synagogues. These cruelties forced many Jews to leave Rome, and thus their number was still further diminished.

Varied Fortunes.

Under the following pope, Sixtus V., the condition of the Jews was somewhat improved. He repealed many of the regulations established by his predecessors, permitted Jews to sojourn in all parts of his realm, and accorded to Jewish physicians liberty in the practise of their profession. David de Pomis, an eminent physician, profited by this privilege and published a work in Latin, entitled "De Medico Hebræo," dedicated to Duke Francis of Urbino, in which he proved to the Jews their obligation to consider the Christians as brothers, to assist them, and to attend them. The Jews of Mantua, Milan, and Ferrara, taking advantage of the favorable disposition of the pope, sent to him an ambassador, Bezaleel Massarano, with a present of 2,000 scudi, to obtain from him permission to reprint the Talmud and other Jewish books, promising at the same time to expurgate all passages considered offensive to Christianity. Their demand was granted, partly through the support given by Lopez, a Marano, who administered the papal finances and who was in great favor with the pontiff. Scarcely had the reprinting of the Talmud been begun, and the conditions of its printing been arranged by the commission, when Sixtus died. His successor, Gregory XIV., was as well disposed to the Jews as Sixtus had been; but during his short pontificate he was almost always ill. Clement VII., who succeeded him, renewed the anti-Jewish bulls of Paul IV. and Pius V., and exiled the Jews from all his territories with the exception of Rome, Ancona, and Avignon; but, in order not to lose the commerce with the East, he gave certain privileges to the Turkish Jews. The exiles repaired to Tuscany, where they were favorably received by Duke Ferdinand dei Medici, who assigned to them the city of Pisa for residence, and by Duke Vincenzo Gonzaga, at whose court Joseph da Fano, a Jew, was a favorite. They were again permitted to read the Talmud and other Hebrew books, provided that they were printed according to the rules of censorship approved by Sixtus V. From Italy, where these expurgated books were printed by thousands, they were sent to the Jews of other countries.

In the Ducal Dominions.

It was strange that under Philip II. the Jews exiled from all parts of Spain were tolerated in the duchy of Milan, then under Spanish rule. Such an inconsistency of policy was designed to work ill for the interests of the Jews. To avert this misfortune an eloquent ambassador, Samuel Coen, was sent to the king at Alessandria; but he was unsuccessful in his mission. The king, persuaded by his confessor, expelled the Jews from Milanese territory in the spring of 1597. The exiles, numbering about 1,000, were received at Mantua, Modena, Reggio, Verona, and Padua. The princes of the house of Este had always accorded favor and protection to the Jews, and were much beloved by them. Eleonora, a princess of this house, had inspired two Jewish poets; and when she was ill public prayers were said in the synagogues for her restoration to health. But misfortune overtook the Jews of Ferrara as well; for when Alfonso I., the last of the Este family, died, the principality of Ferrara was incorporated in the dominions of the Church under Clement VII., who decreed the banishment of the Jews. Aldobrandini, a relative of the pope, took possession of Ferrara in the pontiff's name. Seeing that all the commerce was in the hands of the Jews, he complied with their request for an exemption of five years from the decree, although this was much against the pope's wish.
